DEVELOPMENTS: Modern integrated container terminal for third generation vessels to be built. Initially 2×900 ft. berths with depth of 42 ft. are planned.

One container crane already commissioned at Berth No. 23.

4 general cargo berths completed and commissioned at Juna Bunder (Berth Nos. 25 – 28), depth alongside 30 ft.

New oil products terminal (old berth OP II and OP III) to be built and ready by 1992 for 75,000 d.w.t. tankers.

2 modern seagoing pilot boats under construction.

SHIPMASTER'S REPORT: January 1980: Survey Vessel.

Approaches/Pilotage: There were a large number of ships anchored in the approaches – even in the "Prohibited Anchorage Zone".

Port Control System: Contact must first be made by Aldis lamp, and a vessel's arrival is not acknowledged until this has been done. On our first visit we had some trouble as the actual Signal Station is not at the position marked "Signal Station" but at Lat. 24° 48.8′ N., Long. 66° 57.0′ E. marked F.S. on the Chart. I was politely informed on the VHF that unless I contacted them by Morse lamp, they would not be able to speak to me on the VHF.

The Pilot boards 2 miles S.W. of the breakwater – if vessel comes closer it will be sent out again. Manropes are required for the ladder.

Quarantine: The normal message should be sent 24 hours before arrival. A doctor boarded on arrival alongside, and required Vaccination Lists, together with the Maritime Declaration.

Port Officials: Immigration/Docks/Customs: A vessel bound for Karachi would do well to get a set of local forms from the Agent in advance.

The main Customs Declaration is very detailed.

Ship's own Personal Effect Declaration Lists showing, in addition, beer, watches, cameras, and foreign currency, were accepted.

At least 12 copies of the Crew List on arrival are required, plus 2 Sailing Crew Lists.

When all other Officials have finished, the Customs seal up the Bond.

Special Warning: Pakistan is a Muslim country. Notices should be displayed warning that it is prohibited:

1. To use cameras.
2. Give alcohol to locals.
3. Change money without obtaining a proper receipt.

Berths: We called at Karachi twice, and each time, in spite of a very full port, Agent managed to obtain a berth alongside.

Explosives: Loaded ex-barge, whilst alongside. No problems. Shore stevedore gang used.

Bunkers: Ex-road wagon, well organised and quick.

Water: Ex-quay. Good rate. Good quality.

Lub Oils: Received 2 drums of Stern Tube Oil, which we had not been able to obtain elsewhere.

Divers: The services of a diver were used to clear fouling from engine cooling water intakes.

Ship Chandler: Only fresh vegetables and some chickens were purchased, but these were good quality.

Laundry: Good and fast.

Watchmen: Supplied by shipwrights. With the rise and fall of tide in Karachi, the gangway needed constant attention. Nothing was reported stolen.

Repatriation: Possible.

SHIPMASTER'S REPORT: May 1989.

Documents: When the Pilot boards the ship he will provide the Master with two forms to be filled in. The total cargo on deck is requested, as well as the cargo on deck for Karachi and the cargo on deck in transit, both in measurement tons.

Agent:

2 copies Crew List.

5 forms stating the amount of deck cargo.

1 form stating:
- (a) Number of passengers.
- (b) Amount of ship's foreign currency.
- (c) Number of favour parcels on board.
- (d) No opium nor dangerous drugs on board.

2 forms stating: Names of the officers, together with their Seaman's Book number, their Certificate of Competency number and date and place of issue.

2 copies Arrival Reports.

2 copies Vessel Stores Lists, stating amount of explosives and rockets.

The Agent will provide all the forms.

Customs:

5 copies Crew List.

2 copies Personal Effects List, showing crew's currency and ship's currency.

2 copies Stores List (make sure the figures are correct as the Customs Officer will actually count everything in the bonded stores).

All cameras should be placed in the bonded stores.

Quarantine:

1 copy Maritime Declaration of Health.

1 copy Crew List

Immigration:

5 copies Crew List.

VHF: When making a VHF telephone call through Karachi Radio, they require permission from the Agent, so have the telephone number of the Agent ready.

Shore Leave: Shore passes are obligatory and shore leave is prohibited between 2200 hrs. and 0600 hrs.

AUTHORITY: Karachi Port Trust, (P.O.Box 4725), Eduljee Dinshaw Road, Karachi 2. *Tel:* 201787. *Telex:* 2739 Kpt Pk. *Cables:* Portrust, Karachi. *Contact:* Commodore S.N.A. Shah, General Manager – Operations.

AGENT: G.A.C. Shipping (Pvt.) Pakistan Ltd., 4th Floor, K.D.L.B. Building, 58 West Wharf Road, Karachi, Pakistan. Tel: (922-1) 200341, 200764, 201656, after office hours: 654239, 658634, 610787. Telex: 23009 GAC Pk. Fax: 2418714. Cables: Gacshiping, Karachi.

PORT MUHAMMAD BIN QASIM: 24.46 N. 67.21 E. (See Plan)

PORT LIMITS: Seaward Boundaries: Area enclosed within the following geographical co-ordinates:

(a)	Lat. 24° 35′ N.	Long. 67° 00′ E.
(b)	Lat. 24° 35′ N.	Long. 67° 02′ E.
(c)	Lat. 24° 32′ N.	Long. 67° 00′ E.
(d)	Lat. 24° 32′ N.	Long. 67° 02′ E.

DOCUMENTS:

1. Freight Manifest (4 copies).
2. Bills of Lading (4 copies).
3. Stowage Plan (4 copies).
4. Passenger Manifest (4 copies).
5. Cargo Manifest (4 copies).
6. Hatch Lists (4 copies).
7. Exception Lists (4 copies).
8. Passenger Lists (4 copies).

With vessel:

9. Cargo Manifest (4 copies).
10. Last Port Clearance Certificate (4 copies).
11. Passenger List, Disembarking and Transit (4 copies).
12. List of Favour Parcels (4 copies).

The following special Pakistan forms are brought on board by Agent for completion on arrival:

13. Customs Arrival Reports (4 copies).
14. Opium and Dangerous Cargo Certificate (4 copies).
15. Ship's Currency Lists (4 copies).
16. Deck Cargo Certificates (4 copies).
17. Company's Arrival Report (4 copies).
18. Ship's Crew Advance, (if required), (4 copies).
19. Expiry date of Ship's Certificates (4 copies).
20. Bottom or In-Transit Cargo (4 copies).
21. Crew Lists (4 copies).
22. Stores Lists (4 copies).
23. Property Lists (4 copies).
24. Cargo Gear Information Forms (4 copies).
25. Advance Arrival Note (4 copies).
26. Application to enter port (4 copies).
27. Permission to enter and berth (4 copies).
28. Ship's Documents Check List (4 copies).

PILOTAGE: Compulsory. Pilot boards about 1.5 miles S.W. of Fairway Buoy. Give 48 hours' notice to Port Qasim Control by cable and later contact them by VHF Channel 16, about 6 hours before arrival.

ANCHORAGES: Outer anchorage is bounded by limits mentioned in "Port Limits".

Holding ground is good but during S.W. monsoon heavy swell persists and it is advisable to anchor in Western part of the outer anchorage and pay out extra cable.

RESTRICTIONS: Channel is well marked but night pilotage is not provided at present. Vessels must dock before dark and sail out in sufficient time to clear the channel before dark.

MAX. SIZE:

Periods	*Berths*	*Max. Draft* (m.)	*Max. LOA* (m.)	*Max. Beam* (m.)
(i) Monsoon				
15th May to 15th September	IOC Berth	10.5	201.0	25.3
	MW Berths			
	1 to 4	10.0	183.0	25.0
	5 to 7	10.5	183.0	25.0
(ii) Non-Monsoon				
16th September to 14th May	IOC Berth	12.0	225.0	32.0
	MW Berths			
	1 to 4	10.0	183.0	25.0
	5 to 7	11.0	183.0	25.0

Note:
1. Draft is subject to change monthly and without any notice.
2. Minor deviation permissible at the discretion of Port Qasim Authority on submission of Indemnity.
3. Maximum permissible draft/dimensions are promulgated through Notices to Mariner. Normally ships up to 50,000 d.w.t. can be handled during non-monsoon period and 25,000 d.w.t. during monsoon period.

Also see "Shipmaster's Report" dated October 1985.

Notice:
Notice to Mariners: 173(T) – Port Muhammed Bin Qasim – Permissible Draft from 1st October 1988 – 31st December 1988.

Maximum permissible drafts for ships calling at Port Muhammed Bin Qasim between 1st October 1988 and 31st December 1988 will be as follows:-

Period	*Berths*	*Max. Draft* (m.)	*Max. LOA* (m.)	*Max. Beam* (m.)
1st October 1988 to 31st December 1988.	IOC Berth	11.0	225.0	32.2
	M.W. Berth 1	9.5	183.0	25.0
	M.W. Berth 2 – 4	10.0	183.0	25.0
	M.W. Berth 5 – 7	10.5	183.0	25.0

2. Ships on arrival at outer anchorage to intimate drafts and specification of the vessel.
3. Cancel PNM No. 150(T)/88 on 30th September 1988.

HEALTH: Pratique granted only after berthing.

RADIO: Send all messages via Karachi Radio, call sign ASK, MF 500 kHz, 466 kHz, 484 kHz, HF 8644 kHz, 1302 kHz, 3024 kHz, 8361.2 kHz, 12541.8 kHz and 8658 kHz.

Karachi Radio can also be contacted on Radio telephony on following frequencies:

Channel	*MHz*
16	158.80 VHF
10	156.50 VHF
07	160.95 VHF
02	160.70 VHF
05	160.85 VHF

VHF: Contact should be made with Port Qasim Control as soon as within VHF range and ETA transmitted. Berthing and boarding of Pilot instructions are given on VHF by Port Qasim Control on following Channel/Frequencies:

Channel	*MHz*
16	156.800 VHF
10	156.500 VHF

Round the clock watch on above Channels is maintained.

RADAR: No port radar service available.

TUGS: 3 tugs namely "Chara", "Gharo" and "Kadiro" assist vessels and they join the vessel about 1.5 miles off the jetty. Each tug 3,500 b.h.p., bollard pull approximately 40 tons. In addition two light tugs each 1,000 b.h.p. are available. Ship's lines are usually used.

BERTHING: There are 7 multi-purpose berths for handling general and bulk cargo along a 1,400 m. long wharf for ships drawing 10.0 m. – 11.0 m. draft. Iron Ore and Coal Berth 279 m. long is used for importing bulk raw material for PAK Steel for ships drawing 10.0 m. – 12.0 m. draft. Also see maximum permissible draft information under "Max. Size".

A fixed mooring for 25,000 d.w.t. vessels has been laid in position:

Lat. 24° 46.28′ N., Long. 67° 18.42′ E.
Lat. 24° 46.20′ N., Long. 67° 18.53′ E.
Lat. 24° 46.15′ N., Long. 67° 18.48′ E.
Lat. 24° 46.23′ N., Long. 67° 18.38′ E.

CRANES: 2 grab gantry cranes with a capacity to discharge about 500 t.p.h. each at Iron Ore and Coal Berth. Mobile cranes with lifting capacity up to 35 tons are available and can be provided upon request.

BULK CARGO FACILITIES: *Grain:* 2 automatic unloading and bagging plants with a total capacity of 4,000 tons per day are available.

Also see "Berthing" and "Cranes".

SPECIALISED CARGO HANDLING FACILITIES: None at present.

BRIDGES: None.

STEVEDORES: 3 cargo handling companies appointed by the Port work as terminal operators for handling the cargo at multipurpose berths. Average handling rate per hook hour for following commodities is:

Rice	: 43.0 tonnes
Pig Iron	: 38.0 tonnes
Cotton	: 12.0 tonnes
General Cargo	: 10.0 tonnes
Wheat	: 25 – 50 tonnes

12 hours' advance notice to be served in order to arrange gangs.

Working Hours: 0800 – 1600, 1600 – 2400, 2400 – 0800.

MEDICAL: Medical centre with first aid facilities is available round the clock in the port area. Adequate medical facilities and hospitals are available in Karachi, (the nearest one within 20 km.). Medical facilities can be arranged by the Ship's Agent on Master's request.

TANKERS: Marginal Wharf No. 1 temporarily converted into tanker berth. Diameter of discharge line 18 in. Rate of discharge 1,000 t.p.h.

DENSITY: Average density of water is 1025.

FRESH WATER: Available through shore connection and by barge.

FUEL: Arranged by Agent and available through local oil companies, delivered by oil barge or road tankers.

FIRE PRECAUTIONS: Normal fire precautions, fire hydrants are located at Marginal Wharf and IOC Berth. Port has two fire tenders (water and foam) plus 5 fire trailers (heavy duty) with water and foam to fight fires.

CONSULS: Available at Karachi.

REPAIRS: All types of repairs can be carried out through private contractors of which prior notice, with details, must be given to Agent in good time. Repairs are subject to Port Authority's permission, keeping in view availability of berth, other safety precautions, prevailing rules, etc.

DRY DOCKS: None at Port Qasim, however, available at Karachi Port.

SURVEYORS: Cargo Surveyors available, services if required can be arranged through local Agents; also Classification Surveyors of various societies such as Lloyd's Register, American Bureau, Bureau Veritas, etc., have local offices in Karachi.

GANGWAY/DECK WATCHMEN: Advisable, but at Master's discretion.

HATCHES: Opening and closing by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 6 ozs. of spirits (for non-Muslims only) per week.

CARGO GEAR: Heavy lift cargo and normal loading/discharging carried out by ship's gear. Mobile cranes available for hire on request.

REPATRIATION: Possible. Advisable to give prior notice to Agents t complete formalities.

AIRPORT: Karachi International Airport is approximately 30 km. fro Port Qasim and is served by regular national and international airline

TIME: GMT plus 5 hours throughout the year.

HOLIDAYS: As declared by Government of Pakistan. Cargo work ca be arranged on holidays except on Eid Ul Fitr, Eid Ul Azha, Muharra Defence Day of Pakistan (6th September), Eid Milad Un Nab Independence Day (14th August), Pakistan Day (23rd March), Jumat Vida, Quaid-E-Azam Birthday (25th December), Quaid-E-Azam Deat Anniversary (11th September) and any other days so declared b Government of Pakistan or Port Qasim Authority.

POLICE/FIRE/AMBULANCE: Can be contacted through Port's PAB telephone exchange 719700 (10 lines).

EMERGENCY CO-ORDINATION CENTRE: Pakistan Navy frequencie – 500 and 8364 kHz. on HF and 282 and 243 MHz. on VHF.

TELEPHONES: Facilities for installing telephones on board availabl on request, telephone calls can also be made from telephones in th C.H.C. offices, located on jetties.

SERVICES: All facilities such as compass adjusting, radio and rada repairs, tank cleaning, etc., can be arranged through respective shippin Agents.

BANKS: 4 local banks are available.

STORING: See "Prelims".
1. Yes.
2. Yes, except when disallowed for safety reasons.
3. Yes.
4. Yes.
5. Prevailing Customs rules are to be observed.
6. Can be arranged through ship's Agent.

SHORE LEAVE: Allowed. Shore passes issued by Immigration Authorit to ship's crew.

IDENTIFICATION CARDS: Only valid shore passes used a identification.

REGULATIONS: As per Gazette of Pakistan notification No. S.R.O. 4 (KE)/81 dated: 17th October, 1981 – Part iv (Safety Regulations).

DELAYS: None.

DEVELOPMENTS: Establishment of integrated Container Terminal an Oil Tanker Terminal are in hand.

SHIPMASTER'S REPORT: September 1982 (Updated 1988).

Port Limits: A vessel is considered to be an arrived ship when she is i the anchorage marked on the chart West of Fairway Buoy. Vessel mus register with Port Bin Qasim Control as an arrived ship and only whe same confirmed by the port can the Master tender notice of readiness Pilot boards about 1 nautical mile off Fairway Buoy.

Documents: Same as for Karachi. Keep extra Crew Lists at hand. Privat property declaration must contain serial numbers, make, etc., whereve possible. All currency must be declared.

Pilotage: Give 48 hours' and 24 hours' notice to Bin Qasim Pilot Contro by cable and later contact them by VHF Channel 16, about 12 hour before arrival.

Anchorage: Outer anchorage is in area bounded by positions A, B, and D. See "Port Limits".

Holding ground is good but during S.W. monsoons heavy swel persists and it is advisable to anchor near Western proximity and pa out extra cable.

Restrictions: No night pilotage. Vessel must dock before dark an similarly must sail out in sufficient time to clear the channel before dark Draft restrictions as per tide. Heavy swell/tide runs across the channe at S.W. monsoons.

Max. Size: Presently max. size is 50,000 d.w.t. but main limiting facto is the depth of water in the channel which varies with the tide.

Health: Pratique granted only after berthing. Radio Pratique not possible

Radio: Send all messages via Karachi Radio. Contact should be made with Bin Qasim Port Control as soon as within VHF range on Channe 16 and ETA given. Berthing instructions are given on VHF.

Tugs: Port has 3 tugs and they join the vessel about 1.5 miles from the jetty. Usually ship's lines are used for tugs.

Berthing: Iron ore and coal jetty owned by Pakistan Steel Mills fo importing coal and iron ore for the steel plant. Jetty is 900 ft. long 12.80 m. depth alongside.

Cranes: Two cranes with grabs each weighing about 11 tons. Togethe they can discharge bulk coal at approximately 15,000 tonnes per da of 24 hours. Cargo is carried directly to the steel mill by conveyor bel – about 2 miles long.

Bridges: None.

Stevedores: Pakistan Steel Mills personnel.

Medical: No facilities exist in Bin Qasim. All medical facilities in Karachi

Density: Salt water.

Fresh Water: Available by shore connection. Costs about Pak. Rs.45/- per ton.

Fuel: Not available.

Consuls: At Karachi.

Repairs: Only very minor repairs possible by workshops from Karachi Prior notice with details must be given to Agents in good time.

Dry Docks: None.

Surveyors: Available from Karachi.

Gangway/Deck Watchmen: Not necessary.

Hatches: Opening/closing carried out by crew.

Customs Allowances: One bottle spirits and 200 cigarettes per week Before arrival Master must collect all cameras to be placed under sea by Customs.

Cargo Gear: Shore gear is used.

Repatriation: Possible. Advisable to give prior notice to Agents t complete all formalities prior arrival.

Airport: Karachi International airport is about 35 miles from Port Bi Qasim.

Time: GMT plus 5 hours throughout the year.

Telephone: Available on jetty only.

Shore Leave: Shore passes issued by Immigration and crew allowed ashore.
Delays: Usually none.
General: All the information above is for Iron Ore and Coal Jetty at Port Bin Qasim only.

I called at this port on 25th with 27,100 tonnes of coal in bulk from Newcastle (N.S.W.) and sailed out on 27th.

I was asked to arrive at a maximum draft of 10.00 m. For deep drafted vessels Pilot normally boards about 2.5 hours before HW so that vessel docks alongside at HW. The channel (about 25 miles) is dredged to 11.30 m., while alongside berth and in the turning basin off the berth the depth is 12.80 m. However, in my case the Pilot boarded about 2 hours after HW and by the time vessel tied up alongside it was almost LW. All along the channel I noticed that there was at least 2 m. clearance under the keel at all times.

SHIPMASTER'S REPORT: October 1985.
Max. Size: In October the following maximum drafts and sizes were permitted for vessels calling at Port Bin Qasim:

Pakistan Steel Mills Wharf (IOC berth): Draft 11 m., LOA 223 m., beam 31.1 m.

Main Wharf, Berths No. 1 to 4: Draft 10 m., LOA 183 m., beam 25 m.

Main Wharf, Berths No. 5 to 7: Draft 11 m., LOA 183 m., beam 25 m.
Health: All crew to have valid cholera vaccination.
Shore Leave: All crew should be back on board by 2200 hrs.
Provisions: Delivery by trucks alongside main wharf but extra charges for transportation as everything has to come from Karachi, 75 km. away.
Fresh Water: Available by shore connection at all berths. Delivery rate 15 to 20 t.p.h. Good quality.
Bulk Cargo Handling (Main Wharf): Bulk grain discharged by vacuators into bagging machines. No elevators.
General Cargo Handling: All cargo normally handled by ship's gear. Some mobile cranes available in emergency, SWL not known. Containers not normally handled at Bin Qasim. This port is mainly used for large consignments of bulk grains and bagged rice for export.
Stevedores: Normally round-the-clock basis with only 3 meal breaks. Loading rate of bagged rice: Up to 1,000 tonnes per hatch per 24 hours.

SHIPMASTER'S REPORT: March 1986.
Chart: No. 1284.
Pilotage: Compulsory. Pilot boards in vicinity of Fairway Buoy 24° 33′ N., 67° 03′ E. and likes to disembark from outgoing vessels between Buoys No. 7 and 8. Vessels handled during daylight hours only. Pilot boat "Lahoot" steel motor boat, equipped with Radar and VHF. Distance from Fairway Buoy to berths 24 miles.
Anchorage: In vicinity of Fairway Buoy or Quarantine Anchorage close by, good holding ground.
Drafts: For iron ore and coal berths (4 berths), 10 m. For multi-purpose berths (7 berths), 11 m.
Radio: Karachi Radio ASK (a very busy station). Port Qasim Control maintains continuous VHF watch on Channel 16, working 10, can be contacted from a great distance and advises vessels for berthing. It is a very helpful station.
Tugs: There are 3 well equipped sea going tugs of 3,500 b.h.p. with a bollard pull of 40 tons to assist vessels for berthing/unberthing. Ship's lines always used.
Cranes: Loading/discharging carried out by ship's gear. Mobile cranes of 24 tons lifting capacity available at extra cost.
Specialised Cargo Handling Facilities: Bulk unloading facilities for iron ore and coal. Mechanised bulk wheat handling facilities.
Bunkering: Available through local oil companies, delivered ex-barge or truck, ample time required for stemming bunkers.
Classification: Surveyors for Classification and cargo available (from Karachi).
Airport: Karachi International Airport situated approx. 30 km. from Port Qasim.
Consuls: None at Port Qasim, all reside in Karachi approx. 65 km.
Fresh Water: Available at all berths. Good quality. Supplied through Port Authorities on very short notice. Stevedores usually take care of it.
Tides: Approximately 1 m.
Future Development: Future dredging of the Channel in order to take vessels fully laden up to 75,000 d.w.t. Also plans for navigating the channel day and night.
Rice Cargoes: Vessels loading rice (which is the main export cargo in this port) are inspected at Fairway Buoy prior to berthing by a total of five Government Inspectors who issue relevant Certificate.

AUTHORITY: Port Qasim Authority, P.O. Port Bin Qasim, Karachi-48, Pakistan. *Tel:* 719700–09. *Telex:* 2633 Qasim Pk. *Cables:* Port Qaty. *Contact:* Rear Admiral Akbar H. Khan, Chairman. Captain Khalid Ali Khan, General Manager (Operations); Captain M. Mohsin Khan, Deputy Conservator. Captain N. A. Shamsi, Harbour Master.

AGENT: See "Karachi".

NOTES

Please also advise Shipping Guides Ltd.

Republic of Panama

AGUADULCE: 08.14 N. 80.30 W. (See Plan)

LOCATION: The Port of Aguadulce is located 7 km. from the coast on the Palo Blanco inlet in the Bay of Parita, Pacific coast of Panama.

The port consists of a single quay 70 m. long used mainly for shipment of bulk sugar and molasses to ports in the U.S..

DOCUMENTS: The same documents are required and the same procedures are followed as for Almirante, Puerto Armuelles and Bahia Las Minas. See "Almirante".

PILOTAGE: There is an official pilotage service with Pilots available 24 hours a day. Pilotage is compulsory for all vessels greater than 150 g.r.t., wishing to enter and leave the port. To request the Pilot, the vessel's Agent must make arrangements with the National Port Authority. The pilot station is in Aguadulce. Vessels can also ask for Pilot by calling the National Port Authority on Channel 12 VHF.

ANCHORAGE: Vessels must await the Pilot at the anchorage located near the sea buoy which is painted white with a white light flashing every 2 seconds. Position of the buoy is Lat. 08° 13′ N., Long. 80° 25′ W. Depth of water at the buoy's location is 7.4 m. (22 ft.), average low tide, and in places 1 mile to the N.E. it increases to 10.14 m. (30 ft.).

RESTRICTIONS: The port is on an inlet. It has an access channel 13 km. long from the sea buoy. The width of the channel varies from 200 m. in its widest part down to 75 m. at its narrowest.

The channel is marked by buoys which are lit and coming from the sea the buoys on the starboard side are red with even numbers and red lights and those on the port side are green with odd numbers and green lights.

The port is tidal and vessels may only enter and leave on the high tide. At low water the access channel has depths of less than 1 m. (3 ft.) for which reason the maximum draft permitted in the port is 6.4 m. (19 ft.) with 6.1 m. (18 ft.) high tides. Furthermore, inside the inlet there are fairly sharp curves which do not permit entry of vessels greater than 100 m. overall length and 2,500 g.r.t. In the future it is planned to dredge the access channel to provide minimum depths of 3.3 m. (10 ft.) at low tide.

HEALTH: As with other Panamanian ports, the doctor boards the vessel with the other officials of the reception commission. If there is any infectious illness on board, the Master must communicate this to the Port Authority by VHF Channel 12.

VHF: The Port Authority has VHF equipment. Call on Channel 12. It operates throughout the day.

TUGS: None available.

BERTHING: There is a main quay 70 m. long with an average low water depth of 3.3 m. (10 ft.) There is also a small quay 30 m. long which is not used. The quay has a fender system. There is also a dolphin type quay for shipment of molasses with depth 2.7 m., and a 50 m. berth for sugar carriers, which has automatic sugar loaders, depth 2.7 m.

No loading equipment available. Unloading must be by ship's gear. There are belt type sugar loaders. Mobile cranes can be contracted in Aguadulce.

There are two storage tanks for molasses of 1,000,000 and 500,000 gallons capacity respectively.

There are also open air facilities for storage of general cargo.

STEVEDORES: Loading and unloading work is carried out by a gang of local workmen contracted by the ship's Agent, via their representative.

MEDICAL: Hospital in Aguadulce.

DENSITY: Approximately 0.9971 gm./c.c. at 85°F.

FRESH WATER: Available via tanker lorries. No supply via pipes.

FUEL: Not available.

CONSULS: None; the nearest are in Panama City 193 km. from the port by road.

REPAIRS: No facilities.

CUSTOMS ALLOWANCES: See "Almirante".

PROVISIONS: Supplies available in Aguadulce.

COMMUNICATIONS: The port is connected to the town of Aguadulce by an asphalt highway 5 km. long.

Aguadulce is connected to Panama City by road, the capital being 193 km. distant.

AIRPORT: At Aguadulce there is a small airstrip. There is an airport at Chitre 60 km. from Aguadulce and where a local airline effects two trips between this town and the airport of Paitilla in Panama.

REPATRIATION: There are Immigration Officials on the quay. Repatriation presents no difficulty.

TIME: GMT minus 5 hours.

POLICE/AMBULANCE/FIRE: Available in Aguadulce 5 km. from the port.

TELEPHONES: Telephone communication from the port by public telephone by micro-wave to any part of the world. No facilities for phones on board vessels.

SHORE LEAVE: No restrictions.

AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Jerry Salazar, Director General.

National Ports Authority – Aguadulce, Carretera del Puerto, Aguadulce, Provincia de Cocle, Panama. *Tel:* 97-4264. *Contact:* The Port Administrator.

ALMIRANTE (Bocas del Toro): 09.18 N. 82.23 W. (See Plan)

LOCATION: Located in Almirante (Bocas del Toro) Bay, on the N.E. end of the Atlantic coast of Panama.

The Port of Almirante consists of a pier 204.5 m. long used for loading bananas. The port is used principally by reefer vessels coming from Europe and bound for European ports.

The port was built by the United Brands Company and later transferred to the Government. Currently, it is rented by United Brands but is administered by the National Port Authority.

DOCUMENTS:

1 General Declaration.
1 Clearance from Last Port.
5 Cargo Manifests, or Declaration that no cargo is carried.
4 Crew Lists.
3 Passenger Lists, or Declaration that no passengers are carried.
3 Stores Lists.
2 Crew Personal Effects Declarations.
1 Maritime Health Declaration.
1 Mail List.

The above documents must be presented in Spanish language by the Master of the vessel, when the National Port Authority boards the ship.

Once the National Port Authority finds the documents correct, Free Pratique is given, enabling the vessel to commence operations.

PILOTAGE: Pilotage is compulsory for vessels entering Almirante.

The service is provided by a private Pilot who has his station in the town of Bocas del Toro. To request his services, the Agent must make arrangements with the Port Administration. Vessels using Almirante frequently take the Pilot on board in the Bay of Almirante, in front of the town of Bocas del Toro. The pilot cutter is blue with white superstructure, and has VHF radio. To communicate with the cutter, call up on VHF Channel 12 and Channel 16, with SSB fitment.

The Port Authority has established an official pilotage service, and all arrangements for the services of the Pilot must be made with the Port Authority. For vessels arriving for the first time in Almirante, they must anchor outside the entrance of Bocas del Toro aligned at 150° to 180° to Toro Point and 8 cables off. At this point, they must await the Pilot.

ANCHORAGES: Within the Bay of Almirante there are good locations with depths up to 27.4 m.

In front of the quay there is space to anchor with depths of 15.2 m. – 18.3 m.

RESTRICTIONS: The entrance channel has a minimum depth of 9.2 m. and is marked by buoys and light floats as indicated on the Port Nautical Charts. Also see "Developments".

Shipmaster's Report: The water depths on passing Bocas del Toro are greater than 9.2 m. as you follow the charted course lines.

Proceeding at a reduced speed consisting of "dead slow" and "stop", with enough manoeuvrability, to minimise the vessel's pitching, you can enter or leave the Bocas del Toro with a draft of 7.9 m. without any difficulties.

On entering and leaving I was forced by cargo circumstances to berth with a 7.9 m. deepest draft, and never had less than 3.05 m. below my vessel's keel (deepest section), at low water.

MAX. SIZE: There are no restrictions as to beam and size of vessel; but as far as draft is concerned this must not exceed 9.2 m.

Bocas del Toro can be entered and left with drafts of 8.84 m. without difficulty.

HEALTH: The doctor on boarding the vessel with the Reception Commission receives his documents and declares Free Pratique.

In the event of illness on board, Agent must be advised by VHF radio and this will be passed on to the doctor.

RADIO: Cables for and from the Agent are sent by radio operated by Tropical Radio Telegraph Co. The Port Authority has VHF and SSB equipment. The SSB equipment operates on the call-up frequency of 7447.5 kHz.

VHF: VHF communications can be made on Channel 12 at a distance of 30 miles from the port. Furthermore, United Brands Co. has VHF equipment which receives calls on Channel 16.

TUGS: None available.

BERTHING: A banana quay 204.5 m. long with a single mooring frontage and with 4 automatic banana loaders. It is recommended that vessels moor on the starboard side. Also there is a general cargo quay 103.05 m. long which has pipes for discharge of refined oil. The depth at the quay is 7.3 m. – 9.7 m.

Equipment: 4×4 tonne forklift trucks, 1×5 tonne mobile crane.

STEVEDORES: Loading work is carried out by the local Workers Union. The Agent must make contact with United Brands Co. for these workers.

MEDICAL: A modern hospital is available in Changuinola 20 km. from Almirante. Almirante also has a small hospital.

TANKERS: Quay No. 2 fitted with pipes for discharge of refined products.

DENSITY: 1022.

FRESH WATER: Available throughout the year. The pumping capacity is 2–3 t.p.h.

FUEL: Not available.

CONSULS: Costa Rica, El Salvador, Honduras, Nicaragua.

REPAIRS: No facilities for repairs to vessels.

PROVISIONS: Obtainable in the local market; but it is preferable for provisions to be obtained in Colon.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: The Customs offices are in the port vicinity. Permitted quantities are 2 packs of cigarettes of 20 packets each per crew member and 2 bottles of whisky or other alcoholic drink per crew member for consumption on board.

AIRPORT: There is a small airport at Changuinola 21 km. from Almirante, which connects the province of Bocas del Toro with the rest of the Republic. There are 2 flights a day between the airport of Changuinola and General Omar Torrijos Herrera in Panama City. Changuinola is connected with Almirante by railway.

REPATRIATION: Can be effected without difficulty.
TIME: GMT minus 5 hours.
POLICE/AMBULANCE/FIRE: Available in Almirante.
TELEPHONE: There is a micro-wave telephone service to Panama and other places in America. The Port Authority has telephones in their offices, but there are none available for installation on vessels.
SHORE LEAVE: No restrictions.
DEVELOPMENTS: It is planned to reposition the buoys marking the port entrance channel for the purpose of obtaining a minimum depth of 9.7 m. along the whole of the port access channel.
AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Jerry Salazar, Director General.

National Port Authority, Entrega General, Almirante, Changuinola, Bocas del Toro, Panama. *Tel:* 78-3711. *Contact:* Port Administrator.

BAHIA LAS MINAS : 09.24 N. 79.49 W. (See Plan)

LOCATION: Situated 11 km. to the East of the entrance of the Panama Canal on the North Coast.
DOCUMENTS:

2 General Declarations.
1 Clearance Certificate from last port of call.
5 Cargo Manifests, or Declaration to the effect that no cargo is carried.
4 Passenger Lists, or Declaration that no passengers are onboard.
2 Supply Lists, or Declaration that no supplies are carried.
2 Lists of Crew's Personal Effects, or Declaration that none carried.
1 Maritime Health Declaration.
2 Mail Lists or Declaration that no mail is carried.
2 Crew Lists.

PILOTAGE: Compulsory for all vessels entering the port and is offered by the Pilots of the Marine Department of the Refineria Panama S.A.

Vessels must await the Pilot beyond Buoy No. 1 painted white, with a flashing white light every 3 seconds. The best position for anchoring is near Buoy No. 1 in position Lat. 09° 25′ 30″ N. Long. 79° 40′ 35″ W. where there is a depth of 63 ft. to 66 ft.

Vessels wishing to enter the port may call up the Port Authority on VHF Channel 12 or Refineria Panama on VHF Channel 16.

The Pilot craft has a black hull and white superstructure. When weather conditions are bad, a tug is used for boarding vessels.

The boarding ladder is placed in accordance with conditions of the sea.

Vessels may also ask for a Pilot via their Agents who will communicate the request to Refineria Panama. In this case, they must give an ETA 12 hours in advance.

RESTRICTIONS: The Port of Bahia Las Minas is mainly an oil port, specialised in importing crude oil and exporting refined products, being operated from an oil aspect by Refineria Panama S.A., and administered by the National Port Authority.

Apart from the tanker quays, there is a small quay for handling general cargo, length 90 m. This quay is administered and operated by the National Port Authority. The access channel to the port has a width varying from 300 m. in its widest part to 100 m. in its narrowest part, and a minimum depth of 40 ft. at the tanker quays. However, the general cargo quay can only take vessels of up to 23 draft. Tidal variation in this port is less than 1 ft., and so there are no restrictions for entry and leaving relating to tides.

MAX. SIZE: The port can be used by vessels up to 240 m. LOA at its tanker installations and their draft may not exceed 40 ft.

The general cargo quay can be used by vessels up to 152 m. LOA and 23 ft. draft. However, restrictions in vessels' lengths vary when the quay is used by Ro/Ro vessels which tie up by the bow or the stern, and in this case vessels up to 600 ft. length are permitted.

HEALTH: When a vessel arrives it must hoist the yellow flag of the International Signalling Code. Free Pratique will be granted by the Reception Commission after handing over of documents (See "Documents"). In the case of illness on board, this must be communicated to the vessel's Agent so that he may pass on the information to the Authorities. The vessel may not moor or carry out any operations until the doctor has come on board and verified that the illness does not constitute any danger.

RADIO: Vessels may communicate via the coastal station of the Panama Canal. Generally speaking, the same ships' agencies operating in the Canal are those who represent vessels arriving at Bahia Las Minas.

VHF: The Port Authority has VHF equipment at Colon which operates 24 hours a day on Channels 12 and 16.

For calls to the Port Authority, Channel 12 must be used. Refineria Panama also has VHF radio equipment and calls must be made via Channel 16.

RADAR: There is no radar service.
TUGS: Refineria Panama S.A. supplies this service to vessels which may require it. There are 4 tugs available. Generally, tugs work at the bow and stern of the ship, and lines must be fixed by the vessel's crew.
BERTHING:

Quay	*Length*	*Depth (Average low tide)*
Tanker quay	140 m.	40 ft.
2 lighter quays (refined products)	75 m. each	20 ft.
General cargo quay	90 m.	23 ft.

CRANES: There is no cargo handling equipment on the general cargo quay. All unloading must be by ship's gear.

SPECIAL CARGO FACILITIES: The dry cargo quay is used by Ro/Ro vessels making regular trips between Miami and Panama. The port offers unloading and loading services to these vessels.

The oil quays have special equipment for unloading and loading oil and its derivates.

STEVEDORES: These are provided by the Colon Port Workers' Union, and must be contracted by the ship's Agent. Working hours: 0700 – 1500 hrs. and 1700 – 0100 hrs.
MEDICAL: Hospital available in the town of Colon 15 minutes from the port.
DENSITY: 1.0212 grams per cu.cm. at 85°F.
FRESH WATER: Available.
FUEL: Pipe-lines are available at all oil quays, but no such facility is available at the general cargo quay.
CONSULS: Denmark, Finland. Norway, South Africa, Sweden, U.K.,
REPAIRS: Refineria Panama S.A. has a machine shop for minor repairs.
PROVISIONS: These can be obtained in the town of Colon via local suppliers, the Agent making the necessary arrangements.
REPATRIATION: This can be done without difficulty via the Immigration offices.
AIRPORT: There is a small runway at Colon. At Panama, 90 km. from Colon, is the airport General Omar Torrijos Herrera, which is an international airport, served by the main world airlines.
TIME: Local time is GMT minus 5 hours.
HOLIDAYS: 1st January, 9th January, Mardi Gras, 1st May, 11th October, 2nd and 3rd November, 4th November, 8th and 25th December.
POLICE/AMBULANCE/FIRE: Available in Colon. Refineria Panama has a small fire brigade, and also in the town of Colon, 15 km. away, there is a fire brigade.
TELEPHONE: None available for connection to vessels. Available in the Port Authority offices. Tel: 42-1658.
SERVICES: No special services offered. In the ports of the Canal it is possible to have compass adjustments, laundry, chemicals, etc.
SHORE LEAVE: No restrictions; but due to the distance between the port and Colon, a taxi service must be used.

SHIPMASTER'S REPORT: November 1989.
Chart: B.A. Chart No. 1300.
Documents:

2 copies Crew Manifest. 6 copies Crew List.
2 copies Stores List. 6 copies Cargo Manifest.

Officials: Port officials boarded the vessel one hour after berthing, due to local holiday. All formalities were carried out quickly.

Pilotage: The pilot boards at the Fairway Buoy from a launch with a black hull and white superstructure. The pilot office is near the root of the South tanker jetty and can be contacted on VHF Channel 16, working on Channels 10, 12 and 14.

Approaches: The port is 5 miles to the West of Cristobal and is identifiable by the silver coloured tanks on the shore and ships anchored off the port.

Buoys: See plan of Bahia Las Minas on B.A. Chart No. 1300.

The following changes were observed:

A. Buoy No. 1 is painted white and has been reclassified as the Fairway Buoy.
B. Buoy No. 3 has been renumbered No. 1 – the light and colour are as charted.
C. Buoy No. 5 has been renumbered No. 3 – the light and colour are as charted.
D. Buoy No. 7 has been renumbered No. 5 – the light and colour are as charted.
E. Buoy No. 9 has been renumbered No. 7 – the light and colour are as charted.
F. Buoy No. 11 has been renumbered No. 7B – the light and colour are as charted.
G. Buoy No. 10 has been repositioned in position Lat. 09° 23.85′ N., Long. 49° 21′ W.
H. There is a new buoy, No. 7A, Fl.W. (painted black) in position Lat. 09° 23.7′ N., Long. 79° 49.0′ W.

All other buoys are as charted.

Anchorages: The anchorages are in the vicinity of the Fairway Buoy in a depth of 10 fathoms. there is a small ground swell running.

Tugs: There are 3 U.S. type tugs available and one small tug. The small tug is quite suitable for small vessels. The tugs tie up alongside in the standard "U.S. method".

Berthing: There are 2 tanker berths, one barge dock and one dry cargo berth available. The tanker berths are standard "T" type jetties with mooring dolphins at each end and are connected to the shore by catwalks. Both berths are orientated 163°/343°. The original (South) jetty has a 24 m. straight face with large vertical wooden fendering. The platform is about 5 m. above chart datum. This berth handles all products, including the LPG and small crude tankers.

The newer berth, which was constructed in about 1977, is 0.25 miles North of the original berth. Crude oil imports only are handled at this berth by a 16 in. Chicksan arm.

There are currents running at the berth after heavy rain when the outflow from the Alejandro River has an effect. This also causes silting at the berth. In the dry season there is little or no current running.

The pilot advises with the maximum draft is 39 ft. and the depth alongside 45 ft. We found the least depth in the channel at chart datum to be 40 ft., except off the Southern tanker berth where 31 ft. was found in position Lat. 09° 23.6′ N., Long. 79° 49.05′ W.

The depth alongside the Southern tanker jetty was found to be 44 ft. at chart datum. The tidal range was about 1.5 ft. The maximum size vessel that can be accepted at the berth is 750 ft. LOA and 100 ft. beam.

Vessels berth port side alongside with the bow to seaward. Small vessels use 2 head lines and 2 stern lines and one spring forward and aft.

Oil pollution booms were sited but were not used.

The shore gangway (bridal type) is available at the South berth.

Cargo Operations: Only ambient Butane is received into the Horton Sphere and 5 horizontal cylinders. The total capacity is 20,000 bbls. The maximum shore back pressure is 100 p.s.i. (7 Bar). We pumped at our maximum rate of 700 bbls./hr. The hoses which were connected and disconnected by shore personnel are 4 in. – 300 ASA (liquid and vapour).

The Surveyor boards the vessel after the vessel is cleared inwards. Samples are taken and cargo operations cannot commence until analysis has been completed.

Fuel: Bunkers are available at both berths and by barge, which is owned by the refinery, at the anchorage. IFO is also available on the North berth.

At the time of our visit bunkers were not available at Cristobal, either alongside or at the inner anchorage, this was however only a temporary restriction.

Fresh Water: Available at the South Tanker Pier.

General: It is about 5 miles to Colon/Cristobal and the taxi charge is U.S.$5.0. It is possible to telephone for a taxi from the dock office.

U.S. Dollars are the only currency used and are obtainable from the agent with prior notice.

The local radio station is "Intelmar Panama". A good VHF service is in operation but is expensive and long delays with connections can be expected.

AUTHORITY: National Port Authority, P.O.Box 8062, Panama 7, Republic of Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Jerry Salazar, Director General.

National Port Authority, Bahia Las Minas, Colon, Republic of Panama. *Tel:* 42-1658, 47-9181. *Contact:* Port Administrator.

BALBOA: 08.58 N. 79.34 W. (See Plan)

(N.B. For items not listed below, see "Panama Canal".)

DOCUMENTS: See "Panama Canal".

PILOTAGE: Pilotage in the Port of Balboa is compulsory, and is effected by Pilots of the Canal Commission.

Vessels arriving for the purpose of using the port area in order to make use of a port facility must also pay for the pilotage service, which will be requested by the Agent.

Vessels of 150 g.r.t. or less do not require a Pilot.

When due to "force majeure" a vessel may have to enter the waters of the port area, this may be done without using a Pilot.

With regard to pilotage, furthermore, the vessel must comply with the 4 points in the Notice to Shipping which appear under the heading "Pilotage" in the port of Cristobal.

Also see "Cristobal".

ANCHORAGES: Vessels must anchor in the various allocated areas for the port.

a) *Anchorage for Merchant Vessels:*
This area is limited by the following co-ordinates:
Lat. 8° 51′ 50″ North, Long. 79° 30′ 00″ West
Lat. 8° 54′ 30″ North, Long. 79° 30′ 46″ West
Lat. 8° 54′ 46″ North, Long. 79° 30′ 00″ West
Lat. 8° 53′ 26″ North, Long. 79° 31′ 22″ West
and continuing out to sea.

b) *Prohibited Anchorage Area:*
This is limited by the following co-ordinates:
Lat. 8° 51′ 50″ North, Long. 79° 30′ 00″ West
Lat. 8° 52′ 47″ North, Long. 79° 31′ 38″ West
Lat. 8° 52′ 58″ North, Long. 79° 32′ 31″ West
Lat. 8° 54′ 15″ North, Long. 79° 33′ 36″ West
Lat. 8° 55′ 12″ North, Long. 79° 32′ 25″ West
Lat. 8° 54′ 17″ North, Long. 79° 30′ 52″ West
Lat. 8° 53′ 26″ North, Long. 79° 31′ 22″ West
and from here to the initial point.

c) *Anchorage Area for Vessels Carrying Explosives:*
This area is defined by the following co-ordinates:
Lat. 8° 52′ 47″ North, Long. 79° 31′ 38″ West
Lat. 8° 51′ 52″ North, Long. 79° 31′ 38″ West
Lat. 8° 51′ 52″ North, Long. 79° 33′ 00″ West
Lat. 8° 52′ 36″ North, Long. 79° 32′ 31″ West
and from here to the initial point.

RESTRICTIONS: Port open throughout 24 hours.

MAX. SIZE: Harbour limitations generally unrestricted as to length and beam. Depth about 40 ft. low water. Vessels in excess of 38 ft. 6 in. draft not handled during period 2.5 hours before and 2 hours after low water. Average tide 3.97 m. (13 ft.).

Tankers working cargo restricted to 700 ft. length and 36 ft. salt water draft.

BERTHING: No specific requirements as to arrival times. Nine berths available.

(Pleasure yachts, under 65 ft. length, may be permitted to dock at Panama Canal Yacht Club or Balboa Yacht Club after clearance by Boarding Officer and after Master has received permission from Port Captain, Customs Authorities and Yacht Club Officials concerned. Chief Customs Inspector shall have authority to grant or deny such permission at his discretion.)

Rodman Naval Station: Piers can accommodate vessels of 700 ft. length and up to 39 ft. draft for oil discharge, bunkers or stores.

NPA Dock:

Dock	*Usable length*	*Depth (M.L.W.S.)*	*Remarks*
6	742 ft.	11.1 m.	Bunkering/Tankers
7	1,058 ft.	11.0 m.	Containers
8	470 ft.	9.6 m.	Repairs/Containers
14	775 ft.	12.0 m.	Containers, Bunkering and Bulk Cargoes
15	1,146 ft.	13.2 m.	
16	742 ft.	12.6 m.	
18–A	500 ft.	12.4 m.	General Cargo and Bunkering
18–B	500 ft.	11.6 m.	
18–C,D	1,000 ft.	13.2 m.	

VHF: Vessels must make contact with the port via VHF Channel 12. Commercial telephone calls and messages to Agents must be made via Panama Radio, VHF Channel 16.

TUGS: Available and assigned for berthing by Pilot. Tug's lines used at no extra charge.

STEVEDORES: In Balboa there are 7 ship gangs and 4 shore gangs, who are available every day of the year, 24 hours a day.

Endeavour to arrange arrival to avoid cost of "stand by" as Agent arranges gangs for 0700 hrs. or 1700 hrs. commencement. Working Hours: 0700 –1500 hrs., 1700 – 0100 hrs. Overtime possible between 1500 – 1700 hrs. and 0100 – 0700 hrs.

CARGO HANDLING EQUIPMENT: The Port of Balboa has various equipment for handling cargo. To handle general cargo and containers, there are cranes with capacities of 2, 4, 10, 15, 30 and 40 tons, chassis, internal lorries, tractors of the agricultural towing type, roller platforms. Bulk cargo handling is by conveyors and suction pumps.

CRANES: Dock 15 has a container crane with 32.5 tons' capacity. The crane is owned by U.S. Lines. Mobile cranes of 10 tonnes and 18 tonnes available.

The Dry Dock Department has 4 cranes: A "D-4", steam crane, with max. capacity of 50 tons, and a "D-19" diesel electric crane with max. capacity of 30 tons. These 2 cranes run on rails alongside Dry Dock No. 1, and along Docks 8 and 13, also providing service to Docks 2 and 3.

Apart from cranes "D-4" and "D-19", the Dry Dock Department has two petrol-electric portable cranes with max. 5 ton capacity.

MEDICAL: Medical attention on arrival at the port of Balboa can be immediate, since there is a First Aid Clinic with a doctor and nurse on duty by day. At night there is a nurse on duty.

TANKERS: Max. draft 36 ft. (Under certain conditions 40 ft. draft can be accommodated). Tankers receive preferential treatment at Docks 4 and 6, and at Quays 1, 2 and 3 of the Rodman Naval Station.

DENSITY: The density of the water in the anchorages in the Port of Balboa is 1.01219 gm./cu.m., at a temperature of 85°F (63.87 lbs./cu.ft. at 85°F).

FRESH WATER: Available at Docks 14, 15, 16 and 18.

FUEL: Bunker "C", marine diesel, petrol, light diesel, paraffin, HDO, LDO and FO are available at Quays 4, 6, 7, 14, 15, 16 and 18. At some of these quays, only certain of the mentioned products are available.

Rate of discharge of fuel is 2,000 – 4,000 bbls./p.h. Crew members are required to connect and disconnect fuel lines on board vessels. The vessel provides the accessories for necessary coupling adjustment to U.S. standard of 4 in. and 6 in. 150 lb. flanges.

A bunkering area has been established in the Pacific Anchorage.

REPAIRS: Emergency repairs possible. The most current repairs are: Machinery in general, welding, different kinds of painting, hull cleaning and sand blasting.

DRY DOCK: There are 3 docks, of which the main one is Dry Dock No. 1 (60,000 d.w.t.). Characteristics of Dock Nos. 1, 2 and 3 are:

Dry Dock	*Total Length* (m.)	*Width* (m.)	*Depth Max.* (m.)	*Depth Av.* (m.)	*Depth Min.* (m.)
No. 1	318.21	43.59	12.77	8.88	8.35
No. 2	111.56	28.04	8.05	4.09	3.62
No. 3	71.73	14.94	5.76	1.87	1.31

AIRPORT: The international airport of General Omar Torrijos Herrera is located 32 km. (approx.) by road. This airport has flights to different parts of the world.

POLICE/AMBULANCE/FIRE: All quays have special connections for water to be used in fire-fighting.

The telephone numbers of the departments of police, ambulance and fire brigade which are nearest to the port are:

Police	Tel: 104
Ambulance	64-3871 (Social Security)
Hospital Santo Tomas	25-1436
Red Cross	28-2786 and 28-2787
Fire Brigade	52-2592 (Balboa)

TELEPHONES: Telephone services can be installed on board by arrangement between the Master and the Port Administrator.

SHORE LEAVE: Generally permitted, landing card required.

CUSTOMS: Customs and Immigration Inspection Service available Monday to Saturday from 0700 to 1700 hrs. Charges for such service after hours and on Sundays and holidays. Number of Inspectors required will be determined by Chief Customs and Immigration Inspector of port.

DELAYS: Delays in berthing, load or discharge or bunkering are minimal and infrequent. Eight hours is considered excessive.

AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Jerry Salazar, Director General; Jose A. Reyes, Director of Operations.

Balboa Port Administrator. *Tel:* 32-5844 (Ext. 103).

AGENT: C. Fernie & Co., S.A. Apartado (P.O.Box) 212, Balboa, Ancon, Republic of Panama. Cable Address: "Fernie Balboa". Telephone Nos. 62-1372, 62-2018, 62-2019 or 62-2021. After office hours telephone numbers: 50-0030 or 34-1401. VHF: Standby Channels 10 and 16.

All communications should be directed to Cristobal, Republic of Panama.

CHIRIQUI GRANDE: 08.56 N. 82.07 W. (See Plan)

LOCATION: The Petroterminal Transhipment Terminal is located in the Laguna de Chiriqui on the Western side of the village of Chiriqui Grande in approximate position Lat. 8° 56′ N., Long. 82° 07′ W.

The Terminal is linked by pipe-line to Puerto Armuelles Oil Terminal in the Pacific. Oil flow is one way only from the Pacific to the Atlantic Terminus.

DOCUMENTS: The following documents are required:

2 General Declarations.
1 Clearance from Previous Port.
5 Cargo Manifests or Declaration that no cargo is carried.
3 Crew Lists.
4 Passenger Lists or Declaration that no passengers are carried.
2 Supplies Declarations (Stores Lists) for Crew or Declaration that there are no supplies.
2 Crew Personal Effects Declarations.
1 Maritime Health Declaration.
2 Mail Lists.
1 Bill of Lading.

Also see "Health".

PILOTAGE: *Pilotage for Canal del Tigre:* Pilotage for the channel leading into the Laguna de Chiriqui is optional.

Masters requesting a Pilot for the passage into the lagoon should follow the procedure outlined under "Anchorage".

The Master will act as Pilot for those vessels wishing to proceed directly to the inner (lagoon) anchorage, without taking a Pilot, and will observe all applicable Navigation Rules.

Vessels arriving and intending to proceed through the Canal del Tigre to anchor are requested to give outbound vessels priority in the use of the buoyed channel.

In sending arrival times, it should be remembered that the pilot boat requires about 1 hour to travel from the base at Chiriqui Grande to the pilot station (see "Pilot Station" below).

Pilotage/mooring/unmooring to the SBMs is available on a 24 hour basis and supplied by the Terminal on terms set out in the Terminal's Pilotage/Towage contract, which must be signed by all Masters.

Pilot Station: For arriving vessels which require a Pilot, the pilot station is in position Lat. 9° 12′ N., Long. 81° 59′ W. For ships arriving, the ladder will normally be rigged on port side (heading S.W.) approximately 4 ft. from the water and for ships departing, on starboard side approximately 4 ft. from water. Pilot ladders to be in good condition and conform to international standards.

Vessels with a freeboard of 30 ft. or more shall provide a suitable accommodation ladder in addition to pilot ladder. This ladder must be rigged on the starboard side to avoid interference with the cargo hose connection. Vessels rigged in this manner may have to turn N.E. to make a proper lee for boarding the Pilot.

The Master remains responsible for the proper navigation of his vessel, Pilot aboard or not, throughout the time his vessel is attending this facility.

Pilot Boats: Pilot boats are 36 ft. in length, with blue hull, white deckhouse with "Pilots" on either side. The boats are equipped with VHF Channels 16, 14, 13, 12, 11 and radar.

Also see "Mooring".

ANCHORAGES: All vessels at anchor awaiting turn at the SBMs should maintain a radio watch with the terminal ("Rambala Control") on Channel 16 VHF calling (working Channel 14).

Vessels Not Berthing on Arrival: Pilot will be available to bring vessel into lagoon anchorage, if requested by the Master (call on Channel 16 or 14).

If Pilot is not available, vessel should anchor outside the lagoon and maintain a listening watch on VHF Channel 16. The terminal will advise vessel of docking time sufficiently in advance to make necessary preparations.

Outside: Vessels may anchor on the coastal shelf outside the lagoon. Suggested anchorage location in area Lat. 9° 12′ N., Long. 82° 00′ W. where the mud bottom provides good holding ground.

At the Master's option, the vessel may proceed to the lagoon anchorage. Vessels inbound are requested to make a VHF traffic call before entering the channel, and give priority to vessels outbound.

In Lagoon: The area to the East of the SBMs is probably the most convenient area for anchoring. The bottom of the lagoon is reported to be soft mud. Vessels should keep at least 2 miles clear of SBM if at anchorage. Suggested anchorage location between Latitudes 8° 59′ N. and 9° 00′ N. and Longitudes 82° 00′ W. and 82° 04′ W.

RESTRICTIONS: Depth at SBM 72 ft. Depth in approach channel 120 ft.

MAX. SIZE: 150,000 d.w.t.

HEALTH: *Quarantine/Pratique/Documentation:* The Port Officials will board the vessel after mooring or at the anchorage within the lagoon as the case may be.

The ship's Agent will advise the Master of the anticipated boarding time sufficiently in advance.

APPROACHES:

Laguna de Chiriqui: Laguna de Chiriqui deep-water bay, about 30 miles long, in an East/West direction, and about 10 miles wide, is bound on the East by Peninsula Valiente, on the South and West by the mainland, and on the North by Isla Popa, Cayo Agua, and the adjacent islands and reefs. Canal del Tigre, which lies between Peninsula Valiente and Cayo Agua, is the main access channel into the lagoon.

The North side of the lagoon, including the entrance is fringed by detached shoals. These lie up to about 5 miles South of the entrance and along the East shore of the lagoon. The West end of the lagoon South of the fringing reefs is almost entirely clear of dangers.

The low shores of the lagoon are indented by numerous small bays and rivers and marked by several villages.

Canal del Tigre (Tiger Channel): The North approach to Canal del Tigre lies between Roca Tigre and the S.E. side of Cayos Zapatilla to the West.

Punta Valiente (Lat. 9° 11′ N., Long. 81° 55′ W.) a bold densely wooded point, rises to an elevation of 152.4 m. to 182.9 m. (500 ft. to 600 ft.) on the East side of the East entrance to Laguna de Chiriqui. Foul ground extends about 1.25 miles West from the point and continues South about 1.75 miles to the entrance to Bluefield Creek. Cayos Valiente, a group of islets extending about 0.25 miles in an East and West direction lie on the North part of this reef. Virginia Rocks lie on the West edge of the reef about 1.25 miles W.S.W. of Punta Valiente, and Bluefield Rock, 9.8 m. (32 ft.) high, stands on the South edge about 1.5 miles South of the point.

Valiente Peak (Lat. 9° 10′ N., Long. 81° 55′ W.), a conspicuous 231 m. (758 ft.) hill, stands about 1 mile South of Punta Valiente.

Cayos Tigres (Tiger Cays), several islets lying in an East and West direction for about 1 mile, stand about 1.75 miles North of Punta Valiente. Roca Tigre, a detached 8.5 m. (28 ft.) rock marked by a white beacon, stands about 2.5 miles N.N.W. of the same point. Tiger Breakers, over which the sea breaks heavily, together with several shoal patches, lie on a bank within about 0.75 miles N.W. of Roca Tigre.

Canal del Tigre leads into Laguna de Chiriqui, this channel is buoyed (see "Navigation").

NAVIGATION: Approach to the Terminal is from approximately N.E.

The controlling depth for the port is 72 ft. (at the SBMs). There is deeper water in the approach.

There are 4 principal navigation aids available to mariners:

1. Roca Tigre Light.
2. Roca Tigre Racon.
3. Canal del Tigre buoys.
4. Terminal leading lights and daymarks.

SBMs: The SBMs are fitted with flashing white lights, and the hoses with white winker lights (Fl.W. ev. 1 sec.).

SBM No. 1 (North) Lat. 8° 58′ 04″ N., Long. 82° 06′ 27″ W.
SBM No. 2 (South) Lat. 8° 57′ 28″ N., Long. 82° 06′ 06″ W.

Terminal Leading Lights and Daymarks: Lights in line 212° – 032° (T).

Front Fl.W. ev. 1 sec.(0.3 sec. on, 0.7 sec. off)
Lat. 8° 56′ 29.8″ N., Long. 82° 06′ 47.9″ W.
Rear Oc.W. ev. 4 sec.(3.7 sec. on, 0.3 sec. off)
Lat. 8° 56′ 28.9″ N., Long. 82° 06′ 48.5″ W.

These lights are cylinder lights visible approximately 10° each side of transit line.

Daymarks: White panels 24 ft. in height, 12 ft. wide with 4 ft. vertical black stripe in centre.

Canal del Tigre – Channel Marking Buoys:

Buoy	*Position*	*Characteristic*
No. 1	Lat. 9° 08′ 34″ N. Long. 81° 58′ 56″ W.	Fl.G. 4 sec.
No. 2	Lat. 9° 08′ 40″ N. Long. 81° 59′ 56″ W.	Fl.R. 4 sec.
No. 3	Lat. 9° 08′ 00″ N. Long. 81° 59′ 13″ W.	Fl.G. 4 sec.
No. 4	Lat. 9° 07′ 59″ N. Long. 82° 00′ 9″ W.	Fl.R. 4 sec.
No. 5	Lat. 9° 06′ 16″ N. Long. 82° 00′ 11″ W.	Fl.G. 4 sec.
No. 6	Lat. 9° 06′ 11″ N. Long. 82° 01′ 01″ W.	Fl.R. 4 sec.
No. 8	Lat. 9° 05′ 35″ N. Long. 82° 01′ 20″ W.	Fl.R. 4 sec.
No. 9	Lat. 9° 04′ 33″ N. Long. 82° 00′ 16″ W.	Fl.G. 4 sec.

All buoys are equipped with a solar panel and radar reflector built into the tower structure of the buoy.

Roca Tigre: Light exhibited from steel tower 50 m. above sea level. (Beacon on chart). Lat. 9° 13′ 02″ N., Long. 82° 56′ 28″ W. Flash ev. 5 sec. (1.5 sec. on, 3.5 sec. off). Visible 35 miles on a clear night.

Racon: Frequency range – 9500 MHz (3 cm.) swept frequency type.
Azimuth coverage 360° Sweep period – 70 sec.
Nominal range 18 miles. Transmission – 24 hours.

This Racon operates in the marine radar band, being actuated by the ship's radar in the course of normal operation. It gives the observer his range and bearing from the position of the beacon.

The Racon signal appears as narrow flash/letter "P" (· – – ·) or lengthened echo superimposed on the radar screen on the bearing of the Racon, commencing at a point just beyond the Racon position and continuing radially outwards, away from the vessel.

The Racon sweeps the frequency band 9300/9500 MHz once every 70 seconds approximately, and the flash will appear on the screen for a few radar trace revolutions.

The number of successive flashes seen will depend on the distance of the ship from the Racon site and will be fewest at maximum distance.

Range measured to the point where the flash begins will be about 60 m. greater than the range of the Racon.

If interference with the normal radar display is experienced from the Racon signal, it may be reduced by suitable adjustment of the differentiator or anti-clutter controls on the ship's radar set.

Terminal Lights: It is reported that the yellow lights on the crude oil tanks, located at Lat. 8° 56.6′ N., Long. 82° 08.3′ W., elevation 200 m., can be seen at a great distance on a clear night.

The red communications tower light, located 200 m. East of the crude oil tanks, and elevation of 250 m. can be similarly observed.

The white working lights within the terminal are also reported to be conspicuous.

RADIO: Notices/Time of Arrival:

A. ETAs:

ETAs may be sent via ship's Agents who will notify the Terminal. All communications with Chiriqui Grande should be in local time (ZD+5).

ETAs at the pilot station should be received by the Terminal at least 72 hours prior to the vessel's arrival and any variation of more than 4 hours advised.

B. *ETAs should include:*
1. Vessel's name.
2. ETA pilot station (local time).
3. Quantity of oil required.
4. Any condition that will affect loading operations, including estimated quantity of ballast to be discharged ashore.
5. Deviations from the recommended fittings.

In practice the Terminal is notified by the customer what cargo is required and the Terminal has the data on all vessels that have already visited Petroterminal.

In giving arrival times, it should be noted that the Terminal is interested in the time the vessel will arrive at the pilot station (not when the ship made "end of passage").

Notice of Readiness: Notice of Readiness is considered to be received by the Terminal when the vessel arrives at the pilot station or, if going to anchorage, when the vessel anchors.

VHF: *Radio Communications:*
Frequency Allocation

Channel	*Use*
13	Cargo handling only.
11	Alternative cargo frequency. (Use only on instruction from "Rambala Control").
14	Pilots' and boats' working Channel.
16	Calling. All vessels at anchor maintain a listening watch on this Channel.

General: Vessels at anchor within the lagoon are requested to refrain from using VHF Channel 13; since a persistent FM "Duct" causes interference with cargo operations at the other PTP Terminal at Puerto Armuelles. Channel 14 use should be minimised for the same reason.

Always identify calling vessel and vessel being called.

Vessels approaching the Terminal should establish VHF communications as soon as they are within range (about 50 miles).

The Terminal maintains a continuous listening watch on Channel 16.

Call sign for the Terminal is "Rambala Control".

Call sign for the Pilots is "Chiriqui Grande Pilots".

Vessels at anchor should maintain a listening watch on Channel 16.

Most Terminal radios are equipped with Channels 11, 13, 14 and 16.

Communications While at SBM: All communications while at the SBM will be conducted in the English language.

Deballasting and loading operations will be controlled by VHF radio communication between the vessels at the SBM and 'Rambala Control" on VHF Channel 13.

The Berthing Master will bring 2 portable VHF radio units on board at the time the ship begins its approach to the SBM. One of these radios will be assigned to the person in charge of ballast and cargo operations. The person in charge must maintain this radio in his possession *at all times*. This radio must not be changed to any other channel unless instructed to do so by "Rambala Control".

All cargo communications will be identified by ship's name.

Communications Failure: In the event of a complete communications failure, vessels at the SBM will indicate their inability to make VHF contact by sounding 5 long blasts on the ship's whistle or siren. At night, the vessel's signal searchlight or Aldis lamp may be used to alert control room personnel (at the base of the pier).

(It may not be possible for a vessel at the North SBM to see the Control Room while lying West of the buoy).

Agency Communications: Agents wishing to contact ships will call "Rambala Control" on VHF Channel 16 and request the operator on duty to so advise the ship.

Ships may call their Agent on Channel 16. Ship/agency business cannot be communicated on Channel 13.

Ships must use their bridge VHF, on LOW POWER, when communicating with Agents, to avoid interference with cargo communications.

The cargo operations radio must not be used for agency traffic, or changed from Channel 13 unless so directed by "Rambala Control".

TUGS: *Floating Equipment:* 2×36 ft. Mon Ark Pilot Boats, equipped with radar and echo sounder. 2×6V-71 GM engines.

2×42 ft. Mooring Launches (Damen). 1×8V-71 GM engine.

1×1,000 h.p. 85 ft. tug "Carey".

1 Work Barge equipped with 40 ton crane, accommodation and workshops, 140 ft.×40 ft.

1×30 ft. Marco Oil Skimmer Boat.

Various small boats powered by outboard engines.

SBMs: The catenary anchor leg mooring buoys are designated "South SBM" and "North SBM". A double channel rotating head on the turntable allows two completely segregated flow streams to be routed through the buoy. The rotating head can be connected with the tanker through 2×20 in. hose strings. For initial operation only one string will be used. 2×20 in. manually operated ball valves act as block valves between the rotating head and each 20 in. hose with a third 20 in. manually operated ball valve mounted in a by-pass between the two. This allows interchangeability of the hose strings when both strings are in use or allows diversion of the ballast water into its respective channel in the rotating head when only one hose string is installed.

Battery driven navigation lights and fog horn are installed in accordance with marine regulations. The fog horn is remotely operated by radio from Chiriqui Grande Control Room.

EQUIPMENT: Strops and shackles will be held by the Terminal for use in the event a vessel does not have this equipment.

The vessel to have the following equipment:
On Forecastle Head:
1. 2 Ship's mooring ropes with 12 ft. tails of 3.5 in. – 4 in. circumference lashings to make fast to pick-up rope. These two mooring ropes must be married together using one of the 12 in. tails before approaching the buoy.
2. 3 stoppers of 3.5 in. – 4 in. circumference and 12 ft. long.
3. Fire axe.
4. 100 ft.×3.5 in. – 4 in. messenger rope.

Anchors to be ready for use but in *stowed* position in hawsepipe.

Bow Chocks of Vessel: Should be of suitable size (approx. 24 in.×18 in.) to take the 3 in. chafe chain approximately 16 in. × 8 in. for the rope rig (13 in. circumference rope eye).

If Smit or other type brackets are fitted, they should be in accordance with OCIMF publication "Standards for Equipment Employed in the Mooring of Vessels at SBM".

Manifold Area:
1. 2×12 in. reducers in place on the manifolds to be used for discharging ballast and loading cargo.
2. Cargo boom – SWL 5 tons. Plumbed 2 ft. – 3 ft. inboard and mid-way between two manifolds.
3. 1 handy-billy (small 2 and 1 block and tackle).
4. 2 nylon hose slings (wide).
5. 1 small come-along (approx. 1.5 tons).
6. 1 heaving line.
7. 3 bolts long enough to bolt hose/manifold flange.
8. 2×3.5 in. – 4 in. circumference rope slings approximately 8 ft. length.
9. 2×3.5 in. – 4 in. circumference rope approximately 60 ft. length (eye in one end).
10. 1 boat hook or chain hook.
11. 4×12 in. gaskets.

At Stern of Vessel: One mooring rope – eye lowered to water level and made fast on bitts.This will enable launch to pull vessel away from buoy.

Note: It may be requested that the vessel leave steam cracked open on astern turbine to avoid vessel riding up on buoy.

Petroterminal launch will carry:
1. Sufficient bolts to bolt hoses.
2. Suitable ring spanners.
3. 2×6 ft. chain stoppers with 3 in. circumference nylon tails 8 ft. long.
4. Spare keys to Camlocks.
5. Spare rope slings.

MOORING: *Mooring Gang/Hose Gang:* As the vessel approaches the SBM the Terminal Mooring Gang of approximately 5 persons will board the vessel by pilot ladder and/or accommodation ladder. The same ladder used by the Pilot will suffice.

If there is additional gear to be put aboard the vessel, the boom at the port side manifold should be manned and the hook lowered to lift the bucket of gear.

Winch/Capstan/Windlass Operators: The ship will provide personnel to operate all deck machinery and assist the Petroterminal mooring gang. On completion of hose connection the gang will leave the vessel.

The Pilot/Berthing Master: Remains aboard the vessel whilst the ship is at the SBM. A cabin should be provided for his use.

A Berthing Master will assist and advise in the connection and disconnection of hoses/moorings, etc. During deballasting and loading operations he will be available to assist and advise on procedures. In cases of oil spill or other emergencies, he will advise the Master.

The Berthing Master will be the Terminal's Representative on board the vessel and will have the authority to stop all operations if regulations or required procedures are not observed.

Where any disagreement arises between the vessel personnel and the Berthing Master regarding some aspect of the SBM procedure, the procedure to be followed will be that which provides closest compliance with guidelines established by the latest edition of International Safety Guide for Oil Tankers and Terminals, published by the International Chamber of Shipping, Oil Companies International Marine Forum.

Mooring to SBM: The ship will approach the buoy from downwind maintaining the wind exactly ahead. (Adequate ballast should be retained to maintain manoeuvrability).

From the stem chock, or a port bow chock close to the stem, lead a mooring rope (eye-end) and lower the eye to the waiting launch.

(For the Smit Bracket, a chock approximately 24 in. × 18 in. will be required.)

The launch will take the ship's mooring rope and secure it to the buoy approach rope. This approach rope (480 ft.×10 in. plaited polypropylene) is hove aboard with the ship's windlass, heaving the vessel toward the buoy. Made fast to the end of the buoy approach rope is a 45 ft. × 13 in. circumference stable braid strop with a 5 ft. eye. The eye of this strop should either be placed on the bitts or made fast by means of a short strop and shackle.

Vessels equipped with a Smit bracket will secure the buoy rig to the bracket using a pear link and shackle.

ALTERNATIVE RIG: See "Plan".

From the port bow or centre chock, a mooring rope (with eye in end) is lowered through a fairlead sufficiently large to permit the entry of chain chafing cable and steel triangular plate 9 in. × 7 in.

The launch will take this rope and secure it to the buoy approach rope. This approach rope (480 ft. of 10 in. plaited polypropylene) is hove aboard first, heaving the vessel toward the buoy.

Prior to heaving the buoy rope aboard, a heavy wire strop will have been placed on the port side of the forecastle, onto suitably placed bitts, with 50 ton shackles in readiness.

This shackle is secured both to the wire strop and the triangular plate. Once the shackle is fast, the weight is released from the approach rope and allowed to come onto the wire strop. The chafing chain tail and buoy rope are then cast off the windlass.

Strops and shackles will be available from the terminal for use in the event a ship does not have this equipment.

The approach rope is made fast to the bitts.

If required additional back-up is needed, ropes can be made fast to the other links in the chafing chain. This should not be necessary with the good weather conditions of Chiriqui Lagoon.

HOSES: *Connection of Hoses:* Once the vessel is safely secured at the buoy, the launch which had been holding the hoses clear during this operation will tow them to the port side of the vessel and they will be connected.

The hoses will be 2×12 in. and will be fitted with short spool Camlock couplings. Forward 12 in. hose will be lifted first.

1. The vessel's boom will be plumbed so that it is approximately 2 ft. – 3 ft. inboard of port side and midway between the manifolds to be used.
2. The forward hose will be lifted first by the eye attached to the hose blank.
3. Hose will be lifted clear of water and level with ship's deck. Snubbing chain will then be brought on deck before hoisting hose any higher.
4. Once hose is at correct height above deck, snubbing chain will be made fast to bitts, hose lowered so weight is taken by snubbing chain. Hose will bend over to face ship's manifold. After the hose end blank has been removed, the hose will be connected to the ship's manifold with camlock couplings. "Come alongs" or handy billies may be used for positioning hoses. After securing the connection, check each camlock fitting to ensure that the ratchets are engaged.
5. The same procedure is followed for second hose.
6. When both hoses have been connected, the boom will be plumbed over the hoses and bar and webbing straps used to support hose, throughout transfer operations.
7. If camlocks alone will not provide a leak-free connection it may be necessary to use bolts to tighten the connection.

Camlock couplings at hose end: Pipe size, 12 in.; flange OD, 19 in.; flange thickness, 1.25 in.; seal ID, 13.375 in.; number of cams, 4; minimum locking range, 1 in.; maximum, 1.5 in.

Disconnection of Hoses: Once cargo operations have been completed, a reverse of the connection procedure is followed and the hoses lowered over the side, but made fast to the ship's side until the ship slips from the buoy or are towed clear by the launch – the reason for not immediately releasing the hoses is to keep them clear of the vessel's propeller.

Weight of Hose Strings for Single Buoy Moorings: The following table gives the approximate weights of hose strings in tonnes (including fittings, floats and pick-up buoy) with all hoses full of crude oil of S.G. 0.850. The assumed total lift is 7.5 m. (25 ft.) above deck level, with the tanker on light draft.

Size of Tanker	*12 in. I.D. Hose*
270,000	6.5
200,000	6.2
100,000	5.4
70,000	5.1
50,000	4.9
35,000	4.7
18,000	4.3

Information taken from International Safety Guide for Oil Tankers and Terminals manual.

Hose Information – Petroterminal:

	Tanker Rail Hose 12 in. (Barbel type)	Floating Hose 12 in.
Length	9.25 m.	12.19 m.
Weight	890 kilograms	1,940 kilograms
Electrically	Discontinuous	Continuous
Built-in fitting type	ASA 150	ASA 150
Ancillary equipment weight (flanges)	317 kilograms	—
Bend radius	1.85 m.	

Hose make: Kleber (France).

BALLAST: Within the lagoon, ballast should be handled by type, as per international convention, as follows:

Segregated: All ballast in segregated ballast tanks should be visually inspected prior to discharge. After inspection, segregated ballast may be discharged overboard according to standard shipboard procedure.

Dedicated Clean: All ballast in dedicated clean ballast tanks should be visually inspected prior to discharge. After inspection, dedicated clean ballast tanks may be discharged overboard in accordance with IMO Regulations.

Treated: Ballast water which has been chemically treated (with detergents, emulsifiers, etc.) must be retained on board.

Others: All other ballast water will be pumped ashore prior to loading. The Terminal has 3×120,000 barrel tanks for the reception of dirty ballast. The ship will advise the Terminal of the quantity of ballast to be discharged ashore prior to commencing discharge.

Crude Oil Washing (C.O.W.): As vessels will be loading only, we do not anticipate any crude oil washing requests. Should the necessity arise, the Terminal should be advised.

LOADING: *Safety Check List:* Prior to start of operations, the Berthing Master and responsible Officer will complete the Safety Check List and also agree:

(A) Designated Smoking Areas.
(B) Galley and Appliance Limitations.
(C) Emergency Assistance.
(D) Vessel will be ready to move under her own power at all times whilst moored to SBM.

Pre-Transfer Conference: A Pre-Transfer Conference will be held between Berthing Master and responsible Officer prior to commencement of operations. (IOTTSG Chapter 5) to agree on procedures for deballasting and loading, including:

1. Communications between ship/shore/Berthing Master.
2. Deballasting procedures.
3. Cargo start-up procedure.
4. Any deviations from normal procedures.
5. Loading rates, initial, maximum and topping off.
6. Notice times required to change rates and shutdown procedure.
7. Emergency shutdown, moorings failure, oil spill, etc.
8. Any ship's deficiencies to be made known.
9. Any Terminal deficiencies to be made known.
10. Completion of loading.
11. Emergency assistance.
12. Vessel will be ready to move under her own power at all times
13. while moored at the SBM.
14. Prior to the start of operations, the Berthing Master and responsible officer will complete the Safety Check List.
    Designated smoking areas.
    Galley and appliance limitations.

Flow Rates: The tanker loading system is designed to be able to load a tanker at each SBM simultaneously. Each system has a maximum loading capacity of 50,000 bbls.p.h. using 2 × 12 in. hoses or 60,000 bbls.p.h. using 3×12 in. hoses. The third 12 in. hose is not currently fitted.

Deballasting of tankers is also handled through the same hose as used for loading, at a designed rate of 30,000 bbls.p.h.

Pressures:

Maximum crude oil static pressure on shoreside manifold 339 p.s.i.g.

Maximum allowed static pressure on buoy system 275 p.s.i.g.

Maximum allowable static pressure at ship's manifold to be determined by the ship's Master and communicated to the Berthing Master.

All vessel operations in connection with deballasting/loading, switching of tanks, topping off, must be directly supervised by a responsible officer.

Deballasting/Loading: Upon being informed by the responsible officer that the vessel is ready in all respects to commence operations, the Berthing Master will request that deballasting or loading operations proceed according to previously agreed plans as discussed at the pre-transfer conference.

Deballasting procedures are conducted in the following sequence:

1. After the 2×12 in. hoses are connected, Terminal personnel will line-up the buoy valves, prior to vessel opening manifold valves.
2. Vessel will be notified when Terminal is ready to receive ballast.
3. Vessel will be instructed to commence deballasting at approximately 11,000 bbls.p.h.
   Rambala Control will advise when the discharge rate can be increased to the required tanker rail pressure to attain a 30,000 bbls.p.h. deballasting rate (111 – 120 p.s.i.g.).
4. The vessel will advise when deballasting is completed and shut down at manifolds.
5. The terminal will secure ballast system ashore.

Loading Operations:

Loading procedure will follow the sequence below:

1. The Terminal will change from ballast to cargo piping alignment at buoy (because of piping arrangement, ship can expect to receive about 400 barrels of dirty ballast at start of cargo loading).
2. The vessel aligns its piping to load cargo.
3. The vessel opens manifold and advises "Rambala Control".
4. The shore valves will be slowly opened to pressurise the system.
5. The vessel confirms that cargo is being received into tanks.
6. The Terminal will advise vessel hourly of loading rate. This routine also provides a radio check. If the ship does not receive its hourly rate check at the expected time, it should attempt to contact "Rambala Control".

Topping off/Completing: When topping off, the following procedures will be observed:

1. The vessel advises shore prior to start, topping off, and requests desired flow rate.
2. Using shoreside flow/pressure control valves, give vessel loading rate required.
3. When vessel indicates "Stop" the flow/pressure shoreside valve will be closed.
4. When flow has stopped ashore, "Rambala Control" will notify the ship to secure its manifold valves.
5. The vessel closes ship's manifold valves.

Stripping:

1. Shoreside stripping pumps will be started to clear the hose ends of crude oil. (Vent valves at ship's manifold should be opened.)
2. SBM and shore tank valves will be shut. Close vent valves.

Disconnection of Hoses: Once cargo operations have been completed, the procedure for disconnecting hoses is a reverse of the connection procedure. Hoses are then lowered over the side, but made fast to the ship's side until the ship slips from the buoy or the hoses are towed clear by the launch.

The reason for not immediately releasing the hoses is to keep them clear of the vessel's propeller.

Emergency Shutdown: In the event of an oil spill, line rupture or other cause which requires immediate shutdown, the vessel will advise the control to "Stop Stop Stop" and the flow/pressure control valves will be immediately shut. Simultaneously the vessel will close its manifold valves.

The ship will be advised immediately these valves have closed.

Oil Type:

Alaskan North – Slope Crude.
API Gravity 26.7° – 26.9°.
Sulphur 1.05.
Flash Point 0°F.
Reid Vapour Pressure 3.8 at 100°F.
Viscosity 60°F, 68 centistoke seconds.
Viscosity 100°F, 22 centistoke seconds.
Approximate loading temperature 80°F to 90°F.

EMERGENCY PROCEDURES:

Oil Spillages: Should an oil spillage occur from a vessel, from SBM, or from sea lines, "Rambala Control" is to be advised immediately and all shore and ship valves closed in the shutdown sequence.

The Berthing Master will be informed and will initiate action to counter oil spill following procedures as outlined in terminal oil spill manual.

Ship's crew will recover spilled oil from ship's deck.

Fire: In case of fire aboard a vessel, in addition to the internal shipboard alarms, Masters are requested to sound a prolonged blast on the main siren or whistle.

If deballasting or loading, the vessel should:

1. Immediately cease all operations. If loading, call Control Room for emergency shutdown.
2. Initiate fire fighting procedures.
3. Be prepared to disconnect hoses and unberth.

Any other vessel at SBM should also shut down operation and be prepared to unberth.

Loss of Communication: Vessel to sound 5 long blasts on whistle or siren. All operations will be shut down immediately and remain so until communications have been restored.

UNMOORING:

Unmooring from the SBM: To unmoor from the buoy, the approach rope is taken to the windlass and the weight taken whilst the shackle is released from the Triangular Plate or Open Link.

The rope is slacked into the water as the ship goes slowly astern.

At this time, the hoses are also slipped from the ship's rails if they have not previously been slipped and towed clear by the launch.

EARLY DEPARTURE PROCEDURE: All loading vessels are requested to use an Early Departure Procedure (E.D.P.).

(A) If the Master of vessel consents to use the E.D.P. it will be implemented in the following manner:

1. The Master will sign a letter agreeing the use of E.D.P.
2. The cargo documents and other relevant forms will be put aboard the vessel.
3. On completion of loading, the vessel's tanks will be gauged by the Cargo Inspector.
4. The vessel will sail.
5. The terminal will transmit Bill of Lading figures to the vessel by VHF radio. The cargo documents are to be completed by the Master.
6. Written confirmation of these figures will be provided by the vessel's Agent.

(B) If the Master of a vessel does not agree to use E.D.P. the vessel will be unberthed immediately after loading. Terminal's representative will bring completed cargo papers by launch.

MEDICAL: There are no medical or dental services available. Emergency medical requests will be handled by the vessel's Agent.

DENSITY: 1018 (approx.).

FRESH WATER: Not available.

FUEL: Not available.

SURVEYORS: *Petroleum Inspection:* Vessels will be inspected by inspectors from Caleb Brett or Saybolt Inspection Companies.

These inspectors will follow the procedures laid down by Sohio, Exxon, Arco, etc. as the case may be.

REPATRIATION: Possible using daylight airstrip (length 1,120 m.).

TIME: GMT minus 5 hours.

SHORE LEAVE: See "General".

WEATHER:

Wind: The normal seasonal wind regime occurring at the lagoon is as follows:

November – March: Wind speeds greater than 19 m.p.h. occur 20.4% of the time in February. The predominant directions are from N. and N.E. (72.2%, occurrence in February). This is the primary windy season. February is the windiest month.

April – June: Wind speeds exceed 19 m.p.h. 3.3% of the time in June. The predominant directions are N., N.E., and E. (58.3% occurrence in June). This season is the secondary calm season.

July – August: Wind speeds exceed 19 m.p.h. 8.8% of the time in July. The predominant directions are N., N.E., and E. (71.2% occurrence in July). This season is the secondary windy season.

September – October: Wind speeds exceed 19 m.p.h. 2.3% of the time in October. Predominant wind directions are N. and N.E. (28.4% occurrence in October), and S. and S.W. (27.6% occurrence in October). This season is the primary calm season.

Waves: The seasonal wave height is:

November – March: Significant wave height exceeds 1.9 ft. 36.2% of the time in February N. and N.E. wave directions predominate, occurring 72.2% of the time in February. This is the roughest season. February is the roughest month.

April – June: Significant wave height exceeds 1.9 ft. 7.8% of the time in June. N., N.E. and E. wave directions predominate, occurring 58.3% of the time in June. This is the secondary calm season.

July – August: Significant wave height exceeds 1.9 ft. 19.7% of the time in July. N., N.E. and E. wave directions predominate, occurring 71.2% of the time in July. This is the secondary rough season.

September – October: Significant wave height exceeds 1.9 ft. 3.9% of the time in October. N. and N.E. wave directions, occur 28.4% of the time, and S. wave directions occur 14.6% of the time in October. This is the primary calm season.

Rain: Rain squalls with strong winds of short duration may be expected from time to time, being more prevalent from November through March.

GENERAL:

Charts: U.S.H.O. (Defence Mapping Agency) 28042 and 28041. British Admiralty 1793.

Sailing Directions: U.S.H.O. Publication – Pub. 144 – Sailing directions for Caribbean Sea and British Admiralty Pilot No. 7A.

Tides: The maximum tidal range is 2.1 ft. The Mean Range is 0.8 ft. The tidal flow in the Lagoon is weak.

Currents: Cross currents of varying velocity have been observed entering Canal del Tigre.

At the offshore anchorage prevailing currents are predicted to be from the E.N.E.

Launch Service: The terminal launches are for terminal use only. Crew members are not permitted aboard these launches.

The launch attending the vessel will be available to the cargo officer of a vessel loading/discharging for the purpose of reading the vessel's draft.

Shore Leave: The terminal will not provide a launch service for shore leave and crew members may not use the launches.

Smoking Regulations: Smoking is prohibited in the following locations:

1. Entire terminal crude tank area.
2. Aboard launches within 0.5 miles of the vessel.
3. In motor vehicles in crude tank area, also in area of ballast tanks except inside designated buildings.
4. On ships except in places designated by the Master and agreed by the terminal's representative.

In accordance with IOTTSG; 2 locations only will be established in the after end of the vessel.

N.B. If an oil spill occurs on jetty or ship, all smoking will be prohibited until the spill has been removed.

SERVICES:

Chandlers: None.

SHIP SUPPLY SERVICE: The terminal has 1 small tug which is able to assist with stores, etc. Launches also available and helicopters are easily hired.

OPERATOR: Petroterminal de Panama, S.A., P.O.Box 8-179, Panama 8, Republic of Panama. *Tel:* 63-7777. *Telex:* 3792527. *Contact:* Captain G. Moss, Marine Manager.

AGENT: Fernie (Puerto Armuelles) S.A. VHF: Standby Channel 16. See "Puerto Armuelles".

COLON: 09.21 N. 79.55 W. (See Plan)

LOCATION: Located in the Bay of Limon, the port of Colon constitutes Quay No. 3 in the area of Fort Lesseps.

DOCUMENTS: The same documents are required and the same procedures are followed as at Bahia Las Minas.

PILOTAGE: No pilotage service at Colon. Vessels berth and unmoor under the orders of their Masters.

RESTRICTIONS: The port is restricted to vessels of length not greater than 100 m. due to the size of the quays. Draft at the berths varies from 2.6 m. to 6.1 m., which also restricts the size of vessels.

Aids to Navigation: The port entrance channel has no aids of its own for navigation. Maritime accesses are however marked clearly by the Panama Canal Commission.

HEALTH: Same as Bahia Las Minas.

RADIO: Vessels can communicate with the Port Administration on Channel 12 VHF.

TUGS: None at Quay No. 3, but they may be contracted in the Canal.

BERTHING:

Berth	*Length*	*Depth (average low tide)*
Quay 2	75 m.	4.9 m.
Quay 3	58 m.	2.05 m.

MEDICAL: In the town of Colon.

STEVEDORES: All loading and unloading operations are carried out by the Union of Port Workers of Colon. The ship's Agent must make the necessary arrangements.

CRANES: None.

DENSITY: 1.0212 grams cu.cm. at 85°F.

FRESH WATER: Available.

FUEL: Available at the quay by pipe-line. Also Refineria Panama supplies fuel in the Bay of Colon by means of lighters.

CONSULS: Denmark, Finland, Norway, Sweden, U.K.

PROVISIONS: Available in Colon.

TIME: GMT minus 5 hours.

POLICE/AMBULANCE/FIRE: Available in Colon.

TELEPHONE: Available in the offices of the National Port Authority. Tel: 47-9181.

GENERAL:

Shelter: All the quays are protected from the sea by the breakwater which protects the canal entrance in the Atlantic sector.

General Description: The Port of Colon (Quay No. 3) is used by small vessels of length not greater than 100 m. engaged in coasting trade between Colon and Bocas del Toro, and international trade between Colombia and Panama.

Port Maritime Access: The Colon port access is the same as that which leads to the port of Cristobal in the Canal.

Nature of Bottom: Soft mud and clay.

AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Jerry Salazar, Director General.

CRISTOBAL: 09.21 N. 79.55 W. (See Plan)

(N.B. For items not listed, see "Panama Canal".)

PORT LIMITS: Ship's arrival time is normally determined by their passage between the breakwater lights. Those that anchor outside the breakwater by arrangement with the Port Captain are timed as arrived when they drop anchor.

DOCUMENTS:

(a) Documents are to be presented by vessels in transit; who do not embark or disembark passengers; or handle cargo, to the Canal Commission.

General Declaration Form: 2 copies
Crew List: 2 copies
List of Passengers: 2 copies
Local Cargo Manifest: 1 copy
Stores or Supply List: 1 copy
Mail List: 1 copy
Clearance Outwards Certificate from last port visited: 2 copies

(b) Documents which vessels must present when they embark or disembark passengers, or handle cargo, to the National Port Authority.

General Declaration Form: 2 copies
Local Cargo Manifest: 4 copies
Crew List: 3 Copies
List of Passengers: 4 copies
Stores or Supply List: 2 copies
Crew Effects List: 2 copies
Maritime Health Declaration: 1 copy
Mail List: 1 copy

PILOTAGE (Also see "Panama Canal"): Pilotage into Cristobal not compulsory, although services of Pilot outside breakwater are available on request.

Vessels arriving outside Cristobal Breakwater who have requested an outside Pilot are required to *heave to and make a good lee.*

A pilot ladder rigged with appropriate spreaders and well illuminated at night to be provided by vessel. Accommodation ladders not acceptable for embarking Pilots outside breakwater.

Notice to Shipping:

1. A vessel shall, weather permitting, have both an accommodation ladder and a pilot ladder rigged and ready for use upon arrival in Canal Waters.
2. The pilot ladder shall conform to Regulations of the International Convention for the Safety of Life at Sea (SOLAS) and to all additional recommendations of the International Maritime Organisation (IMO).
3. The accommodation ladder may be turned in and secured after the Pilot has boarded the vessel in the anchorage, provided the freeboard does not exceed 9 m. (30 ft.). If the freeboard exceeds 9 m., the accommodation ladder may not be turned in until the last Panama Canal employee boards prior to arrival at the locks.
4. A pilot hoist may be used provided the design and construction of the hoist and ancillary equipment are of such a standard as to ensure an effective and safe means of embarkation and disembarkation. The pilot hoist should only be used when:
   (a) A conventional pilot ladder is rigged and ready for immediate use but triced up well clear of the hoist;
   (b) A lifeline attached to a safety stop and a lifebuoy fitted with a self-igniting light are ready for immediate use.

ANCHORAGES: Vessels will ordinarily proceed to anchorage area according to length and draft unless otherwise directed. Arriving vessels expected to anchor as far to South and inward from main channel in their anchorage area as is consistent with safety. Vessels anchoring in non-designated areas may be required to move.

Anchorage Area "A". For all ships with a deep salt-water draft of not less than 10.4 m.(34 ft.) and not in excess of 11.9 m. (39 ft.). Minimum charted depth is 12.2 m. (40 ft.).

This area starting at	Lat. 9° 23′ 21″ N.,	Long. 79° 55′ 21″ W.,
thence to	Lat. 9° 22′ 48″ N.,	Long. 79° 56′ 15″ W.,
thence to	Lat. 9° 22′ 14″ N.,	Long. 79° 56′ 15″ W.,
thence to	Lat. 9° 21′ 56″ N.,	Long. 79° 55′ 48″ W.,
thence to	Lat. 9° 21′ 25″ N.,	Long. 79° 55′ 48″ W.,
thence to	Lat. 9° 21′ 25″ N.,	Long. 79° 55′ 21″ W.,

thence due North to starting-point. However, restricted area North and West of Buoy 2, as charted, must be observed. Explosive sector charted in this area to be avoided whenever possible.

Anchorage Area "B". For all ships with salt-water draft under 9.7 m. (32 ft.) Minimum depth is 8.8 m. (29 ft.). Explosive sector restricted to vessels carrying explosives or specially designated vessels. All ships of such length are under no circumstances swing into Anchorage Area "A".

This area starting at	Lat. 9° 22′ 48″ N.,	Long. 79° 56′ 15″ W.,
thence to	Lat. 9° 22′ 32″ N.,	Long. 79° 56′ 41″ W.,
thence to	Lat. 9° 21′ 42″ N.,	Long. 79° 56′ 41″ W.,
thence to	Lat. 9° 21′ 52″ N.,	Long. 79° 56′ 00″ W.,
thence to	Lat. 9° 21′ 25″ N.,	Long. 79° 56′ 00″ W.,
thence to	Lat. 9° 21′ 25″ N.,	Long. 79° 55′ 48″ W.,
thence to	Lat. 9° 21′ 56″ N.,	Long. 79° 55′ 48″ W.,
thence to	Lat. 9° 22′ 14″ N.,	Long. 79° 56′ 15″ W.,

thence due North to starting-point.

Anchorage Area "C". Required pilotage waters for inbound vessels.

This area starting at	Lat. 9° 21′ 25″ N.,	Long. 79° 55′ 21″ W.,
thence to	Lat. 9° 21′ 25″ N.,	Long. 79° 56′ 00″ W.,
thence to	Lat. 9° 20′ 48″ N.,	Long. 79° 55′ 57″ W.,
thence to	Lat. 9° 20′ 27″ N.,	Long. 79° 55′ 27″ W.,

thence due North to starting-point. Restricted area East and South of Buoy 2, as charted, must be observed.

Anchorage Area "D". For all ships of over 106.7 m. (350 ft.) in length and a deep salt-water draft of less than 10.7 m. (35 ft.) except where minimum charted depth is 9.7 m. (32 ft.).

This area starting at	Lat. 9° 23′ 19″ N.,	Long. 79° 55′ 15″ W.,
thence to	Lat. 9° 22′ 55″ N.,	Long. 79° 54′ 21″ W.,
thence to	Lat. 9° 22′ 22″ N.,	Long. 79° 54′ 21″ W.,
thence to	Lat. 9° 22′ 02″ N.,	Long. 79° 54′ 55″ W.,
thence to	Lat. 9° 22′ 02″ N.,	Long. 79° 55′ 15″ W.,

thence due North to starting-point.

Anchorage Area "E". For all ships less than 106.7 m. (350 ft.) and small craft. Minimum charted depth of water is 7.3 m. (24 ft.)

This area starting at	Lat. 9° 22′ 55″ N.,	Long. 79° 54′ 21″ W.,
thence to	Lat. 9° 22′ 27″ N.,	Long. 79° 53′ 54″ W.,
thence to	Lat. 9° 22′ 22″ N.,	Long. 79° 53′ 54″ W.,
thence to	Lat. 9° 22′ 22″ N.,	Long. 79° 54′ 21″ W.,

thence due North to starting-point.

Anchorage Area "F". For small craft and yachts. Pilotage for this area will be decided by Cristobal Port Captain, based on merit of each individual case. Under no circumstances may a vessel proceed to this area prior to being cleared by Boarding Officials. (Bounded by Channel Buoy "3" by a direct line through Buoys "A," "B," "C," "L4," "L2" and return to Buoy "3".)

Outer Anchorage Area. Established N.W. of Cristobal breakwater has the following co-ordinates: Commencing at Lat. 09° 23′ 14″ N., Long. 79° 55′ 21″ W. (West breakwater light); thence to Lat. 09° 24′ 40″ N., Long. 79° 56′ 00″ W. (Buoy "A", whistle sea buoy); thence to Lat. 09° 24′ 40″ N., Long. 79° 57′ 00″ W.; thence to Lat. 09° 23′ 14″ N., Long. 79° 57′ 00″ W.; thence due East to starting point.

During periods of harbour congestion, large, deep-draft vessels and/or any vessel so directed may anchor outside the breakwater in the approved area. Such vessels must advise Cristobal Signal Station, by VHF Channel 12, the time of passing sea buoy, in order to establish order of transit. Masters will be given a definite time to enter the breakwater, where the vessel will be met by transit Pilot(s) and Boarding Officials.

Vessels must strictly adhere to the breakwater entry times as given, in order that transit schedule can be maintained.

Prohibited Anchorage. Eastern side of channel, Canal waters South of Lat. 9° 22′ 02″ N. to Mole Buoy in order to give clear access to Colon Harbour. Also, no vessel or craft may proceed South of Lat. 9° 21′ 25″ N. prior to being cleared by Boarding Officials. No vessel may anchor with any part of the vessel in the main channel or closer than 274 m. (900 ft.) to either East or West breakwater lights.

In cases due to harbour congestion, any vessel may be directed to anchor to Westward outside breakwater entrance and given an order as to the time it is to pass through the breakwater entrance.

RESTRICTIONS: Port open throughout 24 hours.

MAX. SIZE: Harbour limitations generally unrestricted as to length and beam. Draft 12.2 m. (40 ft.).

HEALTH: The Official who comes on board has to verify that the vessel complies with the requirements of the Republic of Panama as far as International Health, Animal and Agricultural Health, Migration and Customs are concerned. If there is any violation, non-fulfilment or omission in respect of any of the International or National requirements concerning human, agricultural health and Customs, the granting of Free Pratique will be suspended until the Competent Authority has been informed and has finally decided as to whether or not Free Pratique can be granted. Also, the respective Authority has to inform the authorities of the circumstances, evidence or a reasonable indication that on board the vessel there is danger to human, animal and vegetable life.

RADIO: The Port Captain may be contacted via VHF Channel 12. Commercial telephone calls and messages to Agents may be made via Panama Radio, VHF Channel 16.

TUGS: Available and assigned for berthing by Pilot. Tug's lines used at no extra charge.

BERTHING: No specific requirements as to arrival times. Fifteen cargo and bunkering berths. No limitation on beam.

Dock	*Berth*	*Usable Length* (m.)	*Depth M.L.W.* (m.)	*Max. Lgth. of Ship at Max. Draft* (m.)	*Total Lgth. Avail. of Dock Face* (m.)	*Remarks*

16	E	140.0	9.8	91.4	139.6	Water, Gasoil, Gasoline, Diesel

Also see "Developments".

STEVEDORES: Endeavour arrange arrival to avoid cost of "stand-by" as Agent arranges gangs for 0700 hrs. or 1700 hrs. commencement.

CARGO HANDLING EQUIPMENT: The Port has all kinds of equipment for handling cargo arriving at the quays.

To handle container and other types of cargo, there are dock lorries, chassis, fork lift trucks of varying capacities (2,4,10,15,30,40 tons), agricultural type towing tractors, rolling platforms, and other smaller aids.

CRANES: The only crane in the port is at the pier end of Quay No.8 at Berth A. It has a steel arm capable of lifting 40 tons to a height of 90 ft.

MEDICAL: Medical attention on arriving in the Port of Cristobal can be immediate, since the port contains a first aid clinic in which a doctor and a nurse are present during the day, and a nurse at night. In the town of Colon there are hospitals and private clinics.

TANKERS: Four berths available.

FRESH WATER: Available from piers.

FUEL: Bunker "C", diesel, light fuel and light diesel available at Government wharves from commercial companies. Rate of delivery 2,000 bbls. per hour.

The Southern part of Anchorage C, Cristobal Harbour, has been designated a limited bunkering area for vessels whose draft is too great to use the East breakwater bunkering area.

Pilotage is compulsory out and into this area for vessels and bunkering barges.

Also see "Balboa".

REPAIRS: Emergency repairs possible.

DRY DOCK: (Not available for commercial activities). Length 117.6 m. (386 ft.), breadth 18.3 m. (60 ft.), depth over blocks 6.2 m. (20 ft. 6 in.) MLW.

POLICE/AMBULANCE/FIRE: Police 104, Fire 103.
TELEPHONES: May be placed aboard through arrangement with Agent.
SHORE LEAVE: Generally permitted.
CUSTOMS: Customs and Immigration Inspection Service available Monday to Saturday from 0700 hrs. to 1700 hrs. Charges for such service after hours and on Sundays and holidays. Number of inspectors required will be determined by Chief Customs and Immigration Inspector of port.
DELAYS: Delays in berthing, load or discharge or bunkering are minimal and infrequent. 8 hours is considered excessive.
DEVELOPMENTS: Amongst the plans for future developments in the port of Cristobal are:

(a) Improvements to existing installations.

(b) *Containers:* Amongst the facilities available at this terminal for containers, is the open area for handling and storage of containers covering 7.5 hectares, and a capacity up to 3,000 TEUs. It includes 8 points for reefer containers, a loading and consolidation building for containers, with an area in all of 6279.20 sq.m., a control building with a weighbridge of 60 tonne capacity, an entry point, handling equipment, a workshop for repair and maintenance.

Furthermore, the Port of Cristobal has other facilities to complement the services of the Container Terminal, such as: a mooring length of 428 m., with depth of water of 40 ft. It also has drinking water supply, bunkers, collection of pollutants, victualling, electricity supply and all communication services, i.e. radio, telex and telephone.

The Container Terminal has been operational since 1983, and has 2×40 tonne gantry cranes.

SHIPMASTER'S REPORT: July 1979.
Bottom Cleaning: Following a recent bottom clean of this vessel in Cristobal by 'Subservices, Inc.' I now forward two items of information which may prove useful to other Shipmasters.

(a) Because of the nature of the sea bottom in Cristobal, 'Subservice' required approximately 3.0 m. (10 ft.) beneath the keel. In anything less, the water displaced by the machine disturbed the mud sea bottom reducing underwater visibility.

(b) Contrary to advice received from the local signal station the deepest water was found in a position where the West Breakwater light bore 000° True at 3 cables. Due to the proximity of vessel to fairway a running moor was used. Average depth was 15.2 m. (50 ft.).

AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Jerry Salazar, Director General.

Cristobal Port Administrator: *Tel:* 41-4848 (Ext. 112).

AGENT: C. Fernie & Co., S.A. Apartado (P.O.Box) 5042, Cristobal, Republic of Panama. Tel: 45-1133 (5 lines). After Hours Tel: 42-1424, 41-4246, 45-2495 or 45-2278. Telex: 8520, 8542, 8814 or 9211. Fax: 41-4168. Cable Address: "Fernie Cristobal". VHF: Standby Channels 10 and 16.

PANAMA CANAL (entering Cristobal or Balboa) (See Plan)

§ Indicates Panama Canal – Code of Federal Regulations Number.
REGULATIONS: The following are some of the important Canal Regulations.

§101.1 Signal Stations at the Canal entrances:

The Panama Canal Commission maintains established signal stations at both the Atlantic and Pacific entrances of the Canal. A vessel arriving at the Canal must communicate with the signal station which is located at the entrance of the Canal at which that vessel arrives. Vessels required to be equipped with a radiotelephone pursuant to Part 123 of this subchapter must, upon arrival, communicate with the appropriate signal station on Channel 12, 156.000 MHz. All other vessels may use International Code and flashing light. Such stations are also utilised to assist in control of traffic within Panama Canal waters.

5. The cross reference which follows *§101.1* is revised as follows:

Cross Reference: See Part 123 for provisions respecting radio communication by vessels prior to arrival and while they are in Panama Canal waters.

§101.2 Boarding of arriving vessels:

(a) Unless otherwise directed, all arriving vessels will anchor in designated anchorages to await Boarding Officers. No person other than Boarding Officers of the Panama Canal Commission and the Republic of Panama may go on board or leave any vessel until such vessel has been entered by the Commission and, where applicable, by the Republic of Panama.

(b) Arriving vessels that are subject to inspection for compliance with Panama Canal shipping and navigation regulations will be boarded upon arrival. The boarding will occur inside the breakwater at the Atlantic entrance of the Canal or off the seaward end of the dredged, marked channel at the Pacific entrance. It will be performed by a Commission Boarding Officer in accordance with the procedures established under this Part. When such vessels are not boarded immediately upon arrival, they shall anchor in a designated anchorage area and await the Boarding Officer.

(c) Admeasurement functions shall be performed on arriving vessels either while at anchor or during transit.

§101.3 Definitions and functions of the Boarding Officer:

(a) Boarding Officer means any official or employee of the Panama Canal Commission who is duly assigned the functions of a Boarding Officer, including admeasurement and sanitation.

(b) The Commission Boarding Officer shall perform the functions of admeasurer for the purpose of determining Panama Canal tolls and shall make inspection for the purpose of insuring compliance with Panama Canal shipping, navigation and sanitation regulations.

§101.4 Measurement of vessel making maiden transit:

A vessel that arrives after 2000 hrs. and is to make her maiden transit will normally be admeasured on the following day.

§103.4 Load and trim:

(a) A vessel shall not be permitted to transit the Canal if she:
(1) Has a list of more than 10 degrees; (2) Is so tender or otherwise so loaded as to dangerously affect her stability or manoeuvrability; or (3) Is so trimmed as to dangerously affect her manoeuvrability.

(b) A vessel having a list of between 3 degrees and 10 degrees, or which is so loaded or so trimmed as to adversely affect her manoeuvrability, may be permitted to transit at the discretion of the Canal Operations Captain or his designee. If such vessel is allowed to transit, however, it may do so only at its own risk and, to the extent and in the proportion that such failure to meet the requirements of this section proximately causes or contributes to a casualty and resulting damages, the Master of such vessel on behalf of said vessel, her Owners, Operators, or any other persons having any interest in her, and for himself, will be considered to have released the Panama Canal Commission and the United States from, and to have indemnified them against, any loss, damage, or liability incurred by the Commission, or the United States under or in respect to:

(1) Sections 1411 – 1416, inclusive, of Pub. L. 96 – 70, 93 Stat. 485 – 87.
(2) Property of the Panama Canal Commission or the United States;
(3) Panama Canal Commission employees under the Federal Employees' Compensation Act, 5 U.S.C. 8101, *et seq.*, or any other employee compensation system.

The Master of the vessel that fails to meet the requirements of this section may be required to execute, in the presence of a Commission official, a form undertaking to release the Panama Canal Commission and the United States from liability in case of an accident and to indemnify the Commission and the United States for any damages sustained. The failure of the Master of a vessel to sign such a form, however, will not relieve the vessel, her Owners, or any other person having an interest in her from liability incurred as a result of the vessel's failure to meet the requirements of this section.

(c) Nothing shall be done, or permitted to be done, by the Master or any member of the crew, which would alter the trim or draft of a vessel while transiting the Canal, without the prior, express approval of the Pilot.

§103.7 Temporary holding of vessels:

The Canal authorities may hold a vessel for the purpose of investigating a marine accident under Parts 115 or 117. A vessel may also be held until, in the opinion of the Canal Authorities, its tenderness, trim, list, cargo, hull, machinery, and equipment have been put into such condition as will make the vessel reasonably safe for her passage through the Canal. No claim for damages shall be allowed or considered because of any such temporary holding of vessels.

§103.8 Order of transiting of vessels:

The Canal authorities may dispatch vessels through the Canal in any order and at any time they may see fit. Priority of arrival at a terminal does not give any vessel the right to pass through the Canal ahead of another that may arrive later, although order of arrival will be consideration in determining the order of passage.

§103.10 Vessels required to be equipped with certain indicators:

(a) All vessels in excess of 150 ft. in length shall be equipped with properly operating rudder-angle and engine-revolution indicators in the wheelhouse so located and illuminated as to be readily visible to a Pilot.

(b) All vessels with beams in excess of 80 ft. shall be equipped with properly operating rudder-angle and engine-revolution indicators in the wheelhouse and on each bridge wing so located and illuminated as to be readily visible to a Pilot.

(c) All vessels in excess of 150 ft. in length which are equipped with variable pitch propellers shall have properly operating pitch indicators in the wheelhouse so located and illuminated as to be readily visible to a Pilot.

(d) All vessels with beams in excess of 80 ft. which are equipped with variable pitch propellers shall have properly operating pitch indicators in the wheelhouse and on each bridge wing so located and illuminated as to be readily visible to a Pilot.

(e) Any vessel which fails to meet the requirements of this section may be denied transit. If the Canal authorities decide that a vessel can be handled without undue danger to equipment or to personnel, notwithstanding her failure to comply with other requirements of this section, and permit her to transit, such vessel may do so only at its own risk and, to the extent and in the proportion that such failure to meet the requirements of this section proximately causes or contributes to a casualty and resulting damages, the Master of such vessel, on behalf of said vessel, her Owners, Operators or any other persons having any interest in her, and for himself, will be considered to have released the Panama Canal Commission and the United States from, and to have indemnified them against any loss, damage or liability incurred by Panama Canal Commission or the United States under, or in respect to:

(1) Sections 1411 – 1416, inclusive, of Pub. L. 96 – 70, 93 Stat. 485 – 87;
(2) Property of the Panama Canal Commission or the United States;
(3) Panama Canal Commission employees under the Federal Employees' Compensation Act, 5 U.S.C. 8101, *et seq.*, or any other employee compensation system.

The Master of the vessel that fails to meet the requirements of this section may be required to execute, in the presence of a Commission official, a form undertaking to release the Panama Canal Commission and the United States from liability in case of an accident and to indemnify the Commission and the United States for damages sustained. The failure of the Master of a vessel to sign such a form, however, will not relieve the vessel, her Owners, or any other person having an interest in her from liability incurred as a result of vessel's failure to meet the requirements of this section.

§103.27 Clear view forward from the bridge and steering light requirement for certain vessels:

(a) A vessel may not be navigated in Canal waters unless there is a clear, unobstructed view from the bridge.

(b) All vessels over 100 m. (328 ft.) in length shall have installed at or near the stem, a steering range equipped with a fixed blue light which shall be clearly visible from the bridge along the centerline. If said range and light so placed would be partially or completely obstructed, then two such ranges and lights must be installed at an equal distance from the centerline and shall be clearly visible from the bridge along lines parallel to the keel.

(c) Naval or military vessels exempted from the requirements of Part 111 of this chapter shall also be exempt from the requirements of paragraphs (b), (d) and (e) of this section.

(d) The light required by this section shall be capable of being illuminated and extinguished by a suitable control switch located either on the navigation bridge or on the forecastle deck, or both.

(e) The use of this steering light shall be at the discretion of the Panama Canal pilot who has control of the navigation and movement of the vessel.

§109.5 Ship's gear to be ready during transit; test:

Before beginning transit of the Canal, a vessel shall have hawsers, lines and fenders ready for passing through the locks, for warping, towing, or mooring as the case may be; and shall have both anchors ready for letting go. The Master shall assure himself, by actual test, of the readiness of the vessel's main engines, steering gear, engine room telegraphs, whistle, rudder-angle and engine-revolution indicators, and anchors. During the transit, at all times while a vessel is underway or moored against the lock walls, her deck winches, capstans, and other power equipment for handling lines, as well as her mooring bitts, chocks, cleats, hawse pipes, etc., shall be ready for handling the vessel, to the exclusion of all other work.

DOCUMENTS: *§101.10* (a) *Documents for Commission Boarding Officer.* All documents listed below shall be ready for immediate delivery to the Boarding Officer when he boards the vessel upon each arrival of the vessel at the Canal.

Documents Required

1. Ship's Information and Quarantine Declaration (Panama Canal Form 4398) – 1 copy.
2. Cargo Declaration (Panama Canal Form 4363) – 1 copy.*
3. Crew List (Panama Canal Form 1509) – 2 copies.
4. Passenger List (Panama Canal Form 20) 1 copy.
5. Dangerous Cargo Manifest – 1 copy.†
6. Loading Plan – 1 copy.‡
7. Panama Canal Tonnage Certificate – 1 copy.*
8. Ship's Plans (general arrangement, engine room, capacity, midship, etc.) – 1 copy.*

*Required only if vessel transits Canal.

†Required only if vessel is carrying packaged, dangerous goods.

‡Required only if vessel is carrying dangerous cargo in bulk.

(b) *Documents for Examination Only.* The following documents shall be available for inspection by the Commission Boarding Officer:

1. Ship's log,
2. All ship's documents pertaining to cargo, classification, construction, load lines, equipment, safety, sanitation, and tonnage,
3. SOLAS Certificate, for ships carrying dangerous cargo in bulk,
4. An International Oil Pollution Certificate, for ships carrying dangerous cargo in bulk, and
5. Certificate showing compliance with the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978 (STCW), if the nation of registry has implemented the conventions standards. If the nation of registry has not implemented the STCW convention, then certifications issued or accepted by the registry nation attesting to the qualifications of officers and crew will be accepted by the agency. Certification requirements will apply only to officers and crew responsible for the safe handling of the vessel.

(c) *Crew List.* For the purposes of additional identification of crew members, all copies of the Crew List required by this section shall include for each seaman the serial number of his certificate of identification, continuous Discharge Book, Passport or other satisfactory identifying documentation. In addition, the given name and middle initial, as well as the family name, shall be shown for all seamen.

(d) *Passenger List.* The Passenger List required by this section shall be in accurate and legible form and shall be delivered to the boarding officer. The list shall show passengers in alphabetical order.

(e) *Dangerous Cargo Manifest.* The Dangerous Cargo Manifest for vessels carrying packaged dangerous goods, as defined in *§113.2*(m) see below, of this title, shall show the correct technical name, United Nations number, International Maritime Organisation class, storage location, and quantity for each packaged dangerous goods carried as cargo.

(f) *Loading Plan.* The Loading Plan for vessels carrying dangerous cargoes in bulk, as defined in *§113.2*(f) see below, of this title, shall show the location of cargo tanks or holds and the correct technical name, United Nations number, International Maritime Organisation class, and quantity of dangerous cargo carried in each cargo tank or hold.

§113.2(f) "*Dangerous Cargo in Bulk*" means any dangerous substance, carried without any intermediate form of containment, in a tank or cargo space which is a structural part of a vessel or in a tank permanently fixed in or on a vessel.

(m) "*Packaged Dangerous Goods*" means any dangerous cargo contained in a receptacle, portable tank, freight container or vehicle. The term includes an empty receptacle, portable tank or tank vehicle which has previously been used for the carriage of a dangerous substance unless such receptacle or tank has been cleaned and dried, or when the nature of the former contents permits transport with safety.

Documents Required for Maiden Transit:

Please Provide the Following for Panama Canal Admeasurer:

1. National Register.
2. Panama Canal Tonnage Certificate.
3. Suez Canal Tonnage Certificate (if available).
4. International Load Line Certificate.
5. International Tonnage Certificate.
6. General Arrangement Plan.
7. Capacity Plan.
8. Engine Room Plans.
9. Midship Section Plan.
10. Tank Sounding Tables for L.O. & F.O. tanks.
11. Lines Plan.

PILOTAGE: *§105.4 Pilotage Charges:* Pilotage for vessels in transit through the Canal is free, but whenever any vessel requires a Pilot for other than transit, it is liable for the applicable pilotage charge.

§105.5 Pilotage Beyond Atlantic Breakwater

Should a vessel desire a Pilot to meet it outside the Atlantic breakwaters, such vessel shall remain there and make signal to that effect.

§105.6 Status and Function of Pilot

The Pilot assigned to a vessel shall have control of the navigation and movement of such vessel.

§105.1 Pilots Required

(a) Except as provided by *§105.2* and *§105.3*, or by paragraph (c) of this section, no vessel shall pass through, enter or leave the Canal or manoeuvre in the Canal or waters adjacent thereto, including the ports of Cristobal and Balboa, without having a Panama Canal Pilot on board.

(b) Normally, a vessel will, unless advised to the contrary by the Canal Operations Captain or his designee, be boarded by the Panama Canal Pilot inside the breakwater at a point North of the Mole Beacon at the Atlantic entrance and in the Merchant Vessel Anchorage to seaward of Buoys 1 and 2 at the Pacific entrance.

(c) In conformity with past practice, vessels anchored in Anchorage Area C and Anchorage Area F, as shown in the Pilot Handbook, Limon Bay Chart, may proceed to sea without a Panama Canal Pilot on board. All such vessels, prior to getting underway, must obtain permission to depart from the Cristobal Signal Station.

(d) Whenever the Administrator finds there is a critical shortage of Certified Panama Canal Pilots available for movement of vessels in Canal waters, he may suspend the rule on compulsory pilotage set out in paragraph (a) of this section. The Administrator shall impose such conditions upon the suspension of the rule, with respect to any given vessel, as are reasonable and appropriate to protect human life and property and to safeguard the facilities of the Panama Canal.

§103.19 Requirements for Pilot Platforms and Shelters on Certain Vessels

(a) Suitable shelters and platforms, port and starboard, must be provided by certain vessels for assisting pilots. Vessels with extreme beam of 100 ft. (30.48 m.) or more and a length of 625 ft. (109.5 m.) overall or more, may require more than 2 pilots when transitting the locks of the Panama Canal:

(1) Vessels with the bridge in the extreme afterpart of the vessel (assisting pilot and platforms will be forward).

(2) Vessels with the bridge in the extreme forepart of the vessel (assisting pilot and platform will be aft).

(b) Platforms must afford shelter suitable to protect assisting pilots from rain and sun. A sketch of a simplified pilot platform acceptable to the Panama Canal Commission can be seen in the "Plan Section".

(c) Each platform is to be erected directly over the furthest point forward of the extreme beam at the waterline, and not more than 6 in. inboard from the outside of the vertical plane of the shell plating. For vessels where the bridge is located forward, these pilot platform shelters will be required to be erected directly over that position, which is the furthest point aft of the extreme beam at the waterline, and not more than 6 in. inboard from the outside surface of the vertical plane of the shell plating.

(d) In addition, all vessels whose extreme beam is 80 ft. (24.38 m.) or more, are required to provide bridgewing shelter platforms for the protection of control pilots. A sketch of a bridgewing shelter platform acceptable to the Panama Canal Commission can be seen in the "Plan Section". Alternate arrangements, including portable shelters, which provide equivalent or better protection and visibility, may be acceptable. Such shelters shall be placed at the extreme ends of the bridgewings and equipped with deck grating, sufficient to provide dry footing at all times.

(e) The awning indicated in the "Plan Section" is to be made of suitable material to provide shelter from the sun and rain. The deck of the pilot's platform is to be made of wood or other material with non-skid surface.

(f) Further inquiries on this subject should be directed to the Canal Operations Captain.

§103.18 Pilot Ladders, Hoists and Side Ports

(a) A vessel shall, weather permitting, have both an accommodation ladder and a pilot ladder rigged and ready for use upon arrival in Canal waters.

(b) The pilot ladder shall be constructed and rigged in accordance with Regulation 17, Chapter V, International Convention for Safety of Life at Sea, 1974, TIAS 9700, except that;

(c) When the distance from the water line to the point of access of the vessel exceeds 9 m. or 30 ft., a combination pilot ladder and short brow accommodation ladder must be provided for boarding purposes.

(d) A mechanical pilot hoist may be used for Boarding Officials and Pilots only at their discretion, and provided that the design and construction of the hoist and ancillary equipment are in accordance with Regulation 17, Chapter V, International Convention for Safety of Life at Sea, 1974.

(e) When a mechanical pilot hoist is used, a ring buoy fitted with a lifeline and self-igniting light shall be available and ready for immediate use. The pilot ladder required by *§103.18* (a) shall be in close proximity to the pilot hoist, ready for immediate use but lashed up so as not to interfere with the pilot hoist.

(f) When the side ports are used for boarding, the minimum vertical distance between the waterline and the bottom of the side port at any draft shall be 6 ft.

ANCHORAGES: No vessel shall anchor within the navigable waters of the Canal in other than a designated anchorage, except in an emergency, and no craft shall tie up to any aid-to-navigation in Canal waters.

§ 101.8 Vessel Anchorage Areas

The following areas are designated as authorised anchorages within Canal waters.

(a) *Atlantic Entrance.* – (1) *Merchant-Vessel Anchorage:* An area to the West of the Canal channel bounded as follows: Starting at a point "A", located in position 9° 21′ 25″ N., 79° 55′ 31″ W., and marked by lighted Buoy No. 2, thence 900 yards 270° True to a point "B" located in position 9° 21′ 25″ N., 79° 55′ 58″ W., thence to lighted Buoy "I", thence to lighted Buoy "H", thence due North to a point "C" located in position 9° 22′ 07″ N., 79° 56′ 41″ W., thence 2,800 yards 59° True to a point "D" located in position 9° 22′ 50″ N., 79° 55′ 29″ W., and thence to the starting point. The line extending due West from the Cristobal Mole through lighted Beacon No. 1 and lighted Buoy No. 2 (9° 21′ 25″ N.) marks the southern limit of the anchorage area. Except as provided by *§105.3*, no vessel shall pass this line without having been passed by the boarding officer and without having a Canal Pilot on board.

(2) *Outside Explosive Anchorage.* An area bounded by a line from Point A at position 9° 23′ 53″ N., 79° 56′ 29″ W. thence to Point B at position 9° 24′ 40″ N., 79° 56′ 29″ W. thence to Point C at position 9° 24′ 40″ N., 79° 57′ 00″ W. thence to Point D at position 9° 23′ 53″ N., 79° 57′ 00″ W. thence to Point A.

(3) *Inside Explosive Anchorage.* The area included in a rectangle 1,000 yards wide immediately South of the West breakwater, the rectangle extending 2,000 yards along the West breakwater from a point on the West breakwater 1,000 yards from the West breakwater light.

(4) *Small-Craft Anchorage.* An area to the East of the Canal channel bounded as follows: Starting at Buoy "A", a flashing amber Buoy located in position 9° 20′ 43″ N., 79° 55′ 10″ W., thence 1,075 yards 066° True, through fixed amber lighted Buoy "B" to fixed amber lighted Buoy "C", thence 375 yards 143° True, thence 1,760 yards 233° True to the East prism of the Canal channel, thence due North 410 yards to flashing special anchorage Buoy "3", thence 525 yards 023° True to the starting point at Buoy "A".

(b) *Gatun Lake Anchorage:* An area immediately East of the Canal channel line, bounded by a line extending from the South end of the East wing-wall of Gatun Locks, thence 450 yards 120° True, thence 676 yards 146° True to flashing special anchorage Buoy "A", thence 1,415 yards 078° True to flashing special anchorage Buoy "1", thence 1,199 yards 155° True to flashing special anchorage Buoy "3", thence 2,314 yards 225° True through special anchorage Buoy "5" to special anchorage Buoy "7", thence 901 yards 220° True to special anchorage Buoy "9", thence 952 yards 205° True to the Canal channel line at flashing Buoy "11", the channel prism line being the Westerly boundary line of the anchorage area.

(c) *Pacific Entrance* – (1) *Merchant-Vessel Anchorage:* An area bounded as follows: Beginning at a point in position 8° 51′ 50″ N., 79° 30′ 00″ W., marked by a lighted, whistle buoy which is painted with alternating black and white vertical stripes and which shows short-long flashing white light every 8 seconds, (i.e. light 0.4 seconds, eclipse 0.4 seconds, light 1.6 seconds, eclipse 5.6 seconds), thence due East to Long. 79° 28′ 00″ W.; thence due North to 8° 54′ 31″ N., thence due West toward Flamenco Island Light to a point 8° 54′ 31″ N., 79° 30′ 46″ W.; thence Southwestward touching the Northwest corner of San Jose Rock to position 8° 53′ 27″ N., 79° 31′ 23″ W., marked by canal-entrance lighted Buoy No. 2, thence Southwestward to the point of beginning.

(2) *Explosive Anchorage.* An area South of Naos Island bounded on the East by a line drawn South (True) from canal-entrance lighted Buoy No. 1; on the South by a line drawn East (True) from Tortolita Island, and in the North and West by the curve of 30 ft. depth.

(d) If there are any discrepancies between the designated anchorage areas as described in this section and the anchorage areas described in paragraph 4 of Annex A of the Agreement in implementation of Article III of the Panama Canal Treaty of 1977 and the attachments thereto, the description in the treaty documents shall govern.

MAX. SIZE: *Note:* Max. draft in March 1986 was 39 ft. 06 in. (tropical fresh water). However this subject to change.

§103.6 Size and Draft Limitations of Vessels

(a) *Definitions as Used in This Section:*

1. "TFW" means Tropical Fresh Water of Gatun Lake, density 0.9954 gm./c.c. at 85°F. (Transition to fresh water frequently alters the trim of large vessels 3 in. to 4 in. by the head.)

2. "Published TFW Maximum Draft" means the deepest point of immersion in Gatun Lake waters as promulgated by the Marine Director, taking into account the water level of Gatun Lake and other limitations deemed necessary because of restrictions in the Canal.

3. "Maximum Authorised Transit Draft" means the deepest point of immersion in TFW of a particular vessel authorised at anytime, Gatun Lake level and Canal restrictions permitting.

4. "Commercial Vessel" means a self-propelled vessel other than a naval, military or other public vessel.

5. "Integrated Tug-Barge Combination" means a barge that is specifically configured to receive a tugboat and with the tug, becomes, in effect, a single self-propelled unit.

6. "Non-Self-Propelled Vessel" means a vessel which either does not have an installed means of propulsion, or has an installed means of propulsion which is not functioning during transit.

7. "Barge" means a flat-bottomed vessel of full body and heavy construction without installed means of propulsion.

(b) *Maximum authorised transit draft of vessels with draft in excess of 35 ft. 6 in.*

1. Prior to the initial transit of a vessel whose transit draft will exceed 35 ft. 6 in., Owners, Operators, or Agents must supply in full the information required in sub-paragraph (b)(2) of this section and request the maximum authorised transit draft for the vessel (deepest point of immersion TFW) from the Canal Operations Captain, no later than 2 weeks prior to loading of the vessel. This request will be returned with the approved maximum authorised transit draft stamped thereon.

2. The information required by sub-paragraph (b)(1) of this section shall be submitted in the following format:

Information Needed Prior to Initial Transit Through the Panama Canal:

Bilge Information

Name of Vessel.. Date................

Authorised Tropical Fresh Water Load Line ....

Admeasurer ....Certified as Correct...................

(Master/Owner/Agents)

1. "A" – Half breadth of vessel to the outside of shell ....
2. "R" – Radius of turn of bilge (feet and inches) ....
3. "DR" – Dead rise at side of vessel (inches) ....

SEE "PLAN SECTION".

Notes:

1. The Panama Canal Commission is not responsible for damage to bilge keels resulting from transit through the locks.

2. On an off centre lockage with the vessel touching the lock wall, the turn of the bilge will clear the lock-wall batters at the most critical point as shown in (d) No. 3 below.

(c) *Draft During Initial Transit*

The initial transit is permitted at the maximum authorised transit draft. After the initial transit, unless the vessel's Agent or Owner is notified of any restrictions imposed by Canal Authorities, this maximum authorised transit draft will remain in effect.

(d) *Minimum Transit Drafts, Measured in Salt Water*

1. All vessels transiting the Canal must have sufficient ballast to permit safe handling during transit. The following are minimum salt water drafts (TSW) for ships anticipating transit.

Length	*Minimum Drafts*
Up to 425 ft. –	Trimmed so Pilot can see the ranges over the forecastle from centre of navigation bridge
Over 425 ft. –	8 ft. forward, 14 ft. aft, TSW
Over 475 ft. –	18 ft. forward, 20 ft. aft, TSW
Over 525 ft. –	20 ft. forward, 22 ft. aft, TSW
Over 580 ft. –	22 ft. forward, 24 ft. aft, TSW
Over 625 ft. –	24 ft. forward, 26 ft. aft, TSW

2. The vessel's drag must not adversely affect manoeuvrability.

3. The following table provides the limiting drafts due to bilge radius:

Table of Limiting Drafts due to Bilge Radius
Contacting Chamber Batters

(Allows for 6 in. thick rubber fenders on lock walls at batter locations.)

	Radius of Turn of Bilge (ft.)				
in.	1 ft.	2 ft.	3 ft.	4 ft.	5 ft.
0	35 ft. 08 in.	36 ft. 06 in.	37 ft. 04 in.	38 ft. 02 in.	39 ft. 00 in.
1	35 ft. 09 in.	36 ft. 07 in.	37 ft. 05 in.	38 ft. 03 in.	39 ft. 01 in.
2	35 ft. 10 in.	36 ft. 08 in.	37 ft. 06 in.	38 ft. 04 in.	39 ft. 02 in.
3	35 ft. 10 in.	36 ft. 08 in.	37 ft. 06 in.	38 ft. 05 in.	39 ft. 03 in.
4	35 ft. 11 in.	36 ft. 09 in.	37 ft. 07 in.	38 ft. 05 in.	39 ft. 03 in.
5	36 ft. 00 in.	36 ft. 10 in.	37 ft. 08 in.	38 ft. 06 in.	39 ft. 04 in.
6	36 ft. 01 in.	36 ft. 11 in.	37 ft. 09 in.	38 ft. 07 in.	39 ft. 05 in.
7	36 ft. 02 in.	37 ft. 00 in.	37 ft. 10 in.	38 ft. 08 in.	39 ft. 06 in.
8	36 ft. 03 in.	37 ft. 01 in.	37 ft. 11 in.	38 ft. 10 in.	
9	36 ft. 03 in.	37 ft. 01 in.	38 ft. 00 in.	38 ft. 10 in.	
10	36 ft. 04 in.	37 ft. 02 in.	38 ft. 00 in.	38 ft. 10 in.	
11	36 ft. 05 in.	37 ft. 03 in.	38 ft. 01 in.	38 ft. 11 in.	

Example: To find draft of ship having a radius-of-turn-of-bilge of 4 ft. 4 in. read across top of table to column headed 4 ft. thence down column opposite 4 in. – read 38 ft. 5 in.

Note: Dead Rise not included in above tabulations and must be added to above readings.

4. A vessel whose ballast draft does not meet the minimum draft requirements established by this section may be accepted for transit on a regular basis, provided the vessel operator requests permission and submits the following information to the Canal Operations Captain: (i) principal dimensions of the vessel; (ii) deepest attainable minimum draft (fore and aft); (iii) limitations on visibility fore and aft from the navigation bridge; (iv) necessary excerpts from the vessel's plans, drawings and manoeuvring data that relate to the vessel's suitability for transit.

5. The vessel will be inspected by the Canal Authorities upon its first visit after such a request is made. If the vessel is acceptable for transit at less than the prescribed minimum draft, the Operator will be notified that transit on a regular basis is authorised provided the vessel meets the special minimum draft that is specified in the notice.

6. If the vessel is found not to be acceptable for transit on a regular basis, a single transit may be authorised, at the discretion of the Canal Authorities, subject to the imposition of any special conditions that may be required for reasons of safety or continuance of regular Canal operations.

(e) *Maximum Length*

1. The maximum length overall including bulbous bow, for a commercial vessel acceptable for regular transit is 950 ft., except passenger and container ships may be 965 ft. in overall length.

2. The maximum length for integrated tug-barge combination acceptable for regular transit is 900 ft. overall, including the tug. A tug-barge combination must transit together as one unit, with the tug supplying the propelling power.

3. The maximum aggregate overall length for non-self-propelled vessels acceptable for transit is 850 ft., including accompanying tugs. Accompanying tugs must lock through with the non-self-propelled vessel.

(f) *Maximum Beam*

1. The maximum extreme beam for a commercial vessel and the integrated tug-barge combination acceptable for regular transit is 106 ft.

2. At the discretion of the Chief, Navigation Division or his designee, commercial vessels, including integrated tug-barge combinations, having an extreme beam of between 106 ft. and 107 ft. may be permitted to transit on a one-time basis only if the deepest point of immersion does not exceed 37 ft. TFW.

3. The maximum extreme beam for non-self-propelled vessels (other than integrated tug-barge combinations) acceptable for transit is 100 ft.

(g) *Previous Approvals and One-Time Transits.*

Vessels approved for regular transit prior to December 20, 1976, whose maximum length or beam slightly exceed the limits set forth in paragraphs (e) and (f) may continue to transit on a regular basis. After that date, approval will not be given for transit of other commercial vessels whose extreme beam exceeds 106 ft. by any amount, except for vessels transiting on a one-time delivery basis.

(h) *Release from Liability*

If a vessel having a beam in excess of 106 ft. is permitted to transit on a one-time basis, such vessel may do so only at its own risk and, to the extent and in proportion that such failure to meet the requirements of this section proximately causes or contributes to a casualty and resulting damages, the Master of such vessel, on behalf of said vessel, her Owners, Operators, or any other person having an interest in her, and for himself, will be considered to have released the Panama Canal Commission and the United States from, and to have indemnified them against, any loss, damage or liability incurred by the Panama Canal Commission or the United States under, or in respect to:

1. Sections 1411 – 1416, inclusive, of Pub. L. 96-70, 93 Stat. 485-7;
2. Property of the Panama Canal Commission or the United States; and
3. Panama Canal Commission employees under the Federal Employees' Compensation Act 5 U.S.C. 8101, *et seq.*, or any other employee compensation system.

The Master of the vessel that fails to meet the requirements of this section may be required to execute, in the presence of a Commission Official, a form undertaking to release the Panama Canal Commission and the United States from liability in case of an accident and to indemnify the Commission and the United States for any damages sustained. The failure of the Master of a vessel to sign such a form, however, will not relieve the vessel, her Owners, or any other person having an interest in her from liability incurred as a result of the vessel's failure to meet the requirements of this section.

(i) *Denial of Transit*

A Vessel shall not be permitted to transit the Canal under the following circumstances:

1. When the vessel's maximum point of immersion exceeds its maximum authorised draft.
2. When the vessel's maximum point of immersion exceeds the published TFW maximum draft then in effect;
3. When the length overall, including bulbous bow, exceeds that stated in paragraph (e) of this section, unless the vessel was approved for regular transit prior to March 16, 1981; or
4. When the extreme beam exceeds that stated in paragraph (f) of this section by any amount, unless the vessel was approved for regular transit prior to March 10, 1981.

(j) *General*

1. Vessels of 100 ft. beam and over whose list, trim or handling characteristics are such as to endanger themselves, Panama Canal appurtenances or a third party, may have such further limitations placed on them as Canal Authorities deem necessary to ensure reasonable safety.
2. The draft of non-self-propelled barges of 550 ft. or more in length may be limited when, in the opinion of Canal Authorities, such a limit is necessary to ensure reasonable safety.
3. Non-self-propelled vessels, other than integrated tug-barge combinations, will be accepted only on an individual basis; advance permission for initial transit as a non-self-propelled vessel is required. Displacement of these vessels is limited to 35,000 tons and the draft requirements of paragraph (d) of this section are applicable. Riding crews must be provided in sufficient numbers, as required by the Canal Operations Captain, to safely handle towboat lines and boarding ladders, and to assist in mooring.
4. The numerous constraints affecting the transit schedules of vessels and tows make it important that information provided in advance of the initial transit of a vessel include a capacity plan, general arrangement plans, engine room plans, and whenever possible, a photostatic copy of National Register, Load Line Certificate and Panama Canal Tonnage Certificate. This advance information will minimise the time spent aboard the vessel by Panama Canal Officials before commencement of the initial transit.

HEALTH: Application for Radio Pratique is available to all vessels arriving in Panama Canal waters. Radio Pratique is a quarantine clearance by radio, based upon information from the vessel prior to its arrival at Balboa or Cristobal and past experience with the vessel and its personnel. A limited number of vessels will be sampled for compliance with the required standards of health and sanitation on board. The sampling will generally be done on a random basis and will provide a measure of the success of the programme.

It should be emphasised that Radio Pratique applies only to the quarantine section of the required forms and documents for the Panama Canal. All vessels must still complete the required boarding forms, and in most cases, be prepared to receive the Panama Canal Boarding Inspector on arrival in Canal waters. Such forms as crew and passenger lists, ship's information forms, and the cargo declaration must always be completed for presentation to the Panama Canal officials.

Attached is a listing of the items to be reported prior to arrival in the Canal waters. The information is similar to that now required of vessels requesting Radio Pratique in U.S. ports. In addition, there are some special circumstances that make additional information necessary.

The manner of reporting the information required should be clear and orderly as specified in 35 CFR, section 123.4, listing information required in advance. The request for Radio Pratique should originate from the Master and can be submitted directly by radio or through the vessel's local Agent. The local Agent should submit his request with all the required information to the Admeasurement Office at the port of arrival of the vessel. The local Agent will be notified when Radio Pratique is granted or refused and the Agent will communicate this information to the ship.

It is hoped that vessels will take advantage of Radio Pratique when arriving for transit and that in as many instances as possible it may be able to grant this time saving privilege.

Radio Pratique Programme

1. *General*

(a) The granting of Radio Pratique is an Office of Health and Safety responsibility designated to the Occupational Health Division. (35 CFR 61.264) see below.

§61.264 Radio Pratique; vessels only.

The Medical Officer in charge may grant Pratique by radio to a vessel upon the basis of information regarding the vessel, its cargo and persons aboard, received prior to arrival of the vessel, when in his judgement, and in accordance with instructions by the Chief, Occupational Health Division, the entry of the vessel will not result in the introduction, transmission or spread of communicable diseases.

(b) In order to process the details of this programme more expeditiously, communication may be held between the quarantine offices and the ship's Steamship Agent representing the vessel hereinafter called local Agent.

(c) All vessels coming to the Panama Canal may request Radio Pratique by means of the ETA radio message or through the ship's local Agent.

(d) Requests for Radio Pratique must be submitted to the Admeasurement Office at the port of arrival not less than 48 hours in advance.

2. *Specific Requirement for Each Voyage*

(a) The vessel will be maintained free from rats and vermin.

(b) The Derat Certificate or Derat Exemption Certificate must be valid (i.e. date of issue not more than 180 days prior to date of arrival at the Panama Canal).

(c) Vessels arriving within 15 days from the ports designated in the Aedes Aegypti Indices Bulletins must be disinfected with the aerosol described in the Aedes Aegypti Indices Bulletin No. 8, 1970.

(d) The restrictions imposed in 61.281 through 61.302, "Importation of Certain Things", Title 35 CFR, must be strictly adhered to and followed.

3. *Action taken by the Medical Officer in Charge**

(a) Radio Pratique *may* be granted by the Admeasurement Office upon request from the vessel or through the ship's local Agent representing the vessel provided it is documented by ship's radio.

(1) If the information requested in the Appendix hereto is complete; *and,*

(2) If the Medical Officer in charge* is of the opinion that the vessel is reasonably free from any condition either from a health or sanitation standpoint that might introduce illness into the Canal.

(b) Radio Pratique may be denied by the Medical Officer in charge:

(1) If the requested information is incomplete; or,

(2) If the Medical Officer in charge* feels that medical or sanitary reasons prevail requiring careful inspection upon arrival of the vessel.

*Or designated representative.

4. *For Sampling and Surveillance of Compliance Purposes*

After the information supplied by the Shipmaster has been reviewed the Medical Officer in charge* will advise the ship's local Agent concerned whether Radio Pratique has been granted or denied and if any restrictions or limitations have been imposed. He will also inform the Marine Traffic Controller.

*Or designated representative.

5. *Action taken by Ship's Local Agent*

(a) The ship's local Agent may submit requests for Radio Pratique to the Admeasurement Office if the vessel has not done so by radio. The information required is listed in the Appendix hereto. Such requests should be submitted, properly documented by ship's radio, not later than 24 hours before the vessel is scheduled to arrive nor earlier than 48 hours before the expected arrival of the vessel.

(b) The ship's local Agent will advise the vessel which he represents whether Radio Pratique has been granted or denied; and any restrictions or limitation imposed.

6. *Action taken by Panama Canal Commission Boarding Inspectors*

On vessels that have been granted Radio Pratique, the Panama Canal Commission Boarding Inspector will:

(a) Ascertain that the Ship's Master has completed the Ship's Information and Quarantine Declaration (Form 4398) *except* the "quarantine data" portion at the bottom of the form; and,

(b) Otherwise process the vessel (e.g. for Admeasurement, and any other non-quarantine requirements) and any further questioning on quarantine matters. This processing will be in the bay. Passengers that are disembarking from vessels may be processed by the Panamanian Authorities at the docks.

(c) Vessels that are denied Radio Pratique or have failed to request Radio Pratique, will be cleared through Quarantine by the Panama Canal Commission Boarding Inspector in the prescribed routine manner.

7. *Action taken by Shipmasters*

(a) Shipmasters should request Radio Pratique directly by radio or through the Agent representing them in the Panama Canal and supply the information requested in the Appendix hereto.

(b) Shipmasters should take cognizance of the requirements listed in paragraph 2, "Specific requirement for each voyage", above.

(1) If granted Radio Pratique, they may enter the anchorage area flying the quarantine flag; they must however comply with any restrictions or limitations imposed by the Medical Officer in charge.

(2) Vessels *must* await boarding by a representative of the Panama Canal authority.

(3) If denied Radio Pratique, vessels must be cleared for Quarantine in the prescribed routine manner; that is enter the Canal waters flying the quarantine flag and must await processing by the Panama Canal Commission Boarding Inspector.

(4) It is important that the Shipmasters remember that in all instances all forms regularly required are to be completed prior to arrival for presentation to the Boarding Inspector.

Appendix

Information required by Quarantine Officer in Charge from Shipmaster requesting Radio Pratique through ship Agency representing him at the Panama Canal.

Full name of vessel.

Country of registry.

International radio call letters.

Estimated date of arrival and port.

Whether docking at Balboa or Cristobal and reason therefor.

List of ports of call within past *15* days prior arrival.

Report any illness or communicable diseases on board.

Report any death occurring on board since departure from last port and cause, if known or suspected.

Report the number of passengers to be disembarked and port of disembarking (e.g. Cristobal or Balboa).

Report the date of the Derat Certificate or Derat Exemption Certificate.

Record the number, kind, and origin of all animals aboard and if any are scheduled for disembarking.

Report the origin or source of the meat in the ship's stores.

Only vessels in the following categories need still be subject to "on board" public health clearance upon arrival:

A. Vessels which, during the 15 days prior to arrival in the Canal ports, have or have had on board passenger or crews with any of the following conditions or symptoms of illness:

1. Temperature of 100° F (38° C) or greater *(a)* which persisted for 2 days or more: or *(b)* which was accompanied or followed by any one or all of the following: rash, jaundice, glandular swelling; *or*
2. Prolonged diarrhoea (lasting 1 full day or more).

B. Occurrence of death on board for any reason.

C. Vessels which have been in a country infected with plague in the 60 days prior to arrival in the Canal.

RADIO: Balboa Naval Radio NBA.

Signal Stations: (a) Visual-signal stations established for communication on arrival Canal approaches by International Code and/or flashing light, at seaward end of Pier 6 Cristobal, and on Flamenco Island at Pacific entrance.

(b) Flamenco Island and Cristobal Signal Station also contactable on VHF Channel 12 frequency 156.6 MHz, and R/T 2182, 2638 and 2846 kHz – call letters WHC.

(c) Vessels awaiting transit at Balboa anchorage should keep VHF radio watch on Channel 12 for transit orders.

(d) Arriving ships may communicate with Port Captain's Office, Cristobal through Cristobal Signal Station. Radio communication is maintained on international maritime VHF Channel 12 (156.6 MHz) through "Cristobal Radio".

§123.4 Advance information required by radio from vessels approaching Canal: (a) Vessels approaching the Panama Canal shall communicate by radio to the Canal Operations Captain not less than 48 hours in advance of arrival at the Canal (or earlier if radio communication is practicable at an earlier time), the information required by this section unless this information has been previously communicated to the Canal Authorities by other means. Symbols of the phonetic alphabet shall be used to identify each item and the word "NEGAT" shall be used after the items that can be answered "no", "none", or "not applicable". The following items of information shall be provided:

ALFA – The Panama Canal Identification Number of the vessel.

BRAVO – Estimated date and time of arrival, port of arrival and request for Canal transit if desired.

CHARLIE – Estimated draft upon arrival, in feet and inches (fore and aft), in tropical fresh water.

DELTA – Any changes in the vessel's name, country of registry, structure, or use of tanks that have occurred since the vessel last called in Panama Canal waters.

ECHO – Will the vessel dock at Balboa or Cristobal? What is the reason for docking? If it is for cargo operations, fuel or water, give the tonnage involved in each case. Is there any other reason the vessel will not be ready to transit upon arrival? What is the reason?

FOXTROT – The nature and tonnage of any deck cargo.

GOLF – If the vessel is carrying any explosives or dangerous cargoes in bulk (as classified in 113.3), state the correct technical name, quantity (in long tons), United Nations number, and the International Maritime Organisation class and division for each dangerous cargo carried. If the vessel is a tanker in ballast condition and not gas free, state the correct technical name, United Nations number, and International Maritime Organisation class and division of the previously carried cargo.

HOTEL – If the vessel is carrying any packaged dangerous goods (as classified in 113.3) other than explosives state the International Maritime Organisation class and division and the total quantity (in long tons) within each class.

INDIA – Quarantine and Immigration information:

(1) Is Radio Pratique desired?

(2) State the ports at which the vessel has called within 15 days preceding its arrival at the Canal.

(3) State all cases of communicable disease aboard and the nature of the disease or diseases, if known.

(4) The number of deaths which have occurred since departure from the last port and the cause of each death, if known.

(5) The number of passengers disembarking and their port of disembarkation.

(6) The number of ports of origin of any stowaway and a brief description of the identity papers of each stowaway.

(7) The number, kind and country of origin of any animals aboard. Are any animals to be landed?

(8) The country of origin of all meat, whether carried as cargo or as ship's stores.

(9) Has the vessel called at a port in any country, infected with foot-and-mouth disease or rinderpest during its present voyage? Countries considered to be infected are:

(a) All countries East of the 30th Meridian West longitude and West of the International Date Line except Australia, Channel Islands, Fiji, Greenland, Iceland, Japan, New Zealand, Northern Ireland, Norway, Republic of Ireland.

(b) All countries of South America; *(e)* Martinique;
(c) Curacao; *(f)* Guadeloupe.
(d) Cuba;

(10) Specify whether the vessel has a valid Derat Certificate or a Derat Exemption Certificate issued 180 days prior to arrival.

The following additional information shall be transmitted via radio to the Port Captain from all vessels as applicable:

(1) Vessels approaching from the Pacific shall report actual time of passing Cape Mala, or the latitude of Cape Mala, and the vessel's speed.

(2) Vessels approaching from the Atlantic shall report 12 hours prior to arrival at Cristobal any change of 1 hour or more in the expected time of arrival.

(3) Any other matters of importance and interest.

Timely receipt of the above information will facilitate the transit or docking of arriving vessels. Failure to comply with these reporting requirements may subject a vessel to delay since vessels which do comply will receive priority of service and handling over those which do not.

VHF: *§123.3 Radiotelephones required.*

(a) Except for vessels operated by the Panama Canal Commission or another agency of the United States, the following vessels shall comply with the requirements of this section:

(b) A vessel of a type described in paragraph (a) of this section shall be equipped with a radiotelephone which can be operated from the navigation bridge and which can be used to communicate on the following Channels in the 156 – 162 MHz frequency band:

(1) Channel 12, 156.600 MHz;
(2) Channel 13, 156.650 MHz;
(3) Channel 16, 156.800 MHz.

(c) A vessel of a type described in paragraph (a) of this section, which has notified the Canal Operations Captain or his designee that it is ready to transit or otherwise navigate in Panama Canal waters and requires a Panama Canal Pilot, shall, until a Pilot boards the vessel, maintain a continuous watch on Channel 12. Channel 12 will be used for notification to vessels of their transit time and for advisory harbour control communication in Limon Bay.

(d) A vessel of a type described in paragraph (a) of this section shall maintain a continuous watch on Channel 13 when underway in Panama Canal waters without a Panama Canal Pilot aboard, and shall use Channel 13 only for ship-to-ship or ship-to-coast navigational communications. When such vessels have a Panama Canal Pilot aboard, Channel 13 may be used only by the Pilot or at his direction for navigational communications.

(e) The signal stations on Flamenco Island and in Cristobal may be called on Channels 12 and 16. Channel 16 may also be used by all vessels for ship-to-coast communications with steamship Agents or other commercial businesses.

VTS: Vessel Traffic Management System in operation.

TANKERS: *Transit Restrictions:* Vessels carrying petroleum products having a flashpoint greater than 80°F and classified lower than Grade C under the U.S. system, or having a flashpoint greater than 23°C and classified higher than 3.2 under the IMO system are not considered to be carrying dangerous cargo for purposes of these restrictions.

Special rules apply to vessels carrying dangerous cargo or not gas free. These rules concern the conduct of navigation in the Canal and in the approaches to the locks. Generally it may be assumed that vessels carrying a dangerous cargo shall:

(a) Not overtake.

(b) Not be overtaken.

(c) Meet oncoming vessels at a safe speed.

(d) Avoid meeting oncoming traffic at turns.

(e) If required to anchor, anchor well clear of the channel and other vessels.

(f) Take a tug at locks and Gaillard Cut if required by the Pilot.

DENSITY: On several occasions vessels arriving for transit have been found to be over authorised draft after entering Gatun Lake. Overdrafts in these instances have been caused, it is believed, by assuming fresh water densities different from what actually exists in Canal.

Using distilled water as 1.000 at 3.98° C, water densities have been determined to be as follows:

	Density	
Location	*Gm./cc. 85° F*	*Lb./cu.ft 85° F*
(a) Gatun Lake	0.9954	62.21
(b) Miraflores Lake	0.9971	62.32
(c) Balboa Anchorage	1.0219	63.87
(d) Cristobal	1.0212	63.76

FRESH WATER: Available at Balboa or Cristobal.

BOILER WATER: May be taken without charge from Gatun Lake subject Pilot's permission and draft.

CONSULS: (Colon or Panama City).

Argentina, Australia, Austria, Belgium, Bolivia, Brazil, Canada, Chile, China, Colombia, Costa Rica, Cuba, Cyprus, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Finland, France, Germany, Greece, Guatemala, Haiti, Honduras, India, Israel, Italy, Jamaica, Japan, Korea (South), Libya, Malta, Mexico, Netherlands, Nicaragua, Norway, Paraguay, Peru, Philippines, Portugal, Spain, South Africa, Sweden, Switzerland, Thailand, Turkey, UK, USA, Uruguay, Vatican, Venezuela, Yugoslavia.

CERTIFICATES: See "Documents".

CUSTOMS: Allowances: Tobacco, Wine and/or Spirits at Master's discretion sufficient for immediate consumption. Alcohol not permitted to be taken ashore.
REPATRIATION: Possible. Advise Agent in ample time in order to prepare necessary documentation.
AIRPORT: General Omar Torrijos Herrera International Airport located outside Panama City, 18 miles from Balboa; 48 miles from Cristobal, served by all major scheduled international airlines operating in Southern hemisphere.
TIME: EST. No alterations to clocks necessary throughout the year.
HOLIDAYS: January 1st; January 9th; Good Friday; Carnival Tuesday (day before Ash Wednesday); May 1st; August 15th (Pacific side only); October 11th; November 3rd; November 5th (Atlantic side only); December 8th; December 25th.
LOCKS: Gatun Locks (Atlantic side) raise and lower vessels 85 ft., Miraflores (nearest to Pacific) 54 ft. and Pedro Miguel (Pacific side) 31 ft.
AUTHORITY: Panama Canal Commission, Balboa, Republic of Panama.

AGENT: See "Cristobal".

PEDREGAL: 08.23 N. 82.26 W. (See Plan)

LOCATION: The Port of Pedregal is 7 km. to the South of the City of David, Chiriqui Province, in the West part of the Pacific coast of the Republic of Panama. The port is at the head of an estuary of the River Garibaldo.
DOCUMENTS:
General Declaration, 2 copies.
Cargo Manifest, 5 copies.
Crew List, 3 copies.
Passenger or Negative Passenger Declaration, 4 copies.
Stores or Supplies List, 4 copies.
Crew Personal Effects, 3 copies.
Health Documents, 1 copy.
Maritime Health Declaration.
Derat Certificate.
Crew Vaccination Cards.
PILOTAGE: There is no official Pilot in the port. The pilotage service is covered by persons who are duly licensed and who have much experience, since they work full time on ships in this area. When their services are requested, they ask permission of their employers if it is during normal working hours (private undertakings). They obtain a launch which has no means of communication at all with the port.
ANCHORAGE: Vessels intending to enter the port must anchor near the Fairway Buoy installed at the Port Entrance at San Pedro Mouth. Around this buoy are depths of 70 ft. and 80 ft.
RESTRICTIONS: All vessels entering port must do so on high tide. Vessels are not allowed to enter or leave the port area at night. Entry and departure is only allowed if a Pilot is on board. Vessels must advise their local Agents 48 hours in advance of their intended arrival.
MAX. SIZE: The length of the quay is 86 m. and the width is 6 m. at the part where there is a buoy, with 4.2 m. along the rest of it. The max. depth of water for a vessel entering the port is 18 ft.; but the draft of the vessel must not exceed 15 ft.
HEALTH: The vessel is boarded by a Quarantine Inspector, who will inspect the entire vessel, and if there is no suspicion of illness or contamination, and all health stipulations as covered by Panamanian Laws are met, Free Pratique is granted. If there is any suspicion of illness or contamination, the vessel is immediately fumigated far from the quay, with the crew being forbidden to come ashore.
VHF: There is a radio unit for VHF communication and calls are made on Channel 16, passing then to another available channel. This equipment receives calls on frequency 156.8 MHz.
TUGS: None available.
BERTHING: The port consists of a single marginal quay 86 m. long, made of reinforced concrete (both surface and uprights).

The quay has depths of 3.35 m. (11 ft.) and 4.27 m. (14 ft.) at its ends, and in the centre 5.18 m. (17 ft.).

To one side of the quay is a building of reinforced steel covered with sheets of corrugated zinc with an area of 360 cu.m. and a free internal height of 6 m.
CARGO HANDLING: For handling purposes, there are only a few hand trucks, and vessels are obliged to utilise their own resources.
Cranes: Loading and discharge is by the ship's own gear, excluding shipment of sugar which is done by land-based equipment.
STEVEDORES: There is a stevedores' syndicate which is independent of the National Port Authority.
MEDICAL: There is no doctor in the port; but there is a medical centre not far away.
FRESH WATER: There are water installations available for supplies to ships.
FUEL: There are no pipe-lines. Oil is supplied by road tankers.
FIRE PRECAUTIONS: None.
REPAIRS: No repairs are carried out on ships.
AIRPORT: The National Airport of David is some 5 km. away on the road between Pedregal and David. It has commercial flights only at national level.
POLICE/AMBULANCE/FIRE: In the port there are no services; 5 km. away in the City of David there are services, and their telephone numbers are: Police 75-1446 or 75-2210. Fire Brigade and Ambulance 75-4216.
SHORE LEAVE: Allowed.
DELAYS: Any delays are caused by the tides, another vessel occupying the quay or arrival at night.

GENERAL:
Observations: The quay of the Port of Pedregal is in a bad state in every respect, both the top surface and the water side supports, and some of the piles need to be repaired.
Shelter: The Port of Pedregal, being at the head of an estuary, is not affected by the sea or swell.
Tides: The average tidal difference (average tide) in the port is 2.5 m. (8.2 ft.) and the average Spring tide is 3.05 m. (10 ft.).
Common Operations in the Port: Pedregal is a port whose operations are on a small scale, handling cargo such as fertilisers, general cargo, bulk commodities, and local fishing. International vessels arrive at the port very sporadically, due to the reduced depth of water and the poor state of the quay.
AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Jerry Salazar, Director General.

PUERTO ARMUELLES: 08.17 N. 82.52 W. (See Plan)

SECTION A: GENERAL CARGO PORT.
SECTION B: OIL TERMINAL.

SECTION A: GENERAL CARGO PORT.

LOCATION: Puerto Armuelles is located on the Pacific coast of the Republic of Panama.

Puerto Armuelles is a port solely used for the export of bananas, it is operated by United Brands Co., and administered by the National Port Authority of Panama.
DOCUMENTS: Same documents and the same procedure as Almirante.
PILOTAGE: United Brands Company has a Pilot who is available 24 hours of the day. Pilotage consists in mooring the vessel at the quay from the anchorage, for which the vessel must position a ladder on the port side. The pilot launch is white and has no VHF radio. The mooring operation is fairly complicated and United Brands provide a gang of men who board the vessel and manipulate the cables used in the mooring process. Mooring at the quay is always done on the starboard side of the vessel and the bow must be pointing out to sea.

The Pilot must be contacted by the ship's Agent and requested by the vessel by VHF radio on Channel 12 to the Port Authority or Channel 16 to United Brands Co.
ANCHORAGE: Vessels may anchor half a mile from the pier, where there are depths of 36.6 m. (120 ft.). However, due to the great depth of water in front of the quay, care must be taken in letting out the anchor, it being necessary to find places where the water is not so deep.

It is recommended that for Masters of vessels arriving for the first time in the port ask for the Pilot when anchoring.

There are no aids to navigation indicating the best place to anchor.
RESTRICTIONS: Puerto Armuelles is located in the Bay of Charco Azul, where there are great depths making it unnecessary to have aids to navigation. Access to the port is free of sandbanks or any other obstruction to navigation. There are therefore no restrictions for vessels wishing to enter the port, except on the quay itself.

On the quay proper, restrictions are as follows: Ships are not to be moored during bad weather and mooring is permitted in daytime only, unless there is an emergency. Bad weather usually prevents securing and mooring cannot be performed.
HEALTH: The vessel is boarded by the doctor in the operation of clearance. In the event of illness on board, the Port Authority must be advised on VHF Channel 12 and the vessel must wait at the anchorage for the doctor's visit.
RADIO: A radio service exists via telegraphic cables operated by Tropical Radio Telegraph Co. The Port Authority has VHF/FM equipment which receives calls on Channel 12. United Brands Co. also has VHF and receives calls on Channel 16. The range of these stations is 50 nautical miles. The Port Authority also has SSB equipment which takes calls on frequency 7447.5 kHz.
TUGS: None available.
BERTHING: The quay consists of a pier with a single berth 137 m. long and 12.2 m. (40 ft.) minimum depth. Vessels must moor on the starboard side.

The quay has 4 banana loaders with a loading capacity of 42 boxes of bananas per minute, each weighing 42 pounds. There is no other type of loading equipment.

Since the quay is located in a position open to the sea a set of 3 mooring buoys is used to keep vessels away from the N.E. side of the pier.
CRANES: 1×5 ton rail mounted crane.
STEVEDORES: Loading and discharging work is carried out by the Union of Port Workers. The vessel's Agent must contract the services of the workers via United Brands Co.
MEDICAL: There is a modern hospital in Armuelles.
DENSITY: 1.0219 gm./c.c. at 85°F.
FRESH WATER: Supplied at the rate of 2 t.p.h.
FUEL: Not available.
CONSULS: Colombia, Costa Rica, Nicaragua.
REPAIRS: Facilities for painting, cleaning, ship and machinery repairs are available.
OPENING/CLOSING HATCHES: Carried out by port workers.
CUSTOMS ALLOWANCES: See "Almirante".
PROVISIONS: Shipchandler facilities available. Can be obtained locally or in the town of David 100 km. away.
REPATRIATION: Can be effected without difficulty.

AIRPORT: Armuelles has a small airstrip for light aircraft. However, the town of David 100 km. away by road from Armuelles has a larger airport. There are 2 daily flights by local commercial lines between David and the airport of General Omar Torrijos Herrera in Panama; thus repatriation can be effected without difficulties.

TIME: GMT minus 5 hours.

POLICE/AMBULANCE/FIRE: Available in Armuelles.

TELEPHONE: Micro-wave connects Armuelles with any country in America or Europe. No facilities for telephones on board vessels.

SHORE LEAVE: No restrictions.

SHIPMASTER'S REPORT: 1979.

Documents: Same as for "Almirante", and if no cargo to land at this port, 6 copies of a "Nil" Declaration.

Pilotage: Arranged through Agent. Pilot and mooring gang board 0.75 miles East of pierhead by port accommodation ladder, from an old ship's lifeboat painted white.

Anchorage: 1 mile East of pierhead in depths of 45 m. or more. Bottom is very steep-to, in less depth vessel can be too close to shallow water. Recommend U.S. Chart 21581, 'Ports and Anchorages South Coast of Panama' be obtained.

Restrictions: Almost none, depth alongside over 12.2 m. (40 ft.), breadth is no restriction, berthing face is about 167.6 m. (550 ft.) long, but vessels up to about 207.3 m. (680 ft.) long could be berthed, bows projecting from pier.

Health: Pratique given by doctor on arrival. If any suspected disease, vessel should advise Agent by radio beforehand. Meat products which are not usually acceptable to U.S.D.A., are generally sealed up as in U.S. Ports.

Radio: Balboa Radio.

VHF: Channel 16 for Pilot.

Tugs: None.

Berthing: Pier about 609.6 m. (2,000 ft.) long, lies in South-easterly direction from the shore line, vessel berths starboard side alongside on the N.E. face, seaward end.

Three buoys are moored 76.2 m./91.4 m. (250/300 ft.) off the berth and are used to hold off the pier, the vessel being moored about 3.05 m. (10 ft.) off at all times due to swell. Port anchor is let go approaching the berth and ship's lines used to position vessel, then very heavy mooring springs are secured, 4 at each end. Ship's lines remain on buoys for holding off. On sailing Pilot does not board, only berthing gang who leave by accommodation ladder to boat after vessel is off the berth.

Fuel: Not available.

Fresh Water: Piped to pier, ample hydrants, charge U.S. $150.00 irrespective of amount taken.

Repairs: Workshop and electrical repairs can be undertaken by arrangement.

Fresh Provisions: Available.

Time: GMT minus 5 hours.

Medical: All facilities available.

Customs Allowances: No restrictions as long as nothing landed, bond is sealed on arrival.

Opening/Closing Hatches: Ship's crew. For banana loading starboard side elevator hatches only.

Shore Leave: No restrictions.

Operators: Chiriqui Land Company.

AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Jerry Salazar, Director General.

Puerto Armuelles Port Administrator: *Tel:* 75-1230.

AGENT: See "Section B".

SECTION B: OIL TERMINAL.

LOCATION: The PTP transhipment Terminal is located on the Western side of Bahia de Charco Azul in position Lat. 8° 12.5′ N., Long. 82° 53′ W., on the Eastern side of the Burica Peninsula, approximately 8.5 miles North of Punta Balsa and 3.5 miles South of Puerto Armuelles.

DOCUMENTS: The following documents are required for entry and clearance:

2 copies General Declaration.
1 copy Clearance from Previous Port.
5 copies Cargo Manifests or Declaration that no cargo is carried.
3 copies Crew List.
4 copies Passenger List or Declaration that no passengers are carried.
2 copies Stores List or Declaration that there are no supplies.
2 copies Crew Personal Effects Declaration.
1 copy Maritime Health Declaration.
2 copies Mail List.
1 copy Bill of Lading.

PILOTAGE: Pilotage to and from the Terminal Jetties is compulsory and is available on a 24 hour basis.

Vessels should not approach the immediate vicinity of the Terminal without being authorised.

The outgoing or unberthing vessel will have priority over the incoming vessel providing the normal rules of navigation are not infringed.

For discharging vessels, pilot station is 3.5 miles S.E. of Jetty No. 2. For loading vessels, pilot station is 3 miles East of Jetty No. 1.

Ships should make a lee for the Pilot and the ladder should conform to normal international standards. Discharging vessels should place the ladder on the starboard side when on Northerly heading. Loading vessels should place ladder on the starboard side when on a Westerly heading.

Vessels with a freeboard of 30 ft. or more shall provide suitable accommodation ladder, in addition to pilot ladder.

Vessels shall have both anchors ready for use.

Masters will advise Terminal, before berthing, of any damage or disability to his vessel.

APPROACHES: Approaches to the Terminal are from the South to the S.E. (See Plans).

Lights:

1. Isla Burica Lat. 08° 01.5′ N., Long. 82° 52.5′ W., flashing every 10 secs., 12 miles, white light exhibited from a metal framework tower which is 34 m. high and solar powered.

2. Puerto Armuelles (Banana Pier) Lat. 08° 16′ N., Long. 82° 52′ W An occulting light is exhibited from the head of the pier in combination with a fixed red light.

3. At the Terminal, flashing lights are exhibited from the extremities of the berths.

No. 1 Berth: Flashing red every second.
No. 2 Berth: Flashing red every second.
No. 3 Berth: Flashing white every second.

There are no leading lights.

ANCHORAGE: The area immediately to the East of the Terminal is very deep.

The North East area of the Bahia Charco Azul is believed to be the appropriate area to anchor. The holding ground is reported to be good. Radio contact should be maintained with the Terminal via VHF Channel 16.

MAX. SIZE: 265,000 d.w.t.

HEALTH: In accordance with standard international practice, ships are required to display International Code Signals for vessels requiring Free Pratique and these should be displayed until Pratique has been granted.

N.B. The Autoridad Portuario Nacional (A.P.N.) permits employees o P.T.P. to board vessels (before the ship receives Free Pratique) for the purposes of setting loading arms. Discharge of ballast may commence in case of a vessel with ballast. Discharge of cargo *is not* permitted. Employees of P.T.P. are not permitted in ship's accommodation areas before clearance.

RADIO: *Notices/Time of Arrival:*

ETAs:

All communications should be in local time. ETAs should be received by the Terminal at least 72 hours prior to arrival and any variation o more than 4 hours should be advised.

ETAs should be sent via ship's Agents who will notify the Terminal. The ETA cables should include the following:

1. Name of vessel.
2. ETA Puerto Armuelles.
3. Draft on arrival, fore and aft.
4. For discharging vessels: B/L, gross and net barrels of oil to neares barrel.
   For loading vessels: ballast for discharge ashore to neares 1,000 barrels.
5. Any conditions which will affect loading or unloading operations.
6. Deviations from the recommended deck fittings. (See "Berthing Loading").
7. Water request, if any.

Notice of Readiness: Notice of Readiness is considered to be received by the Terminal if either:

1. Vessel tenders the Notice of Readiness to load or discharge upon arrival at the Pilot Station.

2. When a berth is not available and a vessel elects not to close the port, it may tender its Notice of Readiness at a distance of 15 miles from the Terminal. In this case notice is considered received at this time *plus 2 hours*.

Nothing in these rules will interfere with any business arrangements made by P.T.P. and the user in respect of lay-time, demurrage, and other contractual obligations.

VHF: Vessels approaching the Terminal should establish VHF communication as soon as they are within range (about 50 miles).

The Terminal keeps a listening watch on Channel 16; call sign "Petroterminal Control". Vessels which have to lay-off the Termina should maintain a listening watch on Channel 16.

The Terminal also uses Channels 11, 12, 13, 14.

The Terminal tug boats and line handling boats are also equipped with Channels 11, 12, 13 and 14.

The Terminal radio monitors Channels 11, 13, 14, 16 at all times. Also see "Chiriqui Grande" – re-skip.

Frequency Allocation:

Channel	*Use*
13	Cargo handling ONLY.
14	Tugs and berthing.
(11)	(Alternate channel for cargo).
16	Call-up channel. Vessels at anchor maintain listening watch.

Always identify calling vessel and station being called.

Communication with Agents: Vessels may contact their Agents by using Channel No. 16 (using the bridge set) and shifting to a working channel other than Nos. 11, 13 or 14.

Do not use the cargo radio for any ship's business except cargo operations.

Communications While at Dock: The Terminal will provide a portable radio for the use of the vessel's Person-in-Charge of petroleum and ballast transfer operations.

The Person-in-Charge must maintain the radio in his possession at all times, and it must not be changed to any other channel unless instructed to do so by "Petroterminal Control".

The dock-hand is equipped with a portable radio on the cargo working channel.

A third radio is permanently installed in the dock shed.

All communications are conducted in English.

TUGS: 3 tugs of more than 4,200 h.p. are available and usually will make fast alongside. Tug's lines are used for making fast to vessel.

When working tugs alongside, ullage plugs shall be closed.

Tugs available throughout 24 hours.

BERTHING/LOADING:

The Terminal Representative will direct where and when a vessel is to berth.

A. Mooring & Connecting

1. *Mooring Pattern:* At both Berth No. 1 and No. 2 the normal mooring pattern will be:

FORWARD	AFT
3 Head Lines	3 Stern Lines
3 Breast Lines	3 Breast Lines
2 Spring Lines	2 Spring Lines

Discharging vessels will normally berth with port side to Berth No. 1. Loading vessels will normally berth port side to No. 1 or No. 3, and starboard side to No. 2 Berth. Any variation will be advised by the Berthing Master and Masters should advise any preference prior to arrival. *Mixed moorings are undesirable,* e.g. a wire and fibre rope in parallel service is undesirable due to unequal elasticity. All moorings must be arranged so that loss of effect cannot occur when slacking off or heaving in on one line, as required, due to the rise or fall of the vessel during loading or discharge operations.

It is imperative that spring lines be adequate to maintain a minimum fore and aft movement of the vessel to remain within the limitation of movement of the loading arms.

Wire ropes may be used and are preferred for spring lines.

Marine Manager's Notice to Mariners: Our experience has shown that vessels using synthetic tails on the end of their wire mooring lines have considerably reduced their mooring time at this Terminal.

If your vessel's wires are not already fitted with tails we request they be fitted for your next visit to our Terminal.

Some vessels fitted with 'End Less' tails at the end of their wires do not have the two parts lashed together at the shackle, the tail is then free to pull through the shackle, this also causes difficulties with mooring.

The diagram (see "Plan") shows type of shackle we have found most suitable, also length of synthetic tail required.

Your attention to this matter would be appreciated.

Pre-Transfer Conference: The Pre-Transfer Conference will be held between the Control Room/Supervisor and responsible Officer prior to commencement of operations. (IOTTSG Chapter No. 5) to agree on procedures for deballasting and loading, including:

1. Communications between ship/shore/Control Room/Supervisor.
2. Deballasting procedures.
3. Cargo start-up procedures.
4. Any deviations from normal procedures.
5. Loading rates, initial, maximum, and topping off.
6. Notice times required to change rates and shutdown procedure.
7. Emergency shutdown, moorings failure, oil spill, etc.
8. Any ship's deficiencies to be made known.
9. Any Terminal deficiencies to be made known.
10. Completion of loading.
11. Designated smoking area.
12. Galley and appliance limitations.
13. Emergency assistance.
14. Vessel will be ready to move under her own power at all times while moored at the SBM.

Prior to the start of operations, the Supervisor and responsible Officer will complete the Safety Check List.

Where any disagreement arises between the vessel personnel and the Berthing Master regarding some aspect of Terminal procedure, the procedure to be followed will be that which provides closest compliance with guidelines established by the latest edition of International Safety Guide for Oil Tankers and Terminal, published by the International Chamber of Shipping, Oil Companies International Marine Forum.

Flow Rates: Terminal can receive crude oil at 100,000 b.p.h. or more. Berth No. 1, individually, can receive approximately 60,000 b.p.h. Terminal can receive ballast water at 30,000 b.p.h. or more. Discharge pressure of 125 p.s.i.g. at ship's rail is permitted. The crude oil loading rate is 48,000 b.p.h. by pumping. Higher rates can be given on request.

Cargo operations shall not commence until the Master or Mate has informed the Port Representative that all necessary valves are opened and the vessel is ready to discharge or receive cargo and regulations being complied with.

In the event of a vessel requesting a shore-stop, Masters should understand that Petroterminal accepts no responsibility for any errors in quantity.

Loading Arm Connections: (See also Section B and C).

Bonding cable shall be secured to a clean surface before loading arm connection.

Ship's crew must be available to assist in connection and disconnecting loading arms to the manifold of the ship.

a. Preferred connections at Berth No. 1 for discharging vessels are 4×16 in. ANSI 150# Weldneck flanges on the port side (3×16 in. at Berth No. 2). *Standard flanges are required.*

(1) Non-standard flange thicknesses and/or non-standard outside diameters may prevent loading arm couplings from functioning.

(2) At least 8 in. of straight pipe (free of supports, lugs, or reducer) is required behind the flange for coupling clearance.

(3) The preferred flange spacing fore and aft is 3.0 m. – 3.0 m. – 3.0 m. (10 ft. – 10 ft. – 10 ft.), or less between centres. In no case can the distance be less than 1.6 m. (5 ft 3 in.), 1.1 m. (3 ft. 7 in.), 1.6 m. (5 ft. 3 in.).

b. Preferred connections for loading vessels are 4 each 12 in. ANSI 150# Weldneck flanges on the starboard side. *Standard flanges are required.*

(1) Non-standard flanges thicknesses and/or non-standard outside diameters may prevent loading arm couplings from functioning.

(2) At least 8 in. of straight pipe (free of supports, lugs, or reducers) is required behind the flange for coupling clearance.

(3) The preferred flange spacing fore and aft is 3.0 m. – 3.0 m. – 3.0 m. (10 ft. – 10 ft. – 10 ft.), or less between centres. In no case can the distance be less than 1.6 m. (5 ft 3 in.), 1.1 m. (3 ft. 7 in.), 1.6 m. (5 ft. 3 in.).

(4) Disconnection of loading arms: Once cargo transfer is complete the loading arms will be drained and then disconnected by shore personnel.

Petroterminal – Berth Description:

	Berth No. 1	*Berth No. 2*	*Berth No. 3*
Vessel size (design)	28,000 – 270,000 d.w.t.	28,000 – 275,000 d.w.t.	28,000 – 60,000 d.w.t.
Type of berth	Fixed loading platform	Fixed loading platform	Fixed loading platform
Deck level of berth	40 ft. MLLW	40 ft. MLLW	38 ft. MLLW
Depth alongside at MLLW	80 ft.	77 ft.	50 ft.
Loading arms (number and size)	4×16 in. also 14 in. and 12 in. adapters	3×16 in. also 14 in. and 12 in. adapters	3×12 in. also 10 in. and 8 in. adapters
Max. rate loading	48,000 bbls.p.h. plus	48,000 bbls.p.h. plus	48,000 bbls.p.h.
Max. design flow rate (per berth)	100,000 bbls.p.h.	90,000 bbls.p.h.	40,000 bbls.p.h.
Loading arm spacing on operating dock/minimum ship manifold spacing	9 ft. 4 in. (4)	9 ft. 4 in. (3)	9 ft. 6 in. (3)
Quick disconnect coupling size (QDC)	16 in.	16 in.	12 in.
Manifold size range acceptable to QDC (#1)	16 in., 14 in. and 12 in.	16 in., 14 in. and 12 in.	12 in., 10 in. and 8 in.
Max. ship manifold pressure	PSIG – not to exceed 125	PSIG – not to exceed 125	PSIG – not to exceed 125
Emergency shutdown	Can be initiated by berth operator or by Control Room. Shutdown complete within 6 seconds after initiation	Can be initiated by berth operator or by Control Room. Shutdown complete within 6 seconds after initiation	Can be initiated by berth operator or by Control Room. Shutdown complete within 6 seconds after initiation
Access to ship	69 ft. aluminium gangway	69 ft. aluminium gangway	43 ft. aluminium gangway
No. of mooring dolphins	4	4	4
No. of breasting dolphins	4	4	2
Mooring/breasting hooks	1 triple hook per mooring dolphin/4 double hooks per breasting dolphin	1 triple hook per mooring dolphin/1 double hook per breasting dolphin	1 double hook per mooring dolphin/1 hook per breasting dolphin
Potable water	Limited	Limited	Limited
Bunker facilities	None	None	None
Public telephone	None available	None available	None available

Notes:

1. Although all berths are designed to handle vessels in the 25,000 d.w.t. size, loading arm size requires ship's manifolds to be a minimum of 12 in. in diameter for Berths No. 1 and 2, and 8 in. diameter for Berth No. 3.

2. Vessels in the 250,000 d.w.t. range will be acceptable only if dock/deck machinery and mooring leads allow an efficient bow and stern mooring line pattern plus bow to manifold distance.

3. Preferred flange spacing fore and aft is 10 ft. – 10 ft. – 10 ft. (or less) between centres, however, in no case can the distance be less than 5 ft. 3 in. – 3 ft. 7 in. – 5 ft. 3 in.

ANSI No. 150 Weldneck Flanges.

B. Berth No. 1 (See Plan).
Berth No. 1 is designed for discharging or loading vessels of 28,000 to 265,000 d.w.t., without draft restrictions. Least depth alongside is 80 ft. Jetty head is connected to shore by trestle.
Gangway: Hydraulically operated telescoping gangway from loading platform to ship's deck is provided.
Loading Arms: 4 Mannesmann 16 in. size fully powered loading arms are installed. They are fitted with positive locking hydraulic couplers for 16 in., 14 in. and 12 in. standard flanges. All arms are capable of transfer of crude oil and ballast water.
Crane: A 1 ton capacity crane for handling of supplies, etc., is installed.
Breasting Dolphins: Four single steel tube breasting dolphins equipped with pivoting timber-faced fenders are installed. The two outer dolphins are spaced approximately 380 ft. apart and are equipped with double quick release hooks and power capstans. The two inner dolphins are spaced approximately 260 ft. apart and are similarly equipped.
Mooring Dolphins: There are four mooring dolphins. All are equipped with 3 quick release hooks and power capstans.

C. Berth No. 2 (See Plan).
Berth No. 2 is designed for discharging or loading vessels of 28,000-270,000 d.w.t. without draft restriction. Least depth alongside is 77 ft. Jetty head is connected to shore by a trestle.
Gangway: A hydraulically operated telescoping gangway from loading platform to ship's deck is installed.
Loading Arms: 3 Mannesmann 16 in. size fully powered loading arms are installed. They are fitted with positive locking hydraulic couplers for 16 in., 12 in. and 10 in. standard flanges.
Crane: A 1 ton hydraulic crane for supplies, etc., is installed.
Breasting Dolphins: 4 each single steel tube breasting dolphins equipped with pivoting timber faced fenders are installed. The distance between dolphins is 375 ft. Each dolphin is equipped with two quick release hooks and a powered capstan.
Mooring Dolphins: There are four mooring dolphins, all are equipped with 3 quick release hooks and power capstans.

D. Berth No. 3 Platform (See Plan). See "General" – Berth No. 3. Designed for loading vessels up to 60,000 d.w.t. without draft restriction. Least depth alongside 50 ft. Jetty is connected to shore by submarine line only.
Loading Arms: 3 Mannesmann 12 in. size fully powered loading arms are installed. They are fitted with positive locking hydraulic couplers for 12 in., 10 in. and 8 in. standard flanges.
Gangway: A hydraulic gangway is provided.
Crane: A 1 ton capacity crane for handling supplies is fitted.
Breasting Dolphins: Two breasting dolphins are spaced 200 ft. apart fitted with pivoting timber faced fenders.
Mooring Dolphins: Four mooring dolphins equipped with two quick release hooks remotely controlled from the loading platform

Inert Gas: Per User's (Sohio) request: Inert gas vessels will not be requested to depressure for ullaging or sampling unless there is reason to suspect an error.

THERE ARE NO CHECK VALVES IN THE TERMINAL PIPE-LINES AT THIS TIME – PLEASE CHECK PROCEDURES PRIOR TO COMMENCEMENT OF OPERATIONS.

BALLAST: When alongside, ballast should be handled by type, as per international convention, as follows:

1. *Segregated:* All ballast in segregated ballast tanks should be visually inspected prior to discharge. After inspection, segregated ballast may be discharged overboard according to standard shipboard procedure.
2. *Dedicated Clean:* All ballast in dedicated clean ballast tanks should be visually inspected prior to discharge. After inspection, dedicated clean ballast tanks may be discharged overboard in accordance with IMO Regulations.
3. *Treated:* Ballast water which has been chemically treated (with detergents, emulsifiers, etc.) must be retained on board.
4. *Others:* All other ballast water will be pumped ashore prior to loading. The Terminal has 3×120,000 barrel tanks for the reception of dirty ballast. The ship will advise the Terminal of the quantity of ballast to be discharged ashore prior to commencing discharge.

Ballasting: Before ballasting, the cargo lines shall be drained back into cargo tank. Ballast pumps shall be started before sea valves are opened.

CRUDE OIL WASHING: Crude oil washing may be done during discharge if this does not cause delay to other vessels awaiting berth.

The Terminal should be kept fully advised of any extra time required in order to comply with IMO Regulations.

MEDICAL: Doctor will only board vessel in cases of emergency. There are limited medical and dental services available. Treatment should, when possible, be arranged via Ship's Agent in advance.

DENSITY: Offshore salinity is 1.025. Salinity (Specific Gravity), due to river run-off, is about 1.010 close to the shore during the rainy season (July-November/December). During this period, substantial changes may occur.

Sea temperature varies between 80° and 83°F.

FRESH WATER: Fresh water can be supplied, as available, via the jetty connections. Prior notice is requested. Maximum delivery is 200 tons.

FUEL: There are no bunkers available.

EARLY DEPARTURE PROCEDURE: All loading vessels are requested to use an Early Departure Procedure. (E.D.P.).

(A) If the Master of a vessel consents to use the E.D.P. it will be implemented in the following manner:

1. The Master will sign a letter agreeing to the use of E.D.P.
2. The cargo documents and other relevant forms will be placed aboard the vessel.
3. On completion of loading, the vessel's tanks will be gauged by the vessel's appointed cargo inspector, whose inspection is expected to be completed prior to sailing.
4. The vessel will sail.
5. The Terminal will transmit Bill of Lading figures to the vessel by VHF radio. The cargo documents are to be completed by the Master.
6. Written confirmation of these figures will be provided by the vessel's Agent in the Canal Zone.

(B) If the Master of a vessel does not agree to use E.D.P. the vesse will be unberthed immediately after loading and should proceed to the pilot station. Terminal's Representative will bring papers by launch or tug.

(C) Vessels will be requested to unberth once loading arms have been disconnected regardless of the time set on the sailing board A terminal launch will be available for returning crew to vessel.

(D) If a vessel fails to vacate its berth upon completion of operations or causes delay to cargo operations because of mechanical breakdown inadequate loading/discharging rates, lack of adequate crew, non compliance with these rules, the vessel will be responsible for:

1. Jetty demurrage at the applicable rates.
2. Hold P.T.P. harmless against demurrage detention or loss of any nature incurred as a result of other vessels awaiting berth.
3. Cost of tugs requested to stand-by the vessel by the Termina Representative if, in his opinion, he considers it necessary.

TIME: GMT minus 5 hours.

INSPECTION: *Petroleum/Tank Inspection (Caleb-Brett):* This will be carried out by Inspectors appointed by the User.

Valdez – Crude Oil Characteristics:

Specific Gravity	0.888 @ 60°F
API Gravity @ 60°F	26.6°
Pour Point	+15°F
Viscosity	7.3 SSU @ 100°F (22 centistoke) 160 SSU @ 60°F (68 centistoke)
Reid Vapour Pressure	3.8 at 100°F
Sulphur Content	0.99% by weight
Waxing	85 – 117°F (begins to precipitate) 50 – 55°F (bulk of wax begins to come out of solution)
Mercaptan Sulphur	Approximately 20 p.p.m.

SAFETY: No dangerous cargo shall be permitted to be shipped o landed at the jetties. Whilst petroleum loading/discharging operations are being carried out, no other cargo will be handled without permission of the Terminal Representative.

No welding, cutting, etc., is permitted on any vessel in the Terminal

Blowing or cleaning of boiler tubes in vicinity of the Terminal is prohibited.

Smoking Regulations: Smoking is PROHIBITED in the following locations:

1. Entire Terminal area.
2. Aboard Launches.
3. On Jetties and in motor vehicles inside the Terminal, except inside designated buildings.
4. On ships except in places designated by the Master and agreed by the Terminal's Representative. In accordance with IOTTSG, two locations only will be established in the after end of the vessel.

N.B. If an oil spill occurs on Jetty or ship, all smoking will be PROHIBITED until the spill has been removed.

Emergency Procedure: For cases of fire on vessel, in addition to the normal ship's alarms, Masters are requested to sound a prolonged blas on the main whistle of not less than 10 seconds duration. If the vesse is discharging or deballasting it should:

1. Immediately cease operations.
2. Initiate fire fighting procedures.
3. Be prepared to unberth at short notice.

If loading cargo, the Terminal will, on hearing the signal, immediately stop all operations and:

(i.) Initiate fire fighting procedures from Jetty.
(ii.) Put Terminal emergency plan into effect.
(iii.) Disconnect loading arms.
(iv.) Order tugs to vessel and make preparations for unberthing.

Vessels at other berths should also cease operations and be prepared to put to sea.

Fire Protection System: Each jetty is equipped with:

1. Water spray system underneath.
2. Hydrant system on platform.
3. Two 500 g.p.m. remote operated monitors. These are connected to discharge with either water or foam.

The plant water supply is by diesel driven pumps at two locations and the total water flow is 7,000 g.p.m.

SHORE LEAVE: *Launch Service:* The launches at the Terminal are intended for Terminal use only. They may be hired by prior notice depending on operational requirements. Crew members and visitors use the launches at their own risk.

Berth No. 3: A launch service may be provided depending on Termina requirements. Masters should inquire about this service upon arriva (also see "General").

Shore Leave: Shore leave is permitted by the local authorities. Crew members should check in at the Customs Gatehouse leaving and returning to the Terminal area. Masters should take reasonable steps to ensure no alcoholic drinks, drugs, etc. are supplied or conveyed to any unauthorised person.

SHIP SUPPLY SERVICE: 3 large tugs and launches available to assis with transportation of stores and crew, on an emergency basis only.

Helicopter can easily be hired.

GENERAL: *Charts and Publications:* Charts Ref. USHO 21580, 21581 21584 and 1018 and BA 1928.

Sailing Directions: USHO PUB 153. B.A.N.P. No. 8 Pacific Coasts o Central America and United States Pilot.

Tides: The maximum tidal range is 12 ft. The mean range is 7.6 ft. The tidal flow in this area is, at present, ill defined.

Strong tides in North-South direction have been experienced close to the docks. At times these are unpredictable.

Currents: Currents in the area are not well defined.

Weather Conditions in Bahia de Charco Azul:

(A) Wind: The seasonal normal wind regime occurring in the Bahia de Charco Azul is:

1. December-March: Wind speeds greater than 14 m.p.h. occur approximately 8% of the time in January. The predominant directions are from W., N.W., N. and N.E. Winds are W., N.W., N. and N.E. approximately 70% of the time in January.
2. December-April: Is considered to be dry season.
3. April-May: Winds exceed 14 m.p.h. 6% of the time in April. The predominant wind directions are S. and S.W., and N. and N.W. Winds are S. and S.W., and N. and N.W. approximately 60% of the time in April.
4. June-August: Wind speeds exceed 14 m.p.h. approximately 13% of the time in July. The predominant directions are S., S.W., and W. (approximately 60% occurrence) in July.
5. June-November: Is considered to be the rainy season.
6. September-November: Winds exceed 14 m.p.h. approximately 22% of the time in October. Predominant wind directions are S., S.W., W. and N.W. Winds are S., S.W., and W. and N.W. approximately 86% of the time in October.

(B) Waves: The seasonal wave height is:

1. December-March: Significant wave height exceeds 3.9 ft. 1% of the time in January N.E., E. and S.E. wave directions predominate, occurring 84.9% of the time in December.
2. April-May: Significant wave height exceeds 3.9 ft. 1.6% of the time in April. N.E., E. and S.E. wave directions predominate, occurring 85.5% of the time in April.
3. June-August: Significant wave height exceeds 3.9 ft. 6.4% of the time in July. N.E., E. and S.E. wave directions predominate, occurring 82.9% of the time in July.
4. September-November: Significant wave height exceeds 3.9 ft. 11.3% of the time in October. N.E., E. and S.E. wave directions predominate, occurring 81.0% of the time in October.

Flag: Every vessel shall fly her national flag and the flag of the Republic of Panama between sunrise and sunset.

Rubbish: The dumping of trash and other garbage is prohibited. Any trash or garbage so dumped will be removed and the expenses involved for the vessel's account.

Berth No. 3: Petroterminal will, under normal circumstances, be able to provide a boat service for vessels berthed at No. 3.

This boat service will be available on demand but subject to the operational requirements of the Terminal (e.g. when other vessels are mooring/unmooring, the launch service will be withdrawn for an unspecified period).

Masters requiring this launch service may indicate their requirement to the Pilot/Berthing Master and the appropriate charges will be added to the pilotage/towage. Bill will be sent to the Agent for payment.

Masters should advise their Officers and crew that construction work is still progressing in the Terminal Area and care must be exercised in passing over these areas. Smoking regulations should be observed.

Petroterminal's launch operators are under strict instructions that they are not to carry any persons whom in their opinion, are under the influence of alcohol or drugs. The carrying of liquor is forbidden.

Whilst every effort will be made to ensure the safety of personnel, Petroterminal will not be held liable for any accident sustained whilst on Petroterminal's craft or property.

Persons use these facilities entirely at their own risk.

AUTHORITY: Petroterminal de Panama, S.A., Apartado 8-179, Panama 8, Republic of Panama. *Tel:* 64-2655, 64-2246, 63-7777. *Telex:* 3792527. *Contact:* Captain Rafael Elorriaga, Marine Manager.

Puerto Armuelles: P.O.Box 26. *Tel:* 70-7246, 70-7261. *Telex:* 3797500, 3797548. *Fax:* (Area code 507) 75-4958.

AGENT: Fernie (Puerto Armuelles), S.A., Apartado (P.O.Box) 22, Puerto Armuelles, Chiriqui, Republic of Panama. VHF: Standby Channel 16. Telephone: 70-7301 or 70-7403. After hours telephone No. 70-8214. Cables: "Fernie Puerto Armuelles". Telex: 7508.

With the exception of times vessels are actually in or approaching Puerto Armuelles (i.e. within V.H.F. range) all other communications should be directed to "Fernie Cristobal".

VACAMONTE: 08.51 N. 79.40 W. (See Plan)

LOCATION: The fishing port of Vacamonte is located 27 km. S.W. of Panama City, in Arraijan District, Province of Panama.

DOCUMENTS:

Voyage Documents:
- General Declaration (1 original and 5 copies)
- Cargo Manifest (4 copies)
- Crew List (4 copies)
- Passenger List (4 copies)
- Stores/Supplies List (4 copies)
- Crew Effects List (2 copies)
- Maritime Health Declaration (Derat) (1 copy)
- Mail List (1 copy)

Ship's Documents:
- Certificate of Registration
- Certificate of Civil Security
- Certificate of Radio Safety
- Oil Record Book
- Safety Construction Certificate
- Civil Responsibility Insurance Certificate
- Radio Licence Certificate (date of expiry)

Documents Requested from Tuna Vessels:
- General Declaration (obligatory)
- Crew List (obligatory)
- Cargo List (if available)
- Clearance from Last Port (obligatory)
- List of Stores/Supplies (if available)
- Derat Certificate (obligatory)

Documents Required from National Shrimp Vessels:
- Clearance from Last Port of Call
- Consular and Vessel Clearance Certificate
- Monthly Invoice or Last Invoice for Marine Resources
- Clearance Documents from the main Treasury Office

PILOTAGE: Pilot is compulsory for any vessel greater than 150 g.r.t. that enters or leaves the Port. Pilot can be contacted on VHF Channel 15.

ANCHORAGE: Located in Lat. 08° 50′ 14″ N., Long. 79° 38′ 45″ W. in the area of the Fairway Buoy near Melones Island.

APPROACHES: *Disposal Area:* There is a dumping site approximately 1.5 km. from the port access channel (to the S.W.). The average depth in the dump is 6.1 m. at MLWS (varies from 5.5 m. to 7.0 m.). It is located in position:

1.	Lat. 08° 50′ 04″ N.	Long. 79° 39′ 17″ W.
2.	Lat. 08° 49′ 50″ N.	Long. 79° 38′ 48″ W.
3.	Lat. 08° 49′ 43″ N.	Long. 79° 38′ 51″ W.
4.	Lat. 08° 49′ 57″ N.	Long. 79° 39′ 21″ W.

MAX. SIZE: The Port can receive vessels up to 3,000 tons with maximum length of the vessel of 120 m. and with draft of 7 m. Average tide variation 3.96 m. Also see "General".

HEALTH: When vessels arrive in port, they are received by a Health Official who comes on board to examine documents. The Quarantine Officials inspect stores and store rooms and these are sealed in the event of any anomaly (foodstuffs in poor condition, meats which originate in countries with outbreaks of aphthous fever, etc.).

In the event of illness on board, this must be communicated to the Ship's Agent, who will transmit the information to the Authorities. The vessel must not be moved until the doctor determines whether or not the illness represents a danger for persons on land.

RADIO: S.S.B. with the following frequencies:

2182.00 – Channel 1	4139.50 – Channel 4
2638.00 – Channel 2	4358.80 – Channel 5
2738.00 – Channel 3	7447.50 – Channel 6

For calling use Channel 1.

VHF: Station has 55 channels. Calling use Channel 15 (156.750 MHz). Station in operation throughout 24 hours.

TUGS: 2 tugs of 700 h.p. each.

BERTHING:

Tuna Fleet Facilities: Pier: Head-length 132 m. Width of pier 12.5 m. 2 inside berths each 60 m. The "T" head pier can accommodate 4 tuna vessels at the same time. The area surrounding the pier has a depth of 9 m. at MLWS.

Potable water and fuel obtainable at the pier.

Shrimp Fleet Facilities: 2 piers which are able to receive 8 vessels at any one time, depth 4 m. Fuel and potable water available.

There are 2 additional piers where vessels are able to undertake repair operations.

Fresh Fish Market: 1 marginal pier which is able to accommodate 8 vessels at one time, depth 4 m. Adjacent to the pier is a fish cleaning station and 2 cold rooms.

Freight Elevators: 1 freight elevator of 10 tons capacity. 10 freight elevators of 2 tons capacity.

EQUIPMENT: 4 fixed cranes (shrimp quays) × 1.5 tons. 12 × 2 ton fork lift trucks. Cold storage for 3,000 tons of tuna.

STEVEDORES: The National Port Authority does not offer a stevedoring service in the port. In case of need, the Ship's Agent is able to contract one or more private gangs to carry out the work.

MEDICAL: There is a doctor in the port for first aid treatment. There is also an ambulance to transport urgent cases to the nearest medical centre.

FRESH WATER: The NPA offers a service of water supply to vessels requiring it. The port has a water tank with a capacity of 600,000 gallons which meets all the needs of the port.

FUEL: For supplies to vessels, the port has a modern fuel pumping system and two tanks of good capacity.

FIRE PRECAUTIONS: The port has its own corps of fire fighters and a modern fire engine. The aqueduct system for drinking water has numerous hydrants spread throughout the port area.

REPAIRS: Vacamonte has a modern yard for repairs to vessels, including a synchro-lift with 200 tons capacity, and berths for repairing 20 vessels engaged in the national fishing industry, covering an area of 18,000 sq.m. which includes future space for four additional construction berths. There is also a vessel repair workshop with an area of 700 sq.m., and vessel repair offices and shops with an area of 1,000 sq.m.

WATCHMEN: The NPA has a complete security corps working throughout 24 hours and permanently guarding the port entrance.

POLICE/AMBULANCE/FIRE: Police 510360; Fire Brigade 532222 Ext. 117; Ambulance Tel: Port Authority.

AIRPORT: Vacamonte is only 25 minutes from Panama City and 25 minutes from there is the international airport of General Omar Torrijos Herrera.

SERVICES: In the port is a ship chandler, an electricity system capable of generating 4,687 kVA, Ships' Agents' Offices, Post Office, Defence Force Member, Customs, Ministry of Health, Warehouse (marine hardware, materials, and accessories) and Banks.

SHORE LEAVE: Officials of the Migration Authority grant a provisional card for coming ashore, including leaving the port area.

DEVELOPMENTS: The NPA has 100 hectares of land adjacent to the port for industrial development. Here the industrial area will have plots of land from 2,000 sq.m. upwards for installations. The plots of land will be obtained by concession and those in Industrial Area No. 1 have already been acquired.

GENERAL: There are no restrictions with regard to depth of water, since the various areas of the port have been dredged as follows: the port access channel up to 5.5 m., the main maritime area to 5 m., and 4 m., the area of 'T' quay for tuna vessels to 9 m. The area of quay 'T' for tuna vessels is designed to take 8 tuna vessels of 55 m. LOA, 14 m. beam and 7 m. draft. At the fish quay, 8 vessels of 10 m. LOA can berth simultaneously. The 2 pier quays for shrimp vessels take 6 shrimp vessels of 20 m. LOA, 5.8 m. draft each, simultaneously. The 2 pier service quays take 48 shrimp vessels and give service and victualling to them.

AUTHORITY: National Ports Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Jerry Salazar, Director General.

NOTES

Please also advise Shipping Guides Ltd.

Papua New Guinea

GENERAL:

APPLICABLE TO ALL PORTS IN PAPUA NEW GUINEA

(See also details under individual ports) **(See Plan)**

NOTICE: The following Notice to Mariners No. 36/90 issued by the Government of Papua New Guinea is quoted in its entirety:

Overseas vessels are advised to stand clear of the Islands of Bougainville and Buka, and to remain outside Territorial Waters, extending 12 nautical miles from the coast of Bougainville, and immediately adjacent Islands, but excluding Solomon Islands territory, and excluding the groups of Islands or Atolls known as Feni, Green, Nuguria, Carteret, Mortlock and Tasman. Any vessel entering the waters adjacent to Bougainville or Buka will be subject to stop and search powers. This Notice to Mariners is effective immediately (22 May 1990 EST) in respect to overseas shipping. Papua New Guinea coastal vessels will be restricted as of midnight local time 20 May 1990.

Restrictions will continue for an indefinite period.

Charts affected: B.A. 214, B.A. 2766, B.A. 3419, B.A. 3420, B.A. 3830, B.A. 3994, I.N.T. 604 and Aus 4604.

Issuing Authority: Department of Transport, Port Moresby, Papua New Guinea.

DOCUMENTS: International conditions i.e. at the first port of call in Papua New Guinea the following inward Customs documents are required to be handed to Customs Department within 24 hours of ship's arrival.

3 Copies Inward Passenger List.
7 Copies Inwards Customs Manifest.
3 Copies List of Crew.
3 Copies Articles in private possession of officers and crew, Form 5.
3 Copies Stores List.
2 Copies Immigration Restriction Ordinance List (Form 6) being complete list of passengers disembarking and in transit.

If other than first port of call:

3 Copies Inward Passenger List.
7 Copies Inwards Customs Manifest.

Outward Customs Clearance from last port of call.

PILOTAGE: *Coastal Pilotage:* Pilotage services through China Strait, Raven Channel, Goschen and Ward Hunt Straits are conducted by pilots of the Queensland Coast and Torres Strait Pilot Service. See "Australia" – "Torres Strait" for details.

RESTRICTIONS: Night berthing is not recommended, but is subject to weather conditions in Lae, Rabaul and Port Moresby.

HEALTH:

(a) Vessels arriving directly from Australia. Pratique is given by radio to vessels which voyage directly from Australia to a Papua New Guinea port, Master of vessel notifies Quarantine Officer at the port of entry to which he is proceeding of ETA, the number of passengers and crew and whether there is any sickness aboard. This notification from Master is sent not longer than 24 hours and not less than 12 hours of ETA. If there is no sickness aboard a reply is sent stating that Pratique is granted, and when a vessel arrives the actual pratique form is delivered to Master of vessel or to Collector of Customs to hand to Master. Full Pratique is given.

(b) Vessels arriving from a Foreign Port. All vessels which arrive from a foreign port must anchor in the designated position and await arrival of a Quarantine Officer who boards the vessel by himself – no other person (except a Pilot) is to be allowed on board vessel until Pratique has been granted. If a Pilot is on board he must remain on board until Pratique is granted.

Cholera: All passengers and crew are required to be inoculated against cholera if the vessel is expected to arrive at a port in the country within 7 days of leaving an area where cholera is either endemic or is present.

Note: The presence on board of a qualified doctor will normally assist in the granting of Pratique.

VHF: VHF services are available at:

Port Moresby	– Channel 16 and 12 Call Sign "Moresby Harbour Control"
Lae	– Channel 16 and 12 Call Sign "Lae Harbour Control"
Rabaul	– Channel 16 and 12 Call Sign "Rabaul Harbour Control"
Kieta	– Channel 16 and 12 Call Sign "Kieta Harbour Control"
Madang	– Channel 16 and 12 Call Sign "Madang Harbour Control"
Anewa Bay	– Channel 6, 12 and 15 Call Sign "Anewa Bay Pilots"
Kimbe	– Channel 16 and 12 Call Sign "Kimbe Harbour Control"
Alotau	– Channel 16 and 12 Call Sign "Alotau Harbour Control"
Vanimo	– Channel 16 and 12 Call Sign "Vanimo Harbour Control"
Wewak	– Channel 16 and 12 Call Sign "Wewak Harbour Control"
Oro Bay	– Channel 16 and 12 Call Sign "Oro Bay Harbour Control"
Kavieng	– Channel 16 and 12 Call Sign "Kavieng Harbour Control"
Daru	– Channel 16 and 12 Call Sign "Daru Harbour Control"
Buka	– Channel 16 and 12 Call Sign "Buka Harbour Control"

Normal working hours are 0745 till 1606 hrs. local time, except for Anewa Bay where hours are 0700 till 2300 hrs. local time.

RADIO: 2 radio stations are available.

(a) Port Moresby Radio – Call sign P2M operating between the hours of 2100 – 1000 hrs. GMT.

(b) Rabaul Radio – Call sign P2R operating 24 hours per day.

These stations are generally used for all contact with agents or Government Departments, etc.

RADAR: No port radar services exist in Papua New Guinea.

TUGS: Berthing. Tugs are available in Port Moresby, Lae and Anewa Bay.

CRANES: There are no wharf mounted cranes in Papua New Guinea, however, mobile cranes are available in most main ports capable of lifting up to 20 tonne containers. Shippers are advised though to check this before shipping and with heavier loads prior advice and approval must be sought from the relevant Port Authority.

BULK CARGO FACILITIES: Except for Anewa Bay (copper concentrate) and the Jant Wharf at Madang (Woodchip), no bulk cargo facilities exist in Papua New Guinea. (Details of the above are given in the appropriate port summaries).

MEDICAL: Medical attention is available in most Papua New Guinea Ports, however as much advance notice as possible should be given by contacting the nearest radio station.

CONSULS: The following Consulate and Commission services are available.

	Tel.
American Consulate General, P.O.Box 3492, Port Moresby.	21-1447
Australian Consulate General, P.O.Box 1180, Lae.	42-3000
Australian High Commission, P.O.Box 9129, Hohola.	25-9333
Austrian Honorary Consul, P.O.Box 850 Port Moresby.	21-2588
British High Commission, P.O.Box 739, Port Moresby.	21-2500
People's Republic of China Embassy, P.O.Box 1351, Boroko	25-9856
French Embassy, P.O.Box 1155, Port Moresby.	25-3740/25-1323
German (F.R.) Honorary Consulate, P.O.Box 1549, Boroko.	25-6311
Indonesian Embassy, P.O.Box 7165, Boroko.	25-3116
Italian Consulate, P.O.Box 276, Lae.	42-3987
Embassy of Japan, P.O.Box 3040, Port Moresby.	21-1800
Korean Embassy, P.O.Box 381, Port Moresby.	25-4755
Malaysian High Commission, P.O.Box 1661, Port Moresby.	25-1506/25-2663/25-2076/25-2201
New Zealand High Commission, P.O.Box 1144, Boroko.	25-9444
Philippines Embassy, P.O.Box 5916, Boroko.	25-6577
Sweden Consulate, P.O.Box 1228, Boroko.	25-5411
Swiss Consular Agency, P.O.Box 136, Port Moresby.	21-1307

DRY DOCK: No dry dock or major repair facilities exist in Papua New Guinea.

GANGWAY/DECK WATCHMEN: Not usually necessary.

HATCHES: Opening/closing usually carried out by crew.

CUSTOMS ALLOWANCES: Entry regulations permit 200 cigarettes or 1lb. of tobacco, and 40 oz. of wines or spirits.

Crew members may hold 200 cigarettes and 1 carton of beer (or 1 bottle of spirits) out of bond per week.

CARGO GEAR: Wharf equipment supplied by stevedores, load/discharge by ship's gear.

REPATRIATION: Possible, frequent scheduled air services to Australia, Hong Kong, Manila, New Zealand, Singapore and USA via Fiji.

TIME: Local time in all ports is 10 hours ahead of GMT.

HOLIDAYS: The only days on which cargo cannot officially be worked are Good Friday and Christmas Day.

TELEPHONES: Not available at present for ship to shore connection.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Generally a Seaman's Book is held at the main entrance to the port. Individual passes are not normally required for crew.

BERTH RESERVATIONS: A berth reservation system applies for all overseas vessels at all Papua New Guinea Harbours Board ports.

At Anewa Bay cargo vessels must vacate berth for concentrate carriers.

Samarai does not handle overseas traffic.

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 671, Stanley Esplanade, Port Moresby, Papua New Guinea. *Tel:* 21 1400 (8 lines) *Telex:* NE 22243 (A/B Harbours). *FAX:* 211546. *Cables:* Harbours, Port Moresby.

AITAPE: 03.08 S. 142.21 E. **(See Plan)**

(See General section on Papua New Guinea ports).

PILOTAGE: Not compulsory.

Pilot Boarding Place: Lat. 3° 08.25′ S., Long. 142° 23.9′ E.

TUGS: Not available.

RADIO: Communications not available.

BERTHING: Position of wharf, Lat. 03° 08.51′ S., Long. 142° 21.24′ E. Length of berthing head 18.3 m. (60 ft.). Width 6.2 m. (20.3 ft.). Height of deck above LAT 2.5 m. (8.3 ft.). Minimum depth of water at LAT at wharf head 4.3 m. (14 ft.) – subject to seasonal change. Maximum tidal range 1.4 m. (4.6 ft.)

STEVEDORES: *Working Hours:* 0700 – 1200 hrs., 1300 – 1800 hrs.

MEDICAL: Hospital facilities 3 miles from port can attend to minor cases.

FRESH WATER: Not available to ships.

FUEL: Available in 200 litre drums.

CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams tobacco. 1 litre of spirits or 1 litre of wine or 6 beers (total 4.5 litres) for each 7 days. Aitape is not a port of entry.

AIRPORT: Distance 1 mile, daily flights to Wewak and Vanimo.

GENERAL: *Chart:* AUS 652

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 3, Aitape, Sandaun Province, Papua New Guinea. *Tel:* 872044, 872052 (after hours). *Cables:* Portman, Aitape. *FAX:* 872125. *Contact:* Robert Parer, General Manager, W. & R. Parer Pty. Ltd., Agent for P.N.G. Harbours Board.

ALOTAU: 10.19 S. 150.27 E. (See Plan)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary: From a position in Lat. 10° 20′ S., Long. 150° 26′ E. bounded on the West by a straight line due North to the coastline. From the same point bounded on the South by a straight line due East to a position in Lat. 10° 20′ S., Long. 150° 28′ E. thence bounded on the East by a straight line due North to the coastline.

DOCUMENTS:

Customs:

Crew Declaration.
Last Port Clearance.
Inward Ship's Stores List.
Inward Cargo Manifest.
Crew Personal Effects List.
Crew List.
Passenger List.
First Aid List.

Health:

Pratique Request.
Ports of Call List.
Declaration of Health of all on board, with details of any sickness and whether all vaccinated.

PILOTAGE: Pilotage is not compulsory. There are no pilots stationed at Alotau but a pilot will attend from Port Moresby given 48 hours notice of the ship's estimated time of arrival.

Pilot boarding ground: Lat. 10°19.2′ S., Long. 150° 26.75′ E.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival.

ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Alotau. There is a safe anchorage in the harbour.

RESTRICTIONS: There are no restrictions.

MAX. SIZE: LOA about 130 m., with max. draft 20 ft.

HEALTH: Quarantine Officer Tel: 61 1049. Health Officer Tel: 61 1164.

RADIO: None.

VHF: "Alotau Harbour Control" on Channels 16, 12 and 8 during working hours and when vessels are expected during non-working hours.

RADAR: Not available.

TUGS: Not available.

BERTHING: Overseas Wharf is 93 m. long and 18.0 m wide, height of deck above L.A.T. 2.4 m., minimum depth of water at face at L.A.T. 10.0 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Coastal Wharf: Length 55.8 m. (183 ft.) Width 9.8 m. Minimum depth of water 4.9 m. (16 ft.). Height of deck above L.A.T. 2.1 m.

Barge Ramp available.

Load/discharge is by ship's own gear (except under special arrangement).

CRANES: Vessels are required to use their own gear, as no cranes available on the Overseas and Coastal Wharves.

BULK CARGO FACILITIES: Only at Overseas Berth, where copra in bags is handled, these are cut open onboard vessels using ship's gear.

SPECIALISED CARGO HANDLING FACILITIES: Overseas Berth handles containers and could handle Ro/Ro Traffic.

BRIDGES: None.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.

MEDICAL: At least 48 hours notice required by Agent to arrange for medical attention at the General Hospital. Dental facilities also available at the General Hospital.

TANKERS: Facilities for tankers at Coastal Wharf with draft of 14 ft. maximum.

DENSITY: 1010.

FRESH WATER: Available in limited quantities and restricted during periods of the year. Prior application to be made to the Port Manager.

FUEL: Available by road tanker. Supplier: B.P. Also through pipe-line. Arrangements through Reno Pty. Ltd. Tel. 61-1159.

FIRE PRECAUTIONS: None, other than the usual non-smoking precautions, etc.

CONSULS: None.

REPAIRS: No facilities available.

DRY DOCKS: No dry docks available at Alotau.

SURVEYORS: Not available in Alotau.

GANGWAY/DECK WATCHMEN: Usually ship's crew/ ship's gangway.

HATCHES: Opening/closing of hatches by ship's crew preferred.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 litre spirit or wine for 7 days. Tobacco should be equivalent to 200 cigarettes for 7 days.

CARGO GEAR: Load/discharge effected by ship's gear.

REPATRIATION: No facilities exist at Alotau for effecting crew changes or necessary repatriation.

AIRPORT: Gurney Airport approximately 20 km. away from Alotau town is served regularly but not daily.

TIME: GMT plus 10 hours.

HOLIDAYS: Christmas/Boxing Day, New Year's Day, Good Friday, Queen's Birthday, Independence Day. Cargo work can be arranged on these days except on Christmas Day.

POLICE/AMBULANCE/FIRE: Police: 61 1222. Hospital (No separate ambulance): 61 1308 and Fire: 61 1055.

EMERGENCY CO-ORDINATION CENTRE: Not available.

SERVICES: None available.

BANKS: Westpac Bank, P.O.Box 135, Alotau. Tel: 61 1003.

PNG Banking Corporation, P.O.Box 260, Alotau. Tel: 61 1197.

STORING: No facilities available.

SHIP SUPPLY SERVICE: Not available.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

REGULATIONS: Berthing Applications and Indemnity to be submitted to the Port Authority 48 hours prior to berthing of vessel.

DELAYS: Delays at Alotau are most unlikely.

GENERAL: *Storage:* Covered Storage Area for Overseas Cargo – 1,874 sq.m. Open Storage Area – 7,640 sq.m.

Chart: AUS 629.

DEVELOPMENTS; Proposed Palm Oil mill to the North of Overseas Berth, no fixed dates set for commencement or completion.

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 42, Alotau, Papua New Guinea. *Tel:* 61 1276. *Telex:* NE 22243. *Cables:* Portman Harbours, Alotau. *Contact:* Port Manager.

ANEWA BAY: 06.11 S. 155.33 E. (See Plan)

PORT AND MINE CLOSED LATE 1989 AND NOT LIKELY TO OPEN AGAIN IN NEAR FUTURE.

(See General Section on Papua New Guinea Ports).

PORT LIMITS: Seaward Boundary – a line joining the Southern end of Takanupe Island and Karikiberia Shoal.

DOCUMENTS: Crew List – 4 copies; Ship's Store's List – 2 copies (P.N.G. forms); Crew Declaration Form – 2 copies of P.N.G. Form 5; Vaccination Certificates of all crew members for sighting; International Declaration of Health.

PILOTAGE: Compulsory. Boarding station 06° 07′ S., 155° 35.3′ E., from a tug 'Masthead' or a launch 'Kuruki', normally between the hours of 0600 and 2200, or in certain circumstances, as per arrangement. ETA advices 72, 48 and 24 hours in advance via Rabaul Radio or Port Moresby Radio to Boucop Loloho NE95812; when in close vicinity, VHF Channel 12.

ANCHORAGE: Available at Port Authorities advice, but safe anchorage exists 1 mile N.E. of Dakome Pt. in 30 fathoms of water.

APPROACHES: 3 km. wide channel runs in a Southerly direction between Kuruki Reef and Banaru Reef, to between Takanupei Island and Karikiberia Shoal. The depth of this channel is in excess of 180 m. After crossing the 180 m. line, depths exceed 35 m. until adjacent to the wharf. The only hazard near the approach is Bara Shoal, 1.6 km. Southward of Takanupei Island.

MAX. SIZE: Maximum draft permitted alongside is 12 m. (40 ft). The longest vessel yet to have berthed measured 270 m. (partly loaded tanker). It is envisaged that vessel to load copper concentrate should ensure that, on berthing, hatch coamings are not more than 11.5 m. (38 ft.) above water line, to enable ship loader to be positioned on board.

HEALTH: Vaccination Certificates required. Quarantine Officer boards either with Pilot or at the berth. When anchoring, Free Pratique will be granted then. Code of signals 'Q' flag should be exhibited on arrival off Port. Pratique is automatic for vessels arriving from other P.N.G. ports, New Zealand and Australia. In certain circumstances Radio Pratique may be granted (check with local Agent).

RADIO: ETAs are best routed through either Rabaul Radio, Port Moresby Radio or Sydney Radio, who in turn will relay to Pilots and Agents.

VHF: The Port Control operates Channels 6, 12 and 16, but normally, messages between Vessels, Pilots, Port Control, Tug and Lines Boat are relayed on Channel 12. Therefore a vessel should use this channel when approaching. VHF services are available between 0700 hrs. and 2300 hrs. daily.

TUGS: 'Masthead' – 28 tons bollard pull – 1600 b.h.p., equipped with hydraulic warping winch and fire fighting equipment. Pilot may join incoming vessels from tug. It is common to use the tug's lines. Charges, etc. on application.

BERTHING: Wharf (Position Lat. 06° 11.1′ S., Long. 155° 32.7′ E.) is 77 m. long with mooring dolphins located 59 m. and 107 m. Eastward and 59 m. Westward of main wharf. Maximum draft is 12 m. This berth is used for all vessels and normally starboard side alongside. Loading/discharge of general cargo, containers, etc., by ship's own gear.

CRANES: 127 tonnes mobile crane can be made available if required.

BULK CARGO FACILITIES: Bulk loading gantry for copper concentrate situated just Eastward of the main berth. Net loading rate approximately 800 – 1,200 tonnes/p.h. Please note that gantry is a fixture and vessels are required to shift to facilitate loading.

SPECIALISED CARGO HANDLING FACILITIES: 2 × 25 ton forklifts available for handling of containers. Berth has proved suitable for certain Roll-on/Roll-off traffic. Westward of berth are provisions for discharge of white oils, black oil, and M.I.B.C. Small L.P.G. carriers anchor in position Lat. 06° 11.4′ S., Long. 155° 32.7′ E., and by way of hoses connected up to shore facilities.

STEVEDORES: The Port Authority (Bougainville Copper Limited) operates its own stevedoring function. Working Hours: from 0700 – 1500 and 1500 – 2300 hrs., 7 days a week. ETA advices as per "Pilots".

MEDICAL: Hospital facilities and medical clinic exist.

TANKERS: Heavy oils: 2×30 cm. marine connections to a 56 cm. main discharge line, giving a maximum discharge rate of 4,000 tonnes/p.h.

Light oils: 1×25 cm. marine connection to a 20 cm. discharge line giving a maximum discharge rate of 700 tonnes/p.h.

FRESH WATER: Available, but limited at times.

FUEL: Only small quantities of gas oil by road tanker.

CONSULS: None.

REPAIRS: Not available.

CUSTOMS: As per P.N.G. Regulations.

AIRPORT: Aropa Airport, 34 km. distant. Regular services to other P.N.G. centres, connecting to overseas centres.

TIME: GMT plus 10 hours.

HOLIDAYS: *Local Holidays:* As for Papua New Guinea. Port is normally closed Christmas Day and Good Friday.

POLICE/AMBULANCE/FIRE: Initially B.C.L. controlled within Port area, otherwise 95 1222 (Police), 951333 (Fire), 951666 (Ambulance).

DELAYS: Estimated and advised as per weekly shipping schedule.
GENERAL: *Chart:* Aus. 683.
Provisions: Small quantities generally available through local Agents.

SHIPMASTER'S REPORT: 1975 (updated 1988).
Documents:
Crew List. (2 Copies of Papua & New Guinea forms to be filled in on arrival at pilot station).
Ship's Stores List. (2 copies of P.N.G. forms to be filled in on arrival at pilot station).
Crew Declaration Form: – (2 copies of P.N.G. Form 5 – Articles in Private Possession of Officers & Crew to be filled in on arrival at pilot station).
Vaccination Certificates of all crew members for sighting.
International Declaration of Health.
Pilotage: Two Pilots, employees of the Bougainville Copper Company Ltd., are available 24 hours a day. Pilot boards in position Lat. 06° 07′ S., Long. 155° 35′ 18″ E. Pilot vessel is a tug called the "Masthead", which has a dark blue hull and white superstructure or launch "Kuruki". Pilots listen on VHF Channels 12 and 16. ETA's will have been passed to the Pilots by the ship's Agents, as per charter party, but pilot boat should be advised by VHF when vessel is 2 hours and 1 hour respectively from pilot station. Channel 12 is monitored by Pilots daily 0700–2300 hrs. and when vessels are expected. Pilotage is compulsory.
Max. Size: Restriction mainly on draft. Least water on berth is 40 ft. Although the problem has not as yet arisen, max. length is also restricted to about 885 ft.
Pratique: Immigration Officer boards as vessel berths. International Code of Signals "Q" flag should be exhibited on arrival off port. Same officer deals with customs clearance.
Radio: ETA's to Pilots are best routed through Rabaul Radio, call sign P2R, who will pass the message direct to the Pilot Office. Port Moresby Radio may also be used for messages to the ship's Agents.
Tugs: Only one tug, the "Masthead", 28 tonnes bollard pull, is available, Tug's line always used.
Berthing: Only one berth in the port, with a least depth of 40 ft. alongside. The berth is used for the loading of copper concentrates and the discharge of general cargo and containers. Vessels intending to load copper concentrates should ensure that their hatch coamings are not more than 38 ft. above the water line on arrival, to enable the loader to be positioned over her holds. In some cases ballast hatches may have to be left filled until after loading has commenced. The berth is approached at an angle of 45° and a mooring boat will take one head rope ashore first. The back spring should be sent ashore by heaving line as soon as possible. All vessels berth starboard side to the quay. The berth itself is 250 ft. long. Dolphins stand 175 ft. Westward and 135 ft. and 310 ft. Eastward of the ends of the wharf. The ore loader is not a movable fixture, and vessels are required to shift up and down the wharf to facilitate loading concentrates at the requisite hatches. When leaving the wharf the vessel is sprung off, using one head rope and the backspring.
Stevedores: Normal cargo hours for vessels loading are 0600 – 2300 hrs. but in cases where required cargo will be worked 24 hours a day. Stevedores are employees of the Bougainville Copper Company. Approx. loading rate for concentrates 750/1,000 t.p.h. Stevedores will render all possible assistance in shifting ship. For vessels discharging, mobile cranes capable of lifting up to 127 tonnes are available. Shore gangway is normally used.
Medical: There are good hospital facilities in nearby Arawa. Advanced notice of required medical attention not normally necessary.
Tankers: Tankers are also discharged at Anewa Bay's only wharf. As with other vessels, draft is restricted to 40 ft., and length to about 885 ft.
Density: Varies between 1022 and 1025 according to season and amount of rainfall recently experienced.
Fresh Water: Available on the wharf except during periods of drought. Supplied by 3 in. hose at approximately 60 t.p.h. Can only be supplied at main wharf (not at Dolphins) and it is therefore sometimes necessary when loading concentrates to wait until after hatches are being loaded before hose can be put aboard.
Fuel: Only small quantities of MDO (Gas Oil) by road tanker.
Consuls: None.
Repairs: No facilities.
Dry Docks: None close by.
Surveyors: None.
Hatches: Steel hatch covers to be opened and closed by crew.
Customs Allowances: 200 cigarettes and 1 bottle spirits or 12 bottles of beer (4.5 litres) per person.
Repatriation: Regular flights from Kieta Airport (34 km. distant) to Port Moresby, where possible to link up with international flights. Repatriation can therefore easily be arranged from this port. Also possible via Honiara.
Time: GMT plus 10 hours.
Shore Leave: All crew members are allowed ashore. No shore passes required.
Delays: No delays normally experienced, but possible up to 24 hours max.
General: Berth very exposed to S.E'ly winds. Moderate ground swell experienced on berth at times. Considerable rain experienced throughout the year, mainly during the night and early morning.

KAVIENG: 02.35 S. 150.48 E. (See Plan)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.
Large vessels should approach from the Nusa Channel where the port limits are as follows:
From the beacon on Cape Siwusat by a straight line 220° (T) to the extreme North point of Usien Island thence by a straight line due West to position in Lat. 2° 37.87′ S., Long. 150° 44.57′ E., thence by a straight line due North to the Western extremity of Edmago Island. From the Eastern extremity of Edmago Island the line of the port limit crosses the Eickstedt Passage in the direction 253° (T) to the Southern extremity of Nago Island.
PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Rabaul given 48 hours notice of the ship's estimated time of arrival.
Pilot Boarding Ground: Within 300 m. radius of a position with Eastern extremity of Edmago Island bearing due North 900 m.
ETA to be sent not less than 12 hours prior to arrival via Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Rabaul Radio (P2R).
ANCHORAGE: Anchorage may be obtained in sand with depth 20 m. in a position East Reef Light structure bearing 042° (T) distant 890 m.
HEALTH: Quarantine Officer Tel: 942243. Health Officer Tel: 942179.
VHF: Call Kavieng Port Control on Channels 16, 12 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours.
TUGS: Not available.
BERTHING: Overseas Wharf is 93.8 m. long, height of deck above LAT 2.7 m., minimum depth of water at face at LAT 7.0 m. Tidal range 1.2 m.
Vessels may berth port or starboard side to at the discretion of the Port Authority.
Load/discharge is by ship's own gear.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift: 0800 – 1200 hrs., 1300 – 2000 hrs. and 2100 – 2400 hrs. Gang shift: 0800 – 1200 hrs. and 1300 – 1600 hrs. (day shift), 1600 – 2000 hrs. and 2100 – 2400 hrs. (evening shift).
Licensed Stevedores: Buntings Stevedores. Tel: 942125. Telex: 91905. Fax: 942041.

MEDICAL: Kavieng Hospital – Tel: 942040.

Advise agents at least 24 hours in advance if medical attention is required.

Dental facilities available.

FRESH WATER: Available in limited quantities, provided prior application made with the Port Manager.

FUEL: Diesel available through pipe-lines at the wharf. Suppliers: Shell, Mobil and B.P.

REPAIRS: No facilities available.

CUSTOMS: Port of Entry. Office, Tel: 942163. Residence, Tel: 942130.

AIRPORT: Kavieng Airport is some 2.8 km. from the wharf and is served by Air Nuigini and Talair.

POLICE/AMBULANCE/FIRE: Police: 942222. Ambulance: 942040. Fire: 942000.

BANKS: Papua New Guinea Banking Corporation, Kavieng. Tel: 942084.

Westpac Bank, Kavieng. Tel: 942180.

Banks are 1.25 km. from the wharf.

DELAYS: Delays at Kavieng are most unlikely.

DEVELOPMENTS: A new wharf has been proposed on which the feasibility studies are being carried out. (See "Plan").

GENERAL: *Storage:* Covered Storage Area: 750 sq.m. Open Storage Area: 3,000 sq.m.

Chart: Aus. 667.

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 127, Kavieng, New Ireland Province, Papua New Guinea. *Tel:* 942182. *Telex:* NE 940. *Cables:* Portman, Kavieng. *Contact:* Sakeus Gem, Port Manager.

KIETA: 06.13 S. 155.38 E. (See Plan)

(See General Section on Papua New Guinea Ports).

PORT LIMITS: Seaward Boundary

By a straight line bearing 328° (T) from a point in Lat. 6° 10′ S., Long. 155° 42.3′ E., on the seaward edge of Gero Reef to a point in Lat. 6° 07.1′ S., Long. 155° 40.4′ E., thence due West to a point at the Northern most extremity of Banaru Reef.

PILOTAGE: Compulsory – Pilot service available 24 hours. (Pilot, Tel: 956049 (office), 956308 (residence).

Pilot boarding ground: Within 400 m. radius of Lat. 6° 07.6′ S., Long. 155° 40.3′ E.

ETA pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours but not less than 4 hours prior to arrival again via Port Moresby or Rabaul.

ANCHORAGE: There are 2 recommended anchorages for large vessels in Kieta Harbour.

HEALTH: Quarantine Officer, Tel: 956073. Health Officer, Tel: 921266.

VHF: Call: Kieta Port Control on VHF Channels 16, 12, 8 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours.

TUGS: Tug "Boroko" 1,200 b.h.p. and 450 b.h.p. Tugs available for hire from Bougainville Copper Pty. Ltd., at Anewa Bay.

BERTHING: Overseas Wharf 122 m. long, height of deck above LAT 3.0 m., minimum depth of water at face at LAT 8.5 m. Tidal range 1.7 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Berth No. 2 (coastal): Length 58 m., depth at LAT 4.8 m.

Berth No. 3 (coastal): Length 58 m., depth at LAT 4.8 m.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift 0800 – 1200 hrs., 1300 – 1600 hrs. Evening shift 1600 – 1900 hrs., 2000 – 2400 hrs.

Licensed Stevedores: North Solomans Stevedoring Co., P.O.Box 37, Kieta. Tel: 956350.

TANKERS: Discharge carried out at Anewa Bay.

FRESH WATER: Not available to overseas vessels. Coastal vessels may be supplied depending on availability and following prior arrangement with Port Manager.

FUEL: Diesel available from road tankers. Suppliers: Shell and Mobil.

CUSTOMS: Port of Entry. Collector of Customs, Tel: 956067.

AIRPORT: Aropa Airport is some 19 km. from the port and is served daily by Air Nuigini.

POLICE/AMBULANCE/FIRE: Police Tel: 956222. Ambulance Tel: 951266. Fire Tel: 951333.

DELAYS: Delays rarely occur at Kieta but if so are of fairly short duration, rarely exceeding 48 hours.

GENERAL: *Storage:* Covered Storage: 2,780 sq.m. Open Storage: 14,720 sq.m.

Chart: Aus. 683.

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 149, Kieta, North Solomons Province, Papua New Guinea. *Tel:* 956066, 956063, 956447. *Telex:* Harbours NE 95905. *Cables:* Portman, Kieta. *Contact:* Karo Karo Ilo, Regional Port Manager.

KIMBE: 05.33 S. 150.09 E. (See Plan)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

Commencing at a point Latitude 5° 30′ S., Longitude 150° 6′ 24″ E., thence in direction 079° to Grabo Reef light beacon, thence in a direction 100.5° to a point in Latitude 5° 30′ S., Longitude 150° 20′ E., then following the meridian to the point 10 miles East then following the meridian to the point 10 miles perpendicular distant landward.

PILOTAGE: Pilotage is compulsory with 4 hours' notice of ETA and 6 hours' notice of ETD and amend at least 2 hours before both for Kimbe and Buluma – SBLC log port some 11 nautical miles East of Kimbe port.

Pilot boarding ground: Lat. 5° 30.5′ S., Long. 150° 13.5′ E.

ANCHORAGE: There are no recommended anchorage areas for large overseas vessels outside the compulsory pilotage area.

HEALTH: Health Officer, Tel: 935142. Quarantine Officer, Tel: 935002.

VHF: Call Kimbe Port Control on VHF Channels 16, 12 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours depending on advance notice given by the respective shipping agents.

TUGS: Not available.

BERTHING: Overseas Wharf is 116 m. long, height of deck above LAT 3.1 m., min. depth of water at outer face at LAT 15.0 m. Tidal range 1.2 m.

Vessels may berth either port or starboard side to at the discretion of the resident Pilot depending on the wind or current.

Load/Discharge is by ship's own gear.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working Hours: 0800 – 1200 hrs., 1300 – 1800 hrs., 1900 – 2400 hrs. (If handling large quantity of bulk cargo stevedores may by request in writing to the Port Manager grant permission to work around the clock to complete).

Licensed Stevedores: I. S. O'Hanlon, P.O.Box 27, Kimbe. Tel: 935107.

WNCBS – Robert Laurie Subsidiary P.O.Box 449, Kimbe. Tel: 935311.

FRESH WATER: Available on request from the Agent. (By the end of 1986, available on request from Port Manager).

FUEL: Diesel is available by road tanker. Suppliers: Shell and B.P.

CUSTOMS: Port of Entry. Collector of Customs, Tel: 935056.

AIRPORT: Hoskins Airport is approx. 50 km. distant and is served by Air Nuigini and Talair several times a week.

POLICE/AMBULANCE/FIRE: Police: 935022. Ambulance: 935142. Fire: 935411.

DEVELOPMENTS: A port will be developed at Bialla to cater for large oil tankers to load palm oil. Bialla is some 100 km. by road East of Kimbe.

GENERAL: *Storage:* Covered Storage: 1,490 sq.m.

Open Storage: 12,025 sq.m.

Chart: Aus. 674.

AUTHORITY: Port Manager, P.O.Box 65, Kimbe, Papua New Guinea. *Tel:* 935134. *Cables:* Portman, Kimbe. *Contact:* K.K. Tausi, Port Manager.

LAE: 06.44 S. 146.59 E. (See Plan)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: A straight line bearing 167° (T) from Voco Point to a point at the Northern most extremity of Parsu Point on the Salamaua Peninsula.

PILOTAGE: Pilotage is compulsory – 24 hours a day. Tel: 42 2477 (Office), 42 1795 (Residence).

Pilot Boarding Ground: Lat. 6° 44.8′ S., Long. 147° 00.5′ E.

ETA at Pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours and not less than 4 hours prior to arrival (VHF Channel 16 – call "Lae Port Control" then to Channel 12 or 6 for working Channels.)

Coastal Pilotage: Pilotage services through the Great North East Channel to Torres Strait, through China Strait to Rabaul, and through China Strait and Raven Channel to Lae are conducted by pilots of the Queensland Coast and Torres Strait Pilot Service. See Australia – "Torres Strait" for details.

Pilotage recommendation: The Great North East Channel is covered by a recommendation on pilotage by IMO. See Australia – "Torres Strait" for details.

ANCHORAGE: There are no recommended safe anchorage areas for large vessels in the Port of Lae.

HEALTH: Quarantine Tel: 42 4199. Health Tel: 42 2033.

VHF: Call Lae Port Control on VHF Channels 16, 12, 8, 6. Listening watch maintained during normal working hours and when ships are expected outside normal working hours.

TUGS: One tug available for hire from private operator.

BERTHING: Overseas Wharf is 430 m. long, height of deck above LAT 2.7 m., min. depth of water at face at LAT 11.0 m. Tidal range 1.2 m.

One container berth with length 180 m. and depth 11.0 m. at LAT.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift: 0800 – 1200 hrs., 1300 – 1700 hrs., 1800 – 2200 hrs. Evening shift: 2200 – 0200 hrs., 0300 – 0800 hrs. (limited gangs).
Licensed Stevedores: Bunting Stevedores Pty. Ltd., P.O.Box 170, Lae. Tel: 42 3114. Robert Laurie (N.G.) Pty. Ltd., P.O.Box 1032, Lae. Tel: 42 3811 Rabaul Stevedores Ltd., P.O.Box 434, Lae, Tel: 42 4796. United Stevedores Ltd., P.O.Box 2191, Lae. Tel: 42 1099.

MEDICAL: Maximum possible notice should be given so that full arrangements can be made with regard to hospitalisation, etc. Full hospital facilities are available approximately 2.5 miles from the wharf.

TANKERS: New tanker berth with depth 13.0 m. completed. The berth will accommodate vessels of 40,000 d.w.t.

Discharge and bunkering facilities are available for all ship requirements.

FRESH WATER: Sometimes restricted but generally available at the rate of 30 t.p.h.

FUEL: Diesel and fuel oil available at the wharf. Suppliers: Mobil, Shell and B.P.

REPAIRS: No repair facilities available.

SURVEYORS: Lloyd's Agent.

CUSTOMS: Port of Entry. Collector of Customs, Tel: 424899.

AIRPORT: Lae Airport at Nadzab is approximately 40 km. distant. Serviced daily by Air Niugini flights.

POLICE/AMBULANCE/FIRE: Police: 422222. Ambulance: 421211. Fire: 424333.

Fire alarms are connected to the Gatehouse which has a direct telephone link to the Police station for emergency purposes.

DELAYS: Lae is the largest and busiest of the country's ports (except for Anewa Bay) and at times delays for up to 48 hours can be expected.

DEVELOPMENTS: Extension of Berth No. 3 (East) by 35 m. with depth of 13.0 m. Currently being dredged.

New C.F.S. completed.

New dolphins constructed East of tanker berth.

Demolition of Berth No. 2 and reconstruction should be completed by 1990.

Block paved open storage area and covered area to be constructed.

GENERAL: *Storage:* Covered Storage: 14,285 sq.m. Open Storage: 39,000 sq.m.
Chart: AUS 574. BA 2054.

SHIPMASTER'S REPORT: 1978 (Updated 1988).
Approaches: No difficulties were encountered either approaching or leaving. There is deep water close to the shore. Muddy water from the outflow of the Markham River is encountered off the port, but is of no navigational significance.
Wharf: Modern, well-fendered and convenient. Currents and tides alongside are irregular and unpredictable, being almost entirely influenced by the discharge from the Markham River. A tanker berth, consisting of concrete dolphins, is under construction close Eastwards of the main wharf and a pile-driving barge is operating. When berthing, some vessels use the off-shore anchor but under normal conditions this appears to be unnecessary and can in fact be something of an embarrassment when leaving. We did not use either anchor or tugs, weather conditions being good. Powered line boats are available and were used. There is a depth of water alongside of about 11 m.
Anchorage: The usual anchorage is as described in Pacific Islands Pilot Vol. 1, 9th Edition and Supplement No. 5 of 1976. We lay quietly to the port anchor in 30 m. of water, with 4.5 shackles in the water, in position with the Northern of the 2 beacons shown on Chart Aus. 385 bearing 268°(T) distant 2.1 miles approximately.

It is not customary to take a Pilot for the anchorage.
Pilotage: Compulsory when berthing and unberthing.
Tugs: There are 3 in the port, privately owned. As most of their income is derived from sources other than berthing and unberthing ships, their availability is uncertain. No doubt a vessel requiring a tug or tugs would be able to make advance arrangements.
Communications: Vessel came from Gladstone, Queensland, and our advices were sent through P2M, Port Moresby Radio, no difficulties being encountered.

Pilots and Harbour Control are available on Channel 16 VHF, when shipping movements are expected.
Documents Required:

5 Passenger Lists.
5 Crew Lists.
7 Inward Customs Manifests.
3 Lists of Crew Effects.
3 Stores Lists.
2 Arms and Ammunition Lists.

We were able to obtain local forms prior to arrival, and experienced no problems. Also see 'Pratique'.
Officials: The Bond and Beer Rooms are sealed on arrival. The Customs stuck rigidly to the rules and confiscated any undeclared goods, particularly alcohol, cigarettes and what they judged to be pornographic literature. No fines were levied nor charges brought.

The Port Authority allocates berths and decides priorities for vessels.

During our stay, and for a considerable period prior to then, the port had been very busy.

Depending upon the nature of her cargo and the rate of discharge, it is possible for a vessel to reserve a berth in advance.

Because such a vessel arrived when we were alongside and neither our cargo nor our rate of discharge brought us into the berth reservation category, we were obliged to go out to anchor until a berth again became available.
Cargo Working: Our cargo for Lae consisted of 1,524 tonnes of bulk wheat in No. 1 hatch and 9 containers, the heaviest of which was 19.76 tonnes, on No. 2 hatch. The containers were discharged in 3 hours 20 minutes by ship's gear, no problems being encountered.

Our grain cargo was discharged in 36 hours, including time taken rigging and unrigging the sucker and adjusting the length of the suction pipe. Thus, an average rate of 42.3 m/t.p.h. was achieved.

Grain is discharged by means of a portable sucker, weighing approximately 3.5 tonnes, placed on the hatch lids, where it stays throughout discharge. From the sucker, the grain is transferred to a hopper ashore and from there to lorries that transport it to the Mill, about 1 km. away. No significant delays on account of a lack of transport were encountered.
Working Hours: The standard working day is from 0800 hrs. to 2400 hrs. On 2 occasions, once successfully, attempts were made by receivers to start work at 0700 hrs.

The vessel being on Voyage Charter, receivers made strenuous efforts to arrange for discharge after midnight, but without success. They are also investigating making grain discharge an all-weather operation. This could easily be achieved by rigging a tent over the sucker and open portion of the hatch, but whether Union and/or Government Rules would permit this is another matter.
Pratique: If coming from Australia or New Zealand, Pratique is not required, nor is a Health Declaration. Nevertheless, Radio Pratique was requested but no reply was received.
Provisions: Available but very expensive. We stocked up prior to departure Gladstone and this proved to be a wise decision.
Fresh Water: Available from the wharf, at a rate of 25 t.p.h. – 30 t.p.h. This is well water and not used by the local residents, who collect the rainwater off their roofs. To be on the safe side it was treated with Chloride of Lime.
Repairs: Only minor repairs can be undertaken. We called in a local firm for some non-urgent burning and welding work, but they were unable to do anything due to a products tanker discharging astern of us. The Chief Engineer reports that appearances suggest that competent work would be done, but that prices would be rather high.
Weather: Was hot and humid, with temperatures ranging from 23.2°C to 28.2°C. During the afternoons a South-Easterly breeze, about Force 2-3 usually came up, dying away in the evenings. Rain showers were prevalent, night and morning.
Health: Local residents confirmed that malaria is present at Lae and the usual precautions were taken on board.

AUTHORITY: Port Manager, P.O.Box 563, Lae, Papua New Guinea. *Tel:* 422477, 421831. *Telex:* NE 42414. *Cables:* Portman, Lae.

LORENGAU: 02.01 S. 147.16 E. (See Plan)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

From the Eastern extremity of Hauwei Island by a straight line due North for 2,050 m., thence by a straight line due East for 2,920 m., thence by a straight line due South for 2,000 m. to the Old Light House on Ndrilo Island.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Madang given 48 hours notice of the ship's intention to call at Lorengau.

Advice from an officer of the PNG Defence Force may be obtained for ships proceeding to Lombrum Naval Base.

Pilot Boarding Ground: Lat. 01° 56.6′ S., Long. 147° 18.3′ E.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R) and to be confirmed at not more than 5 hours and not less than 4 hours prior to arrival. No VHF facility.

ANCHORAGE: Anchorage may be obtained in soft mud in depths of about 30 m. anywhere in Seeadler Harbour but an anchorage in position Bear Point 210° (T) 2,600 m. is recommended.

HEALTH: Contact Port Manager if Quarantine Office or Health Officer required.

TUGS: Not available.

BERTHING: Nabu Wharf is now regarded as a run down wharf as it has been ruled as unsafe for working cargo – break bulk, containers, etc, with the exception of Bulk Fuel products.

Coastal vessels still use the facility for handling of seafarers only.

Salasia Wharf is 40 m. long and 20 m. wide. Height above deck is 1.5 m., minimum depth of water below LAT is 1.4 m. The facility caters for all coastal ships. Overseas vessels rarely utilise the facility.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.

R. L. & V. J. Knight, P.O.Box 108, Lorengau. Tel: 409159

FRESH WATER: Not available.

FUEL: Diesel available by road tanker at Salasia Wharf. Suppliers: Shell Agencies.

CUSTOMS: Port of Entry. Collector of Customs Tel: 409034.

AIRPORT: Momote Airport is some 45 km. from Lorengau and is served by Air Nuigini but not daily.

POLICE/AMBULANCE/FIRE: Police and Fire: Lorengau 409122. Ambulance: 409055.

DELAYS: Delays at Lorengau are most unlikely.

DEVELOPMENTS: Salasia Wharf has an open storage area of 1,000 sq.m., and a transit shed with 100 sq.m. storage space.

Future redevelopment of the Salasia Wharf will consist of resheeting of sheet piling and possible sealing of wharf apron.

GENERAL: *Storage:* Covered: None. Open: 1,000 sq.m.
Chart: AUS 662.

AUTHORITY: Port Manager, P.O.Box 21, Lorengau, Papua New Guinea. *Tel:* 409078. *Cables:* Portman, Lorengau. *Contact:* R.C.Ruhuwamo, Port Manager.

MADANG: 05.13 S. 145.49 E. (See Plan)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

By a straight line due East from the Easternmost extremity of Kranket Island to position Lat. 5° 11.9′ S., Long. 145° 51.5′ E., thence due South to position Lat. 5° 13.5′ S., Long. 145° 51.5′ E., thence by straight line due West to a point on the Easternmost extremity of the Kalibobo (Schering) Peninsula known as Cape Kusseron.

DOCUMENTS: *Customs Require:*

2 copies of Ship's Stores/Consumption List.
5 copies Crew List.
5 copies Passenger List.
3 copies Articles in Possession of Crew.

PILOTAGE: Compulsory. Pilots based at Madang, Tel: 82 2351 (office), 82 2916 (residence).

Pilot Boarding Ground: Lat. 5° 12.7′ S., Long. 145° 50.1′ E.

ETA pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours but not less than 4 hours prior to arrival again via Port Moresby or Rabaul.

ANCHORAGE: Anchorage area is inside the Dallman Passage in the area to the North of the main channel bounded by Beliau Island to the West and Kramket Island to the East. Depth of water, 40 m. Good holding ground in soft mud. Ships should not proceed to anchorage area without Pilot's advice.

HEALTH: Quarantine clearance compulsory on arrival from foreign ports. Routine inspection carried out on arrival from local ports (Plants/Animals).

Quarantine Officer Tel: 82 2193. Health Officer Tel: 82 2224.

VHF: Call Madang Port Control on VHF Channels 16, 12, 8, 6. Listening watch maintained during normal working hours and when ships are expected during non-working hours.

TUGS: None available.

BERTHING: Overseas Wharf 137.1 m. long, height of deck above LAT 3.1 m., minimum depth of water at face at LAT 10.1 m. Tidal range 1.2 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).

A separate facility to serve woodchip vessels and Caltex tankers only is situated within Binnen Harbour West of the main wharf facilities.

STEVEDORES: 72 hours' notice preferred, but a minimum of 24 hours required. Working hours: 0800 – 1200, 1300 – 1800 and 1900 – 2200.

Licenced Stevedores: Rabaul Stevedores Pty. Ltd., P.O.Box 226, Madang. Tel: 82 2225. Robert Laurie Co., P.O.Box 642, Madang. Tel: 82 2157.

TANKERS: Discharge at main wharf for both Shell and Mobil. Caltex discharge by floating pipe-line while moored at the Jant woodchip facility.

FRESH WATER: Limited supply available seasonally at wharves and following prior arrangements with Port Manager.

FUEL: Diesel and diesel fuel is available from road tankers. Suppliers: Shell, Mobil and Caltex.

REPAIRS: A coastal slipway at Madang but only minor deck repairs P.O.Box 605, Madang.

AIRPORT: Madang Airport is 6 km. from the port and is served daily by Air Nuigini.

CUSTOMS: Port of Entry. Collector of Customs Tel: 82 2253.

POLICE/AMBULANCE/FIRE: Police: 82 2222. Ambulance: 82 2022. Fire: 82 2777.

DELAYS: Although there is only one overseas berth at the main wharf, Madang delays are not common and are of short duration when they do occur.

DEVELOPMENTS: When traffic justifies expenditure an extension of the overseas wharf Eastward will be undertaken.

GENERAL: *Storage:* Covered Storage: 4,600 sq.m. Open storage: 8,830 sq.m. *Chart:* AUS 648.

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 273, Madang, Papua New Guinea. *Tel:* 82 2351/2. *Telex:* P. O. Madang 82756. *FAX:* 82-3097. *Cables:* Portman, Madang. *Contact:* P. Kulol, Regional Port Manager.

ORO BAY: 08.54 S. 148.29 E. (See Plan)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

From the extreme North point of the mainland on the South side of the entrance to Port Harvey by a straight line due North for 2,935 m. thence by a straight line due West for 2,760 m. to the coastline.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Port Moresby given 48 hours notice of the ship's intention to call at Oro Bay.

Pilot Boarding Ground: Within 300 m. radius of a position with the North corner of Oro Bay wharf bearing 225° (T) distant 1,850 m.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival.

ANCHORAGE: In sand and mud at 15 m. depth may be obtained on the leading marks 239° (T) distant 400 m. from the North corner of the wharf.

VHF: Call Oro Bay Port Control on VHF 16, 12 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours.

TUGS: None available at present. Arrangements may be possible Kamusi Timber if tugs required.

BERTHING: Wharf is 60.3 m. long, height of deck above LAT 2.5 minimum depth of water at outer face at LAT 11.4 m. Tidal range 1.3

Vessels may berth either port or starboard side to at the discretion the Port Authority.

Load/discharge is by ship's own gear (except under spe arrangement).

Berthing may be delayed during the N.W. season, December – Mar

STEVEDORES: 72 hours notice preferred, but a minimum of 24 ho required.

Licensed Stevedores: New Guinea Forwarding Agencies: P.O.Box Popondetta Tel: 297050/297268. Carnell Carriers: P.O.Box 1 Popondetta Tel: 29 7095, 297257.

FRESH WATER: Not available.

FUEL: Diesel is available by road tankers. Suppliers: Shell and Mo

AIRPORT: Popondetta Airport is 40 km. from the port and is servec Air Nuigini daily.

POLICE/AMBULANCE/FIRE: Police: 29 7122. Ambulance: No serv available. Fire: 29 7144.

DELAYS: Delays at Oro Bay are most unlikely.

GENERAL: *Storage:* Covered Storage: 739 sq.m. Open Stora 4,645 sq.m.

Chart: AUS 520.

DEVELOPMENTS: The area around Popondetta is being developec major palm oil plantations. Overseas Wharf to be lengthened.

On completion, palm oil tankers and general cargo vessels 40,000 d.w.t. will be handled.

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 1 Popondetta, Papua New Guinea. *Tel:* 29 7295. *Cables:* Portm Popondetta. *Contact:* Port Manager.

PORT MORESBY: 09.29 S. 147.09 E. (See Pla

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

A straight line bearing 300° (T) from a point at the South West extremity of Nateara Reef to a point at the Southernmost extremity Sinari Reef.

PILOTAGE: Pilotage is compulsory – 24 hours a day. Tel: 212 (Office), 214910 (Residence).

Pilot boarding ground: 9° 32.8′ S., 147° 06.85′ E. *OR* in bad weat the pilot boarding ground will be withdrawn inside the Basilisk Passa to a position Basilisk Beacon 220° (T) 950 m.

ETA at Pilot boarding ground not less than 12 hours prior to arr via Port Moresby Radio (call sign P2M).

Confirm or amend ETA not more than 5 hours and not less t 4 hours prior to arrival (VHF Channel 16 – call "Moresby Pilot" the switch to Channel 12 for working Channel).

GENERAL: *Storage:* Covered Storage: 2,200 sq.m.

Open Storage: 11,500 sq.m.

Chart: AUS 651.

DEVELOPMENTS: The port development plan which is unlikely to take effect for a few years, calls for a land backed facility off the causeway joining the land to the existing wharf.

AUTHORITY: Port Manager, P.O.Box 270, Wewak, Papua New Guinea. *Tel:* 86 2298. *Cables:* Portman, Wewak.

NOTES

Please also advise Shipping Guides Ltd.

Paraguay

GENERAL:

DOCUMENTS: *Consular Documents:*

If ports of embarkation are non-Paraguayan, the Agency must submit an original cargo manifest and two copies, as well as three copies of the Crew List to the Paraguayan Consulate. The Consul returns the original and one copy of each of these documents, and the Agency must ensure that these papers are mailed, time permitting, or delivered to the vessel.

Prior to Arrival:

Arrival Notice:

The time and date of the vessel's arrival shall be reported at least 24 hours in advance to the following Authorities: Port Authority (National Navigation and Port Administration), the General Prefecture of Ports (National Navy), Customs, Migration, and Maritime Health.

Information on Cargo for the Port:

The shipping Agency must receive duly in advance the following documents for presentation to the Authorities and for the preparation of the tally books: Cargo Manifest and Stowage Plan. It is of the utmost importance that manifests be received duly in advance, even if by telex, to avoid any delay in servicing the vessel.

The manifests and a written request that may be submitted 72 hours prior to the arrival of the vessel, must be delivered to Customs. Customs opens a Customs file and allocates a number to the vessel to expedite the processing of the import documents.

Requests for Port Services:

A request must be submitted to ANNP, indicating the expected time of arrival (ETA) of the vessel, to obtain clearance for berthing and port services. 5 copies of the manifests giving the number assigned by Customs to the vessel and 1 copy of the Stowage Plan must be presented, as well as copies of the tally books, and a list of container contents.

In the absence of manifests, clearance for berthing will not be given and, therefore, the cargo cannot be handled.

On Arrival:

Type of Document	*Number and Distribution of Documents*						
Basic Forms	*Gen. Pref. Ports*	*Customs*	*Immigration*	*Marit. Health*	*Veterinarian†*	*Agency*	*Total*
1. General Declaration(a)	1	–	–	–	–	1	2
2. Cargo Manifest	1(b)	1(b)	–	–	1	1	4
3. Crew List	1(b)	1(b)	1	–	–	1	4
4. Passenger List	1	1	1	–	–	1	4
5. Ship's Stores List	–	1	–	–	1	2	4
6. Crew Effects Declaration	–	1	–	–	–	1	2
7. Maritime Declaration of Health	–	–	–	1	–	–	1
8. Mail List	–	–	–	–	–	1(c)	1
Additional Documents:							
9. In-ballast Declaration	1	1(b)	–	–	–	1	3
10. Bills of Lading	1	1(b)	–	–	–	1	3

†Transitory provision of the Ministry of Agriculture, of November 1978.

(a) If the vessel has the forms, LAFTA/OAS Form 1 should be employed; if not, Agencies use their own form, containing data on 1 through 10 and 11A of the General Declaration.

(b) Visaed by the Consulate of Paraguay.

(c) For the Postal service.

Prior to Departure:

A departure request must be filed with Customs, to which the export cargo manifest and the provisional export permit must be attached. This procedure cannot be started until the entire cargo has been loaded.

After this request has been recorded by the Registration Division and the Cashier's Office, the Customs Administration issues the safe-conduct for departure.

Once the safe-conduct is obtained from Customs, this is attached to the crew list and submitted to the General Prefecture of Ports, which authorises clearance, and designates the Pilots who are to guide the ship on the stretch Asuncion-Confluencia.

NOTES

Please also advise Shipping Guides Ltd.

Peru

GENERAL:

DOCUMENTS:

Prior to Arrival:

Arrival Notice:

Notice of a vessel's arrival must be sent 24 hours in advance to the Captain of the Port, Customs, International Police, Migration and Public Health.

Information on Cargo and Passengers for the Port:

The Agency must have received the following documents by air, sufficiently in advance to submit them by the deadlines indicated in the following paragraph, and to prepare the tally sheets:

5 sets Cargo Manifest.
2 sets Freighted Cargo Manifest.
1 copy Passenger List.
6 copies List of Container Contents.
5 copies Dangerous Cargo List.
2 copies List of In-Transit Dangerous Cargo.
2 copies Stowage Plan.

Deadlines for Submission of Documents:

(a) Vessels from South American and Pacific coast ports are exempt from submitting documents by air mail in advance. However, the Agency must receive by telex, in sufficient time to prepare and submit before initiating tally sheet operations, the following information on regional cargo: marks, numbers, amount, class and weight of cargo, its location on board, shipper and consignee.

(b) Vessels from Panama and Colombian ports on the Atlantic. 24 hours before the vessel's arrival. Fine for failure to comply with the deadline.

(c) Vessels from Central American ports. 48 hours before the vessel's arrival. Fine for failure to meet the deadline.

(d) Vessels from any other port. 72 hours before the vessel's arrival. Fine for failure to meet the deadline.

Request for Port Services:

24 hours before the vessel's arrival, the request for pilotage and berthing, and port services shall be submitted to the marine terminal of the Peruvian National Ports Agency (ENAPU) on special forms.

On Arrival:

On entrance of the vessel, the following documents must be submitted:

Type of Document	*Number and Distribution of Documents*						
Basic Forms	*Captain of Port*	*Customs*	*ENAPU*	*Police*	*Migration*	*Public Health*	*Total*
1. General Declaration	1	2	2	–	–	–	5
2. Cargo Manifest	1	2	4	–	–	–	7
3. Crew List	1	2	–	1	1	1	6
4. Passenger List	1	2	2	1	1	1	8
5. Ship's Stores List	–	2	1	–	–	–	3
6. Crew Effects Declaration	–	2	–	–	–	–	2
7. Maritime Health Declaration	–	–	–	–	–	1	1
8. Mail List	–	2	2	–	–	–	4
Additional Documents:							
9. Clearance from last Port	1	–	–	–	–	–	1
10. In-transit manifest	1	1	–	–	–	–	2
11. "No Passengers" Declaration	1	2	2	1	1	1	8
12. List of Passengers In-transit or "No In-transit Passengers" Declaration	1	2	2	1	1	1	8
13. List of Passengers Baggage or "No Baggage" Declaration	–	4	4	–	–	–	8
14. List of unaccompanied Baggage or "No unaccompanied Baggage" Declaration	–	4	4	–	–	8	16
15. Bill of Lading	–	1	2	–	–	–	3

Prior to Departure:

Clearance Documents:

The Clearance Permit must be duly paid for at the Bank of the Nation. Receipts therefore must accompany the request for clearance.

The Clearance Permit is requested from the Captain of the Port on a special form in triplicate, accompanied by 3 sets of the General Declaration, the Crew List and the List of Passengers on board, In-Transit or "No Passengers" Declaration.

At the time of clearance, a representative of the Captain of the Port returns on board a stamped set of these documents.

In addition, the following must be submitted before clearance:

Documents:	*ENAPU*	*Migration*
Crew List		1
List of Passengers Embarked or "No Passengers" Declaration	1	
List of Passengers Baggage or "No Baggage" Declaration	1	
Bill of Lading for all cargo loaded	2 sets	

Within 24 hours after clearance, Customs must be given a copy of the Export Cargo Manifest or a set of the Bills of Lading for all export cargo.

Request for Pilotage:

Requests for unberthing, including the request for pilotage shall be submitted daily at 1500 hrs. to the ENAPU on a special form.

SHIP REPORTING: The following is a copy of a telex received b vessel in December 1988.

Re: Shiprep Rules in Peruvian Waters:

Following revised rules re "shiprep" messages are immediat effective, applying to all national vessels above 350 g.r.t. and to foreign vessels irrespective of tonnage and type, as per Circular 1 87 from Peruvian Naval Authorities.

"ALL PREVIOUS CIRCULARS ON THIS MATTER ARE OBSOLET

SHIPREP messages are now required as follows:

EPW – On entering Peruvian waters.
PR – Position Report twice daily – 0800 hrs. and 2000 hrs. lo time.
FR – Final Report – 1 hour prior to arrival at port (anchorage port jurisdiction area).
DPW – On departing Peruvian waters.

The details to be given are as follows:

(a) The abbreviation applicable (EPW/PR/FR or DPW).
(b) Name/Call sign/Flag of vessel.
(c) Date/Hour/Minutes – 6 figures group.
(d) Last Port.
(e) Position – Lat. – 5 figures/Long. – 6 figures.
(f) True course – 3 figures.
(g) Speed in Knots – 2 figures.
(h) Port of Destination.
(i) ETA – Date/Hour/Minutes – 6 figures.

EPW – Message requires all points above.
PR – Message requires A/B/C/E/F/G/H/I.
FR – Message requires A/B/C/H (point C give ETA group).
DPW – Message requires A/B/C/E/H.

Coastal Radio Stations to be used:

Station	Call Sign	Transmits	Receives	Emission	Hours Serv
Paita	OBY2	8527	8363.2-8366.4	A1A	24
		2182/2738	2182	H3E/J3E	
		156.70	Ch.14	F3E	
		156.80	Ch.16	F3E	
Callao	OBC3	460 – 500	500	A1A	24

		156.60	Ch.12	F3E	
		156.70	Ch.14	F3E	
		156.80	Ch.16	F3E	
Mollendo	OBF4	8290	8363.2-8366.4	A1A	24
		2182-2738	2182	J3E/H3E	
		156.70	Ch.14	F3E	
		156.80	Ch.16	F3E	

Remarks:

If you cannot make contact with any of these 3 stations, which han messages free of charge, you may use any foreign coast stati addressing message:

"Costera Callao, Telex 26069 PE" (reserve Telex 20143).

Or, for ships with satellite telex, transmit directly to that number y "Shiprep" message through any acceptable channel. The main object is to pass the message through any channel to avoid the stiff fines U.S.$1,000.00 – 5,000.00. If all methods fail, a detailed explanat should be made in the ship's radio log and a copy hereof given to Port Captain on arrival in port.

Additionally a Sailing Plan has to be prepared by Master prior departure from Peruvian ports.

The local agent will provide the form and then present it to the F Captain.

ATICO: 16.14 S. 73.43 W.

Atico is an open roadstead and unprotected. The main activity is loading of fishmeal.

PILOTAGE: Not available.

ANCHORAGE: Vessels anchor in the open roads.

TUGS: 1 available.

LIGHTERS: 3 available, 100 tons each.

CRANES: None.

STEVEDORES: See "Pimentel" for working hours and overtime rat There are 2 gangs available.

MEDICAL: Available at Mollendo.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Swell Period:* Heavy swell in the Winter mont June-September.

CALLAO: 12.03 S. 77.10 W. (See Plan)

DOCUMENTS:
Airmail copies must be presented to Port Authorities 72 hours before arrival of vessel as otherwise vessel will be fined. No docking is allowed until Cargo Manifests and Cargo Plan are presented.
Vessel copies to be delivered on clearing vessel inbound on arrival when Health, Customs and other Authorities board.

	By Air	*By Sea (With the Vessel)*
Cargo Manifests, including additionals. Must be faithful copies of Bills of Lading descriptions	5	7
Same Manifests, but freighted	5	2
Cargo Manifests covering cargo shortshipped but manifested on previous vessels calling at Callao	5	7
(If Master Stencils are airmailed, the required number of Manifests will be printed)		
Transit Cargo Manifests	–	3
Freighted copy of each Bill of Lading	–	4
Lists of Containers with their numbers	2	2
Content List, each Container, properly identified with marks, numbers and Bills of Lading numbers	2	2
Dangerous Cargo Lists showing complete description of goods, Flash Point, IMO Classification, Type of Label, marks, numbers and Bills of Lading numbers	3	3
Transit Dangerous Cargo Lists	3	3
Mail Manifests	5	5
Passenger Lists	1	10
Transit Passenger Lists	–	10
Tally Books	–	16
Stowage Plan	3	–
Consolidated Stowage Plan, prepared or checked on board	–	3
Visaed Tonnage Certificate or General Declaration from First Port receiving cargo for Peru and every port of call thereafter	–	1
Health Clearance, last port of call	–	1
Vaccination List	–	1
General Declaration	–	7
Crew List	–	10
Crew Personal Effects Declaration	–	3
Stores List	–	4
Sealed Consular Documents addressed to Customers, in envelope	–	1

Also see "General" before first port.

PILOTAGE: Compulsory. 24 hours advance notice of ETA required. Pilot boards at anchorage after vessel has been granted Free Pratique. Various pilot launches painted white, black and red.

ANCHORAGE: Very large area to the West of entrance buoys.

Shipmaster's Report: December 1988.

The following is part of the telex received with the above ("SHIP REPORTING").

Re: Port of Callao

The Port Captaincy of Callao has appointed the following official anchorage places for arriving vessels:

	Latitude:	Longitude	
1.	12° 02′ 00.0″ S.	77° 11′ 49.5″ W.	(These are the corner
2.	12° 02′ 11.3″ S.	77° 10′ 41.5″ W.	points of Anchorage "A",
3.	12° 01′ 10.0″ S.	77° 11′ 41.5″ W.	as per B.A. Chart
4.	12° 01′ 21.0″ S.	77° 10′ 33.5″ W.	No. 1853)

NON-FULFILLMENT OF THESE INSTRUCTIONS WILL RESULT IN A HEAVY FINE.

RESTRICTIONS: Vessels of up to 32 ft. draft may enter at any time. Vessels of more than 32 ft. draft must enter at high water. Pilots available 24 hours.

MAX. SIZE: Length and breadth practically unlimited, draft 32 ft. plus height of tide making allowance for keel clearance.

HEALTH: Cable Agent requesting Free Pratique. Agent must be notified in advance if any illness or disease suspected on board. Free Pratique is hardly ever given unless Health Officer and Captain of the Port and other Officers board.

RADIO: Radio Costera, OBC3, 460, 500, 8546, VHF 16 and 14 (Peruvian Navy 24 hours).

Arrival Advice: 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.

Shipowner's Report: October 1982.

Please note there is a new regulation for vessels calling Callao. All ships must send 1 hour prior to arrival at Callao Roads a telegram addressed to "Costera Callao" indicating their revised ETA. If this is not done and Authority gets notice of this, vessel will be fined.

As per experience this telegram arrives at "Costera Callao" after vessel has departed. Sometimes Authority asks for presentation of telegram copy.

Radio Officer's Report: September 1982.

During a recent call at Callao and Pisco at the beginning of September 1982, only slight difficulties were experienced in establishing radio contact with Callao Radio – OBC3.

However, Callao Radio seems mostly to be listening only on 8364 kHz HF, answering calls on its working frequency 8546 kHz. Also the station seems to be using "QRY-operation". Ships' radio operator will get his turn number, whereafter Callao Radio calls back in due time for QSO.

Even at a very close range, no answer was obtained on 500 kHz. However, a call on VHF Channel 16 was answered at once, and vessel was advised to shift to the above mentioned HF frequency for QSO.

VHF: Port Captain on Channel 16. Working on Channel 12. All communications carried out in Spanish.

TUGS: Port Authority Tugs join vessel once inside mole, 1 or 2 as required, using vessel's lines, later passed to pier. 4 tugs available; 2 at 175 h.p., 1 at 500 h.p. and 1 at 800 h.p.

BERTHING: There are 9 piers with a total of 24 berths, 22 for large vessels, and 2 for coasters.

The various berths of the port can be subdivided into areas for their appropriate usage as follows:

	Quays	*Berths*
General cargo	1, 2, 3, 4, 5	1A, 1B, 2A, 2B, 3A, 3B, 4A, 5A, 4B.
Dry bulk cargo	11, 9	11A, 11B, 11C, 9A, 9B, 9C.
Liquid bulk cargo (Oil derivates)	7	7A, 7B.
Minerals	5	5B, 5C, 5D, 5F.
Logistic supplies and coastal vessels	9, 10	9D, 10A, 10B.

All piers except the petrol pier are connected to railway system for unloading and loading to railway wagons.

Within port limits anchorages can be used for discharge of livestock, scrap and occasionally for general cargo after permission obtained from the Port Authorities.

Berths 5B, 5C, 5D and 5E are equipped with conveyor belts for shipping granulated bulk ore.

Berths 9A, 9B and 9C have a conveyor belt for shipping fishmeal in pellets.

For discharge of grain, there are three pneumatic mobile suction towers and silos with a capacity up to 23,000 tons. The average rate of discharge of the pneumatic towers is 2×100/150 t.p.h. and 1×300 t.p.h.

STEVEDORES: No particular advice necessary but Agent must receive Stowage Plan beforehand to advise Port Authority of planned operation.
Working Hours: 1st shift 0700 – 1200 hrs. and 1300 – 1600 hrs. 2nd shift 1700 – 2400 hrs. Both are compulsory, except 2nd shift on Sundays and Holidays. 3rd shift 0100 – 0700 hrs., optional, except after Sundays and Holidays when not worked. There is an additional charge of 25% for the 3rd shift.
Lighters: In the port, a lighter service is provided by private concerns to enable vessels to discharge at moorings, and thus reduce the time they are at the quays.

CRANES: There are a number of cranes with lifting capacity from 4 tons to 50 tons. The Callao Naval Base has a floating crane with a lifting capacity of 80 tons, which can be called upon if necessary.

MEDICAL: Advance information as to sick crew members not required but helpful. Ample first class facilities in the Lima area.

TANKERS: Petroleum Pier: Pier No. 7: Max. depth 35 ft., however, depth in approaches to berth is 33 ft. at HW and 31 ft. at LW, max. length about 200 m.

There are numerous loading and discharge pipe-lines of different diameter to handle oil derived products.

These lines can be used simultaneously at the berths A and B, but also depending on store facilities on shore or delivery into trucks.
Discharging pressure of the lines: 100 lb./sq.in. for 12 in. to 22 in. lines. On the pipe-line of 6 inches it is possible to reach a pressure of 250 lb./sq.in., for discharge of LPG.
Connections: There are connections from 4 in. to 10 in. for all kind of flanges.
Water: Supply of water is possible, 40 t.p.h.

Discharge of ballast or slops inside mole prohibited. Tankers loading fish oil must arrive free of ballast.

DENSITY: Sea water.

FRESH WATER: All berths equipped with fresh water supply at an average rate of 30 t.p.h.

FUEL: The following are available from Petroleos del Peru, Bunker "C" 3,500 seconds, Petroperu No. 5 (intermediate 4) 400 seconds, Diesel 2 (marine diesel) 100 seconds.

FIRE PRECAUTIONS: Use of Port Authority Fire Equipment mandatory during discharge of petroleum products with charge for service. Safety equipment charge applied to all vessels on tonnage moved.

CONSULS:
Argentina
Austria
Belgium
Bolivia
Brazil

U.S.A.
U.S.S.R.
Venezuela
Yugoslavia

REPAIRS: Normal Deck and Engine repair facilities available through private companies in Lima and Callao.

DRY DOCKS: Major repairs can be undertaken by the Naval Industrial Department, including careening and repairs in dock.
(a) Dry dock – length 632 ft., width 82 ft., depth 21 ft.
(b) Floating dock 107 – length 408 ft., width 48 ft., depth 20 ft.
(c) Floating dock 106 – length 288 ft., width 46 ft., depth 14 ft.

SURVEYORS: Lloyd's Register of Shipping, ABS, R.I., and N.V.

GANGWAY/DECK WATCHMEN: Recommended.

CERTIFICATES: All vessels arriving at Callao must have updated certificates, this refers especially, and as per MARPOL agreement, to Oil Pollution Certificate and Engine Log Book.

If these certificates are not in order, the vessel will be heavily fined. All may be required but normally only the Derat Certificate is asked for. If ratguards are not used on all lines, vessel is liable to fines.

CUSTOMS ALLOWANCES: Any amount over normal consumption usually causes difficulties, including searching.
CARGO GEAR: No additional requirements.
REPATRIATION: All foreign crew members who do not have Peruvian Visas, which only obtainable abroad, must be repatriated by quickest means (Air) by Agent, paying all detention expenses. Peruvian and foreign crew members available.
AIRPORT: Lima/Callao within city limits has regular direct international service North and South America, Europe and Far East.
HOLIDAYS: Only 1st May when work is not possible.
IDENTIFICATION CARDS: Supplied by Agent and stamped by Immigration. Authorisation required for all crew members.
DEVELOPMENTS: Quay No. 5 is being converted to a container terminal.

SHIPMASTER'S REPORT: September 1980.
Navigational Notice: All vessel navigating in Peruvian waters to a distance of 200 nautical miles from the coast are required to radio their position, course, speed and destination every 12 hours to: "Capitania General de Costera y Capitania de Puerto Callao" via Callao Radio, which is very difficult to contact as naval traffic appears to be their main concern. Other coastal radio stations are even less available.
Documents: Cancel all reference to LAFTA documents which are now obsolete and also there is no longer any visaed or consular items to obtain. The requirements for air mailed copies still remains for Bills of Lading, Cargo Manifest and Contents List where applicable. The remaining requirements are the same as listed.
Pilotage: The Pilots boarding station is 1.25 miles 095° from that marked on BA Chart 1853.
Anchorage: Very large area to the North and West of entrance leading line. The area to the South is reserved for Peruvian naval and merchant vessels which navigate therein without lights on occasions.
Restrictions: The maximum draft dictated by the entrance channel is 33 ft. 10 in. (10.30 m.). On occasions with a maximum tide, vessels in excess will be docked but the chances are based upon the Pilot's willingness. With a 3 ft. (1 m.) rise this vessel charted a minimum under keel clearance of 1.3 ft. on a draft of 34 ft. 3 in. within the channel outside the breakwaters.
Density: This was checked daily and found to be 1027.5 to 1028 in Berth No. 11.
Berthing: For discharge of grain there are 3 pneumatic suction towers on rails with 3 suction pipes to each. The two Southern units are reserved for loading road trucks while the third and most Northern discharges onto the silo belt only. Thus delays may be experienced due to lack of trucks and subsequent order of discharge regulated to accommodate this factor. There is a minimum depth of 36 ft. by hand lead at this berth.
Fresh Water: Very early request via Agent and follow up. Max. 10 t.p.h.
Gangway/Deck Watchmen: The strictest watch must be maintained at ALL hours for persons who board to steal. The worst are those whose identity card is for "Tribulante" indicating a seafarer, for they know where most ship's officers stow gear and where the keys to the chartroom are, etc. A patrol is required as well as a static gangway watch. Cargo thieves are very well organised.

Ashore, no person should travel alone in Callao or Lima.
Port Authority Permits: These are required for repairs, overside painting, etc., and a 3 man inspectorate will board to check progress and conditions.

SHIP'S OFFICER'S REPORT: January 1985.

Hull maintenance only possible after permission obtained from Port Captain.

A very extensive cabin search made on sailing day and articles not declared on arrival were taken away (if possible).

The following were not declared on arrival (but should have been declared): Cabin refrigerators, portable cabin heaters, Loadmaster computer.

In our case all charges and fines were waivered after consultations. Therefore if in doubt all items should be declared.

Make sure all ratguards are marked with ship's name otherwise they may be stolen and resold to the ship.

Ensure correct courtesy ensign is flown otherwise a fine will be imposed.

AUTHORITY: Port Captain, Terminal Maritimo de Callao.

CHANCAY: 11.35 S. 77.16 W. (See Plan)

Chancay is an unprotected open roadstead about 31 miles North of Callao. The main activities are the loading of fishmeal and discharging of fertilisers.
PILOTAGE: Compulsory. The Port Captain currently acts in this capacity.
ANCHORAGES: There is a good anchorage, in 5 and 8 fathoms of water, on a sand and mud bottom, located in the outer area of the bay, which is 1 mile long by 0.5 miles wide.
RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 2 Tugs of 56 h.p.
BERTHING: There is a pier for loading barges.
LIGHTERS: 12 lighters with a capacity of 40 tons each.
CRANES: 2×14 tons capacity.
STEVEDORES: The same system applies here as throughout th Republic, the tariff only altering according to the number of worker employed.

3 shifts and 2 more if necessary.
MEDICAL: Medical consultations possible.
FRESH WATER: Not available.
FUEL: Not available.
AUTHORITY: Port Captain.

CHIMBOTE: 09.05 S. 78.37 W. (See Plan

Chimbote is a port with possibilities to load and discharge from and int lighters if berths are not available. Main activity: Loading of fishmeal an minerals; discharging of iron, steel, and general cargo.
DOCUMENTS:
For Entry
2 Entry Declarations (Form No.1).
1 Departure Licence of the last foreign port en route.
1 Maritime Health Declaration (Form No. 2).
2 Passenger Lists with entry baggage (Form No. 3).
1 Consular Roll of the last foreign port en route.
1 Consular Passenger List of the last foreign port.
Customs Administration
1 Original Cargo Manifest(s) with the Consular stamp. (Form No.4)
The envelope(s) from the Consul, enclosing copies of the Consula invoices, Bill of Lading and Cargo Manifest for the port with the Consula stamp.
1 Cargo Manifest (Form No.4).
1 Cargo Manifest of cargo, but with further destination for anothe national or foreign port (Form No. 4).
1 Cargo Manifest in transit.
1 Gross or Net Tonnage Certificate, with Consular visa.
1 Unaccompanied Baggage List (Form No. 5).
Customs
1 Entry Declaration (Form No. 1).
1 Cargo Manifest(s) for port without Consular visa (Form No. 4).
1 Manifest of Cargo for port, but with further destination for anothe national or foreign port, without Consular visa (Form No. 4).
2 Passenger Lists with entry baggage (Form No.3).
2 Unaccompanied Baggage Lists (Form No. 5).
1 Crew Personal Effect List.
1 Stores List, food and spirits.
1 Mail List.
Port Administration
1 Entry Declaration (Form No.1).
1 Passenger List with entry baggage (Form No. 3).
1 Unaccompanied Baggage List (Form No. 5).
3 Cargo Manifests for the port, without the Consular visa (Form No.4
3 Manifests of Cargo for port, but with further destination for anothe national or foreign port, without Consular visa (Form No. 4).
3 Sets of Bills of Lading.
Also see "General" before first port.
PILOTAGE: Compulsory. Official Pilot boards vessels at entrance t bay and leads ship to appropriate anchorage according to draft. Privat Pilot to moor to the quays of the "Corporacion Peruana del Santa" an to "Sogesa". Vessels enter the inner roadstead through Southern sid of each channel. Depart through Northern side of channel.
ANCHORAGES: Good anchorages in bay according to draf Anchorages are of mud and sand. Best place to anchor ship of mediur draft is inner side of Paso del Norte, 6 fathoms deep, near port and saf Another good anchorage for ship of medium draft is with Island bearin 170° and Rosas Blancas bearing 275°, 6 fathoms deep.
HEALTH: Health Authorities board on arrival.
RADIO: Hablanaves Radio at Talara and Trujillo (Buenos Aires), Radi Costera at Callao.
Arrival Advice: 24 hours' Notice of Arrival should be sent to the Captai of the Port and the Agent.
TUGS: 6 private, 3 of 80 h.p., 1 of 60 h.p. and 1 of 165 h.p. and 1 180 h.p. The Port Authority has two tugs, 1 of 400 h.p. and 1 of 200 h.
BERTHING: 3 Piers available.
No. 1 Pier: Length 158 m., width 16 m., depth alongside 27 ft. – 28 ft
No. 2 Pier: Used only for the loading and discharge of lighters (fishmeal Length 54 m., width 18.40 m. Average depth 4.5 m.
No. 3 Pier: Operated by Siderperu. Length 265 m., width 25 m., dept alongside 28 ft. – 31 ft. There are two bridges for discharging coke an minerals by clamp. (Total capacity 300 t.p.h.)
LIGHTERS: 12 for dry cargo: 2 at 150 tons and 10 at 50 tons. 10 tan lighters with a total capacity of 1,300 tons.
CRANES: 5 cranes: 3×17 tons, 1×13.8 tons and 1×6.25 tons capacity
STEVEDORES: See "Callao".
MEDICAL: Agent arranges emergency attention. Hospital and privat clinic available.
TANKERS: Three zones for load/discharge of fish-oil and lubricants Ship loads fish-oil by barges at anchor. Discharge of fuel when shi anchored to buoys by means of submarine lines.
FRESH WATER: Two barges to supply fresh water to ships, one 40 tonnes and one of 25 tonnes. Fresh water available at Pier No. 1.
FUEL: Available by tanker lorries if special arrangements are made.
CONSULS: Only the Vice-Consul of Spain and Panama.
REPAIRS: Only minor repairs are possible.
DRY DOCKS: "Sima" have a 15,000 ton floating dock.
GANGWAY/DECK WATCHMEN: Watchmen are necessary.
OPENING/CLOSING HATCHES: This job is carried out by stevedores
CUSTOMS ALLOWANCES: Tobacco: 10 packets per person per week Wine and/or Spirits: With approval of Customs, within norma consumption.

CARGO GEAR: Vessel's derricks used, the quay has fixed crane for 50 tonnes and 3 mobile cranes for 15 tons.
REPATRIATION: Facilities for crew changes and arranging any necessary repatriation.
AIRPORT: Port has airstrip, but it is only for national use, not for international flights.
TIME: GMT minus 5 hours, all year round.
HOLIDAYS: Cargo work can be arranged on holidays with an extra 100% charge over basic pay. The only exception is 1st May, on which cargo work cannot be arranged.
TELEPHONES: No arrangements for placing telephones on board. They are about 50 m. from ship.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Needed for both crew and passengers.
REGULATIONS: Not allowed to use wireless when ship is in port. Nor allowed to put any boat on the water without permission of Capitania del Puerto. Not allowed to throw any waste or litter into bay. Not allowed to make unnecessary sound signals.
DEVELOPMENTS: New quays to be built.
GENERAL: *Swell Period:* February/March and June/October.
AUTHORITY: Capitan de Puerto – Direccion Capitania de Puerto Chimbote.

CONCHAN: 12.10 S. 77.00 W.

Tanker Buoy berth about 30 miles South of Callao.
DOCUMENTS: Tankers calling at Conchan must first call at Callao anchorage to be received and cleared by Authorities. Not necessary to call at Callao after discharge as clearance is simultaneous with reception.
PILOTAGE: Private Pilot boards vessel at Callao anchorage and either remains on board or returns to take vessel out, as required by Master.
BERTHING: Vessels moor to buoys. Depth 60 ft. One submarine line of 16 in. reducing to 12 in. at vessel's connection, running 1,000 m. from shore opposite Conchan refinery.
LAUNCH: Launch service between Conchan and Callao or Conchan and Fish Pier at Barranco, southern suburb of Lima, during vessel's stay in port.
GENERAL: Two Customs police and two refinery employees board at Callao and remain on vessel during discharge.

ETEN: 06.56 S. 79.52 W. (Port closed)

Eten is about 348 miles North of Callao. The port is an unprotected open roadstead. All cargo operations are undertaken by lighters. The main activities are the export of sugar and import of fertiliser and general cargo.
PILOTAGE: Not available.
ANCHORAGE: Vessel anchors about 0.5 miles off the Mole Head in 7–8 fathoms.
RADIO: *Arrival Notice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 4 tugs of 80 h.p. each.
LIGHTERS: 13 lighters with a total capacity of 635 tons.
BERTHING: There is a pier for handling barges.
CRANES: 3 steam cranes, 2×2 tons and 1×15 tons. 1 diesel crane of 3 tons capacity.
STEVEDORES: See "Pimentel".
MEDICAL: There is a hospital at Chiclayo 15 km. from the port.
FRESH WATER: Not available.
CONSULS: Vice-Consul of the Netherlands.
GENERAL: *Swell Periods:* Eten being an unprotected open road port it frequently occurs that the port has to be closed due to heavy swell. The swell comes up suddenly and is not subject to any specific period, but it occurs more frequently during June/September and the Easter week.

GENERAL SAN MARTIN: 13.48 S. 76.17 W. (See Plan)

PISCO: 13.43 S. 76.14 W.

PILOTAGE: Compulsory.
RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.
Also see "Callao" – Radio Officer's Report.
TUGS: 16 tugs available. 10 h.p. – 800 h.p.
BERTHING: 1 quay with 4 berths each 175 m. in length. Max. draft 32 ft. (25,000 tons). Cargo is loaded by portable conveyor belts.
LIGHTERS: 28 wooden lighters for general cargo, total capacity 1,800 tons. 5 steel lighters (not immediately available), total capacity 600 tons. 3 lighters for liquid cargoes, total capacity 500 tons.
CRANES: 1×13.61 tons, 1×22.68 tons and 1×6.25 tons capacity.
STEVEDORES: *Working Hours:* 0800 hrs. – 1200 hrs., 1300 hrs. – 1700 hrs., 1800 hrs. – 2400 hrs., 0100 hrs. – 0700 hrs.
109 stevedores available.
MEDICAL: There is a hospital available.
TANKERS: *Submarine Pipe-line:* The pipe-line belongs to Petroperu. Position Lat. 13° 36′ 20″ S., Long. 76° 15′ 54″ W. Length of pipe-line 700 m., diameter 8 in. Pilotage is compulsory. Depth of water 7.5 fathoms. Pumping rate 70-75 t.p.h.
FRESH WATER: Available.
FUEL: Not available.

HUACHO: 11.07 S. 77.37 W.

Huacho is an unprotected open roadstead about 69 miles North of Callao. The main activity is the loading of fishmeal and minerals and discharging of fertilisers.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor in open roads.
RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 4 tugs available, 1 each at 50, 60, 72 and 180 h.p.
LIGHTERS: 29 lighters, total capacity 1,450 tons.
BERTHING: There is a pier for mooring barges, length 223 m.
CRANES: 3×13.60 tons each.
STEVEDORES: See "Pimentel" for working hours and overtime rates.
4 gangs of 9 men each available.
MEDICAL: Assistance available.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* Frequently during the Winter months (May-September).

HUARMEY: 10.06 S. 78.10 W.

Huarmey is an unprotected open roadstead for the loading of fishmeal.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor in the open roads.
RADIO: *Arrival Notice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and Agent.
TUGS: 4 tugs available, 2×145 h.p. and 1 each at 120 h.p. and 165 h.p.
LIGHTERS: 18 at 50 tons each.
CRANES: 1 of 2 tons capacity and 1 mobile crane.
STEVEDORES: See "Pimentel" for working hours and overtime rates.
3 gangs of 9 men each available.
MEDICAL: Assistance available.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* June to August.

ILO: 17.39 S. 71.21 W. (See Plan)

DOCUMENTS: Original Cargo Manifest to be sent by Agency from loading port.
6 Crew Lists.
4 Personnel Effects Lists.
4 Stores Lists.
4 Narcotic Lists.
3 Passengers to Disembark Lists.
3 Passenger Lists.
3 Passengers in Transit Lists.
3 Mail Lists.
3 Vaccination Lists.
1 Maritime Declaration of Health.
Also see "General" before first port.
PILOTAGE: No pilot station; there is a Pilot in the Capitania del Puerto, who should be notified in advance by Agents. 2 hours' notice of ETA required. Pilot boards at anchorage 800 m. from extension of the SPCC Quay.
Shipmaster's Report: July 1986. Tanker.
Pilot compulsory. All Pilots for tankers calling Peruvian ports are situated in Callao. An accurate ETA to Callao Agent is very important in order to provide Pilots with sufficient time to fly to the appropriate port of call.
Pilot boards approximately 1 mile off the berth. The Pilot stays onboard the vessel if 2 or more ports are called at in Peru.
ANCHORAGES: 400 m. to the North of the end of the SPCC Quay, in 15 fathoms depth.
RESTRICTIONS: Port closed during heavy swell. Berthing during daylight only. Unberthing day and night.
MAX. SIZE: See "Berthing".
HEALTH: Pratique given by Captain of the Port. In cases of suspected illness a doctor should be requested in advance. When the ship arrives from another Peruvian port Free Pratique is automatic.
RADIO: Cables connect with National Communications network. ETA sent to Port Authority and to Agencies.
TUGS: 1×690 h.p. tug available.

BERTHING: Berthing anytime. There are two piers, one belonging to Southern Peru Copper Corp. and one to ENAPU.
SPCC: Two vessels are able to berth alongside. Length of pier 520 ft., width 60 ft. Depth alongside varies from 35 ft. to 50 ft.
ENAPU: Length of pier 300 m., width 27 m. Depth alongside varies from 18 ft. to 60 ft. Vessels able to berth both sides. South side depth 18 ft. at inner end, 54 ft. at outer end. North side depth 24 ft. inner end, 60 ft. outer end.
STEVEDORES: Stevedores come under the Capitania del Puerto and are ordered by Agents.
Loading Rates: Copper sheets loaded 65 tonnes/p.h. Fish-flour loaded at 100 tonnes/p.h. in an 8-hour shift.
Working Hours: 0700 – 1200, 1300 – 1600, 1700 – 2400, 0100 – 0700 hrs. 10 gangs available of 9 men each.
MEDICAL: Medical assistance ordered by Agents. Hospital "El Centro de la Salud", and the Saint Geronimo Hospital.
TANKERS: *Ilo:* Discharge line diameter 10 in., 2 lines, connection to the ship's manifold 8 in. Connection and flexible line working pressure 100 lb. A buoy mooring berth.

Depth of water 40 ft. Vessels of Petroperu have preference.

Also see "Shipmaster's Report" – July 1986.
Punta Tablones: Discharge line diameter 12 in., connection to the ship manifold 8 in. Flexible connection line, working pressure 100 lb. or 400 b.p.h. A buoy mooring berth.

Max. length 750 ft. Depth of water 40 ft.
DENSITY: Salt water.
FRESH WATER: Available.
FUEL: None available.
CONSULS: None.
REPAIRS: Some minor repairs.
GANGWAY/DECK WATCHMEN: Watchmen provided by Agents when necessary.
OPENING/CLOSING HATCHES: Strictly forbidden for the crew; must be done by stevedores.
CERTIFICATES: When the ship comes from foreign port it is compulsory to produce Certificate of Gross Tonnage.
CUSTOMS ALLOWANCES: Tobacco: 10 packets per person. Wine and/or Spirits: Sufficient for meal times. Normal crew consumption only.
REPATRIATION: There are facilities for effecting crew changes and arranging any necessary repatriation. Those who are going to be repatriated must have a permit from the Port Authority to be allowed ashore.
AIRPORT: Ilo Airport, 8 km. Scheduled flights twice a week on Tuesdays and Saturdays. Regular airport in Tacna, 1.5 hours by taxi, scheduled flights twice daily to Lima.
TIME: GMT minus 5 hours. No alterations during the year.
HOLIDAYS: 1st January (New Year); Maundy Thursday and Good Friday; 1st May (Labour Day); 29th June (Saint Peter and Saint Paul); 28th and 29th July (Motherland Days); 30th August (Saint Rosa of Lima); 1st November (All Saints Day); 8th December (Our Lady); 25th December (Christmas).
Holidays which are not in the Calendar but are considered Holidays with reference to payments to the workers: 6th January (King's Day); 19th March (Saint Joseph); Corpus Christi (varies every year); The evening of the 24th June (India man day); 30th July (Motherland Day); 15th August (Feast of the Assumption); 24th September (Las Mercedes); 12th October (Race Day); 27th November (Tarapaca Battle); 9th December (Ayacucho Battle).
POLICE/AMBULANCE/FIRE: Southern Peru Copper Corporation operate fire service. Police, tel. No. 3; Ambulance, tel. No. 3.
TELEPHONES: No arrangements for placing telephones on board.
SHORE LEAVE: Crew members allowed ashore and identify themselves with cards signed by Capitania del Puerto given through ship's Agents.
IDENTIFICATION CARDS: Agents arrange for cards to be signed by Port Authority for each crew member.
DELAYS: Only delays when quay is occupied by 2 ships. In the load/unload operations the port can attend to 4 ships simultaneously and 4 more when new quay (now being built) is completed.
DEVELOPMENTS: Terminal quay of 900 ft. long is now being built.
GENERAL: Tank cleaning and well cleaning must be done 5 miles leeward of port. Not allowed to unload explosive cargo.

SHIPMASTER'S REPORT: July 1986.
Anchorage: Approximately 1.2 miles, 280° from the Cape in front of the hotel.
Approaches to the Berth: No difficulties encountered.
Immobilisation of Engines: Permitted.
Brief Description of Berth: Conventional buoy mooring.

4 buoy berth.

3 buoys astern and 1 port side ahead.

Both anchors to be used.

Starboard anchor 8 to 9 shackles and port anchor approximately 6 shackles in the water.

2 lines to each buoy. The 2 headlines and the first line aft (centre buoy) to be long and of good quality.

Maximum draft 12.0 m. to 12.5 m. and this making allowance for swell as the minimum depth of water in the area of the stern buoys is 15.2 m.
Charts: Approaches to Matarani and Ilo, U.S. chart No. 22182.

Peru Hidronav Chart No. 2359.
Tugs: None.
Berthing: Vessel to be moored in an S.E. direction.
Density: 1025.
Description of Shore Line System: Position of connections amidships on port side. 2×8 in. hoses available. Connecting and disconnecting of hoses is carried out by shore gang.

Maximum back pressure at the manifold allowed by Petroperu is 7.0 kg./sq.cm.

Discharge rate approximately 1,150 cu.m.p.h. Lines to be flushed with water after completion of discharge.
Availability of Bunkers, lubricants and water: None.
Availability of Provisions: Fresh vegetables and fruits in limited supplie
Points of Interest: All documents, oil record books and cargo papers ar checked very carefully by the Authorities.

Shore leave is possible by launch to Ilo port.

SHIPMASTER'S REPORT: April 1988.

We berthed at night without problems, but the buoys are unlit and th mooring boat had no searchlight. Bridge wing projectors or the Sue light would assist in securing lines to the mooring buoys. These are fitte with hooks and lashings are not used.

Following moorings were used:

Starboard Anchor – 6 shackles.

Port Anchor – 3 shackles.

2 lines to port head buoy (60 m.).

2 lines to port quarter buoy (60 m.)

2 lines to stern buoy (25 m.).

1 line to starboard quarter buoy (60 m.).

Ship's head in berth 237°. Depth in berth 20 m. aft, 23 m. forward. 2×8 in. hoses were connected on the port side.

The berth was well sheltered from South Easterlies by the headlan but quite open to the North and West.

AUTHORITY: Capitan del Puerto, who is a Navy Officer.

LA PAMPILLA: 11.55 S. 77.09 W.

Tanker Buoy Berth about 30 miles North of Callao.
DOCUMENTS, ETC.: As for Callao.

Tankers calling at La Pampilla must first call at Callao Anchorage t be received and cleared by Authorities. Not necessary to call Calla after discharge as clearance simultaneous with reception.
PILOTAGE: Pilot boards vessel at Callao anchorage and either remain on board or returns by launch to take vessel out, as required by Maste
BERTHING: Vessels moor to buoys. 1 submarine line of 18 in. reduce to 10 in. at vessel's connection running 1,500 m. from shore opposit La Pampilla refinery. Max. size 200,000 d.w.t. or 250,000 d.w.t. with pa load.
LAUNCH: Launch service between La Pampilla and Callao durin vessel's stay in berth.
GENERAL: 2 Customs police and 2 refinery employees board at Calla and remain in vessel during discharge.

MATARANI, including Mollendo: 17.00 S. 72.07 W.

(See Plan

Matarani is a berth port. Main activity: loading of minerals, wool, coffee skins, tin-ingots, discharging general cargo. Matarani is an importa transhipment port for cargo to and from Bolivia.
PILOTAGE: Compulsory.
RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to th Captain of the Port and the Agent through Radio Station in Naval Statio frequencies as per Callao.
TUGS: 1×780 h.p., 1×690 h.p. and 1×800 h.p.
BERTHING: 1 quay with 4 berths. Length 540 m., width 20.15 m Vessels of 570 ft. length can berth. Depth alongside 30 ft.

Berth 1A, 1B and 1C each 150 m. length. Berth 1D length present 90.50 m., but being lengthened to 132.9 m. length.
CRANES: 5×10 tons, 4×6.25 tons and 1×20 tons lifting capacity.
MEDICAL: A hospital is available.
STEVEDORES: *Working Hours:* 0800–1200, 1300–1700, 1700–2400 0000–0600 hrs.

9 gangs available of 15 men each.
TANKERS: Buoy Berth at Mollendo. See "Shipmaster's Reports".
FRESH WATER: Available.
FUEL: Not available.
GENERAL: *Swell Period:* From June to August.
DEVELOPMENTS: A Ro/Ro berth is under construction at the Southe end of Muelle de Atraque.

SHIPMASTER'S REPORT: July 1986.
Berth: Mollendo – Conventional buoy mooring in Position La 17° 02′ 18″ S., Long. 72° 00′ 19″ W.
Radio Advise prior to Arrival: In order to avoid heavy fines Master mu send a cable or telex to Paita, Mollendo or Callao Radio Statio according to Peruvian Regulations (for details see "General" – befor first Port).

Copies of these cables to be handed over to Harbour Master on arriva

It is difficult to contact the above mentioned station by telegraphy.

Telex is recommended. Callao/OBC3. Telex: 0036-26069PE Costca Mollendo/OBF4. Telex: 0036-59644PE Kececomo.

Documents: Original Cargo Manifests to be sent by Agency from loading port.
- 6 Crew Lists.
- 6 Personal Effects Lists.
- 6 Stores Lists.
- 6 Narcotic Lists.
- 6 Passengers to Disembark Lists.
- 6 Passenger Lists.
- 6 Passengers in Transit Lists.
- 6 Animal Lists.
- 6 Mail Lists.
- 1 Vaccination List.
- 1 Maritime Declaration of Health.

Pilot: Compulsory. All Pilots for tankers calling Peruvian ports are situated in Callao. An accurate ETA to Callao Agent is very important in order to provide Pilots with sufficient time to fly to the appropriate Port of Call. Pilot boards approximately 1 mile off the berth.

Restrictions: Berth is closed during heavy swell. Berthing recommended during daylight only. Unberthing day and night.

Anchorage: Approximately 1 mile off the berth.

Approaches: No difficulties.

Immobilisation of Engines: Permitted.

Description of Berth:

Conventional buoy mooring.

4 buoy berth.

3 buoys astern and 1 port side ahead.

Both anchors to be used.

Starboard anchor approximately 8 shackles and port anchor approximately 6 shackles in the water.

2 lines for each buoy. The 2 headlines and the first line aft (centre buoy) to be long and of good quality.

Maximum draft approximately 16 m. This draft makes allowance for heavy swell as the depth of water is approximately 21 m.

Charts: Approaches to Matarani and Ilo U.S. Chart No. 22182.

Peru Hidronav No. 2337.

Tugs: None.

Berthing: Vessel to be moored in a S.E. direction.

Density: 1025.

Shore Line: Position of connections midships, port side. 2×8 in. hoses available.

Connecting and disconnecting of hoses is carried out by shore gang.

Maximum back pressure at the manifold allowed by Petroperu is 7.5 kg./sq.cm. Discharge rate approximately 930 cu.m.p.h.

Lines to be flushed with water after completion of discharge.

Bunkers, Lubricants, Water and Stores: None.

Tank Cleaning/Dirty Ballast Facilities: None.

Points of Interest: All documents, oil record books, and cargo papers are checked very carefully by the Authorities.

Shore leave possible by launch to Matarani.

SHIPMASTER'S REPORT: April 1988.

Berth: Mollendo.

We berthed at night and the same remarks apply (See "Ilo", Shipmaster's Report, dated April 1988) and are even more relevant. The mooring boat was a small, open, double ended fishing boat, not fitted with means for going astern. It is doubtful if this launch could handle mooring wires, since it can only handle one rope at a time. Mooring buoys are unlit and fitted with hooks. Lashings are not used.

The following mooring was used:
- Starboard Anchor – 8 shackles.
- Port Anchor – 7 shackles.
- 2 lines to port head buoy (80 m.).
- 2 lines to port quarter buoy (140 m.).
- 2 lines to stern buoy (100 m.).
- 1 line to starboard quarter buoy (140 m.).

Ship's head in berth 187°. Depth in berth 24 m. aft.

This is an open sea berth, subject to swell. Moorings are liable to chafe. 2×8 in. hoses were connected on the port side. We discharged Diesel No. 2, other grades handled are fuel oil, Jet, Mogas and gas oil.

Peruvian ports in general do not accept Crew Lists, etc., in English, the agent will provide the appropriate forms in Spanish.

The port officials board with the pilot.

PACASMAYO: 07.24 S. 79.35 W.

DOCUMENTS:
- 3 copies Voyage Log Extract.
- 2 originals and 5 copies of Entry/Exit Declaration, endorsed by Consul.
- 8 copies of Passenger Lists for the Port.
- 8 copies of Transit Passenger List.
- 4 copies of Stores List.
- 4 copies of Personal Belongings Manifest.
- 13 copies of Cargo Manifest.
- 1 Maritime Health Declaration.
- 2 Crew Lists.
- 1 Vaccination List.

When this is the first Peruvian port, Gross Tonnage Certificates.

When having cargo for the port, Statement of Cargo, endorsed by Consul.

When Pacasmayo is the first or last port called, Lists or Manifests of Cargo in Transit (2 copies each).

Also see "General" before first port.

PILOTAGE: The port has no Pilots as it is an open bay.

ANCHORAGE: To the South of an East-West line from the quay, as there are obstacles to the North.

APPROACHES: Reference points are the lighthouse of Cruz Punta Pacasmayo with a range of 12 miles, and during the day the cylindrical tower of cement factory with a height of 50 m. situated in the S.E. of the bay. On the head of the quay there is also a small iron tower of 9 m. height with a permanent red light of 2 miles visibility. The quay is very old and only flat boats can moor.

MAX. SIZE: Wide anchorage without problems concerning length or breadth. Recommended draft 24 ft., but it is possible to find 6, 8 or 10 fathoms towards the West. Current from South to North at an average of 6 knots.

HEALTH: Sanitary control is carried out by the health doctor who comes on board with port officials. Normally, Masters notify any suspected illness or any other information by telegraph.

TUGS: They only bring in or take out flat bottomed barges to the vessel once the vessel is anchored.

BERTHING: Vessels anchor in open bay. There is an Iron Quay for the use of barges, length 533 m., width 10 m., depth at West end 3 m.

LIGHTERS: 9 lighters with a total capacity of 400 tons.

CRANES: 1×1 tons, 2×3 tons.

STEVEDORES: Agents order the number of gangs required. These gangs work at a tariff hour/ton and the amount is controlled by the Port Captain. The number of gangs (9 men each) depends on loading/discharging speed required and on the number of holds and winches available. For overtime rates see "Pimentel".

MEDICAL: Can be provided by Centro Preventivo del Area de Salud or by Hospital Regional de Chepen, 35 km. from port (150 beds).

DENSITY: Salt water.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: There are no Consuls in the port.

REPAIRS: There is a small workshop in the port for minor repairs such as soldering, etc. There is no foundry.

DRY DOCKS: Nearest at Callao.

OPENING/CLOSING HATCHES: Carried out by the stevedores.

SHIP CERTIFICATES: Derat or Fumigation Certificate; Vaccination Certificates for Crew and Passengers; Tonnage Certificate when coming from abroad.

CUSTOMS ALLOWANCES: Only tobacco, wines, spirits required for normal consumption, which must be included in vessel's Stores List.

CARGO GEAR: Ship's gear used.

REPATRIATION: Members of crew and passengers can be repatriated subject to Port Authorities' permission and passport control.

AIRPORT: There is a small emergency airport 2 km. from the port where planes can land.

TIME: GMT minus 5 hours.

HOLIDAYS: Holidays have been restricted. The national official holidays are: 27th and 28th July (National Independence Days); 1st January (New Year); 25th December (Religious Fete); Maundy Thursday and Good Friday; variable days and 1st May (Workers' Day).

POLICE/AMBULANCE/FIRE: Police 2126; Ambulance 2225; Fire 2081.

TELEPHONES: It is not possible to install telephones on board. Communication by walkie-talkie radio.

SERVICES: There is no tank-cleaning equipment and the discharge of tank washing and any other kind of garbage is forbidden, as the bay is a bathing area.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required unless leaving the vessel.

DELAYS: The vessel is anchored on arrival. Delays can occur due to heavy sea or rain in case of cement loading.

DEVELOPMENTS: When the mines of Micchiquillay (copper) start working, the loading capacity of the port has to be 100,000 tons per month. Consequently it is planned to build a quay for minerals or a floating island 6 miles from the port for loading raw materials by pipelines.

GENERAL: Fresh and dry provisions can be supplied, such as meat, poultry, vegetables and fruits.

AUTHORITY: Captain of the Port.

PAITA: 05.05 S. 81.07 W. (See Plan)

DOCUMENTS:
- 5 Copies Peruvian "Declaracion de Entrada".
- 13 Crew Lists.
- 5 Cargo Manifests, from each port where cargo loaded, or negative.
- 5 Copies of each Bill of Lading.
- 3 Personal Effects Lists.
- 13 Stores Lists.
- 1 Tonnage Certificate from first and last port.
- 1 International Maritime Health Certificate.
- 13 Passenger Lists, disembarking, or negative.
- 13 Passenger Lists, in transit, or negative.
- 1 Clearance from last port.
- 1 Sealed envelope from Peruvian Consulate addressed to Customs.

(Documents should be visaed by Peruvian Consulate.)

Also see "General" before first port.

PILOTAGE: Compulsory. There are two Pilots, on 24 hour service. Arranged by Agent. The boat is an old disembarking launch, hoisting blue flag with a white "P" Pilot will board at anchorage after Free Pratique has been granted by Port Captain and Health Authorities.

ANCHORAGE: Recommended in Lat. 5° 03.5′ S., Long. 81° 06′ W.

RESTRICTIONS: Draft restricted to 31 ft. at low water.

MAX. SIZE: Length and breadth practically unlimited.

HEALTH: Agent will notify Health Authorities about the vessel's arrival.

RADIO: Recommended Balboa Radio.
Arrival Notice: 24 hours' Notice of Arrival should be sent to the Captain of the Port and Agent.
VHF: Pilots on Channel 16, working on Channel 14.
TUGS: 1 tug of 850 h.p., 1 tug 360 h.p. and one launch 60 h.p. used by the Pilot.
BERTHING: One finger pier, length 475 m. width 36 ft. Four berths available, depths are as follows:

No. 1A (North-West Berth)	32.0 ft.
1B (North-East Berth)	32.0 ft.
1C (South-West Berth)	23.8 ft.
1D (South-East Berth)	22.9 ft.

A safety margin of 3 ft. should be observed. It is advisable to request (from Pilot) Berths "B" or "D", if empty, due to the prevailing winds. The berths have good fenders.

Cranes with capacity of 25,000, 15,000 and 10,000 lbs. available.
STEVEDORES: Arranged by Agent at 24 hours' notice.
Working Hours: 0800 – 1200, 1300 – 1700, 1700 – 2400 and 0000 – 0700 hrs.
Night Work: Possible, as long as it is ordered in plenty of time.
10 gangs of 9 men each available per shift.
MEDICAL: There is a local hospital with all facilities.
TANKERS: There are 4 mooring buoys 0.25 m. East of the finger pier. Facility is the property of Petroperu. Oil loaded and discharged by submarine pipe-line.
DENSITY: 1030.
FRESH WATER: There are 3 drinking water hydrants on each side of the pier. Vessels require pumps to take on water from the storage tank (capacity 14 tons).
FUEL: Not available.
FIRE PRECAUTIONS: Port Authority fire equipment stationed at the end of the pier.
CONSULS: Ecuador.
REPAIRS: No facilities.
STORES: Fresh provisions available.
GANGWAY/DECK WATCHMEN: Available on request.
CERTIFICATES: Not requested.
CUSTOMS ALLOWANCES: Two cartons and one bottle per person.
CARGO GEAR: No additional requirements.
REPATRIATION: Allowed on request to the Port Captain.
AIRPORT: Piura Airport 55 km. with domestic flights to Lima International Airport.
HOLIDAYS: 1st May only.
IDENTIFICATION CARDS: Not required.
GENERAL: Painting and chipping ship's side restricted. Very strict concerning rat-guards, disposal of garbage, etc.
AUTHORITY: Captain del Puerto.

PIMENTEL: 06.50 S. 79.56 W. (See Plan)

Pimentel is an unprotected open road port, loading/discharging only from/into lighters. Clearance is possible day and night, including Sunday and holidays, but of course with overtime additional. Main activity: Sugar export, import of fertilisers and general cargo.
PILOTAGE: Not available.
ANCHORAGES: Vessels usually anchor about 1.5 miles off the Pier Head in 7 – 8 fathoms.
RADIO: *Arrival Notice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 2×82 h.p., 2×120 h.p. and 2×134 h.p.
LIGHTERS: 15 lighters with a total capacity of 1,170 tons.
CRANES: On the mole there are 3 diesel cranes each 3 ton capacity, 3 steam cranes with 4, 6 and 15 ton capacity. Maximum dimensions of cargo handled 27 ft. (length)×15 ft. (wide)×21 ft. (height).
STEVEDORES: *Working Hours:* 0700 – 1100 and 1300 – 1700 hrs. Overtime (plus 100%) 1100 – 1300 and 1700 – 2400 hrs. Overtime (plus 200%) 0000 – 0700 hrs.

On Sundays and holidays an additional 100% to the above-mentioned tariffs.
MEDICAL: There is a hospital at Chiclayo 15 km. from the port.
TANKERS: *Submarine Pipe-line:* Diameter 8 in. max. draft 18 ft. 1 pipe-line for clean products and 1 for dirty products. Length of pipe-line 1,770 m.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: Vice-Consul of the Netherlands.
SURVEYOR: Mr. Manuel S. Reyes H., sub-agent of Lloyd's of London.
GENERAL: *Swell Periods:* Pimentel being an unprotected open road port it frequently occurs that the port has to be closed due to heavy swell. The swell comes up suddenly and is not subject to any specific period, but it occurs more frequently during June-September and the Easter week.

PUERTO BAYOVAR: 05.47 S. 81.03 W. (See Plan

SHIPMASTER'S REPORT: December 1985.

Puerto Bayovar is operated by both, Petroleos Del Peru (PETRO-PERU and Empresa Nacional de Puertos S. A. (ENAPU). No breakwater a is a natural sheltered harbour. However, there is a constant mild swe which causes the vessel to gently surge continuously at the berth. Th current is mild and at the berth flows in a direction of about 300°. Th port consists of a jetty, shore tanks and the main office building. Ther are no facilities of any kind nearby. The nearest town is Piura, which i 125 km. away (2 hours by car).

The port has 15 steel tanks to store approximately 1,700,000 barre of crude. In addition there is a basin with 50,000 tonnes capacity fo dirty ballast.

All the surrounding land is barren and dusty, and according to th Pilot there is negligible rainfall throughout the year.

Except for the Saybolt Inspector, nobody else speaks passab English. However, they understand all the technical terms and loadin was not a problem. They keep a strict log of all timings and every sma detail is put in the Time Sheet.
DOCUMENTS:
4 copies General Statement (these will be made out by the Ager after he boards along with the Authorities).
5 copies Cargo Manifest. If none then "Nil" lists.
5 copies Cargo Transit Manifest. If none then "Nil" lists.
10 copies Crew List.
10 copies Passenger List.
10 copies Crew Declaration.
10 copies Ship's Stores List.
10 copies Accompanied/unaccompanied Baggage Lists. If none the "Nil" lists.
In addition the vessel must have ready:
Insurance Policy on Hull and Machinery.
Covering Contract of P & I.
Oil Record Book.
IMPORTANT: 1 copy of the statutory cables sent to the Direccio General de Capitanias y Guardacostas regards entering and plyin within Peruvian waters. If these messages not sent, a fine c U.S. $1000 – 5000 is levied by the Peruvian Authorities.
See "General – Ship Reporting" before first port.
PILOTAGE: Pilotage is compulsory for berthing the vessel. Howeve pilotage is *not* compulsory for proceeding to the anchorage within th boarding area, or elsewhere. Frequently, when sending the ET/ messages by cable to the Harbour Authorities they assume that a pilc is required to anchor the vessel. This implies an extra charge c U.S.$1000. Since the anchoring is straightforward, a Pilot is nc necessary, and the Master should specifically state that a Pilot is nc required if the vessel is to proceed to anchor. Also, the Master mus refrain from asking any information about pilotage in his ETA message When berthing the Pilot will board within the boarding area.
ANCHORAGE:
Boarding Area: There is a boarding area bounded by the following co ordinates:

Latitude (South)	Longitude (West)
5° 46′ 08″	81° 00′ 54″
5° 45′ 43″	81° 00′ 54″
5° 45′ 43″	81° 01′ 24″
5° 46′ 08″	81° 01′ 24″

The vessel must be within these co-ordinates for the Harbou Authorities to board and clear the vessel. If vessel is asked to ancho it is better to anchor directly in the boarding area.

The depth in the boarding area is approximately 26 m., rocky bottom We used 7 shackles on deck to be safe. The wind sometimes worke up to Force 4 – 5, but, coming from land, caused no heavy swell.
MAX. SIZE: 250,000 d.w.t. Max. LOA 400 m. Max. draft 21.95 m No limit on beam. No restriction as to minimum size of vessel.
HEALTH: Authorities board at the anchorage.
RADIO: We sent our ETAs to our Agent and asked them to inform a parties, which they did.
TUGS: 3 Tugs available. 'Oro Negro' and 'Bappo' 1,852 h.p. an 'Corvina' 150 h.p.
BERTHING: *Mooring:* Vessels are always moored port side to, excep in extreme cases. Reason is that after being loaded it is very difficult t turn the vessel because of the tugs power, wind and current.

Tugs made fast were 'Corvina' on starboard bow, and 'Oro Negro' o starboard quarter, one ship's line to each tug. The forward tug wa ineffective.
Note: The tugs cause considerable pollution around the vessel and it i good to bring this to the notice of the Terminal if the vessel is to avoi difficulties later on.

When 100 m. off the berth, starboard anchor was let go to 2 shackle on deck and then paid out as necessary while coming alongside unt 5 shackles on deck. After letting go anchor, the tugs will then push th vessel gently onto the berth. As it was a calm day, mooring was eas but according to the Pilot, when the wind blows (mostly from a directio of 170° – 140°), it builds up the current in the same direction which se the ship's stern onto the berth. Pilot wanted the mooring arrangeme as 2 head/stern lines, 2 breast and 2 springs, but we changed it 3/3/2, due to the constant movement of the vessel at the berth. Moorin have to be regularly tended. First ropes sent out are 2 breast rop each forward and aft.
Berth: There is only one berth. It is a "T" shape with the manifold at th head and 8 platforms (4 on each side) along the arms. When the sh is moored she will head in a direction of 322°. There are quick-releas hooks on each platform, and also an electric capstan on each. Th fenders are good and keep the vessel 2 m. off the pier. There a 4 loading arms, they are modern Chicksan hydraulic type. No shi derricks are required. Due to a constant mild swell, the ship continual

surges gently at the berth. The pier is provided with an elevator-type gangway and also an MOT ladder. We used the MOT ladder for fear of damaging the other which was previously damaged by another vessel and took a long time to repair.

LOADING: *Cargo:* There is only one type of cargo exported which is Loreto Crude.

Source: Received through a pipe-line 825 km. long, into the shore tanks on top of the hill next to the jetty.

Loading Rate: Loading rate through each of the 4 loading arms is 25,000 bbls.p.h., making a total capacity of 100,000 bbls.p.h. However usually only 2 – 3 arms are connected.

Method: Loading is by gravity only, from the shore tanks. The rate is readily adjusted to suit the vessel's requirements.

Flanges: Flange sizes are 16 in. diameter.

API: Varies between 22 – 24. Very occasionally API 21. We loaded API 23.4.

Load Temperature: Varies around 84°F.

B S & W: 0.2%

Flash Point: +15°C

Pour Point: −5°C

After cargo is loaded, there is a usual delay for inspection, calculations and waiting for shore papers to arrive, amounting to 5 hours. Thereafter 1 long blast is given on the ship's whistle to call the Pilot and the tugs.

MEDICAL: There is a First Aid post only. All hospitalisation and other cases must be sent to Piura.

DENSITY: Sea Water, 1025.

FRESH WATER: Not available.

GANGWAY/DECK WATCHMEN: See "General-Security".

REPATRIATION: *Transportation/Repatriation:* Agent must be given advance notice so as to arrange car/bus to come from Piura to pick-up personnel. Takes about 2 hours. There is a daily flight from Piura/Lima which takes about 1.5 hours.

Charges for transportation to Piura are as follows:

1 car for 5 passengers approx. U.S.$80.00

1 bus for 12 passengers approx. U.S.$150.00

Waiting period per hour approx. U.S.$6.00

Agent said these charges were for a round trip, but cannot be sure.

Agents report that they have carried out quite a few crew changes successfully, but advance notice must be given.

AIRPORT: At Piura, distance 125 km.

GENERAL: *Security:* No one except the terminal representatives must be allowed on board. Keep all unused accommodation and stores doors locked. Absolutely no one must be allowed to stroll around in the accommodation, especially at night, no matter what their excuse. Only 1 shore guard may be allowed on board and he must be kept at the gangway. During our stay, at night, while the Master was on deck attending to problems, 3 guards entered his cabin. 2 guards kept a lookout while the 3rd guard was rummaging through the drawers. They were caught by surprise and taken to a room and searched. After that they were made to leave the ship. No case was made.

Note: Nobody boards the vessel while at anchor.

Cash: As much advance notice as possible required. 2% will be deducted from the amount to be delivered to cover special insurance for theft, assault, etc.

Fresh Provisions: Restricted quantities available from Piura, but Agent must have as much advance notice as possible.

Sea Water Temperature: Just prior to arrival the sea water temperature was 26°C. After anchoring, and throughout our stay the temperature was around 18°C – 19°C.

Agent: Our Agents were extremely helpful, and very prompt in their telex replies.

Fines:

1. If vessel comes alongside pier without previously informing the Port Authority of having Dangerous cargo aboard U.S.$2,000.
2. If vessel does not immediately inform the Port Authority of any emergency on board the vessel U.S.$500.
3. If vessel discharges any bilge water U.S.$1,000.
4. If vessel throws any garbage overside, in each case U.S.$500.
5. If vessel discharges water onto the pier U.S.$500.
6. If vessel discharges water onto any warehouse U.S.$500.
7. If any repairs carried out which immobilise the vessel U.S.$1,000.
8. If vessel berths, unberths, shifts or comes alongside another vessel without Pilot's assistance, in each case U.S.$500.
9. If vessel uses welding machines on deck, paints or scrapes hull without Port Authorities' permission U.S.$500.
10. If vessel does not have rat-guards on each line, for each unguarded line per day U.S.$20.
11. If vessel does not have 1 man constantly at duty to attend to any emergency on board U.S.$100.
12. If vessel's auxillary pumping equipment not functioning U.S.$150.
13. If vessel does not have cargo protection nets during loading or unloading, for each net not rigged per day U.S.$20.
14. If vessel's Master sets aside the Pilot's assistance in spite of the Pilot being on board U.S.$500.
15. If vessel's anchoring system is not working U.S.$200.
16. If vessel's fire-fighting equipment is not working U.S.$250.
17. If unused anchors are not housed during loading or unloading of inflammable cargoes in bulk U.S.$70.
18. For pollution of pier or water with funnel soot U.S.$200.

PUERTO CHICAMA: 07.42 S. 79.26 W.

Puerto Chicama is about 295 miles North of Callao. Fishmeal is loaded from lighters in an open roadstead.

PILOTAGE: Not available.

ANCHORAGE: Vessels anchor about one mile from the Mole.

RADIO: *Arrival Advice:* Advise general Agents in Lima who will telephone Port Agents.

TUGS: 3 tugs available, 1 of 65 tons and 2 of 80 tons each.

BERTHING: 1 Pier, length 324 m.

LIGHTERS: 20 lighters with a total capacity of 1,000 tons.

CRANES: 4 cranes, 2 of 2 tons, 1 of 4 tons and 1 of 6 tons.

STEVEDORES: Working hours are from 0700 – 2400 hrs. These hours may be exceeded to complete loading. Five gangs of 9 men are available.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Swell Period:* During the months of June, July and August.

SALAVERRY: 08.13 S. 78.59 W. (See Plan)

DOCUMENTS: See "Callao".

PILOTAGE: Compulsory.

RESTRICTIONS: Harbour entrance is sand and liable to silting. Advisable to check draft requirements in advance, as depths are subject to latest dredging. Designed depths: Entrance channel 11.0 m. Basin 10.0 m. Berths 11.0 m.

MAX. SIZE: Approx. 25,000 d.w.t. with up to 29 ft. draft. Draft varies greatly and quickly due to heavy constant sanding, although dredging is practically continuous.

HEALTH: Cable Agent requesting Free Pratique. Agent must be notified in advance if disease suspected on board.

RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 4 tugs available, 1 each at 690 h.p., 190 h.p., 85 h.p. and 40 h.p.

BERTHING: *No. 1 Pier:* Length 225 m. Vessels able to berth both sides. Max. draft 28 ft. There are pipes installed for the discharge of liquids and loading of molasses and alcohol.

No. 2 Pier: Length 230 m. Vessels able to berth both sides. Max. draft 28 ft. This pier is specially for the loading of sugar in bulk, 2 loading bridges available, loading rate 300 tonnes/p.h. each.

CRANES: 1×22.68 tons, 1×13 tons, 2×6.25 tons and 1×4.5 tons.

STEVEDORES: *Working Hours:* 0700 – 2300 hrs. Sugar and molasses in bulk loaded 24 hours a day. 10 gangs available of 9 men each.

MEDICAL: At Trujillo, 15 km. from the port.

TANKERS: *Submarine Pipe-line:* Length 700 m., diameter of 10 in., depth 26 ft.

FRESH WATER: Available. Capacity of shore tank 800 tons.

FUEL: Not available.

CONSULS: Nearest at Callao/Lima.

REPAIRS: Workshops available.

GANGWAY/DECK WATCHMEN: Recommended.

CUSTOMS ALLOWANCES: Any amount held over normal consumption may result in Customs search being imposed.

HOLIDAYS: Only 1st May when work is not available.

IDENTIFICATION CARDS: Supplied by Agent and stamped by Immigration. Required for all crew members.

GENERAL: Due to constant swell and undertow which, during Winter months, May/September, may even close port, it is recommended vessel moor with greatest possible number of synthetic lines which must be constantly adjusted, otherwise usual line breakage will increase.

SAN NICOLAS: 15.14 S. 75.14 W. (See Plan)

LOCATION: The port of San Nicolas Bay is located between the parallels of 15° 09′ 30″ S. and 15° 14′ 30″ S.

The harbour and its approach were surveyed in 1962 by the Peruvian Navy Hydrographic Service and the following charts were published in 1965: Chart 2218 shows the San Juan and the San Nicolas Bay, Chart 2220 shows the Southern part and the pier area of San Juan Bay. Chart 2231 shows the Southern part and the pier area of San Nicolas Bay.

A vessel is considered to be an "arrived vessel" when, after entering San Nicolas Bay, she has arrived at pilot station (1 mile North of Pier Head).

DOCUMENTS: The following documents are required for presentation to Port Authorities on arrival and departure:

On Arrival:

Type of Documents	Total	Port Capt.	Customs	Immi-gration	Agent
Clearance from previous port.	1	1	—	—	—
Health Declaration (Declaracion Maritima de Sanidad). World Health Organisation Form. Reglamento No. 2 Anexo 5. (Master may prepare this upon arrival on form furnished by Agent if none available on board).	2	1	—	—	1
General Declaration Form No. 1 (Declaracion General). Instructions on reverse side of form to be provided by Agent.	5	1	2	—	2
Cargo Manifest (Sobordos) Form No. 2, for San Nicolas.	4	1	2	—	1
Cargo Manifest in Transit. (If there is any cargo on board).	3	1	1	—	1
Crew List Form No. 3. Instructions on reverse side of form.	5	1	2	1	1
Passenger List Form No. 4. To San Nicolas from all ports of call or statement that there are no passengers for San Nicolas.	5	1	2	1	1
Passengers Baggage Declaration. If there is any (itemised list).	4	1	2	—	1
Ship's Store Declaration (Store List/Bazaar List) Form No. 5, including itemised list of slopchest. It is most important that exact quantities of all stores be shown. Vessels at time of reception by Customs Officer will have physical check made, all quantities found in excess of those listed will be confiscated and vessel fined.	5	1	2	—	2
Crew's Personal Effects Declaration. It is most important that all cigarettes, tobacco, wine, spirits, radio sets, binoculars, cameras and all new articles in possession of Officers and crew be shown in this declaration.	4	1	2	—	1
Postage Manifest.	2	1	—	—	1
*P&I Certificate (copy).	1	1	—	—	—
*Hull Insurance Certificate (copy).	1	1	—	—	—

**Note:* If vessel does not have on board, Owners have to telex, giving name and number of companies covering them to prevent fines.

On Departure:

Type of Documents	Total	Port Capt.	Customs	Immi-gration	Agent
Health Declaration (Declaracion Maritima de Sanidad). World Health Organisation Form, Reglamento No. 2, Anexo 5. (Master may prepare this upon arrival on form furnished by Agent if none available on board).	1	1	—	—	—
General Declaration Form No. 1 (Declaracion General). Instructions on reverse side of form to be provided by Agent.	5	1	1	—	3
Cargo Manifest (Sobordos) Form No. 2, for San Nicolas.	5	1	3	—	1
Cargo Manifest in Transit. (If there is any cargo on board).	2	1	—	—	1
Crew List Form No. 3. Instructions on reverse side of form.	5	1	2	1	1
Passenger List Form No. 4. To San Nicolas from all ports of call or statement that there are no passengers for San Nicolas.	5	1	2	1	1
Passengers Baggage Declaration. If there is any (itemised list).	1	1	—	—	—
Ship's Store Declaration (Store List/Bazaar List) Form No. 5, including itemised list of slopchest. It is most important that exact quantities of all stores be shown. Vessels at time of reception by Customs Officer will have physical check made, all quantities found in excess of those listed will be confiscated and vessel fined.	1	1	—	—	—
Crew's Personal Effects Declaration. It is most important that all cigarrettes, tobacco, wine, spirits, radio sets, binoculars, cameras and all new articles in possession of Officers and crew be shown in this declaration.	1	1	—	—	—
Postage Manifest.	1	1	—	—	—

The above has been up-dated according to new Peruvian Government Regulations issued by Supreme Decree No. 011-83-MA dated July 18th, 1983.

The Master must be sure to get the corresponding clearance from the previous port, and to fill in the official forms provided by the Agency.

If the vessel has no forms on board, they will be filled in after arrival, and an extra set provided for the subsequent voyage.

Controls are very strict and any attempt to smuggle goods is heavily fined; the same applies to any contravention of port regulations, which are internationally known, such as anti-pollution measures, use of the radio whilst at anchor, disorderly conduct of crew members, etc.

Normally Masters can change foreign currency in the local banks. Any crew member or passenger going ashore with foreign currency should change his money in the bank. This is not now a strict regulation, as it was before. For security sake, however, it is better to change money in the bank or in the Agency Office. The Agency will help the Master with Peruvian cash advances, that he might require, or will direct crew members through proper channels to the local banks.

The following documents should be available for inspection:

Ship's Papers; Valid Fumigation or Exemption Certificate; Crew's Identity Documents and International Vaccination Certificates of all persons aboard.

List with following data: Date and port of issue of Ship's Register, date and port of issue of Health Certificate, date of vessel's building and yard, list of ports of call with dates during previous four months.

PILOTAGE: Pilotage is compulsory for berthing. When approaching the pier, the docking speed should not be more than 50 cm. per second, o about 1 knot. No vessel may proceed to the pier until permission to berth has been granted. While loading, during periods of heavy swells and surge, a Pilot will be on board permanently. Masters are requested to make arrangements and facilities available.

Upon arrival in port, vessels must wait for Pilot. The starboard accommodation ladder must be rigged for Port Officials and Agency representatives. Ships approaching San Nicolas must fly their national Peruvian, call letters and quarantine flags. If vessel is carrying any type of explosive material, she must fly "B" flag.

ARRIVAL ADVICE: All vessels proceeding to San Nicolas Port will telex to Empresa Minera del Hierro del Peru, Telex: 20005PE Hierrope; and Agentes Navieros San Nicolas, S.A., Telex: 21410PE Agnav; her ETA 5 days, 48 hours and 24 hours prior to arrival.

When vessels are within or outside the 200 miles of jurisdictiona Peruvian waters, they have to contact Paita (OBY2), Callao (OBC3), o Mollendo (OBF4) coastal stations, in order to transmit their messages a Pre-Stowage Hatch List has to be transmitted to Agnav giving tonnage per hatch and loading sequence.

Berthing instructions and other messages from port Agent at San Nicolas will be transmitted by the above coastal stations.

The port Agency is Agentes Navieros San Nicolas, S.A., Telex 21410PE. Any inquiry regarding berthing, loading, etc. will be answered promptly by the coastal stations above.

Changes in ETA should be transmitted as soon as possible.

Vessels can get in contact by VHF communication system (Channe 16) 4 hours before arrival at San Nicolas by calling Agnav.

Anything not related to vessels calling at San Nicolas or San Juan should be addressed to Head Office in Lima, Paseo de la Republica 3587, 8th Floor or P.O.Box 1229, Lima, Peru. Tel: 418314.

Also see "Radio".

BREAKWATER: A 2,653 ft. long breakwater has been built in order to reduce the effects of the swell alongside the pier. The breakwater is a the West side of the pier 875 yards off and does not run parallel to the pier, but at N. 36° 35′ 28″ E. angle. The North end of the breakwater is 1,430 ft. from the North end of the dolphin, but the perpendicular distance from the pier to the closest point of the breakwater is only 1,090 ft.

At the North end of the breakwater there is a light with the following characteristics: Fixed red light, visible 3 miles.

AIDS TO NAVIGATION:

(a) San Juan Lighthouse, located on Pt. San Juan, Lat 15° 21′ 27.2″ S., Long. 75° 10′ 49.1″ W. Characteristics: 2 W.Fl ev. 22.5 secs. light 0.4 secs. eclipse 3.6 secs. light 0.4 secs eclipse 18.1 secs. Height of light above sea level 85.03 m. vis 22 miles. Sector illuminated 360°. Type of building: Circula concrete tower, white.

(b) San Nicolas Lighthouse, located on Pt. San Nicolas in Lat 15° 15′ 11.0″ S., Long. 75° 15′ 20.6″ W. Characteristics: 1 W.Fl ev. 4 secs. Height of light above sea level 58.60 m. vis. 20 nautica miles. Sector illuminated 360°. Type of building: Square steel and plastic tower, painted 2 sides black and 2 sides white.

(c) Fixed red light, vis. 3 nautical miles, located on the head of the San Nicolas Pier.

(d) Around the dolphin which is North of the pier head, there are 9 red lights, 10 ft. above the water level and lower than the dolphin deck, visible only from 1 mile distance.

(e) There is a radio beacon located Lat. 15° 21′ 27″ S., Long 75° 10′ 09″ W., transmitting on 395 kHz – 24 hours and signa letters SJN.

(f) In position Lat. 15° 14′ 36.5″ S., Long. 75° 14′ 08.5″ W. exists a luminous buoy with following characteristics: 1 white flash ev. 4 secs. light 0.4 secs. eclipse 3.6 secs. Sector illuminated 360° vis. 3 miles. Height 5 ft.

ANCHORAGES: The anchorage recommended for vessels waiting fo berth is in inner portion of the bay, North of the parallel and East o meridian through San Nicolas Point in depths of 15 to 20 fathoms. When anchoring, it is essential to leave sufficient sea room, about 0.75 miles for ships to manoeuvre in and near the berth.

Wreck of M/S *Templar* lies in position: Lat. 15° 13′ 27″ S., Long 75° 15′ 01″ W., or 341° from the pier head, distance 1.6 nautical miles The obstruction lies in approximately 150 ft. of water. Clearance above the obstruction is 60 ft. Do not anchor in the vicinity of the wreck.

MAX. SIZE: The following are the maximum permissible vessel's characteristics at the Hierro-Peru – San Nicolas Loading Pier:

LOA – 1050 ft.
Max. beam – For OBO's, or bulk carriers 53 m.
For ore carriers or O/O 161 ft. (49 m.)
Max. draft – 59 ft. (17.98 m.)
Max. airdraft – 40 ft. 3 in. (12.26 m.)

RADIO: Coast Radio Station "OAS" is located in port of San Juan and serves both San Juan and San Nicolas. This station listens on 500 kHz 1200 – 2200 hrs. GMT each day. It handles traffic on 410, 425, 444 448, 454, 468, and 480 kHz.

There is a new transmitter with the following frequencies schedule:

8,680 kHz – 1600 – 1630; 2000 – 2030 hrs. GMT
16,978 kHz – 1330 – 1400; 1630 – 1655; 2100 – 2200 hrs. GMT

TUGS: 2 small tugs available at 300 h.p. each

BERTHING: *Pier and Mooring Facilities:* The pier is located at the South side of the bay and is built in a North-South direction. It is constructed of pre-stressed concrete and steel pipe-lines with deck 1,000 ft. long and 50 ft. wide. The deck is 11 ft. 3 in. above MLW.

At the pier head, a 50 ft. diameter mooring dolphin has been constructed to make fast the stern lines of any vessel bigger than 900 ft overall length. Distance from Northern end of pier to Northern end o dolphin 198 ft.

There are 3 big bollards, 2 pelican hooks and an electric winch t make fast the stern lines. There is also a connecting bridge from th pier to the dolphin, which is 148 ft. long.

There is a fendering system on both sides of the pier consisting of wood pilings and a continuous rail of laminated lumber and rubber cylinders which keep vessels 5 ft. from the concrete pier. On the West side of the pier (ore-loading side) there are 28 mooring cleats, 12 bollards and 3 double mooring bitts. At the centre of the pier-head there is one bollard. On the East side of the pier there are 23 cleats, 2 bollards and one double mooring bitt.

The depth of the loading berth at the West side of the pier is 18.9 m. alongside the pier and up 91.44 m. Westward from the pier fender, except in the place known as "anchor pocket" which is located between the pier-head and the dolphin. The anchor pocket is 70 ft. deep, 250 ft. long and 300 ft. wide. When docking the 2 anchors are let go in that pocket where enough water exists to prevent any collision of the ship with her own anchors when she is fully loaded.

The East side of the pier still has the original depth, which is 12.5 m.

The bottom alongside is mud and sand. The ore ship loader has a pier straddle clearance height of 14 ft. and width of 12 ft. when the gantry is positioned inshore.

Berthing and Mooring: Vessels calling at San Nicolas for the discharging of general cargo must berth on the East side of the pier with the starboard side of the ship to the pier. Such vessels use their own regular mooring lines.

Ore vessels berth at the West side of the pier with the port side of the ship to the pier. Wires are not permitted as moorings to the pier except when attached to tension winches.

VERY IMPORTANT: While vessels are alongside the pier, engines must be ready for immediate use. Sufficient crew must be on deck at all times to tend mooring lines and heave in the slack as loading progresses. Failure to do so may result in a stoppage of loading and the vessel being moved out from the berth.

LOADING: Prior to commencement of loading the Master or Chief Officer will deliver to the port Agent a pre-stowage plan with the following information:

Total cargo required, calculated tonnage per hatch, sequence of loading, fuel on board, water and stores on board in long tons, and calculated draft and trim upon completion of loading.

Loading is generally carried out at a rate of about 4,000 long tons per hour.

Tonnage on board at any stage of the loading is available from the Loading Master, the Pilot on board, or at the scale house at the upper end of the pier. In order to avoid last minute delays, it is very important that a constant check be made of vessel's draft, ballast left to discharge and cargo on board during the entire loading. *Any change in tonnage of cargo required must be reported to the Port Agent or Loading Master not later than when there is approximately 2,000 long tons remaining for completion of loading, and always in writing.*

It is convenient to check drafts, ballast and tonnage of cargo on board each time the loading gantry shifts from one hatch to the next. While loading is actually in progress in a hatch, no loading interruptions are permitted except in case of emergency. At the termination of each pouring, a slip stating cargo loaded and draft readings, will be delivered to the Chief Officer.

In calculating the tonnage required to fully stow a hold, it should be remembered that cargo is spout trimmed only.

No trimmers/bulldozers are available at San Nicolas. Vessels will depart from the pier immediately upon completion of loading.

The Pilot will take the vessel out from the berth. If the Master wants to anchor in San Nicolas Bay prior to proceeding to sea, he must advise the Pilot who will in turn advise suitable anchorage. The Master will advise the Pilot of the estimated time of departure in order that this may be reported to the Port Authority.

Delays of port operations, as well as delays of other vessels waiting to berth, caused by a vessel which for any reason is not prepared and able to move from the pier when so ordered, *are chargeable to the vessel which causes the delay.*

Clearance papers, Bills of Lading, Statement of Facts and all necessary papers for clearance of the vessel will be delivered shortly after completion of loading. This can be accomplished while the vessel is being moved from the berth, or at anchor, but never alongside the pier when other vessels are waiting for loading turn.

CRANES: None.

MEDICAL: Medical attention may be arranged through the port Agent's office. No person will be attended unless he is provided with a letter from the Master authorising such treatment. All costs incurred will be for the vessel's account.

Send radio message advising how many people require medical attention in order to make proper appointments with doctors at San Juan Hospital. Otherwise the medical inspection will be very difficult.

STEVEDORES: *Working Hours:* 0800 – 1200, 1300 – 1700, 1800 – 2400, 0100 – 0700 hrs.

TANKERS: On the West and East side piers there are 3 raisers to which 3×8 in. diameter hoses can be connected to a main pipe-line of 16 in. diameter for the discharging of Bunker C. Flanges are U.S. Standard (ASA). Location on the pier is for midship connection on vessels. Maximum pressure permissible is 125 p.s.i. and maximum temperature 135°F. The length of the 16 in. pipe-line from the manifold on the pier to the storage tanks is 4,840 ft. There are 3 storage tanks of 7,000 bbls., 67,000 bbls. and 252,000 bbls. Total capacity 326,000 bbls. The height of the tanks above MLW is 142 ft. to the bottom and 190 ft. to the top of the tanks. The intakes to the tanks are at the top.

Diesel oil is discharged in San Nicolas, only one diesel oil storage tank of 67,000 bbls.

There is a crew on the pier to sling the hoses; the vessel's crew is required to operate the winch, boom, hoist the hoses on board, and connect same to vessel's manifold.

BALLAST: Special attention is called to ballast requirements of vessels which do not need ballast in order to enter under the loading boom. Such vessels are required to carry sufficient ballast for safe handling during berthing. It is permissible to discharge clean ballast in the bay.

A ballast discharge rate of 4,000 long tons per hour is recommended. Any delay in loading operations due to slow deballasting, is not only on account of the vessel, but if any other vessel is waiting for loading turn, the vessel slowing down the loading process is liable to be undocked in order that the vessel waiting for turn to load may be docked. All time lost and expenses for undocking and redocking the vessel is for Owner's account.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: At Lima.

REPAIRS: Except in extreme emergency, ship repairs cannot be effected at this port.

GANGWAY/DECK WATCHMEN: Recommended by crewmen to prevent stowaways.

OPENING/CLOSING HATCHES: Stevedores/crew.

CARGO GEAR: The loading boom extends 60 ft. from face of pier fender, and can be retracted from this position to a minimum length of 29 ft. Gantry with loading boom is mobile. Range of its mobility is 900 ft. starting at a point 110 ft. from the head of the pier. Shifting of vessels during loading is therefore not required. When not loading, the gantry is parked at the inner end of the pier, and its boom with the loading conveyor belt is raised in a vertical position. In the most vertical position the boom has a clearance of about 4 ft. inside the face of the dock fender.

After the gantry has been moved into loading position, the boom is lowered to horizontal position. Height from water level to underside of boom is 41 ft. Vessels must be ballasted so that height of any coaming or any other objects in the vicinity of the hatch where loading is to start will not exceed 40 ft. above waterline.

REPATRIATION: In cases where crew changes are to take place in San Nicolas, at least 7 days' advance cable notice is required to obtain the necessary Immigration Authorities' permission. The advance cable must set forth name, nationality and passport number. If the above is not complied with, crew changes cannot be carried out. The above applies also to passengers.

TELEPHONES: Available, Masters are able to communicate with any port in the world.

SHORE LEAVE: Shore leave may be granted at the Master's discretion. All crew members must be issued ship's passes before proceeding ashore. These must be shown to the Immigration Authorities when required. Peruvian laws and Immigration Regulations must be strictly adhered to in order to avoid unnecessary difficulties. Crew members are not permitted to travel 100 km. outside of San Nicolas – San Juan port areas without written authorisation or pass from the Master approved by Immigration Authorities.

IDENTIFICATION CARDS: Required (Seaman's Book or Passport).

Also see "Shore Leave".

WEATHER: There is generally a prevailing S.E. wind which may vary from a light breeze to a strong wind. The months of May, June, July, August and September are Winter months. Swell and surge are occasionally experienced in the port.

CONDITION OF CARGO HOLDS: Cargo holds must be properly cleaned. In this respect, special care must be taken when vessel, prior to her arrival at San Nicolas, has carried the following cargoes: Gypsum, phosphate, pyrite, coal, sulphur, silica, aluminium, sand gravel or quartz, or any other ore containing arsenic, phosphorous, silica, aluminium or copper.

Prior to commencement of loading, cargo holds will be inspected by a Representative of the Shippers. Chief Officer has to accompany the Surveyor during the inspection.

MAIL: All mail received for holding by the port Agent, will be delivered to the vessel upon arrival. For quickest delivery, mail should be addressed as follows: c/o Agentes Navieros San Nicolas, S.A., Apartado 1229, Lima, Peru.

Officers or crew members should be advised that duties will be charged by the Peruvian Customs Authorities on contents of parcels mailed to them at Peruvian ports. Outgoing ship and crew mail will be accepted ONLY directly from the Master or his designated Officer. The vessel will be billed the corresponding amounts for postage.

GENERAL: It is forbidden to throw out garbage, debris or any kind of dirty ballast in the Bay.

It is forbidden to hunt seabirds; to throw out explosive material or to use any pyrotechnic object on board.

Vessels can do underwater work only with Port Captain's permission.

Reception: Official hours for Port Officials are from 0700 to 1100 and 1300 to 1800 hrs. Monday to Friday. Upon request, Port Officials will board vessels at any time day or night, Sundays and holidays included. Office hours for loading operations are from 0800 to 1600 hrs. Monday to Saturday.

Emergency Signals: A number of short blasts on the whistle indicates an emergency. The whistle will not be used except for emergency in accordance with Peruvian regulations.

Provisions: Provisions are available from a local ship chandler. Cable address: Pronamar Sannicolas. Cold, chilled and dry stores available upon arrival. Mailing address: Pronamar y Cia., S.A. c/o. Empresa Minera del Hierro del Peru. Apartado 1229, Lima, Peru. Neither Agnav or Hierro Peru has any interest in this independent company.

Stowaways: Unauthorised persons should not be allowed on board the vessel. Cases of attempted stowaways have occurred. Masters must take all necessary care and precautions to insure against unauthorised personnel being on board while in port.

Stowaways aboard on arrival should be reported to the Port Captain in order that the necessary steps be taken to prevent their unauthorised landing. It should be noted that all costs for the repatriation of stowaways is for account of the vessel concerned.

Crew Members Left Ashore at Time of Departure: Masters are requested to have all vouchers and lists of personal effects (in triplicate) prepared for delivery to port Agent as soon as possible covering deserters and hospitalised crew members.

A letter of authorisation is required when the port Agent is expected to provide hotel accommodation, meals, medical attention, transportation, travel expense, and/or cash advanced for account of vessel.

No man may be paid off from a foreign vessel without prior permission from the Port Captain. Under Peruvian Law, Agents are responsible for repatriation of all foreign seamen left in Peru. Masters will be requested to sign letter of indemnity covering seamen landed for hospitalisation, paid off, or desertion. Disembarking of crew or passengers for reasons other than emergency is not permitted at this port, unless the prior authorisation of Peruvian Immigration and Maritime Authorities is granted to that effect. Authorisation for disembarkation requires at least 7 days' prior notification by radio. The notification must provide names, passport number, age and nationality of persons to be embarked or disembarked.

AGENT: Agentes Navieros San Nicolas, S.A., P.O. Box 1229, Lima. Tel: 410636. Telex: 20005PE Hierrope. Cables: Agnav Sannicolas.

SUPE: 10.48 S. 77.45 W.

Supe is about 84 miles North of Callao. Cargo operations are undertaken in an open unprotected roadstead. The main activities at the port are the loading of fishmeal and discharging of fertilisers, cellulose and chemical products.

PILOTAGE: Not available.

ANCHORAGE: Vessels anchor in the open roads.

RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 8 tugs available, 1 of 65 h.p., 2 of 85 h.p., 4 of 134 h.p., and 1 of 165 h.p.

BERTHING: There is a pier for mooring barges, length 331.5 m.

LIGHTERS: 32 (14 of wood and 18 of steel) for dry cargo only. The capacity of the lighters varies from 50 to 100 tons. Total capacity being 2,100 tons.

CRANES: 3×9 tons and 1×11 tons.

STEVEDORES: See "Pimentel" for working hours and overtime rates. 5 gangs of 9 men available.

MEDICAL: There is a hospital at Barranca.

TANKERS: *Submarine Pipe-line:* One line 10 in. diameter for dirty products and one line 8 in. diameter for clean products. Depth of water 48 ft. At Paramonga there is a 10 in. line, depth 36 ft.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Swell Period:* June/August.

TALARA: 04.35 S. 81.17 W.

DOCUMENTS, and all general information, refer to "Callao".

PILOTAGE: Compulsory. In the vicinity of Talara there are several off-shore oil drilling platforms and near the entrance to the port there is a shallow of 24 ft.

ANCHORAGES:

Summer	Lat. 04° 34′ 09″ S.,	Long. 81° 17′ 36″ W.	9.25 Fathoms
Winter	Lat. 04° 34′ 12″ S.,	Long. 81° 17′ 29″ W.	10 Fathoms
3rd Position	Lat. 04° 34′ 03″ S.,	Long. 81° 17′ 42″ W.	6 – 10 Fathoms

RADIO: Arrival Notice should be sent at least 24 hours before arrival to Captain of the Port and Agent via the government radio station OAH. Station on 500 kHz from 0800 to 2400 hrs.

TUGS: 1×13.5 h.p.

BERTHING: At Talara there are 2 berths for loading fuel and water; one is a regular quay, the other a petroleum berth in which vessels lie, moored to dolphins alongside hose platform.

Quay length 385 ft., depth alongside 18 ft. to 34 ft.

Petroleum berth, length 585 ft., depth alongside 34 ft.

Talara is mainly a bunkering port as it is the main port for the Northern Peru Oilfields. The little general cargo discharged is done at the quay; bunkering being done at the quay and at the dolphin berths.

Larger vessels load/discharge into lighters at anchorage. Seven lighters are available, total capacity 1,400 tons.

CRANES: 3×5 tons, 1×31 tons and 1×22.5 tons.

TANKERS: See "Berthing".

Submarine Pipe-lines: 12 in. diameter. Vessels with a max. draft of 36 ft. can moor to the pipe-line.

STEVEDORES: It is possible to work 24 hours a day with interruptions at meal hours. 3 gangs of 16 men each available. Overtime only charged for Sundays and holidays at 50%.

MEDICAL: A private clinic is available.

FRESH WATER: Available alongside berths.

FUEL: Available alongside berths. Bunker "C" 3,500 seconds, Petroperu No. 5 (Intermediate 4) 400 seconds, Diesel 2 (marine diesel).

CONSULS: Panama and Nicaragua.

REPAIRS: Minor repair facilities.

GENERAL: Smoking is prohibited on deck, at the piers and near the refinery installation.

NOTES

Please also advise Shipping Guides Ltd.

Philippines

GENERAL

DOCUMENTS: *To be Submitted in all Government and Private Ports:*
1 copy of Quarantine Pratique.
6 copies of the Inward Cargo Manifest for all cargoes to be discharged in the Port.
2 copies of Cargo Storage Plan or Hatch List.
3 copies of Stores List.
3 copies of Passenger List.
4 copies of the Crew List.
4 copies of the Crew Declaration List.
3 copies of Bonded Stores List.
3 copies of Firearms and Ammunition Inventories.
3 copies of List of Drugs and Narcotics.

Original copies of all Through Cargo Manifests destined to other ports to be deposited with the Customs Inspector on board and to be returned to the Master prior to the departure of the vessel.

Clearance from the last port.

TIME: GMT plus 8 hours. Daylight Saving Time (1990) GMT plus 9 hours from April 21st until August 31st.

SHORE LEAVE: Nationals of countries with whom the Philippines maintains diplomatic relations are allowed ashore after securing a pass from the Immigration Officer in the Port.

REGULATIONS: We quote below pertinent sections of PPA Administrative Order No. 13 – 77 regarding PPA General Port Regulations on Arrivals/Departures of Vessels and Berthing Regulations:

Article II – Arrivals and Departures

Section 4. *Notice of Arrival* – The Owner or Agent of every vessel other than a vessel of 100 g.r.t. or less, intending to call at a port shall, within the time specified in Section 29 of these Regulations, prior to the ETA, give notice in writing to the Authority of its arrival, and make application for a berth if it is intended to berth at the wharf, pier, or anchorage within the Port, Port District or harbour limits.

Section 5. *Particulars to be Furnished* – The notice of arrival and the Application for a Berth shall be a form prescribed by the Authority and shall contain full particulars regarding:
(a) Name of vessel and its flag.
(b) The Gross Registered Tonnage (g.r.t.) and Nett Registered Tonnage (n.r.t.).
(c) Draft, LOA, and beam.
(d) Names of the Owner, Master, ship's Agent in the port of call.
(e) ETA and ETD of vessel.
(f) Tonnage of cargo to be discharged and loaded.
(g) Dangerous Cargo (Whether to be discharged or not).
(h) Number of passengers, disembarking and embarking.
(i) Any other pertinent information relating to the working (e.g. heavy lifts) or safety of the vessel in the port.

Section 6. *Hoisting of National Colours* – The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted its national colours and signal letters, if any. The national colours shall continue to be exhibited while the vessel remains in port.

Section 7. *Immigration and Quarantine Signals* –
(a) The Master of every vessel arriving from a foreign port shall exhibit the Customs, Immigration and Quarantine signals as prescribed by those government agencies. Such signals shall remain hoisted until the proper officer has given the permission to lower those signals.
(b) No vessel other than an authorised vessel shall approach within 200 m. to a vessel which is exhibiting the Immigration, Health, or Customs signals. An authorised vessel shall mean an Immigration, Health, Customs, Pilot Launch, or Philippine Coast Guard (PCG) vessel.
(c) No person other than a Pilot or authorised government officer(s) may board or disembark from any vessel coming from a foreign port until the vessel is cleared by the Immigration, Quarantine, Customs and PCG officers and the respective signals have been lowered.

Section 8. *Securing of Vessel before Discharge/Loading* – Every vessel entering a port shall be anchored or properly secured to a wharf, pier, or buoy before commencing the loading or discharging of cargo, and/or the embarkation or disembarkation of passengers.

Section 9. *Port Clearance* – No vessel shall leave a port unless in possession of a valid PPA Port Clearance issued by, or on behalf of, the Authority, in addition to the requirements of other government agencies and the final clearance issued by the PCG.

Article IV – Berthing

Section 29. *Berthing Regulations* –
(a) The allocation of a berth belonging to, or operated by, the Authority shall be at the Authority's discretion.
(b) A vessel shall be considered for berthing allocation only after the Agent of said vessel has filed an application for berth.
(c) All applications for berthing at pier/wharf/anchorage shall be submitted 24 hours before arrival for vessels on scheduled runs and 36 hours for tramping vessels (without regular schedules). In either case application should be filed within sufficient allowable time.
(d) All applications received after berthing meeting shall be deliberated upon the following day before the actual arrival of the vessel.
(e) No vessel shall be berthed or unberthed alongside a wharf or pier belonging to, or operated by, the Authority without its permission or contrary to its directions, nor shall any vessel occupy a berth other than the berth allocated to said vessel.
(f) First-come-first-served basis shall be the general rule in determining berthing priorities of vessels, subject to the exceptions hereunder provided. Vessel's arrival will mean the time a vessel drops anchor at the Anchorage Area when there is no available area or the time a vessel reaches the Port's Boarding Area when a berth is available.
(g) When the available berthing space is inadequate for berthing a larger vessel having the priority to berth, the smaller vessel next in priority which can be accommodated shall be allowed to berth on condition that should additional space be made available such that the larger vessel can be accommodated, the smaller vessel shall be moved to the anchorage to allow the larger vessel to berth.
(h) The Pilot manoeuvring a vessel to berth shall be advised by the Authority as to the position or berth which the vessel will occupy and the vessel shall comply with the directions or instructions therefor of the Authority and/or the Pilot.
(i) When a vessel scheduled to berth encounters some mechanical troubles thereby restraining said vessel from docking, an allowance of one (1) hour shall be given for repairs. If after the lapse of this grace period, said vessel is still inoperative, the priority to berth shall be passed on to the vessel having the next priority to berth.
(j) Vessels with berthing priority but scheduled to depart the following day shall be allowed to berth to allow passengers to disembark. Provided, however, that said vessel shall pull-out from berth to give way to passenger vessel scheduled to depart on the same day.
(k) Any vessel intending to berth solely for the purpose of loading fresh water, bunkering or victualling, before such vessel will be able to depart for another port, shall be given priority over other vessels, provided that such stay shall not exceed the time fixed by the Authority.
(l) Government-owned vessels on official business, vessels of foreign government not engaged in foreign trade, vessels under stress, and vessels carrying perishable articles or goods shall be given berthing priority over other vessels.
(m) Whenever practicable, passenger liner or tourist vessel shall, subject to the discretion of the Port Manager/OIC, also be given priority of a limited number of hours stay at berth over purely cargo vessel.
(n) Berthing priority of any vessel shall not be waived in favour of another vessel.
(o) Vessels waiting for cargoes shall be moved to anchorage to allow the next vessel to berth. However, said vessel shall be allowed to berth again, provided that cargoes for loading are ready, unless another vessel is allowed to take the berth temporarily by the Authority.
(p) Domestic vessels may be allowed by the Authority to dock at berths designated for foreign vessels if there are no other vessels waiting to dock at such berths.
(q) Shut-down time caused by heavy rains and other major calamities or accidents which will stop work on a vessel shall be excluded from the time limitation prescribed herein. However, breakdown of lifting gear and also loading of fresh water, bunkering and victualling which should be done simultaneously with cargo handling operations shall not be considered as reason for time extension.

AUTHORITY: Philippines Ports Authority, P.O.Box PA62, Manila. *Telex:* 40404 (ITT) and TABX 0203. *Cables:* Phports Manila.

ANTIMONAN, Luzon: 14.00 N. 121.55 E. (See Plan)

SHIPMASTER'S REPORT: 1976.

Berth in position Lat. 14° 00′ 30″ N., Long. 121° 55′ 30″ E. Vessel required to be ballasted to one third deadweight. Tidal range 6 ft. Nature of bottom at berth, mud and sand. Density 1025. Anchorage 0.5 miles S.E. of jetty.

Terminal Information: Ship's hoses used to rail only. Length of shoreline, 3,000 ft. diameter 8 in. Products handled at the berth, coconut oil and pellets of copra.

Port Information: Pilotage compulsory. Notice of 24 hours and 12 hours required. Pilot boards from a small catamaran flying the pilot flag. Boarding position 2 miles S.W. of the port. Vessel is able to enter or leave at any stage of the tide. Vessel cannot enter after dark and it is not advisable to leave after dark as some of the piles on the sea bed near the jetty are broken. Also there are no navigation lights in the bay and many vessels are fishing. Max. LOA 650 ft. Max. beam 100 ft. Max. draft 44 ft. No tugs available. Radio station used, Manila, though messages delayed in receipt at Antimonan.

Facilities Available: Fresh water in small quantities for cash. Fresh provisions, groceries and meats in small amounts, doctor and hospital.

No repair facilities, laundry, fuel or slop facilities.

Improvements: The face of the jetty is being piled and breasting dolphins created.

At the present time a barge is inserted between the ship and jetty as the piling is broken.

APARRI (Including Port Irene, San Vicente, Claveria, Mission, Abulog, Maconacon and Divilacan), Luzon: 18.22 N. 121.38 E. **(See Plan)**

See "General" before first port.
PORT LIMITS: Quarantine anchorage or loading point.
DOCUMENTS: *Before the Vessel's Arrival:*

Submit/transmit to Philippine Ports Authority (PPA-PMU) Aparri, the vessel's Notice of Arrival, at least 48 hours before ETA for foreign vessels and 24 hours before ETA of domestic vessels.

Upon Vessel's Arrival:

PPA-PMU Aparri Safety Officer will inspect cargo handling gear of all incoming vessels.

Submit to PPA-PMU-Aparri a copy of the following documents:

Inward Foreign Manifest (for foreign vessels); Coasting Manifest (for domestic vessels).
Passenger Manifest.
Crew List.
Stowage Plan/Hatch List.
Transit Cargo Manifest (if any).
Oath of Master.
Vessel's Roll Book – to be temporarily filed.
Vessel's Information Sheet – to be completed.

Before Vessel's Departure:

Submit to PPA-PMU-Aparri a copy of the following documents:

Outward Foreign Manifest (for foreign vessels); Coasting Manifest (for domestic vessels).
Passenger Manifest.
Transit Cargo Manifest (if any).
Oath of Master.

Entrance and clearance formalities in the traditional sense of the terms of foreign and domestic vessels shall remain with the Bureau of Customs until Port Management Unit's own clearance is duly stamped in the Manifest and after all port charges, fees, dues and other charges had already been paid.

Payment of charges leviable against the vessel and cargo shall be made either in cash, Manager's or Cashier's Cheque to the Port Management Unit.

Notice must be transmitted to Port Management Unit Office of Aparri when Export Entry is processed and Wharfage fee is paid to the Philippine Ports Authority – PMU Aparri of PPA HO.

PILOTAGE: ETA to be sent to Aparri Pilotage Station, Aparri, Cagayan, one day before vessel's arrival.

Pilot Boat is a motorised launch.

ANCHORAGES:
Port of Aparri: Boundaries – Lat. 18° 22′ 39″ N., Long. 121° 35′ 33″ E. Depth – 11 fathoms.
Port Irene: Boundaries – The portion between Nulton Pt. and Batulinao Pt. This bay known as Casambalangan. Depth – 12 m.
San Vicente Port: Boundaries – Lat. 18° 30′ 43″ N. Long. 122° 08′ 26″ E. Depth 15 fathoms.
Sub-port of Claveria: Boundaries – Between Centenela and Lacaylacay Pt. Depth – 15 fathoms.
Port of Divilacan: Depth – 11 fathoms.
Mission Port (Cagayan): Boundaries – Lat. 18° 17.5′ N., Long. 121° 54.2′ E. Depth – 8 fathoms.
Abulog Port (Cagayan): Boundaries – Lat. 18° 28.8′ N., Long. 121° 26.5′ E. Depth – 9 fathoms.
Maconacon Port (Isabela): Boundaries – Lat. 17° 24.25′ N., Long. 122° 14.75′ E. Depth – 7 fathoms.
RESTRICTIONS: Aparri: Enter channel with Pilot's assistance and at daytime only. Abulog, Mission, Maconacon: Enter channel with Pilot's assistance.
RADIO: RCPI. TELEFAST. PT & T. TELECOM. All in Aparri, Cagayan.
VHF: RCPI. TELEFAST. PT & T. TELECOM. All in Aparri, Cagayan.
RADAR: Pagasa Weather Bureau Radar, located in Bukig, Aparri, Cagayan.
TUGS: Available at Claveria, Aparri, Port Irene, Abulog, Mission, Maconacon and Divilacan.
BERTHING:
Port of Aparri: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shipper's log pond.
Port Irene: Two available berths. Ship to pier with ship's derricks. Cargoes to be handled at a specified reclaimed area.
San Vicente: Anchorage area.
Sub-port of Claveria: Anchorage area. Ship's side loading and ship's own derricks. Cargoes handled at Shipper's warehouse/log pond.
Port of Divilacan: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shipper's log pond.
Mission Port: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shipper's log pond.
Abulog Port: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shipper's log pond.
Maconacon Port: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shipper's log pond.
CRANES: Truck mounted cranes.
BULK CARGO FACILITIES: None.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: No bridges.
STEVEDORES: North Luzon Port Services Inc. – Aparri, Cagayan; Krisandra Services Corp. – Port Irene; Taggat Industries Inc. – Sub-port of Claveria; ACME Group of Companies – Maconacon, Isabela; Basco Arrastre and Stevedoring Services, Basco, Batanes.
MEDICAL: Aparri Emergency Hospital.
TANKERS: River stream-draft 16 ft. Discharge lines are through depot discharging pipe-lines Aparri, Cagayan.
FRESH WATER: Not available.
FUEL: Diesel, gasoline and kerosene.

DENSITY: 1025.

MEDICAL: Doctor and hospital facilities available. Advance notice required of any medical attention needed.

TANKERS: *Products Pier:* Inner berth depth 13 ft. Outer berth depth 32 ft. Can accommodate vessel up to 530 ft. length. No slop discharge facilities available. Also see "Shipmaster's Report – September 1980" and "Section B".

FRESH WATER: Available at Lamao Pier and PPI Pier, and can be supplied by barge.

FUEL: Bunkers, fuel and diesel, obtainable from berth, advance notice required.

REPAIRS: Repair facilities available at Baseco Shipyard, located at Mariveles Bay, about 20 km. away.

Tank cleaning services available.

SURVEYORS: (1) Cargo Inspectors available.

(2) Surveyors such as Lloyd's Register, American Bureau, etc., have offices in Manila.

CERTIFICATES:

Certificate of Registration.
Certificate to Operate.
Certificates of Officers and Engineers (Licences).
Officers and Seaman's Books.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member, and 1 bottle of liquor for each crew member.

REPATRIATION: Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship's Agent and the Foreign Embassy concerned.

HOLIDAYS: New Year's Day (1st January); Bataan Day (9th April); Holy Thursday (variable); Good Friday (variable); Labour Day (1st May); Independence Day (12th June); Republic Day (4th July); All Saints' Day (1st November); National Heroes Day (30th November); Christmas Day (25th December); Rizal Day (30th December). When any holiday falls on a Sunday, the following day (Monday) is by law considered a public legal holiday. Employees of the Philippines Port Authority – Port of Manila, Limay Sub-Port, report for work on Saturdays, Sundays and Holidays.

EMERGENCY CO-ORDINATION CENTRE: For emergencies, please contact Philippine Ports Authority, Port District Office Manila, PDO-Manila Building,South Harbour, Port Area, Manila. Tel: 47-34-41 to 49.

Limay Sub-port is equipped with a radio for direct voice contact with PPA – Manila.

BANKS: No American or European banks are operating in the area. Excellent banking facilities and services available at Manila.

STORING: See "Prelims".

(1) Vessels can be stored by barge or "water taxi".

(2) Vessels can be stored by barge only after discharging at the anchorage.

(3) Not applicable.

(4) Not applicable.

(5) Companies which sell stores to ships calling at Limay must secure clearance from the Philippine Ports Authority – Port of Manila, Limay Sub-port and from the Bureau of Customs.

(6) Local riggers may be allowed to assist in storing.

IDENTIFICATION CARDS: Essential.

GENERAL: Customs Inspector and 2 guards accommodated on board during vessel's stay.

SHIPMASTER'S REPORT: September 1980.

Locally the port is known as Limay, Bataan. VHF Channel 11 appears to be used for all communications. 7 copies each of all forms.

If any crew members being repatriated then Agents require their full names, nationality, ages, and Passport or Seaman's Books number in advance.

Hand soundings alongside South side of jetty indicated 38 ft. and 34 ft. at Eastern end and about 450 ft. Westward (inshore) respectively at LW.

Liberty boat from vessel to shore as crew personnel are not allowed through refinery. Vessel loaded Mogas at rates of between 250 and 450 t.p.h. Good holding ground in the anchorage off berth in Manila Bay.

SBM for VLCCs being constructed in approximate position Lat. 14° 31.7′ N., Long. 120° 38.8′ E. (See "Section B").

Experienced a strong Southerly current, about 4 knots, the day after a typhoon passed about 100 miles to the North. This current due to flood waters leaving the bay.

3×500 h.p. tugs used for berthing, only pushing, do not make fast. 2.5 hours to Manila by bus. No shore passes required. Fresh water by barge from Manila but very expensive. I was advised that the first 137 tons would cost £285.00 including tug. For the next 163 tons tug and barge would cost £841.00.

SHIPMASTER'S REPORT: April 1981.

Ship to ship transfer into m/t "Petron Gasul".

Approaches: Chart BA 976. The approach is straightforward with good fixes being available by radar and visual means. The light on La Monica is extinguished. Ample water and there is nothing to be gained by using the South Channel.

Advised that the transfer position would be 14° 31′ N., 120° 37.5′ E., although this may be altered slightly to suit "Petron Gasul" and may be affected by the amount of shipping at anchor off the refinery.

PNOC carry out a number of lightening operations in the area and awaiting tankers may be encountered between Lat. 14° 28′ N. to Lat. 14° 34′ N., and bounded by Long. 120° 40′ E. (This anchorage area is not official). Besides the buoys marked on the chart there is a mooring buoy in approximate position Lat. 14° 31.8′ N., Long. 120° 38′ E. This red buoy has a pipe-line attached and you are advised to anchor well clear to allow PNOC vessels access to the buoy. There is a large white cross on Mt. Samat which is not marked on the chart and affords a good reference point for anchor bearings.

Large numbers of unlit fishing vessels may be met in the bay and the approach channels and especially so at sunset and sunrise. These fishing boats also haunt the anchorage area.

Advised by Agents that movements were limited between sunrise and sunset but this appears to depend upon the local Pilots. The anchoring on arrival was done without a Pilot.

Documents:

Clearance from Last Port of Call.
8 copies Crew List – visaed, if possible, at departure port.
List of Passengers.
Lists of Animals, Narcotics, Firearms, mails.
List of Bonded Provisions, including Deck and Engine Stores.
List of Animals, etc., were simply 'nil' statements and were perfectly satisfactory.

Formalities are unlikely before 0800 hrs., and were straightforward. Bonded stores sealed and application may only be made after 10 days for an issue of cigarettes, etc.

Health: The doctor who clears for Pratique is a local doctor and will carry out any necessary vaccinations. Very helpful. Crew requiring specialist or hospital treatment must go to Manila.

Shore Access: By means of small outrigger launch. The daily charge for 3 journeys to and from the ship was 800 pesos.

Agents: The main agency (C. F. Sharp) is in Manila although they station a representatitve locally ashore in Limay. Attendance was very good and only hampered by local communications by telephone, telex and VHF. Our visit coincided with the Easter holidays and this seriously disrupted communications to and from U.K. As an urgency measure radio messages were sent via Manila Radio. VHF contact to Manila was easy via Channel 16 and thence to working channel.

Transfer: Contact may be made with "Gasul" on Channel 13. The "Gasul" in effect is used as a storage vessel by PNOC and delays may be expected due to the status of her tanks on arrival and the availability of fenders. This last is serious since there only appears to be one set of fenders for all lightening operations and this includes oil tanker transfers.

Small local gas tankers take the product from "Gasul" and as these are few in number this can also lead to considerable delay. A certain amount of blending of propane and butane is sometimes necessary into these craft and on the whole tends to lead to a very confused situation as regards the probable time of commencement of transfer. Estimates varied wildly from day to day and perhaps the most reliable estimates may be gleaned direct from "Gasul".

The Master and Chief Officer will board to discuss the transfer and decide on the final transfer position.

A Pilot will board to shift to the new position. "Gasul" is manoeuvred alongside by a Pilot and 2 tugs. If necessary another tug may take a line from your stern to hold the vessel steady during berthing. Three of her lines each end further supplemented by our own moorings.

"Gasul" was well fendered with three (3.3 m.×6.5 m.) and two (2.5 m.×5.5 m.) fenders.

Reputed to have a full range of hoses and reducers on board but some have 300 ASA flanges.

The transfer was completed without any difficulties although "Gasul" can only accept one grade at a time necessitating shifting lines from one manifold to another. VRL used.

Surveyors: SGS attended with PNOC surveyor. Figures based on our vessel's outturn since the gauging devices and temperature recorders on "Gasul" are suspect.

Pilots are reluctant to unberth during the hours of darkness and this decision will also be affected by the prevailing weather conditions. Two Pilots for the operation.

AUTHORITY: Philippines Port Authority, Port Management Office – North Harbour, Tondo, Manila, Philippines. *Tel:* 27-34-19, 26-22-15. *Contact:* Jalilul H. Salialam, Port Manager.

SECTION (B) — CBM.

LOCATION: The Seaberth of Petron Bataan Refinery is located at Limay Town in Bataan Province.

The berth is a conventional buoy mooring (CBM) system and is located in position 14° 32.1′ North., 120° 35.9′ East.

The enterprise is owned by Philippine National Oil Company and operated by Petron Bataan Refinery.

Products handled: Crude oil, IFO and Naphtha.

Also see "Single Buoy Mooring".

DOCUMENTS: *Immigration:* Vessels coming from countries where Filipino Consular Authority is available are required to have, on arrival, visaed Crew Lists. However, in the event that the vessel, for some reason, is not able to obtain a visaed Crew List, this requirement is waived, provided the Agent furnishes a guarantee for payment of the visa fee.

When the vessel has on board personnel from countries without political relations with the Republic of the Philippines, at least 2 Immigration Officers remain on board during the vessel's stay in port. These personnel are forbidden to leave the vessel and are not granted shore leave.

The following documents are required by Immigration on arrival:

Visaed Crew List (1 original and 1 copy).
Ordinary Crew List (12 copies).

Customs: Bonded lockers containing spirits, cigarettes, etc., are required to be sealed. Each crew member is allowed to retain 1 carton of cigarettes. Cigarettes in excess should be placed in bonded lockers.

A Customs Inspector and 2 guards will remain on board throughout the vessel's stay in port. Food and a spare cabin should be provided for them.

The following documents are required by Customs:
Crew Personnel Effects List (6 copies).
Stores List (6 copies).
Firearms and Ammunitions List (6 copies).
Bonded Stores List (6 copies).
Narcotics List (6 copies).
Currency belonging to Crew and Ship List (6 copies).
Last Port Clearance.
Ship's Register.

The following documents are required by the Authorities at Bataan, Bataan C.B.M. and Bataan S.B.M.
Notice of Arrival.
Application for Berth.
Inward and Outward Foreign Manifests.
Oath of Master.
Statistical Supplement.
Application for Assessment.
Clearance.

All of the above to be available and submitted by the Agent.

Outward Clearance: This clearance is granted by the Coast Guard which boards the vessel prior to departure and effects the clearance on board.

Also, an Immigration Inspector goes on board, just prior to departure, and musters the crew and verifies that all crew members are on board.

The following documents are required for the Outward Clearance:
Port Clearance.
Immigration Clearance.
Customs Clearance.
Coast Guard Clearance.

The above documents are prepared and arranged by Agent.

APPROACHES: *From End of Sea Passage to Pilot Station:*
Manila Bay is entered between Limit Point and Cochinos Point. The entrance is divided into 2 channels, named South Channel and North Channel, by Corregidor and Caballo Islands; both these channels are deep and clear of dangers in the fairway.

As a general rule, vessels use the channel which provides the shortest route into the bay. Entry is not recommended during darkness or periods of poor visibility if vessel is not equipped with radar.

Vessels entering Manila Bay through the North Channel shall pass midway between La Monja Island and Guardia Shoal and shall proceed directly through the middle of the channel between Corregidor Island and the mainland, steering 070° until 1 mile distance from the shore is cleared. The same route shall be followed by vessels when leaving Manila Bay through the North Channel.

Vessels entering Manila Bay through the South Channel should not approach any shore closer than 1 mile and shall keep South of the restricted area, South of La Monja, Corregidor and Caballo Islands, which is embraced within The North section of the following bearings: 296° from El Fraile Island and 236° from Caballo Island lighthouse. Furthermore, on the Southern side of the channel, they should not approach the line joining El Fraile and the N.W. point of Limbones Island closer than 1 mile. The same restriction applies to vessels leaving Manila Bay through the South Channel.

Deep draft laden crude tankers should always enter through the Southern Channel, which is wider and deeper.

After having entered the channel, vessels should make for the Pilots embarking point. Pilot boat usually waits 2 miles off Lokanin Point. During the approach to the above position, vessels should steer clear of land for at least 1 mile.

Many fishing boats are operating in the area and very often they are without lights and unable to move from their fishing position as they have nets laid down. Therefore, utmost caution should be exercised; radar watch and visual lookout should be maintained and a wide berth, to the maximum possible extent, should be given to any fishing boat.

When entering or leaving the port, especially during hours of darkness, we suggest to consider having the tanker preceded, at a close distance, by a service boat or a tug boat. This boat steaming right ahead of the vessel could clear the vessel's way of fishing boats or other craft or could at least warn the tanker in advance of any danger laying ahead.

ANCHORAGE: Vessels awaiting berth should anchor about 0.5 miles S.E. of the Conventional Mooring Buoy (CMB).

RESTRICTIONS: *Controlling Depth:* Entry Channel more than 66 ft. below MLLW. Approach Channel 64 ft. below MLLW. Alongside Berth 64 ft. below MLLW.

LOA Limitation: 1,000 ft.

Breadth Limitation: Unlimited.

Berthing and Unberthing: No particular restriction applies and vessels are berthed and unberthed at any stage of the tide; also during hours of darkness except during particularly severe metereological conditions. Following unberthing, ship is expected to move out, preferably with assistance of tugs instead of using her own power. The strong turbulence created by the ship's propellers tends to get the hoses entangled with each other.

MAX. SIZE: Below are the maximum vessel sizes that are acceptable at the Bataan Refining Corp. – CBM facilities:

DWT	120,000 tons
LOA	890 ft.
Beam	135 ft.
Draft	52 ft.

However, crude tankers greater than 120,000 d.w.t. with LOA and beam up to 1,000 ft. and 160 ft., respectively, could be accepted at the sea berth if the tanker is partially loaded, such that draft does not exceed 50 ft. and if the prevailing climatic condition warrants safe berthing.

HEALTH: The Quarantine Doctor boards the vessel in the outer roads during her approach to the port. After Pratique is granted, the Pilot, Customs and Immigration Officers, the Loading Master, the BRC representative, and the hose gang are allowed to board.

No Radio Pratique is contemplated.

The following documents to be ready prior to arrival of health officials:
Maritime Declaration of Health.
Vaccination Lists (4 copies).
Health papers of all ratings.

RADIO: Whilst at sea, vessel is to communicate with Philippine Nation Oil Co. – Manila via Manila Radio. VHF Channel 13 is the workin frequency of PSTC, owners of tugs and service boats assisting th mooring.

In the arrival message, Master to include: ETA, forward and aft drafts confirmation that instructions contained in port information ar understood and will be adhered to, any requirement.

It is most essential that vessel confirms ETA 72, 48 and 24 hour before arrival.

Communications between vessel, tugs, mooring gang and refiner are well established by various portable VHF sets supplied by th refinery and contractors and working is on several channels.

VHF: See "Section A".

BERTHING: The Sea Terminal consists of 8 mooring buoys of 16 ft. dia

Buoys 2, 3, 4, 6 and 8 are fitted with 1 self-releasing Pelican hoo and Buoys 1, 5 and 7 are provided with 2 Pelican hooks each.

Mooring/Unmooring: Currents usually set in a North-South direction a the berth, and vessel always approaches and enters the berth fron South. However, berth is so designed that tankers, depending o prevailing wind and/or current direction, could enter from the North, necessary. Mooring and unmooring may take place also during hour of darkness, provided meterological conditions are fair and visibility i good. Currents are weak and berthing or unberthing takes place at an state of the tide.

Berthing of vessels should be assisted by a Pilot, a Mooring Maste and a Radio Operator, the latter two of PNOC Shipping and Transpo Corp., which also provides the mooring gang. The Radio Officer bring along his own portable VHF radio set for communicating with th mooring crew and service boats.

Vessels usually approach the berth from a S.S.E. direction and ar stopped some 3,000 ft. off the South end. From this point vessel proceed to and enter berth at dead slow speed between Buoys 5 and 6 Just before entering, the starboard anchor is usually dropped. Th anchor is dragged or paid out accordingly in order to check the vessel' bow. The bow is brought abeam of Buoys 1 and 2 where the port ancho is dropped. Lines are then given ashore and the vessel is backed int final position approximately 40 ft. abeam of the floating beacon markin the pipe-end manifold. When using anchor, caution should be exercise so as not to foul the buoy legs or cargo pipes and hoses.

Usually, 3 powerful service launches are in attendance. Thes launches are suitable for handling the heavier wire ropes. Usually, 2 line are run on Buoys 1, 2, 7 and 8 and one to Buoys 3, 4, 5 and 6. Ther is no particular requirement on whether ropes have to be of wire c nylon. Pilots indicated that they may require, at times when wind fror S.E. is particularly strong, additional lines to be run to Buoys 3 and 5.

Night berthing is carried out with the assistance of the service boats which tie up alongside Buoys 1, 7 and 8 and indicate quite effectivel the approach and entry to the berth.

Vessels calling at the CBM should make use exclusively of wire rope of suitable dimensions, quality and condition.

When leaving, vessel must be towed and engine of tanker shall be a standstill to prevent kinking of hoses caused by strong current generate by the tanker/vessel propeller.

HOSES: 4 strings of hoses are used. 2 strings consist of 3 lengths c 20 in. dia.×30 ft. long and 4 lengths of 16 in. dia.×30 ft. long each.

2 strings consist of 7 lengths of 10 in. dia.×30 ft. Both over the ra hoses of the 2 strings are provided with 12 in. ASA 150 p.s.i. hand operated butterfly valves.

The end of each hose is marked by a buoy consisting of 2 cans welde together. When resting on the sea bed, the ends of the hoses ar attached to these buoys by means of a chain. For lifting the hose onboard, divers disconnect the chain from the cans and pass them t the vessel's derrick hook. The marker buoys remain on the water.

The hoses are connected and disconnected by a shore gang supplie by a contractor. It takes, on the average, about 1 hour 30 minutes t have 2 hoses connected and cargo started. Ullages and carg calculations are carried out concurrently with connecting of cargo hoses It takes about 30 minutes to 1 hour for disconnecting, but this is don concurrently with ballasting operations after discharge.

In order to expedite turnaround time, vessels should arrive with bot derricks rigged for a minimum safe working load of 7 tons.

Blanks at 2 connections of the port manifold should be removed pric to arrival and 2 reducers, if available, should be installed to have th manifolds ready for the 12 in. ASA hose connections.

Safe working load and connections available should be notified t BRC prior to arrival.

Minimum acceptable manifold height above deck is about 20 in Minimum spacing of ship's cargo manifold for connecting hoses t adjacent manifolds is about 18 in.

The hoses when in operation are not suspended from ship's gear bu are fastened to the vessel's superstructure by means of chains.

There are no specific guidelines for disconnecting in emergency. Th hose gang remains on stand-by throughout the operation and can b readily available.

Hoses are to be connected to the vessel's reducers with bolts an nuts fastened to every second hole of the flange.

The maximum pressure requested at the vessel's manifold is 150 p.s

LOADING: *Description of Cargo System:*
Crude is presently received at the 8 buoy seaberth, located abo 2,100 ft. off the end of the Product Pier. The current crude receivin facilities consist of a 28 in. dia. line. The line from the tank to the bert is about 4,700 ft. long. This includes the submerged section from th pier head to the berth of 2,040 ft. The end pipe-line manifold is fitte with 2 outlets. Each outlet is provided with a 20 in. butterfly valve, 20 in. check valve and a 20 in. chicksan swivel joint where current 2 strings of 3×20 in. dia.×30 ft. and 4×16 in. dia.×30 ft. hoses ar connected. The butterfly valves are manually operated by divers. Th other facilities for IFO and Naphtha loading and unloading consist c 2 lines of 14 in. dia. each from the manifold product line at the pier en to the berth of about 2,040 ft. The submerged pipe end manifold consist

of 7 lengths 10 in. dia.×30 ft. hoses which can be connected to each other by a 'Y'-spool for shipboard connection and flushing of line.

The pipe manifold is marked by a floating beacon, and in order not to put hoses under strain, the vessel's manifold should be abeam of this marker at a distance of about 40 ft.

MEDICAL: The Agent will arrange for transportation to and from Manila for crew members requiring elaborate medical or dental attention; otherwise, they will be attended to in Bataan.

FRESH WATER: Supply by barge. Requirements should be included in arrival message. Ample notice is required if water supplied by barges.

FUEL: Bunkering is by barge. Bunkering may take place concurrently with discharging operations. Ample advance notice required.

REPAIRS: There are several repair firms in Manila that can undertake minor repairs. Requirements for repairs should be passed on to the Agent, and briefly outlined in ETA message. Major classification societies available.

GANGWAY: For vessels at the CBM, gangway to be prepared and rigged prior to arrival, on port side.

STORES: Stores and provisions can be supplied by ship chandlers in Manila. Master should radio requirements at least 36 hours before arrival to the Agent so that stores can be transported from Manila to the ship on time. Bonded stores are unavailable, except for local beer. Laundry requires a minimum of 36 hours.

WEATHER/WIND/TIDE: *General:* Although the Bataan Refinery is only 26 miles across the bay from Manila, rainfall data is not exactly the same for both of these locations. This is partially due to the mountain directly behind the refinery, which tends to precipitate the S.W. monsoon immediately as they come over the mountain, dissipating them to some extent by the time they reach Manila.

The average rainfall for the Bataan Refinery is about 98 in. per year varying from 56 in. to 136 in. per year. Maximum and minimum air temperature are about 102°F and 58°F respectively.

Wind and Typhoon: During the typhoon season, from June through September, the winds are predominantly from the S.W. and are known as the S.W. monsoons. In October through January, the winds are from the N.E. For the month of February, the winds are predominantly from the East and in March through May, from the S.E.

The typhoons are frequent during their season and bring with them high winds and heavy rains. The typhoons generally go up the East coast of Luzon, however, late in the year, they cross the land mass.

Range of Tide: For Lamao, data obtained from the coast and geodetic survey of the Philippines are:

Extreme High Water	5.60 ft. (58 year record)
Mean Higher High Water	2.99 ft.
Mean High	2.54 ft.
Mean Tide Level	1.41 ft.
Mean Sea Level	1.36 ft.
Mean Low Water	0.29 ft.
Mean Lower Low Water	0.00 ft.
Extreme Low Tide	2.00 ft.
Mean Tide Range	2.25 ft.

There are no unusual weather conditions associated with these tides.

Intensity and Direction of Currents: A hydrographic survey in February and March, 1958 indicated that current, at its greatest strength, to be not exceeding 1 knot. However, there was sufficient indication that the current is of the reversing type; that is, tidal in nature. Current varies from day-to-day, principally in accordance with the range of tide, its diurnal inequality, and its daily routine, whether diurnal or semi-diurnal. The rising tide is counteracted, to some extent, by the water which enters Manila Bay from rivers, and thereby lessening its velocity. The ebb tide is assisted by this water and accounts for the maximum recorded velocity, which, however, seems always to be less than 3 knots.

Water Density: Salinity varies from a high of 36.1 parts per thousand to a low of 4.6 parts per thousand during a monsoon. The mean salinities are 14 in June, the lowest month, and 34 in May, the highest.

The surface temperature of the sea water adjacent to the site ranges from about 76°F to 90°F.

Tankers arriving at BRC in laden condition should not consider this density variation, which is very difficult to predict and to determine.

Waves: About 2 ft. to 3 ft., based on information given by Pilots.

Sea Bottom: Upper layer of sea bottom is soft mud.

SECURITY: Serious security problems may arise during nighttime and strict surveillance and alertness must be exercised at all times. Guards supplied by a local contractor and arranged by the Agent should be employed at all times. Stores and cabins should be kept under lock.

Vessel's Master, at all times, should take positive steps to prevent smuggling and keep native boats away from the ship and watch for pilferage while the vessel is approaching or is in port. We believe that security guards may be of help and we recommend Masters to use them at all times.

Shore leave may be arranged by Agent. Crews are ferried to and from the CBM to the near local village. Launch service is arranged by the Agent.

Crews of vessels moored at the product pier or LPG pier have also to go ashore by boat since nobody is authorised to pass through the refinery.

EMERGENCY PROCEDURES: BRC is not provided with an anemometer nor specific procedures to vacate the berth under severe metereological conditions. Should weather conditions deteriorate, the vessel's Master, in consultation with the Pilot, Mooring Master, and BRC representative, take the decision to vacate the berth.

A close watch should be maintained for typhoon and weather forecast. At all times, vessels should maintain a state of readiness and engines should be kept on standby and at short notice. No repairs or tank cleaning should be allowed alongside.

BRC REPRESENTATIVE: An employee of a third party surveyor, (representing BRC) boards the vessel after quarantine clearance to co-ordinate unloading operations. A ship-to-shore portable radio is placed on board for communication and controlling ship's discharge only. The BRC representative remains onboard throughout discharge and liaises between shore and ship. During the pre-discharge, sounding and final inspection after discharge, a BRC operator boards and accompanies the third party surveyor.

SHIPMASTER'S REPORT: June 1982.

Pilotage: Arranged by Manila Agent.

Health: Doctor will board and give Free Pratique and perform vaccinations.

Radio: Arrival message to include Master's name and number and nationalities of all crew.

VHF: Contact was made Channel 11 at 25 miles from S.W.

Tugs: One tug stands by during vessel's stay and 1 service boat is available for transportation to and from the shore.

Berthing: The sea berth has 4 buoys each side, with hoses on port side, derrick required and shore hose gang for connecting. Buoys to starboard are numbered 1 to 7 buoys and to port are numbered 2 to 8 from forward to aft in both cases and these numbers are referred to by Pilot when berthing. There is also a Loading Master on the bridge who liaises for ship's positioning regarding hoses. 2 tugs for pushing and 1 tug puts line aboard. 2 service boats for running lines. It is best to have wires without rope tails and service boats are quite powerful enough to run the wires. 1st lines are headline to No. 1 Buoy and stern line to No. 7 Buoy. Then usually No. 2 and No. 8 Buoys, followed by No. 4 and No. 5 Buoys. Usual final moorings are 3 lines each to Nos. 1, 2, 7 and 8 Buoys and 1 each to 3, 4 and 5 Buoys. No. 6 Buoy not normally used unless there is a strong offshore wind. It is advisable to keep a note of the order of putting out ropes in case of letting go during the hours of darkness. On approaching berth it is usual to let go starboard anchor to 2 shackles. The anchor is hove up before commencing to single up on departure.

Medical: If Doctor boards for vaccinations then he will attend to any patients.

Tankers: For Sea berth 2×12 in. reducers, for SBM 2×16 in. reducers.

SECTION (C) BRC — SBM.

LOCATION: Position: Lat. 14° 31′ 32.47″ N., Long. 120° 37′ 48.90″ W.

DOCUMENTS: See Section (B).

RESTRICTIONS: *Water Berth:* 94 ft.

Max. Operating Conditions: Wave height 8 ft. Wind speed 55 m.p.h. and current 3 knots.

VHF: See "Section A".

MAX. SIZE: 300,000 d.w.t. 1,120 ft. LOA. 175 ft. beam and 70 ft. draft.

Shipmaster's Report: March 1987.

Vessel discharged at the SBM.

The characteristics of the vessel are as follows:

LOA 343 m.
Breadth 53 m.
DWT 283,400 tonnes.
Arrival Draft 22 m.

We were allowed to enter with the above draft and did not experience any difficulties on entering through the Southern entrance or at the SBM itself.

At all times we had more than 3.0 m. keel clearance. There is therefore a minimum draft of at least 22 m. at this port.

BERTHING: The SBM is installed in Manila Bay, approximately 1 mile offshore. From the surface, all that is visible is the top of the 23 ft. diameter mooring buoy and 2×800 ft. long strings of floating loading hose. The mooring buoy is painted orange, yellow and white and the hose strings are orange and black spiral stripes. At night the buoy is marked by a white flashing light and the hose strings are marked by 8 white flashing lights. The hose strings will generally float in the direction of current but they may be influenced by the wind direction.

Preparation of the Tanker: Generally, 2 launches should be available for mooring tankers. 1 launch will be used to pass the mooring lines to the tanker forecastle. The other launch will pull the floating hoses to the side as the tanker approaches the mooring and then attach the tanker derrick lines to the hoses in preparation for hose hook-up.

All tools and materials required for the mooring and hose hook-up operations should be placed aboard the hose handling and mooring launches in readiness for passing to the tanker.

Prior to the approach of the tanker, the Pilot or other terminal personnel should ascertain the size of the tanker's cargo manifolds, the capacity of its hose lift derricks, and the arrangement and capacity of its forward fairleads, bollards and winches. If spool pieces, lines and special fittings are required, these should be made ready.

The hoses may be brought to either side of the tanker, although it is customary that they be brought to the port side. The appropriate derrick should be rigged for lifting the end of each hose string. The lift to the manifold of a loaded tanker will be approximately 4 tons. However, a lift capacity of approximately 11 tons will be required to lower each hose string from the tanker in a light condition (based on 70 ft. draft amidships).

A clear area is required adjacent to the manifold for storage of the pick-up buoys. Cables and come-alongs should be rigged to strong points in the vicinity of the manifold to tie-off the hoses.

A boarding ladder should be rigged on the tanker side opposite the operating manifold. Boat ropes should be rigged along each side of the tanker. Messenger lines should be made ready on the forecastle for picking up the hawsers.

The arrangement of fairleads, fittings and obstructions should be studied carefully to determine the best means of securing the tanker to the mooring.

The mooring fittings should be capable of withstanding the appropriate loads. If the environment should worsen to the capacity of the mooring or the tanker fittings then the tanker should apply ahead power, suspend discharging, lower the hoses and leave the mooring.

Each mooring line is provided with three individual tanker chafing chain assemblies as follows: Type "B", Type "C" and Type "D". Type "B" assembly remains connected to the hawser thimble at all times and is for use with vessels of 100,000 d.w.t. – 300,000 d.w.t. having chain stoppers or no conventional mooring fittings. The type "D" assembly is for use with vessels of the same size (100,000 d.w.t. 200,000 d.w.t) but equipped with mooring fittings of the "Smit Lock" design. When required, this assembly is connected to the primary triangular plate in the type "B" assembly, and the remainder of said assembly should be removed from the first Kenter Link until such time as unmooring operations take place.

The type "C" chafiing chain assembly is for use with vessels up to 100,000 d.w.t. and when required should be connected to the type "B" assembly at the first Kenter Link following the primary triangular plate and the remainder of the type "B" assembly removed until such time as again required.

At the end of chain assemblies type "B" and "C" is a secondary triangular plate for connection of the 500 ft. polypropylene pick-up ropes. These ropes are incorporated in the assemblies, strictly for the purpose of winching the mooring assemblies on board the vessel and should on no account be used for mooring. The chains must be brought partway through fairleads on the forecastle and secured to towing brackets, bitts or other fittings on the deck of the tanker.

Experience has indicated that no standard means of securing the chain can be advised since a wide variety of arrangements are apt to be encountered on a tanker forecastle. It is recommended that the chains are secured to Smits towing brackets or chain stoppers if these are available. Otherwise wires or ropes will have to be improvised to secure the chains to ship's fittings. It is important that, whatever means and fittings are used, the arrangement must be adequate to withstand severe loads.

Fairleads as close to the stem as possible should be used to pass the chafing chains. If available, a lead in the centre of the bow should be used to pass both lines. Arranging the mooring lines through fairleads as close together as possible will assure that loads are equally distributed between the lines and will minimise the possibility of parting a line.

Mooring: Prior to making the approach to the mooring, the Pilot and tanker Master should carefully study the wind, waves and current to determine the best approach direction. The approach should be made in the direction in which the tanker can best be handled at very low speed and can best be held stopped in the water. There is adequate depth to manoeuvre a loaded 300,000 d.w.t. tanker (70 ft. draft) within a 3,360 ft. (1025 m.) radius of the mooring buoy.

The side to which the hoses should be brought should also be determined. This is preferably the port side for tankers with conventional right hand screws as the tanker will then move away from the hoses as the tanker moves forward out of the mooring. At the single anchor leg mooring the hoses may be brought to either side of the tanker. In cases where it is evident that the hoses will tend to string to starboard of the tanker during the entire unloading operation, it may be preferable to bring the hoses to the starboard manifold.

The instructions given here assume that the hoses are to be brought to the port manifold. These instructions should be reversed if the hoses are to be brought to the starboard manifold.

The tanker may, if necessary in an emergency, drop an anchor or anchors while approaching the mooring. Anchors should not be dropped, however, within 200 ft. of the mooring buoy, or along the route of the submarine pipe-lines. If an anchor is dropped during an approach to the mooring, it may not be left down after the mooring is completed. A tanker may not remain moored to both the mooring buoy and its own anchor during unloading. Care must be taken not to foul the hose strings or mooring lines in dropping or lifting an anchor.

Just prior to the approach of the tanker to the mooring, the hose launch should pull the hoses to a position to port of the direction of approach. In making the approach the tanker must stay well clear of the hose. During the final approach the tanker should take a course which would pass to starboard of the buoy so that, if the tanker moves too far forward it would safely pass the buoy and not endanger the hoses.

As the tanker approaches the mooring, a messenger line should be passed from the forecastle to the mooring launch. The mooring launch should then proceed ahead and to port of the tanker and make the messenger fast to the port mooring pick-up line. If the large messenger line marker buoys are in position they should be removed from the line and stowed on the launch. The small buoys can pass through the ships fairlead and may therefore be left in position.

At this point the tanker should have only enough headway to carry it within about 150 ft. of the mooring buoy. As soon as the launch is clear, the messenger should be winched aboard the tanker as rapidly as possible. As the mooring pick-up line is winched on deck, it should be coiled on deck. When the chafing chain passes through the fairlead, it should be snubbed in the best manner possible to secure ship fittings.

Stern movement should be used if necessary to avoid overrunning the mooring. The tanker should be allowed to settle back slowly on the port mooring line. Meanwhile, the mooring launch should take another messenger line from the forecastle and secure it to the starboard mooring line messenger. As soon as the launch is clear, the starboard messenger should be winched aboard and the chafing chain made fast to ship's fittings.

Once the tanker is secured to the mooring, the engines should be placed on stand-by. Grease may be applied to the chafing chains at the fairlead to prevent wear. The mooring lines, chafing chains and other mooring gear should be inspected frequently while the tanker is at the mooring.

Connecting the Cargo Hoses: As soon as the tanker is securely moored, the hose launch may tow the ends of the floating hoses to a position beside the tanker manifold. The necessary tools and fittings should be made ready on the tanker deck. The manifold derrick runner should then be lowered to the launch and secured to the pick-up buoy of the hose nearest the tanker.

The hose should be lifted approximately 20 ft. above deck level a the end swung inboard. Make sure the hose is not lying over sha edges at the rail. Anti-chafing material may be necessary to protect t hose. The hose should be securely tied-off with cables and come-alon to strong points on the tanker.

Remove the blind flange from the hose end. There should be danger of oil spillage because the hose remains sealed by the butter valve. Check the "O" ring seal on the quick coupling. The hose can n be connected to the tanker manifold by the quick coupling. The ho lifting chain may now be lowered and the hose marker buoy stow near the rail. the second hose may now be lifted and connected to t manifold in the same manner.

Fit the hand wheels to the butterfly valve gear operators. The tank manifold valve and butterfly valves may now be opened. *The butter valves should be locked in the open position. Under no circumstanc should the hose end butterfly valves be operated while oil is flowi through the hose.*

The shore station should be notified that the tanker is prepared begin discharging. When instructed by the shore station, pumping shou begin. Pumping should begin slowly at first until crude oil is record reaching the shore station and it is determined that the whole syste is operating satisfactorily. The hose launch should inspect the ho strings and the area around the mooring buoy for evidence of leakag

When it is certain that the entire system is operating correctly, t pumping rate may be increased to the maximum rate prescribed by t shore station. The pumping pressure must not exceed 200 p.s.i. Duri discharge, periodical inspections should be made of the manif connection, the entire hose system and the area around the moori buoy. This inspection may be made from the deck and forecastle of t tanker during daylight hours, night or when visibility is poor, t inspection should be made from a launch.

At regular intervals the pressure at the manifold and the quantity cargo discharged from the tanker should be recorded. These figur should be compared with those recorded by the shore station. A marked discrepancy between quantities should be investigat immediately.

It is inadvisable to allow the tanker to get to a completely lig condition. Ballast should be taken aboard as necessary to keep t tanker near ballasted trim with the screw completely submerged at times.

Disconnecting the Hoses and Departing the Mooring: When discharg is completed, the butterfly valves and tanker manifold valves should closed and the hand wheels removed and returned to the hose launc Beginning with the hose string further from the tanker, connect t derrick to the hose pick-up chain with the marker buoy in place, a take up the weight of the hose. Depending on the freeboard of the tank the lift load may be great. Disconnect the manifold connection a replace the blind flange on the quick coupling. A small amount of car may spill into drip pans during this operation.

The hose securing lines should now be released. After both hos are released the hose launch should pull the hoses away from the si of the tanker.

After the hoses have been disconnected and released and the tank has taken on sufficient ballast, the tanker may leave the mooring disconnecting and lowering the mooring lines. The mooring pick-up li should be attached to the chafing chain and the assembly should lowered until the end of the chain is at the water surface. The moori pick-up lines may then be dropped. The tanker should get up steam a may use power to move forward before dropping the lines.

Once the lines are dropped, the tanker may either drop slowly aste until clear of the floating hose or may proceed forward and to starboa to pass beside the mooring buoy on the side opposite the hoses. T tanker may then proceed on its voyage.

SHIPMASTER'S REPORT: September 1983.

Prior to Arrival: Prior to arrival Agent requests (if using SBM) height fro deck to centreline of manifold, distance of manifold flange faces fro side railings and the flange diameter PCD and bolt size manifold reducers. Also requires dimension of fairlead opening, distance of Sm lock pin to fairlead, bracket clearance of Smit lock assembly and p diameter.

Berthing: Our vessel (140,000 dwt.) berthed at SBM during S Monsoon. We picked up one line from the buoy while larger vesse take two lines. PNOC officials will inspect vessel's Smit lock or oth mooring arrangement. Used one tug for berthing with tug's li starboard.

Require Customs clearance before commencement of discharge.

Fuel: Bunker suppliers wanted payment or Agent's guarantee there before supplying.

Circular: Following letter received on arrival:

M/T. . . . . Port of Limay, Bataan
Attn: M/T .The Master/Chief Engineer
Gentlemen:

As in ports all over the world, the quality of the environment ha become a matter of vital concern to the government. Thus, the Port Manila Authorities have promulgated regulations covering wa pollution, oil spillages and indiscriminate dumping of waste.

Our Company, VRV Resources Corporation, in line with t government's ever continuing campaign to keep Manila Bay and t waters surrounding the Philippine archipelago clean from oil polluti service inter-island and ocean-going vessels on the *safe handling* *slops, used oil* and *contaminated fuel.*

To service our ever-increasing clients, we have a fleet of self-propell barges and trained personnel ready to receive and safely dispose potential water pollutants efficiently and without any delay to the ship schedule. This service is our contribution to the government's effort keep Manila Bay clean without any expense to the vessel, that is *fr of charge.*

SECTION (D) BRC – PRODUCT PIER:

The pier is an open concrete structure, finger shaped, extending 840 ft. in an East/West direction from a 280 ft. long causeway. The piling is of steel pipes covered by concrete from the pier deck to just below the lower tide level. There are 3 loading stations on each side (North-South) of the pier equipped with marine loading arms terminating in an 8 in. or 6 in. ASA flange. Ship should be properly installed with required manifold ready for connections.

The structural strength of this pier is sufficient to safely handle up to 30,000 d.w.t. vessels. Stations 5 and 6 are provided with a fendering system consisting of panels made up of vertical members and horizontal walers faced with wooden rubbing strips and backed up by Resilie & T Rubber (Bridgestone) fender buffer units. At the other stations, fender panels, faced with rubbing strips and backed by resilient fender buffers, are used. Stations 5 and 6 are provided with 2 bollards of cast steel material of 50 tons capacity and 3 others of 25 tons which should be sufficient to handle fully loaded "Kure Class" vessels.

The fendering system is designed to absorb the impact of 18,000 d.w.t. approaching at a speed of 1 knot and it is suitable to contain the impact energy of the smaller vessels and barges using this pier.

Barges and vessels' Masters should carry out proper manoeuvring, limiting their approach speed of 2 knots and coming alongside almost parallel or at a small angle of incidence (10° max.).

Should Masters be unable to manoeuvre properly, assistance of a service boat or tug boat should be sought and charged to the vessel's Owners.

Berthing operations are normally witnessed by a BRC representative and claim for any damage is properly filed holding owners of vessels responsible. A fully loaded "Kure Class" vessel, down at her tropical mark and drawing 31 ft. 6 in. may be accommodated at this berth. Vessel would come alongside with her starboard side to, but special care should be exercised for the aft mooring arrangements since the stem of the vessel would be over the pier by about 50 ft. Approach to the pier is somewhat obstructed by the CBM. When going alongside either the North or South side of the pier, use the offside anchor for keeping the bow under control.

Considering the limited width of the dredged basin and presence of cross currents, 2 tugs of 400 h.p. each are recommended to manoeuvre in an out of this berth.

The Northern slope of the – 35 ft. below MLLW basin extends seaward parallel to the South face of the pier. In front of the jetty head, close to and parallel the to North slope of the basin the submarine pipes running to the CBM are laid down. The depth of water above these pipes is not well defined but is certainly less than that of the dredged basin. Deep draft laden tankers leaving or entering Station 5 should at all times avoid passing North of the Northern slope of the basin since a danger of running aground and hitting the submarine system exists.

Masters and Pilots should be aware and read poster placed at the pier end warning mariners of this danger.

Smaller tonnage should also make use of the Pilots and assistance of a service boat (100 h.p.) in view of cross currents when manoeuvring alongside or off Berths 5 and 6.

SECTION (E) BRC — LPG FACILITIES.

Alongside the breakwater, there is a "T"-shaped jetty designed to accommodate LPG vessels. The pier consists of 2 breasting and 2 mooring dolphins. The breasting dolphins are provided with a fendering system consisting of a panel made up of vertical steel members and horizontal waler faced with wooden rubbing strips and backed up by rubber arch fenders.

Maximum dimensions of vessels received at this berth are as follows: LOA 210 ft., beam unlimited, d.w.t. 700 long tonnes. Energy of absorbtion, maximum displacement and speed of approach are not available.

The approach basin to and alongside this berth has been dredged (in 1971) and sounding revealed a minimum depth below MLLW of 18 ft. Therefore, a max. draft of 16 ft. appears safely acceptable at all tidal conditions.

Because of the limited size of the basin and lack of any beacon or buoy indicating its extent, assistance of Pilot should be sought. Also, it would be advisable to request the assistance of a 100 h.p. service boat to enter and leave the basin since the approach and the clearing of the berth has to be made in a parallel direction to the axis of the berth.

LPG is loaded through a Niigata Chicksan loading arm which carries both the liquid and vapour lines. Liquid line is connected directly on the loading arm with a bolted 4 in. flange. The vapour line is connected by a section of 2 in. diameter × 5 ft. long hand rubber hose terminating in 2 in. ASA flange. An additional 2 in. rubber hose is available should vessel's vapour and liquid connection be more than 5 ft. apart.

AUTHORITY: *Operator:* Bataan Refining Corporation, 7901 Makati Avenue, MCC P.O.Box 1053, Makati, Metro Manila, Philippines. *Tel:* 85-90-61/95. *Telex:* 22259 PNO PH, 63667 PNOC PN, 45270 PNOC PM, 14817 PNOC PS. *Cables:* Bataanref-Manila.

SECTION (F) — PLANTERS PRODUCTS INC.

SHIPMASTER'S REPORT: November 1979 (updated 1988).

PORT: Limay: Lat. 14° 34′ N., Long. 120° 36′ E.

DOCUMENTS: 3 copies of Visaed Crew List. The form for the Crew List should be in the approved form and these are available from the Philippines Embassy at the loading port.

4 Copies of Ships Stores List.
7 Copies of Ordinary Crew List.
1 Copy of Maritime Declaration of Health.

APPROACHES: This is a very minor port with 1 berth for discharging dry cargo and 1 berth for tankers. The only conspicuous land mark is a single gantry crane. Limay Port Authority has a VHF station and can be contacted on Channel 13. The vessel has to clear Health and Immigration prior to berthing. The quarantine anchorage and pilot boarding ground is between 14° 30′ N. – 14° 31′ N. and 120° 37′ E. – 120° 38′ E. Immigration and Health Authorities board the vessel (generally only during daylight, especially since the weather deteriorates at night) on arrival and clear the vessel.

PILOTAGE: Pilotage is compulsory. 2 Pilots are available. The Pilots are from Manila and they are stationed at Limay for 2 weeks duration on rotation.

TUGS: 2 tugs are available. They are normally stationed at Manila and brought to Limay when vessel berthing/unberthing at Limay. 6 hours notice has to be given. The large tug is 750 b.h.p.

As per "Pilot" during the months of October-November the surface current runs North-South and the undercurrent which is very strong runs East-West. Due to this, it is very "tricky" while berthing and unberthing. Tankers are not berthed or moored during night. Dry cargo vessels may be berthed at night if weather is good. The pier is not very well lit. Moreover very often empty barges, etc., may be in the fairway to the berth and thus makes berthing or unberthing more difficult.

BERTH: The dry cargo berth is about 500 m. long consisting of 3 concrete dolphins on either side of the crane. The crane is gantry type with 6 tons SWL grabs. The berth juts out from the land and the discharged cargo is directly taken into the factory by conveyor. If there are no breakdowns cargo can be discharged at up to 3,500 tons per day.

Bulldozers are used to collect the cargo in the hold. The crane is fixed and the vessel has to be warped fore and aft if cargo has to be discharged from more than one hold. Stevedores work 24 hours. Berth is mainly used by the Farm Products Co., which imports muriate of potash and urea. They export NPK fertiliser. The maximum depth found alongside by hand lead and line was 48 ft. and minimum 41 ft. (Planter's Products Inc. is not operating, facilities can now be leased from the owners).

There is one wreck near the dry cargo berth where a tanker blew up and sank. The position of the wreck is approximately Lat. 14° 30.3′ N., Long. 120° 37.3′ E. which is marked by an unlit buoy.

DENSITY: Between 1017 and 1020 reducing during rains.

FRESH WATER: Available at berth and at Government Pier at Lamao.

FUEL: Can be arranged from Manila.

REPAIRS: Not available.

STORES: Available but expensive compared with Manila.

WATCHMEN: It is advised to take watchman due to piracy which was reported recently. Generally watchmen are arranged by the Agents.

HATCHES: To be opened by the ship's crew.

CUSTOMS ALLOWANCES: 1 bottle of spirits and 200 cigarettes per crew member.

CARGO GEAR: Not required.

REPATRIATION: Can be arranged. The nearest airport is at Manila which is 2 hours by car.

SHORE LEAVE: Shore leave is allowed. But no crew are allowed to pass through the factory. Boat has to be arranged to take crew to the nearest village next to the factory. The nearest town is Balanga which is the capital of the District. Small mini buses run frequently between Limay and Balanga which is about 20 miles away by these buses.

MEDICAL: Good medical facilities are available at Manila.

SECTION (G) — LAMAO.

DOCUMENTS: See Section (B).

BERTHING: Government owned pier with 2 berths. Depth alongside 13 ft. General cargo loaded and unloaded from small vessels.

STEVEDORES: Contractor has to be notified in advance. A meeting is held at the P.P.A. Office with Agent and Charterer.

FRESH WATER: Available.

FUEL: Available.

SERVICES: Trucking, ships stores, ferry.

BATANGAS (including Tabangao), Luzon: 13.45 N. 121.03 E. **(See Plan)**

See "General" before first port.

PORT LIMITS: Batangas Harbour embraces all waters of Batangas Bay extending seaward up to an imaginary line connecting Cazador Point and Matuco Point.

DOCUMENTS: Upon arrival, the following papers should be forwarded to the Authorities:

2 Crew Lists (visaed).
3 List of Stores, Deck, Engine, Stewards Dept.
3 List of Stores, Firearms, Medicine and Narcotics.
6 Personal Effects Declaration.
6 Inward Manifest.
8 Ordinary Crew List.
Clearance from last port of call
Also see "Shipmaster's Reports".

PILOTAGE: Pilotage for shifting from Quarantine Anchorage, docking and undocking compulsory for all vessels engaged in foreign trade. The vessel is met by the harbour pilot approximately 2 miles South of the wharf. Pilotage for entering the Batangas Harbour and anchoring in the Quarantine Anchorage is optional but pilotage for shifting therefrom or changing in the stream is compulsory for vessel engaged in foreign trade. At least 48 hours before ships arrival, advise ship's Agents of estimated time of arrival (ETA).

Visual Signals, "I need a Pilot" – The single hoist of the International Code flag "G".

Sound Signals – "I need a Pilot" – the International Morse Code "G" or 2 prolonged blast, followed by 1 short blast of the ship's siren.

Pilot Launch: 25 g.r.t. white with a black "P" at both sides of bow and with International Code Flag "H" hoisted. At night time, all around white light on top of a red light in a vertical line, with green and red sidelights.

APPROACHES: "Suggested Approach": From the South between Matuco Point and Malajibomanok Islands, with an opening of 3.5 miles. White flashing beacon on Malajibomanok Island duration 0.3 seconds every 10 seconds visible for 8 miles in clear weather. Islands and point can be approached within 0.5 mile.

Landmarks and Coastal Lights: Government Pier at Bo. Sta. Clara may be approached safely from either direction paralleling its face. Batangas church dome, Bauan church bell tower, refinery stacks and columns and wharves are good landmarks. Batangas Lighthouse is Gp. Fl. (3) green every 5 seconds.

ANCHORAGE: All vessels entering Batangas Harbour shall show their colours and signal letters shall be kept flying until the vessel is boarded by the proper Officials within 2 miles before arriving at the designated Quarantine Anchorage.

1.	13° 45′ 06″ N.	121° 02′ E.	Quarantine
2.	13° 45′ 13″ N.	121° 02′ 14″ E.	for vessels less than 1,000 g.r.t.
3.	13° 45′ 06″ N.	121° 02′ E.	for vessels over 1,000 g.r.t.
4.	13° 45′ 30″ N.	121° 01′ 55″ E.	for vessels over 3,000 g.r.t.
5.	13° 45′ 30″ N.	121° 01′ 42″ E.	
6.	13° 46′ N.	121° 01′ 15″ E.	for Caltex wharf
7.	13° 43′ 35″ N.	121° 02′ 50″ E.	for Shell wharf
8.	14° 42′ 54″ N.	121° 03′ 06″ E.	for Pacific Flour Mills Pier
9.	14° 46′ 18″ N.	120° 58′ 15″ E.	for Batangas Bay Terminals, Inc. Pier.

MAX. SIZE: See "Berthing" and "Tankers".

TUGS: Tug service is not furnished by the two oil refineries. The use of a tug for berthing and unberthing is required. Although a tug is normally available at Batangas it may be necessary to dispatch a tug from Manila. Accordingly, it is important for Masters of vessels to provide at least 48 hours advance notice of ETA to ensure availability of the tug boat.

BERTHING: Berthing may be done any time during the day or at night and Masters should exercise their own judgement in this respect. Vessels moor either port or starboard side to, depending on prevailing conditions.

Batangas Govt. Pier:

	Length (m.)	*Width* (m.)	*Depth* (m.)
Pier I	127.5	15	10.5
Pier II	105.0	15	10.0
	48.0	12	
Pier III	84.0	15	5.0

Bauan and Mainaga Pier:

Bauan: Lat. 13° 46′ 48″ N., Long. 121° 04′ 06″ E.
Mainaga: Lat. 13° 35′ 48″ N., Long. 120° 57′ 12″ E.

Alternative loading or discharging ports, but only in cases when there is congestion at the government piers at the Port of Batangas.

Pacific Flour Mill: Location: The area contained from the Southernmost pile of the Shell Refinery to the area West of Little Tabangao River extending 1 mile Westward.

Max. Size: LOA 492 ft., draft 45 ft.

Pier: Length 93 m. with 142.5 m. causeway, width 7.5 m., depth 14 m.

Special Regulations:

(A) That a navigational and mooring area of 0.5 mile from the Northernmost and Southernmost mooring dolphins of the PFM Pier be free from fish traps and other fishing devices.

(B) That a freeway from incoming and outgoing vessels from the PFM Pier be kept free from all fish traps of any forms, and/or any other fishing devices that may obstruct navigation for a distance of 0.5 mile North and South of the PFM pierhead outside of the 50 ft. depth contour approach to the pier.

Batangas Bay Terminal, Inc: Pier facilities: 3 breasting dolphins 80 m. apart; 2 fender piles (wooden) and 2 mooring dolphins. Causeway 290 m. long.

Max. Size: LOA – 700 ft. Draft – 39 ft.

Location: The Batangas Bay Terminal, Inc. located at 13° 47′ 00″ N. and 120° 59′ 02″ E. It is in Bo. Bolo, Bauan, Batangas, the total area (shoreland) is 5.5 hectares and 18 hectares (foreshore) land.

Special Regulations:

(A) That the area contained between the S.W. site of the BBTI for distance of 1 mile from shoreline North and South be entirely fr permanently from all forms of fishing devices.

(B) That a distance of 100 yards around the pier be entirely free fro all forms of fish traps, fish corrals, fish weirs, etc. and it be "Off Limit to all unauthorised persons, including fishermen and those travelling bancas underneath the said pier.

PNOC Shipping and Transport Corp.:

Max. Size: LOA 340 ft., draft 14 ft. Pier: Length 97 m., width 4.87

PNOC Energy Supply Base:

Max. Size: LOA 426 ft., draft 25 ft.

All vessels proceeding to Batangas should radio either Caltex or She whichever is their destination, their estimated time arrival at Batang as early as possible, but not less than 96 hours before arrival, amendi this ETA subsequently if it varies more than 2 hours from the origin estimate in order to arrange towing gangs with the Luzon Stevedori Corporation.

Vessels loading sugar: See "Iloilo – Shipmaster's Report".

STEVEDORES: Stevedoring is usually handled by Luzon Stevedori Corporation.

MEDICAL: Both refineries have small hospitals for handling emergen cases. Should any ship's personnel need prolonged hospitalisatio arrangement will have to be made to transfer the patient to Manila or the Provincial Hospital of Batangas where suitable medical attention available. Dental treatment can be obtained from local dentists in t town of Batangas.

TANKERS: *Shell Refinery, Tabangao:* Jetty 1: two hoses of 10 diameter. Jetty 2: 4 arms of 12 in. diameter. Slops acceptable 500 t.p.h. up to limit of 3,000 tons.

Two wharves with the following dimensions:

(a) Length 336 m. Concrete	(b) Length 700 m. Concrete
Width 9 m.	Width 9 m.
Depth 15 m.	Depth 15 m.

Crude oil is delivered by tankers of up to about 75,000 d.w.t.

LPG: Report: Dated June 1984.

1. Send ETA to "Shell Gas Manila".
2. Vessel to dock port side alongside.
3. Shore manifolds from stern to bow – Butane – Butane Vapour Propane Vapour – Propane.
4. Shore flange characteristics:
   Butane liquid 12 in. diameter ANSI 150 lb. flat flange.
   Butane vapour 8 in. diameter ANSI 150 lb. flat flange.
   Propane vapour 8 in. diameter ANSI 150 lb. flat flange.
   Propane liquid 12 in. diameter ANSI 150 lb. flat flange.
5. Appropriate cross-overs and reducers for simultaneous discharg of propane and butane (both with vapour return) should be installed ship prior to arrival.
6. Vapour will be returned to ship while discharging.
7. Cargo must arrive as cold as possible. propane at −43°C a butane at −10°C, during discharge. Ship's tanks back-pressure again vapour return must not exceed 80 millibars gauge. To achieve the abo conditions, the ship may have to operate its refrigeration equipment full capacity during the inward voyage and while discharging cargo the port.
8. The ship should provide an accommodation ladder or gangway.

Also see "Shipmaster's Reports" dated April 1990 and August 19

Caltex Refinery Wharf: The Caltex Refinery including the island wha is located North of the government pier and at night can be distinguishe by illumination lighting on its structures and red aviation warning ligh at the top of the columns. A gas flame at the top of the 150 ft. flare sta is also visible several miles from shore. The Caltex Wharves a adequately lighted to facilitate night berthing or unberthing operations desired. LOA 755 ft., draft 41 ft. Jetty designed for 45,000 d.w.t.

Location: Lat. 13° 48′ 24″ N., Long. 121° 01′ 00″ E.
Lat. 13° 46′ 12″ N., Long. 121° 01′ 36″ E. (Service Wharf)

Construction: 2 wharves with the following dimensions:

T-Head: Length 84 m., width 13 m., depth 14 m., with 2 mooring buo 244 m. apart parallel to the berths facing the shoreline.

Island Wharf: 2 breasting dolphins 91 m. apart. Length 16 m., wid 12 m., depth 27 m., with unloading platforms installed in between t dolphins and provided with 2×125 ton quick release hooks a 2×125 ton bollards.

Crude oil is delivered by 200,000 d.w.t. to 300,000 d.w.t. supertanke

Special Regulations:

(A) That a distance of 100 yd. around each of the 2 wharves (includi island wharf) be entirely free from all forms of fishing devices such "bonbons" fish corrals, fish weirs, etc., and that it be "Off Limits" to unauthorised persons, including fishermen and those travelling bancas within the areas.

(B) That a navigational and mooring area of 0.5 miles North and Sou respectively of the limits stipulated be likewise free from fish traps a other fishing devices, but with option to fishermen to fish with hooks with bancas within the said area provided that they do not come with 100 yd. around the jetty.

(C) That a freeway for incoming and outgoing vessels from the Sh Refinery piers be kept free from "bonbons" and/or any other fishi devices that may obstruct navigation for a distance of 0.5 miles Nor and South of the jetty head outside of the 50 m. depth contour approa to the jetty. See "Shipmaster's Report" dated June 1982.

DENSITY: 1026.

FRESH WATER: Fresh water is available to vessels loading, unloadi or bunkering at Batangas Port. It is delivered to the vessel through ho connections. The water satisfies the physical and chemical requireme for drinking water.

FUEL: Bunkers are available from the 2 refineries. Prior advice shou be given through the ship's Agent.

FIRE PRECAUTIONS: At both refineries smoking or open fires a prohibited on the wharves or on vessels alongside or within 100 yar of either wharf. Furthermore, each vessel's personnel is responsible the safety of its own ship at all times.

CONSULS: Consulates are located in Manila.

REPAIRS: *Keppel, Philippines:* (Finger Pier) Total berth of 300 m. with deep water, provides facilities for repair of vessels of up to 5,000 d.w.t.

Cranage: 1×5 ton travelling crane on floating deck; 2×37 ton crawler cranes; 1×12 ton mobile crane.

Hull shop: 80 m.×22 m. covered workshops equipped with 2 units 10 ton overhead travelling crane; 1×750 ton×6 m. long flanging press; 1×500-ton hydraulic portal press.

Machine shop: 80 m.×14 m. covered workshop equipped with 1×5 ton overhead travelling crane, 1×10 m. long×800 m. swing lathe, other lathes, milling machines, drilling machines, etc.

Electrical shop: Facilities for electrical repairs, rewinding, insulation repairs, etc., other shops are pipe and carpenter shop to give full range of services for new constructions and repairs.

PNOC Marine Corporation: Principal Facilities:

Shiplift Drydock:

Lifting Capacity: 7,500 long tons.
Length of Platform: 172.5 m.
Width of Platform: 28 m.
Maximum Draft Liftdock at MLLW without Keel Blocks: 7.97 m.
Elevation at Top of Pier at MLLW: 4.6 m.

Transfer System Parameters:

Total Rated Lift Capacity: 7,500 long tons.
Maximum Lift Capacity: 11,300 long tons.
Keel Block Bogie Jacks: 164 units (maximum).
Outrigger Bogie Jacks: 46 units (maximum).
Rail Lift Cylinders: 120 units (maximum).

Work Berths:

New Construction Berth No. 9: Capacity 7,500 long tons (light displacement weight). Length 168.3 m. Width 27 m.

Repair Berth No. 8: Capacity 7,500 long tons (light displacement weight). Length 168.3 m. Width 27 m.

Repair Berth No. 7: Capacity 5,000 long tons (light displacement weight). Length 108 m. Width 27 m.

Repair Berth Nos. 1 – 6: Capacity 2,700 long tons (light displacement weight). Length 108 m. Width 21 m.

Other Facilities, Buildings and Shops:

Lift Control Building. New Construction/Erection Area. Gantry Crane (50 ton capacity). Whirley Crane (42 ton capacity). Receiving and Control Building. Covered Fabrication Area. Steel Fabrication Shop. Open Storage. Carpentry Shop and Mold Loft. Vehicle Repair Shop. Power Plant. Propane Storage Pad. Flammable Storage. Oxygen Plant. Water Storage Tank. Pump House. Crane Control House. Warehouse. Gate and Control Building. Parking Area. Administration/Clinic Building. Employee Service. Canteen. Outfitting Shop. Piping Storage. Foundry Shop. Transfer Area.

DRY DOCKS: Keppel, Philippines has its floating dock with the following data of information: Max. length of vessels, 110 m.; Max. beam of vessels, 19 m.; Max. draft of docking, 5 m.

CUSTOMS ALLOWANCES: Sufficient for crew's use in port.

REPATRIATION: Pre-arrangement by ship's Agent and/or Master of the vessel and the Immigration Officer assigned on board the vessel.

AIRPORT: At Manila.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); R.P.-U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th); Special holidays declared by the President of the Philippines are also included. If any other legal holiday falls on Sunday the following day is observed as a holiday. Cargo handling work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: PPA Port Police: 725-2882. National Customs Police: 725-2971. Batangas City Police: 725-2125. Ambulance: 725-2890. Fire Department: 725-2470.

TELEPHONES: At present placing telephones on board foreign vessels is not available; however, telephone service is available on the jetty of both refineries.

IDENTIFICATION CARDS: Not required in the Port of Batangas. Pedestrian and vehicle passes required.

DEVELOPMENTS: New coal discharge terminal to be completed for vessels of 100,000 d.w.t., discharge rate 1,600 t.p.h.

Passenger terminal and concrete wharf (550 m.) to be constructed.

GENERAL: *Discharge of Ballast:* No dirty ballast may be dumped into the territorial waters of the Republic of the Philippines. The refineries have provisions for off-loading a limited amount of oil water ballast.

Rat Guards: Rat Guards shall be placed on all mooring lines to the wharves and piers.

Parking Facilities: 7,226 sq.m.

SHIPMASTER'S REPORT: June 1982.

Caltex Island Wharf:

Prior to arrival call "Luzsteveco" (Luzon Stevedoring Co.) on Channel 16 or 11 for berthing information. Berthing is slow as pilot boat runs lines and is not powerful enough to handle big wires. Moorings are 3, 2, 2. We were advised 16 in. reducers but they prefer 14 in. which are more suitable for their hydraulic clamps. 4 surveyors on board for cargo. Boat required to get ashore.

SHIPMASTER'S REPORT: January 1987.

Daylight berthing only at BBTI Pier as berthing dolphins (2) are only 60 m. apart. Also lighting is insufficient. Pilot advises that depth at pier is 45 ft.

SHIPMASTER'S REPORT: May 1987.

On arrival, the Port Officials, Pilot and Agent board the vessel from a tug in the vicinity of Batangas Town and the ship then drifts while they clear the ship before proceeding to the berth. The number of officials are numerous and include the Plant Quarantine Officer who requires a list of all pot plants onboard.

They depart on the tug after completion of formalities.

The following documents are required by Port Authorities on arrival at Tabangao:

9 copies Crew List.
6 copies Crew Declaration List.
6 copies Crew Vaccination List.
6 copies Vessel Information List.
8 copies Stores List.
7 copies Provisions List.
6 copies Narcotics List.
7 copies Plant and Animal List.
6 copies Ammunition List.

Distribution of documents is as follows:

Medical Quarantine Doctor - 1 copy of Crew Vaccination List.

Customs - 5 copies of each document.

Immigration - 2 copies of Crew List.

Plant Quarantine Officer - 1 copy each of Stores List, Provisions List and Plant and Animals List.

Animal Quarantine Officer - 1 copy each of Stores List, Provisions List and Plant and Animals List.

Narcotics Police - 1 copy of Narcotics List.

Coast Guard - 1 copy each of Crew List, Crew Declaration List, Stores List and Ammunition List.

Agent - 1 copy each of Crew List and Vessel Information List.

SHIPMASTER'S REPORT: April 1990.

The following is a copy of a telex received from Pilipinas Shell in Manila.

Quote:

Please advise following information:

(a) Number and Nationality of Crew.
(b) D.w.t. / Beam / Draft on Arrival / Call Sign.
(c) Flag / Port of Registry / Year Built / Owners / Speed.
(d) Voyage No. / Next Port of Call after Batangas.
(e) Last Port of Call / Date Sailed Last Port of Call.
(f) Bill of Lading Details: Figures / Shipper / Bill of Lading Date.

The following documents are required by Port Authorities on arrival at Tabangao:

1. 12 copies Crew List.
2. 6 copies Crew Declaration List.
3. 6 copies Crew Vaccination List.
4. 6 copies Vessel Information List.
5. 8 copies Stores List.
6. 7 copies Provisions List.
7. 6 copies Narcotics List.
8. 7 copies Plant and Animal List.
9. 7 copies Ammunition List.
10. 5 copies Stowage Cargo Plan.
11. 1 copy Derat Certificate.
12. 5 copies Bills of Lading.
13. 6 copies Port of Call or Voyage Memo.
14. 5 copies Cargo Manifest.
15. 5 copies Parcel List.
16. 10 copies Passenger List.

Grateful if you could arrange distribution of documents before arrival Tabangao as follows:

1. Medical Quarantine Doctor: one original copy of Items 3, 11, 13.
2. Customs: 5 copies each of all documents, except 11.
3. Immigration: 5 clear copies of Items 1 and 16.
4. Plant Quarantine Officer: 1 copy each of Items 5, 6 and 8.
5. Animal Quarantine Officer: 1 copy each of Items 5, 6 and 8.
6. Narcotics Police: 1 copy of Item 7.
7. Agent: 1 copy each of Items 1, 4 and 12.
   Please ensure that a copy of the Bill of Lading is given to the attending Agent to enable us to satisfy Government Regulations on freight remittance.
8. Coast Guard: 1 copy of Item 1.

Please be advised that the following procedure is being applied in port formalities:

(a) Medical Quarantine Officer: Will board the vessel before Customs and Immigration Officers. Kindly prepare to show him your crew's yellow fever/cholera vaccination cards, properly segregated into those with expiring vaccination and those with new vaccination. Also please show him your latest Derat Certificate. You will be required to fill up a form "Maritime Declaration of Health". After Pratique is granted, you can lower your yellow flag.

(b) Customs Boarding Officer: Hand over 5 copies of all documents requested above and your Last Port Clearance. If none, please prepare an explanation why you do not have any Customs Clearance at last port.

He will further brief you with current port regulations, especially the strict regulation against illegal and unauthorised boarders. For your information, the penalty for illegal boarders or unauthorised boarders like women, vendors, is ten thousand pesos.

Kindly ensure that this regulation is strictly followed to avoid any problem and ensure maximum safety of your vessel.

For your information, agents of the communist rebels may pose as hospitality girls with intention to sabotage vessel or terminal. Also, the terminal will not allow berthing with illegal boarders on board your vessel. Further, 3 Customs Officials will be staying onboard the vessel until operation is completed.

(c) Immigration Boarding Officer: Please hand over all travel documents: Passport and Seaman's Book of crew members for verification. If you do not have a valid crew visa on board issued by the Philippine Consulate, kindly prepare a brief explanation as to why you do not have a Crew Visa, and address your letter to the following:

Commissioner of Immigration and Deportation.
Thru the Alien Control Officer.
Port of Batangas.

The Immigration Officer will be inquiring whether you need to have shore passes. Accept the Immigration Officer's offer of shore passes for all crew. Please advise early of any intended crew changes at Batangas (crew signing on/off). If you have any signing-off crew members for repatriation, please prepare a referral letter on your ship's letterhead with the following format:

Quote
To whom it may concern.
Dear Sir,
The following personnel will be paying off the vessel at Tabangao:
Name Rank Passport No.
This is a certification of their seamen's status and good for whatever purpose it may serve them.
Yours faithfully,
(Master) M.V."........"
Unquote.

Also, please hand over travelling documents of the signing-off crew to the Immigration Officer for stamping/verification, and give same to Agent, who will forward it to Manila to secure their plane tickets if required.

(d) Plant Quarantine: Please hand over required above-mentioned documents.

(e) Animal Quarantine: Please hand over required above-mentioned documents.

(f) Narcotics Police: Please hand over Narcotics List. He will inspect/seal your narcotics cabinet. Ensure that all narcotics are declared in the Narcotics List.

(g) Coast Guard: Please hand over one copy of Crew List.

Please send us your Crew and Vaccination Lists, and your requirements (cash advance, bunkering, crew changes, provisions, expected mails/spares delivery from owners, etc.) in advance to avoid delays due to holidays, etc.

For LPG tankers, there is no land transport between Jetty No. 2 and the Jetty Gate, a distance of approximately 1 km. Crew wishing to go ashore will have to walk this distance. Therefore to avoid inconvenience, joining and signing-off crew should join/disembark the vessel while at anchorage. Also, delivery of requirement should be done before or after discharge, at anchorage. This is due to strict safety regulations of terminal for LPG operations.

SHIPMASTER'S REPORT: August 1990.

The following is a copy of a telex received from Pilipinas Shell in Manila.
Quote:

A. Please prepare following documents and arrange distribution as follows:

1. 12 copies Crew List (5 copies for Customs, 5 copies for Immigration, 1 copy for Coastguard, 1 copy for Agent).
2. 6 copies Crew Declaration List (5 copies for Customs).
3. 6 copies Crew Vaccination List (1 copy for Quarantine Doctor, 5 copies for Customs).
4. 6 copies Vessel Information List (5 copies for Customs, 1 copy for Agent).
5. 8 copies Stores List (5 copies for Customs, 1 copy for Plant Quarantine, 1 copy for Animal Quarantine).
6. 7 copies Provisions List (5 copies for Customs, 1 copy for Plant Quarantine, 1 copy for Animal Quarantine).
7. 6 copies Narcotics List (5 copies for Customs, 1 copy for Narcotics Police).
8. 7 copies Plant and Animal List (5 copies for Customs, 1 copy each for Plant and Animal Quarantine).
9. 6 copies Ammunition List (5 copies for Customs).
10. 5 copies Stowage Cargo Plan (5 copies for Customs).
11. 1 copy Derat Certificate (for Medical Quarantine).
12. 6 copies Bill of Lading (5 copies for Customs, 1 copy for Agent).
13. 7 copies Ports of Call or Voyage Memo (1 copy for Medical Quarantine, 5 copies for Customs, 1 copy for Agent).
14. 5 copies Cargo Manifest (5 copies for Customs).
15. 5 copies Parcel List (5 copies for Customs).
16. 10 copies Passengers List (5 copies for Customs, 5 copies for Immigration).
17. Last Port Clearance: Please hand over to Customs.
18. Vessel Arrival Condition Report (1 copy for Agent).

B. Following is the normal procedure with Port Formalities:

1. Medical Quarantine will board your vessel first. Please prepare your yellow fever/cholera vaccination cards with expired cards separated.
2. Customs/Immigration/Plant and Animal Quarantine will board vessel upon advice of the Quarantine Doctor.
3. Customs Boarding Officer will brief you on the current Port Regulation against illegal boarding, specially "women". For your information, penalty for illegal boarding is ten thousand pesos. 3 Customs Officials will stay on board until vessel sails.
4. Immigration Boarding Officer: Please hand over all crew's Passport/Seaman's Books for verification. If vessel does not have Valid Crew List Visa, kindly prepare brief explanation addressed to the following:

Commissioner on Immigration and Deportation.
Thru Alien Control Officer.
Port of Batangas.

The Immigration Officer will ask if you need shore passes. Please accept the offer of shore passes for all the crew. If you have crew for repatriation, kindly prepare referral letter on ship's letterhead in the following format:

Quote
To whom it may concern.
Dear Sir,
The following personnel will be paying off the vessel at Tabangao:
Name Rank Passport No.
This is a certification of their seaman's status and good for whatever purpose it may serve them.
Yours faithfully,
(Master)
Unquote.

Master's Note: A total of 15 officials boarded and required all the copies prepared and more. Fortunately extra copies had been prepared.

AUTHORITY: Philippine Ports Authority, Port of Batangas, Batangas City, Philippines. *Tel:* 725-2862, 725-3793. *Contact:* Salvador L. Reyna, Port Manager.

AGENT: See "Manila".

BISLIG, Mindanao: 08.14 N. 126.22 E.

See "General" before first port.

PILOTAGE: Vessel should send direct advice to the Pilot or through its Agents 48 hours prior or at the very least 24 hours before ETA by commercial telegraphy.

There is no VHF operated by the Pilot.

Pilot boat is painted black (hull) and white (bridge and mast). International Code Signals used to call Pilot.

Pilot station is located at Lat. 8° 11.4′ N., Long. 126° 21.2′ E.

Pilot boat will be located (if by prior advice/arrangement by Master requiring specific service of meeting vessel outside of entrance and conducting vessel through channel to inner harbour) at Lat. 8° 16.85′ N., Long. 126° 26.50′ E. or 340°, 2.35 miles off Sanco Pt. Lighthouse.

Pilot will always board a vessel (outside of entrance) via the Pilot's or Jacob's ladder on the leeward side of the vessel.

ANCHORAGE: While waiting for a Pilot, the recommended anchorage (at entrance) is at Lat. 8° 16.1′ N., Long. 126° 26.1′ E. on or about this position and/or within an area of 0.5 miles radius from this point.

Quarantine anchorage or inner harbour is based on the point Lat. 8° 12.9′ N., Long. 126° 22.0′ E. to within 0.25 miles radius from this point as centre, otherwise 1 mile North of BBLCI Pier's end.

Working anchorage at stream. When vessel is through with all the port formalities, she has to go to a working area for loading/unloading operations, thus:

BBLCI: Vessels will anchor at least within a 0.5 mile radius from the tip of BBLCI Pier.

PICOP: Is especially preferred during N.W. monsoon at least within a 0.5 mile radius from the foot/base of PICOP breakwater.

Bislig Bay: In general is bounded by a line from *(a)* Sanco Pt. to *(b)* Mawes I. to N.W., thence to *(c)* town of Bislig to the S.W., thence to *(d)* the village of Mangagoy to the S.W., and back to *(a)* Sanco Pt.

MAX. SIZE: 30 ft. at PICOP Pier.

HEALTH: Any vessel can be given Free Pratique if upon inspection everybody is healthy, vessel is clean and all certificates of vaccination are complete. However, if there is a suspicious quarantinable disease, a probationary Pratique should be issued and after 6 days, if it was found out that there was no quarantinable disease at all, Free Pratique will be issued.

RADIO: RCPI, Clavecella and CRC.

TUGS: Tugs normally meet vessel with Pilot at the 5 miles limit and assist Pilot in docking, using ship's lines. 5 available. 4 at 225 h.p. and 1 at 112 h.p.

BERTHING: Berthing is on a first-come first served basis. During the N.E. monsoon berthing is in daylight only for precautionary measures.

BBLCI and PICOP maintain 2 piers and 1 marginal pier.

BBLCI: Pier Position Lat. 8° 11′ 51″ N., Long. 126° 21′ 55″ W. This is an all concrete pier 800 ft. long and 30 ft. wide with berthing space of 550 ft. on each side. Max. draft 28 ft. at seaward end, 22 ft. at shore end. Both sides are protected by dolphins constructed of pile fenders and large tyres as absorbers. Largest vessel to berth at pier at present is 18,500 tons gross. Lumber, veneer, plywood and logs are loaded at this pier.

BBLCI Marginal Pier. For vessels of less than 1,000 tons gross and 10 ft. draft.

PICOP Piers:

	Length (m.)	*Width* (m.)	*Depth* (m.)
Pier I (concrete)	244	8.0	8.8
Pier II	130	17.7	9.1

There are several patches of reefs projecting N.W. of the channel from Sanco Point to the fairway leading to the PICOP Piers. The port therefore should be entered only during daylight.

January, February and March, the season of the N.E. monsoon, makes it difficult for approaching and securing ship because of strong winds and heavy seas.

CARGO HANDLING FACILITIES: Both companies have ample equipment. Fork lifts, lighters, mobile cranes max. lift 50 ton (BBLCI), and 75 ton (PICOP), sideloaders, trucks and trailers.

STEVEDORES: ETA should be advised 2 days before ship's arrival stating workable hatches and gang requirement for berthing and gang arrangement.

20 gangs available, shifts change at 0600 and 1800 hrs. when port is full. If only few ships in port change at 0600, 1500 and 2300 hrs.

MEDICAL: It is necessary for the Agent to receive advance notice if there is serious medical attendance and hospitalisation. However, less serious medical attendance does not need notification. Port of Bislig has hospital facilities with complete cholera, El Tor and typhoid vaccine available.

DENSITY: About 1025 with tendency to become heavier during dry season and on flood tide.

FRESH WATER: Available at East end of BBLCI Pier. The connection is 2 in., situated 100 ft. from the approach, discharge rate 20 g.p.m.

FUEL: Small quantities available. BBLCI maintain 3 tanks for Caltex.

1. Bunker oil tank	30,000 bbls.
2. Diesel oil tank	11,300 bbls.
3. Gasoline tank	5,100 bbls.

Tank trucks available to deliver oil and gasoline.

REPAIRS: May be made to ship's gear and equipment by arrangement with BBLCI. The company have an engine repair shop, machine shop and foundry.

GANGWAY/DECK WATCHMEN: P1.00 per hour for at least 3 men.

OPENING/CLOSING HATCHES: Rigging of booms is done by ship's crew, while opening and closing of hatches is carried out by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle liquor for each man.

AIRPORT: 5 km. distant; daily flights.

HOLIDAYS: On Christmas Day; New Year's Day and Good Friday. Cargo work may be arranged.

IDENTIFICATION CARDS: Needed.

DEVELOPMENTS: More berthing facilities are on the programme for the next 3 to 5 years when the pulp and paper mill is in operation. Installation of more log-processing plants to increase shipments.

GENERAL: Engineering supplies available from BBLCI and PICOP. Dunnage available through BBLCI. Provisions available through chandler or market 1 km. from BBLCI Pier.

SHIPMASTER'S REPORT: June 1978

Bislig Bay – East coast of the Philippines – 8° 15′ N., 126° 25′ E.

Apart from the B.A. Charts, Philippine Charts 4627 and 4664 were used. (Available at Manila).

Directions: Experienced an insetting current along the coast before entering the bay. For High and Low water Bislig Bay see A.T.T. Hinatuan, No. 5057.

(a) The tower at Sanco Point has been destroyed though the foundation (5 m. high) is still visible when not obscured by trees when entering the bay.
(b) All buoys have disappeared.
(c) Beacon B was blown away but Beacons A & C are conspicuous.
(d) Prominent Hill of 920 ft. in the direction of 230° was invisible because of morning mist.

Kept Beacon "A" on bearing 205° till Beacon "C" was 130° and the small island of Agonoy 270°. One way of keeping clear of the shallow depths near the entrance.

Altered course to 230° and steered for the Quarantine Anchorage when Agonoy was 320°.

There is one Pilot available. Pilotage is compulsory. He embarked halfway between Sanco Point and the anchorage from a prao, displaying a large "H" flag.

Berthed starboard side to at the East side of the pier with starboard anchor one shackle in the water slacking away when necessary. Observed a noticeable swell on the other side of the pier.

Moored with 3 headlines and 1 spring forward. Two springs from Hatch 6 leading forward and 2 lines from the fore-end of Hatch No. 5, Hatch No. 6 could not be accommodated alongside the wharf. Inferring not to stow any Bislig cargo in that hatch. It is possible but this hampers the despatch as cargo has to be driven by fork lift truck from the deck of Hatch 6 to Hatch 5.

Two small mooring boats assist in the berthing. On departure these 2 boats assisted in pushing the vessel around.

The normal Quarantine telegram, as for other countries, is not necessary for the Philippines.

Two cabins are required for Immigration and Customs.

Connection with shore: Via the offside gangway and prao. There is a curfew from midnight till 0600 hrs.

Cargo handling: The width of the wharf and the lack of fork lift trucks slowed down operations. Another factor is the presence of another discharging or loading vessel alongside the other side of the pier.

Agency: Agent from Manila Office flew from Manila to assist the local offices.

Fruits and vegetables available.

AUTHORITY: Collector of Customs.

CAGAYAN DE ORO, Mindanao: 08.30 N. 124.40 E.

(See Plan)

See "General" before first port.

ANCHORAGE:

Quarantine Anchorage: Lat. 8° 30.5′ N., Long. 124° 40.5′ E.
Anchorage Area No. 1: Lat. 8° 29.5′ N., Long. 124° 40.5′ E.
Anchorage Area No. 2: Lat. 8° 29.5′ N., Long. 124° 41.0′ E.
Anchorage Area No. 3: Lat. 8° 29.5′ N., Long. 124° 41.5′ E.
Anchorage Area No. 4: Lat. 8° 29.0′ N., Long. 124° 42.0′ E.

DOCUMENTS:

Application for Berth.
Vessel's Information.
Inward and Outward Manifests.
Passenger Lists.
Oath on entering Vessel from Foreign Port.
Oath of Clearance of Vessel.
Crew Lists.
Store Lists.
Personal Effects Lists.

PILOTAGE: Pilotage is compulsory for vessels engaged in foreign trade of 100 tons or over, docking or leaving at or leaving the Government Wharf or any privately owned wharf in the Port of Cagayan de Oro.

Notice of ETA should reach the Pilot Association of Cagayan de Oro 24 hours before vessel's arrival. Call Pilot on VHF Channel 16, 3 hours prior to arrival. For purposes of berthing allocation, foreign vessel's ETA should be received by PPA 72 hours before arrival. Approaching vessels are required to blow whistle (2 long and 1 short blast) stop the engine and wait for the Pilot to come. A foreign vessel is met by the Harbour Pilot approximately 2 miles from the wharf except for vessels docking at Philippine Sinter which requires the Pilot to meet the vessels 5 miles from the PSC wharf.

MAX. SIZE: Max. draft of 13 m. alongside, 80 m. from the Northern portion of the quay; the rest 10.5 m. along the quay side.

HEALTH: Foreign ships will clear quarantine on arrival at Cagayan de Oro Harbour. Quarantine officers will board the vessel before the pilot's boat meets the vessel.

RADIO: It is not wise to send ETA of vessel through the radio station. ETA could be best transmitted through the different telegram offices in the city such as RCPI, PT&T, Telefast, Clavecilla and Globe Mackay which is worldwide.

VHF: PPA Port Radio on Channel 16, Pilots on Channels 16 and 12.

TUGS: Tugs for hire are available through the Harbour Pilots Inc.

BERTHING: Berthing may be done any time during the day or during the night. Max. permissible ship's draft along the 80 m. portion from the North of the quay is 13 m. and 8.5 m. along the rest of the quay. The present quay is 868.50 m. in length, giving a total of 11 berthing spaces.

CARGO HANDLING FACILITIES: The port has two cargo handling operators. Phase I is operated by The Gold City Integrated Port Services, Inc. (INPORT). The company has 9×3 ton forklifts; 1×5 ton forklift, 1×20 ton forklift, 1×25 ton forklift; 1×35 ton forklift; 1×10 ton crane; 2×12 ton cranes; 4× 6-wheel trucks.

Phase II is operated by the Continental Arrastre and Stevedoring Company (CASCO). The company has 1×2 ton forklift; 2×3 ton forklifts; 3×3.5 ton forklifts and 1×6 ton forklift.

MEDICAL: Hospital facilities are available in the City of Cagayan de Oro.

FRESH WATER: The Philippine Ports Authority supplies water at the Cagayan de Oro Port. Water is delivered through hose connections direct from PPA's underground water tank. There are 8 outlets at Phase I and 6 outlets at Phase II. Rate 40 t.p.h. per outlet.

FUEL: Vessels are required to apply for bunkering at PPA with a bunkering fee of P25.00 per vessel. Fuel oil is supplied by the local distributors of Petron, Caltex, Mobil and Shell.

REPAIRS: Minor repairs, not to exceed 2 hours, may be allowed for vessels at berth upon approval by the Philippine Ports Authority. Major repairs have to be done at the anchorage.

SURVEYORS: None.

HATCHES: Opening and closing of hatches is carried out by the stevedoring companies.

CUSTOMS ALLOWANCES: Sufficient amount for crew's consumption whilst in port.

AIRPORT: Lumbia Airport is 9 km. from the Macabalan Wharf and is served by regular airlines.

HOLIDAYS: New Year's Day (January 1st), Holy Thursday, Good Friday, Labour Day (May 1st), Araw ng Kagitingan (May 6th), Independence Day (June 12th), Phil. American Friendship Day (July 4th), Bonifacio Day (November 30th), Rizal Day (December 30th).

Special Holidays declared by the President of the Philippines are included. If a legal holiday falls on a Sunday, the following day is a holiday. Normally, the integrated port service works on the vessel regardless of the day except for a 4 hour break in the afternoon of Good Friday, Christmas and New Year's Eve.

POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance: Tel. 35-01 (Northern Mindanao Regional Training Hospital); 30-69 (Medical Centre); 42-21 (Madonna and Child Hospital); 32-66 (Cagayan Capitol College Hospital).

EMERGENCY CO-ORDINATION CENTRE: Philippine Coast Guard Station, Port Area, Cagayan de Oro City. No telephone.

STORING: See "Prelims".

1. Truck.
3. Yes.
4. Yes.
6. Yes.

SHIP SUPPLY SERVICE: The following Chandlers operate in the Port:

Alpha Premier Enterprises, 30 Matilde Neri St., Cagayan de Oro City.

Amity Shipping Agency, 70 Gomez, Cor. Capistrano Sts., Cagayan de Oro City.

Andres A. Maandig, Jr., Corrales Ext., Cagayan de Oro City.

Citizen Protective Agency, 1346 Buara, Puntod, Cagayan de Oro City.

D A Ship Chandler, 248 San Juan II, Lapasan, Cagayan de Oro City.

Doris C. Talaroc Shipchandling, 9-4th Sts., Nazarethe Subd., Cagayan de Oro City.

DVJ Trading, Mr. Obulan St., Capistrano Complex, Gusa, Cagayan de Oro City.

Pair Marine Supplies, 190 CM Recto Ave., Lapasan, Cagayan de Oro City.

Q.C. Magada Shipping Agency, YMCA Bldg., J. Pacana St., Cagayan de Oro City.

IDENTIFICATION CARDS: Seaman's Book and/or Passport, Shore Leave or Liberty Pass.

GENERAL: *Lay-Up Area:*

1. Cabulig Bay, Jasaan Area: Lat. 08° 38.5′ N., Long. 124° 45.5′ E.
2. Tagoloan Area: Lat. 08° 31′ 24″ N., Long. 124° 44′ 42″ E.

DEVELOPMENTS: *Phase II Port Expansion Facilities:*

The following port facilities are provided in the Phase II port expansion project:

1. Quay Length – 415 m. Depth – 10.5 m.
2. Container Freight Station – 5,000 sq.m.
3. Open Transit Shed – 5,000 sq.m.
4. Marshalling Yard – 12,757 sq.m.
5. Paved Open Storage Area – 8,420 sq.m.
6. Unpaved Open Storage Area – 22,800 sq.m.
7. Two Weighbridges and Control Gate – 50 tons.
8. Water Supply Hydrants – 7.
9. Access Road – 1 km.
10. Standby Power Generator – 400 kVA.
11. Reefer Outlets – 6.

This project was completed on November 30th, 1986.

SHIPMASTER'S REPORT: June 1978 (Updated 1988).

Anchored 4.75 cables, 337° from the lighthouse. (F.R. 58 ft.) lowered 4 shackles into the water and after dropping slacked away to 7 shackles in the water in 50 fathoms of water.

Moored port side to owing to the distribution of the cargo in hatches Nos. 5 and 6. The Pilot prefers to berth starboard too.

Fore and aft springs, use nylon ropes (no wires, to facilitate the handling by the boat crews). Small tugs push vessel alongside. Anchor lowered with 1 shackle in the water, slacking away when necessary.

Cargo handling was good. Pallets were nicely stacked on the wharf. Provisions, vegetables and fruit, available.

Recommendation: Arrivals at daylight only. Consult Agents before signing papers.

AUTHORITY: Philippine Ports Authority, Port of Cagayan de Oro, Port Management Unit, Macabalan, Cagayan de Oro City, Philippines 9000. *Tel:* 44-48, 45-48. *Contact:* Regino R. Labilles, Port Manager.

CEBU, Cebu Island: 10.18 N. 123.53 E. (See Plan)

See "General" before first port.

GENERAL:

Port of Cebu City: General Description:

Situated at the city frontage between Cebu and Mactan Island. 4,474 m. of quayside (including international and domestic zones).

3 finger piers at 155 m.×32.8 m. The international zone has a length of 451 m., excluding the 2 finger piers.

3 government transit sheds on each pier with a total area of 6,264 sq.m.

Total port area is 423,245 sq.m.

Port District of Cebu:

(a) The National main Port of Cebu.

(b) Aside from the main Port of Cebu, there are 11 other ports within Cebu Harbour namely:

1. The Ludo Private Port.
2. The Mandaue Municipal Wharf.
3. Ouano Private Wharf.
4. San Miguel Corp. Private Wharf.
5. Fil Oil Depot Private Pier.
6. General Milling Corp. Private Wharf.
7. Matimco Private Wharf.
8. Opon Municipal Wharf.
9. Mobil Oil Depot Private Wharf.
10. Caltex Oil Depot Private Wharf.
11. Shell Island Depot Private Wharf.

PORT LIMITS: The Port Limits of Cebu: Cebu Harbour as that part of the Strait between Mactan Island and the Island of Cebu within the following boundaries: an imaginary line extending from Bantolinao Point, Mactan Island, due North (true) to the Island of Cebu; and an imaginary line extending from Lawis Ledge, Mactan Island, to Lipata Point, Island of Cebu.

DOCUMENTS: *For Entry:*

7 Copies of the Inward Foreign Manifest listing therein all cargoes to be discharged in the port.
4 copies of the Cargo Stowage Plan.
3 copies of the Stores List.
3 copies of Bonded Store List.
3 copies of Firearms and Ammunition List.
3 copies of List of Drugs and Narcotics.
3 copies of Passenger List.
3 copies of Crew List.

The original copy of the Manifest for all through cargo destined for other ports to be deposited with the Customs Inspector on board.

For clearance:

3 copies of Post Office Clearance (for mail discharged or loaded).
3 copies of Request for Clearance.
5 copies of B.C. Form 101 (Customs Inspector report on departin vessel).
5 copies of B.C. Form 98 (Clearance of Vessel to Foreign Port).
5 copies of B.C. Form 198 (Oath of Master).
3 copies of Quarantine Clearance.
1 copy of Plant and Animal Quarantine Clearance.
7 copies of B.C. Form 88 (Outward Foreign Manifest).
6 copies of B.C. Form 88–A (Statistical Supplement).
5 copies of Master's Oath covering list of officers on board.
5 copies of Crew List.

PILOTAGE: At least 48 hours before arrival, the Shipmaster sha transmit to the ship's Agent in Manila through the Coastal Station, Manil Radio (DSZ, operated by the Association of International Shippin Lines), a message indicating the ship's position and the estimated tim of arrival (ETA).

In turn, the ship's Agent shall pre-arrange the meeting time at th designated boat station through a telegram to the Cebu Harbour Pilot Association.

Boat Station No. 1:

1 mile off Black Buoy No. 1 in the vicinity of Bantolinao Lighthous Mactan Island for foreign vessels coming from the North of Cebu Harbour

Boat Station No. 2:

1 mile off Lauis Ledge, Mactan Island for foreign vessels coming fro the South of Cebu Harbour.

Visual Signals: Request for Pilot. The single hoist of the internation code flag "G".

Sound Signals: Request for Pilot. The international morse code "G" 2 prolonged blasts, followed by 1 short blast of the ship's whistle.

Pilot Boats:

During night-time:

1. All around white light on top of a red light in a vertical line.
2. Side lights.

During daytime:

A motor launch of approximately 20 gross tons, with the single hoi the international code flag "H".

APPROACHES: *Fairway:* Vessels can enter the harbour through th narrow strait either from the Northeast or from the South. With th construction of the Cebu-Mactan Bridge, large ocean going vessels hav to take the South entrance. The Northeast channel is narrow. It has navigable width of at least 50 m. and a controlling depth of 8.8 m. It comparatively straight and properly marked with beacons, buoys an lights for navigational guides. The channel from the Southern approac is wider. It is 805 m. or 0.5 miles wide at the narrowest point.

Navigational Aids: To achieve maximum safety to sea navigation, th port is equipped with the following safety facilities:

The Cebu North Channel: Black Buoy No. 1, Red Buoy No. Bantolinao Light Beacon No. 3 and White Beacon Fronting Pier No.

The Cebu South Channel: Lawis Lighthouse and Red Buoy No. Black Buoy C No. 3, Black Buoy C No. 1, Red Buoy C, Beacon No. Capitol Light, Ludo Wharf, San Nicolas Church Red-Lighted Cross.

ANCHORAGE: *North Stream:*

(a) 1st Anchorage: In front of Pier 3 in position, Lat. 10° 17.8′ N Long. 123° 54.90′ E. Depth MLLW=4 fathoms.

(b) 2nd Anchorage: In front of William Lines Warehouse in positio Lat. 10° 18.0′ N., Long. 123° 55.25′ E. Depth MLLW=5 fathoms.

(c) 3rd Anchorage: In front of Aboitiz Terminal in positio Lat. 10° 18.2′ N., Long. 123° 55.5′ E. Depth MLLW=6 fathoms.

South Stream:

(a) 1st Anchorage: Opposite Ludo Wharf in positio Lat. 10° 16.88′ N., Long. 123° 53.43′ E. Depth MLLW=6 fathoms.

(b) 2nd Anchorage: N.E. of Kawit Island in position, Lat. 10° 16.54′ N Long. 123° 53.33′ E. Depth MLLW=8 fathoms.

(c) 3rd Anchorage: Lat. 10° 16.17′ N., Long. 123° 53.28′ E. Dept MLLW=6 fathoms.

(d) Explosive Anchorage: South of Lipata Point, West of Lawis Ledg

Anchorage Instructions:

(a) Only 3 vessels of 600 ft. overall length can anchor at the anchorag with a safety margin for dragging and swinging during bad weather wi 4 shackles in the water recommended for safe anchorage.

(b) For each vessel of 600 ft. overall length with 4 shackles of anch chain in the water, approximate turning circle radius is 960 ft.

RESTRICTIONS:

1. Foreign ships are not allowed to pass the North Channel, due the bridge between Madaue and Opon. However, ships of 80 ft. vertic height from MLW and length of 300 ft. may pass with utmost care.

2. Draft limitation of 40 ft. for Cebu Channel while port establishe berthing spaces vary from 10 ft. up to 30 ft.

3. Ballast, oil are prohibited to be discharged within the Cebu Harbo and Philippine waters.

MAX. SIZE: See "Berthing".

HEALTH: Pratique obtained after Quarantine personnel have boarde mustered crew and passengers, and examined ship's health document Pratique automatic if vessel coming from another Philippine port.

RADIO: Globe Mackay & Radio Corp. Call letters DZM. (Other call lette and frequencies available).

Working Frequencies: 4328 kHz, 6492 kHz, 8656 kHz, 12984 kHz.

Listening Frequencies: 425 kHz and 500 kHz; 6258.5 – 6265.5 kH 8354 – 8374 kHz; 12531 – 12561 kHz.

Master may contact Cebu Stevedoring Company through Channel (156.7 MHz) and Channel 2 (157.8 MHz) VHF.

VHF: Harbour Pilots may be contacted on VHF Channel 16.

Vessels are to call "Cebu Pilots" 2 hours prior to arrival advising the if coming from the North or South.

TUGS: The Cebu Harbour Pilots Association has available tugs varying h.p. When additional h.p. is required, National Stevedoring an Lightorage Corporation can provide for more powerful tugs of varyi capacities.

BERTHING: Berthing may be done at any time during the day or at night and Masters should exercise their own judgment in this respect. Vessels moor either port or starboard side to, depending on prevailing conditions.

Port of Cebu: Berthing of vessels engaged in foreign trade are limited to moor only at the following berthing areas.

(a) Cebu International Port:

Berth Number	*Length of Berthing space* (m.)	*Draft Limitation* (ft.)
1	172.5	30
2	172.5	30
3	172.5	30
4	172.5	30

1×35 ton and 1×25 ton level luffing cranes for containers; 3×25 ton fork lifts; 3 top loaders × 20 tons capacity; 10 reefer points; 14 trailers; 2 prime movers; C.F.S. of 6,480 sq.m.; open storage area of 10,000 sq.m.

(b) Ludo Private Port: Berthing of vessels engaged in foreign trade at Ludo Private Port are moored to concrete dolphins running N.E. or S.W. of the Ludo Pier. Draft limitation: 40 ft.

Port Establishment of Mandaue: Berthing of vessels engaged in foreign trade are not allowed at Mandaue. Draft limitation: 12 ft.

Port Establishment of Mactan: Berthing of vessels engaged in foreign trade are allowed at General Milling Corporation Private Wharf, and Shell Island Depot Private Wharf.

Port District	*Draft Limitation* (ft.)
General Milling Corp. Pvt. Wharf	25
Opon Municipal Port	15
Mobil Oil Depot	25
Caltex Oil Depot	25
Shell Island Depot	30

Cebu is a principal port of entry open to both foreign and domestic trade.

Other Ports of Entry under PMU-Cebu.

I. Mactan. Another port of entry, N.E. of the Port of Cebu City. Considered as an industrial port, it has jurisdiction over all of Mactan, Shell and Olango islands. Average ship call is 145 vessels (foreign and domestic) per month.

Other ports of entry under the jurisdiction of PPA-Mactan but owned by private entities are:

General Milling Corporation – A 275 m. private marginal wharf with an average depth of 12.20 m. Foreign vessels usually carry raw wheat materials for processing at GMC mills.

Mobil Oil Philippines – 97 m. long with an average depth of 9.90 m. Has total storage capacity of 424,162 bbls. Used exclusively by tankers.

Caltex – Shell – 156.34 m. long with total storage capacity of 273,750 bbls.

II. Tagbilaran. Situated at the S.W. portion of the Island-Province of Bohol, the Tagbilaran Port has a total area of about 10,393.48 sq.m. Average depth is 3.28 m. (This is an ongoing project. Reclaimation to 90 m. × 28 m. × 6.30 m. depth).

Pilotage is compulsory which is handled by the Tagbilaran Harbour Pilots Association.

Philippine Sinter Corporation (PSC) Private Port: Situated in Garcia Hernandez, S.E. of Bohol and is 53 km. from Tagbilaran City.

III. Other Private Ports which also serve as Ports of Entry.

Atlas Consolidated Mining & Development Corporation (ACMDC) at Sangi, Toledo. Under the jurisdiction of the PPA Sub-port of Toledo, this private port caters to ocean-going vessels which unload imported machinery and equipment, anhydrous ammonia, sulphuric acid among others. While those exported are copper concentrates and pyrite cinders.

Durano Private Port in Danao, Cebu.

APO Cement Corporation Private Port in Tina-an Naga, Cebu.

Philippine Mining Service Corporation Private Port, located at the Municipality of Dalaguete, Cebu caters to foreign vessels to load dolomite with the use of conveyor belts.

National Power Private Port, located at Tina-an Naga, Cebu caters to foreign and domestic vessels to load or unload coal.

Total Bulk Corp. in Mandaue City.

Prime White Cement in Asturias, Cebu.

Petrophil Corp. in Mandaue City.

BRIDGES: The Opon-Mandaue Bridge crossing the North channel is completed and open to traffic. According to Cebu Pilots Association, clearance is 76 ft. at HW and 80 ft. at LW.

STEVEDORES: Ordered by Agents, no ETA to stevedores necessary from Master.

Cranes (50 ton floating crane), forklifts, trucks, tugs, barges and lighters are used for cargo handling and are mostly owned by private contractors.

MEDICAL: No advance notice to Agents needed. Hospital facilities available anytime.

TANKERS: See "Berthing".

DENSITY: 1030.

FRESH WATER: Most berths supplied by shore installation, otherwise by barge or trucks.

FUEL: Fuel oil can be obtained by arrangement with the different oil installations on Mactan Island (Shell, Caltex and Petrophil).

FIRE PRECAUTIONS: Tankers discharging: Smoking only allowed in saloon (officers), crew in the messroom.

CONSULS: Norwegian 9-77-20; Chinese 7-45-85; American 7-31-51.

REPAIRS: Minor repairs possible.

DRY DOCK: Cebu Shipyard – Dry dock: 160 m.×30 m.×6.0 m. on sill. 6 slipways, max. size 6,000 d.w.t.

SURVEYORS: Jardine Surveying Services.

GANGWAY/DECK WATCHMEN: Services of watchmen necessary subject Master's recommendation.

OPENING/CLOSING HATCHES: Stevedores, with aid of ship's crew.

CUSTOMS ALLOWANCES: (Tobacco) 1 carton a week for each crew member. (Wine and/or Spirits) 1 bottle a week for each crew member.

REPATRIATION: Facilities available.

AIRPORT: Distance 7 miles from port and regularly served by all domestic airlines.

HOLIDAYS: Cargo can be arranged during holidays, which are the following: New Year (January 1st); Holy Thursday; Good Friday; Bataan Day (April 9th); Labour Day (May 1st); Independence Day (June 12th); Republic Day (July 4th); Bonifacio Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th).

SERVICES: Compass adjusting services available. Contact Captain Chong at G.P. Shipping Lines or Captain Basa at Aboitiz Shipping Lines.

SHORE LEAVE: Possible after clearance from Immigration.

IDENTIFICATION CARDS: Required by Immigration Authorities.

DELAYS: Berthing on North side of piers depends upon tide and current. South side of piers, vessel can dock any time.

PROPOSED PORT DEVELOPMENT:

Future Port Development:

Reclamation of an additional area in the shallow basin Northward of the existing port will serve as the room for expansion of the proposed facilities. The area is divided into three development stages with varying implementation schedules, depending on its viability.

The proposed reclamation will have wider potential back-up areas, less constraints in layout design and the availability of the areas for Stages II and III for future expansion of cargo handling facilities. The disadvantages include the shortage of suitable fill materials, the probable settlement in the newly reclaimed areas and longer construction. (Detailed surveys and soil investigations have already been completed for these sites).

AUTHORITY: Philippine Ports Authority, Port of Cebu, MacArthur Boulevard Extension, North Reclamation Area, Cebu City, Philippines 6401. *Tel:* 9-18-59, 7-08-15. *Cables:* PPA-Cebu. *Contact:* Leopoldo F. Bungubung, Port Manager.

AGENT: See "Manila".

DADIANGAS (General Santos City), Mindanao: 06.06 N. 125.09 E. (See Plan)

See "General" before first port.

PORT LIMITS: Port of General Santos embraces all that portion of Saranggani Bay bounded by an imaginary line extending across the bay from Tampuan Point to Sumpang Point, thence along the shoreline until the point of commencement (Lat: 06° 06′ N., Long: 125° 09′ E.). This shall include all foreshore areas and delineated port area of Makar Wharf.

DOCUMENTS: Vessels calling at General Santos are required upon entry to submit to the Philippine Ports Authority the following: 2 copies of Inward Manifest, Passenger and Crew Declaration List, 1 copy of Cargo Storage Plan, and Hatch List and Vessel Particulars.

PILOTAGE: Pilotage is compulsory for all vessels of foreign registry of 100 g.r.t. and over, and domestic vessels of 50 g.r.t. or over. The Pilotage District covers the waters and harbours of the Port of General Santos, Milbuk, Saranggani Bay, Glan, Kiamba and other ports of South Cotabato.

Pilot Boarding Ground: One mile East of Dole Pier by a red and white pilot launch flying the "H" flag. Privately owned pilot launches are used by the Harbour Pilots in serving vessels calling at General Santos. The pilot launches are painted white and red with the marking "Pilot" at their bows and fly a small Philippine flag and the red and white flags. These launches are stationed at the Western end of the quay.

One Pilot is on duty for 5 successive days on a 24-hour basis with one Harbour Pilot as reserve.

Docking Priority: As a general rule, the port has adopted the "first-come-first-served" basis in determining berthing priorities of vessels, subject to the exceptions hereinafter provided. Vessel's arrival means the time a vessel drops anchor at the Anchorage Area when there is no available area at the time a vessel reaches the port's Boarding Area when a berth is available.

Navigation Signals:

The following signals are recognised by all Pilots:

The pilot jack hoisted at the fore.

The international code signals or P.T.

The international code signal P.T. by flashing lights.

APPROACHES: At sea, navigating towards Dadiangas, there is only 1 navigational marker (Tinoca Point in Saranggani Strait) and that is an approach from the open Pacific, about 40 miles from Dadiangas. There are no buoys, beacons or other radar targets. The sea and harbour approaches are open and free of obstruction, and there is deep water almost to the beach, all the way into Saranggani Bay. The only apparent hazard on approach are the numerous fishing craft that are fishing at night and working along the traffic lane. Nevertheless, the fishing craft are well lighted.

ANCHORAGE: Vessels drop anchors at the designated area along the Saranggani Bay Cove near Barangay Bula Zone and just off the city. Vessels proceed immediately upon arrival to the anchorage area either to wait for berth at the public or private wharves or to wait for Customs boarding formalities and quarantine.

Anchorage of vessels is prohibited at the Fairway area, between the Dolefil Pier and Makar Wharf.

RESTRICTIONS: No restrictions on entering the harbour limits even at night time, but shipping Agents must notify and secure permits from the Authorities before incoming vessels are allowed to enter.

MAX. SIZE: LOA 151 m., max.draft 7.5 m., max.beam 20 m.
HEALTH: Foreign vessels calling at the port are inspected by Immigration Officers to determine whether the vessels observe quarantine rules and regulations or whether the vessels are free from any quarantinable or communicable diseases.
RADIO: There is a privately owned radio installation in Dadiangas which should be listened to for special instructions and late priority needs.

Dadiangas	– Dole/Stanfilco Marine
Call Sign	– DXA2
Frequency	– 8722
Power	– 250 to 300 watts
Open	– 0630 to about 0700 hrs. daily.
	– Special arrangement can be made provided the station has been advised earlier.

When at anchorage, 1 hour's notice of berthing is to be given on VHF Channel 16 by the ship sailing into the wharf.

Estimated Time of Arrival (ETA) Notices:
The Master of the vessel sends a radio message to the ship's Agent in Manila containing advance shipping information as follows: name of vessel, port of destination, discharging/loading point (public or private wharf, at anchorage or at berth), ETA, LOA (length overall), estimated draft while alongside (in metres), nature and tonnage of cargo for discharging, and special berthing or cargo handling gear/equipment requirement.

The ship's Agent relays this shipping information at the earliest possible time to the shipping line branch/agency or Agent either by telegram, long distance or radio message which in turn, the branch Agent applies for berthing and/or anchorage allocation at the PPA, Port of General Santos. In the case of foreign or domestic vessel where it has no local Agent, messages are sent to the Harbour Pilot and to the government concerned agencies and its supervisor usually comes to arrange with agencies involved in the berthing/anchorage allocation of the vessel.
TUGS: Two tugs available.
BERTHING: Berthing of vessel is done by Harbour Pilot and assisted by tugboat anytime during the day or night.

Generally, the length and breadth of a vessel entering the approaches of the Port of General Santos do not pose any problem. Vessels always berth head in, starboard side to.

On approach to the dock, walk the port anchor out until 1 shackle is at the water's edge. When about half a ship's length from the wharf, Pilot will order the anchor paid out.

	Length	Width	Depth Alongside
Public Berth:	(m.)	(m.)	(m.)
Makar Wharf	561	20	7.5 – 11.0 MLLW
Private Berths:			
Dole Pier	145	18	11.5
GMC Wharf	47	9	12.6
Congson Pier	(under construction)		

BULK CARGO FACILITIES: Bulk cargoes can be discharged/loaded at Makar Wharf, Dole Pier and GMC Wharf.

Port Services:
a. Port facilities servicing the banana, fish and pine industries with the use of refrigerated cargo container equipment are at the Dolefil Pier.
b. Port facilities servicing copra/by-products and other agricultural products are at Makar Wharf and GMC Pier.
c. Port facilities handling containers using the vessels' cranes or booms are at Makar Wharf, Dole Pier and GMC Pier.

CRANES: 2×40 tons.
SPECIALISED CARGO HANDLING FACILITIES: The port has no cargo handling facilities for Roll-on/Roll-off vessels.
BRIDGES: None.
STEVEDORES: Agent of incoming vessel should advise and arrange gangs with cargo handling contractor at last 24 hours before arrival.
MEDICAL: There are three hospitals in General Santos City: Doctors' Hospital, St. Elizabeth Hospital and the General Santos Emergency Hospital. Shipping Agent makes arrangements with hospitals concerned in advance.
TANKERS: There are no available discharge facilities for tankers at the port except at the designated anchorage area where devices are installed by oil companies to allow vessels to discharge their cargo.
DENSITY: Variable.
FRESH WATER: Supply of fresh water is available alongside the quay. The Authority (PPA) has its own water system capable of supplying fresh water simultaneously to all vessels lying alongside the wharf. Present rate is P15.00 per ton.
FUEL: Supply of fuel or bunkering is done privately by local oil companies. A vessel shall be allowed to refuel at berth provided prior permit from the Authority is secured.
FIRE PRECAUTIONS: As a precautionary measure, vessels intending to refuel at the port are required to provide fire extinguishers for use in case of emergency.
CONSULS: None.
REPAIRS: Minor repairs at berth may be allowed provided that a permit is secured from the Authority.
DRY DOCKS: None.
SURVEYORS: None.
GANGWAY/DECK WATCHMEN: Shipping Agents arrange with private security agencies the hiring of gangway/deck watchmen when the service is needed.
HATCHES: Stevedores usually open and close hatches. But when a vessel is of different model and the hatches are constructed differently, Crew members are requested to assist stevedores.
CUSTOMS ALLOWANCES: Quantity of goods permitted for each Crew member to be held out of bond are goods the crew can use personally, usually one or two bottles of wine and a pack of cigarettes.
CARGO GEAR: Special cargo equipment used in the discharge o loading of heavy lifts can be arranged with private contractor.
REPATRIATION: Shipping Agent can arrange this with the Bureau o Immigration Office.
AIRPORT: There are 2 airports intended for domestic flights: Buayan Airport located 10.5 km. N.E. from the port; and the Allah Valley Airpor in Surallah, South Cotabato is located 75 km. from Makar Wharf. Flights from Buayan Airport: Monday, Wednesday and Friday – 1 morning fligh and 1 afternoon flight; Tuesday, Thursday, Saturday and Sunday – 1 daily flight.
HOLIDAYS: There are about 11 public holidays in the Philippines. Cargo work can be arranged with the contractor during any of these holidays
POLICE/AMBULANCE/FIRE: Use telephone system. Contact is made through the operator.
SERVICES: Aside from the usual services rendered by the port, othe ancillary services which are performed by private contractors ar bunkering, re-watering, victualling, tug assistance, mooring, etc.
SHORE LEAVE: Crew members are allowed ashore provided that a all times there are sufficient personnel on board to attend in case o movement/shifting of vessel lying alongside the wharf.
IDENTIFICATION CARDS: Seaman's Book or shore pass is sufficient
REGULATIONS: PPA gate pass system is enforced to regulate and control the movement of vehicles and pedestrians in the port zone.
DELAYS: Work stoppages due to rain/inclement weather.
GENERAL: The Port of General Santos is considered the country's firs modern port and is equipped with the newly introduced cylindrical rubbe fenders fixed to the wharf's cope line which serve as protectors to both berthing vessels and the wharf.
AUTHORITY: Philippine Ports Authority, Port of General Santos P.O.Box 53, General Santos City, Philippines. *Tel:* 9259
Contact: Carmelo C. Bona, Officer-in-Charge.

DAVAO, Mindanao: 07.04 N. 125.38 E. **(See Plan)**

See "General" before first port.
PORT LIMITS: Vessels enter the port through the Southern entrance of Pakiputan Strait. A vessel is considered to be an "arrived ship" and laytime will commence (subject to Charter-Party Terms) at the Pilot's boarding position located approximately 3 miles off the lighthouse a Sta. Ana Pier.
DOCUMENTS: Required on entry
The Philippine Ports Authority (PPA):
3 Inward Foreign Manifest.
1 Cargo Stowage Plan and Hatch List.
1 Passenger List.
1 Crew Declaration List.
The Bureau of Customs (BOC):
7 Inward Foreign Manifest.
5 Cargo Stowage Plan and Hatch List.
5 Stores List.
5 Bonded Stores List.
5 Firearms and Ammunitions List.
5 Drugs and Narcotics List.
5 Passenger List.
5 Crew Declaration List.
Clearance from last port of call.
PILOTAGE: The pilot station is furnished with a copy of the approved Application for Berthing/Anchorage Permit filed with the Port Authority 36 hours prior to ship's arrival, serving as a notice for meeting an incoming vessel.
ETA Notices: The Master of the vessel sends a radio message to the ship's Agent in Manila through the coastal radio station (DSZ) Manila operated by the Association of International Shipping Lines containing the advance shipping information as follows:
Name of vessel.
Port of destination and discharging/loading point.
ETA.
LOA.
Estimated draft whilst alongside.
Nature and tonnage of cargo for discharging.
Special berthing or cargo handling gear/equipment requirement.

The ship's Agent in Manila consequently relays this shipping information to the local Agent at the Port of Davao either by long distance telephone, telegram or telex. Where the vessel does not have a loca Agent, necessary messages are sent to the Harbour Pilot and GovernmentAgencies directly involved; the supercargo normally comes a day ahead of the vessel's ETA.
Signals: The following signals are recognised by all Pilots:
To ask for Pilot by day:
The pilot jack hoisted at the fore.
The International Code Signals or P.T.
To ask for a Pilot by night:
The pyrotechnic light, commonly known as blue light, flashed every 15 minutes.
A bright white light, flashed or shown at short or frequent interval just above the bulwark for about a minute at a time.
The International Code Signal P.T. by flashing lights.

Pilot Launches: A total of 6 launches are regularly used by the Harbou Pilots distinctively painted red and white with a number preceded by "P at their bows and fly a small Philippine flag and a red and white flag 3 Pilots are posted to attend to all pilotage needs of vessels on an 8 hou shift scheduled for 24 hours. The pilot launches are stationed at Sta. Ana Pier, Sasa Wharf and Hijo Wharf.

The Pilot's boarding position is at 7° 02.0′ N., 125° 39.0′ E.
Shipmaster's Report: June 1987.
Call "Davao Pilots" on VHF Channel 16, 2 hours before arrival, an advise them that you are arriving from the North or South.

ANCHORAGE: General Anchorage.

Sta. Ana Anchorage: Vessels awaiting berth availability, anchor about 450 yards N.E. or S.E. of Santa Ana Pier in 12 fathoms, mud. The anchorage is well protected except during the S.W. monsoon.

Loading Anchorage.

Maco Anchorage: Anchor in 50 fathoms with the sawmill bearing 057°, the white plantation house near the mouth of Madaum River bearing 288°, and, the Western tangent of Bassa Point bearing 223°. The bottom is mud and evidently is good holding ground.

Tambongon Anchorage: Anchorage can be taken in 10 to 20 fathoms with good holding ground.

Bunawan Anchorage: Vessels anchor Eastward of the ruined pier in 8 to 15 fathoms.

Tibungco Anchorage: Vessels anchor Eastward of the ruined pier about 0.5 mile offshore in 12 to 15 fathoms.

Talomo Anchorage: Vessels anchor at the Southwestern part of the bay in 20 fathoms, mud bottom. It is open to the S.W. monsoon.

Daliao Anchorage: Vessels anchor about 300 yards Southeastward of the ruined pier in 8 to 15 fathoms. This anchorage is exposed to Easterly winds and sea.

Tagabuli Anchorage: A deep inlet, 0.9 mile long and about 500 yards wide, is 2.3 miles Northward of Digos Point. The anchorage is protected from winds, except those from E.S.E., is in the middle of the bay in 16 to 20 fathoms, mud bottom, where the width of the bay is about 400 yards between the edges of the reefs.

Malalag Anchorage: Anchorage for vessels of any size and with more protection is Northeastward of the pier in 16 to 19 fathoms, mud bottom. Vessels entering the bay for shelter will find good protected anchorage between the islet near the head of the bay and the North shore in 20 fathoms mud.

RESTRICTIONS: There are no particular restrictions in entering the harbour limits, even at night time, after prior advices have been served and prescribed berth/anchorage permit has been secured from the Port Authority.

MAX. SIZE: Generally, length and breadth of any vessel does not pose a problem in entering the approaches of the Port of Davao, however, berthing in individual ports varies on the ports' facilities and characteristics as listed below.

MAX. SIZE:

Name of Port Facility	Location	Controlling Draft (m.)	Length Overall (m.)	Approx. Heading/ Position	MLLW Elevation (Sea Level) (m.)	Remarks
A. Principal Ports. (Port of Entry).						
1. Sasa Wharf	Sasa, Davao City	10.6	920.0	007°/187°	3.05	General cargo, Foreign, Domestic
2. Sta. Ana Pier	Sta. Ana Davao City	4.0	N–104.4 S–88.5	270°	2.65	General cargo, domestic only.
B. Sub-port of Entry						
1. Mati Wharf (Also see Mati)	Mati, Davao. Oriental	7.3	81.0	—	—	General cargo.
C. Private Ports. (Port of Entry).

HEALTH: Vessels arriving from foreign ports are subject to quarantine inspection at their first port of call in the Philippines. A vessel inspected and granted a Pratique in a Philippine port is not subject to quarantine inspection at its next Philippine port of call except when during the trip there has been a case of illness or death on board or its last Philippine port of departure is infected with a quarantinable disease.

Vessels from the U.S.A., Canada, Australia, or New Zealand are permitted to enter a port, disembark and commence operations provided they have complied with the provisions of the Controlled Free Pratique.

The following are required from the Master:

1. Maritime Declaration of Health duly signed by the Master.
2. Crew List.
3. A valid Derat and/or Exemption Certificate.
4. Cargo Manifest.

For any suspected disease or fever on board, the following will apply:

1. For quarantinable disease, special measures by the Quarantine Medical Officer will be undertaken to prevent its entry.
2. For a non-quarantinable disease, patients should be disembarked and hospitalised and the local Health Officer notified. For non-landing patients, they should be isolated on board and treated.

RADIO: Other than those mentioned under "Pilotage", all messages from vessels to Agents can be sent via Apo Communication Service in Davao City, HF frequency DXF and VHF, DXF-6.

VHF: Radio communication linking Pilot to Philippine Ports Authority uses VHF Channel 16. Everett Steamship Corp. have VHF Radio set capable of connecting a ship in port to local office communications.

RADAR: No radar facilities available.

TUGS: One tug is available for vessels entering the Port. Tugs may be available if pre-arranged with National Stevedoring and Lighterage Corporation.

BERTHING: For details of available berths and types of cargoes handled respectively thereat, see table of port facilities under "Max. Size". Normally, discharging and loading of cargoes are by ship's gear.

CRANES: 65 ton, 35 ton and 25 ton cranes are available at Sasa Wharf and 30 ton cranes at Legoil and Tefasco wharves.

BULK CARGO FACILITIES: Bulk cargoes, if any, are handled at general cargo berths. Loading rate is from 10-20 tonnes per net gang hour at Sasa Government Wharf and various banana berths.

SPECIALISED CARGO HANDLING FACILITIES: There are none available, except for those mentioned as oil berths, all other ports are utilised as multi-purpose berths.

BRIDGES: The fairway is clear of bridges.

STEVEDORES: Upon arrival, the Arrastre Stevedoring Company is furnished a copy of the Application for Berthing Permit which is filed 36 hours prior to ship's arrival. Based thereon, gangs are mobilised as would be necessary to service the size of cargoes to be handled.

Conventional cargoes are worked at the rate of 14 tons per net gang hour at Sasa Government Wharf.

MEDICAL: There is 1 government hospital and 4 private hospitals in the area equipped with adequate medical services and facilities.

TANKERS: Diameter of discharge lines at oil berths range from 1.5 in. – 8.0 in.

DENSITY: Average salinity – 1025.

FRESH WATER: Fresh water is available and delivered either through tank lorries or barges; tank barges also service vessels worked at loading anchorages.

Point of Delivery	Distance (Nautical Miles)	Minimum Delivery (Tons)	Method of Delivery
1. Source	—	—	
2. Sta. Ana	10	50	Barge
3. Sasa	12	50	Barge Lorry
4. Panacan	16	50	Barge Lorry
5. Panabo	24	100	Barge
6. Madaum	29	100	Barge
7. Maco & Malalag	31	200	Barge

FUEL: All grades available – bunkering and other special fuel.

Mindanao Trucking Corp., Lanang, Davao City Tel: 7-55-15, 7-41-33.

Caltex (Phils) Inc., Sasa, Davao City Tel: 7-82-52.

Shell Chemicals Co., (Phils) Inc., Sasa, Davao City Tel: 7-84-91, 7-91-17.

FIRE PRECAUTIONS: At the oil berths, there are no specific fire precautions other than the usual non-smoking precaution.

CONSULS: Japanese Consulate Tel. No. 7-37-81

Indonesian Consulate General Tel. No. 7-84-86

REPAIRS: Engine overhaul; all types of deck repairs; underwater bottom cleaning.

DRY DOCKS: Temporarily non-operational; capacity – 1,600 g.r.t.

SURVEYORS: R. J. del Pan Mindanao Surveyors, Inc. representing Lloyd's, A.B.S., N.K.K., Cargo and Marine Engineers, P&I Club, G.L. and Cargo Gear Bureau.

GANGWAY/DECK WATCHMEN: Watchmen necessary and recommended. Minimum cost per watchman – Philippine P.4.75 per hour; overtime P.6.41.

HATCHES: Normally, opening/closing of hatches is carried out by the stevedores.

CUSTOMS ALLOWANCES: Crew members are allowed to bring out supplies to be held out of bond but not to cost more than P.10.00 per article. Generally, sufficient amount for crew's consumption while in port is permitted.

CARGO GEAR: Ship's gear usually used in loading and discharging. When shore cranes are needed, vessel's notice to Agent should contain the requirement.

REPATRIATION: The Immigration Station can effect crew changes and likewise, allow the disembarkation of alien seamen for repatriation to their countries of origin, provided, they possess valid travel documents. Final repatriation shall be effected in Manila after securing the necessary immigration clearances.

AIRPORT: Davao International Airport, 3 km. from Sasa Wharf. Regular daily jet flights to Manila and other major cities. Turbo-prop services available for other points.

HOLIDAYS: New Year's Day (Jan. 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Araw Ng Kagitingan (May 6th); Independence Day (June 12th); Fil-Am Friendship Day (July 4th); National Heroes Day (Aug. 31st); Bonifacio Day (Nov. 30th); Christmas Day (Dec. 25th); Rizal Day (Dec. 30th). Special holidays declared by the President of the Philippines. Work can be arranged on any holiday with the shipping Agent.

POLICE/AMBULANCE/FIRE: Police Tel: No. 7-26-48; Ambulance Tel: No. 7-27-31; Fire Tel: No. 07.

EMERGENCY CO-ORDINATION CENTRE: Philippine Port Authority, Sasa Wharf, Davao City 9501, P.O.Box 501, Philippines. Main office: Tel: 7-40-12, 7-17-33, 7-47-98; Sasa Terminal Office: Tel: 7-95-86; Sta. ANA Sub Office: Tel: 7-49-54. Mati Sub-port: Tel: 596.

TELEPHONES: No facilities for placing telephones onboard.

SERVICES: Cleaning on board is done either by stevedores or hired deckhands with the use of ship's equipment.

Catering, laundry, Ship chandling also available.

SHIP SUPPLY SERVICE:

Launches Services:

Arcal Development Inc., Corner Guzman & 3rd Ave., Davao City. Tel: 7-69-32, Gen. Manager: Mr. Rafael N. Garcia.

Coco Traders Inc., Corner 2nd Ave., Sta. Ana, Davao City. Manager Mr. Ricardo Ng Suy.

Garcia's Water Transportation, Dona Rosario Bldg., Guzman St., Davao City. Tel: 7-66-60. Manager: Antonio D. Garcia.

SHORE LEAVE: Crew members are issued shore pass by the Bureau of Immigration Officers.

IDENTIFICATION CARD: Seaman's Book is sufficient.

REGULATIONS: All vessel's movements and works thereof are regulated by the Port Authority.

DELAYS: Usual causes of delays are due to non-availability of berth and rain.

DEVELOPMENTS: Proposed construction of 60 m. × 108 m. transit shed and pavement of container stacking area with drainage and lighting system facilities.

GENERAL: Sasa Wharf, St. Ana Pier, and Mati Wharf are government port facilities; the others are privately-owned.

SHIPMASTER'S REPORT: September 1977 (Updated 1986).

Berthing (for bananas):

1. HPI Wharf – Del Monte, Banambo, Fruiti Rita bananas
2. Tadeco Wharf – Chiquita bananas
3. Pacinter Wharf – Dole bananas
4. MCP Wharf – Del Monte bananas.

Berthing (for general cargo):

Sasa Wharf: Max. draft North 14.8 m., Centre 11.0 m. and South 13.5 m.; max. length 920 m. with 1 Ro-Ro berth, 2 container berths and 4 general berths.

Documents:

14 copies Inward Foreign Manifest
12 copies Crew List
8 copies Passenger List
8 copies Narcotic List
8 copies Personal Effects List
10 copies Store List
5 copies Vessel's General Information
8 copies Money List
8 copies List of Arms and Ammunition
8 copies Parcel List
1 copy Clearance from last port
2 copies Quarantine Declaration
8 copies Plant List
8 copies List of Animals

Note: Narcotic List, Money List, List of Ammunition and Arms, List of Plants and Animals may be on the same sheet.

Radio/VHF Communications:

APO Communications DXF and Marphil Radio. The Agents Maritime Company of Phil and Everett Steamship Company are equipped with VHF in their offices.

Hospital: Davao Medical Centre (government-owned); Brokenshire Memorial Hospital, San Pedro Hospital, Davao Doctors' Hospital, Ricardo Limsu Medical Centre. All hospitals located in Davao City.

Identification Card: Not required.

Shore Leave: Curfew hours from 2400 (0000) up to 0400 hrs.

Repatriation: Expensive. Crew to be escorted by one Immigration Officer from Davao City to Manila and all expenses including overtime of Immigration Officer to be charged to Owner's account.

Holidays: New Year – Jan. 1st; Bataan Day – April 19th; Labour Day – May 1st; Independence Day – June 12th; Fil-Am Day – July 4th; All Saints Day – Nov. 1st; Bonifacio Day – Nov. 30th; Christmas Day – Dec. 25th; Rizal Day – Dec. 30th.

Bunkers: Fuel, diesel and lube oils available, clearance takes only a short time.

Shipchandler/Laundry: Available, prices reasonable.

Working Gangs for Painting Cleaning, etc (1986): Foreman: regular time – Peso 5.50/hour; overtime – Peso 7.50/hour. Ordinary workers: regular time – 4.88/hour; overtime – 6.58/hour.

Other charges: Meals. Foreman require 3 meals per day; ordinary require 2 meals per day. Transportation included in working hours.

Repairs of Ship's Instruments: Radar – any type; Radio – any type; Gyro – any type.

Ship Repairs: Minor.

Time: Standard time minus 8 hours on GMT (but 1977 was the first year with Summer time which commenced in March until September.)

AUTHORITY: Philippine Ports Authority, Port District of Southern Mindanao, Anteliz Hotel Complex, Lanang, Davao City; Port Management Office, P.O.Box 502, Sasa Wharf, Davao City 800, Philippines. *Tel:* 717-33, 7-40-12; Sasa Terminal Office 7-95-86, Sta. Ana Terminal 7-49-54, Mati Sub-Port Terminal 596. *Telex:* ITT 48200 or 40104 PPA-Davao. *Cables:* PPA-DAVAO. *Contact:* Bienvenido P. Basco, Port Manager. Capt. Edgardo V. Estarija, Harbor Master. Ernesto J. Fernando, Port District Manager. Rogelio A. Dayan, General Manager.

AGENT: See "Manila."

DUMAGUETE, Negros: 09.15 N. 123.18 E.

Bacong Ammonia Terminal.

PILOTAGE: Pilots/Port Officials come from Dumaguete City, which is approx. 10 km. North of Bacong Terminal.

MAX. SIZE: Max. draft 12 m., max. d.w.t. 20,000 tons.

TUGS: No tug assistance.

BERTHING: Length of pierhead – 40 m. Wooden fenders fore and aft, 40 m. from pierhead.

HOSE CONNECTION: 6 in. single manifold. Pipe-line 6 in. diameter, 300 m. long, leading to shore tank with 6,000 tonnes capacity.

AUTHORITY: Philippine Ports Authority, Port Management Office, Port Area, Dumaguete City 6200, Philippines. *Tel:* 32-52, 25-58, 40-41. *Contact:* Prudencio B. Mercado, Jr., Manager - Port Management Office. Raul V. Merecido, Manager - Port Services Division.

GINGOOG, Mindanao: 08.50 N. 125.06 E. (See Plan)

BERTHING: *Gingoog Municipal Port:*

Location: Gingoog City.

Position: Lat. 8° 50′ N., Long. 125° 06′ E.

Berthing: Reinforced concrete pier, 114 m. long × 12 m. width, with timber pile fenders on both sides. Depth alongside 2.0 m. – 12.0 m.

Indophil Port:

Location: San Luis, Gingoog City.

Position: Lat. 8° 53′ 26″ N., Long. 125° 02′ 23″ E.

Berthing: Reinforced concrete pierhead (6.0 m. × 6.0 m.) for foreign and domestic export cargoes. There are breasting and mooring dolphins either side of the pierhead. Depth alongside 10.0 m. There is a 140 m. catwalk to the shore with a 135 m. long conveyor and 8 in. pipeline for coconut oil.

Close by to the export pier is an import pier (4.0 m. × 10.0 m.) for receiving copra from domestic vessels. Depth alongside 4.0 m. The berth is equipped with a hopper, 110 m. long copra conveyor and a jib crane.

SHIPMASTER'S REPORT: October 1982.

The loading berth for Copra expeller pellets is situated in position Lat. 8° 52.5′ N., Long. 125° 02.6′ E. This is not marked on the Admiralty Charts. There is deep water all around and the approach is fairly safe. The Pilot boards about 1.5 miles N.E. of the berth and approaches in a mechanised canoe with outriggers. Vessel is berthed either side alongside depending on the flood or ebb. No night pilotage. The loader height is sufficient and deep water at the berth. No VHF facilities. Repatriation not possible. Neither fresh water or bunkers can be supplied at this berth. No piracy or thefts but vigilance of security should not be neglected.

SHIPMASTER'S REPORT: January 1990.

Chart: B.A. Chart No. 3810.

Location: The port of Gingoog is situated on the West side of Gingoog Bay on the North coast of Mindanao (position Lat. 08° 53′ N., Long. 125° 03′ E.). The port is about 1.5 miles S.E. × S. from Medina Lt. (Fl.G.5s.). The terminal is owned by Indophil Oil Mills Inc. of San Luis, Gingoog City and is used for the export of copra pellets and coconut oil.

Documents: Visaed Crew List: Vessels arriving from abroad to any Philippine port must be in possession of a Visaed Crew List, issued by a Philippine Consulate at last foreign port. Failure to have such a document can result in the vessel being fined. In addition to Name, Date and Place of Birth, Nationality, Passport No., etc., they require physical details such as complexion, colour of eyes and hair, also height and weight.

An Immigration Officer will stay onboard throughout the vessel's stay in and between all Philippine ports, at the Owners expense.

Note: The number of Immigration Officers staying on board is governed by the number of crew members (one Immigration Officer for every ten crew members).

Officials: At the first port of arrival in Mindanao Island a Supercargo from the Manila Agents, together with a Cargo Surveyor, board the vessel and travel with the vessel to all loading and discharging ports. At each port of call an Immigration Officer and 2 Customs Officers will remain onboard after formalities have been completed and will require food and accommodation.

Pilotage: Compulsory. Pilot comes from Cagayan de Oro. Vessels should send their ETA to main agent in Manila at least 36 hours prior to arrival to enable Manila agent to order the Pilot and Port Authorities.

The pilot boards the vessel about 2 miles from the berth from an outrigger type canoe with an outboard motor. The pilot requires the accommodation ladder to be rigged as the outrigger cannot get alongside a normal pilot ladder.

Anchorage: There are not suitable anchorages so vessels normally drift in the Bay awaiting a berth.

Tugs: None available.

Berthing: Vessels berth port or starboard side alongside dependent on the weather and tidal conditions. An outrigger canoe is used to run the ship's lines to the mooring dolphins so no wire ropes are allowed.

Berth: The berth consists of 4 dolphins orientated 163°/343° with a distance between dolphins of approximately 50 m. giving a berthing face of approximately 150 m. The berth is 150 m. from the shore and the loading tower is 100 m. high with a span of 12 m.

In addition to the 4 mooring dolphins there are concrete dolphins 100 m. either side of the outer berthing dolphins which are set back about 100 m. from the mooring line. The depth alongside the berth at MLLW is 15 m.

Loading: The single fixed loading gantry is fed by the covered conveyor into a flexible steel spout and has a reach of about 12.0 m. The conveyor belt is supported by steel pylons and is angled up to the loading tower which is 100 m. high.

There is a small discharging berth about 70 m. North of the main loading gantry which also has a covered conveyor belt which is fed by a crane and is used by small coastal craft for discharging copra.

The gantry tower, which is 150 m. from the shore, also carries an 8 in. (20 cm.) diameter pipe for the loading of coconut oil.

Vessels up to 60,000 g.r.t. have berthed and the dolphins are well fendered.

Exports: Copra pellets and coconut oil. The pellets are loaded at a rate of approximately 150 t.p.h. – 200 t.p.h., but loading stops for rain or if there is a threat of rain. Coconut oil is loaded through 2 × 6 in. hoses at a rate of up to 300 tonnes per hour.

Cranes: There is a small crane at the end of the discharge pier for unloading small coastal vessels.

Medical: There are 2 hospitals in Gingoog City.

Fresh Water: Only brackish water available.

Fuel: Not available.

Repairs: No facilities available.

Airport: Not available.

General: Communications: There is no telephone or telex at the plant. The local plant uses R/T via Manila Radio for communications. (The agent from Manila had to travel to Cagayan de Oro in order to telephone his office in Manila).

Security: Large scale thefts are prevalent in all Philippine ports. It is advisable to hire private security guards. The cost is not high.

Rescue and Distress: No centre locally.

Ship Chandlers: None available.

Authorities: The port is officially administered from Cagayan de Oro in Macajalar Bay which is about 130 km. by road. They make a special journey to meet each ship. (Also see "Documents").

AUTHORITY: See "Cagayan de Oro".

HONDAGUA, Luzon Island: 13.56 N. 122.14 E.

SHIPMASTER'S REPORT: 1974.

APPROACHES: B.A. Charts 3806 and 3475, neither of which are of very much assistance. There are no navigational marks by night, but the water is deep and we made a comfortable approach by Radar.

PILOTAGE: Minimum 12 hours' notice required. Pilot boards at Siain, a village 10 miles West of Hondagua on the North coast of the mainland. Pilot boat is a small dug-out canoe fitted with outriggers and an outboard motor, and by day exhibits the pilot flag, and at night a single white light similar to a normal fishing canoe. Pilot shouts to attract attention when close to the vessel at night.

DOCUMENTS: Officials embark at Siain but not before 0630 hrs., due to curfew. Accommodation ladder required. All documents required as for first port of entry, excepting quarantine which is not performed twice.

10 Ship's Stores Lists.
8 Crew Personal Effects lists.
12 Crew Lists.
3 Health Declarations.
2 Visaed Crew Lists.
2 Plant Quarantine Lists.
2 Animal Lists.

Officials disembark again at Siain with the exception of the 3 Customs Officers, who remain on board and who require meals and accommodation.

TUGS: Not available.

BERTHING: One berth only, for grain discharge and for coastal tankers supplying fuel to the Mill. Berth lies East/West with approx. depth at LW East Dolphin 28 ft., Elevator about 34 ft. 6 in., and West Dolphin about 39 ft. The berth is thought not to be suitable for vessels exceeding 500 ft. LOA. The dolphins are of timber-pole construction, and the elevator is concrete. Arrival and departure from the berth is during daylight only. Mooring arrangement is 2 head ropes to buoy, 2 breast ropes to shore, spring-wire to bollard on elevator, 4 stern lines to concrete dolphin, and 1 spring-wire to bollard on elevator. An old landing-barge is used as a mooring boat, but this has only one engine on the port side and is not very manoeuvrable. A motorised dug-out canoe also assists, but is not powerful enough to pull a line very far. The elevator has two discharging suckers, but these are fixed and the vessel has to be shifted hatch to hatch. Combined capacity about 80 t.p.h. which could be improved, but foundations of conveyor-belt system damaged by earthquakes.

FRESH WATER: Available at berth but not of very good quality. Ship's hoses required.

AIRPORT: None. There is a train service to Manila, about a 6 hour journey.

CURFEW: Area is under Martial Law. Curfew from 2300 hrs. to 0600 hrs.

ILIGAN, Mindanao: 08.14 N. 124.14 E. (See Plan)

PILOTAGE: Pilotage for docking and undocking at government and privately owned piers/wharves for foreign vessels is compulsory. For domestic vessels pilotage is necessary only when docking. The Harbour Pilot meets the vessel 1 to 2 miles N.W. of the pier. Vessels coming from foreign ports intending to dock at any of the private piers will first anchor at designated anchorage area for boarding formalities.

ANCHORAGES: Anchorage areas are found at least 0.5 to 1 mile from beaches and wharves and the average depth varies from 37 m. to 56 m. The characteristics of the bottom near the beach is muddy. Beyond 0.5 mile is good holding ground of sand and gravel. In case of strong S.W. winds, vessels may resort to the natural protection of the mountains of Initao and Kiwalan.

RESTRICTIONS: See "Berthing".

MAX. SIZE: Max. LOA 240 m. Max. Draft 25 ft. and 15,000 d.w.t. at Pier No. 3 (For foreign-going vessels).

HEALTH: Vessels clear quarantine upon arrival from foreign port. Health Officer boards the vessel 2 miles off the pier at designated quarantine area.

TUGS: The Iligan Harbour Pilot's Association owns 2 tugs both serving the domestic and foreign vessels. The use of tug is necessary especially when docking and undocking foreign vessels on government and private piers. Additional tugs are also available if the Harbour Pilot thinks necessary. It is important that the Masters of vessels/shipping Agents notify the Harbour Pilot at least 48 hours in advance of vessels arrival to ensure the availability of tugs.

BERTHING: Berthing for domestic vessels may be done anytime of the day or night. Foreign-going vessels berth during daylight hours and undock at anytime.

	Length	*Width*	*Depth*
Pier No. 1 (Concrete)	96 m.	12 m.	5.4 m.
Pier No. 2 (Concrete)	96 m.	12 m.	5.4 m.
Pier No. 3 (R.C. Wharf)	240 m.	15 m.	7.62 m.

There are also 8 private ports along the coast of the City of Iligan. (See "Plan").

STEVEDORES: Domestic and foreign-going vessels proceeding to Iligan should cable their Agents or representatives as to their ETAs, at least 24 hours prior to arrival in order that the stevedoring company may assign sufficient number of gangs to the vessel. Later, if the ETA is revised, shipping Agent should immediately notify the Arrastre and stevedoring firm of change. The Arrastre and stevedoring firm that controls the government pier in Iligan is handled by the Iligan Merged Arrastre and Stevedoring Corporation (IMASCO).

FRESH WATER: Fresh water is available to vessels loading or unloading at Pier No. 1 and 3 which is equipped with connection direct from the City Waterworks.

FUEL: Bunkers are available provided prior notice is given through the ship's Agent.

CONSULS: In Manila.

REPATRIATION: Local Immigration takes care of any repatriation or disembarkation provided advance notice and they are given names and destination of each crew member.

AIRPORT: Baloi Airport 15 km. Cagayan de Oro Airport 110 km.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday and Good Friday (movable); Labour Day (May 1st); Independence Day (June 12th); RP-US Friendship Day (July 4th); Thanksgiving Day (September 21st); Christmas Day (December 25th); Rizal Day (December 30th); Special holidays declared by the President of the Philippines are also included. Legal holidays which fall on Sundays are observed the following day. Cargo work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police Tel. 101. City Hospital Tel. 20593. Fire Dept. Tel. 103

TELEPHONES: Placing of telephones on board foreign vessels is not available at present.
IDENTIFICATION CARDS: Not required.
DEVELOPMENTS: Coal Terminal completed at the private port of Iligan Cement Corporation.

The coal terminal is owned by the Philippines Coal Authority. The ship unloader has a capacity of 500 t.p.h.

GENERAL: It is necessary during berthing and unberthing for the ship's engines, tackle and all other gear be in an operating condition and in a state of readiness for use at a moment's notice as required.

SHIPMASTER'S REPORT: 1974
Approaches: B.A. Chart 3426. This is of not very much use as an approach chart as the scale is too small. However, the water is deep and therefore it does not matter too much. On this voyage we made an approach in darkness and solely on Radar, the only navigational light, a fixed red, being very hard to distinguish.
Pilotage: The Pilot boards about 1 mile N.W. of the piers. Pilot boat is a river-type launch about 50 ft. in length with a grey hull and a white funnel.
Anchorage: 2 cables from old harbour piers. 7 shackles in 50 fathoms.
Radio: No VHF facilities.
Officials: Iligan is a Port of Entry. Officials board at the anchorage. Accommodation ladder required. Usual procedures take about 1 hour to 1 hour 30 minutes.
Documents:
20 Ship's Stores Lists.
14 Crew Personal Declarations.
3 Vaccination, and inoculation dates.
3 Ports of Call and dates for previous 3 months.

Immigration: Before leaving last foreign port for the Philippines, obtain 4 official Crew List Forms from the Philippine Consul. Complete these forms and have them visaed by the Consul who will retain 2, and return 2 to the ship. Passes are required for crew members going ashore.
Customs Allowance: 1 bottle and 200 cigarettes per person. 3 Customs officers live on board all the time, and require accommodation and meals.
Tugs: Up to 4 tugs available if required, but it is advisable to give notice of requirements well in advance, since these tugs may be engaged in towing barges elsewhere around the island.
Berthing: Quinalang Cove: 1 grain discharge berth. Depth at berth 40 ft. and ample room for a vessel of 600 ft. L.O.A. Discharge is by sucker direct to the Silo. There are 2 suckers with a combined average discharge rate of 100 t.p.h., but suckers are located in fixed positions requiring the vessel to be shifted hatch to hatch. Berth is well-fendered, with a shore gangway. Stevedores supply a good hatch-tent for working in the rain. 1 bulk-copra loading berth, 600 ft. in length and draft said to be 32 ft. 1 bulk-cement loading berth, reported to be capable of accommodating vessels of 25,000 g.r.t.

Camp Overton: Located South of Iligan, there is reported to be a steel-loading berth to accommodate vessels of 750 ft. length, and 36 ft. draft.
Fresh Water: Available at most berths.
Repairs: Only very minor repairs can be undertaken.
Airport: About 20 miles distant. Daily flights to Cebu and Manila.
Stores: Fresh fruit available, also good supply of seafood.
Time: GMT plus 8 hours.
Shore Leave: Crew members should take special care when proceeding ashore, and should not carry cameras or wear wrist watches, etc. It is advisable to return aboard before darkness.

SHIPMASTER'S REPORT: September 1976 (updated 1988).
Coconut Oil Berth: Located at "Quinalong Cove" 08° 17′ N., 124° 15′ E. Least depth of water in channel from sea to berth – 40 fathoms. Mean tidal range 5 ft. Density 1025. Nature of bottom at berth – mud. Vessels can berth in daylight only, unberthing anytime. This private facility is owned by San Miguel Corporation Iligan Coconut Oil Company.
Anchorage: 3 cables S.W. of City Pier. Depth at LW 70 fathoms, cable should be "walked out".

Vessel's hoses used, length of shore line 300 m., size 12 in. No shore booster pumps used. Products handled, coconut oil and coconut products.
Pilotage: Compulsory. Pilot requires 24 hours' notice and boards 1 mile N.W. of City Pier.

Max. size of vessel that can enter the port of Iligan is 100,000 d.w.t. and draft 45 ft. Keel clearance required, about 2 ft.

5 small and medium size tugs available.

Nearest consuls are in Manila.
Facilities available: Fresh water, 5 t.p.h. Fresh provisions. Laundry.

No slop tanks, surveyor, repair facilities, fuel.
Documents:
2 Visaed Crew Lists (Philippine) from previous port. If diverted at sea, a copy of the diversionary cable required.
6 Ordinary Crew Lists.
6 Personnel Effects Lists.
6 Stores Manifests.
6 Parcel Lists.
6 Arms Lists.
6 Mail Lists.
6 Narcotics Lists.
6 Animal Lists.
6 Plant Lists.
6 Cargo Manifests.
6 Transit Manifests.
6 List of Ports.
6 Currency Lists.

There is a cabin search by 4 Customs Officers, accompanied by 2 Ship's Officers. They collected an undeclared radio and 2 cameras. They did not impose any fine, as they said they had been courteously treated, and this was the vessel's first visit.

3 Customs Officers remain aboard, and have to be fed.

SHIPMASTER'S REPORT: June 1989.
Pilotage: Contact Pilot on VHF Channel 16, 3 hours prior to arrival and give your amended ETA. Pilot will meet foreign vessels to anchor at suitable anchorage for quarantine and customs formalities, prior to berthing at designated piers.
Radio: Radio Telephone (Marine SSB-Voice) available soon.
VHF: Our Agent (OROSHIP) on VHF Channel 16 for Agent's vessel only. Harbour Pilot Station has Channel 16 but for emergency assistance you can call through their facilities.
Medical: There are 6 private hospitals with modern facilities for crew.
Fresh Water: Available at all berths, or by trucks.
Watchmen: Recommended.
Surveyors: Local marine cargo surveyor is Del Pan.
Repatriation: Crew changes can be arranged by local Agent and will exit through Manila International Airport, which is about 1 hour 25 minutes by air from Cagayan de Oro/Iligan Airport.
Banks: Philippine National Bank; Philippine Commercial & Industrial Bank; Development Bank of the Philippines; Far East Bank and Trust Co.; Family Bank of the Philippine Islands; United Coconut Planters Bank.
Services: Oro Shipping Agency offers the following services: Chandling, laundry, chipping / painting, hold cleaning, lashing / shoring gangs, launch service and crew repatriation.

AUTHORITY: Philippine Ports Authority, Port of Iligan, Port Area, Iligan City, Philippines. *Tel:* 21013, 21022 and 21780. *Contact:* Engr. Edwin L. de la Cruz, Port Manager.

ILOILO, Panay: 10.41 N. 122.35 E. (See Plan)

See "General" before first port.
PORT LIMITS: Also see "Anchorage" – last paragraph. Iloilo Harbour is defined as that portion of Iloilo Strait within the following boundaries: an imaginary line extending from the Northern bank of Dumangas River, Island of Panay, across Iloilo Strait to Navalas Point on the Northern coast of Guimaras Island; thence along the N.W. and West shore of Guimaras Island to Luzaran Point thence along an imaginary line extending from Luzaran Point to the South bank at the mouth of Siuaragan River in the municipality of San Joaquin, Province of Iloilo, Island of Panay. Thence along the Southern shore line of the Island of Panay to the North bank of Dumangas River, the point of commencement.
DOCUMENTS:
Bureau of Customs:
1. On Arrival:
   7 Inward Foreign Manifests.
   3 Crew Lists.
   3 Personal Effect Lists.
   3 Stores Lists.
   3 Arms and Ammunition Lists.
   3 Narcotics Lists.
   3 Mail Lists.
   3 Bonded Stores Lists.
   3 Passenger Lists.
   3 Storage Plans (if vessel has cargoes to be discharged).
   2 Bills of Lading.
   1 Clearance from last port of call.
2. On Departure:
   4 Statistical Supplement (for vessels leaving directly for a foreign port).
   7 Outward Foreign Manifests.

Philippine Ports Authority:
1. On Arrival.
   2 Inward Foreign Manifests.
   2 Passenger Lists.
2. On Departure:
   2 Outward Foreign Manifests.
   2 Statistical Supplements.

PILOTAGE:
1. Application (notice) for pilotage services is usually made by a shipping Agent at least 24 hours before the vessel's arrival. Notice may also be tendered via a commercial telegraph office addressed to Iloilo Harbour Pilot Association, Muelle Loney St., Iloilo City. The Pilot Association is on VHF Channel 16.

2. The Pilot Association owns 5 standard-designed pilot boats, with one being utilised as water taxi for vessel's crew intending to go on shore leave.

3. Request for pilotage services may be done in either of the following ways:
(a) 2 long and 1 short blast of the vessel's whistle.
(b) Continuous flashing of blue light during night-time.
(c) Display of the international "G" flag during daytime.

4. There are 2 pilot stations where the Pilot may be taken aboard, namely:
(a) Sinapsapan Point at the South entrance, 8 miles from the port.
(b) Nabalas Point at the North entrance, 12 miles from the port.

5. With respect to the boarding and safety measures, the Pilot requires a sturdy and reliable pilot ladder.
VHF: Call "Iloilo Pilots" on Channel 16 advising that vessel wishes to take Pilot at Sinapsapan or Nabalasa.

ANCHORAGE: (proposed)
The anchorage of the Port of Iloilo is that portion of Iloilo Strait within the following boundaries: an imaginary line extending from Balabago Point, Island of Panay across Iloilo Strait up to Cabugao Point on the Northern Coast of the Island of Guimaras, thence along N.W. and West shore of Guimaras Island to Bondulan Point; thence along Southern shore line of the island of Panay to Balabago Point, the Point of commencement.
Note: A vessel is considered "arrived" after it drops anchor at any point within the boundaries described above.

RESTRICTIONS: Generally, a vessel may enter the port from the pilot station at any time of the day or night. However, said entrance of the vessel is restricted by the draft of the vessel and the tide at the time of entrance. At MLLW, only vessels with a maximum draft of 28 ft. may enter or depart from the port. At HW (5 ft.) vessels with a maximum draft of 33 ft. may enter or depart from the port.

MAX. SIZE: Foreign Pier has a total length of 345 m., Berth 2 (100 m.) has a controlling draft of 33 ft. alongside at MLLW.

HEALTH: The port has 1 Quarantine Doctor. Quarantine formalities are done while vessel is at the Quarantine Station. Notice for quarantine formalities is usually given by the shipping Agent 24 hours before the vessel's arrival.
The following documents are necessary for presentation to the Quarantine Officer on arrival.
A. On Arrival:
1. Derat Exemption Certificate. (If expired or about to expire, the same could be renewed at the port for a period of 6 months).
2. International Certificate of Vaccination. (If expired or about to expire, vessel crew could be vaccinated locally).
3. Maritime Declaration of Health. (Form to accomplish available locally).
Above documents are necessary for the issuance of Free Pratique.
B. On Departure:
1. Quarantine Clearance for Outgoing Vessels. (A fee of P4.00 or approximately $0.53).
Free Pratique is issued at the first port of call. It becomes automatic if the vessel intends to call at another port within the Philippines.

RADIO: Coastal Marine Radio Station:

Location:	Lat. 10° 41.4′ N., Long. 122° 32.8′ E.	
Call Sign:	DYV	
Frequencies:	8632 kHz.	0000 GMT – 0400 GMT
		0600 GMT – 0900 GMT
	12948 kHz.	0900 GMT – 1130 GMT
VHF	Channel 16	

Also private telegraph companies with international relaying stations; Central Radio Communications, Radio Communications of the Philippines., Inc.

VHF: Retransco on Channels 16 and 13.

TUGS: Tugboats usually join vessels for docking and undocking operation. The services may be provided by the pilot's boat or tugboats of the Visayan Stevedoring & Transportation Corp. The charge is P150.00/tug during daytime and P180.00/tug during nightime.

BERTHING: Also see "Shipmaster's Report".
The port has a foreign pier near the mouth of Iloilo River. It has a length of 345 m. divided into 3 berths of 115 m. each. The maximum draft alongside the pier at MLL is 28 ft. However, a vessel may be loaded up to the draft of 31 ft. (at MLL) with the use of a mule barge.
Usually, loading and discharging are done with the use of the vessel's own gear, except catch-all nets and crane for heavy lift cargoes which may be provided by the Stevedore operator.
The Arrestre Operator is capable of handling general and heavy lift cargoes, cargoes in bags (like sugar, fertilisers, cements, copra cake, etc.). Bulk loading may be done also by "bleeding" cargoes in bags directly into the vessel's hold.
Commercial Port Complex: New facility of 400 m. length for container vessels and Ro-Ro vessels with depth 10.5 m. (MLLW). One mobile crane and 3×28 ton fork lift trucks available.

CRANES: 1 crawler crane with 15 ton capacity owned by private Arrestre. The Ministry of Public Highways has 4 heavy-lift cranes of 25 tons capacity.

BULK CARGO FACILITIES: Within the harbour limit of the port is sugar bulk-loading installation situated at Jordan, Guimaras Island. The berth is capable of accommodating a vessel with a LOA of 182 m. and a draft of 35 ft. at MLL.
Loading is done with the use of a mechanical conveyor which has a rated capacity of 400 – 500 tonnes per hour. The discharging gear has a maximum height of 30 ft. above HWL.
Cargo handled in this berth is exclusively sugar in bulk.

SPECIALISED CARGO HANDLING FACILITIES: The port is *not* specially equipped for handling containers or Ro/Ro traffic.
LPG facilities at Petron.

STEVEDORES: An advice of 24 hours before the vessel's ETA is required to prepare the gangs necessary to perform stevedoring services. Stevedoring services can average at the rate of 900 – 1,000 tonnes of loading/unloading per 24 hours.

MEDICAL: The port itself does not own any medical facilities. However, within the City itself are 6 modern hospitals which could be used by the vessel's sick crew. Vaccinations and inoculations may be done by the Quarantine Doctor who also issues corresponding certificates for the same.

TANKERS: Bunker is handled through 6 in. pipe-lines; however, Petron load bunker through a 4 in. pipe. "White oil products" are handled through 8 in. pipes. There are 2 privately owned oil-water separators.
Types of oil available: premium, regular, automotive diesel fuel oil, kerosene, and bunker C; rate of delivery: 10–12 t.p.h.

FRESH WATER: Fresh water can be supplied by a private supplier, Springwater Marine Services, Iloilo City. Water is supplied to the vessel while at anchorage or at berth from a water barge at the rate of 15 – 20 tonnes/hr. cost is P16.00 ($2.13) per tonne. Water is safe and potable.

FUEL: Bunker fuel and fuel oil (of any desired viscosity) are available and can be supplied by Philippine Shell Petroleum Corp., Lapuz, Iloilo City. It can be delivered either by barge or by road tanker at the rate of 10 – 12 t.p.h. An advance notice of 24 hours prior to delivery is necessary.

CONSULS: British, at Hongkong and Shanghai Bank, Ledesma Street, Iloilo City, Tel: 7-50-86.

REPAIRS/SERVICES: The Iloilo Dock and Engineering Company offers the following major services: Marine construction and repairs, conversion, machine shop, electronics navigational equipment installation and repairs, steel fabrication, sand blasting, engineering and project consultation. Other services offered: Marine salvage, stevedoring and longshoring, lighterage, towing-harbour, inter-island and ocean warehousing and in-transit handling.
Radar: Repair of ship's radar may be done by Louman & Sons Technical Service Inc. The company is capable of repairing radar, radio transmitter and receiver, fathometer and steering system. Usually contacted by the ship's Agent.

DRY DOCKS: Largest dry dock at Ideco is Shipway 1: Length 587 ft., width 56 ft. depth (draft at MLLW, 10 ft. without keel blocks), capacity 2,500 L.T. There are 4 other smaller docks, and several side berths.

SURVEYORS: Local Marine Surveyor, Delpan.

WATCHMEN: Watchmen are optional, however if the Master so desires, watchmen can be hired.

HATCHES: Opening/closing of vessel's hatches and securing the vessel's derricks, are usually done by the stevedores.

CUSTOMS ALLOWANCES: Vessel's crew are permitted an individual allowance of 1 bottle of whisky and 1 carton of cigarettes per week. However, if necessary, the Master may request the Collector of Customs through the Customs Inspector on board for a further issue within the week.

CARGO GEAR: Load/discharge is effected by ship's gear. There is no special cargo equipment except for heavy lift cranes.

REPATRIATION: Crew changes and repatriation may be effected by the local Regional Office of the Immigration Commission with the approval of its head office in Manila.

AIRPORT: An all-weather airport situated about 7 km. from the pier. Regular Iloilo – Manila flight is 3 times a day. Other flights Iloilo – Cebu, Iloilo – Davao.

HOLIDAYS: *Legal Holidays:* Sundays, January 1st (New Year's Day); April 9th (Bataan Day); May 1st (Labour Day); June 12th (Independence Day); July 4th (Phil.-American Friendship Day); November 30th (National Heroes Day); December 25th (Christmas Day); December 30th (Rizal Day).
Note:
1. Special Public Holiday may be issued by the President.
2. Under Philippine Law, if a legal holiday falls on Sunday, the following day (Monday) is also a holiday.
Regular working days in the Philippines are Monday through to Friday. Holidays notwithstanding, the Master/Agent may request continuance of stevedoring work after proper notice has been made with the stevedoring company.

POLICE/AMBULANCE/FIRE: Police Tel: 7-55-21; Fire Tel: 7-30-11; 7-49-89; Ambulance Tel: 7-25-61; 7-24-41.

TELEPHONES: PLDT (Tel Co.) can install a telephone on board a vessel at berth with the following charges:

P200.00	Deposit for the instrument, refundable upon return of the instrument.
74.41	rate/month
45.00	for services
3.00	electrician's fee
322.41	Total charges

Port Authority Telephone Numbers: Manager's Office: 7-69-45; Operations: 7-60-73; Administration: 7-76-43; Security: 7-29-79.

DELAYS: Occasional congestion of the port may delay vessels berthing. Bunkering may be done whether the vessel is at anchorage or at berth.

SERVICES: See "Repairs".

SHORE LEAVE: Shore leave is granted after the issue of shore passes by the local official of the Commission on Immigration.

IDENTIFICATION CARDS: Identification card is not necessary for the issue of shore passes. Visaed Crew List will suffice.

GENERAL: Vessel's ETA has to be relayed to Philippines Ports Authority, Iloilo at least 24 hours before arrival.

DEVELOPMENTS: The Iloilo Commercial Port Complex is fully operational. It is situated approximately 1 km. from the existing port, the Old Foreign Pier and the Marginal Wharf.
Proposed Development: Old Foreign Pier: Proposed Ro-Ro Facilities:

Ramp Movement	Reference Deck Elevation – 25 m.
Upward (max.)	2.00 m.
Downward (max.)	1.50 m.
Line Load (max.)	88 tons
Vessel Beam Consideration	12.6 m. to 20.6 m.
Vessel LOA Consideration	68.8 m. to 132 m.

Proposed Apron Widening: Widening of existing apron at RC from 12.0 m. to 18.0 m. toward the sea.
Proposed Reclamation: Reclamation of the open space area between Old Foreign Pier and the National Road, approximately 1.7 hectares to be used as back-up area.

SHIPMASTER'S REPORT: 1977
There are 3 ports where bulk sugar loading facilities exist, Pulupandan (which see), Iloilo and Batangas Bay. Ships first call at Pulupandan on Negros Island, approximate position Lat. 10° 31′ 30″ N., Long. 122° 47′ 36″ E. and load up to a draft (SW) of 29 ft. The rate of loading by using 1 trimmer is about 300 – 400 tonnes per hour. Pilotage is compulsory and the Pilot boards in a position (approx.) Lat. 10° 27′ 24″ N., Long. 122° 46′ 12″ E. After completion of port formalities, the vessel is berthed alongside the Bulk Sugar Installation with a stationary conveyor.

The vessel then proceeds to Iloilo for loading up to 32 ft. This vessel, which is 675 ft. in length, loaded bulk sugar in hatches 2, 4, 6, 7 and 8. It was possible to load in hatch No. 1 also. The loading is done from a fixed conveyor with 2 trimmers and the loading rate is between 400 – 500 tonnes per hour. Finally the vessel proceeds to Batangas Bay and after the usual formalities, goes alongside the Batangas Bay Terminals Inc. (BBTI) at Bolo – Bauan – Batangas, where there is no draft restriction. The loading rate is about 300 – 400 tonnes per hour. Loading is done from a fixed conveyor with one manually operated trimmer. Pilotage is compulsory and ships awaiting Pilots can anchor either at Santa Rita or Santa Clara (Batangas City) or Tabangas.

The main sugar crop is brought to Iloilo, known locally as Sugar City, because it is the main sugar exporting port, from Negros Island, where most of the sugar farms and factories are situated. The sugar for export at BBTI is brought from factories around Laguna Bay by trucks. The Stowage Factor for bulk sugar worked out to between 40 – 41.

AUTHORITY: Philippine Ports Authority, Iloilo City. *Tel:* 7-76-43, 7-60-73, 7-69-45, 7-77-91, 7-77-92. *Contact:* Manuel T. Gorme, Port Manager.

ISABEL, Leyte: 10.54 N. 124.25 E.

SHIPMASTER'S REPORT: July 1987.

See "General" before first port.

DOCUMENTS: See "General" before first port. Vessels anchor in bay prior to berthing and Officials board for Formalities. As there is no local Immigration or Customs post, there are occasionally delays waiting for the necessary officials to come from either Manila or Tacloban. Permits from Customs and Immigration are required for most things, but usually arranged by vessel's agent. 3 Customs Officers and 4 Immigration Officers stayed on board throughout vessel's entire stay. On vessels which cannot accommodate them, it is apparently possible for them to stay somewhere on shore in shifts.

The fact that this vessel has crew mainly from Eastern Bloc countries may have had something to do with large Immigration presence.

APPROACHES: Clear in deep water from seaward, BA. Chart No. 3825 rather small scale, but all features show up well on radar, and port is a blaze of light at night owing to extensive industrial installations on eastern shore of bay, which is frequently well occupied with anchored vessels.

PILOTAGE: Generally available on a 24 hour basis, pilots have Channel 16 and 12, but can be difficult to contact until quite close to. Pilot boat is a launch of fairly robust metal construction, but it is very slow, so ships should reduce speed in sufficient time.

Pilot generally meets large vessels about 0.75 miles off Catiyana Point, whether berthing or proceeding to anchor.

ANCHORAGE: Although chart does not indicate the fact, there is a fair amount of space for vessels in the bay. Vessels anchor in vicinity of 0.5 miles S.E. to E. of Sacay Point, in depths of 25 fathoms and decreasing to 15 fathoms. Smaller vessels can proceed closer inshore to shallower water.

Holding ground is fair in good weather, but reportedly poor in adverse conditions. The Admiralty Pilot recommends that 2 anchors should be used. This vessel, a 14,000 gross ton LPG Carrier, anchored for 2 days in good weather with 6 shackles on one anchor, on local Pilot's advice without any problems.

RESTRICTIONS: Berthing/Unberthing is apparently at Pilot's discretion, depending on weather conditions, but during vessel's stay in good weather, continuous movements were taking place on a 24 hour basis.

HEALTH: Quarantine Officer boards with Pilot and checks documents at anchorage and issues Free Pratique Certificate. He requires Maritime Declaration of Health, Vaccination Certificates (Cholera) and Crew List. it is possible to have Cholera vaccinations done at this port, but not Yellow Fever.

TUGS: There are 2 tugs, of standard Japanese design, adequate to assist all vessels capable of entering the port. Tugs ropes used.

BERTHING: The Terminal is operated by Philippine Phosphate Fertiliser Corporation, and main quay has 2 large gantry-type grab cranes for discharging phosphate on to a continuous conveyor belt. Other parts of the quay appear to be used for loading bagged fertiliser by ship's gear.

At Southern end of main quay are several Chicksan connecting arms for the discharge of Liquid Ammonia, Sulphuric Acid and Phosphoric Acid.

There is an additional small quay just south of main quay fitted with a large grab-crane, hopper and conveyor belt, which is mainly used by small local bulk carriers.

MEDICAL: There is a small hospital where non-serious cases can be treated, serious cases require transportation either to Ormoc City or Tacloban.

FUEL: Vessel was supplied with both Fuel Oil and Diesel Oil by barge which came from Cebu. It is possible to bunker ex-barge either at anchorage or alongside. Customs Permits required for bunkering.

REPAIRS: No commercial repair facilities available.

REPATRIATION: Possible via Tacloban Airport, about 3 hours by car from Isabel, thence to Manila on local flight to connect with International flights. If crew from Eastern Bloc countries (as has this vessel) it is necessary for Immigration Permits to be issued, and leaving/joining seamen require Immigration escort to and from Isabel to Manila.

AIRPORT: Tacloban Airport.

SHORE LEAVE: Permitted. Obtain pass from Immigration in return for passport.

GENERAL: Apart from pilot boat, all other communications between ship and shore whilst at anchorage was carried out by local fishing skiffs, which are fitted with large outriggers, thus making it impossible for them to come properly alongside pilot ladder or gangway. This makes a
transfer of personnel or spare parts, etc., somewhat hazardous, ev
in calm conditions.

Provisions: Local Ship chandler available, prices for fair quality local f
and vegetables is reasonable. The chandler has a fair selection of ot
items but anything imported or transported from elsewhere can
expensive.

Communications: All communications via main agent in Manila, w
sends sub-agent to attend locally.

SHIPMASTER'S REPORT: October 1988.

VESSEL: 19,846 d.w.t.

LOCATION: Lat. 10° 56′ N., Long. 124° 26′ E.

For identification purposes the port is referred to as Isabel, Leyte

DOCUMENTS:

Port Health:

3 copies Crew List.
1 copy Vaccination List (all crew members must have va
vaccination cards).

Immigration:

4 copies Crew List.
2 copies Visaed Crew List (General Visa/Visaed Crew List to
obtained from Philippines Embassy before entering Philippir
waters).

Customs:

4 copies Crew List.
3 copies Crew Personal Effects Declaration.
3 copies Narcotics and Medicine List.
20 copies Cargo Manifest.
1 copy Declaration of Cargo/Favour Parcels on boards on prescrib
forms supplied by Boarding Officer.

Accommodation: Accommodation is required for 1 Custo
Inspector, 2 Customs Guards, 1 Immigration Officer or Assist
Immigration Officer and 2 Guards.

If accommodation and food cannot be provided on board it is to
arranged ashore on Owner's account.

PILOTAGE: Pilotage is available throughout 24 hours. Pilot board
position is at Lat. 10° 53.5′ N., Long. 124° 25′ E., this is about 1.5 m
South of Sacay Point.

ANCHORAGE: Anchoring is carried out under Pilot's instructio
Vessels anchor in depth of 15 fathoms – 40 fathoms, depending on s
of vessel and space available.

Our vessel anchored in a depth of 25 fathoms at a distance of 7 cab
from Sacay Point.

TUGS: There are 2 tugs of approximately 6,000 b.h.p. Both tugs
used for berthing and unberthing. There is a mooring boat available
run lines.

BERTHING: *PHILPHOS:* 5 berths with a total length of 760 m.

Depth alongside: No. 1 – 12.0 m.; No. 2 – 9.0 m.; No. 3 and 4 – 7.0
No. 5 – 5.0 m.

PASSAR: 1 berth with length 90 m. and depth 12.0 m.

CARGO HANDLING FACILITIES: Bulk, bagged and liquid carg
handled.

PHILPHOS: 2 grab cranes used for discharge of cargo to chute a
conveyor belt.

2 cranes available for loading bagged/bulk cargoes from chut
3 mobile cranes also available.

PASSAR: One crane available.

STEVEDORES: Cargo work carried out day and night on 3 shi
0800 hrs. – 1600 hrs., 1600 hrs. – 2400 hrs. and 2400 hrs. – 0800 h

Our vessel loaded bagged fertiliser (DAP) by ship's gear at an avera
rate of 18 t.p.h. per gang. The Chief Supervisor of the stevedo
claimed that the average loading rate was 30 t.p.h. per gang in perf
conditions.

MEDICAL: PHILPHOS and PASSAR have clinics available for th
employees. Ship's crew can receive treatment at these clinics.

In cases of serious accident or illness, patients are sent to Ormoc
Tacloban.

FRESH WATER: Available.

FUEL: Fuel is not available locally but can be arranged by Philippi
Petroleum, who can supply bunkers by barge, which is towed from Ce
Fuel is also available by road tanker from Ormoc.

REPAIRS: No facilities locally.

SURVEYORS: Classification Society Surveyors can be arranged fr
Manila. Representatives of Admiral Adjuster and Surveyor, Manila a
SGS Far East Ltd., Manila attend to cargo surveys at Isabel. Th
inspect holds and cargo during loading and unloading.

AIRPORT: Tacloban Airport with 2 daily flights to Manila is the near
Ormoc is about 50 km. away. There are 2 weekly flights from Orm
to Cebu and daily ferry services from Ormoc to Cebu.

Cebu is about 50 nautical miles by sea. The journey by ferry tak
about 6 hours.

SHORE LEAVE: Permitted. Immigration Officers issue Shore Pass

GENERAL: *Provisions:* There are 3 Ship Chandlers who attend vess
in turn, to provide provisions.

Telephone: Long distance (Domestic and International) calls can
made through the Passar Guest House between the hours
0900 – 1400 and 1700 – 2200 local time.

Service Boat: There is a service boat available for taking crew fr
anchorage to the town, max. capacity 15 – 20 people.

Publications/Charts: Philippines Pilot, page 226. B.A. Charts No. 38
and 3825. Philippines Chart No. 4426.

Agent: No agents maintain offices in Isabel. Agents representati
come from Manila to attend the vessel. Ship's telexes or telegrams
passed by telephone or telegram from the local post office to Man
thereafter passed by telex to their destination.

Berth Operators: PHILPHOS (Philippines Phosphate and Fertili
Corporation), Leyte.

PASSAR (Philippines Association of Smelting and Refinery Cor
Leyte.

JIMENEZ, Mindanao: 08.19 N. 123.52 E. (See Plan)

SHIPMASTER'S REPORT: January 1990.

LOCATION: The berth is located in Iligan Bay on the island of Mindanao, in position Lat. 08° 19.38′ N., Long. 123° 51.69′ E.
Charts: B.A. Charts No. 3810, 3811 and 3426.
PILOTAGE: Pilotage is compulsory. The pilot comes from Ozamiz City and boards 1.5 miles East of the reefs from a 22 ft. white pilot cutter.

Pilot should be ordered through vessel's main agent in Manila.

The pilot has a portable VHF set.
ANCHORAGE: There is no anchorage in Iligan Bay. Vessels may anchor for a few hours only, South of the "T" pier. The holding ground is poor.
APPROACHES: From the East steer a Westerly course to about 4.5 cables South of Tabu Pt. This will put the vessel in the middle of the channel between the reefs. When clear of the North reef, alter course to 308° (approximately) until 150 m. from the pier.

The fixed red leading light mentioned in Volume F of the Light Lists (1989) is non-existent.

Chart No. 3426 (Plan of the Port of Jimenez): This does not show the reef South East of the reef on the plan, with a now non-existent red conical buoy, so the actual width of the channel (approach) to the loading pier is not shown in its entirety.
RESTRICTIONS: Berthing and unberthing in daylight hours only.
MAX. SIZE: Max. draft 10.0 m. (33 ft.). Maximum size 28,000 g.r.t.
TUGS: There are no tugs available. The pilot cutter and canoes will assist in the running of mooring lines.
BERTHING: *New Concrete Pier:* The berth is for the export of coconut oil and copra products from the Jimenez Oil Mill, Inc. About 30 – 40 product tankers call each year to load coconut oil and about 12 – 15 bulk carriers call each year to load copra pellets. The pier head is 18.6 m. long and has mooring dolphins 100 m. off either end. Vessels berth port side alongside. The depth alongside at MLW is 10.67 m.

The covered loading conveyor is expected to be in operation August 1990.

Wooden Pier: There is a wooden pier adjacent to the new concrete pier mentioned above. This pier has been cut back in order to accommodate the new concrete pier. There is an 8 in. pipeline for coconut oil, pumping rate up to 300 tonnes per hour.
CRANES: None available.
MEDICAL: There is a doctor available locally and a hospital in Ozamiz City.
FRESH WATER: Available direct from the mill but the rate varies as the mill has priority. We loaded 100 tonnes in 2.5 days. At the present time vessels have to use their own hoses all the way from the shore to the ship.

When the new loading conveyor is completed there will be a 65 mm. pipeline to carry the fresh water from the seaward end of the pier to the shore.
REPAIRS: No facilities available.
GENERAL:
Hull/Tank Cleaning: No facilities available.
De-Rat Certificate: Health officials are based in Ozamiz City.
Ship Chandler: A limited amount of provisions are available.
Transport: There is a bus service during daylight hours between Jimenez and Ozamiz.
Communications: There are no telephones in the port. Telephones are available in Ozamiz City for long distance calls.
Authorities: All authorities are based in Ozamiz City.

SMR

JOLO (Jolo Island): 06.03 N. 121.00 E. (See Plan)

See "General" before first port.
DOCUMENTS: 4 copies each of Crew Lists; Passenger List; Import Cargo Manifest; Oath of Master and a copy of Vessel's Information Sheet.
PILOTAGE: Pilots are stationed at nearby Zamboanga City. Advice of ETA at least 3 days before is requested to facilitate arrangement of pilotage service.
ANCHORAGE: Anchorage areas are N.W. of Jolo Wharf and West of Caltex Depot.
MAX. SIZE: Main wharf; Draft 4 m. LOA: 60 m. At Caltex, Mobil and Petron Oil depot: LOA: No limit; Draft: 6 m.
HEALTH: Ships will be cleared by quarantine officers upon arrival at anchorage.
RADIO: Local Port Authority is equipped with SSB radio linking all Port Authorities nationwide. Ships may send message through Radio Communications of the Philippines, Inc. which has international connections.
BERTHING: Berthing space at main wharf is reserved for large foreign vessels; Max. permissible draft at MLLW is 4 m. (SW); Cargo handling by ship's own gear; Cargo may be worked at open storage and direct delivery only.
STEVEDORES: 24 hours advice before ETA is required. Stevedores provided by Sulu Dockhandlers and Forwarders, Inc.
MEDICAL: 2 hospitals are available.
TANKERS: The private wharf of Sulu Agro Industrial Corporation within the port limit is designed to handle crude coconut oil.
FRESH WATER: Supplied by Sulu Water Works Authority with 4 in. piping all along the main wharf.
FUEL: Supplied by Petron Philippines, Inc.
FIRE PRECAUTIONS: Dangerous cargoes are worked at assigned berthing area.
CONSULS: In Manila.
REPAIRS: Minor repairs maybe undertaken by and within the vessel itself after permission is sought and granted by the Port Authority.
GANGWAY/DECK WATCHMEN: Customs Guard and Customs Inspector are on routine and continuous guard.
HATCHES: May be opened by stevedores.
CUSTOMS ALLOWANCES: Minimum quantity for personal use permissible only on board.
AIRPORT: Jolo Airport, flights to Zamboanga only, 2 flights a day.
HOLIDAYS: Cargoes are worked on holidays.
POLICE/AMBULANCE/FIRE: Central telephone system connects Port Authority with Police, Ambulance and Fire Departments.
SHORE LEAVE: Curfew hour is from 2200 hrs. to 0400 hrs. Crew members are allowed ashore. Identification cards not necessary.
REGULATIONS: No discharge of ballast oil in any territorial waters of the Philippines.
DELAYS: Delays in cargo handling: Rain.
DEVELOPMENTS: Reclaimation in progress.
AUTHORITY: Philippine Ports Authority, Port of Jolo, Jolo, Sulu, Philippines. *Contact:* Tantung L. Abam, Port Manager.

JOSE PANGANIBAN, Luzon: 14.18 N. 122.40 E. (See Plan)

See "General" before first port.
DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 36 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 km. from the wharf aboard a boat displaying a pilot flag.
ANCHORAGE: Within Tanay Strait but not less than 500 m. from existing wharf.
RESTRICTIONS: Present port facilities could only allow vessels at anchorage considering the draft limitation and length of the pier.
MAX. SIZE: LOA 230 m. Draft 30 ft.
HEALTH: Vessels clear quarantine on arrival at Jose Panganiban Harbour. Quarantine Officers will normally board the vessel 2 km. from the wharf.
BERTHING: Present port facilities have been damaged by typhoon. Only 75 m. of the wharf is usable for berthing purposes. Length of quay 75 m., width 12 m. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging 18 tons per gang hour. Storage area 1.15 hectares.
CRANES: The port is not provided with shore cranes. Each vessel calling at the port is required to use her own gear.
STEVEDORES: Bicol Port Services.
MEDICAL: 1 government hospital located in the town about 3 km. from the wharf.
FRESH WATER: Can be provided by means of lorries and pipe-lines.
FUEL: All grades except premium gasoline obtainable from major oil depots and supplied by lorries alongside.
GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.
HATCHES: Opening and closing of hatches are part of stevedores' work or at the Master's option.
REPATRIATION: All facilities available for crew changes; good land and air connections.
AIRPORT: At the capital town of Daet, Camarines Norte.
HOLIDAYS: New Years Day (Jan. 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I. – U.S. Friendship Day (July 4th); Bonifacio Day (Nov. 30th); Special holidays declared by the President of the Republic of the Philippines are also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's Agent.
SHORE LEAVE: Crews are allowed ashore in company of an Immigration Agent.
DEVELOPMENTS: Repairing of damaged wharf and water pipe-lines.
GENERAL: Vessels intending to call at Jose Panganiban shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come-first-served basis.
AUTHORITY: The Supervising Officer, Philippine Ports Authority, Legazpi.

LEGAZPI, Luzon: 13.10 N. 123.45 E. (See Plan)

See "General" before first port.
DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 24 hours before vessel's arrival. The vessel is met by the harbour Pilot about 2 km. N.E. of the wharf aboard a boat displaying a pilot flag.

ANCHORAGE: Within the Albay Gulf outside the imaginary line within the vicinity of Legazpi Port from San Roque Lighthouse to the East breakwater with depths varying from 80 ft. to 100 ft. with good holding grounds. The bottom is generally of sand and coral.
RESTRICTIONS: Present port facilities allow for 1 vessel at a time considering the draft limitation and length of the pier.
MAX. SIZE: Legazpi Port: LOA – 120 m.; Draft – 25 ft.
Leg Oil Company: LOA – 230 m.; Draft – 35 ft.
HEALTH: Vessels clear quarantine on arrival at Legazpi Harbour. Quarantine Officers will normally board the vessel 2 km. N.E. of the wharf.
RADIO: Following Stations are normally used:

RCPI	FILTEL
TELEFAST	CLAVECILLA
CRC	

TUGS: No tugs available. Motor launch is used to attend to mooring and unmooring.
BERTHING: Only the end of the wharf is usable by foreign vessels considering the draft limitation and constricted manoeuvring area. Legazpi Oil Company, Private Pier is, however, capable of accommodating vessels of any type and tonnage.
Legazpi Port: Length of quay 328 m. Width 30 m. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging 15.95 tons per gang hour.
Legazpi Oil Company, Private Pier: Length of quay 100 m. Width 10 m. Max. depth of water 60 ft. Quay height above sea level 3 m. at high tide and 6 m. at low tide. Average rate of loading/discharging 83.33 tons per gang hour. Facilities are suitable for handling of bulk copra, pellets, copra cakes and copra crude oil by conveyor and pipe-lines.
CRANES: The port has no shore cranes. Mobile cranes are provided by the Arrastre Operator to load/unload cargoes on non-sustaining vessels.
STEVEDORES: *Legazpi Port:* Provided by Regal Arrastre and Stevedoring, Incorporated. Tel: 3168 and 3107.
Legazpi Oil Company, Private Pier: Provided by Norleinco Arrastre Services.
MEDICAL: 1 government hospital and 6 private hospitals available.
TANKERS: See "Berthing".
FRESH WATER: Can be provided by means of lorries.
FUEL: All grades obtainable from oil depots and supplied by lorries alongside.
GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.
HATCHES: Opening and closing of hatches are part of stevedores' work or at the Master's option.
REPATRIATION: All facilities available for crew changes; good land and air connections.
AIRPORT: 5 km. from port area. Flights to Manila twice a day.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I. – U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special holidays declared by the President of the Republic of the Philippines is also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's agent.
POLICE/AMBULANCE/FIRE: Police, Tel: 4222; Ambulance, Tel: 4432; Fire, Tel: 2333.
TELEPHONES: Placing of telephones on board can be arranged with the local telephone company (MATELCO).
SHORE LEAVE: Crews can be allowed ashore in company of an Immigration Agent.
DEVELOPMENTS: Dredging of port basin to an average depth of 25 ft.
GENERAL: Vessels intending to call at Legazpi shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocated is on a first-come first-served basis.

SHIPMASTER'S REPORT: April, 1981.
Berth: Legazpi Oil Co. Jetty. Vessel loaded Copra Expeller Pellets in bulk.

For all details regarding control, pilotage, harbour installations, documents, etc., see "B.A. Pilot No. 33" and "Guide to Port Entry".

The docking manoeuvres were effected from an Easterly direction. The anchor was let go with 1 shackle prior to berthing. This served later, together with the rear cross buoy, to hold the vessel away from the pier (bad condition), and to heave off during the undocking manoeuvres.

The mooring buoys are secured to the bottom by 3 anchors each and 1 concrete block. However, their positions are not finite.

The vessel is to be maintained about 1.5 m. from the Dukes of Alba at the end of the pier, and therefore damage to the deteriorating pier is avoided.

A landing stage was positioned from the land, and was positioned likewise by the vessel on runners, since the vessel was rolling considerably in the persistent swell.

According to the Pilot, the swell in January is at its worst, and then the berth is not safe. During July and August, it is at its quietest in Albay Gulf. From October to December it is "Typhoon Time" and during November/December it is the heaviest rainy period, however, during the time we were in port there was considerable rainfall.

The pilot station has no VHF. The Pilot is ordered via the Agent, who was most co-operative. The pilot vessel brings the lines from the shore and to the buoys.

The copra expeller pellets were stored in a warehouse of approx. 80 m. × 50 m. According to the statement of the loader they were consistently loaded. The fresh goods, which came from the press at a temperature of approx. 44°C, were always loaded straight on top of the cargo already loaded. On board, temperatures of 32°C to 45°C between surface and core were measured.

According to the opinion of the loader, the high cargo temperature i not dangerous, but he was emphatic that a danger existed throug wetness.

The expeller was brought to the weighbridge by lorry and then move to the pile.

The conveyor belt is not covered, and the nozzle reached right up t the landside hatch coaming on the vessel.

The wet conveyor belt was "operated dry" with expeller and the we material piled on deck, where it was bagged and shipped back to land Also where due to sudden rainfall the cargo in the hold became wet this was carefully segregated by the trimmer, and sent back to the land

A trim extractor is available, and was partly used. The main trimmin work is carried out by a gang of approximately 25 men.

Every instruction given from the ship was promptly executed by th conveyor belt personnel.

Delivery rate: 55 t.p.h. (approx.).
Stowage factor: 1.7 cu.m. to the ton (approx.).
Working time: Around the clock.

The loaders made sure that no chemical additive such as benzene benzol or hexane had been used to extract the oil, and handed over certificate with the following values:
Moisture content: 9.6%; Oil content: 6.2%.

The certificate of an independent surveyor showed 8.51% humidit and 7.15% oil content.

SHIPMASTER'S REPORT: October, 1982.
Our ship was an 63,770 tons d.w.t. gearless bulk carrier of overa length of 225.03 m. which loaded 3,500 metric tons of Copra expelle pellets in bulk and stowing at an S.F. of 1.6 cu.m./ton. The loadin terminal of the Legazpi Oil Company is situated in Lat. 13° 11.5′ N Long. 123° 45.4′ E., which is unmarked on the Admiralty chart. Ther is over 54 ft. of water at the berth but the height of the loader is onl 40 ft. hence it is important that ships do not arrive with a greater air dra than 39 ft. The port does not have VHF facilities or tugs. The Pilots ar well experienced and normally meet vessels about 2 miles N.E. of th berth. The loader is protected by, recently constructed, 4 concret dolphins and the vessel normally berths starboard side alongside. Tw lines are passed to the shore side dolphins fore and aft, one line eac to the seaward buoys and one line each to axis buoys and one sprin fore and aft. The buoys are situated over 1,000 ft. from the axis of th berth and may necessitate joining of the mooring lines. The loading rat is about 80 t.p.h.

While we were at this berth we had the misfortune of encounterin tropical revolving storm "Typhoon Irwing" which passed directl overhead. Berth was vacated when the storm was 150 miles from us t the East. Shelter was sought at an anchorage off the Legazpi harbou breakwater (bearing 230° – 1.0 mile from us). The eye of the typhoo passed directly over us within 24 hours and winds reached a velocity o 75 m.p.h. maximum. The holding ground was good and we rode out th typhoon with 9 shackles of chain out with engines going dead slow ahea when the winds increased to over 40 knots. With the aid of the dopple log on ground tracking and satellite navigator we were able to remai rock steady in the strongest gusts.

Wave heights at this anchorage was never more than one metre The loading berth is directly exposed to sea and had we remained a the berth the vessel would have been pounded against the dolphins.

The Port Authorities are co-operative. There were no incidents o piracy or thefts.

AUTHORITY: Philippine Ports Authority, Port of Legazpi, P.O.Box 164 Legazpi City, Philippines. *Tel:* 20-12. *Contact:* C. E. Dinopol, Jr. Port Manager.

MANILA, Luzon: 14.35 N. 120.58 E. (See Plan

See "General" before first port.
PORT LIMITS: Manila Harbour is defined as that portion of Manila Ba within the following boundaries:

A line extending from the Vitas Estero due West (270°) to it intersection with a line running South (180°) to Sangley Point Light thence along this latter line towards Sangley Point Light until it intersection with a line running E.N.E. (075°) to the N.W. corner of th airport site to the shore to the mouth of the Vitas Estero, the place o commencement. (Philippine Coast Pilot, Part 1, Coast and Geodeti Survey, 1968 edition, p.5-92).

However, Port of Manila jurisdictional district includes that of the Pasi River and the Bataan, Romblon and Subic Sub-ports.
DOCUMENTS:
Quarantine:
Innoculation List of Crew.
Innoculation List of Passengers, if any.
Health Certificate from Last Port of Call.
Customs:
General Declaration (6 copies) – APAA Form.
Cargo Manifest.
Crew List.
Ship's Stores List.
Passenger List.
Crew Effects Declaration.
Maritime Declaration of Health.
Transit Passenger List.
Plant and Animal List.
Arms and Ammunition List.
Mail List.
Parcel List.
Drugs and Narcotics List.
Stowaway List.
Foreign Currency List.
Dangerous Goods List.

Immigration/Customs Boarding Officer:
Crew List.
Passenger List, if any.
Seaman's Books.
Passports.
Oath of Master.
Inward Foreign Manifest.
Parcel List.
Stores List.
Medicine List.
Crew List.
Passenger List.
Plant List.
Animal List.
Crew Declaration List.
Narcotics and Dangerous Cargo List.
Arms and Ammunition List.
Ship's Clearance from Last Port of Call.
Through Cargo Manifest.
Through Parcel List.
Foreign Currency List.

Note: Above documents are requirements depending if there is such cargo on board vessel.

In order to avoid delay, the Owner, Master or Agent of a ship bound for the Port of Manila must notify the following government and private entities at least 24 hours prior to ship's arrival.

1. Philippine Ports Authority – Harbour Division
   Attention: Harbour Master
2. Bureau of Customs – Boarding and Inspection Section
   Attention: Boarding Officer
3. Bureau of Quarantine
4. Commission on Immigration and Deportation
5. Bureau of Plant Quarantine
6. Bureau of Animal Quarantine
7. Philippine Coast Guard Boarding Team
8. Manila Pilots' Association (Private)
9. Arrastre Contractor (Private)

PILOTAGE: Pilotage in and out of Manila Harbour and to the piers and into the Pasig River is compulsory.

Agents or owners of vessels calling at the Port of Manila shall inform the Pilot of their vessel's arrival.

Agents can contact the Pilots Association through Channel 13, 24 hours a day, including Sundays and Holidays. Pilots are available day and night.

The pilot boat is a white vessel with a big letter "P" and the number of the boat painted red at the forward end of the vessel. It is usually located in the vicinity of Quarantine Anchorage where port formalities are conducted.

During bad weather, the pilot boat is located inside the breakwater upon the expressed permission of Port Authorities.

Foreign vessels are boarded outside the breakwater while inter-island vessels at Buoy No. 1, near the entrance to the Pasig River and off the lighted buoy North of North Breakwater.

Notice of vessel's arrival shall be made at least 24 hours before their arrival.

Lights exhibited when a vessel has a Pilot on board are white over red together with other regular navigational lights. Otherwise, only navigational lights are displayed.

During typhoons and bad weather, Pilots require vessels to rig the pilot or accommodation ladder on the lee side.

ANCHORAGES: Vessels which for any reason do not intend to enter either harbour or the river immediately on arrival may anchor anywhere outside of the Entrance Channel. There is also deep water anchorage inside the breakwater. Anchorage is regulated by the Harbour Operations, Port District Office – Manila, Philippine Ports Authority.

Quarantine Anchorage: The Manila Quarantine Anchorage is bounded as follows: Beginning at the Manila Outer Harbour Lighted Buoy 1, approximate position Lat. 14° 33′ 09″ N., Long. 120° 54′ 04″ E. thence 000°, 2,360 yards to position Lat. 14° 34′ 23″ N., Long. 120° 54′ 00″ E., thence on a range of 076° 24′ (Customhouse in line with City Hall Tower), 4,000 yards to approximate position Lat. 14° 34′ 50″ N., Long. 120° 56′ 14″ E., thence 242° 30′, 4,440 yards to the Manila Outer Harbour Lighted Buoy 1, the point of commencement.

Forbidden Anchorage: Anchorage is prohibited in that portion of Manila Bay known as the Cable Area which is defined as follows: From a point approximately at Lat. 14° 33′ 42″ N., Long. 120° 59′ 05″ E., the junction of the breakwater forming the South side of the Yacht Basin with the shore of Manila Bay, thence along the breakwater to its end, from its end 255° to 3.65 miles North of Sangley Point Light, thence 066° to the shore of Manila Bay.

Explosives Anchorage: Vessels having gasoline, dynamite or other highly inflammable or explosive compounds on board are not permitted to berth at piers or wharves until such cargo has been discharged. Such cargo must be discharged into lighters from vessels at the anchorage within the circle with a radius of 175 yards centred in Lat. 14° 35′ 15″ N., Long. 120° 54′ 05″ E.

Other Special Anchorages: Lighters, scows, cascos and similar craft are prohibited from anchoring East of the breakwater, Manila Harbour, except in the following designated places:

(a) South of the new Luneta, inside of vessels' anchorages, but only in cases of urgent necessity and with special permission from the Surveyor of the Port.

(b) Along the East side of the West Breakwater and within 85 yards of it, and well clear of the fairway leading to the Engineer Island slipways and well clear of the manoeuvring space usually needed by vessels docking or leaving the oil wharf. No craft shall moor along the breakwater beyond the sharp bends of the breakwater towards the gap.

(c) In the Inner Basin (Engineer Island) East and well clear of the fairway and then only in case of urgent necessity. It is provided that such craft during severe typhoon weather with special permission of the Surveyor of the Port, may anchor temporarily in the Inner Basin West of the fairway, but well clear of the vessels.

Others:

1. No vessel shall anchor or moor in any prohibited anchorage nor use an anchor in that area except for the purpose of assisting in berthing alongside or unberthing.
2. No vessel shall anchor in, or use an anchorage, other than for the purpose for which the anchorage is designated or intended.
3. No vessel shall anchor, berth, moor or lie:
   (a) In the approaches to a port.
   (b) In any principal fairway.
   (c) In such a manner as to obstruct the approach to anchorage or pier/wharf used by other vessels.
   (d) In a cable reserve area, or in any special anchorage indicated on the chart of the Port or Port district except for the purpose specified.
   (e) In a position which is likely to foul a vessel which is anchored, moored, or made fast to a buoy.

RESTRICTIONS:

1. No explosives or dangerous goods shall be loaded or discharged between 1800 hrs. and 0600 hrs. without the permission of the Authority.
2. No vessel or harbour craft with explosives or dangerous goods on board shall remain alongside any other vessel or craft, pier or wharf or other physical landing place between 1800 hrs. and 0600 hrs. without permission of the Authority.
3. No person shall smoke and no fire or naked light, other than navigation or signal lights prescribed by the Collision Regulations, shall be allowed on board any vessel or harbour craft which has or is about to receive on board any explosives or dangerous goods.

MAX. SIZE: See "Berthing" and "Container Handling Facilities".

HEALTH: There are 3 types of Pratique that can be obtained at the port: Free Pratique, Provisional Pratique and Radio Pratique.

Foreign vessels calling at the port are inspected by Immigration Officers. When all the quarantine rules and regulations are complied with and the vessels found free of any quarantinable or communicable diseases, Free Pratique is obtained by the vessel.

On the other hand, if some of the conditions above are not satisfied, a Provisional Pratique is given by the Quarantine.

Radio Pratique is provided to army and navy ships on the following grounds:

1. A doctor is among the crew of the ship.
2. There is no member of the crew sick with any disease.
3. Vaccination Certificates of the crew are in order and valid.
4. The vessel is not from a sick area.

For vessels calling at the Port of Manila, but already coming from another port of entry in the Philippines, Pratique is automatic. However, if somebody aboard the vessel is sick during the voyage, Pratique shall still be obtained.

RADIO: The particular radio station to be used by a vessel to route ETA cables to agent is at the discretion and selection of the vessel.

Radio Officer's Report: August 1980.

Radio: Intercom Manila Radio, call sign (DZF) operated by the International Radio Communication Philippines. Serving ship to shore and vice versa, domestic and international communications, on HF, MF, and HF radio telephone on 24 hours operation.

VHF: The only coastal station equipped with VHF radio telephone listening on Channel 16 international calling frequency. Simplex and duplex operations on working Channels, for a direct contact with Agents.

Also accepting radio calls on land locally and international link via their local telephone network (PLDT).

VHF: Manila Pilots Association on Channel 16 and 13.

RADAR: No existing Port Radar Service.

TUGS: Tugs normally join vessel inside the breakwater.

BERTHING: There are 5 finger piers at South Harbour.

Pier No.	*Pier Length* (m.)	*No. of Berths*	*Depth* (m.)
3	389	4	10.70 – 11.35
5	390	5	11.35
9	393	5	9.00 – 11.68
13	494	7	6.71 – 10.06
15	397	4	10.70 – 11.35

Container Berths: There are 2 container berths at Berth Nos. 3 and 4 of Pier 3. Length 375 m.

One fixed Ro/Ro berth at Pier 13, capacity 50 tons.

CONTAINER HANDLING FACILITIES:

Manila International Container Terminal:

Address:	International Container Terminal Services Inc., (ICTSI) ICTSI Administration Building, MICT South Access Road, North Harbour, Metro Manila, P.O.Box 279, Manila Central, Philippines.
Telephone No.:	21-36-51, 21-36-61, 21-36-71, 21-36-81.
Location:	North of the mouth of Pasig River off Pier of the PMO-North Harbour.
Navigational Approach:	The Fairway Channel has a length of 4,000 m. and a width of 250 m. Controlling depth is 12.2 m.
Tidal Range:	Mean Range – 0.763 m. Diurnal Range – 1.021 m.
Total Berth:	Length: 900 m. Width: 420.28 m. Depth alongside: 12.0 m.

Facilities

Container Yard 1 paved area	—	290,321 sq.m.
Rated capacity	—	18,680 TEUs stacking
Average Container Volume stored Daily	—	6,000 TEUs
Reefer Facilities	—	40 Outlets×220 Volts
Container Freight Station Area	—	10,208 sq.m.
Rated Capacity	—	114 container vans may be handled at any one time.
Average Tonnage Stored Daily	—	8,000 tons
Berths	—	4
Total Length	—	900 m.
Average Depth at Berth	—	12.0 m.
Average Length per Berth	—	215 m. except Berth No. 1 which has a length of 255m.
Operational Berthing Space	—	850 m. (can accommodate 4 vessels at any given time with 150 m. LOA per vessel)
Berthing Hours	—	Anytime, with 24-hour notice
Working Hours	—	24 hours

Equipment

Shore Gantry Cranes	—	3 (All electrically powered)
Capacity	—	35 tons SWL
Travelling Distance	—	645 m.
Waterside Outreach	—	35.05 m.
Back Reach (Landside)	—	10.66 m.
Upper Lift	—	1 container over 4 containers above deck
Lower Lift	—	8 tiers below deck
Straddle Carriers	—	14 Units (8 Valmet, 6 MHI)
Prime Movers	—	42 Units
Forklifts	—	59 Units (3 tons – 10 tons)
Chassis	—	119 Units
Service Vehicles	—	13 Units

Other Facilities

Weighbridge		—	2
Back-Up Area DASSAD	For dangerous cargo	—	5,000 sq.m. with 2 CFS at 1,500 sq.m. each
NAWACO	For overstaying containers	—	28,000 sq.m. with 8 CFS at 1,254 sq.m. each
APEX	For overstaying containers	—	28,840 sq.m. with 1 CFS
Truck Holding Area		—	2.8 ha.

CRANES:

	No. of Units	Description	Capacity
Container Terminal:			
Container Crane (Liebherr)	3	Electric-powered with telescopic spreader for 20 ft., 30 ft. and 40 ft.	35 tons
Yard Transfer Cranes	2	Mitsubishi Rubber Tyred Gantry Cranes	40 tons SWL telescopic spreader-bar
South Harbour:			
Container Cranes (Liebherr)	2	Electric-powered	35 tons
Mobile Cranes	3	MI-Jack	Lifting Crane

CONTAINER/GENERAL CARGO STORAGE FACILITIES:

Transit Shed	*Number*	*Use*	*Capacity*
Pier 15	2	Transit sheds – temporary storage for import and export	6,000 tons/ 5,750 sq.m.
Pier 13	1	Transit sheds – temporary storage for import and export	3,000 tons/ 3,100 sq.m.
Pier 9	4	Transit sheds – temporary storage for import and export	13,000 tons/ 14,694 sq.m.
Pier 5	4	Transit sheds – temporary storage for import and export	12,000 tons/ 12,664 sq.m.
Container Yard	3	Asphalt paved and partially concreted	6,000 TEUs/ approx. 18 hectares
Container Freight Station	2	For stripping/stuffing, storage purposes	10,000 tons/ 130,336 sq.m.
Open Storage Area	5	Asphalt paved	34,900 tons
Car Compound (STALAG)	1	For cars and other small vehicles	4,000 tons
Warehouses	9	Storage of import/export cargo	37,000 tons
Chassis Parking	1	Asphalt paved	2,000 TEUs, approx. 2 hectares

Liquid cargoes are handled at South Harbour, at the anchorage only through ship to ship or in to lighters.

BRIDGES: None.

STEVEDORES: Arranged by vessel's Agent prior to arrival.

MEDICAL: Notice from shipping Agents is required at least 24 hours in advance. There is one hospital clinic available at the port – the Roberto S. Oca Hospital Clinic located at Gate 4, South Harbour.

For quarantinable diseases, there is a 12-bed hospital, the Quarantine Isolation Centre is located at the airport.

3 hospitals in the city.

TANKERS: Tankers are very seldom accommodated at the Port. The Limay and Mariveles Sub-ports receive tankers.

Rosario: Filoil Refinery Sea Berth: Located at the entrance to Manila Bay in position: Lat. 14° 26′ 30″ N., Long. 120° 46′ 40″ E. This position is 2.5 miles off the shore of Rosario, Province of Cavite.

The mooring area is marked by 6 mooring buoys. A ship's guide buoy marks the point where the ship's starboard anchor will be dropped upon entry into the berth. 4 other buoys inside the berth at midport mark the end of the submarine pipe-line, centre of ship's manifold and the hose ends respectively. The bearing of the centre of the berth is N. 65° E. The depth is 50 ft. at high tide and 45 ft. at low tide approximately.

The weather is quite good during the dry season, but is unfavourable during monsoon season (May to November). Wind and swells are mostly from a S.W. direction and usually prevalent during monsoon season.

It is emphasised that vessels moored at the berth must be in good condition to clear the berth immediately in case of an emergency. Ship's engines and gear must be ready with full power for immediate use. Ship's personnel should be at their stations at all times during mooring, unmooring and cargo unloading operations.

Radio: Filoil Makati Office may be contacted by dialling telephone Nos. 87-40-61 and 87-40-71. The Rosario Refinery may be contacted by dialling telephone Nos. 47-95-51 and 47-95-53.

Communication from the Sea Berth with the Refinery, Filoil's launch and Filoil Representative on board is through VHF radio. If VHF radio fails, the Filoil launch will be despatched to bring message either way.

Filoil Representative on board maintains a radio watch and constant communication with the shore for general purposes and emergencies.

Luzon Stevedoring Company tugboats also maintain a constant radio communication with their representative at the shore. In case of emergency, messages can be relayed via these tugs.

Ship's Agent: All vessels carrying crude or other cargoes for discharge at Filoil Refinery Sea Berth must appoint their local ship's Agent who will provide them with the necessary ship husbandry services.

Notice of Arrival: They must report their ETA to Filoil Refinery Corporation, cable address "Filoil", Manila, Philippines, 3 days after leaving port of loading and 72 hours before arrival at Manila.

Pilot and Boarding Parties: Pilots are arranged for by the ship's Agent. Generally, Pilots board the tanker at the Manila Anchorage to assist the Master to moor in the berth and leaves at the Sea Berth after berthing.

Filoil Representative boards the tanker 1 mile before the Sea Berth, but if it is the first voyage, he boards the tanker together with the Port and Government Authorities at Manila Anchorage.

Tugs: Tugboat service is arranged for by ship's Agent. Tugs generally come from Manila. Give at least 48 hours' notice when ordering tugs.

Quarantine, Customs and Immigration: Manila is the port of entry for the Rosario Sea Berth. Therefore, entry and clearance must be arranged by the Ship's Agent at Manila. Boarding Officers board the vessel in the Quarantine Anchorage prior to arrival within the mooring area. Pertinent Government Officials should be given sufficient time, usually not less than 24 hours Monday to Friday, and 48 hours Saturday and Sunday. Generally, entry and clearance can be arranged by the Agent who should advise Customs well in advance of the vessel arrival.

Ballast, Bilge and Garbage Disposal: There are no ballast facilities at the refinery. Masters are advised that in Manila Bay, the Harbour-Pollution Regulations are rigidly enforced. Therefore no bilge water, oil contaminated water, garbage or similar refuse which may pollute the sea water in any way, is to be discharged overboard while the vessel is within Manila Bay and approaches thereto. The staff at Rosario are required to report any violation of this Philippine Merchant Marine Regulation.

Launch Service: Regular launch service for crew transportation is not available and has to be arranged through ship's Agent. The Luzon Stevedoring launch is used to run lines, assist in picking up cargo hoses, etc. Filoil's owned or hired launch is for the exclusive use of Filoil Representative and personnel boarding the vessel; however, transportation may be arranged through Filoil Representative in cases of emergency.

Medical: Medical attention can be arranged by the ship's Agent. There is a clinic at the refinery. The nearest hospital is 0.5 miles.

Heading for the Sea Berth: As soon as government clearance (Pratique) is granted, vessel weighs anchor and heads for Rosario Sea Berth, a distance of about 16 land miles from Manila Anchorage.

Vessel Mooring Gears and Facilities: The vessel's bow is secured in the moorings by the use of both bower anchors. Therefore, ship must have both bower anchors ready for immediate use, each with a minimum of 150 fathoms of chain. Anchors, chains and anchor windlass must be in good condition and capable of heaving ship ahead with the chain or letting one chain go out on the run while heaving in on the other. Mooring Buoy No. 6 can be used instead of port anchor if 3 mooring lines are hooked up.

Vessels must be equipped with 10 in. manila or better mooring lines of not less than 8 in. circumference and not less than 90 fathoms in length of each line. 2 lines are required for each of 6 mooring buoys, 5 of which are aft to secure the ship's stern. Therefore, 5 lines are to be available on the fantail for mooring to Buoy Nos. 1, 2, 3, 4 and 5.

Vessels having wire moorings secured on warping winches with surge valve and brake are acceptable. Warping winches must be adequate to handle mooring line under heavy strain. Efficient stopper lines must be readily available to "stop" mooring lines for transfer from winch to bitts without loss of tension.

All chocks other than roller (if free) shall be fitted with chafing gear to protect lines before berthing operation commences, endeavouring to install chafing gear after the ship has been moored has proven impracticable. Old fire hoses or substitute is suggested.

If in the opinion of the Pilot, the vessel's mooring facilities lines and/or gear are inadequate, he will inform the Master and Filoil Representative, and in such event the vessel will not be allowed to enter the moorings until such conditions are deemed satisfactory.

Docking Procedure: To moor, the vessel approaches the mooring heading due South. When in proper position, the starboard anchor is dropped and the chain allowed to run until vessel crosses the mooring area to a point where the port anchor is let go or when the mooring lines are dropped to Buoy No. 6. Then the engines are backed and the vessel with the assistance of the tug, manoeuvred into the mooring area where after lines are run to the 5 mooring buoys and then the anchor chains are brought tight simultaneously with the securing of the stern to the mooring buoys. The vessel is then heading due West parallel with the tide current flow.

When secured in the berth, vessel should not be closer than 10 m. from the end of the submarine pipe-line. Bower anchor chains should have spread of not less than 30° on either side of the ship's imaginary fore and aft line extended forward. Stern buoy moorings should be set as taut as possible and anchors form an approximate angle of 300° with water line.

Submarine Hose Lifting Gear and Manifold Connection: The derrick on the port side in way of the hose connection must be rigged to lift not less than 5 tons. The topping lift shall be available to raise or lower the boom as required and the winch and whip shall be of a quality and nature to lift the hose exactly and evenly. The hose and fittings are considered to weigh 3 tons. The hose connecting gang and its supervisor are from Luzon Stevedoring Company and are under contract to Filoil. They will use the ship's machinery to raise the 2×10 in. hoses from the bottom and secure same to the ship's side. They will also disconnect the hoses and lower same to the bottom of the sea after completion of discharging of cargo. The ship's manifold must have 10 in. flanges for connection to 10 in. submarine hoses.

Safety Rules and Regulations:

Mooring lines must be in good condition and kept tight at all times.

Sparking smoke stacks must not be permitted. If for any reason a stack catches fire or emits live sparks, cargo operations must be stopped immediately on this and adjoining vessels.

Throw nothing overboard from deck or portholes while at Sea Berth.

During cargo and/or ballast operations, vessels shall show red flag by day and red light by night. No smoking amidships during cargo and/or ballast operations.

No chipping, repairs, welding or hot work is allowed on any vessel while at sea berth unless special permission is given and a safety permit obtained. The ship must always be ready to sail out at a moment's notice. The Authority decides when vessels at pier side and Inner Anchorage be shifted to Outer Anchorage during Typhoons.

Pumping crude oils must be stopped during electrical storms or if lightning appears in close vicinity.

In case of fire, shut down all pumping and sound alarm. Disconnect hoses so as to be ready to shift from berth. All vessels at berth must have main engines ready for use. Water, foamite and steam are never to be used on electrical fires. Use dry chemical or Pyrene. Use foamite, water fog, steam CO_2 or dry chemical on oil fires.

Avoid spilling oil on deck. If any oil is spilled, it must be cleaned immediately. Gasoline or naphtha is not to be used for cleaning.

Only Underwriter's laboratory approved flashlights permissible use in methane and air mixtures by the U.S. Coast Guard are to be used for loading, discharging, ballasting and/or repair work on vessels.

Ullage screens are to be kept in place during cargo and/or ballast operations.

No extension cord or portable cables which are connected to an electric power source shall be used on deck in way of cargo or fuel tanks unless vessel is certified gas-free.

Fire hose shall be laid out and suitable fire extinguishers available. Failure to comply with any of the above rules will result in the vessel being shut down. Sufficient copies are to be presented to the Master so that they may be posted in various places about the vessel. It is the Master's responsibility to see that these rules and regulations are enforced.

Discharge of Cargo: After hoses are connected the Filoil Representative will, after communication with the refinery, advise commencement of pumping. In the beginning the rate is to be slow and the Filoil Representative will advise when pumping rate is to be increased to maximum. Discharge of cargo may be stopped due to adverse weather conditions. In which event, the hoses are disconnected and the submarine hose lowered to the sea bottom. Cargo discharge will be resumed when the adverse weather moderates.

Crude oil discharge through 2×10 in. hoses 255 ft. long through a 10 in. check valve and 10 in. gate valve then into the 24 in. pipe-line which is 2.5 miles in length. The height of the shore tanks (foundation) above sea level if 15.5 ft. Pressure at the ship's side must not be less than 60 lb. Maximum pressure allowed is 120 lb. at the ship's side.

Stripping – Tank Draining: To keep a discharge time to a minimum, tanks should be stripped into one of the ship's tanks and the final stripping shall be from only one tank.

Board and Lodging Accommodation: Sufficient accommodation and meals are requested to be available and prepared for the Filoil's Representative in the Officers' quarters. He will remain with the vessel until casting off or until relieved to be of assistance to the crew.

DENSITY: Variable.

FRESH WATER: Fresh water is available from barges.

FUEL: This depends upon the requirement of the vessel. However, as to the quantity, the Philippine Government can only sell vessels sufficient for it to reach the next port of call.

FIRE PRECAUTIONS: The "Absolutely Non-Smoking Area" signs to be exhibited. Permission must be obtained from the Authority before following undertaken – welding work, onboard repairs, vessel imobilisation.

REPAIRS: Only minor repairs possible.

DRY DOCKS: *Bataan Shipyard and Engineering Co. Inc.:*

1 Graving Dock with max. length 164 m., breadth 23.16 m. and depth 12.19 m. Max. size 16,000 d.w.t.

1 Synchrolift for vessels up to 2,000 d.w.t.

Philippine Shipyard and Engineering Corp. (Philseco): Located at Subic Bay.

1 Graving Dock, 350 m.×65 m.×12.5 m. Capacity 300,000 d.w.t.
1 Berth, length 300 m., depth 9 m.
1 Jetty, lengths 185 m. and 135 m., depth 9.0 m.
1×80 ton crane and 1×30 ton crane.

Keppel Philippines: 2 dry docks:

1. 110 m.×19 m.×5.0 m. on sill.
2. 110 m.×15 m.×5.5 m. on sill.

SURVEYORS: Lloyds' Register, A.B.S. and others located in the city. Cargo inspectors available.

GANGWAY/DECK WATCHMEN: This service is available whenever needed.

HATCHES: Stevedores usually open and close hatches. In special cases, when the vessel is of a different model and the hatches are constructed differently, crew members are requested to assist stevedores.

CUSTOMS ALLOWANCES: The only allowable quantity of goods to be held out of bond is that which the members of the crew can use personally. Usually, one or two bottles of wine and a pack of cigarettes. Those brought out from the vessel beyond this will be considered for commercial consumption and will therefore be charged tax.

REPATRIATION: Shipping Agent can arrange this with the Bureau of Immigration.

AIRPORT: The nearest airport is the Nimoy Aquino International Airport, about 8 km. from the Port of Manila. This is served by regular airlines.

HOLIDAYS: There are about 12 national holidays in the Philippines. Working days are from Monday to Friday, for government employees, and Monday to Saturday, for private employees. However, the Port of Manila does not observe any of these holidays. Operations at the port are on a day-to-day basis.

Work stoppages may be declared on the following holidays:
Good Friday (1800 hrs. Thursday – 1800 hrs. Friday)
Christmas Eve (1800 hrs. 24th December – 1800 hrs. 25th December)
New Year's Eve (1800 hrs. 31st December – 1800 hrs. 1st January)

POLICE/AMBULANCE/FIRE: Police Tel: 59-90-11, 59-43-44, 59-63-36. Ambulance Tel: 62-38-58, 61-53-76, 61-53-89. Fire Tel: 47-43-24, 48-37-34, 58-11-76.

EMERGENCY CO-ORDINATION CENTRE: Philippine Coast Guard Tel: 483257 (operations).

TELEPHONES: Arranged by vessel's Agent from the Philippine Ports Authority.

SERVICES: *Services on Cargoes:*

(a) Weighbridge / Truck Scale.
(b) Lighterage / Barges.
(c) Trucking.
(d) Brokerage.
(e) Cargo Checking.
(f) Import / Export Services.
(g) Shipping Agents.

Services to Ships:

(a) Bunkering Services.
(b) Tug Assistance / Barging.
(c) Ship Chandling.
(d) Pilotage Services.
(e) Water Supply.
(f) Water Taxi / Ferry Services.
(g) Garbage Collection Services.
(h) Laundry.
(i) Ship Repair Services.
(j) Towage and Salvage Services.
(k) Maritime Services.

Apart from the usual services of the port, others are ship salvage and container leasing.

BANKS:

Boston Bank of the Philippines, Mary Bacrach Building, Port Area, Manila. Tel: 40-18-06/07.

Far East Bank, Far East Bank Complex, Muralla St., Intramuros, Manila. Tel: 40-10-21/30.

Land Bank of the Philippines, South Harbour, Port Area, Manila. Tel: 47-43-48.

Philippines Bank, Union Cement Building, Port Area, Manila. Tel: 47-16-20, 48-25-80.

Philippines National Bank, Port Area, Bureau of Customs Compound. Tel: 48-54-88, 40-31-48.

SHORE LEAVE: Crew members are allowed ashore as long as sufficient members of the crew are left on board to manage the vessel in case of unforeseeable incidents. This is necessary in order that the vessel can be removed from berth or anchorage.

IDENTIFICATION CARDS: Shore passes are issued by the Bureau of Immigration.

REGULATIONS: No particular or unusual regulations are observed at the port.

DELAYS: The expected delays are: During inclement weather, some difficulty may be encountered in berthing and when some of the specialised cargo handling facilities have failures.

DEVELOPMENTS: *Short Range Development Programme (1 – 7 years):*

The Short Range Development Programme covers the expansion and utilisation of some specific areas, to cope with the immediate needs of South Harbour's day-to-day operations.

(a) Port Integrated Clearance Office also known as "One-Stop Clearing House".
(b) Relocation of Shipping Lines Field Offices.
(c) Truck Holding Area.
(d) Shaded Parking Area for Private Vehicles and Shuttle Buses.
(e) Expansion of CY-01.
(f) Expansion of CY-02.
(g) Maximum utilisation of Warehouses 1 and 11, 2 and 3, and 6 and 7, as Container Freight Stations (CFS).

(h) Temporary Storage for Dangerous Cargoes.
(i) Incorporation of the Barge Point to CY-01 for Chassis Operations.

Long Range Development Programme (1 – 15 years):

Under the Long Range Development Programme, the entire South Harbour will be fully utilised, primarily for port related activities. Toward this end, the entire harbour will be divided into 3 main geographical zones, namely:

(a) Administrative Complex Zone.
(b) Operational Zone.
(c) Commercial Establishments Zone for port related activities.

The Administrative Complex Zone is strategically located at the central portion of South Harbour with a total estimated land area of 105,035 sq.m. It is bounded in the North by 13th Street; in the South by the portions of 18th and 21st Streets; in the East by Railroad Street and in the West by portions of Boston and Chicago Streets. It is in this zone where all government and private offices, that are involved in import-export documentations and other port related activities will be permanently situated. Hence the other zone, that is the Operational Zone, is purely confined to actual physical handling of cargoes. The primary consideration here is to minimise or avoid port users from loitering in the operational zone while processing their papers.

Commitment to Port Development:

Proposed Development: The port will be converted to transtainer operations in 5 years. The container yard will be expanded by approximately 13 hectares, and a fifth berth will be developed, when volume of throughput indicates the need. A new Container Freight Station building will also be built.

AUTHORITY: Philippine Ports Authority (Head Office), Marsman Building, South Harbour, Port Area, Manila, Philippines. Mailing Address: P.O.Box 436, Manila, Philippines. *Tel:* 47-92-04, 40-81-66, 48-24-93. *Telex:* 40404 (ITT). *Cables:* PHPORTS Manila. *Contacts:* Rogelio A. Dayan, General Manager. Tel: 47-92-04. Associated with Jardine Shipping Agencies.

MASBATE, Masbate Island: 12.35 N. 123.31 E. **(See Plan)**

DOCUMENTS:
Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 36 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 km. from the mouth of the channel of Masbate Bay aboard a boat displaying a Pilot's flag.

ANCHORAGE: Within Masbate Pass, but not greater than 500 m. from the mouth of the channel leading to Masbate Bay. The area within the Masbate Bay could only be used during emergencies and typhoons.

RESTRICTIONS: Present port facilities can only accommodate 1 vessel at a time due to draft limitation and physical length of the wharf.

MAX. SIZE: LOA 300 m.; Draft 28 ft.

HEALTH: Vessels will clear quarantine on arrival at Masbate Harbour. Quarantine Officers will normally board the vessel once it is inside Masbate Bay.

BERTHING: The entire berth length of the wharf could be utilised for the loading or unloading of cargoes. Length of quay 180.0 m. Width 10 m. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 4 m. at low tide. Average rate of loading/discharging 20 tons per gang hour.

CRANES: None available.

STEVEDORES: Provided by Masbate Consolidated Arrastre, Inc.

MEDICAL: One government hospital and three private hospitals.

FRESH WATER: Available by special arrangements.

FUEL: All grades obtainable from Caltex depot in the area and supplied by lorries alongside.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

HATCHES: Opening and closing of hatches are part of the stevedores' work or at the Master's option.

REPATRIATION: All facilities available for crew changes; good sea and air connections.

AIRPORT: 3 km. from port area. One flight to Manila daily.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Go Friday; Labour Day (May 1st); Independence Day (June 12th); P.I.U. Friendship Day (July 4th); Bonifacio Day (November 30th); Spec Public Holidays declared by the President of the Republic of th Philippines is also included.

If any other legal holiday falls on a Sunday the following day observed as a Holiday. Cargo work can be arranged on any or holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police and ambulance can be contacte through the local PPA office.

TELEPHONES: Placing of telephones on board can be arranged wi the local telephone company (PILTEL).

SHORE LEAVE: Crews can be allowed ashore in company of Immigration Officer.

DEVELOPMENTS: Extension of the wharf by 80 linear metres.

GENERAL: Vessels intending to call port at Masbate shall apply for berth space at least 24 hours before arrival. No dirty ballast may b dumped into the territorial waters of the Philippines. Rat guards shall b placed on all mooring lines. Berth allocation is on a first-come first-serve basis.

AUTHORITY: The Supervising Officer, Philippines Ports Authority.

MASINLOC, Luzon: 15.32 N. 119.57 E. **(See Pla**

SHIPMASTER'S REPORT: June 1988.

DOCUMENTS:
6 copies Crew List, these being in addition to visaed Crew Lis supplied in advance.
3 copies Stores List.
3 copies Bonded Stores List.
3 copies Crew Declaration.
1 Summary of Ship's Particulars.
1 copy Maritime Declaration of Health.
1 copy Manifest of Transit Cargo.
1 copy each of Passenger List, Livestock, Arms and Ammuniti Declaration or "Nil".
Last Port Clearance.

PILOTAGE: Pilot boards in position 15° 33′ N., 119° 53′ E. In view the absence of navigational aids (buoys) it is recommended that th vessel waits for the Pilot to fetch the vessel inside to the anchorag The depth outside is too great for anchoring. We drifted, 8 miles offshor for a period of 14 hours whilst awaiting the Pilot and experienced ve little drift.

The Pilot boards from an outrigger fishing canoe exhibiting a large ' flag. For berthing, normal pilotage hours are from 0500 – 1000 hrs., b this may be extended in calm weather conditions. No docking undocking during the hours of darkness.

The Pilot was competent in berthing the vessel, using a starboa anchor (7.5 shackles out when alongside) and a mooring boat to ru lines to the jetty, buoys and dolphins.

ANCHORAGE: The anchorage is about half a mile from the berth position 15° 32.5′ N., 119° 56′ E., depth of water 11 fathoms.

Clearance is sometimes carried out at the anchorage.

RADIO: All communications are via Manila Radio as there is no dire link with Masinloc.

VHF: No VHF communications possible with the port or pilot.

BERTHING: The bulk loading jetty is located in position 15° 32.9′ N 119° 56.3′ E., depth alongside 31 ft.

Starboard anchor was used for berthing. Lines were run to buoy ahead, astern and starboard quarter. Breast lines were run to dolphin and springs were run to the jetty (See "Plan").

Loading: Loading is by conveyor and shoot which can be deflecte slightly forward and aft. Rate 100 tonnes per hour – 120 tonnes pe hour.

Access gangway provided from the jetty.

Loading is suspended in heavy rain and hatches are covered.

STEVEDORES: Loading is carried out throughout 24 hours.

MEDICAL: Consultations can be arranged.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Nearest Consuls are at Manila.

REPAIRS: No facilities available.

SURVEYORS: Based in Manila.

REPATRIATION: Repatriation can be effected through Manila which about 3 hours by car.

AIRPORT: At Manila.

GENERAL: *Chart:* B.A. Charts No. 3806 (approach), 3559 (plan).
Notice of Arrival: To be sent to Agent in Manila.
Telephones: The nearest telephone is 1.5 hours away by car.
Accommodation: There is a local lodging house, but no air conditionin available so probably more comfortable aboard the vessel.
Stores: Available at local market.

SHIPMASTER'S REPORT: January 1989.

PORT LIMITS: Notice of Readiness tendered showing the time w reached the pilot station (Lat. 15° 33′ N., Long. 119° 53′ E.), and it wa accepted without objections.

DOCUMENTS:
8 copies Crew List.
8 copies Passenger List.
3 copies Personal Effects List.
3 copies Stores List.
1 copy Vaccination List.
1 copy Cargo Manifest (cargo to be discharged – obviously alwa "Nil").

PILOTAGE: Pilot boarding position Lat. 15° 33′ N., Long 119° 53′ E.

There is only one pilot available. No VHF equipment available. ETA should be sent through Manila Agent.

As all buoys and beacons are missing, the ship can proceed, assisted by Pilot, in daytime only, whether for berthing, unberthing or anchoring.

The latest time the Pilot will board, all year round, is 1800 hrs.

In the calm season, a place for temporary anchorage is located 2 to 3 cables from that recommended by B.A. Pilot. (This one, in my opinion, is too close to the bank).

The Pilot recommends waiting outside and drifting, from April till October, as the anchorage is unreliable.

ANCHORAGE: The inner anchorage can accommodate 2 vessels. During the typhoon season, vessels should seek shelter in other places in the North or in the South.

RESTRICTIONS: Daytime only for berthing and anchoring.

No restrictions for shifting the ship by her own ropes at the wharf, at any time, for loading purposes.

HEALTH: Radio Free Pratique requested in advance, but of no advantage. Authorities boarded for the formalities and the whole process for Free Pratique was performed then.

RADIO: No local radio station; Agent's representative will make contact through his Manila office.

RADAR: Not available.

TUGS: Not available.

BERTHING: Only one berth, owned by Benguet Co., for loading chrome ore, exclusively by shore equipment (see "Plan").

CRANES: No cranes available.

BULK CARGO FACILITIES: There is a conveyor belt feeding a "shuttle". The maximum reach of the shuttle is 48 ft., measured from the outer border of the horizontal fender in the wharf. Its overall length if 57 ft. 3 in.

Onshore, a payloader and bulldozers are used for handling of the ore.

The shuttle can move backward and forward following the axis of the wharf (see "Plan"), somewhat oblique to the fore/aft line of the ship.

There is a flat spout at the end of the shuttle that, according to how it is positioned, permits direct loading in four different fixed directions.

Nevertheless, the trimming of cargo is performed by 15 to 20 men with shovels.

Maximum air draft for the hatch coaming: 35 ft. (low water).

Maximum loading rate: 200 tonnes/hour.

The ore arrives by rail cars from the milling plant some 27 km. away and is stocked while no ship is berthed.

STEVEDORES: Regular employees of Benguet Co., working 24 hours a day.

MEDICAL: For emergency cases there is one hospital 10 km. from the port.

DENSITY: 1022 to 1025.

FRESH WATER: Not available at present.

GANGWAY/DECK WATCHMEN: Compulsory.

REPATRIATION: Through Agents via Manila.

AIRPORT: Ninoy Aquino International Airport (formerly "Manila International Airport").

HOLIDAYS: Only holiday is Good Friday when work ceases from 0700 hrs. – 0700 hrs. the following morning.

POLICE/AMBULANCE: From Masinloc City, 1 km. from the port.

DELAYS: Only delays caused by force majeure (typhoons or another vessel already berthed).

SHORE LEAVE: Shore passes are sufficient, there are no restrictions regarding time. For receiving visitors, Master should ask the Authorities for permission in advance. The best opportunity is during clearance formalities.

GENERAL:

(a) Agents, surveyors, workshops and ship chandlers come from Manila. It is therefore very important to make all arrangements well in advance, even the ETA to Pilot.

(b) Boat service: When at the anchorage, whether for bringing the crew ashore, spares or parts for repair, small boats with 2 stabilizers are commonly used in many places in Philippines. One of these boats is used for handling the first lines to the berth and when shifting ropes from one bit to another.

(c) Length of the pier: 207 ft. 7 in. (bridge and dolphin excluded).

(d) Distance from tunnel portal to pier end: 640 ft. 7 in.

(e) Dredging is in progress. After completion the guaranteed draft will be 34 ft. maximum. Before starting, it was 31 ft.

(f) Maximum permissible draft at LW is 34 ft.

(g) During the stay in port and at the anchorage, 2 Customs Officers live on board; a cabin and meals are required for them.

AUTHORITY: Philippines Port Authority (PPI).

SHIPMASTER'S REPORT: May 1989.

VESSEL:

LOA: 119.6 m.
Beam: 18.5 m.
D.W.T.: 9,262 tons
G.R.T.: 5,373 tons
N.R.T.: 3,082 tons
Loaded Draft: Forward: 7.4 m. Aft: 8.3 m.

CARGO: Chrome Ore.

DOCUMENTS: The following are required:

1 copy Last Port Clearance.
6 copies Crew List.
4 copies Crew's Personal Declaration.
4 copies Stores/Narcotics List.
2 copies Animal List.
2 copies Plant List.
2 copies Firearms Declaration.
2 copies Vaccination List.

Derat Certificate should be ready for inspection. If any crew changes then 2 copies of amended Crew List are required.

PILOTAGE: Compulsory for all foreign vessels. Pilotage is restricted to daylight hours, and in good weather only. There are 2 pilots for the port (one was on leave during our call). Pilot boat is a wooden fishing boat with 3 m. long spreaders on either side for boarding. There are many fishing boats in the vicinity and therefore it is difficult to distinguish the pilot boat from other boats. It is only when close by that you notice a small pilot flag on the boat. Pilot has a walkie-talkie with Channel 16 (it was malfunctioning during our call). Pilot boards 1.5 miles North West of Alupihing Point (Salvador Is.). Pilot was very experienced.

ANCHORAGES: Owing to numerous reefs, shallow waters and restricted manoeuvring space it is recommended that vessels remain underway in the offing at least 2 miles off the coast. There was a negligible drift in 4 hours whilst we were awaiting daybreak.

RESTRICTIONS: Port is entered during daylight hours and only in good weather. Buoys No. 1, 2, 3 and 4 are missing. Beacons (wooden piles) exist as marked on the chart (BA. Chart No. 3559). Leading beacons were white slatted top marks with front metal triangles. At present, they are very rusty and are very difficult to sight unless one is dangerously close. I gave the Pilot some white paint so they could be painted. All reefs are noticeable as discoloured water. Please refer to China Sea Pilot for further details. There is very little range of tide at Masinloc.

MAX. SIZE: According to Pilot 32 ft. draft is the maximum. Length of pier is 66 m. only. There is a new pier under construction which is due to be commissioned in July of this year.

HEALTH: Free Pratique is requested by the Agent at Manila. Doctor comes from Manila, remaining quarantine officials operate from Masinloc. Usual inspection is carried out upon arrival.

RADIO: No radio at Masinloc, all communications through Manila Agent.

VHF: No VHF communications available.

RADAR, TUGS, FRESH WATER, FUEL, REPAIRS, DRY DOCKS AND BANKS: Not available.

BERTHING: Channel is surrounded by tree-covered mountains. Tying up procedure takes about an hour from the first line to the last line. There is only one berth, a T-head concrete pier, 66 m. long with a steel bridge extending at the S.E. end. A dolphin is used for breast lines forward and aft. Loader, red in colour, is stationary with maximum horizontal extension of 14.5 m. Trimming of cargo is done by hand by inexperienced labour. When shifting vessel fore and aft it is very important that vessel remains parallel to pier at all times as there is less water beyond the line of pier. Air draft was 12.2 m. Cargo from this port is chrome ore only. Ore is brought by railway wagons from mines to the storage area, where it is put on to a conveyor belt by earthmovers and finally loaded on to the vessel. Conveyor belt is about 200 m. long. We averaged a load rate of 140 tonnes/hr.

Draft surveyors work out quantities twice a day, along with the Chief Officer.

Shore load scale was found to have a difference of about 2% on the high side. During total loading operation of 70 hours, we had chute trouble for 6 hours and 3.5 hours was utilised in 3 shiftings.

We were port side to with starboard anchor 7 shackles in water.

Notice of Readiness is accepted after holds are passed for loading.

DENSITY: 1023, constant during our stay.

CONSULS: None at Masinloc, only in Manila.

SURVEYORS: Can be arranged from Manila only. Sufficient notice should be given as it is a 5 hour drive.

CUSTOMS ALLOWANCES: 1 bottle of spirits and 200 cigarettes per person.

REPATRIATION: Possible via Manila.

TELEPHONES: Only possible from Subic City (an American Naval Base), which is 120 km. from the port (about 2 hours' drive). Even domestic calls are not possible from Masinloc.

SHORE LEAVE: Allowed. Shore passes are issued and must be carried at all times.

GENERAL: Watchmen (2) are recommended by the Agents, though I found the port safe in all respects. 2 Customs Officers stay on board at all times, accommodation and food is to be provided. No ship chandlers at Masinloc. No deck or engine stores available, same can be arranged through Manila Agent, but would be expensive owing to transportation costs. Some fresh provisions can be purchased at Olangapo City, 140 km. from port (20 km. from Subic City). Seafood was relatively cheap compared with other places. Masinloc is a small town with a few ordinary hotels, accommodation is always available. Main mode of transportation is bus.

AGENT: There are no agents at Masinloc. Agent comes from Manila and remains at Masinloc during vessel's stay and is available whenever required.

MATI, Mindanao: 06.56 N. 126.14 E. (See Plan)

SHIPMASTER'S REPORT: August 1990.

Also see "Davao".

DOCUMENTS: Entry formalities require 30 officials to clear vessel, and 6 copies of the following are required (these stapled together into small booklets to reduce confusion, with all officials taking papers simultaneously).

(a) Customs Inward Foreign Manifest.
(b) Ship's General Particulars and Information.
(c) List of Ports of Call.
(d) Crew List.
(e) Crew's Declaration Manifest.
(f) Ship's Bonded Stores List.
(g) Ship's Provisions List.
(h) Arms and Ammunition List – Nil.
(i) Animal List – Nil.
(j) Plants List – Nil.

(k) Mail List – Nil.
(l) Currency List – Nil.
(m) Passenger List – Nil.

Note: (h) to (m) can be included on one list to save paper.

PILOTAGE: Pilot comes from Davao, which is 4 hours away by bus, so plenty of advance warning to agent required. Vessel's Agent in Manila, so everything co-ordinated from there.

No VHF facilities to contact anyone locally.

ANCHORAGES: Anchoring not recommended without extensive local knowledge, as require to be close to shore, and there are underlying reefs off the town of Mati.

Vessel stopped, and waited for Pilot just inside the 100 fathom line, which is about 1.5 miles off the berth.

APPROACHES: As it was the vessel's first visit, arranged arrival time to coincide with sunrise for approach into Pujada Bay. No navigational marks or aids seen at all.

Radar parallel index approach is possible, as land on either side steep to and good radar targets, as are Pujada and Uanivan Islands.

Pujada Bay is over 200 fathoms deep in places with plenty of space. Vessel entered Bay, and altered to leave a conspicuous white building (shown as "Mill" on chart, and is an old plywood mill, redundant) ahead.

Numerous small fishing pirogue dug-outs in Bay.

Actual loading berth is a dark, pyramid shed, with 3 oil tanks adjacent, which lie further to starboard.

RESTRICTIONS: Do not shift too far ahead or astern when changing holds, as reef astern and shallow water ahead.

MAX. SIZE: 18,000 g.r.t. (about 180 m. LOA).

TUGS: None available locally. Tug available from Davao, but has to be ordered via Manila, and lots of paperwork required.

BERTHING: Pilot comes out in small yellow coloured boat, with top speed about 3 knots. This boat then serves as line handling boat for berthing, so vessel has to wait for it to return to berth before approaching.

Berth in daylight only and with no wind, any wind over 3 knots would be too dangerous. Use port anchor and berth port side to. Anchor will run to about 3.5 – 4 shackles, and great care should be taken, so as not to snatch bow and pull stern up onto reef.

Send spring first onto dolphin.

Best to let vessel pass final position, then bring back on lines once alongside, as reef also close astern (See "Plan").

STEVEDORES: All are copra mill employees and arranged by same through Agent. All pellets trimmed by hand.

CARGO: Coconut by-products; expeller pellets (by extraction method) and the oil (palm/coconut) from the process.

Bulk cargo as pellets and oil, both from same berth, by a conveyor belt running out from shore with a pipeline beneath, to a small elevator dolphin.

A smaller jetty alongside serves coastal vessels discharging the copra (coconut kernels), using a mobile crane into a lorry.

LOADING: A maximum airdraft to coaming of 39 ft. is required by mill, but vessel estimates 40 ft. 06 in. would have been possible (height of tide about 4 ft. at the time).

From dolphin loading tower, there is a fixed loading arm, the end spout of which can be manipulated by ship's crane to give some trimming.

Vessel has to shift under loading arm to load other holds, and would only permit loading up to No. 2 hold (vessel 180 m. LOA), as to load No. 1 would have put ship very close to reef astern. Similarly, to load No. 5 would have put vessel too close to shallow water ahead.

Loading rate of 90 t.p.h. – 100 t.p.h., as governed by pay-loader in shed feeding conveyor.

DENSITY: 1024.

FRESH WATER: Available by barge from Davao, but expensive. Coasters supplied by fire engine from mill.

FUEL: By barge from Davao.

FIRE PRECAUTIONS: No smoking on deck.

CONSULS: None locally.

REPAIRS: No facilities available.

SURVEYORS: None locally. Surveyor came from Manila to do On-Hire Survey and Draft Survey, and remained on board for surveys at other ports.

HATCHES: Operated by crew, and closed at first sight of rain, so cargo did not get wet.

WATCHMEN: Employment of local armed watchmen strongly advised as a deterrent. Ship's crew also used.

AIRPORT: Nearest airport at Davao.

SHORE LEAVE: No restrictions. Shore passes not required.

GENERAL: *Chart:* B.A. Chart No. 415.

Gangway: Access extremely difficult, as only loading tower dolphin connected to shore and insufficient space on this to use B.O.T. Gangway, etc. Crew had to climb up onto overhanging loading arm, or down pilot ladder onto some part of loading tower structure.

Stores: Very difficult to get through mill gate, and to get onto vessel equally difficult. Small amounts of fresh provisions possible via dug-out, but quality questionable.

SMR.

NASIPIT (Including Masao and Butuan), Mindanao: 09.06 N. 125.22 E. **(See Plan)**

See "General" before first port.

Under the latest 2nd phase of PPA re-organisation, PMO-Nasipit presently covers the Baseport of Nasipit, PTO-Butuan and PTO-Masao.

PORT LIMITS: From Diwata Point up to the coastal limits at Bolo-Bolo Point, the territorial boundary between the Provinces of Agusan del Norte and Surigao del Norte.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
2 Stores Lists.
2 Stowage Plans.
2 Personal Effect Lists.
3 Inward and Outward Cargo Manifests.
1 Ship's Information sheet.
1 Statistical Supplement.
1 Cargo Bill of Lading, if any.

PILOTAGE: Compulsory.

ETA: Ocean going vessels – 24 hours' notice.
Coastal vessels – 12 hours' notice.

Pilot Boat Description: Upper structure white; lower structure black with a letter "P" at the bow. During night time, when a vessel requires a Pilot particular light used is permanent red at the uppermost portion of the boat and a flashing white light.

Location of Pilot Station: Masao, Lumbocan, Butuan City, with office address at the 2nd Floor, Estalinda Building, Corner of Concepcion and Lopez Jaena Streets, Butuan City.

For the Port of Masao, Lumbocan, Butuan City, there is no alternative area in the event of bad weather as it is an open sea. However, at the Baseport of Nasipit, vessels can seek shelter during bad weather because of its natural cove which protects the vessels against strong winds and heavy seas.

Pilot Boarding Station:

Nasipit – One nautical mile N.E. of Nasipit Lumber Company Lighthouse, port side from seaward of the Nasipit Cove entrance.
Masao and Butuan – Two nautical miles North of the Pilot Station Tower at Barrio Lumbocan, Butuan City.

ANCHORAGES: Depth of safe anchorage: 75 m. deep along the shore line.

Masao Anchorage Berth:

Anchorage No. 1:	Lat. 9° 01′ 05″ N.,	Long. 125° 29′ 50″ E.
Anchorage No. 2:	Lat. 9° 01′ 00″ N.,	Long. 125° 29′ 40″ E.
Anchorage No. 3:	Lat. 9° 00′ 55″ N.,	Long. 125° 29′ 30″ E.
Anchorage No. 4:	Lat. 9° 00′ 45″ N.,	Long. 125° 29′ 20″ E.
Anchorage No. 5:	Lat. 9° 00′ 35″ N.,	Long. 125° 29′ 00″ E.
Anchorage No. 6:	Lat. 9° 01′ 15″ N.,	Long. 125° 29′ 45″ E.
Anchorage No. 7:	Lat. 9° 01′ 10″ N.,	Long. 125° 29′ 35″ E.
Anchorage No. 8:	Lat. 9° 01′ 04″ N.,	Long. 125° 29′ 25″ E.
Anchorage No. 9:	Lat. 9° 00′ 55″ N.,	Long. 125° 29′ 05″ E.
Anchorage No. 10:	Lat. 9° 00′ 50″ N.,	Long. 125° 28′ 55″ E.

RESTRICTIONS: Port of Butuan: Entrance and exit of vessels are controlled by the tide, particularly at the mouth of the Agusan River.

MAX. SIZE: Masao: No limit.

Nasipit: Maximum possible length of vessel is 550 ft., breadth 65 ft., maximum mean draft is 25 ft.

Butuan: Max. size of vessel 2,000 d.w.t.

HEALTH: For all 3 ports: Cable Quarantine Officer with name and nationality of ship, ports of call during voyage, number of crew and passengers, condition of health of all on board and, if any, type of sickness.

RADIO: (DWP 934 NAGOV) 8,776.4 kHz.

VHF: 140.88 MHz.

TUGS: Ports of Butuan, Masao and Nasipit: Tug assistance available from private companies upon request, on a rental basis.

BERTHING:

Port of Butuan:

Butuan Government Wharf.

Area:	12,000 sq.m.
Berth length:	138.0 m.
Cargo Shed (semi-concrete):	540 sq.m.
Passenger Terminal:	75 sq.m.
Administration Building:	1 unit.
Amenity Building:	1 unit.
Load Capacity:	500 lbs./sq.ft.
Present draft alongside berth at MLLW:	5.0 m.
Distance from mouth of the Agusan River:	7 nautical miles.
Depth at the mouth of Agusan River at low tide:	8 ft.
1989 Cargo Throughput:	206,845 tonnes.

Port of Masao:

Government Wharf at Lumbocan, Butuan City.

Causeway:	280 m. (paved).
Berth Length:	32 m.
Depth alongside:	7 m.
Distance by road from Butuan:	14 km.
Load Capacity:	100 lbs./sq.ft.
1989 Cargo Throughput:	170,000 tonnes.

Port of Nasipit:

Berth Length:	299.35 m.
Length of Navigable Water:	800 m.
Width of Navigable Water:	200 m.
Width of the Entrance to the Nasipit port:	150 m.
Load Capacity – Container Berths:	830 lbs./sq.ft. (40 KPa).
Load Capacity – Ro-Ro Berth:	625 lbs./sq.ft. (30 KPa).
Open Storage Areas (paved):	9,600 sq.m.
Cargo Shed (paved):	1 unit.
Passenger Terminal Building:	1 unit.
No. of vessel to be accommodated at a given time:	4 domestic vessels. 2 foreign vessels.
Present draft alongside berth:	6.0 m.
Expected draft alongside berth upon completion:	7.0 m.

1989 Cargo Throughput:	453,737 tonnes.
Distance by road to Butuan City (paved roads network):	27 km.
Cargo expected by 1990:	Approximately 600,000 tonnes.

CRANES: None owned by the Authority nor by any cargo handling operators, but can be hired from the Ministry of Public Works and Highway or from private contractors companies.

BULK CARGO FACILITIES: Nasipit Port: Bulk oil / fuel pipeline owned by the Philippine National Oil Company (PNOC).

Nasipit Depot: Oil / fuel pipeline at Cabinet, Cabadbaran, Agusan del Norte owned by Pilipinas Shell Corporation.

SPECIALISED CARGO HANDLING FACILITIES: Ro-Ro ramp will be available after completion of Nasipit Port Development Project in 1990. A berth is allocated to handle oil products.

BRIDGES: None.

STEVEDORES: Masao and Butuan: Concord Arrastre and Stevedoring Services Corporation (CASCOR).

Nasipit: Nasipit Integrated Arrastre & Stevedoring Services, Inc. (NIASSI).

MEDICAL: No advance notice needed except in case of serious illness or injury. Hospital facilities available:

1. Government hospitals:
   a. Butuan General Hospital
   b. Butuan Maternity and Children's Hospital
   c. City General Hospital and Medical Centre.
2. Private hospitals:
   a. Butuan Doctors Hospital
   b. M.J.Santos Hospital.

TANKERS: See "Bulk Cargo Facilities".

DENSITY: Average density of water in the port and surrounding anchorage area is 1010 – 1012.

FRESH WATER: Masao: The supply of fresh water can only be made possible through the use of barges.

Butuan: Licensed water supply operators.

Nasipit: Nasipit Water District.

FUEL: Oil delivered by tank trucks at all berths or supplied by barge.

REPAIRS: Only minor repairs can be undertaken whilst in port.

GANGWAY/DECK WATCHMEN: Service of watchmen is optional.

HATCHES: Opening or closing of hatches is normally carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco: Each man 1 pack per day. Wine and Spirit: Each man 1 bottle per week.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: Bancasi Airport, approximately 7 km. from Butuan City, caters for domestic daily flights to and from Cebu and Manila.

CARGO GEAR: Gear provided by shipping, arrastre and stevedore operators.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday, Good Friday and Easter Sunday; Labour Day (May 1st); Independence Day (June 12th); EDSA Day (February 28th); National Heroes Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th).

Cargo-handling operations, however, can still be arranged on these days.

BANKS: Philippine National Bank, Montilla Blvd., Butuan City. Tel: 23-12; 23-11.

Bank of the Philippine Islands, Montilla Blvd., Butuan City. Tel: 31-12; 31-13.

Family Bank, Juan Luna Street, Butuan City. Tel: 33-97; 33-98.

Rural Bank of Butuan City, Juan Luna Street, Butuan City. Tel: 30-42.

PCI Bank, Corner of Juan Luna and Zamora Streets, Butuan City. Tel: 20-13; 21-42.

Development Bank of the Philippines, Zamora Street, Butuan City. Tel: 35-21; 35-20; 35-22; 39-22.

Metro Bank, Corner of Conception and Lopez Jaena Streets, Butuan City. Tel: 33-44.

City Trust, Zamora Street, Butuan City. Tel: 33-82.

Allied Bank, Corner of T. Burgos and Montilla Blvd., Butuan City. Tel: 31-95.

STORING: 1. Trucks can proceed alongside the berth.
2. Forklifts can be used on the jetty to handle stores.
3. Local riggers can be employed to assist storing.

POLICE/AMBULANCE/FIRE: Police: 115; Fire: 114; Ambulance: 24-14.

TELEPHONES: Not possible to place telephones on board.

SERVICES: Shipchandling Services, Mooring/Unmooring Services, Laundry, Water-Taxi, Cargo-Checking, Cargo Surveying, Carpentery, Forwarding, Bunkering. All ancillary services operators are duly licensed by PPA.

SHIP SUPPLY SERVICE: None.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REGULATIONS: General Port Regulations promulgated and implemented by PPA.

DELAYS: Berth not available; Weather constraints, Tidal constraints, Lack of Equipment, Breakdown of Equipment, Pilot not available, Tug not available, cargoes for loading not ready.

DEVELOPMENTS: Butuan: Concrete paving of the back-up area at the Southern end portion of the wharf; construction of the second phase of the shore protection works and landing at the South end portion of wharf.

Masao: Extension of wharf to 205.30 m.; Reclamation (3 ha.) for back-up area; Office Building.

Nasipit: Completion of the International Port at Nasipit by end of 1990.

AUTHORITY: The Philippine Ports Authority; Port Management Unit of Nasipit, Butuan City, Agusan del Norte. *Tel:* 31-98, 34-29. *Contact:* Ferdinand C.Piencenaves, Port Manager. Oscar M.Beluan, Manager, Port Services Division.

POLLOC, Mindanao: 07.21 N. 124.13 E. (See Plan)

LOCATION: The Port of Polloc lies on the Southern coast of Polloc Harbour which, itself, is located N.E. of Illana Bay at about 14 km. in straight line North of Cotabato City. It is situated at Lat. 07° 21′ 12″ N., Long. 124° 13′ 27″ E.

PILOTAGE: Pilotage available 24 hours.

ANCHORAGE: Polloc Anchorage is contained between Lalayang Point and Polloc Island and provides a clear manoeuvring area some 3 km. in diameter with deep water along the marginal shallows which front the low cliffs of its Southern shore.

The anchorage along the Southern margin of Polloc Harbour also provides the port shelter and water depth as well as the best land and water frontage for the development of port facilities and of port-orientated industries.

Bongo Island, 6 miles long, is situated in the North Eastern part of the bay and affords some protection from the Westward to the Mindanao River Delta Area and Polloc Harbour.

RESTRICTIONS: None.

HEALTH: Quarantine anchorage is set at Lat. 7° 22′ N., Long. 124° 14′ E.

BERTHING: Main marginal wharf – 400 m. long.
Depth alongside – 10.5 m.
Lighter dock – 67 m. long on both sides.
2 government transit sheds – 11,960 sq.m.
Total port area – 102,350 sq.m.
Total area for open storage – 42,940 sq.m.
Total area reserved for private warehouses – 75,645 sq.m.

CRANES: 1×54 ton, 1×36 ton and 1×60 ton.

FRESH WATER: Available by road tanker.

FUEL: Diesel oil available by road tanker.

GENERAL:

Terminal Ports: Cotabato City and Kalamansig City. The latter is situated at Sultan Kudarat with coordinates of Lat. 06° 33′ N., Long. 124° 03′E., N.E. of Moro Gulf, South Coast of Mindanao Island which also caters to large ships loading logs at anchorage.

Tides: The tidal cycle is semi-diurnal and synodic form. The characteristics are as follows:

Highest Astronomical Tide = EL +2.3 m.
Mean High Water Springs = EL +1.9 m.
Mean High Water Neaps = EL +1.5 m.
Mean Low Water Neaps = EL +0.6 m.
Mean Low Water Springs = EL +0.2 m.
Lowest Astronomical Tide = EL −0.3 m.

Storm Occurrences: Mindanao is below the main typhoon belt and only minimal effects have ever been observed at Cotabato as a result of occasional typhoons over the island. This is thought to be due to the consistent nature of typhoons in this region which travel S.E. to N.W.

In the sheltered area of Polloc Harbour at the Easterly side of the Port of Polloc, the max. fetch of 8 km. is to the N.W. and only with winds of 40 knot during a storm will waves of 1.2 m. (4 ft.) be experienced. With an "onshore" typical wind of 15 knots from N.W., wave heights will be about 0.3 m. (1 ft.).

Port Site Description: West of the Haines Point which marks the Western Sarmiento boundary is the site of the port. A frontage of some 2 km. can ultimately be reclaimed from the shallows along this shoreline to provide land backing to the wharves of the port.

The Eastern half of the Southern shoreline is occupied by the extensive plywood factory of Sarmiento Industries (leased to Eversun Development Ltd., part of Vicwood Group of Companies) which has developed its industrial complex on land reclaimed over the sand foreshore with filling from the high land behind.

Main Sub-ports: The Philippine Ports Authority took over in October, 1977, the Cotabato City Wharf and Parang Pier. The former is a port with a depth restriction on the bar resulting in ships anchoring in the open sea of the North Mindanao River mouth and there being served by lighters, ferry boats and barges; while the latter caters to large ships which load logs and plywoods at anchor. It contains a deep water pier at the East shore of the bay and also a submerged marine pipe-line for pumping ashore petroleum products into a Tank Farm at Parang.

The Cotabato City Wharf also services inter-island watercraft such as passenger/cargo motor launches and other small sea transports.

Access Roads: The Port of Polloc is accessible by land to Cotabato City through a 13 km. modern concrete pavement which winds up at Simuay Junction at the Cotabato-Davao National Highway extending some 9 km. more to reach the commercial centre. From this point, the port is accessible by all forms of land transport facilities to any place in the Cotabato area.

The port is also expected to serve the Southern-most principalities of the Province of Lanao Sur with the improvement of the Ganassi Road connecting the province with main artery of the Cotabato area.

SHIPMASTER'S REPORT: July 1984 (Updated 1990).

Port Limits: Entrance to bay.

Documents: Usual for Philippine Ports.

Pilotage: Pilot available. Port used by coastal cargo and passenger vessels, and foreign vessels.

Anchorage: 5 cables off the berth.

Health: Pratique granted on completion of formalities, normal inspection.

Radio: Manila.

VHF: Not available.

Radar: None.

Tugs: None. One man with small private tug produced certificate that he had piloted vessel alongside even though he had only guided through bay in front of vessel and neither towed vessel or handled lines. He did not speak English.

Berthing: 400 m. of well fendered wharf. No shore cranes, ship's gear only – plywood in crates, sawn lumber and bulk copra are the main export cargoes.

Cranes: None.
Bulk Cargo Facilities: None.
Specialised Cargo Handling Facilities: Copra buckets.
Bridges: None.
Stevedores: Good – but have a bad habit of smoking down holds, which is prohibited. Used small forklift trucks down hold to stack cargo pallets of plywood – very competently handled.
Medical: Doctor and dentist available at Cotabato City.
Tankers: No facilities.
Density: 1025.
Consuls: None.
Repairs: No facilities available.
Dry Docks: None.
Surveyors: None.
Gangway/Deck Watchmen: Customs and Immigration officials on board throughout vessel's stay.
Hatches: Opening and closing by crew.
Customs Allowances: Normal allowance. Bond sealed.
Cargo Gear: Ship's gear only.
Repatriation: Possible – but not advisable.
Airport: South of Cotabato City (Awang, Dinaig, Maguindanao) with daily connections to Manila, Cebu, Iligan and Davao.
Time: GMT plus 8 hours.
Holidays: Usual Philippine holidays.
Police/Ambulance/Fire: No telephones.
Telephones: None.
Services: None.
Shore Leave: Allowed. Shore passes arranged with Immigration Authorities. Going ashore advisable in daylight only – at night it is dangerous.
Identification Cards: Shore passes issued but identity card advisable.
Delays: Subject to berth availability.

AUTHORITY: Philippine Ports Authority, Port Management Unit of Polloc, P.O.Box 163, Cotabato City, Parang, Maguindanao, Philippines. *Cables:* PPA-PMO, Polloc. *Contact:* Ali L. Arumpac, Port Manager.

PUERTO PRINCESA, Palawan: 09.44 N. 118.43 E. (See Plan)

See "General" before first port.

Puerto Princesa, a large irregular inlet between Bancaobancaon Point and Panagtaran Point, is 2 miles wide at the entrance, extending about 6 miles in a N.W. direction. Coral reefs about 0.5 miles wide making out on the entrance points narrow down the navigable width of the channel to about 1 mile, depths of 34 fathoms (62.2 m.), shoaling to 9 fathoms (16.5 m.) in the vicinity of the pier. The major portion of the Northwestern and Western part of the bay is mostly shoal. The shoreline is generally fringed with mangroves and fronted by mud flats. The surrounding land consists of extensive wooded plain, backed by a high mountain chain. Several small rivers navigable by launches and small boats empty into the bay. The inner part of the harbour is a good typhoon anchorage.

PORT LIMITS: About 1 mile South of the pier. This is the entrance to the inner harbour of Puerto Princesa.

PILOTAGE: Pilots can be contacted by radio message through the shipping Agent not less than 24 hours before ETA indicating among others the following information:

1. Name of vessel.
2. Name of shipping lines.
3. Country vessel is registered.
4. Type of vessel.
5. Overall length.
6. Draft.
7. G.r.t.
8. Volume of cargo to be discharged and storage required.
9. Nature of cargo.
10. Passengers disembarking, transit and embarking if any.

When Pilot is aboard the pilot boat, an international flag "P" will be seen flying at her foremast.

ANCHORAGE: Vessels not going alongside the T-shaped pier may anchor Southwestward of Princesa Point in 12 fathoms to 16 fathoms (21.9 to 29.2 m.), mud bottom. A better protected anchorage may be had in 9 fathoms to 10 fathoms (16.5 to 18.3 m.) about 400 yards Northward of the end of the pier.

RESTRICTIONS: At night, in approaching Puerto Princesa from offshore, the lights in the vicinity of Canigaran, Northward of the entrance, may cause some confusion to strangers as they are visible long before the Puerto Princesa Light can be seen. The port light which is fixed red, visible 7 miles over an area of 041°, only becomes visible close in and just off the mouth of the harbour. At daytime a course Southward of the range Thumb Peak-Tidepole Point clears the reef on the North side of the entrance. Mount Beaufort on range with Tidepole Point clears the reef on the South side.

MAX. SIZE: Vessels not going to dock alongside the pier may anchor in 9 fathoms to 10 fathoms or 12 fathoms to 16 fathoms. For vessels going to dock alongside the T-shaped pier, permissible draft is 27 ft. (8.2 m.)

HEALTH: Quarantine doctors are assigned in the Port to board the vessel and check any suspected disease or fever.

RADIO: Vessels at sea usually send their radio messages through the Association of International Shipping Lines in Manila to their Agents.

VHF: Not available.

RADAR: No radar station in the port.

TUGS: Tug service can be availed of by communicating with the local shipping Agent.

BERTHING: The City has a T-shaped concrete pier with a berthing fac of 192.43 m. Depths 27 ft. (8.2 m.) alongside and 31 ft. (9.4 m.) abo 6 yards off the face. The Northern and Southern ends of the "T" hav depths of 11 ft. (3.3 m.) and 15 ft. (4.5 m.) respectively. The inshor arms of the "T" have depths of 11 ft. (3.3 m.) at each berth. Sailboa and other shallow vessels berth on each side of the concrete approac Typhoon signals are exhibited from a pole at the foot of the pier.

Open storage and 2 warehouses (12 m. × 56 m. each) available.

CRANES: 30 ton crane available.

STEVEDORES: Advise Agent on volume of cargo to be discharge storage required and nature of cargo.

TANKERS: May drop anchor at anchorage area.

FRESH WATER: Available, rate 10 t.p.h. – 15 t.p.h.

FUEL: Diesel oil, gasoline and kerosene may be purchased.

FIRE PRECAUTIONS: No smoking is allowed when vessels a refuelling within a radius of 100 m.

An improvised 3 in. hydrant is installed at the pier. The lines used supply fresh water could be used in case of a fire.

CONSULS: Consuls from foreign countries in Manila.

REPAIRS: No repair facilities.

DRY DOCKS: For small boats only.

SURVEYORS: Lloyd's and other classification societies in Manila, non locally.

GANGWAY/DECK WATCHMAN: Watchman can be hired from loc Security Agencies of the Port.

HATCHES: Opening/closing of hatches is usually done by stevedore

CUSTOMS ALLOWANCES: Quantity permitted for each crew membe to be held out of bond are the following: Cigarettes – 5 packs. Liquor 1 bottle.

CARGO GEAR: Loading/unloading is effected by ship's gear.

REPATRIATION: No facilities.

AIRPORT: The airport is about 2 miles from the pier with a schedule 2 flights from Manila and back daily.

HOLIDAYS: The following are the Philippine National Holidays: Januar 1st – (New Year's day), Maundy Thursday, Good Friday, April 9th (Bataan Day), May 1st – (Labour Day), June 12th – (Independence Day July 4th – (Fil-Am Friendship Day), November 30th – (National Heroe Day), December 25th – (Christmas Day). Cargo handling operation may be arranged on these days at overtime rates.

POLICE/AMBULANCE/FIRE: Puerto Princesa City has all thes facilities. There is a provincial hospital in Puerto Princesa. Privat practising physicians and drugstores are available.

TELEPHONES: Pilipino Telephone (Piltel) services the City throughou 24 hours with a long distance call between the Port and Manila anytim of the day. Telephone connections for vessels alongside the quay ca be arranged with the Telephone Company.

SERVICES: No special services available.

STORING: See "Prelims".

(1) Truck Only.
(2) N.A.
(3) Trucks may proceed alongside.
(4) Yes.
(5) Regulations not applicable.
(6) Riggers available.

SHORE LEAVE: Crew members are allowed ashore provided the always carry with them their Seaman's Book or Passport.

IDENTIFICATION CARDS: Seaman's Book is sufficient for crews identify them when ashore.

DELAYS: Due to lack of some Port facilities, delay in berthing, loadin discharging and bunkering is sometimes experienced.

DEVELOPMENTS: A proposed 150 m. R.C. wharf extension on th Northern end and reclamation at the Northern foot of the approac construction of transit sheds, fence, office, road networks, etc.

AUTHORITY: Philippine Ports Authority, Port Area, Puerto Princesa Cit 2901, Philippines. *Tel:* 2351. *Contact:* Samson A. Negosa, Po Manager.

PULUPANDAN, Negros: 10.30 N. 122.46 E. (See Plan

See "General" before first port.

PORT LIMITS: The Pulupandan Pilotage District embraces the wate from the approach of the North and South Channel to Pulupanda Government Wharf including Philippine Bulk Corporation Wharf and als Banago Wharf and approaches. (Please take note that this definition port limits is for the coverage of Pulupandan Pilotage District).

The seaward boundaries of the port within which a vessel considered to be an *arrived ship* is bounded from the South Buoy Lat. 10° 27′ N., Long. 122° 46′ E. and the North Buoy Lat. 10° 33′ N Long. 122° 46′ E.

The "Notice of Readiness" is presented after quarantine and po formalities are completed after which acceptance laytime commence Any deviation from this is subject to charter-party terms.

DOCUMENTS: The Master of the vessel should prepare the followin documents in order to ensure a speedy clearance:

Clearance of a Vessel to a Foreign Port.
Oath on Entering Vessel to a Foreign Port.
Master's Oath.
Crew Lists.
Passengers Manifests (Disembarking and Embarking).
Cargo Manifests (Inward and Outward).
Advance Notice for ETA (Telegram).
Application for Berth.
Vessel's Information Sheet.
Identification Permit to PHILSUCOM (in case of exporting molass and sugar).
Authority to Load (Telegram).
Guarantee Payment for Wharfage.
Charter Contract (Agreement of shipper and shipping company as the activity of operations).

PILOTAGE: With the vessel's ETA, the Pilot can only presume that the incoming vessel is entering the port because most vessels usually wait beyond the harbour limits approximately 7 miles to 11 miles from the port. This is due to the restriction in the P.C. & G.S. Chart 4416 which is marked by red lines indicating "Anchorage Prohibited".

The area of "Anchorage Prohibited" is enclosed by the square red line bounded by Lat. 10° 30′ N. to the North side and Lat. 10° 23′ N. on the South side and Long. 122° 40′ E. to the West side and Long. 122° 50′ E. to the East side.

If a vessel anchors 10 miles from the pilot boat station, only the silhouette of the vessel can be seen so there is no guarantee that it is really the expected vessel. In this connection, the Agent makes assurances to the Pilot that it is the vessel expected in order for the Pilot to meet the vessel.

The telegraphic address is "Pulupandan Pilots", Pulupandan, Negros Occidental, Philippines. The required advance notice of ETA must be 48 hours before arrival. A follow-up notice of ETA must be sent 24 hours before arrival and if necessary an amendment of ETA if the vessel is further delayed. VHF is not available in the port of Pulupandan.

The pilot boat is 45 ft. in length with a wooden hull and superstructure painted white. The name "Pilot No. 3" painted in black on a white background is located at the upper portion port and starboard side.

At night time, a white light over the red light can be seen aside from the regular side lights. Sound signals requiring a Pilot are 2 long and 1 short blast on whistle and/or a display of pilot flag "H" during daytime.

ANCHORAGES: Though the Pilot boarding point is within the enclosed area of "Prohibited Anchorage", the vessel can drop anchor at this point and wait for the Pilot, depth 9 fathoms. Another anchorage area recommended for awaiting a Pilot is at Lat. 10° 33′ N., Long. 122° 46′ E. This point has a depth of 39 ft. Two miles North or West of this point is a good anchorage area, the depth ranging from 6 to 7 fathoms with a good holding ground.

The pilot boat is always stationed at the South end of the government pier South of Pandan Pt., for the look-out of incoming vessels. As soon as the expected vessel is sighted, the Pilot proceeds to the pilot boarding point Lat. 10° 27′ N., Long. 122° 46′ E. about 5 miles from the station. If the vessel cannot proceed to the boarding point, the Pilot will meet her beyond this point.

The specific requirement in boarding is a strong and well balanced Jacob's ladder to be placed on the leeward side of the vessel. A manrope is a necessity.

RESTRICTIONS: Entry to this port has no restrictions except in the case of bad weather when the pilot boat cannot proceed to meet the vessel. Since the loading point of a foreign vessel is mostly at Philippine Bulk Corporation Wharf, the docking and/or undocking is scheduled according to tide and current.

MAX. SIZE: The max. permissible length of a vessel handled at this port area particularly docking at PBC Wharf is 186 m. to 200 m. The controlling draft forward is 26 ft. and 30 ft. aft and after dredging a controlling draft of probably 30 ft. Vessels of this length are usually docked from slack to flooding and undocked from slack to ebbing.

HEALTH: Pratique procedure is a requirement for vessels calling at the port. The shipping Agent arranges Pratique procedure with the Department of Health, Department of Animal Industry and Department of Plant Industry. If there is a disease on board, the doctor of the Department of Health and the Plant and Animal Quarantine Officers will take the necessary action in curing the disease and preventing the spread of an epidemic.

RADIO: There is no radio facility available in this port.

VHF: VHF radio facility is not available at this port, hence, there is no communication with vessels approaching the port and also when manoeuvring within the port area.

RADAR: Radar facility is not available.

TUGS: There is no tugboat available at this port that can be readily used in case necessity demands. The Pilot usually requests the Agent and/or Master to hire a tugboat for docking and/or undocking. In most cases, tugs cannot be taken from Iloilo or Cebu. If ever, tugs can be hired from Cebu, the vessel having to wait for 3 days to 5 days.

In this regard, the Pilot will dock the vessel without tug assistance as requested by the Agent and/or Master in order not to delay the vessel. The Pilot encounters difficulties and risks in this situation but the Agent gives to the Pilot an additional bonus for his efforts.

BERTHING: The berth length of the Government Pier is 424 m., providing 241 m. as berthing space for secondary vessels and 183 m. for primary vessels. Secondary vessels usually handle molasses, sugar, lumber and fertilisers. Primary vessels handle as much as twenty-five commodities. Of these commodities, consumer goods, general cargo, metal and metal products, chemicals, live animals and empty bottles are the most common cargo handled.

CRANES: Cranes for cargo handling are not available.

BULK CARGO FACILITIES: The port area of Pulupandan includes the facilities and equipments of private piers of Philippine Bulk Corporation and Total Bulk Corporation.

The berth at PBC Wharf measures 189 ft. and the quay measures 442.09 ft. Conveyor gantry is the berth equipment used in handling molasses and sugar in bulk for exports. The max. height of the discharging-gear above HW level is 128.4 ft. at the discharging rate of 600 t.p.h. Max. loading depends on the draft of the vessel and max. draft is 22 ft. (salt water).

The quay of TBC measures 19.201 m. It has 1 tanker berth 40 ft. depth at MLLW. It has 5 mooring fender piles spaced at 13 m. with 2 mooring bollards 58 m. from both ends of fender piles. 25 ft. is the max. permitted draft.

Cargoes handled for exports through pipe-lines are molasses and alcohol. Load/discharge lines for molasses are 10 in. diameter, 8 in. diameter and 6 in. diameter while that of alcohol is 4 in. diameter. Max. loading/discharging rate for molasses is 350 m.t./h. and for alcohol is 70 m.t./h.

SPECIALISED CARGO FACILITIES: LPG and containerised cargo are also handled at the Government Pier but the port does not have facilities specially equipped for handling containers or liquid chemicals.

BRIDGES: There are no bridges in the harbour passage of Pulupandan port.

STEVEDORES: The shipping Agent should arrange with the arrastre/stevedoring office regarding the arrastre/stevedoring service to be rendered to the vessel. This can be facilitated by giving to the arrastre/stevedoring operator the schedule of the vessel's ETA. After the Customs Formalities which vary from 3 hours to 2 days are completed, the Agent should give to the arrastre/stevedoring office Notice of Readiness to discharge/load. When the Notice of Readiness is accepted, the arrastre/stevedoring workers can discharge/load cargoes from/to the vessel. The monthly average cargo tonnage discharged per vessel is 300 tonnes and 95 tonnes for loaded cargo. Cargo loaded and discharged at the government pier is mostly cargo from domestic vessels.

MEDICAL: Hospitals are not available in the port area but government and private hospitals can be easily reached by public vehicle as they are located in Bacolod City, 30 km. from Pulupandan.

A vessel is not allowed to berth and its crew and passengers not allowed to go ashore should there be fever, epidemic or any suspected disease on board. Inspection undertaken by the doctor of the Department of Health and the quarantine officers of the Department of Animal Industry and the Department of Plant Industry, by whom medical attention is given when needed.

TANKERS: See "Bulk Facilities".

DENSITY: Average salinity of water in the port is 1022 – 1023.

FRESH WATER: Water can be supplied by Nepoteco. Water from deep wells is delivered through a trucking service. The rate of delivery is 1 truckload per hour which costs P15.00 per ton.

FUEL: Fuel can be made available to the Master of a foreign vessel by notifying the shipping Agent of its need for fuel. The shipping Agent applies to the Department of Energy in Manila for the supply of fuel to a foreign vessel. If the application is approved, arrangement is made by the shipping Agent with the supplier.

FIRE PRECAUTIONS: Fire extinguishers are required for every office and establishment in the vicinity of the port.

CONSULS: Consuls are not available in the port of Pulupandan.

REPAIRS: There is no dry dock facility in the port.

SURVEYORS: The nearest surveyor is the Del Pan Sugar Surveyors in Bacolod City.

GANGWAY/DECK WATCHMEN: The need for the service of watchmen depends upon the discretion of the Master of the vessel. The cost of their service is P4.50 per hour for the Port District of Iloilo of which the Sub-port of Pulupandan is included.

HATCHES: Opening and closing of hatches carried out by both the crew and the stevedores.

CUSTOMS ALLOWANCES: The quantity of tobacco, wine and spirits allowed for each crew member to be held out of Bond must not be more than for personal consumption.

CARGO GEAR: The loading/discharge of cargo to/from the vessel is effected by the ship's gear.

REPATRIATION: There is no repatriation office in the port.

AIRPORT: The Airport is located in Bacolod City which is 30 km. from Pulupandan. Average number of flights is from 6 to 7 per day to different cities in the Philippines (Manila, Cebu, Iloilo and Davao).

All international flights commence at Manila International Airport.

HOLIDAYS: The following are National Holidays which are also observed in Pulupandan.

January 1st (New Year's Day), Holy Thursday and Good Friday (these religious holidays have no specific dates but often fall in March or April), May 1st (Labour Day), June 12th (Independence Day), July 4th (Fil-American Friendship Day), September 21st (Declaration of Martial Law), November 30th (Bonifacio Day), December 25th (Christmas Day, religious holiday), December 30th (Risal Day).

Official holidays of legal nature are usually working days for the port users due to the nature of work, while holidays of religious nature are often non-working days even for the port users.

POLICE/AMBULANCE/FIRE: The following are the telephone numbers of fire and police departments and government hospital where an ambulance can be made available.

Fire Department: San Juan 066, 2-31-91; Rodriquez Ave. 065; Lopez Jaena 064.

Police Department: 067; 062; 069.

Ambulance: 068; 2-30-96.

These departments are located in Bacolod City. There is a police department in this town but it does not have telephone facilities.

TELEPHONES: There is no telephone facility at this port.

SERVICES: Special services for tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, etc., are not available in this port.

SHORE LEAVE: Crew members are allowed to go ashore.

IDENTIFICATION CARDS: Identification cards are not required as shore passes.

REGULATIONS: Refer to PPA Port Rules and Regulations.

DELAYS: Delay in berthing is due to the draft limitation of the port and the position of the port in case of bad weather.

DEVELOPMENTS: Extensive repair, complete rehabilitation of Northern portion of the pier and demolition of rock filled jetty.

AUTHORITY: Philippine Ports Authority, Sub-port of Pulupandan, Port District of Iloilo. *Tel:* 7-69-45.

RIO TUBA, Palawan: 08.30 N. 117.26 E.

SHIPMASTER'S REPORT: February 1989.

VESSEL:

D.W.T.	23,800 tons
G.R.T.	13,250 tons
Duration of Stay	26 days.

DOCUMENTS: See "General" before first port.
Officials come from Puerto Princesa.
Immigration require a visaed Crew List.

PILOTAGE: Compulsory. Pilot comes from Puerto Princesa. It takes about 10 hours by public bus, 6 hours by taxi and 1 hour by private airplane. For this reason, the Master should send ETA at least 24 hours before arrival and much better to adjust speed to time according to ETA cabled.

Pilot Boat: Pilot comes by canoe. Pilot uses ship's accommodation ladder to come on board, not pilot ladder.

VHF: Not available.

Pilot Station: Approximately 0.5 miles off from Sea Buoy.

APPROACHES: There are 2 leading lights (Red) on approximate bearing of 301° from Sea Buoy in approximate position, Lat. 08° 25.2′ N., Long. 117° 31.5′ E.

ANCHORAGES: Vessels always anchor in approximate position, Lat. 08° 28′ N., Long. 117° 26′ E. (1.1 miles off from the first leading light). Depth is approximately 18 m.

HEALTH: Free Pratique is granted after inspection of Vaccination Cards.

VHF: No facilities.

BERTHING: No facilities.

LOADING: By ship's cranes and grab buckets from barges.

Loading Rate: Depends on condition of ship's gears. If equipped with 3 cranes/grab buckets (6.5 cu.m.), it is possible to load approximately 5,300 tonnes per day.

Cargo: Beneficiated Nickel Silicate Ore in bulk.

Shipper: Rio Tuba Nickel Mining Corporation.

STEVEDORES: 24 hours per day. No holidays.

MEDICAL: Mining company hospital nearby.

FRESH WATER: Not available.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Not required as loading carried out at anchorage and stevedores are Mining Company Personnel. It is necessary to lock all cabins and stores for safety.

REPAIRS: No facilities available.

TIME: GMT plus 8 hours.

TELEPHONE: No international facilities on shore.

GENERAL: *Chart:* Not available.

Notary Public: Not available.

AGENT: No Agents in Rio Tuba. The Agent comes from Manila. Agent and other officials always stay on board until loading completed.

SAN FERNANDO, Luzon: 16.37 N. 120.18 E.

(See Plan)

See "General" before first port.

DOCUMENTS:
Vessel's Particulars.
Inward/Outward Foreign Manifest, 3 copies each for P.P.A.
Bill of lading (1 copy).
Crew List.
Passenger List.
Customs Documents.
Health Documents
Ship's Repairs List.
Ship's Certificates.

PILOTAGE: Pilotage is compulsory. Vessel is met at mouth of harbour by pilot boat that flies a red flag with letter "P" in white. Pilot then brings the vessel to Quarantine Anchorage. Conventional signals are used to call Pilots.

APPROACHES: Vessels enter the harbour through a channel marked by 2 buoys and 2 range lights 144.5° (fixed green and red light flashing every 3 seconds.).

ANCHORAGE: Located at centre of the bay with 8 fathoms to 9 fathoms and good holding ground. In the event of rough weather or strong monsoon wind, vessels in the harbour are brought here for safety.

MAX. SIZE: Size of vessels that could be serviced is controlled by depth along quay:

Pier	*Depth Pier Head*	*Depth Shore End*	*Length*	*Width*
Pier 1	54 ft.	12 ft.	600 ft.	60 ft.
Pier 2 Timber	60 ft.	30 ft.	177 ft.	80 ft.
Philex Conveyor	32 ft.			
Coal Conveyor	49 ft.	13 ft.	460 ft.	19 ft.

HEALTH: Immediately after vessel anchors at Quarantine Anchorage, Quarantine Officers board and clear vessel. Imported grain will be fumigated on board vessel at anchorage.

Boarding Formalities: Members of party are Bureau of Customs Inspector and guards, Immigration and Philippine Coast Guards. Pratique is then issued to indicate vessel as "arrived" and subject to Charter Party terms, laytime will commence.

RADIO: No direct radio communication system with vessels at sea is available in the locality. Ship Masters report ETA to Agent in Manila who relay message to San Fernando by telex or commercial radiogram. The PMU – San Fernando may be reached by Long Distance telephone 41-25-57 or SSB radio transceiver 8776.5 kHz.

Arrival Advice: 48 hours before ETA, ship Agent files request for berth at PMO office indicating: ETA, draft, LOA and breadth, consignee or shipper, type of cargo and stowage, dangerous cargo (if any). Heavy lifts (if any), number of hatches to be worked, vessel is self sustaining or not.

24 hours before arrival or earlier, upon receipt of Master's advice by telegram, a berthing schedule is issued by the PMO. Copies are furnished to: Pilot, Consignee/Shippers, Arrastre/Stevedoring Contractor and Ship's Agent.

TUGS: 1 tug owned by Philex Mining Corporation, of 1,100 h.p., engine equipped with Kort Nozzle, is available for assisting, docking and undocking and launch service. Tug assistance during docking and undocking at the Government Pier No. 2 is compulsory while its use at the Government Pier No. 1 and Philex Pier are at the option of the Harbour Pilot. A shipping company may bring in tugboat to assist its own vessel.

Tug lines are available at no extra cost. Conventional signals are used by Pilot and Master of tugboat.

Tug assistance rates: 0800 hrs. to 1700 hrs, regular time – others, overtime.

BERTHING: See "Max. Size".

STEVEDORES: Stevedores, longshoremen, checkers and watch-men for Government Piers No. 1 and 2 are provided by Northern Carriers Corporation.

Stevedores, checkers, etc. are non-union members. Any number of gangs can be ordered on 3 hours' notice. Stevedores work on 3 shifts:
1st Shift – 0000 hrs. to 0800 hrs.
2nd Shift – 0800 hrs. to 1600 hrs.
3rd Shift – 1600 hrs. to 2400 hrs.

Sundays, holidays and nights, stevedores are paid overtime rates. Christmas, New Year's Day, Easter Sunday, Good Friday and Maundy Thursday, stevedores will work on double pay.

TANKERS: The 3 oil terminals maintaining tank farms in the port zone are Petrophil, Caltex and Shell. They operate a common set of pipelines for white and black oil product passing under the Government Piers No. and 2. PMO policy is 1 tanker discharging at 1 pier at a time. A "boom" is available at the quay side.

MEDICAL: 3 modern hospitals staffed by trained physicians and specialists and 6 clinics. They are open 24 hours.

FRESH WATER: Fresh water available at both piers alongside the quay via pipe-lines. Pumping rate: 8 t.p.h – Summertime. 12 t.p.h. – Rainy season.

Water samples are tested weekly at the Wallace U.S. Air Force Station at Poro, San Fernando, La Union.

FUEL: Bunker and others, POL product obtainable and supplied by lorries.

FIRE PRECAUTIONS: Water pipe-line alongside the quay can be converted to a fire hydrant by manipulating the valves to suck sea water. The oil terminals in the area maintain chemical fire fighting equipment, a "boom" to contain oil spillage and "light water". Voice of America, Wallace U.S. Air Force Station, and the Airport all within a 3 km. radius to the piers, maintain modern fire trucks.

No naked flames and no hot works on board while motor tankers alongside pier.

REPAIRS: Atlantic, Gulf and Pacific Co. of Manila at Batangas operates ship repair facilities.

SURVEYORS: Mariaser Surveyors of San Fernando are available on request. Surveyors also available from Manilla, 270 km.

GANGWAY/DECK WATCHMEN: Available from Arrastre contractor upon request of Ship's Agent.

OPENING/CLOSING HATCHES: First open and last close normally carried out by crew. Stevedores operate the hatches when it rains.

CARGO GEAR: Arrastre operators maintain complete loading/discharging gear for bulk, general cargo and heavy lifts. Also available are:

11 units	–	Forklifts, 1 to 8 tons capacity.
2 units	–	Mobile cranes, 25 tons capacity.

AIRPORT: San Fernando Airport is 3 km. South of Pier. No regular flights.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday, Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I.-US Friendship Day (July 4th); All Saints Day (November 1st); Bonifacio Day (November 30th); Christmas (December 25th); Rizal Day (December 30th).

POLICE/AMBULANCE/FIRE: Police, Tel: 41-25-77. Hospital, Tel: 41-28-44, 41-23-55, 41-26-16; Fire Department. Tel: 41-24-88; Philippine Constabulary Tel: 41-25-28.

TELEPHONES: Vessels docked at Government Pier No. 1 may request telephone connection from PLDT.

SHIP SUPPLY SERVICE: The following authorised ship supply service operators with addresses in this port are:

1. A. Neral Chandling and Laundry Services, 32 Mabini Street, San Fernando, La Union, c/o Mrs. A. Neral (privately owned).
2. La Union Chandling and Laundry Service, Catbangen, San Fernando, La Union, c/o Mrs. Caridad Tabisola (privately owned).
3. Bureau of Quarantine, PPA Compound, San Fernando, La Union, (launch services – government owned).
4. Philex Mining Corporation, Poro, San Fernando, La Union, (launch services – privately owned).
5. Poro Point Shipping Services, PPA Compound, Poro, San Fernando, La Union (Shipping agency, chandling, cargo checking and other related port services).

SHORE LEAVE: Crew members are allowed to go ashore without special permission.

IDENTIFICATION CARDS: For control of persons inside the port zone and for security, I.D. should be available when requested by guards.
GENERAL: *Discharge of Ballast:* No dirty ballast may be dumped into the territorial waters of the Republic of the Philippines.
Rat Guards: Rat guards shall be placed on all mooring lines to the pier.
Refuse: May be collected by a truck at P25.00 per trip.
Accessibility: Port is accessible by road and air transportation.
Provisions: Fresh vegetables can be supplied directly from the vegetable capital of the Philippines (Baguio City).
Rest, Recreation: Beach resorts with miles of clean beach just minutes away by car. First class hotels with swimming pools, air conditioned rooms. Baguio City, Summer Capital of the Philippines is 70 km. East and 5,500 ft. above sea level. A golf course at Camp John Hay, the R & R centre of U.S. Servicemen, can be used by civilians.
Other Ports: PMO San Fernando has administrative jurisdiction over Currimao Port, Ilocos Norte; Salomague, Cabugao, Ilocos Sur; Sulvec Port, Narvacan, Ilocos Sur; Masinloc Port, Zambales; Acoje Wharf, Sta. Cruz, Zambales, Port of Aparri, Aparri, Cagayan and Port of Irene, Sta. Ana, Cagayan.
AUTHORITY: Philippine Ports Authority, Port Management Office, San Fernando, La Union, Philippines. *Tel:* 41-25-57. *Contact:* Adolfo LL. Amor Jr., Port Manager.

See PLAN!

SANGI, Cebu Island: 10.23 N. 123.39 E.

MAX. SIZE: 50,000 d.w.t.
TUGS: 1 small tug (15.53 g.r.t.) owned and operated by ACMDC.
BERTHING:

Pier No.	*Length* (m.)	*Depth At LW* (m.)	*Remarks*
ACMDC No.1	106.0	5.0	Load/Unload General and Bulk. Max. load on wharf 90 tons.
ACMDC No.2	10.0	7.75	Loading conveyor for concentrates. Max. load on wharf 20 tons.
ACMDC No.3	70.0	16.0	Ship unloader and conveyor system. Max. Load on wharf 250 tons.

CRANES: ACMDC own a truck mounted crane with lifting capacity 20-25 tons. Crane available for renting.
SPECIALISED CARGO HANDLING FACILITIES: Liquid cargoes may be loaded/unloaded by pipe-line at No.1 Pier and unloaded by pipe-line at No. 3 Pier.
STEVEDORES: Advise before 0700 hrs. in order to commence operations at 0800 hrs. or 1500 hrs. same day.
MEDICAL: ACMDC operate a private hospital and priority given to employees. Hospitals and facilities available in Cebu City, distance 60 km.
DENSITY: 1023.
FRESH WATER: Available. Requests should be made to Agent or Supercargo.
FUEL: Available. Delivery by tank truck, which is to be ordered through Agent.
FIRE PRECAUTIONS: No smoking on piers or on vessels.
CONSULS: None.
REPAIRS: Most deck and engine repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: Available from Cebu City.
GANGWAY/DECK WATCHMEN: Usually ship's gangway used. Deck watchmen are available through Agent.
HATCHES: Normally by crew, occasionally stevedores will open and close hatches.
CUSTOMS ALLOWANCES: See "Cebu".
CARGO GEAR: In the case of coal and concentrates discharge is effected by shore gear (ship unloader) and conveyor for loading. General cargo loaded and unloaded by ship's gear.
AIRPORT: No local airport.
HOLIDAYS: New Years Day, Holy Thursday, Good Friday, Labour Day, Valour Day, Independence Day, Fil-American Friendship Day, National Heroes Day, Bonifacio Day, Christmas Day.
POLICE/AMBULANCE/FIRE: Using AFC telephone.

Toledo Fire Department Tel: 70.

Police department do not have a telephone. They are located along the shore.

Government ambulance can be contacted personally as they are located along the shore.
EMERGENCY CO-ORDINATION CENTRE: Coast Guard station along the shore but no telephone.
SERVICES: Available through Agent.
BANKS: Philippine National Bank and Rural Bank in Toledo City.
SHORE LEAVE: No restrictions.
IDENTIFICATION: Required.
DELAYS: None
DEVELOPMENTS: None.
AUTHORITY: Philippine Ports Authority.
Operator: Atlas Consolidated Mining & Development Corporation, Sangi, Toledo City, Cebu, Philippines and A. Soriano Building, 8776 Paseo de Roxas, Corner Ayala Avenue, Makati, Metro Manila (P.O.Box 942), Manila, Philippines. *Tel:* 819-02-61/81. *Telex:* 45642 Copper PM. *Contact:* Mr. Dominador C. Uy, Vice-President.

TABACO, Luzon: 13.41 N. 123.58 E. (See Plan)

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advice should be sent to the Harbour Pilot Association, Legazpi City at least 24 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 km. from the wharf aboard a boat displaying a Pilot's flag.
ANCHORAGE: Within the Tabaco Bay but not less than 500 m. from the existing facility.
RESTRICTIONS: Berthing space is limited due to its physical length and the existence of a shipwreck at the Northern end of the wharf.
MAX. SIZE: LOA 300 m., draft 28 ft.
HEALTH: Vessels clear quarantine on arrival at the Tabaco Harbour. Quarantine Officers will normally board the vessel 2 km. from the existing wharf.
BERTHING: The existing facility can accommodate two foreign-going vessels of regular size at one time. Length of quay 300 m. Width 12 m. Storage area 2 hectares. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging 22 tons per gang hour.
CRANES: 2 shore cranes available with capacities of 20 and 25 tons. For heavy lifts, vessels are required to use their own gear.
STEVEDORES: Provided by Tafworks Arrastre Corporation.
MEDICAL: 1 government hospital and 2 private hospitals.
FRESH WATER: Can be provided by pipe-line or hoses from the port facilities.
FUEL: All grades obtainable from major oil depots at Legazpi City which is approximately 27 km. from the port area and supplied by lorries alongside.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
HATCHES: Opening and closing of hatches is part of the stevedores' work or at the Master's option.
REPATRIATION: All facilities available for crew changes.
AIRPORT: At Legazpi City.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day; (May 1st); Independence Day (June 12th); P.I-U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special Holidays declared by the President of the Republic of the Philippines are also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's Agent.
POLICE/AMBULANCE/FIRE: Police and Fire, Tel. 222; Ambulance, Tel. 215.
TELEPHONES: Placing of telephones on board can be arranged with the branch office of the local telephone company (MATELCO).
SHORE LEAVE: Crew allowed ashore in company of an Immigration Agent.
DEVELOPMENTS: Salvaging of the shipwreck at the Northern end of the wharf, extension of the existing facility by 120 m.
GENERAL: Vessels intending to call at the port of Tabaco shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come first-served basis.
AUTHORITY: The Officer-in-Charge, Philippines Port Authority, Port of Tabaco, Tabaco, Albay. *Tel:* 378.

The Port Manager, Philippine Port Authority, P.O.Box 164, Legazpi City. *Tel:* 2012. *Contact:* C. E. Dinopol, Port Manager.

TACLOBAN, Leyte: 11.15 N. 125.00 E. (See Plan)

See "General" before first port.
DOCUMENTS: *Entrance Formalities:* For submission to PPA Harbour Section:

3 copies Inbound Coasting Manifest with enclosed or attached on each copy the following:

Crew List.
Oath of Master.
Passenger List (passenger vessels only).
Import Declaration (foreign vessels only).
Pratique (foreign vessels only).
Roll Book for presentation and clearance from last port of call also required.

Exit Clearance:

3 copies Outbound Coasting Manifest with attached or enclosed on each copy the following:

Crew List.
Oath of Master.
Passenger List (passenger vessels only).
Export Declaration (foreign cargo vessels).

PILOTAGE: The following signals from vessels requiring a Pilot are:
By day:

(a) The pilot jack hoisted at the fore.
(b) The International code signals or P.T.
(c) 2 long blasts followed by 1 short blast on ship's whistle.

By night:

(a) The pyrotechnic light, commonly known as blue light every 15 minutes.
(b) A bright white light, flashed or shown at short or frequent intervals just above the bulwarks for about a minute at a time.
(c) The International code signals P.T. by flashing lights.

Telegraphic address is Tacloban Harbour Pilot's Association, Tacloban City. 24 hours notice of ETA is required before arrival of vessels. No VHF in pilot boat or pilot station.

All pilot boats in general are painted white above the waterline and black below, with the letter "P" not less that 12.5 cm. in length on both bows above the waterline.

During the day, boat in use shall carry at the mast a red and white flag not less than 6 decimeters wide and 9 decimeters long.

The exact location where the Pilot has to be taken on board when entering Tacloban through San Juanico Strait is at Canauay Island about 2 miles N.W. of said Island. For vessels entering Tacloban Port through San Pedro Bay, the Pilot may be taken on board a mile North of Mariquitdaqut Lighthouse.

In case of bad weather, vessels are advised to drop anchor about 3 miles South of Dio Island when waiting for the Pilot.

With respect to safety measures while Pilot boarding vessels, it is suggested that the Master put his vessel to windward in a postion where the pilot boat is protected from big waves and strong winds. They must lower their accommodation ladder or rope ladder.

The location of anchorage for vessels awaiting a Pilot is either 1 mile North of Mariquitdaqut or 2.5 miles S.E. of Dio Island.

ANCHORAGES:

Dio Island Anchorage:
Position – 2 miles S.E. of Dio Island
Depth – 6 – 7 fathoms
Area – 4 square miles

Basey Anchorage:
Position – 1.6 miles West of Jinamoc Lighthouse
(Lat. 11° 15′ 36″ N., Long. 125° 04′ 32″ E.)
Depth – 4.5 fathoms
Area – 0.8 square miles

Tacloban Quarantine Anchorage:
Position – 0.5 miles South of Binatac Point
0.7 miles North of Panirungan Point
Depth – 4 – 5 fathoms
Area – 1 square mile.

RESTRICTIONS: Controlling draft for vessels entering Port of Tacloban via San Pedro Bay is 19 ft.

Due to numerous shoals, reefs and fish traps which abound in the area along the channel, vessels arriving at night must drop anchor either at the point 1.5 miles North of Mariquitdaqut or at the point 2 miles S.E. of Dio Island. The Pilot will conduct the vessels in at daybreak.

Tides in Tacloban show great inequality, mostly at HW. Mean range of tide is about 1.6 ft., whereas the Diurnal range is 2.3 ft. Flood current sets in a Northeasterly direction, while ebb current sets Southeasterly with a maximum velocity of 3 knots.

MAX. SIZE: See "Berthing".

HEALTH: Pratique is only necessary and required in the first port of entry; it is automatic when entering ports in the same country or state.

RADIO: Radio communication of the Philippines, Inc., Manila.

TUGS: Tugs normally join the vessel when inside Tacloban Harbour. For docking, tugs usually use the vessel's lines.

BERTHING: Inform local office of Philippine Ports Authority at least 24 hours before ETA if vessel on scheduled voyage and 36 hours before ETA if a tramping vessel.

Length of quay – 1,048.8 m., with 217.3 m. allotted for foreign vessels, 585.5 m. allotted for domestic vessels and 246 m. allotted for pump boats.

Maximum permissible ship draft at low water (sea water), Foreign vessels – 6 m.; Domestic vessels – 4 m. – 6 m.

Note: Actual depth along berth for foreign vessel at LW, 7 m.; Domestic, 4 m. – 7 m.

Load/ Discharge – Usually by ship's own gear but shore equipment available for rent.

BULK CARGO FACILITIES: See "Berthing" for berth details.

Cargoes handled: Copra, grain, abaca, sugar, rattan, lumber, drinks, goods in cartons, crated products, heavy lifts, steel bars, etc.

Facilties: Rope nets, rope slings, cable slings, spreader sets, sliding boards and pallets.

STEVEDORES: ETA advices should be furnished to stevedores through ship's Agent.

MEDICAL: Advance notice of required medical attention to ship's Agent essential.

TANKERS: No facilities.

FRESH WATER: Fresh water available through local supply.

FUEL: Only available to domestic (small) vessels.

FIRE PRECAUTIONS: Fire station in port area.

CONSULS: None.

REPAIRS: Not possible.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Necessary for safety of vessel. Ship's Agent makes all necessary arrangements.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: All documents required by International Shipping Rules and Regulations.

CUSTOMS ALLOWANCES: One carton cigarettes per week for each man. Wines/spirits at the discretion of the Collector of Customs.

CARGO GEAR: Load/discharge affected usually by ship's gear but shore equipment available for hire.

REPATRIATION: Immigration Officer effects crew changes and arranging necessary repatriations.

AIRPORT: Distance from airport, 9 km., and is regularly served by airlines.

HOLIDAYS: Depending upon agreement with stevedores, work may be performed during holidays.

POLICE/AMBULANCE/FIRE: All departments are within one minute's call from the harbour.

TELEPHONES: Can be connected on board if required.

SERVICES: No special services available.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Needed for inspection by Immigratio Officer.

REGULATIONS: No unusual regulations.

DELAYS: Berthing: When all berths are occupied upon arrival. Loading discharging: Limited number of available haulers due to simultaneou operations of vessels at berth. Bunkering: Simultaneous bunkering c vessels.

SMR.

AUTHORITY: Philippine Ports Authority, Port Area, Tacloban Cit Philippines. *Tel:* 321-2469. *Contact:* Manuel C. Albarracin, Po Manager.

TAGALOAN, Mindanao: 08.32 N. 124.44 E. (See Plan

SHIPMASTER'S REPORT: February 1989.

LOCATION: Lat. 08° 31′ 50″ N., Long. 124° 44′ 21″ E.

The wharf is in Macajarlar Bay and is aligned 150°/330°.

The wharf is private and operated by Ferrochrome Philippines Inc Tagaloan Misamis Oriental, P.O. Box 249, Cagayan De Oro City 900 Mindanao, Philippines.

PORT LIMITS: The Agent declared vessel as "arrived" when in positio Lat. 08° 32′ N., Long 124° 40′ E., which is the position given for pickin up the Pilot (Cagayan De Oro), but the consignee considers the vess arrived only when berthed.

DOCUMENTS: Fifteen Port Officials boarded the vessel at Cagayan D Oro and once vessel was cleared, after one hour, vessel proceeded berth at Tagaloan.

Officials from Customs / Immigration / Quarantine / Plant an Quarantine / Health / Coast Guard / Agent and two separate officia boarded from Manila as vessel had People's Republic of China crev whom the Philippine Authorities class as restricted crew for landin purposes.

Following documents were required:
4 copies Crew Personal Declaration.
4 copies Provision, Engine Room and Deck Stores.
4 copies Narcotic List.
4 copies Bonded Stores.
3 copies Cargo Manifest.
4 copies Plant and Animal Declaration.
4 copies Vaccination List.
3 copies Ship's Particulars.

PILOTAGE: Pilots were arranged by Agent from Manila. Vessel ha given 7/5/3/2 and 1 day's notice of ETA to Agent. Vessel requested pick up Pilot at Cagayan De Oro in position 08° 32′ N., Long. 124° 40′ Vessel did not send separate message to Pilots.

Anchorage only in deep water of about 90 m, vessel remaine underway near the Cagayan De Oro until port officials had cleared th vessel.

The same Pilot will berth the vessel at Tagaloan, but had to procee at very slow speed, as the Pilot launch had to keep up with the vess and it is used for line handling at the berth.

Pilots at Cagayan De Oro are a private organisation and service th whole of Macajarlar Bay.

Address: Cagayan Harbour Pilots Inc.
Port Area Macabalan, Cagayan De Oro City
Tel: 24-47. Telex: 7789 (PT & T).

RESTRICTIONS: Pilotage available 24 hours, depending on weathe conditions, as no tugs available.

MAX. SIZE: Max. draft 10.0 m., and max. deadweight 40,000 tons. Siz restriction is due to stresses imposed on pier equipment when vess is shifting alongside.

HEALTH: Free Pratique is granted on arrival. No Radio Pratiqu available.

VHF: Cagayan De Oro Pilots operate on VHF Channel 16 and work c Channel 6. Contact with Pilots was made at a distance of 35 miles whe approaching from the West.

TUGS: Not available, but tugs can be obtained through Agents of th "Villanueva", 3,000 h.p., but very expensive. Pilot informed us that on tug of 1,000 h.p. will be available late 1989.

BERTHING: Max. draft 10.0 m., depth alongside 12.0 m.

Only one shore crane available with S.W.L. of 12.5 tonnes, reac 22.5 m., height of lift 26.0 m.

Conveyor capacity – 140 tonnes/hr. – 200 tonnes/hr.

Cleaning of holds is done by small skid loader. Conveyor not designe for lumpy ore and maximum size that can be discharged is 150 mm.

Discharging done by shore crane and vessel has to move alongsid the berth, the only problem was when discharging the extreme en hatches, the leads for the lines were very short. Loading done by ship gear and should be at least 15 tonnes SWL, as the buckets used, whe loaded, weigh approximately 14.5 tonnes.

Rates given by pier operators were as follows:

Discharging	Chrome Ore (Fine)	2,000 tonnes/day.
	Chrome Ore Lumps	1,000 tonnes/day.
	Coke	2,000 tonnes/day.
Loading Ferrochrome		1,500 tonnes/day.

For our vessel discharging Chrome Ore (fine), a rate of 3,400 tonne per day was achieved.

STEVEDORES: Pier operators have their own stevedores.

MEDICAL: Medical and hospital facilities available at Cagayan De Or City, which is 30 minutes by car.

DENSITY: 1023 – 1025.

FRESH WATER: Can be arranged by road tankers, but requires a ver long hose of 200 m. at least, and therefore not recommended.

PROVISIONS: Good quality provisions can be arranged from Cagayan De Oro City.

GENERAL: At present, about 3 – 4 ships call at this port each month for discharging chrome ore, coke and other raw materials for the Ferrochrome plant. Main cargo loaded is Ferrochrome (finished product), about 80% to Japan and the rest for Europe. An average of about 2 or 3 ships call each month for loading the finished product, and quantities loaded do not exceed 5,000 – 7,000 tonnes at any one time.

The Ferrochrome Plant is a joint venture between the Philippines and an Austrian Company.

TANAUAN, Leyte: 11.06 N. 125.01 E. (See Plan)

SHIPMASTER'S REPORT: 1976

N.I.D.C. Coconut Oil Pier: Location of berth Lat. 11° 06′ 15″ N., Long. 125° 01′ 30″ E. The berth is 7 miles from the Pilot boarding point. Least depth of water in channel from sea to berth, 32 ft. At berth bottom is mud and sand. Density 1025. Docking and undocking in daylight only at any stage of tide.

Anchorage 1.5 miles North of Mariquitdaquit Light. Terminal Information: Use shore hoses. Length of pipe-line – 3,000 ft. connection at manifold – 8 in. Shore-booster pump not used. No steam. Product handled, coconut oil.

Port Information: Pilotage compulsory. Pilot requires 12 hours' and 24 hours' notice. Pilot boards 1 mile North of Mariquidaquit Island and comes from Tacloban. It is unsafe to enter and leave after dark. Vessels can enter and leave any state of tide. Max. LOA 1,000 ft. Max. beam 90 ft. Max. draft 31 ft. No tugs available. Vessel able to berth and unberth without aid of tugs.

Facilities available: Fresh provisions available from Tacloban, a small town, 20 km. away. Chandler requires payment in cash for goods.

Airport at Tacloban. Doctor and hospital available. Groceries, meats and laundry available.

No fresh water, repairs, Lloyd's Surveyor or fuel available.

VILLANUEVA, Mindanao: 08.35 N. 124.44 E. (See Plan)

DOCUMENTS, etc.,: See "Cagayan de Oro".

MAX. SIZE: Max. LOA 340 m., max. draft 21.5 m., max. beam 55 m.

BERTHING: Max. workable length allowed without shifting 248.5 m., max. height of hatch coamings above waterline 17.0 m., max. width of hatch coamings 16.8 m., outreach of grab from fender line 33.0 m., mean (F.W.) depth alongside 23.55 m., length of berth 351.0 m., depth at MLW 23.28 m., depth at MHW 24.38 m., distance from pier face to MHW level 4.45 m., distance from grab to MHW 22.25 m.

SHIPMASTER'S REPORT: May 1980.

Location: The Port of Villanueva is situated in Macajarlar Bay on the North coast of Mindanao Island in position Lat. 8° 34′ 45″ N., Long. 124° 44′ 22″ E. and has a clear deep water approach.

Pilotage: The Pilot and possibly Quarantine Officials board in position Lat. 8° 35′ N., Long. 124° 40′ E. by launch from Cagayan de Oro City.

Approaches: When approaching from the East, passage through the Surigao Strait creates no difficulties as there is deep water. There are good radar targets and no excessive tides or currents. Passage between Camiguen Island and the coast is also clear and deep. Numerous fishing vessels encountered throughout the area as well as frequent passings of coastal traffic.

Anchorage: Although there is very deep water to close inshore there is an anchorage position, recommended by the Pilots, in position Lat. 8° 37′ N., Long. 124° 44′ 30″ E. which is 1 mile offshore.

Tugs: There are at least 4 tugs to assist with berthing, all modern efficient vessels of over 3,000 h.p. Tug's ropes used for towing.

Berthing: Berth is in position Lat. 8° 34′ 45″ N., Long. 124° 44′ 22″ E. and is aligned 050°/230°. The berth is 350 m. in length and fendered with 7 'Yokohama' balloon type fenders. Vessels of up to 300 m. in length berth port side alongside, vessels over 300 m. LOA berth starboard side alongside. Depth alongside 23 m. – 29 m. Daylight berthing only but reported able to leave at any time.

Moorings: Standard mooring equipment used, line boat used to run head and stern lines.

Moorings usually 4 head/stern lines, 2 breast lines and 2 springs at each end of vessel.

Loading: Loading is carried out by 1 loading unit with a capacity of over 4,500 t.p.h. The product, sinter ore, is a finished product with a stowage factor of 23 cu.ft.–24 cu.ft. per ton relatively clean and not much dust. The product can be loaded into holds previously containing coal without cleaning.

Discharge facilities exist on the same berth where there are 2 units using 60 ton grabs.

A thorough draft survey is carried out on arrival and again after loading completed.

General: After berthing the vessel is boarded by 14 port officials of various departments from plant quarantine to immigration, paperwork takes about 2 hours on arrival and again before departure after loading completed.

Fresh stores, including fish, are available of good quality and a reasonable price.

There is no VHF communication but telex service to Manila is reliable.

While alongside 3 Customs Officers/Inspectors remain on board and require food and accommodation on a 24 hour basis.

SHIPMASTER'S REPORT: January 1981.

Vessel: LOA 259.0 m., beam 39.6 m., draft 52 ft. 6 in.

Discharged 109,000 tonnes of iron ore at Philippine Sinter Corp. Pier.

General: The pier of Philippine Sinter Corporation at Villanueva is located at the S.E. end of the "J"-shaped bay of Macajalar, in position Lat. 08° 34.45′ N., Long. 124° 45.24′ E., on the North coast of the Philippine island of Mindanao, in the province of Misamis Oriental. Villanueva is only a very small village. The nearest city is Cagayan de Oro, 24 km. (45 minutes) by car from the plant. Our Agent and almost all other offices of importance, are located there.

Documents: The Authorities and the Agents' representatives boarded the vessel at the anchorage (14 persons). The following were required:

10 Crew Lists.
8 Cargo Plans.
2 Vaccination Lists.
1 Maritime Declaration of Health.
6 Ship's Stores Lists.
6 Personal Effects Lists.

In addition, there were other lists, but the Agent had all of them made out in advance.

Telegraphic Free Pratique is obtainable. A telegram sent to the Agent 24 hours before arrival stating the number of Filipinos and Europeans is also compulsory.

Upon departure, no Filipino crew member is allowed to depart if his Seaman's Book has expired, so all Seaman's Books must be renewed before departure. Filipino citizens who are not seamen (wives, etc.) are not allowed to join the vessel in a Philippine port and stay with the vessel to its next port of call. Visiting was no problem, except that a special Customs Permit must be obtained.

Pilotage: Pilotage is compulsory both when anchoring and at docking/undocking. The Pilots have a portable CB radio, but no VHF. The pilot cutter is about 50 ft. long, with a large (for its size) white superstructure. Pilot boarding ground Lat. 08° 37′ N., Long. 124° 42′ E. for inbound vessels. For outbound vessels, Pilot leaves as soon as the vessel is turned, and is about 5 cables off the pier.

Anchorage: The Bay of Macajalar is a deep water bay, with the exception of a shallow area centered at Lat. 08° 40.75′ N., Long. 124° 41.5′ E., and a strip of shallow water extending generally less than 0.5 miles off the coast.

The Villanueva Anchorage is the one exception on the East side of the bay. It is a ledge of less than 100 m. depth extending 1.4 miles Westward from Lat. 08° 37′ N., Long. 124° 45.5′ E. on the shoreline, and it is 3.5 cables wide. The recommended anchorage is 8 cables due West of Lat. 08° 37′ N., Long. 124° 45.5′ E. The depth here is 70 m. or less than 40 fathoms. We anchored here and found it to be good holding ground. Not being more than 0.8 miles from the reefs in a "J" shaped bay, consequently open to wind and sea from West to North, I would not like to anchor there in any strong Northwesterly wind.

In our case the wind was from N.E. to S.E. which, according to the Pilot, were the prevailing wind directions. We did, however, experience quite a bit of swell.

Berthing/Unberthing: Docking and undocking is only done during daylight. There are 4 tugs available in Villanueva, each of 3,500 h.p. The Pilot brought the vessel parallel to the pier about 0.2 miles off, and the 3 tugs we used (1 forward, 1 amidships and 1 aft) pushed us alongside without difficulty. We docked starboard side to. There was, according to the Pilot, no preference for docking starboard or port to, that is, for vessel's discharging.

Vessels loading must always dock port side to due to the construction of the shiploader.

The docking sonar had, in my opinion, the big fault that the Pilot had to rely upon verbal information via the CB radio. A display board visible from the bridge would have enabled us to form instant opinions.

Undocking was a reverse operation; we were pulled by 2 tugs until 0.2 miles off the pier, then the third pushed us around.

Cargo Handling Facilities: The pier is a concrete structure that rests on several large pipes that are sunk down to bedrock. It lays in direction 049° – 229°. There is a "gangway" connecting the pier to the shore. The pier itself is 380 m. long and about 50 m. wide. Large airfilled bags are used as fenders, 6 m. – 7 m. long with a radius of 1.5 m. – 2.0 m. So, even with a relative heavy swell, the ship lays very nicely alongside this cushion.

We tied up with 4 head/stern ropes, 2 spring and 2 breast ropes. The discharging cranes are of the same type as "Kawasaki" have in the port of Chiba, max. 6 tonnes with clamshells of 30 tonnes, portable cranes. Hourly average capacity on lump ore 1,100 tonnes per crane, and on fine ore 1,400 tonnes. We averaged 2,794 tonnes with 2 cranes.

The discharging operation was impressive, with regard to speed and precision.

The ship loader was a normal type conveyor belt with an airdraft of about 40 ft. Loading capacity 4,000 tonnes p.h. Free rail area at pier about 280 m., no shifting while loading for a ship of our size.

Services: There is good drinking water available at the pier. Bunkers are obtainable but at what quantity and price I was not able to find out.

As of repair facilities, I had the impression that only simple repair work could be carried out.

The city of Cagayan de Oro has an airport with a twice daily direct flight to Manila, and once a day connections with Cebu and Davao. There are no international flights.

International telephone service is extremely poor. One must make the call directly from the telephone company's office, and a 2 hour – 3 hour waiting time for Europe and the U.S.A. must be expected. A call to Manila may come through in less than an hour. The Agent had telex and this is the only sensible communication with Cagayan de Oro.

With mail from Europe and the U.S.A., one must reckon on 2 weeks to 3 weeks. It seems that all communications go through Manila, with the delays that this automatically causes.

The Agent had a minibus service from the plant to Cagayan de Oro. This proved a necessity, as taxis are scarce.

The ship chandler could only obtain foodstuff.

SHIPMASTER'S REPORT: December 1988.

The vessel arrived at Villanueva for loading Iron Ore Sinter for discharging at Sparrows Point, Baltimore, U.S.A. The information pertaining to port facilities and conditions have been collected and compiled during this call.

General: The Philippine Sinter Corporation (PSC) is one of the biggest single foreign investments in the Philippines today. This industrial joint venture between Kawasaki Steel Corporation of Japan and PSC was incorporated in 1974. Sinter production started in April 1977.

Mindanao Sinter Plant – Product and the Process:

The "Sintering" consists essentially of mixing fine iron ore with solid fuel, normally coke and flux such as limestone, and burning the mixture under controlled conditions to produce hard but permeable lumps which are ideal blast furnace feed. The mixture is spread evenly over a continuous train of pallets of the sinter machine in a uniform bed thickness and ignited under induced pressure provided by huge blowers. The blended material is agglomerated into big blocks of sintered ore. A hot crusher breaks these blocks into 150 mm. lumps, which are then cooled. The rest of the process involves screening to remove mediums and fines which are recycled.

PSC is diversifying into a new project which involves construction of drying plant to treat pineapple pulp into suitable cattle feed. The drying plant is located adjacent to existing sinter plant and will utilise the recovered waste heat from the sinter plant.

The Mindanao Sinter Plant has three main components.

1. The Ore Yard.
2. The Sintering Facilities.
3. The Port Facilities.

1. THE ORE YARD:

The 18 hectare ore yard is made up of 4×45,000 sq.m. yards with an aggregate storage capacity of 1,500,000 tons. The yards are equipped with a Wing stacker and reclaimer, etc.

The ore yard facilties are:

4 Ore yards, (50 m.×900 m.), for iron ore, sintered ore, limestone and coke breeze.
2 Stacker-Reclaimers, 3,600–6,000 t.p.h. and 3,600–1,500 t.p.h., rail mounted.
1 Wing stacker, 800 t.p.h., single wing and rail mounted.
8 Bulldozers.
6 Mobile truck cranes.

2. THE SINTERING FACILITIES:

These consist of one sinter machine with a 450 m. grate area, rated at 5 million tons per year and other ancillary equipment for limestone crushing, screening, coke grinding, material blending, mixing, storing, feeding and processing.

The equipment of the sintering facilities is:

14 Blending Hoppers, 600 cu.m. capacity.
1 Sinter Machine, 450 sq.m. grate area, Dwight-Lloyd type (90 m.×5 m.).
1 Sinter cooler, 400 sq.m. bed area, 15,000 cu.m./minute circular type.
2 Main blowers, 18,000 cu.m./minute, double suction type.

In addition other facilities include:

a. De-dusting system equipment.
b. Power equipment.
c. Fuel tanks and deepwell.
d. Maintenance shop for mechanical, electrical and instrumentation works.
e. Laboratory for physical, chemical, bacteriological and environmental analysis.
f. Instrumentation and control facilities.
g. Communication facilities.

3. THE PORT FACILITIES:

The port has a main berth and a cargo berth. The 351 m. long main berth has a depth of 25 m. It can easily accommodate 300,000 d.w.t. bulk carriers and is equipped with 2 bulk unloaders with a capacity of 1,800 t.p.h. each and 1 shiploader with a capacity of 6,000 t.p.h. The cargo berth is 230 m. long with a depth of 5.5 m.

The following floating equipment is available:

2 tugs of 3,200 b.h.p., twin screw Z-peller.
2 tugs (pusher boats) of 3,200 b.h.p., twin screw.
2 barges each 6,000 d.w.t.
1 lineboat, 390 b.h.p., twin screw.

PORT INFORMATION:

Location: The Port of Villanueva is situated on the North coast of Mindanao Island, in Macalajar Bay, on the Eastern side in position Lat. 08° 34′ 45″ N., Long. 124° 44′ 22″ E.

Charts:

B.A. Chart No. 3811 – this chart is small scale for approaches.

U.S. Chart No. 92290 – this chart is fairly large scale and more useful.

Philippine Charts No. 4648 and 4649 – these charts were published by PC&GS in 1976 and are available from Philippine Sinter Corporation and may be obtained through Villanueva or Manila agents.

Port Limits: There is no specific demarcated port limit. Southern half of Macalajar Bay could be considered within port limits. However, entire bay is under control of Harbour Master of Cagayan De Oro Port, which is located on the Western side of the bay.

Pilotage: The Pilot and at times Quarantine Officers board vessels in position Lat. 08° 35′ N., Long. 124° 40′ E., by launch from Cagayan De Oro. Pilotage of Villanueva is carried out by pilots of Cagayan De Oro and is controlled by its Harbour Master.

Presently, there are 4 pilots at Cagayan De Oro for both ports. Usual arrival messages to be sent to Agent. VHF station at Cagayan De Oro keeps 24 hours' watch on VHF Channel 16. At least 6 hours prior to arrival, contact should be made with Port Authorities, calling "Cagayan Pilot Station" and give ETA, etc. Pilot boards vessel anytime, day o night, unless weather is bad, due to strong wind and rough sea hampering motor launch manoeuverability. Anchoring, berthing an unberthing at Villanueva is carried out anytime day or night on a 24 hou basis.

Anchorage: The Bay of Macalajar is a deep water bay. A strip of shallov water extends generally less than 0.5 miles off the coast. The Villanuev Anchorge is about 3 miles to the North of the berth, along the Easter side of the bay. The recommended anchorage is in the vicinity o approximately 8 to 9 cables due West of position Lat. 08° 37′ N. Long. 124° 45.5′ E. In this area there is room for only 3 large vessel from Panamax size to 300,000 d.w.t. for safe distances whilst at ancho The depth of water in this area is from 70 m. to 150 m. Anchoring i carried out by pilots anytime, day or night, however, it is preferable t anchor in daylight hours. On account of close proximity of coastline during Northerly or North-Westerly winds, added precautions an vigilance would be needed to remain safely at anchorage.

While approaching the anchorage area, starboard anchor was lowere to 4 shackles in the water and the windlass was kept in gear. Vesse approached to within 1.15 miles of the coastline in positio Lat. 08° 38′ N., Long. 124° 44.5′ E., ship heading 093° True, when ech sounder showed depth of 157 m. When vessel reached 0.77 miles o the coastline, cable was gradually lowered in gear up to 8 shackles i the water and subsequently was brought up when 0.68 miles off th coastline and water depth was 140 m. After swinging around with vesse heading on a Westerly bearing, water depth showed about 90 m. Holdin ground was found to be good. There are no lights or buoys for checkin anchor bearing. One has to improvise, using certain landmarks an conspicuous shore objects for ascertaining position by radar.

Approaches: Passage from East through Surigao Strait is safe as there is deep water. Most of the lights are either not working or are on lo power. The passage through these waters can be made with good rada for night transits and impaired visibility periods during rain squalls Numerous fishing vessels are encountered throughout the area, as wel as coastal traffic. Also large vessels make use of Surigao Strait to an from Pacific.

Documents: The following documents were required and prepared b vessel:

10 copies Crew Lists.
4 copies Personal Declaration.
4 copies Stores List.
2 copies Vaccination List.
1 copy Maritime Declaration of Health.

In addition, there were other documents and Philippine forms whic Agent had prepared in advance for Master's signature.

Vaccination List was not required by the Quarantine Officer.

Visaed Crew List: As informed by Agent, Visaed Crew List is requirement. Prior to arrival at previous port, a telex message wa received from Manila Agent advising that Crew List should be visae by Philippine Embassy or Consulate. Therefore, 3 copies of Philippin Crew List forms were obtained from Philippine Embassy through Agent which were then duly completed and sent for Visa. The visaed Cre List was forwarded by Agent to Villanueva in due course. Although did not reach Villanueva when vessel arrived, Immigration authoritie issued shore passes to crew without difficulty. Visaed Crew List reache Agent's office on day of departure (sent from Japan).

Health: Usual Radio Pratique message to be sent to Agent for presentin to Quarantine Officials. However, Pratique was granted by Quarantin Officer who boarded the vessel upon anchoring.

Boarding Formalities: Upon anchoring, 23 persons boarded the vessel which comprises agents and representatives of various authorities:

Quarantine	1
Agents	3
Immigration	4
Customs	7
Plant and Animal	4
Coast Guard	4

Agent requested lunch and refreshments for all above officials.

Restrictions: There are no restrictions. Vessels up to 300 m. LOA an 250,000 d.w.t. are berthed at Villanueva for discharging iron ore an loading iron ore sinter. Maximum draft alongside berth is 25 m.

Radio/VHF: There is no radio or VHF station at Villanueva. Cagayan De Oro has a VHF station which keeps continuous watch. Vessels shoul send ETA messages through Manila Agent or directly by telex t Villanueva Agent.

At least 6 hours prior to arrival, contact should be made with "Cagaya Pilot Station" (Channel 16) for ETA notices and instructions.

Berthing Facilities: There are 4 motor launches for pilots at Cagaya De Oro which are painted red and are numbered "M.L. Pilot No. 2" "M.L. Pilot No. 3", "M.L. Pilot No. 4" and "M.L. Pilot No. 5". Launch No. 1 has been scrapped. There are 2 tugs of 3,200 b.h.p. and 2 pushe tugs of 3,200 b.h.p. There is 1 line boat of 390 b.h.p.

The main berth is 351 m. long with berthing capacity for vessels u to 300,000 d.w.t. and water depth of 25 m.

The main berth is used for discharging and loading operations. Bert is in position Lat. 08° 34.45′ N., Long. 124° 44.22′ E. and is aligne 050°/230°. The berth is protected by 7 "Yokohama" balloon type fenders For discharging vessels there is no preference for docking starboar side to or port side to, whereas for vessels loading, docking with po side to is required due to location and movement of shiploader. Moorin lines are usually 4-2-2 at each end.

Cargo Facilities: For discharging there are 2 grab unloaders, ra mounted rope trolley type, each with a capacity of 1,800 t.p.h. Thes unloaders are adjacent to each other and are located on th Southwesterly side (i.e. after the shiploader).

For loading, there is one shiploader, rail-mounted luffing shuttling type with a capacity of 6,000 t.p.h. However, in practice, average loading rat was found to be 4,500 t.p.h.

Air draft at berth is 40 ft. No shifting required while loading for Panamax size vessels. Iron ore sinter cargo stowage factor is 23 to 24 cu.ft. per ton. The cargo which was loaded was found to be very dusty, containing white-grey coloured powder (presumably limestone). Upon sailing, this powder was found to be sticking to hatch covers, main deck, pipelines, etc. and at some places use of scrapers was required as it could not be removed by hose washing. The dry powder remains could be swept more easily than removing when wet as it became sticky and hardened with water.

Fuel: HFO and DO can be supplied by trucks only, in any quantity. There is no pipeline facility for bunker supply at Villanueva.

Medical: Cagayan Medical Centre at Cagayan De Oro City is equipped with full medical and hospital facilities.

Stores and Provisions: A limited variety of deck, engine and catering stores are supplied from Cagayan, small quantities only can be supplied. Fresh provisions are also available at Cagayan De Oro. Prices of most items are normal, however certain items are expensive.

Surveyors: A.B.S. are stationed at Cebu. Surveyors of other Classification Societies are available from Manila with sufficient notice. Cargo surveyors at P.S.C. plant at Villanueva are from PNKKK, for carrying out draft surveys, etc.

Watchman and Safety: At anchorage, very efficient deck patrolling is necessary as pirates board unguarded vessels in dark hours. Loss of private property, ship's stores, ropes, paints, etc. are often reported. In addition to crew on deck, 3 armed guards, supplied by the Agents, patrol at night whilst at the anchorage.

Holidays: Government Offices, including Immigration and Customs, work 5 days a week. Agents and other commercial offices work half days on Saturdays.

Mail Service: Delays of up to 10 days to 15 days are normal as all mail is routed through Manila.

Telephones: Telephones are not provided on ship at berth. However, P.S.C. office located near the main berth has telephone for making domestic and International calls. Long delays for any International telephone calls from Villanueva, as well as Cagayan De Oro are normal.

Telex: Telex services to and from Villanueva were found to be normal.

Shore Leave: Immigration Authorities issue shore passes for crew to go ashore and crew can go to Cagayan De Oro. Agents arrange minibus for transportation to and from ship to Cagayan. Private taxis are also available. Travelling alone at night is not very safe.

Airport: Cagayan Airport is located 10 km. from Cagayan De Oro City and about 40 km. from Villanueva. Regular domestic flights are operated to and from Manila and Cebu.

Repatriation: Crew joining and leaving is possible, via Manila.

Time: GMT plus 8 hours throughout the year.

Consuls: Consulates of most countries are located in Manila and a few are located at Cebu.

Radio and TV Stations: AM/FM radio stations. Two TV channels from 1100 hrs. – 0000 hrs., programmes are in English and Tagalog.

Languages: English is widely understood and spoken. Visayas is the main language spoken on Mindanao Island. Tagalog, Spanish and English are taught in schools. Tagalog is the main language of Luzon (Manila).

Currency: The peso is the currency of Philippines. Exchange rate is linked to the U.S. Dollar. During ship's call, the exchange rate was U.S.$ 1.00=21.20 Pesos. However, in shops and stores, exchange was available at 20 pesos to U.S.$ 1.00.

AUTHORITY: See "Cagayan de Oro".

Operator: Philippine Sinter Corporation, Port Operations, Villanueva, Misamis Oriental, Philippines. Postal Address: P.O.Box 90, Cagayan Do Oro City, Philippines. *Tel:* 33-28. *Telex:* ITT-48406. *Contact:* Captain Emiliano Ea Duran.

ZAMBOANGA, Mindanao: 06.54 N. 122.04 E. (See Plan)

See "General" before first port.

PILOTAGE: Vessels approaching the port use International Code Signals for calling Pilot.

Pilot Station: Telegraphic address is Zamboanga Pilots, Zamboanga City. Estimated time of arrival (ETA) must be radioed 24 hours in advance. Pilots always on duty. Pilot boat is wooden launch painted white with red trimmings and displaying the pilot flag. The exact area where a Pilot will board vessel is in the vicinity of Little Sta. Cruz Island, for vessels coming from West, and near the vicinity of Rio Hondo for vessels coming from East. Alternative area in the event of bad weather is in the vicinity of Zamboanga Pier at a distance of at least 1 mile either way. Vessels awaiting Pilot should not necessarily drop anchor, provided 24 hours' notice of their ETA is given by local Agents or the Master, to the Zamboanga Pilots, for a Pilot is *always* on duty.

ANCHORAGES: Owing to the steep bank, strong currents and hard, uneven bottom, there are no good anchorages off Zamboanga. However, anchorage may be made anywhere Southward of the wharf at a distance of about 3 cables from shore Eastward of an imaginary line from the Tide Indicator, at a depth of between 25 fathoms and 30 fathoms and giving 7 shackles of chain in the water. This will hold vessel even at strongest current of 6 knots. In the event of very bad weather the vessel should transfer her anchorage to Caldera Bay, which is approximately 7 miles West of the anchorage area.

MAX. SIZE: No limits for anchoring. For berthing, up to 10.0 m. draft.

HEALTH: Quarantine Officer will board the vessel for the necessary inspection of all crew on board. Thereafter he issues Pratique, if and when he finds that there is no disease or fever on board. The Pratique is valid until after the vessel departs to a foreign port.

RADIO: Philippine Telegraph & Telephone Corp. (PT & T), Universal Telecommunication Services (UTS), Radio Communications of the Philippines (RCPI), Central Radio Communications (CRC), Capitol Wireless Inc., (CWI), Telefast Communication and the Bureau of Telecommunication operated by the National Government for receiving and transmitting radio messages. Night and day services.

TUGS: The position where tugs normally join the vessel is in the stream and the usual ship's lines or tug's lines are used. There is no charge collected for the use of the tug's lines.

BERTHING: The Zamboanga Government Wharf is 1,363 linear metres long with a depth at the latest survey of the following: East end 5.0 m.; mid-section 7.0 m. and West end 10.0 m. at MLLW. There is a private wharf at Baliwasan and vessels of 27,000 g.r.t. can dock there with the following limitations: Draft forward must not exceed 32 ft.; draft aft must not exceed 36 ft., upon completion of loading. Vessels docking at this wharf can only be docked at *flood* tide (current running East to West) and can only be undocked in the same manner.

2 anchors must be used in berthing and vessels lay alongside the concrete pier port-side-to. This wharf in Baliwasan is for loading coconut oil and copra pellets only.

STEVEDORES: The Master of the vessel shall cable to the local Agents so that contract could be made with the shipper to arrange gangs.

MEDICAL: It is necessary for Agents to receive advance notice of required medical attention. Hospital facilities are available at all times. Inoculations are also required by the Quarantine Officer upon boarding a vessel.

TANKERS: There are 4 oil depots at Gavilan Pt. and at Baliwasan. (Shell, Mobil, Esso and Caltex.) Max. tonnage of 4,000 gross with a draft of not more than 18 ft. can be moored for discharge.

FRESH WATER: Fresh water can be obtained any time of the day. There are 5 water outlets strategically distributed at the new quay.

FUEL: Fuel, diesel, and crude oil available.

FIRE PRECAUTIONS: Smoking is entirely prohibited on board a tanker entering this port. The Master must advise all persons boarding his vessel.

GANGWAY/DECK WATCHMEN: The services of watchmen are necessary to stop looters from boarding the vessel.

OPENING/CLOSING HATCHES: Normally opening and closing by the crew, and if done by stevedores the vessel has to pay.

CUSTOMS ALLOWANCES: 200 cigarettes per man. Upon arrival in port the cigarettes are sealed in a bonded store by the Customs Authorities, and can be opened only upon permission granted by the Collector of Customs.

CONSULS: None available.

REPATRIATION: Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship Agent and the foreign Embassy concerned.

AIRPORT: Distance from Zamboanga Pier to the airport is 3 km. Served by regular airlines. There are 2 flights daily (0920 hrs. and 1930 hrs.) from Zamboanga to Manila by Philippine Air Lines (PAL). Airport is also open to International flights.

HOLIDAYS: Cargo work can be arranged with the Stevedoring Company through the shipper to work during holidays, including Sundays.

POLICE/AMBULANCE/FIRE: Police Department, Tel. 119; Ambulance, Zamboanga Regional Hospital, Tel. 25-11; and Fire Department, Tel. 110.

TELEPHONES: Telephones cannot be installed on board when docked at the pier as is not allowed by the City Government.

SERVICES: Special services may be available, e.g. tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, through representations to be made with the shipper or local Agent of the vessel.

IDENTIFICATION CARDS: All crew members to have identification cards for immediate identification in case of trouble while the crews are on shore.

DEVELOPMENTS: A new quay 220 m. length and 10 m. depth to be constructed.

New Facilities:

a. New Quay:	220.44 m.
b. Ferry Pier:	20 m. wide × 49.9 m. length of reinforced concrete.
c. Closed Transit Shed:	40 m. × 126 m. with two 6 m. × 15 m. office spaces and a 24 m. × 40 m. Passenger Terminal.
d. Gate House:	18 m. × 30 m. with 2 × 50 ton capacity weighbridges, through booths and 2 guardhouses.
e. Equipment Shed:	15 m. × 60 m.
f. Maintenance and Fire Station Building:	15 m. × 66 m.
g. Passenger Terminal Building at Eastern Section:	30 m. × 54 m.
h. Amenity Block:	6.5 m. × 10 m.
i. Generator Shed/Power House:	15.4 m. × 25 m.
j. Administration Building:	Three storeys (1,296 sq.m.)

AUTHORITY: Philippines Ports Authority, PMO-Zamboanga, Port Area, P.O.Box 360, Zamboanga City 7000, Philippines. *Tel.* 2991-2995. *Contact:* Tantung L. Abam, Port Manager.

Poland

GDANSK: 54.21 N. 18.39 E. (See Plan)

ICE: Efforts made to keep port open all year round. Only in very severe Winter are difficulties experienced.

DOCUMENTS:
12 copies Cargo Manifest.
2 copies Bills of Lading.
Discharge Books to be collected for presentation.
Ship's Register.
Maritime Declaration of Health.
5 copies Ship's Articles/Crew List.
Derat Certificate or exemption from Sanitary Certificates, covering food cargoes and/or of animal origin, destined for discharge here.
Specification of Dangerous Cargo, even if in transit.
2 Stowage Plans.

PILOTAGE: Compulsory. Boarding in Gdansk Roads. Gdansk Pilot Station available on VHF, Channel 14.

Also see "Baltic Deep Sea Pilotage" – Page 174.

ANCHORAGES: Gdansk Roads. Anchorages No. 1, 2 and 3 for ships up to 720 ft. LOA.

Anchorages: No. 1 draft 29 ft. 06 in.; No. 2 draft 34 ft. 05 in.; No. 3 draft 39 ft. 04 in.; Anchorages No. 4 and 5 for bulk carriers and tankers of Baltimax size, max. draft 59 ft. 00 in. No tides.

RESTRICTIONS: On arrival or if moving or in every case of emergency conditions contact Harbour Master's Office on Channel 14. Tel: 43-07-10.

MAX. SIZE: Baltimax size for ships entering North Port. Max. size of ships permitted to enter inner port: Draft 10.20 m. brackish water, max. LOA 220 m. Also see "Berthing".

HEALTH: Maritime Declaration of Health to be presented on arrival. In the event of suspected disease, the vessel should cable to "Quarantine Gdansk", or via Agents.

RADIO: Messages should be sent via Gdynia Radio.

RADAR/VHF: Port Radar Service acting with pilot station, can be contacted on VHF Channel 14.

Polish Notice No. 202/86: Ship Reporting System: The following are required to report by VHF to the Harbour Master of destination on crossing the latitude of 54° 45′ N. (Repline Hel) in the entrance to the Gulf of Gdansk:

All vessels – if on account of special circumstances they may cause a risk of collision or pollution.

Vessels bound for Gdansk – of 150 g.r.t. and above.
Vessels bound for Gdynia – of 500 g.r.t. and above.
The report should include:
REPHEL (abbreviation of Repline Hel)
Name and call sign
Date and time
Position
Destination and ETA
Type and quantity of cargo
Draft
Any deficiencies, e.g.
(a) Overloading, or excessive heel or trim.
(b) Faults affecting manoeuvring capability.
(c) Uncleaned tanks, etc.
(d) Anything which might cause pollution.

The consent of the Harbour Master must be obtained before entering the roadstead of the port of destination.

TUGS: 14 tugs available. Join in Gdansk Roads. Vessel's lines must be used. Tugs compulsory for all vessels over 2,000 g.r.t. Tugs available up to 2,500 h.p.

BERTHING: Max. draft mentioned below is to be taken as normal water level. No tide. Max. difference from mean level is plus/minus 3 ft., subject to wind direction.

Name of Quay	Length (m.)	Max. Draft (m.)	Max. LOA (m.)
Inner Port:			
Marchlewskiego	563	8.70	170
Warynskiego	490	9.70	170
Ziolkowskiego	132	6.30	127
Oliwskie	635	9.70	220
Westerplatte	1,200	10.00	220
Obroncow Poczty Polskiej	285	10.20	220
Weglowe	850	9.70	220
Rudowe	725	9.50	220
Administracyjne	124	5.20	80
XX-lecia PRL	1,239	10.20	220
Chemikow	210	10.20	220
Przemyslowe	235	7.80	220
CPN-4	–	6.90	120
Port Polnocny/North Port:			
Liquid Fuel Terminal	335	15.00	280
Coal Terminal	354	15.00	300
Ore Terminal	300	12.00	200

CRANES: Floating cranes of 60 tons–100 tons capacity. Shore cranes up to 16 tons capacity.

Also see "General Cargo Handling Facilities".

BULK HANDLING FACILITIES: Coal Handling Facilities at North Port Coal Terminal capable of receiving vessel up to max. draft 15.0 m. Daily loading rate 50,000 tons. Also Inner Port-Weglowe Quay equipped with 7 – 10 tons cranes for vessels up to 9.7 m. draft. Bulk and liquid sulphur handled at Obroncow Poczty Polskiej Quay. 20 tons grab cranes and conveyor system for fertilisers in bulk at Chemikow Quay.

Grain elevator: Grain is also discharged by grabs. Conveyor system for loading salt and sodium in bulk.

Timber handling facilities at Rudowe and Westerplatte Quays.

STORAGE FACILITIES:
Coal yard: 600,000 tons.
Phosphate shed: 60,000 tons.
Grain elevator: 8,000 tons.
Solid sulphur store: 20,000 tons.
Warehouses: 100,000 sq.m.
Open storage: 550,000 sq.m.
Refrigerated warehouse (Oliwski Quay): 5,000 tons.

GENERAL CARGO HANDLING FACILITIES: Passenger cargo/Ro-Ro terminal at Ziolkowskiego Quay.

Port is equipped with new Ro-Ro floating berth which can operate at every general cargo quay.

Westerplatte Quay: Warehouse and open storage yards. Handling of general cargo and packaged pulpwood. This quay is also used for waiting.

Oliwskie Quay: Warehouses on quay can handle general cargo, fruit and vegetables. Open storage yards for general cargo and packaged pulpwood.

Aleksander Zawadzki Basin: Ore bridges have been dismantled. Max. draft up to 10.2 m.

20th Anniversary of Polish People's Republic Quay: Equipped with 3-16 ton portal cranes for general cargo and 7-8 ton cranes for bulk cargo, a grain elevator and special suction installations. Warehouses and open storage for general cargo and bulk cargo.

STEVEDORES: As gangs for the following day must be ordered before 1100 hrs., vessel's ETA should reach the Agents relevantly in advance.

Stevedores work 24 hours per day, which is considered to be between 2300 hrs. – 2300 hrs. following day. First shift from 2300 hrs. – 0700 hrs., second shift from 0700 hrs. – 1500 hrs., third shift from 1500 hrs. – 2300 hrs.

Timber, general cargo and heavy lift operations are usually performed in two shifts only between 0700 hrs. and 2300 hrs. Sulphur, superphosphates, phosphorites, apatites, grain and other awkward dusty cargoes worked in 4 shifts of 6 hours each.

Port works Sundays, holidays and free Saturdays at premium rates. 1 in 4 Saturdays are worked.

MEDICAL: No special notice required. Full hospital facilities available.

TANKERS: Liquid Fuel Terminal at North Port.

Location: Southern part of the Gulf of Gdansk, 54° 25′ N., 18° 43′ E. approximately. Advisable route via "ZN" Beacon, to "ZS" Beacon, then anchorage on No. 5 Beacon 54° 27′ N., 18° 53′ E.

Facilities: 1 L-shaped jetty for berthing consists of 1 main platform and 4 main dolphins, fitted with quick release hooks. The main platform is fitted with gangway tower and 7 movable handling arms for loading and discharging purposes. Only 1 mooring place available. The jetty accessible for vessels having minimum 150 ft. (about 10,000 d.w.t.) and maximum 1,000 ft. (150,000 d.w.t.) length and 49 ft. 03 in. draft.

No facilities for liquefied gases.

For towing purposes there are 3×2,500 h.p. and 2×1,650 h.p. diesel tugs available, if necessary further 1,200 h.p. tugs are at hand. All tugs equipped with fire fighting equipment.

Cargo Handling Equipment: The 7 mobile handling arms, Luceat Production, are used as follows: No. 2, 3 and 4 for discharging of crude oil, rate about 10,000 cu.m./hr. No. 1 and 5 for loading bunker oil and water, rate about 2,000 cu.m./hr. No. 6 and 7 loading liquid fuels and refined products, rate 2,000 – 2,500 cu.m./hr. Loading pressure of vessel's pumps should not exceed 14.5 kg./sq.cm. at any time.

Facilities for handling of vessel's ballast water available.

Services: Marine diesel and fuel oil available at the jetty. Storage tanks located in the neighbourhood of the terminal and connected with central pipe-line system of Poland. Laboratory for testing purposes and repairing facilities available.

DENSITY: Salt content: Below 0.3%

FRESH WATER: Available at hydrants, and delivery to vessels in roads.

FUEL: Heavy, intermediate and thin fuels, marine diesel oils and gas oils available ex-shore installation or lighter. 48 hours' notice required.

CONSULS:
Chinese People's Republic Consulate General, Tel: 41–64–76.
German Consulate General, Tel: 41–43–66
Soviet Consulate General, Tel: 41–06–13.

At Gdynia:
Belgian Consulate, Tel: 20–39–83.
Brazilian Consulate, Tel: 21–61–31.
Italian Vice-Consulate, Tel: 21–51–15.
Swedish Consulate, Tel: 21–62–16.

At Sopot:
Finnish Consulate, Tel: 51–50–52.
Also representing other Scandinavian countries.

REPAIRS: All types of deck and engine repairs performed by specialised ship repair yard.

Floating docks: No. 1, 6,400 tons lifting capacity, dimensions 135×25.20 m. No. 2, 8,000 tons lifting capacity, dimensions 156×27.20 m. No. 3, 11,000 tons lifting capacity, dimensions 176×28.00 m. 1 floating jack of 1,700 tons capacity and 3 minor docking pontoons.

GANGWAY/DECK WATCHMEN: Recommended and available.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, crew allowed to handle.

CERTIFICATES:
Load Line Certificate.
Cargo Gear Certificates.

CUSTOMS ALLOWANCES: For 3 days – 160 cigarettes or 30 cigars or 150 gm. tobacco per crew member. Master is allowed double ration. 1 bottle wine and 1 bottle of spirits per crew member for each 3 days. Master is allowed double ration.

REPATRIATION: Crew changes and repatriation can be arranged by MAG – Morska Agencja Gdynia. Crewing Department Telex: 054301. Supplies all ranks of crews to any Owners on request on the spot.

AIRPORT: Gdansk Airport.

TIME: Middle European Time, which is 1 hour ahead of GMT.

HOLIDAYS: New Year's Day (January 1st); Easter Sunday (movable); Easter Monday (movable); Labour Day (May 1st); Corpus Christi (movable); National Holiday (July 22nd); All Saints' Day (November 1st); St. Barbara, only for workers loading coal, (December 4th); Christmas Day (December 25th); Boxing Day (December 26th). On Christmas Eve and New Year's Eve, work stops at 1500 hrs. In justified and approved cases, overtime on Sundays and holidays can be arranged.

POLICE/FIRE/AMBULANCE: Police: Gdansk-Nowy Port, Wladyslawa IV-3, Tel: 31–48–61; Ambulance: Gdansk-Wrzeszcs, Al. Zwyciestwa 49, Tel: 41–10–00; Fire: Gdansk-Nowy Port, Na Zaspy 57, alarm phone Tel: 41–22–22.

TELEPHONES: Available on most general cargo quays.

SERVICES: Collecting of oily ballast water to Ballast-water Treatment Plant. Cleaning of holds, bilges and ship's tanks.

STORING: Baltona ship chandlers supply ships with provisions, cabin, deck, bonded stores as well as spare parts for main and auxiliary engines. "Duty Free" shops for crew convenience.

IDENTIFICATION CARDS: Each crew member must be in possession of a valid Discharge Book/Seaman's Book, and will receive a separate shore permit issued by the Immigration Authorities, entitling him to go ashore within the area of Gdynia/Sopot/Gdansk.

DEVELOPMENTS: A 40 ton shore crane will be installed at XX-lecia PRL Quay.

A Ro/Ro berth will be completed in 1990.

AUTHORITY: Commercial Sea Port of Gdansk, ul. Zamknieta 18, 80-955 Gdansk-Nowy Port. *Tel:* 439-200. *Telex:* 0512324. *Cables:* Geoport Gdansk. *Contact:* Tadeusz Orlowski, Operating Manager. Tel: 436-300. Telex: 0512721. Wojciech Przewieda, Port Director.

AGENT: See "Szczecin".

GDYNIA: 54.32 N. 18.34 E. (See Plan)

ICE: On average, during most of the Winter periods both port and the roads are ice-free. Only prolonged and severe frosts may result in ice cover formation in basins and in the roads outside. Winds of gale force may shift some drifting ice floes from other parts of the bay and render navigation in the roadstead difficult. In such cases the approach channel and the port basins are kept free of ice and unobstructed to navigation by icebreakers of the Polish Ship Salvage Company and powerful tugs of the Port Authority. The cost of icebreaking is borne by the Port Authority. These phenomena, however, are rather rare, since Winters are usually mild in those areas.

PORT LIMITS: A vessel is an "arrived ship" and laytime commences from time of ship's entry into the roads.

DOCUMENTS:

11 copies Cargo Manifest.
2 copies Bills of Lading.
Discharge Books to be collected for presentation.
Ship's Register.
Ship's Articles/Crew List.
Maritime Declaration of Health.
Derat Certificate.
Sanitary Certificates covering food cargoes and/or of animal origin, destined for discharge here.
Specification of Dangerous Cargo (even if in transit).
2 Stowage Plans.
Load Line Certificate.
Cargo Gear Certificates.

PILOTAGE: Compulsory. Boarding in Gdynia Roads. Gdynia Pilot station available on VHF Channel 12. Traffic around the clock.

Also see "Baltic Deep Sea Pilotage" – Page 174.

ANCHORAGES: Gdynia Roads at Buoy GD, up to 200 m. – 500 m. off port entrance. No tides.

RESTRICTIONS: Depth in main entrance 11.36 m.

MAX. SIZE: No limit on length, max. draft 12.00 m. at Hel I and Hell II Quay, also see "Berthing".

HEALTH: Maritime Declaration of Health to be presented on arrival. In the event of suspected disease the vessel should cable "Quarantine Gdynia", "Radio Medical Gdynia" or via Agents.

RADIO: Message should be sent via Gdynia Radio. Port Radar Service acting with the pilot station, can be contacted on VHF Channel 12, Gdynia. Contact Agent VHF Channel 7.

TUGS: 11 tugs available. Join vessel in Gdynia Roads. Vessel's lines must be used.

TELEPHONES: Available on most general cargo quays.

Placing of telephones on board is according to current costs per 24 hours.

IDENTIFICATION CARDS: Each crew member must be in possession of a valid Discharge Book and will receive a shore permit issued by the Immigration Authorities entitling him to go ashore within the area of Gydnia-Sopot-Gdansk.
SERVICES: Hold cleaning, container and watchmen provided by "Port Service", Celna Street 5, extension telephone 50-34, 50-36; bunkering provided by "Port Service", extension telephone 50-42. Hold cleaning and container washing provided by Port of Gdynia Authority, Rotterdamska 9, Gdynia.
BANKS: Handlowy S.A., Branch Office, 81–370 Gdynia, Skwer Kosciuszki 14, Tel: 20-63-83.
DEVELOPMENTS:

1. Further development of the Baltic Container Terminal:

Extending of the Ro-Ro and Lo-Lo quays to the total length of 1,080 m. including next fixed ramp Ro-Ro berth at Hel II Quay.

Expanding of the container storage areas.

Building of the container cleaning station, vast parking areas and M+R workshop for containers and road trucks.

After the completion of the first stage of construction of the Baltic Container Terminal the handling capacity of the Terminal will go up to 1.5 million tons/170,000 TEU per year and will be able to accommodate various types of container vessels up to 30,000 d.w.t. capacity.

The second and final stage of construction works will increase the handling capacity of the Baltic Container Terminal to 2 – 2.5 million tons/250 – 300,000 TEU per year.

2. Modernisation of the Peace Fighters Quay – extension of the quay and equipping it with new cranes.
3. Total reconstruction and modernisation of general cargo warehouses.
4. Converting bulk cargo quays in Basin No. 3 into highly specialised general cargo berths.
5. Building of fruit warehouse in the area of Baltic Container Terminal.
6. Total reconstruction and modernisation of Grain Terminal at Indian Quay.

GENERAL: Cargo is handled around the clock in 3 shifts of 8 hours each. Work on 3 Saturdays per month is paid by addition of 100 per cent. Sunday and holiday interruptions last from 2300 hrs. on Saturdays or days before holidays and terminate at 2300 hrs. on Sundays or holidays.

Transhipment of cargo at port rates. Extra fast despatch can be arranged at additional charges.

AUTHORITY: Port of Gdynia Authority, ul. Rotterdamska 9, 81-337 Gdynia, Poland. *Tel:* 20-10-01. *Telex:* 054221. *Cables:* Gdyport. *Contact:* Mieczyslaw Wilczewski, Director General.

Harbour Master's Office, *Tel:* 216636 and 202853.

AGENT: See "Szczecin".

SZCZECIN: 53.25 N. 14.32 E. (See Plan
Including Swinoujscie, 53.55 N. 14.15 E.

DOCUMENTS:

12 copies of Cargo Manifests.
2 copies Bills of Lading.
Tonnage Certificate.
4 copies of Crew List.
Passenger List.
Maritime Declaration of Health.
Derat Certificate.
Specification of Dangerous Cargo (even if in transit).
2 copies Stowage Plans.

PILOTAGE: Contact pilot station, VHF Channel 12 and 14, also 26 27. Harbour Master's office, Channel 12. Light and sound signals use according to international rules. The Pilot is taken on board at th anchorage. Pilot compulsory for all vessels over 150 g.r.t.

Also see "Baltic Deep Sea Pilotage" – Page 174.

RESTRICTIONS: Vessels exceeding LOA 175 m. enter/leave po during daylight only.
Power Cable: An overhead power cable (clearance 64 m.) has bee established in position Lat. 53° 31.55′ N., Long. 14° 37.88′ E. Lat. 53° 31.72′ N., Long. 14° 38.35′ E.
MAX. SIZE: *Szczecin:* Max. draft 30 ft., Max. length 206 m.
Swinoujscie: Max. draft 42 ft., Max. length 235 m.
HEALTH: All ships arriving Szczecin from South of Cape Finistere ar subject to sanitary inspection.
RADIO: Szczecin Radio, SPE, 2182 kHz. Medium frequencies.
TUGS: Normally tugs join the vessel at the limits of the port of Szczec to Kra Quay.

For ships calling at General Cargo Port which exceed 1,000 g.r.t. 1 tug compulsory.

For ships calling at Bulk Cargo Port which exceed 2,000 g.r.t. – 1 tu compulsory.

For ships over 4,000 g.r.t. – 2 tugs compulsory.

For ships over 12,000 g.r.t. – 3 tugs compulsory.

Marine Radio Service: "MORS" Morska Obsluga Radiowa Statkow. All services to any radar, radio or navigation equipment – orders via Morska Agencja Szczecin.

Compass adjusting available. Chart corrections possible. British Admiralty and Polish charts available.

STORING: See "Prelims".

1. Vessel can be stored by barge/motorboat/or truck.
3. Trucks can proceed alongside at the berth. Vessel can store from barge/trucks during loading/discharging operation using her derricks or port crane.
5. Customs Office must be informed about storing.
6. Local riggers (strictly port's workers) can be employed to assist with storing.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Each crew member must be in possession of a valid Discharge Book and will receive a separate shore permit issued by the Immigration Authorities entitling him to go ashore within the city area.

SHIP SUPPLY SERVICE: Supplied by Agent.

DEVELOPMENTS: The Szczecin port has been in the main developed as a general cargo port. A main investment effort has been directed toward an establishment of a modern general cargo potential. New berths and terminals working on the "Roll-on/Roll-off" and "Lift-on/Lift-off" system will be built. The investment will comprise: berths, storage space, cranes, trucks and the other equipment for transhipment of conventional and containerised general cargo.

The Port of Swinoujscie is still being built in as a bulk cargo harbour, capable of serving large vessels. Simultaneously the port will be developing ferry services. A modern ferry terminal built in 1972-1973 is under further development and a target project stipulates 4 berths and 10 arrivals and departures per day.

Fertiliser plant under construction at Police. For vessels up to 38,000 d.w.t.

AUTHORITY: Port of Szczecin – Swinoujscie Authority, 7 Bytomska Street, 70-603 Szczecin, Poland. *Tel:* 430-31 (for further connections). *Telex:* 422108 Zp Pl. *Cables:* Zetpees Szczecin. *Contact:* Mr. Jurand Kobylarz, Operational Director.

Harbour Master's Office of the Port of Swinoujscie supervises the traffic of ships and the observance of harbour rules in the Port of Swinoujscie.

AGENT: G.A.C. Norpol Shipping Ltd. Sp. z o.o., Malopolska 17, 71-515 Szczecin, Poland. Tel: 440-11, 305-390. After office hours 523-541, 221-007. Telex: 422797 Gacno Pl. Cables: "Confidence", Szczecin.

NOTES

Please also advise Shipping Guides Ltd.

Portugal

AVEIRO: 40.39 N. 08.45 W. (See Plan)

PORT LIMITS: A vessel is considered "arrived" when she is 3 miles from the piers.

DOCUMENTS:
5 Crew Lists.
4 Lists of Passengers Disembarked.
2 Lists of Passengers in Transit.
5 Cargo Manifests.
1 Manifest of Cargo in Transit.
1 Provisions List and Spares.
2 Health Certificates.
2 Dangerous Cargo Lists (when applicable).
2 Lists of Articles held by the Crew.

PILOTAGE: Compulsory for vessels of 200 g.r.t. and above.
Pilots address: Departmento de Pilotagem do Porto de Aveiro - Barra - 3 830 - Ilhavo.
Telephone: 369 429.
Telex: 37 338 Inppda p.
Telefax: 369 244.
VHF: Channels 14 and 16.

At least 3 hours notice of ETA required by VHF or telephone.

In normal conditions of weather and sea, the area of boarding is usually 1 miles N.W. of North Pier. If not possible to board in this area the pilot boat will guide the vessel across the bar. If weather and sea do not allow this, vessel will be guided by VHF Channel 14 and take the Pilot between piers.

There are 3 pilot boats, one of 18 m. and the other 12 m. length, both have black hull and white superstructure, identified with a "P", and another fast boat totally white. All boats display a white flag surrounded by narrow blue strip, with a black "P" in the centre.

ANCHORAGE: West of North Pier, at a distance of about 1.5 miles.

RESTRICTIONS: Depth at bar 5.0 m. to 8.0 m. Tidal variation 3.0 m. Entering and sailing only during daylight. No entry during thick fog.

MAX. SIZE: LOA and draft are regulated by Port Captain's Notice No. 5/89.
North Terminal: Length 120 m., draft 6.0 m.
South Terminal and Industrial Port (tankers): Length 90 m., draft 5.2 m.

HEALTH: Usual international health regulations to be observed. Free Pratique automatic for vessels coming from other Portuguese ports.

RADIO: Aveiro Pilots Radio on VHF Channels 14 and 16. Radio station is Lisbon Radio.

VHF: See "Pilotage".

RADAR: Pilot boat has radar that can assist vessels during approach to harbour entrance.

TUGS: Two tugs available, "Foz do Vouga" with 400 h.p. and "Espreita" with 475 h.p.

BERTHING:

	Length (m.)	*Depth at LW* (m.)
North Terminal	500.00	8.0
South Terminal	400.00	5.5
Industrial Port:		
Petrogal (GALP) Wharf	35.00	7.0
E/PI Wharf	41.50	7.0
F/PI Wharf	49.00	7.0
Fishing fleet port	25.90 – 45.00	3.0 – 5.0

CRANES: *North Terminal:* 6×12 ton and 1×39 ton electric cranes.
South Terminal: 4×6 ton and 2×12 ton electric cranes.
Mobile cranes: 2×3 ton, 6×7 ton, 7×16 ton, 1×50 ton, 1×100 ton.

BULK CARGO FACILITIES: Petro chemicals at Industrial Port. Grabbing cranes at North and South Terminals of up to 9.0 cu.m. capacity.

SPECIALISED CARGO - HANDLING FACILITIES: There is a Ro/Ro berth at the Northern part of North Terminal.

STEVEDORES: Advise agent 24 hours before vessel's arrival.
Working hours: 0800 – 1700 hrs., overtime possible.

MEDICAL: Hospital and clinics in town. Advance notice not required. Required vaccination certificate, and when ship comes from affected regions, also yellow fever certificate.

TANKERS: Private quay of Petrogal/GALP used by small-sized tankers. Two Port Authority quays for tankers, wine, liquid combustibles and chemicals. No facilities for dirty ballast.

DENSITY: About 1025.

FRESH WATER: Supplied from quay at 20 t.p.h. or by road tanker.

FUEL: Only diesel available. Smaller quantities supplied from road tankers. Otherwise, from GALP's private quay (pipeline).

CONSULS: Nearest Oporto, 60 km.

REPAIRS: All types of repairs can be carried out.

DRY DOCKS: 1 Dry dock (100 m.×18 m.) for vessels up to 3,000 d.w.t. and 1 floating dock for vessels up to 1,200 d.w.t.

SURVEYORS: Cargo and ship surveyors available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: By crew.

REPATRIATION: Possible. If crew member has letter from Master of vessel, 40% discount allowed on fare.

AIRPORT: Oporto Airport (Pedras Rubras) at about 80 km. Lisbon Airport (Portela) at about 250 km. Both served by regular airlines covering all the world.

TIME: From October to April: GMT; April to October: GMT plus 1 hour.

HOLIDAYS: New Year's Day; 1st April; Liberty's Day (25th April); Portugal's Day (10th June); Workers' Day (1st May); 12th May (Local Holiday); 2nd June; 10th June; 15th August, (Religious Holiday); Corpus Christi (movable); Proclamation of the Republic (5th Oct.); All Saint's Day (1st Nov.); Independence of Portugal (1st Dec.); Immaculate Conception (8th Dec.); Christmas Day. No work allowed on Christmas Day and New Year's Day.

CUSTOMS ALLOWANCES: 125 grams tobacco, and 1 bottle wine/spirits for each man.

POLICE/FIRE/AMBULANCE: Call 115 for all services.

TELEPHONES: Not available on board.

SERVICES: Ship repairs, fresh water, towage, provisions, repatriation, gyro/radio repairs, fumigation, bunkering, medical, surveys, divers.

BANK: Lloyd's Bank. All Portuguese Banks.

STORING: See "Prelims".
1. Yes.
2. No interference with cargo work.
3. Yes.
4. Yes.
5. –
6. Yes.

SHIP SUPPLY SERVICE: Available. Contact agent.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Crew members going ashore will need a special card issued by Customs Officer and Maritime Authority. Ship's Agent takes these cards aboard, where they are completed in accordance with Crew List. See "Lisbon".

DELAYS: As a tidal port, arrivals and sailings are subject to tides. Delays may occur owing to bad weather, especially during the Winter months.

DEVELOPMENTS: Dredging harbour entrance.
Construction of container terminal.

AUTHORITY: Junta Autonoma do Porto de Aveiro, Avenida Dr. Lourenco Peixinho 110-2, 3800 Aveiro, Portugal. *Tel:* (034) 24091/92. *Telex:* 37379 Japa P. *FAX:* (034) 23 424. *Contact:* Eng. Lauro Marques, Port Director. Eng. Jose Mota, Port Engineer. Alberico Henriques, Dock Master.

FIGUEIRA DA FOZ: 40.09 N. 08.52 W. (See Plan)

DOCUMENTS:
Health Certificate (Pilot supplies form).
5 Crew Lists.
4 Lists of Passengers Disembarking.
2 Lists of Passengers in Transit.
5 Cargo Manifests.
1 Manifest of Cargo in Transit.
Provision and Spares List.
2 copies each Bill of Lading.

PILOTAGE: Compulsory. Send ETA to Agent by cable 24 hours before arrival. Vessels should arrive 2 hours before high tide. Call Figueira Pilots on VHF Channel 16, from 0900 hrs. – 1700 hrs.

Await Pilot 0.5 miles from the piers.

ANCHORAGES: South of N.W. Azimuth of North Pier, at a distance of more than 0.5 miles.

RESTRICTIONS: No service available at the following times:
1st October – 30th April, between sunset and sunrise.
1st May – 30th September, midnight to sunrise.

MAX. SIZE: Max. draft 14 ft. Max. length 90 m.

HEALTH: Free Pratique authorised for vessels coming from other Ports in Mainland Portugal. For vessels coming from other countries, Health Declaration supplied by the Pilot must be filled in.

RADIO: Radio Figueira listens on VHF Channel 16, Monday – Friday from 0900 hrs. – 1200 hrs. and 1400 hrs. – 1700 hrs.

Figueira Pesca listens on VHF Channels 16 and 3, from 0600 hrs. – 2400 hrs.

TUGS: 1 × 396 h.p.

BERTHING: The port is in the mouth of the Mondego River. The anchorage is in sand and outside the harbour.
Concrete Quay: Length 460 m. Depth 14 ft.
Tidal Harbour: Water area 6 ha. Length of quayage 600 m.
Depths on Bar: MHWST 3.8 m. MHWNT 3.00 m.
There is about 2,000 m. of quayage for small ships and fishing craft.

CRANES:
4×6 tons at 24 m. (electric)
12 tons at 20 m.
3×3 tons at 24 m. (electric)
6 tons at 20 m.
1×1.5 tons at 24 m. (electric)
3 tons at 16 m.
1×2.3 tons at 16 m. (mobile)
16 tons at 3 m.
8 × fork lift trucks.

STEVEDORES: Advise Agent 24 hours before arrival.

MEDICAL: No prior advice is necessary. All medical facilities available.

DENSITY: About 1028.

FRESH WATER: Each quay has its own installations.

FUEL: Only diesel available.

CONSULS: France, Spain and United Kingdom.

REPAIRS: There are two shipyards and repair facilities, also a slipway for ships up to 4,000 tons.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Work usually done by crew.

CUSTOMS ALLOWANCES: No limit, but must be declared.

REPATRIATION: No difficulty in crew repatriation.

TIME: From last Sunday in September till last Sunday in March GMT and the rest of the year GMT plus 1 hour.

HOLIDAYS: New Year's Day; Good Friday; 25th April; 1st May; Corpus Christi (movable); 10th June; 24th June; 15th August; 5th October; All Saint's Day (1st November); 1st December; 8th December; 24th December; 25th December.

POLICE/FIRE/AMBULANCE: Police 22022; Ambulance 115; Fire 22122 and 22030.

SHORE LEAVE: Crew allowed ashore.

DELAYS: As a tidal port, arrivals and sailings subject to tides. Delays may occur owing to bad weather, especially during Winter months.

IDENTIFICATION CARDS: See "Lisbon".

DEVELOPMENTS: Dredging in progress.

AUTHORITY: Junta Autonoma do Porto da Figueira da Foz, Rua Engenheiro Silva 98, 3080 Figueira da Foz, Portugal. *Tel:* (033)22365, 22366. *Telex:* 52339 Porfig P. *FAX:* (033) 23945. *Contact:* Joao de Oliveira Barrosa, Managing Director.

AGENT: A. J. Goncalves de Moraes, Lda., 262-Rua da Republica, 3080 Figueira da Foz – Portugal. Tel: 22584. FAX: 20543. Telex: 53017. Cables: Amoras. After office hours: 25016 and 24666 ("Aveiro" network). Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

LEIXOES and OPORTO (Douro River): (See Plan)

Leixoes: 41.11 N. 08.43 W. Oporto: 41.09 N. 08.37 W.

DOCUMENTS:

Health Certificate.

5 Crew Lists.

Provision List — ship and individual.

Tobacco Declaration and Entrance Forms supplied by Agent on arrival.

5 Manifests and 2 copies of each B/L concerning cargo to be discharged.

1 Transit Manifest if cargo in transit exists.

PILOTAGE: Pilotage is compulsory for entry and leaving, with the exception of coastal vessels and national flag craft up to 500 g.r.t., coastal and local fishing vessels and pleasure craft. Available day and night in Leixoes, but in Oporto only between sunrise and sunset, and then dependent upon sea conditions. Vessels must communicate their ETA a minimum of 12 hours ahead and confirm again 4 hours in advance. Departures must be communicated 2 hours ahead between 0800 and 1800 hrs. This must be done via the Radar Station.

Pilot boat recognition:

By day – black hull, with the letter "P" painted in white. Also a flag may be hoisted which is white, lined in blue, and with a black letter "P" in the centre.

By night – a white light at the top of the mast forward and lower down a red light.

Call-up signals by ship's siren:

To call Pilot – Letter "G" in morse, or Letter "O".

To call pilot launch – Letter "O" in morse.

VHF: Pilots on VHF Channels 9, 12, 13 and 16.

APPROACHES: *Leixoes:*

By day: Vessels coming from the North should take due heed of the Orca Rock situated 1,300 m. beyond the Northern Quay on the parallel 41° 10′ 37″ N. and should pass to the South of the breakwater light.

By night: Vessels approaching the port should be guided by the lights of the breakwater and then by the lights of the lighthouse, positioned at the heads of the North and South Moles of the Port, placing the Leca lighthouse in the middle of them.

Entrance Channel: The width of the port entrance between the heads of the breakwaters is 220 m.; in the foreport the channel widens to 500 m., from the entrance for 240 m. and is reduced again towards the entrance of Dock No. 1 to 113 m. By dredging, the depths are maintained at 10 m. The width of the entrance to Dock No. 2 is 58 m.

ANCHORAGES: *Douro River:*

Outside the port: Vessels may await entry, anchoring to the North of the alignment of the bar entrance lights of the Douro River in an area defined by the alignments of the Leca lighthouse, and the N.W. side of the Leixoes mole. In this area the depths vary between 16 m. and 21 m.

The anchorage is not safe in certain weather conditions.

Inside the port: Vessels can anchor with 2 anchors at the bow and 1 small anchor at the stern, and even by passing lines ashore at the following points: Alfandega, Cabrea, Pedras, Bicalho, Gas, Lugan, Carbonifera, Gaia and Monchique.

Leixoes:

Outside the port: Vessels can await entry, anchoring outside a radius of half a mile from the head of the breakwater to the West, and with an Eastern limit as the alignment of the Leca lighthouse with the breakwater light itself.

Anchorage is not safe during bad weather.

Inside the port: Vessels can anchor in the foreport.

MAX. SIZE: *Douro River:* Permitted draft on entering the port, variable with the state at the bar is from 18 to 19 ft. (HWST) and 16 to 17 ft. (HWNT).

The height of the tide of the port is: Average during Spring tides 2.30 m; average during Neap tides 1.80 m.

At times and particularly during the months of January, February and December, normal movement of vessels is affected by the rough sea which in conjunction with the river current causes frequent variation, both in the width and in the depth of the access channel, and necessitates annual dredging in order to guarantee conditions of navigability.

Leixoes: Cargo vessels 31 ft. Also see "Tankers".

RESTRICTIONS: *Douro:* Subject tide and bar conditions.

The main alignments of the bar, are as follows:

1. Tres Orelhas (a pillar with 3 battlements on the upper part, located at Sobreiras) or Marca Nova do Mato, on the Anjo (an archway on the Tower of S. Miguel da Cantareira);

2. Tres Orelhas by Marca Nova da Cantareira (light on iron column).

Marking of navigation channel – The channel is defined by 7 buoys.

HEALTH: Free Pratique authorised for vessels coming from other ports in mainland Portugal. For vessels coming from other countries Health Declaration supplied by the Pilot must be filled in, and delivered to the Agent. Radio Pratique also available.

RADIO: *Leixoes Naval Radio Station:* Operated by the Leixoes Port Captaincy, working with permanent listening-watch on 2182 kHz for aid to navigation; receives and listens on frequencies 2182, 2097, 2566, 2657, 4474.5 and 7510 kHz. Transmits weather report and Notices to Mariners by radiotelephony for the coastal strip for a distance of 50 miles to seaward of the coast of Portugal at the times 0735 Z, 1005 Z, 1935 Z, 2205 Z, on frequency 2657 kHz.

It listens out permanently on VHF Channel 16 (156.80 MHz) for aid to navigation and has working Channels 11, 13, 19, 39 and 60.

RADAR/VHF: *Leixoes Radar Station:* Operated by the Administration of the Ports of the Douro and Leixoes, it is equipped with radar for control and support to navigation, and has a range of 18 miles. It also has VHF equipment, permanently listening out, working on the 156 – 175 MHz band, it being possible for any vessel, up to a distance of 50 miles to contact this station for identification, port matters and meteorological information. The listening Channels are 11, 12, 13, 16, 67 and 68.

TUGS: Normally join the vessel.

At Leixoes: 6 tugs, 875–2,800 h.p. In the outer harbour up to 700 g.r.t., no tug required; from 700 up to 1,800 g.r.t. 1 tug compulsory. Over 1,800 g.r.t., 2 or more tugs required.

At Douro River: As a rule service necessary on arrival/sailings. Thus they join the vessel after passing the bar.

Report: 1986. Vessel: 77,000 d.w.t. 6 tugs required for berthing and 4 tugs for unberthing. The Port of Leixoes tugs were too small so 2 tugs ordered from Lisbon and 2 tugs ordered from Setubal. This can be costly as time starts from departure Lisbon/Setubal.

BERTHING: *Douro River:* Gaia Quay: Length 280 m. Depth 18 ft. Estiva Quay: Length 80 m. Depth 11 ft. – 17 ft. Porto A Quay and Alfandega Quay are for small craft only.

In addition there are private facilities of Secil (4 cement silos, total capacity 12,000 tons), Leiria Cement Company and Mobil.

Outer Harbour: The depth of water at the entrance and in the centre of the outer harbour is 10.00 m. at MLWST; Maximum rise of tides 3.99 m.; Minimum rise of tides 0.07 m.; Total water area 117.36 ha.; Breadth of entrance (harbour) 220.05 m.; Breadth of entrance (Dock No. 1) 113.00 m.

Dock No. 1: Length of North Quay 487 m.; South Quay 551 m.; Maximum draft 29 ft.

Dock No. 2: Length of North Quay 670 m. and South Quay 743 m.; Maximum draft 31 ft.

South Mole: Length of Quay 370 m.; Depth 20 ft.

Ro/Ro Terminal: Quay with a usable length of 145 m. and max. depth of water of 18 ft.

CONTAINER HANDLING FACILITIES: *South Side:* 400 m. of usable quays with a depth of 39 ft. The total open storage area for containers is 5.5 hectares. It is equipped with a jib crane with a 35 ton capacity and a reach of 30 m., 2 Transtainers with 35 ton capacity and 40 m. reach, 3 Karricons for container movement with a capacity of 30.48 tons and 8.44 m. lift, 2 Valmets with a capacity of 30.48 tons and 9.0 m. lift, 2 side loaders with a capacity of 30 tons and 5.27 m. lift and front loading stackers, 3 with a max. capacity of 12 tons and a max. lift of 6.2 m. and 3 with a capacity of 15 tons and 3.05 m. lift.

North Side: 360 m. of usable quay with a depth of 30 ft. Its usable open area for containers is 1.55 hectares. It is equipped with two quay jib cranes with 35 ton capacity and 30.1 m. reach and 5 transtainers with a capacity of 35 tons and various reaches. Also available are 15 semi-trailers for container transport with a capacity of 50 tons.

CRANES: *Leixoes:* Dock No. 1: 1×94 tons on the North side and 8×3 tons and 2×5 tons on the South side.

Dock No. 2: 2×15 tons and 13×5 tons on the North side, and 1×31.8 tons and 18×5 tons on the South side.

South Mole: 6×5 tons.

Douro: Gaia Quay: 2×1.5 tons, 1×3 tons and 1×5 tons.

Porto A: 3×2 tons and 2×3 tons.

Customs Quay: 1×1.5 tons, 1×2 tons, 1×7 tons.

TANKERS: *Terminal Operator:* Petroleos de Portugal E.P. (Petrogal).

Pier A: Max. d.w.t. 120,000 tons. Depth of water: 12.0 m. Max. draft: 43 ft. (with dredging). Max. draft in April 1988 – 36 ft. At times max. draft is 37 ft. – 42 ft. Max. length: 223 m. Daylight berthing only.

Products Handled	Capacity t.p.h.	Hoses (in.)
Crude Oil	10,000 disch/2,000 load	4×12
Gas Oil	1,500 load	1×12
Fuel Oil	2,000 load	1×12, 1×10
Naphtha	1,200 load	1×10

Pier B: Max. d.w.t. 27,000 tons. Max. draft: 30 ft. Max. length: 200 m. Berthing at night possible. Depth alongside 9.0 m. Depth in approaches 7.7 m.

Products Handled	Capacity t.p.h.	Hoses (in.)

LISBON: 38.42 N. 09.11 W. (See Plan)

LOCATION: Lat. 38° 42′ 30″ N., Long. 9° 11′ 10″ W. Capital and principal port of Portugal.

PORT LIMITS: A vessel is considered to be an "arrived vessel" when, after entering the Tagus Estuary, she has left behind the alignment between the Torre of S. Juliao and the Torre of Bugio.

DOCUMENTS:

Health Certificate.
6 Crew Lists.
10 Passenger Lists.
2 Lists of Articles held by the crew: cameras, binoculars, radios, cigarettes, spirits, etc.
2 Stores Lists.
All to be signed by ship's Master.

Certificates for vessels up to 500 tons: – Tonnage Register, Loading and Navigation Certificates.

For vessels over 500 tons: – Tonnage Register; Load Line; Radio; Safety Equipment and Navigation Certificates.

Cargo Documents:

10 Manifests.
3 sets of Bills of Lading.
For cargo in transit: 2 Manifests.

PILOTAGE: Compulsory. Cascais is the main station for Pilots at Lisbon. There is another station on the Tagus, near Belem Tower. The charge varies according to the tonnage of vessel, from $100.00 in or out for vessels up to 100 tons to $4,000.00 for vessels of 185,000 tons. At night, plus 50%. These charges are obligatory whether Pilots are employed or not (tourist vessels half rate). Exemptions from payment are as follows: Vessels calling solely to land sick crew or passengers, or vessels made to shift by order of the Port Authority, half rates for pilotage in creeks of River Tagus. Reduction of 50% as follows: (1) Tourist vessels; (2) vessels calling solely for supplies of provisions, fuel or water; (3) vessels calling for shelter only. The attendance of Pilots at all movements inside the River Tagus is compulsory.

For this assistance (mooring or unmooring and shifting in the harbour) the charge varies.

APPROACHES: The Port of Lisbon is situated on the Tagus estuary which is 25 km. long and between 2 km. and 14 km. wide with a highest tidal rise of 4.4 m. At the bar which gives access to the port is a channel with a depth of 13 m. (16 m. at HT).

MAX. SIZE: See "Berthing".

HEALTH: Ordinary visit made at central area with vessel anchored, from 0800 hrs. to 1900 hrs. Master may ask for Free Pratique to get ship moored immediately on arrival. For this, necessary to cable the Health Authorities, addressing cable as follows: Sanidade Maritima de Lisboa, Rocha do Conde de Obidos, maximum 15 hours and minimum 4 hours prior to the ship's arrival. Text of cable: "ship's name, nationality, code (MIBDU), day and time of arrival" signed by the Master.

VHF: Channels 1–84 used in the port. Pilots on Channel 14, Port Authority on Channels 16-68, Maritime Police on Channel 19. Ship-to-Ship on Channels 06 and 08. Tugs on Channels 09, 10 and 69.

BERTHING:

Accommodation: The port wharves have an overall length of 13,000 m. on the North Bank with water depths varying between 4 m. and 13 m. On the South Bank the wharves have a total length of 3,000 m. with depths of from 3 m. to 13 m. Total covered warehouse area, 220,000 sq.m.

*Possible depths are shown. For clarification of usable depths at specific times the Port Authority should be consulted.

**Berth has dolphins which permit vessels of up to 25,000 d.w.t. to berth.

RADIO: ETA to be advised by Master, to Agent, 24 and 12 hours before ship's arrival.

TUGS: 5×420 h.p. – 2,500 h.p.

PORT EQUIPMENT/FACILITIES:

45 electric cranes on rails, capacity 1.5 tons – 12 tons, outreach 13.5 m. – 32 m.

3 Coles mobile cranes with capacity 15 tons and 75 tons.

3 container cranes with 30 tons, 30 tons and 35 tons capacity.

3 fork stackers with 2 tons, 2.2 tons and 4.5 tons capacity.

4 tractors, 5 tons capacity.

29 trucks, 1×40 ton Ro-Ro, 11×50 tons and 17×32 tons capacity.

7 transtainers for 20 ft., 30 ft., 35 ft. and 40 ft. containers.

10 stackers, 12 tons – 40 tons capacity.

1 heavy lift crane, capacity 488 tons.

3 floating cranes, capacity up to 100 tons.

Tank Cleaning Station: Located at Porto Brandao; belonging to LISNAVE. It has 2 Dukes of Alba 120 m. apart, a service platform with 5 mooring points for vessels up to 60,000 d.w.t. and depth of 12 m.

The station occupies an approximate area of 60,000 sq.m. and has a storage capacity of 20,000 tons of oil and residue.

Cold Stores: Apart from the warehouses of the fish dock, there are those of FRISSUL – Entrepostos Frigorificos Lda. (Olivais) with a capacity of 15,000 tons, and Sociedad Continental de Alimentacao (Jardim do Tabaco) with 2,300 sq.m. and Companhias Reunidas de Congelados e Bacalhau (Alcantara) with 9,500 tons.

CONTAINER HANDLING FACILITIES: *Container and Ro/Ro Facilities:* The Santa Apolonia Container Terminal, which is operated directly by the Port of Lisbon Authority has 870 m. of quay length, 8 m. to 9 m. depth alongside, 8 ha. of storage and is equipped with three Mague 35 ton capacity container gantries. There are 5 Paceco 35 ton capacity rubber-tyred transtainers, 2 mobile cranes, 8 frontal stackers and 30 tractors and trailer units. Their maximum handling capacity reaches 120,000 containers/year.

The Alcantara-Sul Ro/Ro terminal, operated by Liscont, concessionnaire with German participation (of Eurokai, container operator in the Port of Hamburg) counts with 650 m. of quay length, 10 m. to 13 m. depth alongside and 8.5 ha. of storage. This terminal still under development, is equipped with 2×45/60 ton gantry cranes. The round the clock service after having been established, as foreseen, in this terminal, whose main scope is the development of a complete transhipment service, will enable it to handle from 130,000 to 150,000 containers a year.

2 Roll-on/Roll-off terminals at Alcantara for ferry boats and cargo. Ramp capacities 60 tons and 100 tons.

BULK HANDLING FACILITIES: *Ore and Bulk Cargo Facilities:* A grain silo of 110,000 tons capacity is sited at Poco do Bispo with unloading by elevator at 1,000 t.p.h., operated by SILOPOR.

Trafaria Grain Silo, also operated by SILOPOR has a main jetty with close water depths of 14 m. – 17 m. and silos with capacity for 200,000 tons, being considered one of the largest in Europe. Intake Jetty: 2×120,000 d.w.t. vessels (17.2 m. depth) on outside and 1×60,000 d.w.t. (13.2 m. depth) on inside. 3 unloaders, combined rate 3,000 t.p.h. (3×1,000 t.p.h.). Export Quay: Length 240 m. Depth 13.5 m. Can receive vessels up to 30,000 d.w.t. Loading 2,000 t.p.h. (4×500 t.p.h.).

The Palenca Terminal for oleaginous cargo (soya oil), etc., operated by Tagol, has a storage capacity for 90,000 tons of seed and includes a factory for edible oil with silos of 20,000 cu.m. capacity.

A cement storage terminal operated by Secil is available at Poco do Bispo, and, at Alhandra, another cement terminal is operated by Cimpor. At Barreiro, iron ore is discharged for the steelworks at Seixal.

STEVEDORES: Ordered by Agents according to berth and cargo.

MEDICAL: Masters to advise by radio prior arrival if medical attendance required on board. Hospital facilities available.

TANKERS: Shell and Petrogal berths exposed to 9 knots HWST current. Essential to use good new mooring lines.

Cabo Ruivo Terminal: This is operated, on a concession basis, by Soponata and has depths of 11 m., capable of mooring tankers up to 65,000 d.w.t. alongside its jetty.

Fuel Oil Facilities: The Port of Lisbon fuel oil installations belong to private companies and are concentrated along both banks of the Tagus at the following points:

Sacavem and Cabo Ruivo (with oil refinery facilities), Montijo, Barreiro, Santa Iria, Porto Brandao, Porto dos Buchos.

Also see "Berthing".

Report: *Cautionary Advice:* The entrance to the River Tagus (Rio Tejo) is fully exposed to the Atlantic Ocean, especially from the S.W., and heavy, breaking seas are experienced at the Bar during and after Western semi-circle gales. The worst conditions arise during Southwesterly gales on an ebb tide. During a maximum of 30 days per year Pilots cannot board in the normal boarding area. The channel through the Barra Grande, the normal entrance for larger ships, is poorly defined. The 047° leading lights Esteiro and Gibalta have little sensitivity at the Outer Reaches of the channel and can be obscured by poor visibility and Pilots usually use radar to identify ship's position. Day marks using a beacon on Mama Sul in line with beacons at Caxias and at Boa Viagem delineate the Northern and Southern extremities of the channel only after crossing the Bar where the dredged width is only 200 m. wide and unmarked. The flood tide sets on to Forte Bugio and Cachopo do Sul, the ebb tide sets on the Cachopo do Norte. When approaching the pilot station at Cascais from the South and when proceeding from the pilot station to the entrance channel care must be taken not to be set on to Cabeca do Pato.

The channel is dredged to 13.0 m. chart datum.

Fishing boats operate in the Outer Reaches and to seawards of the channel in fine weather, sometimes without lights at night.

Pilotage: Pilots board from small boats launched from the cruising pilot cutter. A good lee is required. Pilot hoists are acceptable but if no hoist is available on ships with over 9 m. freeboard, accommodation ladder combined with pilot ladder is required. If weather is too bad for boarding in the Cascais Bay area the cruising pilot cutter will sometimes lead a ship through the Barra Grande to pick up its Pilot off Ponta de Lage. The pilotage service at Lisbon is operated as an association of self employed Pilots. There are at present 70 Pilots. For the first two years after recruitment Pilots are restricted in the size of ship they may handle to 10,000 g.r.t. after which they become unrestricted. Special Pilots are used to handle ships into and out of Lisnave Shipyard.

Traffic Control: Port Regulations lay down certain traffic priorities and other controls that are exercised by the Pilots.

Anchorages: When weather stops the pilotage service it is usually unwise to anchor at the mouth of the River Tagus.

The main anchorage within the port is at the confluence of the Cala de Samora and the various channels S.E. of the City of Lisbon. Anchor berths are numbered and these are shown on BA Chart No. 3264. This is a good sheltered anchorage.

When the main anchorage is full, ships are anchored on the South side of the river, immediately seaward of the bridge across the Tagus.

Another anchorage used is on the North side of the river, about one mile North of Bico da Calha at the entrance.

Trafaria Terminal (Esso): Cautionary Advice: The berth is subject to silting, therefore, ensure that the ship's draft is no more than advised.

Swell is sometimes felt at the Trafaria Berth.

As at all riverside berths in Lisbon, the current is strong particularly on the ebb tide.

DENSITY: 1025.

FRESH WATER: Usually supplied by barge unless vessel lying alongside a pier where water provided.

FUEL: Shell, Esso, Petrogal. These companies can supply through their own barges or alongside their private bunkering stations on pier.

CONSULS: Most countries are represented in Lisbon.

REPAIRS: There are several repair workshops. The biggest is Lisnave Shipyard with several docks, one for vessels up to 300,000 tons and a new dock where vessels up to 1,000,000 tons can be repaired.

REPATRIATION: No difficulties for crew changes or repatriation.

AIRPORT: Within the Lisbon area. Regular International services.

TIME: End September-end March – GMT. End March-end September – GMT plus 1 hour.

HOLIDAYS: 1st January; 1st April; 25th April; 1st May; 2nd June; 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December.

POLICE/AMBULANCE/FIRE: Maritime Police 607732; Ambulance 115; Fire 322222.

IDENTIFICATION CARDS: Crew members going ashore will need a special yellow card issued by Agent and stamped with police visa. The cards are supplied by Agent to be completed on board in accordance with crew list particulars. With these shore passes crew members may circulate between Lisbon and Cascais, and Lisbon and Sintra.

Master and/or Owners will be fined Esc. $1,000 for any crew member found ashore without that card. A double fine will be imposed in case of recurrence.

Similar cards, but white, are required for passengers in transit.

AGENT: A. J. Goncalves de Moraes, Lda., 22 Rua do Alecrim – P.O.Box 2772 – 1119 Lisboa Codex. Tel. 3464943 (4525970 after office hours). Telex: 12296A, B & C. FAX: 371669 (direct line). Cables: Amoras. After office hours Tel: 2750594. Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

SETUBAL: 38.30 N. 08.55 W. (See Plan)

DOCUMENTS:

5 Crew Lists.

5 Passenger Lists.

Personal belongings of the Crew (portable radio, binoculars, cameras, etc).

Stores List.

Health Declaration.

For cargo: Dangerous Cargo List, Cargo Manifest, Transit Cargo Manifest (if any) and copy of Bills of Lading.

PILOTAGE: The pilotage service is supplied exclusively by the Departamento de Setubal do Instituto Nacional de Pilotagem dos Portos which runs a permanent service.

To assure prompt attention requests for Pilots must be made in the following manner:

Entries: To send at least 6 hours beforehand a radiotelegram or a radiotelephone message preferably on S.S.B./AM to Pilotos de Setubal giving the name of the ship, ETA and draft.

This information must be confirmed on VHF or MF two hours before the ship arrives at the bar.

Departures and movement in the River: Between 0800 hrs. and 1800 hrs. on weekdays and 0800 hrs. and 1300 hrs. on Saturdays, Sundays and holidays to communicate by telephone or on VHF with the "Estacao de Pilotos de Setubal" at least one hour beforehand, giving the name of the ship, the time and place where the Pilot is required and the service needed.

Only in cases of emergency will requests be accepted outside these hours.

To effect requests for Pilots, the Pilots use the following means of communication:

VHF — Listening permanently on Channel 14 being able to reply on any of the following Channels as requested: 11, 12, 13, 16 and 73.

MF — Listening in permanently on 2182 kHz, replying on 2132 kHz, their working frequency. Once contact has been established ships must change to this frequency. Communications can be made in SSB or AM according to the equipment of the ship.

Telephone No. 22914/26404.

Telex: 43271 Inppds P.

The Pilots embark by motor launch based in Setubal and wait near the fort at Portinho da Arrabida when necessary and the weather permits.

To increase speed and safety on embarking and disembarking, ships of more than 4,000 tons gross, when light, and those of greater capacity in any condition, unless they have a door in the side or other modern means for Pilots to board and leave, and if the weather permits, should lower the gangway to about 3 m. above sea level and fix a rope-ladder so that it stays alongside the lower platform of the gangway.

Bad weather from the South, causing breaking waves at the edge of the shoals, sometimes prevents the pilotage service from operating.

In such conditions, ship must contact the Pilots to discover the state of the bar and limitations imposed on the pilotage service.

ANCHORAGES: Only inside harbour with a Pilot aboard.

RESTRICTIONS: No restrictions on night entry. At low tide vessels only up to 22 ft. draft. Max. draft 27 ft., length/breadth no restrictions.

HEALTH: Free Pratique automatically given when ships come from other Portuguese port. Otherwise, Health Certificate is to be handed over to Health Authorities during clearance procedures.

Maritime Health: This station is located next to the Commercial Dock, Avenida de Luisa Todi 80. Apart from normal sanitary visits, observation of sick crew members, etc., the station issues Derat Certificates to vessels of all nationalities. Tel: 2 39 22.

RADIO: Call through Lisbon Radio.

Coastal radio station known as "Setubal-Pesca", with call sign CUX 9. Listens out permanently on 2182 kHz and replies on 1848 kHz. On receipt of the reply, vessels must change to 2284 kHz.

The station transmits weather bulletins and Notices to Mariners at 1105 hrs. and 1405 hrs., and makes general calls at 0205, 0505, 0805, 1105, 1405, 1705, 2005, and 2305 hrs.

TUGS: 5 available.

BERTHING: All installations are along the right (North) bank of the Rio Sado Estuary.

Outer Berths:

No. 1: Length 60 m. Depth 6.0 m. Located to the West of the Fishing Dock, used for salt traffic but can be used for other goods.

No. 2: Length 120 m. Depth 5.0 m. Located to the East of the Fishing Dock, used for berthing fishing craft.

No. 3: Length 130 m. Depth 7.5 m. Located to the West of the Commercial Dock, used for general cargo.

Inner Berths: Within the Commercial Dock.

No. 5: Length 30 m. Depth 8.0 ft. at LWST. One electric crane with capacity of 1 ton.

No. 6: Length 30 m. Depth 8.0 ft. at LWST. One electric crane with capacity of 1 ton.

Nos. 7 and 8: Both with reinforced concrete frontage. Used for passenger handling.

Fontainhas Quay: Length 610 m. Depth 9.5 m. – 10.5 m. Used for general cargo and served by railway line. Water and electric power points available. 11 electric cranes, 1.5 tons – 25 tons capacity.

Passenger/Ro-Ro Facilities: There is a passenger handling terminal serving ferries. In the Commercial Dock there is a Ro-Ro berth serving vessels running from Setubal to Troia.

Equipment: 6 mobile cranes, capacity 2 tons – 45 tons, 5 stacker trucks (1×22 tons for 20 ft. containers, 1×6 ton and 3×3 tons).

Private equipment also available including 1×50 ton Coles mobile crane, 23 stacker trucks and 9 loading shovels.

Private Facilities:

Secil – Companhia Geral de Cal e Cimento: Length 104 m. Depth 11 m. Products handled: cement, clinker, coal and sand.

Propam – Consorcio Portugues de Panificacao, S.A.R.L.: Depth 6 m. Pontoon quay.

Pirites Alentejanas, S.A.R.L.: Length 125 m. Depth 9 m. Products handled: Pyrites.

Sapec – Societe Anonyme de Produits et Engrais Chimiques du Portugal: Pontoon – Length 80 m. Depth 5.5 m. Quay – Length 100 m. depth 9.0 m. Products handled: Pyrites, clay, phosphates.

Mague – Construcoes Metalomecanicas: Length 91 m. Depth 9 m. Products handled: Cranes, rolling bridges, alternators. Quay can take loads of 10-20 tons/sq.m.

Portucel – Empresa de Celulose e Papel de Portugal: Length 60 m. Depth 5.0 m. Pontoon berth handling paper pulp and raw materials.

Setenave – Estaleiros Navais de Setubal, S.A.R.L.: Construction and repair of vessels. Depth 8.0 m. – 10.0 m.

Eurominas – Electro-Metalurgia, S.A.R.L.: Length 130 m. Depth 11.5 m. Products handled: Ferro-manganese and silicon manganese.

STEVEDORES: Ordered by the Agent some time in advance.

MEDICAL: Prior to arrival and in order not to delay ship's clearance, Master should inform by radio if medical assistance required, this only in case of contagious or epidemic diseases.

TANKERS: Shell Maritime installation with private pier. Discharge lines 4 in., 6 in. and 8 in.

DENSITY: About 1026.

FRESH WATER: Supplied from shore to all piers.

FUEL: Supply points available at Berth Nos. 1, 2 and 3 and Fontainhas Quay.

FIRE PRECAUTIONS: No smoking on deck or piers.

CONSULS:

Finland	Tel. 26018
France	24612
Spain	22018

REPAIRS: All types available. Lisnave Shipyard and Dry Docks at Lisbon within about 50 miles.

Developments: Setenave has built a Shipyard for new building and repairs for very large ships in the estuary of Setubal.

The facilities consists of: 1 dock for ships up to 700,000 d.w.t. 1 dock for ships up to 350,000 d.w.t. New building berth for ships up to 700,000 d.w.t.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: By crew unless otherwise specified in C/P. Stevedores usually help.

CUSTOMS ALLOWANCES: About 200 cigarettes and 2 bottles of spirits per man.

CARGO GEAR: Supplied by stevedores.

REPATRIATION: All facilities.

AIRPORT: Nearest at Lisbon, about 50 miles away.

TIME: GMT from late September to late March. From late March to late September – GMT plus 1 hour.

HOLIDAYS: 1988: January 1st, April 2nd and 25th, May 1st, June 2nd and 10th, August 15th, October 5th, November 1st, December 1st, 8th and 25th.

Movable holidays: February 16th (Carnival), February 7th, 14th and 17th, May 27th, April 3rd and May 22nd.

IDENTIFICATION CARDS: Supplied and filled in by the Agent. Crew members cannot leave Three Castles area (Setubal-Palmela-Sesimbra) without a special permit from Customs Guards obtained through Agency.

DEVELOPMENTS: An LNG terminal is to be built.

AUTHORITY: Junta Autonoma do Porto de Setubal, Rua Antonio do Nascimento 7, 2900 Setubal, Portugal. *Tel:* 20095. *Telex:* 43200. *FAX:* 30992.

SINES: 37.57 N. 08.52 W. (See Plan)

PORT LIMITS:

North: Parallel 38° 03′ N.
South: Parallel 37° 52′ N.
West: Meridian 8° 55′ W.
East: Shore Line.

Vessels considered to be arrived when 3 miles off West breakwater head.

DOCUMENTS:

6 Crew Lists.
6 Stores Lists.
6 Crew Personnal Effects Lists.
1 Health Declaration.
1 Copy Bill of Lading
1 Copy of Manifest.

Ship's papers for clearance: Registry, Safety Construction, Safety Equipment, Safety Radio, Load Line and Derat Certificate.

PILOTAGE: Compulsory. Pilot service available 24 hours a day. To be ordered by Agent. Pilot station keeps permanent watch on VHF Channel 12.

ANCHORAGES:

Vessels up to 20,000 d.w.t.: Between meridian 8° 52.4′ W. and 8° 52′ W. and parallels 37° 56.7′ N. and 37° 56′ N.

Vessels from 20,000 d.w.t. to 150,000 d.w.t.: between lines defined by the following points:

(C)	37° 56.0′ N.	8° 52.0′ W.
(D)	37° 56.0′ N.	8° 52.4′ W.
(E)	37° 55.7′ N.	8° 51.5′ W.
(F)	37° 55.5′ N.	8° 51.5′ W.
(G)	37° 55.5′ N.	8° 52.4′ W.

Vessels of more than 150,000 d.w.t.: Between lines defined by following points:

(F)	37° 55.5′ N.	8° 51.5′ W.
(G)	37° 55.5′ N.	8° 52.4′ W.
(H)	37° 54.0′ N.	8° 51.0′ W.
(I)	37° 54.0′ N.	8° 52.4′ W.

Vessels are advised to contact Sines Pilot Station to confirm positions

STEVEDORES: Stevedores available for handling of stores, spares and small amounts of cargo. Application for stevedores should be made to the vessel's Agent.
DENSITY: 1025.
DIRTY BALLAST: Facilities available for receiving ballast and residue on Berths No. 2, 3, 4, 5, 6 and 7.
FRESH WATER: Available in unlimited quantities. Rate of delivery 60 t.p.h.
FUEL: Supplied by the refinery. Application to be made to the vessel's Agent.
REPAIRS: Repair shops available in Sines. Authorisation for repairs should be obtained from the Port Authority. Application for repair service should be made by the vessel's Agent.
SURVEYORS: Classification Societies represented in Sines and Lisbon.
CUSTOMS REGULATIONS: Same as other Portuguese ports.
REPATRIATION: Possible.
AIRPORT: At Lisbon 165 km. distance. Airfield at S. Torpes (15 km. distance) with 1 weekly flight to Lisbon.
TIME: GMT (U.T.). Except in Summertime (from last Sunday of March to last Sunday of September plus 1 hour).
HOLIDAYS: The Terminal works all days except Christmas Day and New Year's Day.
SHORE LEAVE: Possible. Shore passes issued by Customs.
DELAYS: In Winter, vessels may suffer delays due to bad weather.
SAFETY: The following are some of the safety rules.
Loading and Discharging Operations:

Loading and discharging operations can be commenced only after the Master or his Deputy fills out and signs the Safety Check List.

1. The loading or discharging of static accumulator products such as: Gas oil, Kerosene, Jet fuel, Naphtha, Gasoline, etc., should commence in accordance with the following scheme (a cargo plan of the ship should be produced to the Safety Inspector who, together with the Operations Team Supervisor, will analyse it).

Any loading or discharging shall begin at a slow flow rate (not higher than 1 m./sec.):

(a) In case of loading, and until the ship's lines are full, free from air and water, and the product height in the tank bottom is sufficient (between 0.6 m. and 1 m.) to prevent both air dispersed product particles and liquid surface turbulence.

(b) In case of discharging, until the ship lines and loading arms are full and Refinery confirms that the product is rising in the tank.

Only after beginning in accordance with (a) or (b) above, may the loading or discharging speeds be increased up to 5 m./sec. or to the maximum the ship and Terminal can support, in the event that ship/terminal cannot reach that limit.

2. *Non static accumulator products* (crudes, fuel oil) loading or discharging should commence at a slow rate until:

(a) In case of discharging, the Refinery confirms that the product is filling the tank.

(b) In case of loading, the Chief Officer confirms that product is entering the tank or tanks in accordance with the cargo plan.

As soon as the above conditions are sustained the flow rate can be raised to the required rate.

3. *Loading or Discharging Operations Completion – Pressure Surges:*

The line length between Terminal and Refinery is about 8 km.

The following precautions should be taken while pumping in or off cargoes at high flow rates:

(a) The cargo pump rate should be slowly reduced when finishing or whenever there is a stoppage.

(b) Flow rates should change slowly by controlling the cargo pumps r.p.m.

(c) If the flow rate reductions of loading/discharging operations interruptions are controlled by valves they should be slowly reduced or closed.

Usually motor-valves have an acceptable closing speed which does not cause pressure surges when flow rate reductions of loading/discharging interruptions take place.

Simultaneous loading and deballasting operations are permitted if a previous agreement has been settled between Master and the cargo loader or receiver, with terminal agreement.

Ballast: Ballast in the cargo tanks cannot be pumped out into Sines Harbour waters.

On arrival Masters must declare the ballast loaded in the cargo tanks.

Ballast will be pumped out into inland ballast tanks or will remain on board. Terminal Safety Inspector may request the ballast tank measurements together with the ballast valves sealing.

The permanent ballast can be pumped out to the sea. Before pumping the permanent ballast into the sea, the Master must be sure it is not contaminated. Terminal Safety Inspector may require a sample of the ballast which will be sealed in the presence of the Master or his Deputy.

Crude Oil Washing – Inert Gas: Sines Terminal gives permission for crude oil washing (C.O.W.) during discharging. Permission to be requested through Agent 48 hours in advance.

However, this operation can only be permitted if the ship has an inert gas system in good working condition.

The tank atmosphere will be considered inert when the percentage of oxygen in it is not higher than 8%. Nevertheless, during operations, the oxygen percentage in the tanks cannot be higher than 6%.

If by any means the oxygen percentage increases to over 8% or its evaluation is doubtful, the washing procedures should cease at once.

The washing operations also cease if there are leakages or traces o leakages in the deck lines.

If the condition of the pipes is not satisfactory under a visual inspection the washing is not permitted.

Transhipment: This type of operation in the Sines Harbour is subject to the permission of the Maritime Authority and A.P.S. (Port Administration) who will set up the conditions by which the transhipment should be performed.

When this operation is a ship-to-ship transfer the correct functioning of the inert gas system is compulsory.

During approaching and mooring manoeuvres, ballast, deballasting, internal cargo transfers, bunkering, etc., are not permitted.

If there will be a gas concentration over the ships or the wind velocity is lower than 4 knots, the transhipment will cease.

Also there will be a stopping of the transhipment and separation of the ships if the weather conditions become unfavourable for that type of operation.

All the applicable safety rules should be strictly followed during the transhipment.

Gas Freeing and Cleaning of Ship's Cargo Tanks: Under previous permission of A.P.S. and the Maritime Authority, gas freeing and cleaning can be performed by a ship at anchor.

With bad weather threatening or wind velocity lower than 4 knots these operations should cease.

Cleaning of tanks alongside is possible for ships equipped with iner gas system and fixed washing systems.

Entry of persons inside cargo tanks for cleaning or drying operations not permitted whilst vessel alongside.

LPG tankers can inert tanks on Piers No. 9 or 10. The owner should contact Neste Chemicals, S.A., to agree to the operation.

Bad Weather: When there is bad weather threatening, all operations must cease, the tank lids must be closed and secured and the loading arms disconnected. In the case of bad weather, when it is likely the ship will exceed the safety limits of the loading arms, all operations should be brought to a stop.

Masters are requested to strictly follow the Operations Team Supervisor and/or the Terminal Safety Representative instructions.

Even with surplus mooring lines, there will still be a threat to the ship and/or the Port, and vessel must prepare to unberth.

In the case of a thunderstorm threatening from windward about 5 km. away the operations should cease and tank lids be closed.

Undertow: The Port of Sines, as with any other open port, is subject to the undertow effects. The phenomenon is due to waves which may have their source either in the North or South hemispheres.

At Sines the undertow effects show up between November and March. During that period the Masters must be more concerned about their ship's mooring. If necessary and taking into account the weather forecast for the laytime, Masters will be supplied with special safety instructions.

Foodstuff, Lubricants or Spares: Foodstuff, lubricants or spares can be shipped aft if permission is granted by A.P.S. and the Maritime Authority, after ascertaining that there are no operations on board, that involve tank lids opening or zones with gas concentrations (next to the pump house, blowers, etc.).

With ship alongside, shipping of foodstuff and spares can be done over the quay when the packages can easily be carried by hand.

Metallic objects or steel banded packages should be handled with care to avoid direct contact with the steel deck plate.

A ship with an inert gas system can receive heavy packages for shipping at the stern while loading, discharging or ballasting. If there is no inert system in the ship, packages to be loaded must be held until after loading.

Shipping of foodstuff, spares, etc., whether the ship is alongside or anchored can only be made with permission of A.P.S. and the Maritime Authority.

Watchmen and Crew: Master must maintain permanently on duty, sufficient number of qualified members of the crew to ensure the execution of manoeuvres, operations, to face an emergency and stand guard at the gangway.

Visitors: Persons who are not crew such as family, visitors, technicians, etc., must carry a special permit issued by the ship's Agents.

Permits issued by the Terminal Authority are to be used for circulation in the Terminal premises only.

Visitors on board are the Master's responsibility.

During loading, discharging or ballasting operations visitors are not allowed to stay on the forecastle or amidship, especially women and children.

Crew Identification and Circulation in the Terminal: Crew are requested to keep with them their IDs (especially the yellow pass given by Customs) which must be shown on request to any Terminal Officials.

Crew and visitors are not permitted to walk around the Terminal Zone and when in it Safety Rules in force should be strictly followed.

Mooring Lay Time: The ship is not permitted alongside more than 2 hours after operations are completed.

DEVELOPMENTS: A terminal to receive coal has been constructed and is expected to start operations in 1991.

GENERAL: The anchorages are provisional. No difficulties arise in Summer. In Winter, the decision to anchor is at the option of the Master. It is recommended that in the event of bad weather, anchorage be suspended and that vessels should heave to off the coast.

SHIPMASTER'S REPORT: October 1987 (Updated 1990).
Chart: BA. Chart No. 3276
Documents:
6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
6 copies Cargo Manifest.

Bond not sealed. Shore passes are issued by Customs/Immigration and have to be returned before departure.

Approaches: The approaches are visually identified and on the radar.

Anchorage: Small vessels anchor under the direction of Port Control in approximate position Lat. 37° 56.5′ N., Long. 08° 52.2′ W. between the Petro Chemical Terminal and the new Coal Harbour breakwater. The anchorage is relatively sheltered.

In fine weather the Pilot boards off the Molhe Oeste Buoy and in bad weather inside the main breakwater. The Pilot boards from a pilot boat and is available throughout 24 hours for berthing and unberthing. Pilot may be contacted on VHF Channels 16 and 12.

The Pilot reports that berthing is undertaken in most weather conditions.

Tugs: 7 × 2,400 h.p. – 2,800 h.p. stationed at the port. A minimum of 1 tug is required for all vessels and it is too large and too powerful for handling small vessels.

Berthing: Vessel berthed at the Petro Chemical Terminal (BA. Chart No. 3276).

The depth at both berths was approximately 12.0 m. but the pilot reports maximum draft normally allowed is 10.0 m.

For ethylene loading and discharging, Berth No. 10 on the East side is used. Vessel berths head out, starboard side to.

For propylene and "C4" discharge, Berth No. 9 on the West side is used. Vessel berths head out, port side to.

It is possible to berth head in if this is required for manifold connections.

The concrete quay is very high and has large fenders.

There is a swell running in the harbour even when conditions are calm in Winter time.

Tidal range is approximately 2.5 m.

Berthing and unberthing undertaken throughout 24 hours. Moorings consisted of 2 head/stern lines, 2 breast lines and 2 springs at each end. These were secured on to hooks.

2 mooring boats are provided. Shore gangway provided.

Cargo: Berth No. 10: Vessel loaded ethylene. The liquid and vapour arms are 8 in. 150 ASA.

We loaded at a rate of approximately 100 tonnes per hour with two plants. Manifold temperature −99°C.

The charterers were concerned at the temperature due to discharge port temperature requirements and only 20 hours steaming. Just before completion of loading the shore agreed to connect the vapour arm and we loaded an extra 20 tonnes to take account for a vapour return. Two plants are required and shore compressor drew from manifold.

It took 8 hours to return 20 tonnes and reduce temperature from −99°C to −101.9°C.

Bill of Lading figures are calculated using the weight of Air not Vacuum.

Shore personnel connect and disconnect arms.

Berth No. 9: Vessels discharge propylene (Refrigerated storage).

Shore requested maximum of 3 pumps which gave discharge rate of 150 tonnes per hour.

The Terminal like the product very cold. Ours being at −48°C created no difficulties. However some ships arrive with the product at around −40°C and this can cause difficulties.

The liquid arm is 8 in. No vapour return line. It was not used due to product contamination.

It was requested that we berthed starboard side to in order to connect to our extended starboard manifold but this was not satisfactory as the Chicksan arm was too close to the catwalk, so we had to shift around and berth port side to.

Shore tank pressure maximum 90 mbs.

Shore nitrogen is used to purge the Chicksan arm upon completion. They do not allow a vessel to "hot gas" purge ashore.

Bureau Veritas Cargo Surveyor attended.

Fresh Water: Fresh water is available from the quay at a good rate and is metered. The waterman supplies shore hoses.

Stores: It was difficult to store at both berths as the lorry can only proceed to the car park which is about 100 m. from the ship. From there a hand truck is to be used and there is no shore crane.

General: Personnel are not allowed to walk through the Terminal. The use of transport is compulsory and this is arranged through the agent.

The new Coal Harbour to the East of the oil port is very conspicuous.

The breakwater is completed and has navigational lights: Fl. G. 6 sec. on the N.W. head; Fl. Y. 6 sec. on the S.E. head, and Fl. R. 4.5 sec. on fishing harbour breakwater.

Berth construction is finished but no discharging equipment has yet been installed. A.P.S. advise that it will be another 2 years before the Coal Harbour is operational

AUTHORITY: Administracao do Porto de Sines – A.P.S., Apartado 16, 7521 Sines Codex. *Tel:* 625001. *Telex:* 12027 Sinmar P. *FAX:* 634466. *Contact:* Mr.Antonio Emilio de Castro, President of Administration. Mr.Antonio Rui Brandao da Graca, Mr. Jorge D. da Costa Gomes, Mr.Albano Figueiredo e Sousa and Mr.Joao Luis R. Mota de Campos, Members of Administration. Mr.Adriano M. Rocha Carapeto, Director of Operations.

VIANA DO CASTELO: 41.41 N. 08.50 W. (See Plan)

DOCUMENTS:

Health Declaration.
3 Crew Lists.
Provision List (ship's and individual).
Tobacco Declaration and Entrance Forms supplied by Agents on arrival.
2 Manifests and 1 copy of each Bill of Lading concerning cargo to be discharged.
1 Transit Manifest if cargo in transit exists.

PILOTAGE: Pilotage compulsory. ETA should be given to Agent with ample notice. Signals; during the day Flag "G" of International Code, and at night 3 long blasts. Boats black with white cabins. Pilots to be taken on board in outer or inner harbour respectively with good or bad weather.

ANCHORAGES: Outer or inner harbour according to weather conditions.

RESTRICTIONS: Entering and sailing only during daylight unless exceptionally good weather. Depth in entrance 6.5 m.

MAX. SIZE: Max. draft 26 ft. on HWST.

HEALTH: Free Pratique authorised for vessels coming from other Portuguese ports. For vessels coming from other countries Health Declaration must be filled in and delivered to the Agents.

RADIO: Call Viana do Castelo Pilots frequency 2182 kHz and listen on 2132 kHz.

TUGS: 3 tugs of 1,160 h.p., 400 h.p. and 1,400 h.p.

BERTHING: Over 1,500 m. of Commercial Quays with 500 m. of Commercial Quays with depth of 9.0 m.

Ro/Ro Terminal: Max. LOA 160 m. Max. draft 7.6 m. Length of quay 233 m. Terminal equipped with 3×40 ton capacity Tugmasters, 1×56 ton at 12 m. mobile crane, 1×42 ton forklift and small forklifts of 2 tons – 7 tons capacity.

BRIDGES: 1 bridge which allows entrance/sailing at any time.

CRANES: 1×5.5 tons, 2×12.5 tons, 2×18 tons, 6×12 tons, 1 × 40 tons and 1×56 tons.

STEVEDORES: Ordered by Agents 8 hours in advance.

MEDICAL: No prior advice is necessary.

FRESH WATER: Supplied by shore installations.

FUEL: Only small quantities of gas oil can be supplied.

CONSULS: France 22412. Spain 23018.

REPAIRS: All types of deck, engine and electrical repairs can be carried out.

DRY DOCKS: Three dry docks available.

	Length	*Breadth*	*Draft*
Dock 1	203 m.	34.0 m.	18 ft.
Dock 2	127 m.	18.5 m.	18 ft.
Dock Eng. D. Pacheco	104 m.	11.0 m.	16 ft.
Fitting Dock	190 m.	65.0 m.	21 ft.

No special equipment for tank washing is available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Work usually done by crew.

CUSTOMS ALLOWANCES: No limit, but must be declared.

REPATRIATION: No difficulties for crew repatriation.

AIRPORT: Nearest is Oporto Airport, 55 km.

TIME: From end September to end March – GMT. From end March to end September – GMT plus 1 hour.

HOLIDAYS: 1st January; Holy Friday; 25th April; 1st May; Corpus Christi; 10th June; 15th August; 5th October; 1st November; 1st, 8th, 24th and 25th December.

POLICE/AMBULANCE/FIRE: Tel. 115.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Required.

DEVELOPMENTS:

1. Roadworks.
2. Marina.

AUTHORITY: Junta Autonoma dos Portos do Norte, Praca do Marques No. 65, 4900 Viana do Castelo, Portugal. *Tel:* 058-829096/7/8/9. *Telex:* 32609 Porvia P. *FAX:* 058-829106. *Contact:* Jose Monteiro de Morais, Managing Director. Captain Z. Cavaco, Harbour Master. (*Tel:* 058-22168).

VILA REAL DE SANTO ANTONIO: 37.10 N. 07.26 W.

DOCUMENTS:

2 Health Certificates.
3 Crew Lists.
1 List of Passengers in Transit.
2 Lists of Passengers Disembarking.
2 Dangerous Cargo Lists.
1 Ship's Register.
1 Tonnage Certificate.

PILOTAGE: Black boat, wooden hull, white "P" at bow. Stationed near buoy No. 1 (harbour entrance). All sea-going vessels entering or leaving harbour are obliged to avail themselves of the services of a Pilot. Latest 24 hours before arrival cable "Corporacao dos Pilotos de Vila Real de Santo Antonio" or to Agent. Departing vessels should apply for their Pilots at least 6 hours before the time of departure.

MAX. SIZE: Entrance channel 4,000 m. long, has a depth of 4 m. (12 ft.) at LW. Vessels drawing up to 5.5 m. (16 ft.) can enter under normal circumstances 1 hour before HW, a keel clearance about 1 ft. will be maintained.

TUGS: Tugs up to 105 h.p. available.

BERTHING: 1 pier 300 m. long. Depth at pier 20 ft.

STEVEDORES: Ordered by Agents. ETA to stevedores is necessary. No work allowed on Sundays.

MEDICAL: Inoculations in hospital Marques Pombal - Vila Real de Santo Antonio.

FRESH WATER: Obtainable alongside quay.

FUEL: Gas oil can be supplied in small quantities.

CONSULS:

Finland, Avenida da Republica, 133
France, Avenida da Republica, 114
Greece, Avenida da Republica, 109
Italy, Avenida da Republica, 11
Netherlands, Avenida da Republica, 73
United Kingdom, Rua Dr. Oliveira Salazar, 4

REPAIRS: There is 1 small ship repair yard at Vila Real de Santo Antonio.
GANGWAY/DECK WATCHMEN: Compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close.
CUSTOMS ALLOWANCES: About 200 cigarettes and 1 bottle of spirits per man.
HOLIDAYS: 1st January; Holy Friday; 25th April; 1st May; 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December.
POLICE/AMBULANCE/FIRE: Police 66; Ambulance 202; Fire 202.
AUTHORITY: Junta Autonoma dos Portos de Sotavento do Algarve, Rua Conselheiro Bivar 68, 8000 Faro. *Tel:* (089) 22025, 22049. *Telex:* 56117 Japsa P. *Contact:* Eng. Jose Domingos Mendonca de Sousa, Director.

NOTES

Please also advise Shipping Guides Ltd.

Puerto Rico

AGUADILLA: 18.26 N. 67.10 W.

DOCUMENTS: See "San Juan".
PILOTAGE: Mayaguez's Pilots provide service in Aguadilla. At least 24 hours advance notice required.
RESTRICTIONS: Open port, very deep, safe in good weather. Cold fronts from North cause very heavy swells. Vessels cannot berth during this kind of weather.
MAX. SIZE: 600 ft. long, 36 ft. draft.
HEALTH: Free Pratique granted on arrival.
BERTHING: *Harbour:* 1 mile North of the town is a conveyor pier with 1 dolphin berth at its head. Least depth alongside 12.2 m. (40 ft.). Length of mooring lines not less than 180 m. (600 ft.). Vessels tie up to 4 mooring buoys, with spring lines to 2 bollards at the loading tower. 10 in. connection to molasses line. 1 off-shore tanker berth with 9 m. (30 ft.) depth consists of mooring buoys and pile clusters, connecting platform and pipelines for discharging aviation gas for Borinquen Airport.
MEDICAL: 24 hours' notice preferred; local hospital available.
TANKERS: See "Berthing".
FRESH WATER: Available. 2 in. pipe-line with meter.
CONSULS: No local representation.
GANGWAY/DECK WATCHMEN: Usually crew members are used.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCES: U.S. Customs Regulations. For Customs service Aguadilla is under the jurisdiction of the Mayaguez Custom House.
REPATRIATION: Can be arranged.
AIRPORT: 20 minutes' drive. Regular airlines.
TIME: Atlantic Standard Time, 4 hours less than GMT. No alterations during year.
HOLIDAYS: Refer to "San Juan".
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required to go ashore.
DELAYS: No delays unless another ship is already berthed.
AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Aguadilla. Tel: 832-3590.

GUANICA: 17.57 N. 66.54 W.

DOCUMENTS: See "San Juan".
GENERAL INFORMATION: Refer to "Ponce".
PILOTAGE: Port operations are under the control of the Captain of the Port. Pilot services are available day and night, by previous arrangement with Mayaguez Pilots.
ANCHORAGES: Harbour is located 8 miles Westward of Guayanilla Bay. Though small, it is one of the best hurricane harbours in Puerto Rico.
TUGS: Available from Guayanilla.
BERTHING: Bulk sugar, bulk fertiliser and bulk grain handling facilities. Length 700 ft.; depth alongside 28 ft. During recent years, operations at the port have been practically nil.
MEDICAL: Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.
FRESH WATER: Available in limited quantities for emergencies only.
FUEL: Available by trucks from Ponce.
CONSULS: None available locally, nearest at Ponce.
AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Guanica. Tel: 821-2860.

GUAYANILLA (incl. Tallaboa Bay): 18.00 N. 66.46 W. (See Plan)

DOCUMENTS: See "San Juan".
PILOTAGE: Port operations are under the control of the Captain of the Port and Pilot services are available day and night. Pilots stand-by on VHF Channel 16 and operate on Channel 14. Arrangements should be made with at least 4 hours advance notice.
ANCHORAGES: Guayanilla is the largest hurricane harbour and one of the best in Puerto Rico. It has protected anchorage for 5 vessels. Maximum draft permissible is 42 ft. It is protected at its entrance by extensive reefs which extend a mile or more offshore. The entrance channel between these reefs is about 1.5 miles long and about 0.4 miles wide.
HEALTH: Pratique is not necessary. In case of continuous high fever or contagious disease, Agents must be notified prior to vessel's arrival. Agents will immediately contact Public Health for proper action.
RADIO: Chatham Radio (WCC) – Chatham, Massachussetts. Equipped with RCA automatic land line circuit direct to New York, N.Y., San Francisco, California and Washington, D.C.
TUGS: Available 24 hours daily from South Puerto Rico Towing Co., Tel: 809-835-2795, as requested by vessel.
BERTHING: The Union Carbide Company has berthing facilities for barge operations and LPG.

New port facilities for Pittsburgh Plate Glass are owned by the Puerto Rico Ports Authority. 2 berths at jetty, each 240 m. length. Depth alongside 35 ft.

Berths were recently dredged and actual restrictions are as follows:

**Refinery Dock – Guayanilla:*

DWT	80,000 tons	
LOA	830 ft.	
BCM	400 ft.	(Critical)
Draft	42 ft.	(South Face, Berth No. 5)
	42 ft.	(North Face, Berth No. 4).

**Petrochemical Dock – Guayanilla:*

DWT	50,000 tons	
BCM	449 ft.	
Draft	36 ft. 06 in.	(South Face, Berth No. 3)
	30 ft.	(North Face, Berths 1 & 2) Ships only
	28 ft.	(North Face, Berths 1 & 2) Barges only

*Commonwealth Oil Refining Co. Ltd. facilities.
Texaco: There is a private pier owned and operated by Texaco for the receipt of clean petroleum products. Berth 650 ft. long and 24 ft. deep being dredged to 36 ft. Diesel bunker available.
Punta Gotay Pier: 1 berth at dolphins with depth 38 ft.
Punta Pepillo Pier: 1 berth at dolphins with depths 12 ft. – 28 ft.
Tallaboa Bay: 1 dolphin berth with depth 20 ft. and 1 jetty with depth 38 ft.
Also see "LPG".
LPG: Dolphin berth at Cayo Rio in Tallaboa Bay in position Lat. 17° 59′ N., Long. 66° 44.5′ W.
Report: February 1984.
Max. Size: Vessel's dimensions not to exceed: length overall 965 ft. Max. draft 41 ft. Max. beam no restriction.
Manifold Position: The manifold must be positioned within 50 ft. fore or aft of the midpoint of the vessel's overall length.
Dock: The dock has been designed to accept the breasting load from a ship (or ships if vessel to vessel discharging is arranged) of up to 109,000 long tons total loaded displacement.
Depths: Depth of the docking area and approaches has been increased by dredging to over 44 ft. Due to swell and tidal actions, the maximum allowable vessel draft has been set at 41 ft. This draft has been approved by the U.S. Coast Guard and nautical charts affected are being updated accordingly.
Mooring Basin: The docking area is 450 ft. wide and is designed to handle a 125,000 cu.m. (145 ft. beam) vessel and a 75,000 cu.m. (120 ft. beam) vessel moored side by side.
Hose handling: Although connecting hoses and supplying the equipment necessary for doing so is the vessel's responsibility, receivers can, at their discretion, make such connections provided that the carrier's manifold elevation above water plus its manifold distance inboard plus its manifold distance from the midpoint of the carrier's overall length is 60 ft. or less. If it is more than 60 ft. the carrier would have to provide hose handling assistance including a crane to lift the end of the loading hose to the deck.
Carrier/loading platform access: An accommodation ladder will be provided for those carriers that have a deck height of 25 ft. or less above the water and are accessible from loading platform. Carriers that cannot meet the above must provide their own accommodation ladder. Transportation from their accommodation ladder will be provided.
Sanitary waste removal: Dumping of sanitary wastes into Tallaboa Bay is not permitted. Therefore, for those carriers that stay in port for 20 days or more, removal of sanitary wastes by barge will be provided. The carrier must provide the means (to be approved by Union Carbide Company) of transferring the wastes from the carrier to the barge.
Potable water: Potable water is not available at berth, but fresh water is. A fresh water connection is available on the loading platform. The carrier must provide his own hose for hook up. Should the carrier wish to purchase such water a release must be executed.
Bunkers: Bunkers are not available.
Night navigation: No U.S. Coast Guard regulation prohibits the berthing or unberthing of LPG carriers at night unless the incoming/departing vessel is being moored alongside another (storage) vessel.
MEDICAL: Medical service is available; hospitalisation at Ponce, which is only 15 minutes distant.
FRESH WATER: Available whenever requested by the vessel. Water delivery very slow (3 to 5 tons per hour).
FUEL: Available only whenever arranged by Owners of the vessel and/or charterers prior to arrival.
Fuel Dock: Length 680 ft. with deep water alongside. Mooring dolphins and moorings buoys installed to assist with clearing the dock.
CONSULS: None available locally; nearest at Ponce.
REPAIRS: Various marine contractors available in Ponce upon request. Minor repairs available in Guayanilla and Ponce. No drydock facilities in the area. For drydock facilities and other major repairs refer to "San Juan".
Radar: For radar technician contact local Agent prior to vessel's arrival. Various technicians available in San Juan.
REPATRIATION: Arranged by ship's Agents.
AIRPORT: International Airport in outskirts of San Juan served by regular airlines. Small airport in Ponce connects with San Juan.
CUSTOMS: For Customs service, Guayanilla is under the jurisdiction of the Ponce Custom House.
SHORE LEAVE: Foreign crew members are allowed to go ashore through U.S. Immigration.
IDENTIFICATION CARDS: Shore passes are sufficient for shore leave.
AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Guayanilla. Tel: 835-2647.

JOBOS (Aguirre): 17.56 N. 66.13 W.

DOCUMENTS: See "San Juan".
GENERAL INFORMATION: Refer to "Ponce".
PILOTAGE: The Port of Jobos is served by the Pilots of Ponce. Services must be arranged in advance.
ANCHORAGES: A fine land-locked harbour, located on the South coast, approx. 42 nautical miles Eastward of Ponce and 20 miles West of Point Tuna. Anchorage inside the bay is Southward of the pier in depths of 19 ft. – 24 ft., soft mud bottom.
RESTRICTIONS: The principal entrance is from Westward between Morrillo Cay and Ratones Cay.
TUGS: No tugs available.
BERTHING: To the West of the sugar pier (not in use and not buoyed) is an open concrete barge dock 632 ft. in length with a buoyed access channel for the receipt of fuel oils for the Water Resources Authority.
MEDICAL: Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.
TANKERS: See "Las Mareas".
FUEL: No bunkers are available.
CONSULS: None available locally; nearest available at Ponce.
AUTHORITY: Puerto Rico Ports Authority. See "San Juan".

Captain of the Port, Jobos. Tel: 821-2860.

LAS MAREAS: (Guayama) 17.55 N. 66.10 W. **(See Plan)**

The Puerto de Las Mareas Terminal is located on the South side of the island of Puerto Rico. It is located approximately 26 nautical miles East of the port of Ponce. The nearest city is Guayama.

All vessels calling at Phillips Puerto Rico Core Inc., Puerto de Las Mareas Terminal should be consigned to Phillips Puerto Rico Core Inc., and all official documents for such ships should show them so consigned. In conformance with port regulations, no vessel will be allowed to tie up alongside a pier without having first obtained a berthing permit from the Ports Authority Captain of the Port.
DOCUMENTS: See "San Juan".

The Passenger List must show full names, sex, age, nationality, and occupation of passengers landing at Puerto de Las Mareas. The ultimate destination of in-transit passengers must also be shown in the Passenger List.

In most cases, outward clearance and cargo documents will be delivered on board by the ship's Agent, making it unnecessary for Masters to obtain such clearance in person from the U.S. Customs Office (Ponce).
PILOTAGE: The use of Pilots is compulsory for all vessels. Vessel's Agent will arrange for Pilot, upon receipt of the arrival notice. Pilot will board inbound vessels off the entrance to the harbour about 1 mile offshore.

When approaching the dock and channel, vessels must have one anchor, to be designated by the Pilot, free of the hawse pipe and ready for quick release if necessary to stop the vessel.
Note: Every vessel arriving or departing must provide, properly secured, a pilot ladder which conforms to the standards of construction normally accepted by international safety standards.
APPROACHES: The harbour is entered through a channel 250 ft. in width at its narrowest portion, bearing 025.6° (T). It is protected on the Eastern side by a rubble mound breakwater extending approximately 700 ft. from the shore line. The dredged channel extends out to the 40 ft. depth contour and has a width at this contour of approximately 900 ft., narrowing to 250 ft. approximately 2,100 ft. inshore from the 40 ft. contour. The 250 ft. wide portion of the channel is approximately 1,000 ft. long. At the inshore end of the 250 ft. wide channel, the harbour itself extends for a length of 2,300 ft. and a maximum width of 1,100 ft. The harbour has a depth of 38 ft. below MLW but the maximum draft allowable for inbound and outbound vessels is 37 ft. The above dimensions are given to the bottom of the channel; the sides of the channel and the harbour are sloped at 1 in 3.
NAVIGATIONAL AIDS:
A. Lighted Buoy LM: This sea buoy is located 300 ft. West of the centre line of the channel, 2 miles offshore from the end of the rubble mound breakwater. It displays a white light through 360° flashing Morse code letter "A". (0.5 seconds on, 0.5 seconds off, 2.0 seconds on, 0.5 seconds off). The buoy is painted with black and white vertical stripes and is fitted with a radar reflector. Water depth is 70 ft.
B. Channel Marker Buoys:

(1) Buoy 1: This buoy has 360° green light flashing 0.6 seconds on and 3.4 seconds off. It is painted black and has a green retro-reflective tape in buoy superstructure panels. Water depth is 40 ft.

(2) Buoy 2: This buoy has 360° red light flashing 0.5 seconds on and 2.0 seconds off. It is painted red and has red/orange retro-reflective tape in buoy superstructure panels. Water depth is 40 ft.
C. Channel Marker Navigation Lights: There are 4 channel marker navigation lights, 3 are located on piling, and 1 on the end of the rubble mound breakwater.

(1) Channel Marker Number 3: This marker is located on a single pile 400 ft. West from the centre line of the channel, 2,024 ft. inshore from the channel marker buoy No. 1. The light is located 25 ft. above MLW, and is displayed through 360°. It is a green light, flashing 0.6 seconds on and 3.4 seconds off. The marker is fitted with 3 ft. square dayboards with green retro-reflective centre and dark green reflective border, numeral 3.

(2) Channel Marker Number 4: This marker is located on a tower at the end of the rubble mound breakwater, 50 ft. above MLW. The light is displayed through 360°, red, flashing 0.5 seconds on and 2.0 seconds off. The marker has 4 ft.×4 ft. triangular dayboards with red retro-reflective centre and dark green reflective border, numeral 4.

(3) Channel Marker Number 5: This marker is located 175 ft. West from the centre line of the channel, 1,000 ft. inshore from the end of the rubble mound breakwater. It is on a single pile 25 ft. above MLW and displays a green light through 360° flashing 0.4 seconds on and 0.6 seconds off. The marker is equipped with 3 ft. square dayboards with green retro-reflective centre and dark green reflective border, numeral 5.

(4) Channel Marker Number 6: This marker is located 175 ft. East from the centre line of the channel, 1,295 ft. inshore from the end of the rubble mound breakwater on a single pile 25 ft. above MLW. It displays a 360° red light, flashing 0.4 seconds on and 0.6 seconds off. The marker is equipped with 4 ft.×4 ft. triangular dayboards with red retro-reflective centre and dark reflective border, numeral 6.
D. Obstruction Light: This light is mounted on the protective dolphin at 10 ft. above MLW and displays 3 fixed red lights through 360°.
E. Range Lights: LLNR 1380.55 front range light is mounted on a tower located on the centre line of the channel 3,500 ft. inshore from the end of the rubble mound breakwater. It consists of a quick flash white light 86 ft. above MLW and visible on range line only. The tower is fitted with a 6 ft.×12 ft. KRW dayboard, covered with red/orange reflective coating with an 18 in. white stripe down the centre.

LLNR 1380.56 rear range light is mounted 104 ft. above ground on a tower located on the centre line of the channel 5,500 ft. inshore from the end of the rubble mound breakwater. It consists of an equal interval, white, 3.0 seconds on and 3.0 seconds off. The tower is fitted with a 6 ft.×12 ft. KRW dayboard covered with red/orange reflective coating with an 18 in. white stripe down the centre.
RESTRICTIONS: The entrance channel has a depth below MLW of 40 ft. and the harbour itself has a depth of 38 ft. Hence vessels using the port are limited to a maximum draft of 37 ft. Vessels are required to have a minimum draft of 14 ft. forward and 24 ft. aft when entering or leaving the port.
MAX. SIZE: Max. draft 37 ft.
HEALTH: Free Pratique is not required for vessels arriving at Puerto de Las Mareas, except when cases of communicable disease are on board. In such cases, U.S. Public Health Service doctors are available, and should be requested through the Agent 48 hours prior to arrival.
RADIO: Agents of vessels or Owners or its representatives should advise Phillips Puerto Rico Core Inc. by telex, cable or telephone, 72 hours, 48 hours, and again 24 hours before their expected arrival at the sea buoy.

ITT Telex No. 3451056 "Philcorgya".

Telephone (809) 864-1515.

Incoming vessels should advise the Agent by radio 48 hours and again 24 hours before their expected arrival at the sea buoy. Coast stations available for such advice are:
Lantana Radio (WOE) - Lake Worth, Florida. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco and Washington, D.C.)

Transmits Traffic Lists at (GMT) 0005, 0205, 0405, 0605, 0805, 1005, 1205, 1505, 1605, 1805, 2005 and 2205. Transmits weather bulletins at (GMT) 0105 and 1600.
New York Radio (WNY) - New York City. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco, California, Washington, D.C.)

Transmits Traffic Lists at (GMT) 0010, 0210, 0410, 0610, 0810, 1010, 1210, 1410, 1610, 1810, 2010 and 2210. Transmits weather bulletins at (GMT) 1000, 1400, 1600 and 2200.

Also equipped with teletypewriter (TWX) for direct communication with steamship companies in the United States having this equipment.
Chatham Radio (WCC) - Chatham, Massachusetts. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco and Washington, D.C.)

Transmits Traffic Lists at (GMT) 0050, 0450, 0850, 1250, 1650 and 2050. Transmits weather bulletins at (GMT) 0100, 1300 and 1700.
San Juan Radio (WCT) - Radio Corporation of Puerto Rico Marine Station, Transmits on 2530 kHz, receives on 2134 kHz, watch on 2182 kHz.

In addition to the above commercial radio facilities, incoming vessels may contact the port through radio facilities on tug stationed at the port. These facilities are as follows:

VHF radio: range 30 miles. Channel 16 (156.8 MHz), working frequency Channel 14 (156.7 MHz).

SSB radio: 12 MHz, 8 MHz, 4 MHz.

Call letters: WA 6617 and WS 6560.

Vessels diverted to Puerto de Las Mareas must furnish the required 48-hour and 24-hour notices of arrival, unless notice of diversion is received less than 48 hours before anticipated arrival, in which case the notice of arrival will be given as soon as notice of diversion is received. In such cases, however, Phillips Puerto Rico Core Inc. reserves the right to refuse to load or unload such vessels if tankage is not available for the cargo, or if cargo is not available to loading.
TUGS: The use of tugs is compulsory for arriving and departing vessels. Two tugs are stationed in the harbour to assist in docking, undocking and turning. Arrangements for the use of tugs should be made through the Agent well in advance of the vessel's arrival. A minimum of 2 tugs required for berthing and a minimum of one tug required for unberthing.

Tug Operator: McAllister Brothers Inc. Tel. (809) 721-8888 and 722-8111.
BERTHING: The dock at the terminal consists of a finger pier approximately 800 ft. in length inside the harbour with a tanker loading berth on each side. The finger pier consists of a cargo platform 45 ft. by 90 ft., fitted with fender piling and dolphins (3 breasting dolphins, 2 mooring dolphins and 1 protective dolphin). The cargo platform is connected to shore by a driveway 12 ft. 6 in. wide. The mooring and breasting dolphins outboard of the cargo platform are connected to each

other and to the platform by a walkway. No launches are required to handle mooring lines. The top of the cargo platform is 12 ft. above MLW level. Water depth alongside the finger pier is 38 ft. at MLW. There is no current at the dock or in the harbour.

Bollards for mooring lines are provided on the breasting dolphins, the mooring dolphins and the turning dolphins.

Turning basin 1,100 ft. wide and 1,060 ft. long, outboard of the turning dolphin, is provided. The turning basin has a depth over its entire area of 38 ft. at MLW. Normal procedure will be for vessels to enter the harbour and turn prior to docking.

Vessels will be required to vacate berths promptly on completion of loading or discharging cargo. Permission to use a berth when not loading or discharging cargo may be granted under special circumstances, and must be requested through the Agent.

If the vessel fails to vacate the berth on the expiration of the allowed time, it will be held liable for payment of any demurrage and/or damages incurred by Phillips Puerto Rico Core Inc., as a result of delays to other vessels waiting berths, or for any other consequence of its failure promptly to vacate the berth.

HURRICANES: The South coast of Puerto Rico is subject to winds of hurricane force, accompanied by abnormally high tides, during the late Summer and Autumn. In the event of such abnormal conditions, vessels may be required to put out additional moorings, or if necessary, to suspend all operations and put to sea until normal conditions prevail.

MEDICAL: Medical assistance or hospitalisation arrangements should be made through the Agent. If hospitalisation is required for any crew member, arrangements should be made through the ship Agent with hospitals located in the Municipality of Guayama. Ambulance service can be furnished upon request to the Agent.

TANKERS: The various cargoes available at the Puerto de Las Mareas terminal include motor fuel, cyclohexane, benzene, paraxylene, orthoxylene, mixed xylenes, paraffinic naphtha, and other special products. Feedstock for Phillips Puerto Rico Core Inc. facilities is naphtha, and there is a fuel oil unloading line. Cargo handling is accomplished through various sizes of lines, as follows:

Product	*Hose size (each side of dock)* (m.)	*Line size* (in.)	*Loading/ discharging rate with one pump*
Naphtha Feedstock	3 × 8	20	15,000 b.p.h.
Motor Fuel Regular	3 × 8	20	10,000 b.p.h.
Motor Fuel Premium	2 × 8	12	5,700 b.p.h.
Motor Fuel Unleaded	1 × 8	14	7,000 b.p.h.
Benzene	1 × 8	12	3,800 b.p.h.
Cyclohexane	1 × 8	10	4,000 b.p.h.
Paraxylene	1 × 8		5,000 b.p.h.
Orthoxylene	1 × 6	8	2,200 b.p.h.
LP-7 Raffinate	2 × 8	16	7,500 b.p.h.
Mixed Xylenes	1 × 6	8	2,000 b.p.h.
Toluene	1 × 8	8	800 b.p.h.
Fuel oil	1 × 8	12	3,500 b.p.h.
Ballast	1 × 8	12	6,000 b.p.h.
Domestic water	1 × 2	2	3 t.p.h.
Butane	1 × 6	16	2,000 b.p.h.

CONNECTING/DISCONNECTING HOSES: Service will be provided by the terminal to connect and disconnect hoses on the ship. Vessels are requested to have blanks removed from the cargo lines and hose handling booms rigged on arrival at the dock.

READINESS: Notice of Readiness to load or discharge is warranty that the vessel is in all respects ready to receive or discharge cargo, and that the vessel's equipment is ready and capable of loading or discharging petroleum or petrochemical products. Phillips Puerto Rico Core Inc. reserves the right to refuse to accept such notice of readiness if, upon inspection, the vessel is found not to be ready to receive or discharge cargo. Vessels may tender Notice of Readiness upon arrival, berth or no berth, according to the terms of the charter party or contract of affreightment under which they have been engaged.

BALLAST: Ship's Masters are reminded that they are prohibited by Puerto Rico law from pumping dirty ballast overboard when within the Puerto Rican limits. Facilities are provided for disposing of dirty ballast ashore at Puerto de Las Mareas. U.S. Coast Guard Regulations are enforced for any discharge of dirty ballast, and any violations will be quickly detected and reported.

Ballast is pumped ashore through a 12 in. line, capable of receiving at a pressure at the ship's rail of 100 p.s.i. The ballast facilities are sufficient to accommodate 100,000 barrels of dirty ballast. Vessels are requested to arrive with minimum of dirty ballast.

FRESH WATER: Available at the dock in limited quantities.

FUEL: No bunkers are available at Puerto de Las Mareas. However, arrangements for bunkering at any other ports in the island can be made through the Agents.

STORES: May be ordered through the ship's Agent for delivery at the terminal.

CONSULS: No consular representatives are located in the vicinity of Puerto de Las Mareas. Some nations maintain consular representatives in San Juan. Further information can be obtained from the Agent.

REPAIRS: Complete repair and dry dock facilities are available in San Juan. Limited facilities for emergency repairs are available at Ponce. Requests for such services should be made through the Agent.

SURVEYORS: There are no classification society surveyors stationed at Puerto de Las Mareas, but they are available on call from Ponce or San Juan. Requests for survey services should be made through the vessel's Agent at least 24 hours prior to arrival.

FIREARMS: All firearms and ammunition should be shown on the stores list and will be removed from the vessel during its stay in Puerto Rican waters. Any violations of this regulation will result in fines and confiscation of firearms and ammunition.

CUSTOMS: U.S. Customs and Immigration Authorities will board vessels at the dock, except in unusual circumstances, in which case they will board the vessel at anchor outside the harbour. The vessels will be required to furnish an accommodation ladder.

American Flag vessels will not require Customs entry or clearance unless arriving from or departing to a foreign port.

SAFETY: The provisions of Part 35 "Operations" of the Rule and Regulations to Tankvessels, Sub-chapter D (CG-123) published by the U.S. Coast Guard are in force at Puerto de Las Mareas, and must be observed under penalty of fine and imprisonment as provided therein.

Particular attention is called to the following safety precautions:

(1) Vessels must be, and remain, in readiness to sail from the dock at any time. In the event of engine repairs, which might interfere with such readiness to sail, being required, written permission must be obtained from the Harbour Master before such repairs may be undertaken.

(2) Scuppers must be plugged during cargo-handling operations.

(3) Absolutely no smoking or open lights will be permitted on the dock or open decks.

(4) Screens in good conditions must be used over gauging hatches when not actually gauging.

(5) Operations may be suspended at the discretion of the Master, or may be required to be suspended by the Harbour Master, during severe electrical storms.

(6) In the event of a breakdown of communications between dock and the shore terminal during loading operations, and the need to shut off the flow of cargo to the vessel, an emergency signal consisting of a continuous sounding of the ship's whistle shall be given. The signal shall not be discontinued until the flow of the cargo has been shut off.

(7) An electrical bonding cable will be provided from the dock to the ship. This bonding cable must be firmly secured to a clean metal surface of the vessel's hull or cargo piping before hoses are connected, and must remain in place until the hoses are disconnected.

(8) The vessel must moor bow to seaward when feasible and be prepared to get underway on short notice. A towing cable shall be made ready forward and aft with the bight at water's edge.

(9) Each foreign flag vessel must be in possession of a valid Letter of Compliance issued by the Commandant, USCG for the carriage of the specific products to be loaded or discharged. All vessels must possess a Certificate of Financial Responsibility and be able to produce the same upon demand.

(10) Ship to ship transfer of cargo within the harbour is not permitted.

(11) All persons considered to be intoxicated or under the influence of drugs shall not be allowed to board the ships or enter the facilities during cargo operations.

Violations of these and other safety regulations, as described in Parts 35 of Sub-chapter D will result in the suspension of cargo-handling operations by the Harbour Master, or the PPRC dock personnel or safety inspectors, without recourse. Such suspension of cargo operations will continue until the violations are corrected or the safety hazards removed.

POLLUTION: *Oil Spill Avoidance:* All vessels must comply with the latest Commonwealth and Federal laws and regulations regarding prevention of oil spills. Such laws absolutely prohibit any discharge overboard of oily water, oily ballast or oil in any form. Since the harbour is an enclosed area with no flow of water through it, any violations, no matter how small, will be quickly detected and reported to the U.S. Coast Guard. VIOLATORS WILL BE VIGOROUSLY PROSECUTED AND ARE LIABLE FOR HEAVY FINES.

Sanitary Regulations: Pollution laws and regulations concerning sanitation apply to the harbour of Puerto de Las Mareas. Trash and galley waste will not be dumped into the waters of the harbour and must be kept on board until the vessel has sailed. Discharge of toilets and bathrooms into the waters of the harbour is prohibited. Sanitary facilities are provided on the dock for use by crew members while their vessels are at the berth.

MAIL: Official and personal mail may be addressed to the vessel care of Agent, and will be delivered to the vessel by the Agent on arrival. The Agent will accept official and personal mail from the vessel, and will ensure its delivery to the local U.S. Post Office, upon receipt of a mail transmittal slip to support disbursements.

SHORE LEAVE: When the vessel is berthed at Puerto de Las Mareas there normally are no restrictions on shore leave. In order to avoid delay in sailing, Masters are requested to ensure that all crew members are on board their vessel at sailing time. There are no facilities to provide shore leave from vessels at anchor awaiting berth.

Crew members from foreign vessels must carry their crewman's landing permit, Form I-95A, when on shore leave.

GENERAL: *Charts:* The general area and the harbour of Puerto de Las Mareas is shown in U.S. Hydrographic charts number 25677 and 25640.

Tides: Tides in the general area of Puerto de Las Mareas have an average yearly range of 0.8 ft. from MLW to MHW.

SHIPMASTER'S REPORT: February 1988.

The Oil Port is called Jobos, Phillips Oil Terminal. Guayama is the nearest town, and La Salinas is just nearby.

British Admiralty Charts for the area are inadequate, U.S. Chart No. 25687 is of greater assistance.

The Pilot, using a tug, boards at Lat. 17° 54′ N., Long. 66° 11′ W. This position is very close to the Fairway Buoy.

This vessel, a 218.5 m. LOA tanker, proved to be one of the largest ever handled at the terminal.

Berthing for large vessels takes place in daylight only, close to the daybreak or before sunset, when the wind subsides.

Max. draft requested was 36 ft. 06 in. Vessels berth heading seaward.

Entering the port and making the turn with such a large vessel is not easy. We had to put our bulbous bow on the Eastern bank in order to stop the vessel for the tugs to change side.

The jetty is built for smaller vessels so our ropes were either short, or had to be crossed.

Vessel discharged 335,000 bbls. of naphtha, through 2 × 8 in. hoses tested for 118 p.s.i., and flow requested not to exceed 18,000 bbls./hr.

Discharging was smooth, with slight difficulty during stripping because of the high back pressure.

We had good co-operation with the Authorities, Terminal and Agent. Chas. Martin Inspector attended. According to new Company's policy, the inspector refused to sign any documents other than Chas. Martin's Forms.

U.S.C.G. did not board, even though the vessel had not been to a U.S.A. port for about 2 years.

Provisions were of U.S. quality and were expensive. No bonded stores available.

AUTHORITY: Puerto Rico Ports Authority, see "San Juan". *Operator:* Phillips Puerto Rico Core Inc. P.O.Box 1166, Guayama, Puerto Rico 00655. *Tel:* (809) 864-1515. *Telex:* 3451056.

MAYAGUEZ: 18.13 N. 67.12 W.

DOCUMENTS: See "San Juan".

PILOTAGE: Ship's Agents must make arrangements with Captain of the Port Office at Mayaguez Pier well in advance, not less than 24 hours before arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside) as required, showing the letter "P" on each bow. Pilots board 1 to 2 miles offshore of Sea Buoy depending on weather conditions. Pilot service available day and night.

ANCHORAGES: Close to the entrance channel and boundaries. Sufficient depths for larger vessels.

RESTRICTIONS: The bay is easily entered day or night and is a good harbour in any weather, except in a hurricane. The harbour is 3.8 miles wide, and offshore is protected by reefs which extend across the harbour entrance in a general North by West direction.

The principal channel is about 0.4 miles wide, with depths at the entrance of about 47 ft. to 120 ft. and it is marked by lighted buoys and the range. Depth in the inner channel is approximately 30 ft. and close alongside the pier from 28 ft. to 29 ft.

MAX. SIZE: Cargo vessels 600 ft. or more in length call at the port. Safe draft for operations at the wharf is 27 ft.

RADIO: Communication to all points, including ships at sea, is available through commercial systems. Cables-Telex via RCA Communications, Inc., a global service of Radio Corporation of America. ITT World Communications, Inc., tel. 830-3316. Puerto Rico Telephone Company, local and overseas communications services, 129 and 128.

TUGS: Not used at Mayaguez Port.

BERTHING: Berthing permit required from the Ports Authority. The Puerto Rico Ports Authority operates the terminal facilities which consist of a bulkhead wharf approximately 1,200 ft. long, apron width 30 ft., and transit sheds and open storage. There are other berthing facilities in the port which are owned by the tuna packing plants.

STEVEDORES: Arrangements are made by the ship's Agents or representatives.

MEDICAL: The Agent should know in advance of any medical needs so that he can make the necessary arrangements with the U.S. Public Health Service. Good medical and hospital services available.

TANKERS: See "Guayanilla".

Regular calls from Esso and Texaco to unload fuel by means of barges in order to supply tanks on land by means of pipes located at berthing facilities.

FRESH WATER: Available alongside the berth at 4 outlets to supply any amount required at any time. Hose connections of 2.5 in. or less, maximum pressure.

FUEL: All grades available.

FIRE PRECAUTIONS: Standard fire and safety precautions throughout. U.S. Coast Guard regulations.

CONSULS: Dominican Republic, France, Tel: 832-4322. Others at San Juan and Ponce.

REPAIRS: Call San Juan facilities where complete salvage equipment is available. Service to other ports of the island.

GANGWAY/DECK WATCHMEN: Ship provides gangway watchmen.

OPENING/CLOSING HATCHES: By stevedores.

REPATRIATION: Arranged by ship's Agents.

AIRPORT: Mani Airport, 15 minutes from pier, served by regular airlines daily from Mayaguez to San Juan.

TIME: GMT minus 4 hours all year round.

HOLIDAYS: Refer to "San Juan".

POLICE/AMBULANCE/FIRE: Telephone numbers: Police, 343-2020, 832-2300; Ambulance, 832-0496, 832-3212; Fire, 343-2330, 832-2330.

TELEPHONES: Can be arranged by Puerto Rico Telephone Company.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required to go ashore.

AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Mayaguez. Tel: 832-3590.

PONCE: 17.58 N. 66.37 W. (See Plan)

DOCUMENTS: See "San Juan".

PILOTAGE: Pilot services are available day and night.

ANCHORAGES: Harbour is protected from the prevailing Easterly trade winds by enclosing reefs.

RESTRICTIONS: Depths: Entrance channel 50-150 ft.; turning basin, 34 ft..

MAX. SIZE: Max. draft 35 ft.

BERTHING: 9 berths available. Vessels of 1,000 ft. LOA can be berthed. 1×40 ton Paceco Portainer at Berth No. 8. Ro/Ro ramp available. Three container yards; 12 acres, 9 acres and 6.7 acres.

MEDICAL: Ambulance and nurse permanently available at dock area. Other medical services available upon request to the Agent.

FRESH WATER: Water is available whenever ordered in advance, 24 hours a day.

FUEL: Available either by barge or truck.

CONSULS:

Colombia
Denmark
Dominican Republic
Honduras
Netherlands
Panama
Spain
Sweden
Switzerland

REPATRIATION: Arranged by ship's Agents.

TIME: GMT minus 4 hours.

HOLIDAYS: 19 holidays in the year. Work performed 24 hours a day, 7 days a week. Non-working holidays are New Year, Good Friday and Election Day (every 4 years).

DEVELOPMENTS: See "Plan".

AUTHORITY: Port of Ponce, Board of Management, P.O.Box 125, Playa Station, Ponce, P.R. 00734-4125. *Tel:* (809) 848-4992. *FAX:* (809) 840-4681. *Contact:* Jose S. Gonzalez, Port Director.

PORT ARECIBO: 18.29 N. 66.42 W.

Port Arecibo is located on the North coast of the island, 32 nautical miles Westward of San Juan. There is a breakwater to afford some protection from heavy seas, but even so the port is not considered safe for vessel's operations, which are practically non-existent, except for a tug-barge operation (liquid chemicals are pumped out from a tank-barge alongside the pier through a pipe-line to P.R. Chemical storage tanks ashore).

A sizeable fleet of pleasure craft use a section of the berthing facilities. There has been a significant growth in tug-barge traffic calling at the port.

There is a pier 600 ft. long. Depth alongside is close to 20 ft., but there is a shallow spot towards the inshore end of the pier. There is also a 30,000 sq. ft. cargo shed and open storage area.

The port is mainly used as an industrial port.

Port installations are under the control of the Puerto Rico Ports Authority.

Port Arecibo is not a Customs Port of entry.

AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Port Arecibo. Tel: 878-6460.

PORT FAJARDO: 18.20 N. 65.38 W.

The Port of Fajardo lies on the East coast of Puerto Rico. There is a 250 ft. long concrete pier owned by the Puerto Rico Ports Authority for the passenger and cargo ferryboats and other craft which engage in inter island traffic to the islands of Vieques and Culebra.

Port operations are under the control of the Captain of the Port.

For Customs service, the Port of Fajardo is under the jurisdiction of the Fajardo Custom House.

AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Port Fajardo. Tel: 863-0805.

SAN JUAN: 18.28 N. 66.07 W. (See Plan)

DOCUMENTS: Customs:

1. American flag vessels engaged exclusively in the coastwise trade (to or from American ports only, U.S. Virgin Islands ports excepted) are not required to make entry or to obtain clearance. A Permit to Depart is required, however, if loading coastwise cargo.

2. No formal entry or clearance is required for American yachts arriving or departing regardless of destination, but a report of arrival must be made within 24 hours after arrival from foreign ports or from the Virgin Islands.

3. All vessels arriving from foreign ports for discharging and/or loading cargo must report arrival within 24 hours and make entry within 48 hours. Vessels arriving in distress or for the purpose of taking on bunkers, water and/or stores and departing within 24 hours need not make entry or clearance, but must report arrival and comply with certain Customs formalities, such as reporting bunkers and stores taken, before departing.

(a) The following valid documents shall be available for examination and return to Master regardless of length of stay in port:

1. Register or Nationality Certificate.
2. Load Line Certificate (if over 150 tons).
3. Water Pollution Certificate (if over 300 tons).

(b) Additional documents, to be filed in duplicate for Customs purposes, are as follows:

1. Master's Oath of Vessel in Foreign Trade (C.F. 1300).
2. General Declaration (C.F. 1301).
3. Cargo Declaration (C.F. 1302) in the English language.*
4. Ship's Stores Declaration (C.F. 1303).
5. Crew Effects Declaration (C.F. 1304).
6. Crew List/Passenger List (Immigration Form I-418).
7. Clearance from Last Port (original only – if available).

(*) Only one copy of the Cargo Declaration is required for in-transit cargo for foreign ports.

4. NOTE: Specific procedures for the entry and clearance of vessels are extensively described under Part 4 of the Customs Regulations (19 Code of Federal Regulations, Part 4) and Title 46, United States Code. Questions on such procedures may be directed to:

District Director of Customs,
P.O.Box 2112,
Old San Juan, Puerto Rico 00902.
Attention: Carrier Control Branch.
Tel: (809) 725-3310
(809) 721-7777

Or to the Port Director of Customs at the following sub-ports: Fajardo (809) 863-0950, Mayaguez (809) 832-0308, Ponce (809) 842-3195 or 842-1030.

Immigration: From 0800 – 1700 hrs., Monday through Saturday, no charges. Exceptions are Federal holidays, Sundays and periods from 1700 hrs. – 0800 hrs. daily, when overtime charges paid by the Federal Government will be charged to the steamship company according to specified tariff.

Documents required:

1. U.S. Crew List, Form I-418 (only one is necessary) duly visaed by the American Consul at port of departure: if there is no Consul available, list must be signed by the Master and sworn before an Immigration Officer on arrival.
2. If crew is to be given shore leave, Form I-95 is to be prepared for each member of the crew. If this form fully filled out for each member of the crew is not presented to the Immigration Inspectors, crew will be detained on board.
3. Both copies of Form I-95 must be printed (or typed) legibly, not written in script.
4. Whenever passengers are carried, a separate Form I-418 listing each passenger, must be presented in accordance with instructions thereon, together with a Form I-94 if required.

For additional information on Consular Clearances for the Dominican Republic and Venezuela, and Immigration Documentary requirements, said offices should be contacted directly.

Agent:

3 sets of Bills of Lading.
2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchase List.
1 copy of Narcotics List.
1 copy of Passengers List.

PILOTAGE: Pilot services are available day and night. Pilotage is compulsory for: all vessels of foreign registry; American flag vessels bound to or arriving from foreign ports and American flag vessels not having on board a deck officer duly licensed as harbour pilot for Puerto Rico waters.

Ships' Agents must make arrangements with pilot station well in advance (not less than 24 hours) of arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside) with the letter "P" on each bow. Pilots board 3 miles offshore of Sea Buoy. Call Pilot station on Channel 16 VHF. There is no inner anchorage for incoming vessels to wait for the Pilot.

Port Administration: Most of the port terminal installations are under the control of the Puerto Rico Ports Authority. Utilisation of all port terminal facilities is subject to prior application to the Puerto Rico Ports Authority and the issuance of a written berthing permit by the Operations Division of the Maritime Department of the Ports Authority, tel: 725-4667 and 725-8341.

Vessels approaching to enter San Juan Harbour shall remain outside, not less than 3 miles to the North of the harbour entrance, to pick up the Pilot; and vessels ready to depart shall inform the Maritime Traffic Control or look-out station via radio-telephone of their intention.

ANCHORAGES: Deep draft anchorage "E", on the S.W. shore of Isla Grande, is for vessels awaiting Customs or Quarantine, and no vessel shall remain more than 24 hours without a permit from the Puerto Rico Ports Authority and U.S. Coast Guard Captain of the Port.

The effective size of this anchorage area has been reduced on its S.E. sector on account of the construction of barge mooring facilities that encroach on the area.

Restricted Anchorage "F" (Fox), shoreward of the West margin of Anegado Channel, is for vessels discharging explosives. Anchorage permit required from U.S. Coast Guard Captain of the Port and the Puerto Rico Ports Authority.

Anchorage "D", East end of San Antonio Channel, is for yachts, schooners and small craft.

RESTRICTIONS: Besides the harbour entrance channel (Bar Channel) and the main ship channel (Anegado Channel) with depths of 48 ft. and 36 ft. 6 in., respectively, there are 4 other navigable channels in the inner harbour:

The Army Terminal Channel, which runs in a straight North to South direction is approximately 1 mile long and 300 ft. wide with a depth of 37 ft. The channel leads into the turning basin off the Army Terminal on the South shore of the bay. On the Westerly margin of the channel there are located the pile clusters berthing facilities, silos and other shoreside installations for the receipt of bulk grain shipments and petroleum products.

The Puerto Nuevo Channel, approximately 1 mile long and 300 ft. wide, with an average depth of 30 ft. 6 in., runs East-Northeasterly from the Army Terminal Turning Basin to the Graving Dock Turning Basin. This provides access to modern marine terminal facilities in the Puerto Nuevo port zone.

The Graving Dock Channel, approximately 1 mile long and 300 ft. wide, with average mid-channel depth of 29 ft., runs in a general Southeasterly direction from Anegado Channel to the Graving Dock turning basin.

San Antonio Channel, approximately 1.5 miles long and 300 yards wide, with average mid-channel depth of 32 ft. 6 in. – 36 ft. branches out from Anegado Channel for about 0.25 miles up to Isla Grande Light Beacon, thence along the North shore of Isla Grande in a straight West-East direction for about 1 mile to the small craft anchorage "D" and the Yacht Club. This channel is bounded on the North margin by commercial piers and the Frontier Base berthing facilities and in the South by Isla Grande marginal wharf and the container terminal facilities.

MAX. SIZE: Cargo vessels 750 ft. in length call regularly at the Port of San Juan. Channel to tanker berth, 36 ft.

HEALTH: Foodstuffs and plants not to be taken ashore.

RADIO: Radio communication to all points, including ships at sea, is available through commercial systems. Cables, telex via RCA Communications, Inc., a global service of Radio Corporation of America, tel. 723-6170, San Juan, Puerto Rico. Also, Western Union International, tel: 725-2121, ITT All American Cables & Radio, tel: 723-3732, and ITT World Communications, Inc., tel: 725-1515.

The Maritime Traffic Control Station "KRS – 893" at Fort San Cristobal in San Juan Harbour is manned around the clock for radio-telephone communication with incoming and outgoing ships' traffic. Transmitting vessels can communicate with the station through 156.8 MHz (Channel 16) for call and reply and working Channel 14, 156.7 MHz.

TUGS: Crowley Towing & Transportation, tel: (809) 722-1111, telex: ITT 3450056, RCA 3252660, and McAllister Brothers, Inc., Puerto Rico Branch, tel: (809) 721-8888, telex: Towco 3450469, operate a fleet of tugs. Service is available day and night, subject to previous arrangements.

Use of tugs compulsory for docking and undocking vessels 8,000 tons displacement and over unless equipped with bow or side thrusters.

BERTHING: Finger Piers No. 1 – 7 and the open bulkheads between them are located in the Old San Juan waterfront and Piers No. 8 to 14 are situated in the section known as Puerto de Tierra on the outskirts of downtown San Juan at the North margin of San Antonio Channel.

With the exception of Pier 15 and Frontier Base which are Navy property, all the piers including those in the Old San Juan waterfront and the new facilities (Terminals A, B, C, D, E, F, G, H, J, K, L, M and 1/2 N) located in the port zone known as Puerto Nuevo, on the South shore of San Juan, are Ports Authority owned installations. The utilisation of the berthing and other facilities by maritime operators is subject to prior approval by the Ports Authority.

The Port installations in San Juan Harbour aggregate in the neighbourhood of 22,700 lineal ft. of berthing space; 1,100,000 sq.ft. transit shed area: 1,500,000 sq.ft. open storage area and 105 acres of marshalling yards. The latter facilities are located mostly at the Puerto Nuevo port zone and Isla Grande.

All vessels must request and obtain well in advance before arrival a Berthing Permit from the Ports Authority.

Pier 1: North shore of the harbour, in the Old San Juan waterfront, East of Customs Building and next Westerly to the ferryboat landing. Modern twin berth, 770 ft. long, double deck, cruise and passenger vessels' terminal, pierside passenger and baggage gangways, elevators, parking and shopping. Water and light facilities available.

Ferry Terminal: Next Easterly to Pier 1. Ferry terminal for the San Juan-Catano ferry fleet.

Pier 3: North shore of the harbour, Old San Juan waterfront next Easterly to the ferry terminal. Tourist ships' terminal similar to Pier 1. Depths in the approaches and alongside tourist piers 35 ft.

Wharf No. 6: Marginal wharf, 1,300 ft. long, accommodates cruise and passenger vessels. Water and light facilities available.

Pier 7: Northerly continuation of Pier No. 6; 472 ft. long, 1 berth.

Pier 8: East of Pier 7, finger pier, 3 berths, general cargo pier. Transit shed area and other covered storage 171,000 sq.ft., open area 40,000 sq.ft. Water and light facilities available.

Pier 9: East of Pier 8. Finger pier, 3 berths, general cargo pier. Net storage space pier shed 133,738 sq.ft. open area 40,000 sq.ft. Water and light facilities available. South berth is a tug–barge terminal.

Pier 10: North shore of San Antonio Channel. East of Pier 9. Open Finger pier, 1 ship berth, tug and barge terminal. No transit shed space. Water, fuelling facilities and light available.

Wharf No. 11: East of Pier 10, marginal wharf, 1 berth, 580 ft. of bulkhead, general cargo pier. Transit shed area 100,000 sq.ft. ample back area. Water and light facilities available.

Wharf No. 12: An extension of Wharf No. 11 Bulkhead 550 ft. long, wide apron, 15,000 sq.ft. transit shed area, 37,000 sq.ft. open storage. General cargo wharves. Water and light facilities available.

Wharf No. 13: Prolongation of Wharf No. 12: 28,000 sq.ft. transit shed area, 55,000 ft. open storage area, general cargo wharf. Water and light facilities.

Pier 14: Extension of Piers 12–13 bulkhead; marginal wharf, general cargo pier, wide apron. 446 ft. long, 40,000 sq.ft. transit shed area, ample marshalling area. Water and light facilities available.

Frontier Base Pier: Navy facility operated by the Puerto Rico Ports Authority under contract. 2 berths for sea-going vessels. Depth alongside 30 ft. Principally used for berthing of cruise vessels and conventional ocean carriers handling open storage cargo.

Isla Grande Terminal: South shore of San Antonio Channel. General cargo wharf. 1,500 ft. long bulkhead. Wide aprons. Transit shed 32,000 sq.ft. with 240,000 sq.ft. of paved open area. Easterly section of bulkhead for shallow draft vessels.

Container Terminals:

(a) In Westerly section, Bulkhead wharf 1,320 ft. long. Wide apron, ample marshalling yards for trailers. 2×45 tons capacity container handling cranes. Paved marshalling area approximately 1,800,000 sq.ft.

(b) On the South shore, berthing facilities, 300 ft. bulkhead wharf with adjacent areas for TMT's Roll-on/Roll-off operations. Shoreside concrete ramp extending out to seaward. Tug-barge operation, loading and unloading through bow and side ramps, about 30 acres for trailers on exclusive lease basis. Max. draft approximately 18 ft.

(c) Trailer Marine Transport Roll-on/Roll-off three level ramp, barge-tug operation; loading and unloading at bow. Max. draft 18 ft.

The lands in Isla Grande and the conventional cargo handling terminal facilities are U.S. Navy property under lease and operated by the Puerto Rico Ports Authority. These facilities are in the process of being transferred to the ownership of the Puerto Rico Ports Authority.

Pier 15: Bulkhead Wharf and Finger Pier used by commercial vessels. Containerised and general cargo facilities. U.S. Navy installation under lease to Perez & Cia. from Puerto Rico.

Pier 16: Navy installation under lease. Graving and floating docks. See "Repairs".

Puerto Nuevo Docks: Terminals "A" and "B" marginal wharves. 2×500 ft. berths. 102,000 sq.ft. transit shed area. 2 cargo sheds. 30 ft. depth alongside. General cargo piers. Limited open storage area.

Trailership Terminals: 3 at Isla Grande port zone, above, 10 at Puerto Nuevo port zone. Berths C, E, F, G, H, J, K, L and M and West Side Army Terminal.

Berths "J" and "K": P.R. Maritime Shipping Authority Roll-on/Roll-off terminal. Shoreside movable ramps for side loading and unloading. Extra wide pier platform, ample trailer marshalling yards. 600 ft. long marginal wharf.

Berth "D": 100,000 sq. ft. of transit shed space for break-bulk operations and cargo stripping and distribution. Marginal wharf 40 ft. wide, 600 ft. long. Ample trailer marshalling yard. 30 ft. depth alongside, approximately.

Berths "E", "F", "G", "H", "J", "K", "L" (900 ft.), and *"M":* 600 ft. each, continuous bulkhead wharves, Lift-on/Lift-off operation. Max. draft alongside 30 ft. Extra wide pier platforms. Ample trailer marshalling yards. Five 25 ton capacity pierside cranes are installed at Berth "E" to "H".

Army Terminal Pier: Finger pier; 3 berths. Approximately 50,000 sq. ft. transit shed area. East and West berths 600 ft. each. North berth 200 ft. Under the control of the Ports Authority. West side, ramp for Roll-on/Roll-off operation.

Isla de Cabras Pier: Explosives handling pier at Isla de Cabras. Ports Authority property.

BULK HANDLING FACILITIES:

Bulk Grain Handling Facilities: Berthing clusters, silos and other shoreside installations for the receipt of shipments of bulk grains (Nebraska Mills, California Rice Mills, Red Seal, etc.).

STEVEDORES: Arranged by the ship's Agents.

MEDICAL: Medical attendance and services are available for seamen at the United States Public Health Service in San Juan (out-patients). The Ashford Memorial Community Hospital handles internal cases.

TANKERS: *Caribbean Oil Refinery:* Pile clusters berth for handling gasoline and fuel oils, max. permitted draft 33 ft.

Navy Oil Pier: South shore of the bay, next Westerly to Terminal "A", Puerto Nuevo. G.S.A. property leased to Texaco, Esso, Shell. Berthing facilities 350 ft. long and 24 ft. MLW. Bunkers available.

FRESH WATER: Most of the piers have adequate installations to supply water.

FUEL: Served in barges either alongside the vessel at the pier or at anchor. Other combustible liquids are delivered in tank trucks by Shell, Esso and Texaco.

GANGWAY/DECK WATCHMEN: Ship provides gangway watchmen.

OPENING/CLOSING HATCHES: By stevedores.

REPATRIATION: Arranged by ship's Agents.

AIRPORT: On outskirts of port area, served by regular airlines.

TIME: GMT minus 4 hours.

REPAIRS: (a) Puerto Rico Drydock and Marine Terminals, Inc., a commercial ship repair and drydock facility at Pier 16. Graving Dock: 632 ft.×83 ft.×24 ft. – reinforced concrete. floating dock: 200 ft.×40 ft.×15 ft. – reinforced steel. Two 1,000 ft. piers, 1,000 ft. bulkhead. Three cranes: Mobile diesel electric crane – 25 ton lift; Diesel mobile crane 50 ton lift and locomotive crane – 8 ton lift.

(b) San Juan Shipyard & Marine, at Isla Grande, operates dry docking and ship repair facilities including a marine railway and a floating dock 203 ft. long, 44 ft. beam capable of taking vessels up to 1,400 tons.

(c) Vaello Shipyard, at La Puntilla, Catano operates a marine railway for dry-docking and repair of small vessels.

DRY DOCKS: Puerto Rico Drydock and Marine Terminals, Inc., Miraflores St., Stop 11, Tel: 721-6010.

6. Yes.

DEVELOPMENTS: The new port sector, under development at Puerto Nuevo, now at an advanced stage, will ultimately comprise 15 berths, of which 12 are already in operation.

Port facilities used predominantly by trailerships are located towards the Southern sector of the bay. These are marginal wharf type facilities immediately adjacent to the Puerto Nuevo Channel.

Presently, the Ports Authority has initiated the final stage for the development of some 108 acres of land that will be used as back-up lands in connection with the ocean-front operations of Wharves "J" to "N".

This land has been in a process of stabilisation over the last years and presently a project is already under way to remove the sand surcharge deposited on it. The material being removed is being used as surcharge material for the stabilisation of other areas.

The degree to which this stabilised terrain will be further developed will depend on their demand for use by maritime interests.

YABUCOA: 18.02 N. 65.48 W. (See Plan)

DOCUMENTS: The following documents for vessels in foreign trade are required by the U.S. Customs and Immigration Authorities for entry and clearance:

Master's Oath (original and one copy) entry and clearance.
General Declaration (original and one copy) entry and clearance.
Stores List (original and two copies) entry.
Crew Purchases List (Curio List) (original and two copies).
Cargo Declaration (original and one copy).
Crew List (one copy certified and two copies not certified).
Clearance from Last Port (if arriving on an international voyage).
Crewmen Landing Permits (for each crew member without the Plastic Form 1-14).
Passenger List (if any passengers).
All permanent documents of the vessel.

Passenger List: The Passenger List must show full names, sex, age, nationality and occupation of passengers landing at Puerto Yabucoa. The ultimate destination of in-transit passengers must also be shown on the Passenger List.

Deratisation Certificates: Deratisation Certificates cannot be renewed at Puerto Yabucoa.

Outward Clearance: In most cases, the outward clearance and cargo documents will be delivered onboard the vessel, during her free time period or ballast period, prior to leaving the Dock.

Customs and Immigration: U.S. Customs and Immigration authorities will board vessels at the dock, except for unusual circumstances, in which cases they will board the vessel at anchor outside the harbour. The vessels will be required to furnish an accommodation ladder.

American Flag vessels will not require Customs entry or clearance unless arriving from or departing to a foreign port.

PILOTAGE: Harbour pilots must be used by all vessels except for American flag vessels in domestic trade bound to or arriving from a U.S. Port with a deck officer onboard who is qualified and licensed as a Pilot for Puerto Yabucoa.

Pilot services are available at any hour of the day or night. The Ship's Agency will arrange for the Pilot upon notification of arrival. The Pilot will board in-bound vessels approximately 1.5 miles seaward of the channel entrance. The vessel should not approach any closer than this distance until the Pilot is on board.

Every vessel requiring a Pilot must provide, properly rigged and secured, a pilot ladder which conforms to international safety standards. When picking up or disembarking the Pilot, the vessel must heave to and provide a lee with the pilot ladder rigged on the lee side 6 ft. (2 m.) above the water.

ANCHORAGE: If a significant delay in berthing is anticipated the ship may anchor and await berthing instructions. A suitable anchorage is located 1.25 miles South of Punta Negra, Vieques Island approximately 18° 04′ N., 65° 27′ W. (Nautical Chart No. 25650).

This anchorage is to be used only at the discretion of the Master.

APPROACHES: Vessels arriving at Puerto Yabucoa should proceed to approximately 2 miles S.E. of the seaward end of the channel and stand-by on VHF Channel 19A for berthing instructions from Puerto Rico Sun Oil Company, Marine Department and/or the Pilot.

Approach to Harbour: The harbour is entered through a channel 500 ft. wide at its narrowest portion, on a course of 297° True. A rubble mound jetty is located at the N.E. side extending 500 ft. seaward. The channel is dredged to the 48 ft. contour which is approximately 5,765 ft. from shore. Seaward of the 48 ft. contour, a depth of 55 ft. is provided along with a 500 ft. channel width for a total distance of approximately 9,000 ft. from shore. Vessels approaching the channel from the E.S.E. will have a clear approach.

Navigational Dangers: The area seaward of the dredged channel is relatively open and free from danger, but care should be exercised in approaching the channel as soundings decrease extremely rapidly at the channel entrance. Outcrops of hard seafloor material exist in the regions adjacent to the channel.

MAX. SIZE: The maximum draft that can be handled in Puerto Yabucoa is 43 ft.

RADIO:

Notice of Arrival: Vessels calling at Puerto Yabucoa must notify Puerto Rico Sun Oil Company through the ship's Agent 48 hours prior to arrival at Yabucoa Sea Buoy. If ETA is expected to change more than one hour it must be corrected at least 24 hours prior to arrival.

ETA times may be transmitted through commercial stations with a request to transmit the message by way of Telex No. 345-3014 PRSNOIL or Telex No. 345-0789.

Radio Communications: The following radio stations are available for communicating with Puerto Rico Sun Oil Company or the ship's Agency in Yabucoa.

a. Commercial Coast Stations:
  (1) Lantana Radio (WOE) – Lake Worth, Florida.
    Equipped with RCA automatic land line circuit direct to New York City, San Francisco and Washington, D.C.
  (2) New York Radio (WNY) – New York City.
    Equipped with RCA automatic land line circuit direct to New York City, San Francisco and Washington, D.C. Also equipped with teletypewriter (TWX) for direct communication with steamship companies in the United States having this equipment.
  (3) Chatham Radio (WCC) – Chatham, Massachusetts.
    Equipped with RCA automatic land line circuit direct to New York City, San Francisco and Washington, D.C.
  (4) Virgin Islands Radio (WAH) – St. Thomas, Virgin Islands.
    Very High Frequency (VHF)
    (a) Channel 16 – calling channel
    (b) Channel 28 – working channel

b. Puerto Rico Sun Oil Company Stations:
  The following stations are authorised to handle Puerto Rico Sun Oil Company business traffic only and cannot accept public correspondence calls.
  (1) Puerto Rico Sun Oil Marine Department and Ship Agency (WLZ) Yabucoa, Puerto Rico. On the air from 0800 hrs. to 1700 hrs. (1200 hrs. to 2100 hrs. GMT) Monday through Friday, except holidays.
    (a) Very High Frequency (VHF) Channels
      Channel 19A – standby and working channel.
      Channel 16 – standby channel (monitored during office hours).
    (b) Single Side Band (SSB) Frequencies
      4143.6 kHz – working frequency.
      8291.1 kHz – working frequency.
      12429.2 kHz – working frequency.
      16587.1 kHz – working frequency.
      2182 kHz – distress frequency.
  (2) Normally on the air and monitoring VHF Channel 19A during the period when Station WLZ is off the air.
    (a) Marine representative on call (WLZ).
    (b) Marine Portable No. 8 (KO 3274).
      Main Gate at Yabucoa Sun Oil Refinery (guarded 24 hours).
    (c) Tug "Marcus Hook Sun" (WX 7830).
    (d) Tug "Puerto Rico Sun" (WYZ 2756).
    (e) Tug "Seminole Sun" (WYZ 3110).
  The tugs are on the air 24 hours a day, although they are not always in Yabucoa Harbour.

BERTHING:

Docking Procedures: Upon arrival at the Sea Buoy the vessel must have:

(a) The engine on manoeuvring speed for picking up the Pilot and for entering the channel.
(b) Deck machinery and lines ready for docking and tying up port side to the Dock.
(c) Port anchor backed out of the hawse pipe and free to run.
(d) Vessels arriving in ballast must have the propeller submerged and have a trim of not more than 10 ft. by the stern.

Notice of Readiness: Notice of Readiness to load or discharge is warranty that the vessel is in all respects ready to receive or discharge cargo and that the vessel's equipment is ready and capable of loading or discharging petroleum products. Puerto Rico Sun Oil Company reserves the right to refuse to accept such Notice of Readiness if, upon inspection, the vessel is found not to be ready to receive or discharge the cargo. Vessels may tender Notice of Readiness upon arrival, berth or no berth, according to the terms of the Charter Party or Contract of Affreightment under which they have been engaged.

CARGO FACILITIES:

Connecting and Disconnecting Hoses: A crew will be provided by Puerto Rico Sun Oil Company to handle mooring lines and to connect and disconnect hoses and loading arms on the ship. Vessels are required to have blanks removed from cargo and ballast lines which will be used during cargo or ballast transfer when the vessel docks. In order to properly connect 2 loading arms to the vessel, the risers onboard should be at least 6 ft. between centres.

Communications for Cargo Transfer: Portable radios are provided by the shore crew for communications during loading and unloading operations. The Mate must sign a receipt upon receiving said radios, and is responsible for returning them prior to sailing. Failure to return the radios shall result in billing for the cost of same. The original signed receipt shall constitute proof of liability. The ship must obtain this original when radios are returned.

Ballast: All dirty ballast must be pumped ashore to the ballast facilities. The ballast facilities can receive 70,000 barrels of ballast through a 24 in. line capable of receiving a pressure at the ship's rail of 125 p.s.i. Vessels are requested to arrive with a minimum of dirty ballast.

All clean and segregated ballast may be discharged overboard, provided the vessel is in compliance with all regulations as stated in 33 CFR 157.43.

Crude Oil Washing: Crude Oil Washing is permitted in Puerto Yabucoa provided the vessel complies with all safety and regulatory procedures as stated in 33 CFR 157, Sub-chapter D.

Vessels may Crude Oil Wash more than one third of their tanks provided it has been so stated in the terms of the charter agreement.

Butterworth Facilities: Puerto Rico Sun Oil Company has Butterworth facilities at the Main Dock, however, these facilities may not be used without prior approval and agreement from PRSOC.

The use of these facilities is normally restricted to cleaning Sun Company equipment due to the high utilisation of the Main Dock by vessels transferring cargo.

Pumping Data: The crude oil, products and ballast water are pumped through loading arms on the dock.

The sizes and approximate pumping rates are as follows:

Arm No.	*Product*	*Flange Size* (in.)	*Line Size* (in.)	*Max. Pumping Rate* Bbls.Hr.
1	Bunker C	10	14	6,000
	Ballast	10	24	10,000
2	Gas Oil	10	14	10,000
	Ballast	10	24	10,000
3	Jet Fuel	16	14	12,000
	Naphtha	16	12	7,500
	Kerosene	16	20	12,000
	No. 2 Fuel Oil	16	20	18,000
	Lt. Distillate	16	20	18,000
4	Lube Oils	10	14	5,000
5	Slack Wax	10	10	2,500
6	Aromatic Extract	10	8	1,500
7	Crude Oil	16	24	20,000
	Ballast	16	24	10,000
8	Crude Oil	16	24	20,000
	Ballast	16	24	10,000
Hose	Marine Diesel Fuel	4	4	150

TUGS: The use of tugs is compulsory for arriving and departing vessels. Sun Transport, Inc. has 3 tugs available to assist in docking and undocking. Arrangement for the use of tugs should be made through the Agent well in advance of the vessel's arrival.

MEDICAL: Medical and dental services are available in Yabucoa. Requests for ambulance service or hospitalisation for crew members can be made through the ship's Agent.

FRESH WATER: Fresh water facilities at this port are limited to approximately 100 tons while vessel is discharging or loading.

FUEL: Bunker C and Marine Diesel fuel oils are available at Puerto Yabucoa. Arrangements for bunkering should be made with a Puerto Rico Sun Oil Company Marketing Representative prior to the vessel's arrival in Yabucoa.

CONSULS: No consular representatives are located in Yabucoa. Many nations maintain consular representatives in San Juan. Specific information can be obtained from the ship's Agent.

REPAIRS: Limited repair facilities are available in San Juan. Requests for such services should be made through the Agent at least 48 hours before the vessel's arrival.

SURVEYORS: Classification Society Surveyors are available from Ponce or San Juan. Requests for these services should be made through the vessel's Agent at least 48 hours prior to arrival.

Cargo Inspection Services are available for quantity and for quality inspections of incoming and outgoing cargoes. The ship's Agent can arrange for such services, if requested. This service must be requested at least 48 hours prior to the vessel's arrival.

SHORE LEAVE: When the vessel is berthed at Puerto Yabucoa there normally are no restrictions on shore liberty. In order to avoid delays in sailing, Masters are requested to ensure that all crew members are onboard their vessel at sailing time. There are no facilities to provide shore liberty from vessels at anchorage awaiting berth.

Crew members from foreign vessels must carry their crewman's landing permit, Form I-95A, when on shore liberty.

GENERAL:

Consignment: All vessels calling at Puerto Yabucoa Harbour Tanker Terminal should be consigned to Puerto Rico Sun Oil Company, or to Hemisphere Oil Company, and all official documents for such vessels should show them so consigned. In conformance with Port Regulations no vessel will be allowed to tie up alongside a pier without having first obtained a berthing permit from the Ports Authority Captain of the Port.

Charts: The general Puerto Yabucoa Bay area is shown on USC & GS Chart No. 25661.

Ensigns: By international customs and usage, the American Flag is required to be flown at the masthead of all vessels from the time of entering the channel in-bound until clearing of the channel out-bound.

Sea Conditions: The wave action in the vicinity of the channel entrance is generally from the East or Southeast. Wave heights are less than 6 ft. 90% of the time, however, during tropical storms or hurricanes, wave heights can get substantially higher.

Weather: Easterly and Northeasterly winds are predominant over this region of Puerto Rico. January through March is the windiest season. September through November is the calmest season. The principal season for hurricane activity is during late Summer and early Fall.

Sanitary Facilities: Pollution laws and regulations prohibit vessels from discharging overboard sanitary and galley wastes into the harbour. Pollution laws and regulations also prohibit vessels from discharging galley wastes and garbage ashore.

Puerto Rican Laws: All vessels calling at Puerto Yabucoa shall comply with all applicable Laws and Regulations of the United States and of the Commonwealth of Puerto Rico.

Firearms and Ammunition: All firearms and ammunition must be shown on the Stores List and may not be removed from the vessel during its stay in Puerto Rico waters. Any violations of this regulation will result in fines and confiscation of firearms and ammunition.

Store and Supplies: Limited ship chandler service is available in Puerto Yabucoa. Stores and supplies can be ordered through the ship's Agent for delivery to the vessel, but such orders must be made at least 48 hours prior to the vessel's arrival.

Crew Transportation: Public transportation (Publico) for crew members from the Dock into town is available. The "publico" fare is to be paid by the crew member. Transportation to and from the airport can be arranged through the ship's Agent.

There are no water transportation facilities available at Puerto Yabucoa for vessels at anchor.

Mail: Official and personal mail may be addressed to the vessel in care of the Agent, and will be delivered to the vessel by the Agent on arrival. The Agent will accept official and personal mail from the vessel and will ensure its delivery to the local U.S. Post Office. Express mail and air freight services are also available.

Vacating of Berth: Vessels will be required to vacate berths promptly upon completion of loading or discharging cargo. Permission to use a berth when not loading or discharging cargo may be granted under special circumstances, and must be requested through the Agent.

Vessels discharging cargo will be allowed time for ballasting if required.

If a vessel fails to vacate the berth on the expiration of allowed time, it will be held liable for payment of any demurrage and/or damages incurred by Puerto Rico Sun Oil Company as a result of delays to other vessels awaiting berths, or for any other consequence of its failure to promptly vacate the berth.

AGENCY: *Selection of Agent:* Agency services are provided at Puerto Yabucoa by Puerto Rico Sun Oil Company. No other agencies are located at the port. Agencies from other ports may handle vessels calling at Yabucoa but, because of extremely poor communications in Puerto Rico, this can cause problems in possible ship delays.

Vessels may contact the Puerto Rico Sun Oil Company Ships Agency located within 500 ft. from Dock in Yabucoa, as follows:

Mailing Address: Ships Agency,
Puerto Rico Sun Oil Company,
P.O.Box 476,
Yabucoa, Puerto Rico 00767.

Telex No. Yabucoa: 345-3014 PRSNOIL or
345-0789 YABSOIL.

Panafax No.: (809) 893-0250.

Telephone Numbers
Yabucoa: (809) 893-2554 – Direct Line Marine Department an
Ship's Agency.
(809) 893-2424/893-2073 Yabsunoil Switchboard
Extensions: 2276, 2282, 2286.

Deposit: The Agency requires a deposit of $15,000 for port expense only. Other expenses such as cash to Master, excessive air trave provisions, etc., to be wired additionally to Bankers Trust New Yor Account No. 04-201-336, to be credited to Banco Popular, Hato Re Account No. 137-003080 in name of Puerto Rico Sun Oil Ships Agenc

SHIPMASTER'S REPORT: August 1986.

Position: Lat. 18° 03′ 18″ N., Long. 65° 50′ 08″ W.

Pilotage: Compulsory for non Sun Oil vessels. Pilot boards 1.0 to 1. miles off the Sea Buoy.

Restrictions: Berthing and unberthing possible day and night.

Anchorage: 2.5 miles East of Sea Buoy in depths of 10-25 fathoms.

Approach to Berth: No difficulties.

Immobilisation of Engines: Allowed with permission of Sun Oil.

Berth: North side of Yabucoa Bay. Wharf well fendered with berthin dolphins. Maximum length of vessel is 870 ft. and the max. dra alongside the berth and in the channel is 44 ft.

Tugs: 2×3,800 h.p.

Density: 1025.

Brief Description of Shore Line System: Position of connection midships. Maximum loading rate 12,500 bbls.p.h. per pump. 2 pump available for each line.

There are 8 loading arms, sizes from 10 in. to 16 in.
2 for crude oil.
1 for aromatic.
1 for slack wax.
1 for lube oil.
1 for naphtha.
1 for gas oil and ballast.
1 for bunker and ballast.

Bunkers and Lubricants: Available.

Fresh Water: Available.

Stores and Laundry Facilities: Available. Handled by San Jua companies.

Tank Cleaning and Dirty Ballast Facilities: Possible. Maximum capaci for dirty ballast 100,000 bbls. Sun Oil does not accept any leade washings or dirty ballast from tanks which previously contained leade cargo.

Points of Interest: Minimum ballast arrival draft:

Forward	14 ft.
Aft	24 ft.

No gangway from shore available.

SHIPMASTER'S REPORT: January 1988.

Documents: see "San Juan". Requirements similar to U.S. Ports.

Immigration: As for San Juan. Immigration Officer and Agricultu Inspector from Fajardo board on arrival for formalities.

Pilotage: Available on a 24 hour basis when required. Pilot boards fro tug about 2 miles E.S.E. of buoyed channel entrance. After initial conta on Channel 16, pilot and tugs use Channel 73 for all berthing operatio

Anchorages: There are no safe anchorages for large vessels in th vicinity of Yabucoa. The designated waiting anchorage is off the islan of Vieques, some 20 miles to the East of Yabucoa, where there is sa anchorage on the coastal bank. We anchored 1.5 miles South of Pun de Tierra, in approximate position Lat. 18° 04′ N., Long. 65° 28′ W. i a depth of about 24 fathoms. The vessel remained there in winds of u to Force 7, for 3 days without any problems. Some fishing buoys ma be encountered within this area. BA. Charts are of insufficient scale, an it is recommended that Masters obtain the relevant U.S. charts for th area.

Max. Size: Our vessel is 97,000 d.w.t. and 253 m. long, and was berthe without undue difficulty, although space is very tight. The vess immediately preceding us had been of 117,000 d.w.t., but with a pa cargo. Oil Company states up to 45 ft. acceptable, but pilots not prepare to go above 43 ft. Our vessel was 41 ft. draft and had no difficultie although only a little under-keel clearance.

Communications: Puerto Rico Sun Oil Co. has VHF in office, and usual listens on Channel 16 during office hours (Monday to Friday, 080 1700). They are not easy to contact at lunchtime, and there is no wat kept during weekends or 'fiestas'. The radio is in the Marine Departme Office near the jetty. They also have telex, (206) 345-3014. The Mari Department also provides Agency services if nominated. They we used by us on this occasion. Also see "Pilotage".

Tugs: According to the Pilot, two tugs are usually stationed here, an used for most vessels up to about 100,000 tons displacement. Over th size, at the pilot's discretion, a third tug is brought from a nearby po for berthing (we used 3 tugs). One tug is usually sufficient for sailing.

Berthing: Only one large vessel can berth at a time as there is only on jetty.

Vessels usually berth port side alongside. There are no mooring boa to handle lines, ropes are sent via messenger when vessel very ne to the jetty. There is no shore gangway, means of access has to b provided by the vessel.

Medical: Doctors and small hospital available locally for ordina illnesses. Anything serious is attended to in San Juan (which is 2 hou by road). It was not possible to get Cholera vaccinations update although if urgent these could be done in San Juan, but this would b very expensive due to distance.

Repatriation: No difficulties encountered. At time of our visit there was one direct flight weekly to and from U.K., and numerous daily flights from Europe and U.S.A. The airport is 2 hours by road from Yabucoa. Crew members being repatriated leave the vessel 4.5 hours before flight departure time in order to complete outward Immigration formalities before going to airport.

Shore Leave: Allowed – Form I–95 required.

Provisions: Obtainable from various Chandlers in San Juan, a delivery charge is made. As jetty very cluttered, it is necessary to carry all stores by hand up the gangway, therefore berth is not very suitable for major storing of large objects.

General: The port is privately maintained by Puerto Rico Sun Oil Co. Crude oil is the main import and various refined products are exported. There is also a barge jetty, and a facility for barges to load graphite from a Union Carbide plant.

AUTHORITY: Puerto Rico Ports Authority. See "San Juan".
Captain of the Port, Yabucoa. Tel: 893-2408.
Operator: Puerto Rico Sun Oil Co. (See "Agency").

NOTES

Please also advise Shipping Guides Ltd.

Qatar

DOHA: 25.17 N. 51.32 E.

DOCUMENTS:
8 copies of the Unfreighted Manifest.
2 copies of the Freighted Manifest.
2 copies of the Hatch List.
2 copies of the Stowage Plan.
2 copies of the Dangerous/Hazardous Cargo List.
1 set of Bill of Lading.
1 copy of Crew List.
A list of Food Stuff.
A list of Insecticides and any Poisonous Cargo.

Agents:
1 copy of the Arrival Report (Supplied by the Agent on boarding).
1 copy of the Crew List.
1 copy of the International Declaration of Health.
1 copy of the Passenger List (if applicable).

Port Health:
1 copy of Crew List.
1 copy of Dates and Types of Inoculations.
1 copy of the International Declaration of Health.

Immigration:
4 copies of Crew List.
4 copies of Lists of Passengers Landing (if applicable).

Customs:
Bonded Store List (Bond will be sealed but issues are available).
Port Clearance Certificate should be procured before the vessel sails.

PILOTAGE: Compulsory pilotage for all vessels of 14 ft. draft or more. Naval vessels exempted. Application for a Pilot should be made to the "Doha Port Control" through VHF (Channel 16), 24 hours prior to the arrival of the vessel at the pilot station (via Bahrain Radio).

Pilot station keeps a VHF watch 24 hours a day on Channels 16 and 14. Call sign Doha Port. Similar watch kept on R/T 2182 kHz.

Pilot boat proceeds to the vicinity of the Doha Light Vessel, position Lat. 25° 16′ 08″ N., Long. 51° 41′ 05″ E. when the Pilot is required. Pilot launches are painted white. When the vessel is underway the Pilot requires a pilot ladder complete with manropes.

ANCHORAGES: Near the Doha Light Vessel and Southerly from it only. Minimum depth of water 5 fathoms.

RESTRICTIONS: Depth of water in entrance is 27 ft. plus tide and the minimum depth of water required under the keel for manoeuvring in the channel is 3 ft.

MAX. SIZE: Max. length 600 ft., up to 625 ft. by special permission from Harbour Master. Max. breadth 90 ft. Max. draft 28 ft. 6 in. on favourable high tide.

HEALTH: The International Flag signals for Pratique must be flown and remain up until the vessel is cleared by the Port Health Authorities. A Port Health Official will board the vessel in the anchorage or at the Deep Water Jetty when the vessel is alongside. There is no Automatic or Radio Pratique available.

RADIO: ETA and Agent's messages should be routed through Doha Radio. Doha Radio A7D, continuous watch on W/T 500 kHz., R/T 2182 and VHF Channel 16. Radio-telephone communications through Doha Port signal station. Calling and listening 2182 kHz. Working frequencies, 2638 kHz, 2738 kHz, 2570 kHz.

TUGS: 7 Government tugs are normally available to assist in berthing operations.

BERTHING:

5 Berths – Total length 956 m. (Deep Water Berths); depth alongside 9.1 m.

4 Berths – Total length 893 m. (Shallow Water Berths); depth alongside 7.5 m.

Outer and inner dredged approach channels, 8.2 m. and 9.1 m. depth (C.D.) Wharves for smaller craft: West Inner Wharf 207 m., Collins Jetty 135 m.; Country Craft Jetty 287 m.; Fish Factory Wharf 60 m. Depths 2.5 m. to 6.0 m. (C.D.)

Equipment: 2×70 ton, 4×40 ton, 3×30 ton, 3×20 ton cranes, 2 straddle carriers, 2 container cranes and 122 trailers.

Transit storage areas at landward end of approach causeway with extensive paved open storage and transit sheds giving 16,722 sq.m. cover.

New transit storage area on extended main quay with extensive paved open storage, 5 transit sheds giving 30,000 sq.m. cover completed. Construction of 500 ton cold storage completed. Control tower for Doha Port is under construction.

Normally berthing and unberthing to and from the deep water jetty is with certain reservations:
(*a*) Draft and trim of vessel.
(*b*) Height of tide.
(*c*) Visibility from Navigation Bridge.
(*d*) Prevailing weather conditions.

The duty Pilot has the option to berth or unberth a vessel at his discretion after consultation with the Senior Pilot, when the above mentioned conditions are unfavourable.

STEVEDORES: ETA advice is required on the number of gangs workable. Advance notice is required for any heavy lifts (say in excess of 10 tons) and the consignee's name if possible as special arrangements have to be made for handling. Average discharge rate is 75 tons per hook per day.

MEDICAL: Unless an emergency no advance notice is required. Hospital facilities do exist and a doctor will visit on request. Current Vaccination and Cholera Certificates are required.

DENSITY: The density of the water is salt (1025) at all states of the tide.

FRESH WATER: Fresh water is available at the anchorage and when alongside the jetty and is supplied by tankers.

FUEL: Bunkers available from Qatar National Tanker and Bunker, Doh
Actual Bunkering Locations:
Doha Port Harbour
Pilot Station Doha
Umm Said Harbour
Pilot Station Umm Said
Inner Anchorage
Outer Anchorage
Pilot Station – Halul Island

Grades Available: IFO 180, M.D.O., IFO other than 180 with 14 days pre-notice, upon request.
Supply Method:
Barge QNB.1 – 2 products – 650 tonnes.
Tanker ZOR – 2 products – 5,300 tonnes. Equipped with 3 Yokoham fenders – 1.7 m. diameter × 4 m. on port side.
Pumping Rates: Barge: 2 pumps. 100 tonnes per hour. ZOR: 3 pumps 750 tonnes per hour.
Operation: 24 hours per day – 7 days per week.

CONSULS: The following countries maintain embassies in Qatar:
Bangladesh
Egypt
France
Gabon
Germany F.R.
Great Britain
India
Iran
Iraq
Japan
Jordan
Korea
Kuwait
Lebanon
Libya
Mauritania
Morocco
Oman
Pakistan
Saudi Arabia
Somalia
Sudan
Syria
Tunisia
U.S.A.
Yemen

REPAIRS/DRY DOCKS: All kinds of repairs can be carried out. Metal locking, bottom brushing and underwater welding. Floating doc 105 m.×19 m.×6 m. Capacity 10,000 d.w.t.

GANGWAY/DECK WATCHMEN: The Public Security Departmen (Police) post a guard at each gangway, but it is advisable that the shi also supplies a watchman. Before landing *every* crew member mus lodge his Passport or Seamen's Identity Card with the guard whe alongside the jetty and at the dock Police Station when at the anchorag

OPENING/CLOSING HATCHES: This work may be carried out by cre or stevedores, but usually by the latter.

CUSTOMS ALLOWANCES: Qatar is "dry" and no official allowance i made. The bond is sealed on the ship's arrival.

CARGO GEAR: No additional requirements apart from those require by International Law.

REPATRIATION: Crew changes can be carried out. The Agents wi need to know the names, Discharge Book or Passport numbers an necessary information of dates, etc. well in advance for the Authorities Repatriation is normally by air. Crew joining must have Seaman's Boo

AIRPORT: It is about 3 miles from the port to the airport. There ar regular flights to Europe, U.K. and India by British Airways, M.E.A Air India, P.I.A., Gulf Air, etc.

TIME: The standard time in Qatar is GMT plus 3 hours.

HOLIDAYS: The holidays in Qatar are usually religious and therefor fall on movable dates. As far as shipping is concerned there are only days when work is not possible under any circumstances, Idd Al Fi and Idd Al Adna.

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.

TELEPHONES: Telephone available at the new jetty. No. 414865.

SHORE LEAVE: Shore leave is permitted after the Immigratio Authorities have cleared the ship and given permission, in writing, o the Crew List. Seamens' documents or Passports must be deposite with the police at the gangway and retrieved on returning aboard.

IDENTIFICATION CARDS: Discharge Books or Passports are require to be handed to the Police before any crew member may procee ashore. See "Shipmaster's Report".

GENERAL: Particular attention must be paid to:
(1)The Qatari flag must be flown at all times at the fore mast.
(2) Liquor is not allowed ashore and it is a serious offence to offe alcohol to a Qatari.
(3) Smoking is not permitted in any of the port areas.

SHIPMASTER'S REPORT: November 1984.

The Public Security Department warned me that the crew are no allowed to take a walk around the jetty when it is a holiday or th stevedores are not working.

Therefore, the crew must go directly outside the harbour limits or the stay on board.

The Security Department did not post a guard at the gangway bu every crew member before landing must present his Passport Seamen's Identity Book to the Immigration and they issue a shore perm that will be shown to the guard together with the Seamen's Identity Boo

The guard will keep the Seamen's Identity Book and the crew ca cross to the Harbour Gate with the Shore Permit.

When the crew come back to the ship they collect their Seaman Identity Books at the Gate but can keep the Shore Permit for the ne time they go ashore.

Before the ship sails all the issued shore permits must be returned Immigration.

AUTHORITY: Department of Ports, Ministry of Communications Transport, P.O.Box 313, Doha, Qatar. *Tel:* PABX 457457. *Telex:* 43 Mawani DH. *Cables:* "Mawani". *Contact:* The Harbour Master, Te 414287. A. Jaber Muftah, Director of Ports.

HALUL ISLAND: 25.40 N. 52.25 E.
Halul Terminal S.B.M. (See Plan)

LOCATION: Halul Island (Position Lat. 25° 40.3′ N., Long. 52° 24.6′ E.) is part of the State of Qatar. Doha, the capital, is situated on the Eastern side of the country.

Halul Island is 52 miles in a N.E'ly direction from Doha. It serves as the export terminal for Qatar Marine Crude which is produced from the offshore oilfields of Idd El-Shargi, Maydan Mahzam, and Bul Hanine. The Halul Terminal is operated by Qatar General Petroleum Corporation (Offshore Operations).

Halul Island: The island is roughly circular in shape with a radius of approximately 0.5 miles. The island is hilly, rising to an elevation of 202 ft. (61.6 m.). (Charts: U.S. Government Charts: 62400, 62397, 62402, British Admiralty Charts: 2886, 3950, 3517, 3953).

The island is fringed by a reef which in places extends about 3 cables offshore.

The island is barren, with a number of oil storage tanks, a small industrial complex and personnel living quarters. There is a harbour on the Southern side of the island which is only for use of small craft.

DOCUMENTS: Following papers are required on arrival:

Notice of Readiness.
2 Crew Lists.
2 Health Declarations.
1 Latest Light Dues Certificate.

The Berthing Officer acts as ship's Agent and on behalf of National Customs and Immigration Authorities.

PILOTAGE: A Pilot is at all times to be considered as an advisor to the Master. The latter shall remain solely responsible for the safety of his vessel.

Boarding: When VHF contact is made with Halul Control the Pilot will advise the Master whether he should proceed to anchor or whether a Pilot will board the vessel immediately.

A Pilot will board the vessel about 2 miles East of Halul Island. The vessel is expected to make (if necessary) a good lee for the pilot launch.

Ship Deficiencies: The Master should inform the Pilot of any deficiencies on his vessel and any unusual characteristics pertaining to his vessel e.g. lack of astern power, time to change from ahead to astern, etc.

Pilot Signals: The vessel must display the proper signals prior to and subsequent to the boarding of a Pilot.

Pilot Ladder: The vessel shall rig on the starboard side, a pilot ladder which must conform in construction to all recognised international standards for pilot ladders. On vessels over 50,000 d.w.t. there shall be rigged either a mechanical pilot hoist or a combination of pilot ladder and accommodation ladder.

In the latter case the Pilot must not be expected to climb more than 9 m. on the pilot ladder.

There must be provision for the Pilot to pass safely from the head of the ladder to the deck of the ship.

Any such pilot ladder must be rigged well clear of all overboard discharges. 2 manropes are to be fitted, one on each side of the ladder, together with a safety line if conditions warrant such. At night both the ladder and the point of access must be properly illuminated.

A responsible officer must be in attendance when shore personnel are boarding/disembarking.

Note: To prevent unauthorised persons from boarding the tanker unobserved, particularly at night, the pilot/accommodation ladder must be retrieved after the Pilot and his assistant have boarded.

NAVIGATION: A light is exhibited at an elevation of 220 ft. (67.1 m.) from a white concrete tower with a black top, 16 ft. (4.9 m.) in height, situated on the summit of Jazirat Halul. Light characteristic is Fl.W.R. 12 secs. W 19M R 9M. Sectors W 030° – 300° (270°) and R 300° – 030° (90°) over pipe-line area. On the Western and Eastern arms of the small boat harbour there are floodlights illuminating the breakwaters. There are various radio masts with red lights, the highest being 365 ft. above sea level. On each of the SBM loading points there is a light morse "U" every 20 secs.

Deepwater Channel: To the East of Halul there are 2 buoys marking a deepwater channel which is the recommended departure channel for all vessels.

H-1 Green conical – Quick flash green.
H-2 Red – Quick flash red.

Prohibited Navigation: The offshore oilfields are prohibited for navigation because of the numerous production stations, drilling rigs, wellhead jackets and oil and gas pipe-lines.

The location of the 3 oilfields are:

1. Idd El-Shargi with centre Lat. 25° 28.9′ N., Long. 52° 22.6′ E. radius 2 miles.
2. Maydan Mahzam with centre Lat. 25° 36.0′ N., Long. 52° 33.1′ E. radius 2 miles.
3. Bul Hanine with centre Lat. 25° 25.5′ N., Long. 52° 44.0′ E. radius 5 miles.

Navigational Warning: Masters should be aware, when crossing any pipe-line, that many pipe-lines are not under the seabed and that the charted water depth may be reduced by at least 2 m.

It is strongly recommended that vessels do not pass South of Halul when making passage to/from Umm Said or Doha.

ANCHORAGES: Vessels are advised to anchor in an area centred on a position from Halul Island Light 087° × 2.5 miles with radius 6 cables. Water depth is 70 ft. – 80 ft. and the bottom is sand.

Prohibited Anchorage: The area covered by the red sector of the Halul Island Light is to be taken as a prohibited anchorage. This is due to the number of oil pipe-lines within this area.

MAX. SIZE: SBM No. 1 up to 22 m. draft. (In certain conditions of weather and tide a maximum draft of 25 m. can be accepted). SBM No. 2 up to 29 m. draft. Displacement limit of 640,000 tons for both SBMs.

HEALTH: See "Medical".

RADIO: *General:* QGPC (Offshore) has its own radio station in Doha call sign Alpha Seven Sierra (A7S). Cable address: Qatoff Doha (attn. PDA). Telex: Qatoff 4201 DH (Attn. PDA).

A sub-station is also maintained on Halul Island (call sign "Halul Radio").

A7S maintains 24 hour watch on 500 kHz while Halul Radio maintains a continuous radio watch on VHF Channels 6 and 16.

Vessels bound for Halul should contact "Halul Radio" approximately 6 hours prior to arrival on VHF Channel 6.

Long distance communication (initial ETAs, etc.) will normally be routed via Bahrain Radio. However, the 72 hour arrival confirmation and any other queries to the Agent can be sent direct to A7S.

Advance Notice of Arrival: A vessel must advise:

(a) Its ETA at Halul at least 72 hours before arrival.
(b) Confirmation of any amendment to its ETA at Halul 24 hours before arrival at Halul.
(c) On arrival at Halul, the exact time of arrival at Halul.

Note: Any failure to observe the laid down sequence of ETA advice may delay the loading of the vessel at Halul.

Vessels should contact Halul Radio on VHF Channel 6 approximately 6 hours prior to arrival at Halul or as soon as VHF contact can be made.

Ships Loading at Other Gulf Ports: Masters are advised that when they commence loading at the last port before Halul they should instruct their Agent to send a corrected ETA for Halul to QGPC (Offshore Operations).

Standard Cable: On receipt of the 72 hours ETA advice QGPC (Offshore Operations) will transmit via Bahrain Radio and/or A7S Doha a standard cable containing details of cargo, quantities, etc. (See below.)

If any vessel has any queries with regards to this cable or if the vessel can not comply with the requirements of the cable the Master should contact QGPC (Offshore Operations) immediately.

Halul Terminal Standard Cable via A7S or Bahrain Radio
Ship's ETA
To: Master .... Call Sign................

We confirm your vessel to load approximately .... bbls Qatar Marine Crude for discharge...........loading temperature .... Degrees F, API ....

Vessel to berth at SBM-1 or 2 approximately 3 miles, 130° off Halul Lighthouse.

Terminal will provide 2 mooring lines and you are requested to have 2 messengers ready forward.

Ship's **starboard** manifold and derricks/cranes should be ready to connect 2×16 in. hoses at SBM-1 and at SBM-2. You are requested to have 16 in./20 in. reducers ready. Derrick/crane should be ready to lift 10 tons.

Ship's crew guided by our foreman are required to moor vessel and connect hoses. When Berthing Master, for whom please make a good lee, has boarded, crew should be ready to immediately lift on board mooring gear from the pilot launch on their starboard side.

Please reconfirm final ETA when within range of Halul Radio Channel 6. Information for berthing and hose conections will be given by Halul Radio prior to arrival. Berthing Master will board 2 miles East of Halul. Please acknowledge. Confirm Derrick/crane equipment suitable. Advise deballasting time, maximum loading rate available, your draft on arrival and on sailing from the SBMs and if patented bow chain stoppers available, indicate type.

Qatoff Doha.

VHF: A Company VHF station on Halul Island, call sign "Halul Radio" maintains a continuous watch on Channels 16 and 6 (Channel 6 being the working frequency). The station has a range of approximately 50 miles and incoming tankers should establish communications with this station when within range.

Ship to shore communication during loading is by portable VHF Radio telephone with emergency shutdown system, provided by the terminal.

TUGS: Not available.

BERTHING: Approach is from the open sea, passing to the Eastwards of Halul. There are 2 single buoy moorings. No. 1 SBM in position Lat. 25° 38.7′ N., Long. 52° 26.4′ E. This berth will primarily accommodate vessels up to 640,000 tons displacement. No. 2 SBM in position Lat. 25° 38′ 36″ N., Long. 52° 27′ 35″ E. This berth will accommodate vessels with up to a draft of 29 m. In both berths, mooring lines from the buoys are secured on the forecastle head using equipment provided by the terminal or using ship's bow chain stoppers if fitted. A suitable messenger rope should be ready for use. No moorings are used aft. The Berthing Master will advise in detail the mooring procedure.

	SBM 1	*SBM 2*
Position from Halul Lt.	138°×2.25 miles	126°×3.25 miles
Loading pipe-line	30 in.	48 in.
Submarine hoses	1×20 in. 1×16 in.	2×24 in.
Floating hoses	1×20 in. with 2×16 in. tails	2×20 in. with 16 in. tails
Length of hoses	1×840 ft. with 2×150 ft. tails	1×1,020 ft. and 1×1,000 ft.
Manifold Connection	2×16 in.	2×16 in.
Mooring Ropes	2×15 in. braided nylon grommets	2×15 in. braided nylon grommets
Water depth	105 ft. (32 m.)	120 ft. (36.5 m.)
Max. draft	72 ft. (22 m.*)	95 ft. (29.0 m.)
Loading rates	6,000 cu.m./hr.	12,000 cu.m./hr.

*Also see "Max Size".

HOSE CONNECTION:

Connection Position: Hoses will be connected/disconnected on starboard side by ship's crew. The Operations Assistant will give guidance to the crew as required.

Connection Sequence: The first hose will be the tanker rail hose string. It must be connected to the forward of the 2 manifold connections.

Hose Sizes: Tanker rail hoses on both SBMs are 2×16 in. diameter.

Ship Lifting Capacity: To lift these hoses a derrick or crane with a SWL of 10 tons minimum is required.

Connection: The hoses shall be bolted to the ship's manifold with a bolt in every hole. When the hoses are connected the weight of each hose shall be taken by hanging a strop (supplied by shore) from the ship's derrick or crane.

LOADING:

Load on Top: If load on top is to be practiced at Halul, the Berthing Officer will measure the quantity of residue in the slop tank.

Commencement of Loading: Upon request from the ship's duty officer the Berthing Officer will instruct the shore to commence loading. Loading commences by gravity and when the ship is satisfied that the cargo is flowing into the ship, the shore will be instructed to start pumping.

Loading Rates: SBM 1 maximum loading rate is 6,000 cu.m./hr. using diesel pumps.

SBM 2 maximum loading rate is 12,000 cu.m./hr. using either turbine pumps or a combination of turbine and diesel pumps.

Quantity Checks: During loading, ship and shore should check the quantity of cargo loaded every 2 hours and compare figures. If there is a large discrepancy, the quantities should be re-checked and if the difference remains, with no explanation from the ship, then an inspection of the pipe-line and hose systems may be necessary.

Valve Operation and Surge Pressures: During full speed loading, the ship should inform the Berthing Officer if any valve manipulation, which is likely to restrict the flow of oil, is going to take place. Ships should be aware of the potential dangers of creating a pressure surge by closing valves too quickly and/or restricting the flow of oil by other means, i.e. change of loading lines.

The Master will be held responsible for any apparent or subsequently apparent damage to the shore pipe-line and hose system, resulting from surge pressure(s) caused by failure of the ship's pipe-line/valve system or the mismanipulation of the ship's valves.

A pressure recorder will be installed at the ship's manifold for continuous monitoring of pipe-line pressures.

Completion of Cargo Operations: Final topping up operations should only be conducted in the presence of the Berthing Officer in the cargo control centre. The ship should give the shore 1 hour's notice of completion of cargo followed by 15 minutes' notice.

Loading can be completed by gravity which gives a rate of about 1,500 t.p.h.

Communications: Communication between ship and shore is by VHF radio (supplied by shore) which will be positioned in the cargo control room. This radio will have an emergency stop frequency. In the event of an emergency this facility can be used to stop the loading operation at the shore terminal.

Precautions: A watch must be maintained on the radio link with the shore. Connections at the manifold must also be watched continuously for any signs of leaks, ruptures, etc.

MOORING:

Preparations: When the Pilot has boarded, the ship's crew is required to use ship's derrick or crane over the side to lift the mooring and hose connecting equipment on board from the pilot/mooring launch. An Operations Assistant will board with the Pilot. He will give guidance to the ship's crew on mooring and also on connecting the hoses.

Briefing: Prior to approaching the SBM the Master, Pilot and Officer delegated to duty on the forecastle should meet and the Pilot will brief all concerned on the mooring operation.

Mooring Operation: On approaching the SBM the ship should make ready a rope messenger suitable for passing over the stem of the tanker to the mooring launch. This rope will be joined to a 10 in. pick-up rope (500 ft.) which is in turn connected to a 50 ft. pick-up wire and then the chafe chain. Each chafe chain is connected to a 15 in. grommet of braided nylon.

The starboard mooring is always picked up first.

All vessels must comply with the OCIMF "Standards for Equipment Employed in the Mooring of Ships at Single Point Moorings".

Safe Practices: Masters and crew should be aware at all times of safe working practices while mooring the ship. Ideally the chafe chains should come through the central Panama Lead. If this is not possible, each mooring should be taken on board at points equidistant from and on either side of the centre line, as close together as possible.

SBM Security: From the time of completion of mooring, the ship shall station a lookout on the forecastle. This lookout must inform the Berthing Officer in the event that the ship is likely to come into contact with the SBM.

Immobilisation of Engines: Under no circumstances should the ship's engine be immobilised, but should be ready to manoeuvre at all times.

Maximum notice will, however, be given where conditions warrant the use of the main engine.

BALLAST:

Maximum Freeboard: The SBM loading points off Halul Island can be considered exposed location berths. To ensure that a vessel is always safely moored it may be necessary in times of marginal weather to maintain a certain maximum freeboard in order to reduce chances of shock loads on the moorings. The Pilot will advise the Master accordingly.

Note: The SBM's at Halul are considered exposed location berths. To ensure that a vessel is always safely moored the maximum freeboard forward (Panama lead to waterline) must not exceed 18.3 m. (60 ft.) at any time whilst the vessel is in the berth.

Deballasting: Vessels whose pipe-line/pump arrangements permit simultaneous loading and discharging of cargo tank ballast are expected to do so in order to maintain freeboard as low as possible.

The same applies to vessels with segregated ballast systems.

All other vessels will normally deballast prior to loading, however in marginal weather conditions such vessels may be asked to load part cargo prior to deballasting.

Dirty Ballast Facilities: No dirty ballast facilities available. All vessels must arrive with clean ballast.

CARGO QUANTITIES/DOCUMENTATION: *Ullaging:* On completion of loading the ship must ullage all tanks into which cargo has been received. The Master is required to complete an ullage report provided by the shore.

Early Departure Procedure: In order to avoid delays to ships, Halul Terminal follows the "Early Departure Procedure" for the completion of cargo documents. When cargo loading is completed the Berthing Officer will receive the departure papers from the shore. These will include documents completed as far as possible but without cargo quantities. The Master should sign these forms and retain on board copies of Bills of Lading for Master and Consignee and any other completed documents. Preliminary cargo figures will be transmitted by radio to the ship prior to the Berthing Master's disembarkation. The Master should insert these quantities in the various incompleted forms on board.

Departure from Halul Island will be dependant on ship/shore agreement on the preliminary cargo quantities.

Forms to be Signed: The following is a list of forms which have to be completed for each parcel of cargo and received by the Master. (Not all documents are signed by the Master.)

Bill of Lading.
Cargo Manifest.
Certificate of Quantity and Quality.
Discharge Certificate.
Master's Receipt of Documents.
Arrival Report.
Disbursement Memo.
Certificate of Origin.
Ullage Report.
Customs Export Bill.
Customs Clearance.
Port Timesheet.

Discharge Certificate: We stress the importance of the Discharge Certificate placed on board at the completion of loading. It is absolutely essential that the Discharge Certificate should be completed in duplicate in respect of every discharge whether for entire or part cargo.

The Discharge Certificates will be accompanied by a letter of explanation giving guidance on the processing of these certificates and the attendant correspondence required.

DEPARTURE: *Unmooring:* When all ship's papers have been completed and the hoses disconnected the vessel is ready to sail. The port mooring should be released first. The mooring should be lowered to sea level and the pick-up rope paid out slowly to allow the mooring launch to receive the pick-up rope on board. The starboard mooring will then be released.

Pilot Disembarkation: When the vessel has been unberthed the Pilot will disembark to the East of the two SBMs and well clear of the submarine pipe-line area. Laden vessels should under no circumstances navigate in the pipe-line area to the South of Halul Island.

Final Figures: Final shore cargo figures will be transmitted to ship before the Berthing Master disembarks and they will also be relayed via Bahrain Radio or A7S in Doha. The Master should insert these quantities on the various forms.

DENSITY: At berth, 1028/1030 (approximately).

CARGO: Flash point below 32° Fahrenheit.

H_2S Content in Halul Crude: H_2S Hydrogen Sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour.

If exposure to hazardous concentrations of this gas is likely to occur, appropriate safety precautions should be taken. Suitable respiratory protection should be available during ullaging and sampling.

The TLV is given as 10 p.p.m. but concentrations in enclosed spaces should be reduced as far below this level as practicable and if men are to work without breathing apparatus, a nil concentration should be achieved before entry is permitted and effective ventilation should be maintained.

On tankers regularly committed to the carriage of sour crude, H_2S gas indicators should be provided.

It is important to realise that the concentration of H_2S can be measured and expressed in two different ways:

The p.p.m. in the liquid, by weight;
The p.p.m. in the air, by volume.

Producing and Processing Departments at terminal often use the liquid measure for H_2S content, and this could be confusing to tanker officers who usually think of H_2S as expressed in air volume measure. There can be a vast difference between the two measures. The measure in air is higher and can be very much higher. For example, chemists have measured a concentration of 7,000 p.p.m. (deadly) in the vapour stream coming out of ullage opening when a tank is being topped off with a crude oil containing only 70 p.p.m. H_2S in the liquid. Therefore, it is of vital importance to appreciate that a sour crude can release a lethal concentration of H_2S into the air.

The following guide to the effects on exposed persons of various atmospheric concentrations of H_2S gives some indication of its dangers:

Measured in air by volume	
50 to 100 p.p.m.	Eye and respiratory tract irritation after exposure of 1 hour.
200 to 300 p.p.m.	Marked eye and respiratory tract irritation after exposure of 1 hour.
500 to 700 p.p.m.	Dizziness, headache, nausea, etc., within 15 minutes; loss of consciousness and possible death after 30 to 60 minutes exposure.
700 to 900 p.p.m.	Rapidly produces unconsciousness and death occurs a few minutes later.
1000 to 2000 p.p.m.	Death is apparently instantaneous.

Apparent death from H_2S is not irreversible as prompt and efficient artificial respiration may restore life.

The terminal should advise the Master if the cargo to be loaded contains H_2S in concentrations which cause the gases vented during loading to be hazardous if inhaled. When handling cargo with noticeable

H_2S content or when ballasting after discharge of such cargo, it is recommended that the following precautions should be taken.

The officer supervising the operations should keep a sharp watch on personnel for signs of fatigue or distress.

Lifelines, breathing apparatus and resuscitator should be readily available.

Loading through the pump room should be avoided where possible to reduce the possibility of H_2S contamination of the pump room atmosphere.

Gas should be vented through the cargo tank venting system and, if open ullaging is necessary, the ullage plugs should be kept open only for a minimum period of time.

When ullaging tanks, personnel should work in pairs and stand at right angles to the wind direction in relation to the ullage opening.

Personnel should not enter a pump room without first starting the ventilation, checking that there is no gas present, and without someone else standing by. If any gas concentration is recorded, a self-contained breathing apparatus should be worn.

Other spaces into which H_2S may have been drawn should be ventilated and checked before entry.

Persons overcome by H_2S should be moved to a gas free area immediately and artificial respiration should be administered at once.

Gas tests should be made on deck and in accommodation at regular intervals and particularly during the topping-off periods. If concentrations exceed 10 p.p.m. inside the accommodation or 50 p.p.m. on deck more than 10 ft. from a gas outlet, the loading rate should be adjusted and if this does not result in a decrease of the gas concentration, loading should be stopped until conditions have improved or other suitable measures are taken.

During discharge, the pump room bilges should be kept dry.

During loading or ballasting operations, conspicuous notices warning of potential danger should be posted on deck and at pump room entrance, and at the entrance to any other space which could be affected.

MEDICAL: There is no doctor on Halul Island. If there is any sickness on board, details should be included in the vessel's ETA message.

In emergencies the services or advice of the QGPC Medical Officer in Doha may be obtained. If the doctor or patient has to be flown from Doha the vessel concerned will be charged for the helicopter hire and the services of the doctor.

TIME: Local time is GMT plus 3 hours.

FRESH WATER: Not available, except in cases of extreme emergency if a supply boat is available. For this service a charge of 1 day's supply boat hire plus cost of water will be charged.

FUEL: Various grades of bunkers available, diesel and fuel, ex barge or lighters at Halul anchorage provided minimum 7 days' prior notice given.

Also see "Doha".

CONSULS: The following countries maintain Embassies in Qatar.

Algeria
Bangladesh
Egypt
France
Gabon
Germany F.R.
India

U.S.S.R.
Yemen

REPAIRS: Not available.

SURVEYORS: (1) Watson Grey & Caleb Brett, Doha.
(2) Lloyd's Register in Bahrain.

TANK CLEANING: No facilities available and ships must arrive with clean ballast, lines and pumps.

CUSTOMS: Trading in liquor is *strictly* prohibited and no alcoholic drink should be offered to Arab nationals.

REPATRIATION: Changes of personnel can be carried out at Halul Island. This can only be carried out on a limited scale due to scarcity of accommodation and transport. For crew joining a ship, Owners should notify the Agency, at least 48 hours in advance of arrival in Doha, the details of the personnel and the arriving flight. Crew leaving a ship at Halul can be arranged but advance notice is required.

SAFETY: Vessels must at all times comply with safety regulations as detailed in the ISGOTT (International Safety Guide for Oil Tanker and Terminals) published jointly by the International Chamber of Shipping and the Oil Companies International Marine Forum.

Safety Check List: This check list must be completed prior to loading. The Berthing Master and the Master of the vessel or a responsible officer will jointly carry out the safety inspection.

Cessation of Loading: If during loading operations, the Berthing Officer becomes aware of any unsafe working practice or safety hazard, loading will cease until such time when the safety hazard has been removed. All delays thus incurred will be for vessel's account.

Hydrogen Sulphide: It is brought to the ship's attention that Qatar marine crude contains Hydrogen Sulphide (H_2S). See "Cargo".

Emergency Towing Wire: Whilst moored to the SBMs all vessels must have Emergency Towing Wires ready, both fore and aft. The total length of the towlines must not be less than 100 m. when paid out. The eyes of the wires must be kept hanging just above sea level, ready for immediate pick-up by a tug/supply boat.

Tanker Emergency: In case of an emergency on board the Tanker the Berthing Officer must immediately be informed. He will act as liaison between ship and shore.

If for whatever reason the Berthing Officer is incapacitated the Master/Officer on duty must inform Halul Control, giving brief details of the type of the emergency via the portable VHF radio (walkie-talkie) provided by shore.

In case of fire, explosion, etc., cargo must be stopped immediately by requesting "Emergency Stop" via the walkie-talkie and/or via the emergency stop frequency (push-button) provided in the radio.

The Master may also call the QGPC radio station in Doha (call sign "Alfa Seven Sierra") on the ship's VHF Channel 16, giving details of the emergency and the kind of assistance required, if necessary.

SHORE LEAVE: Not permitted.

GENERAL:

Meteorological Service: A daily 24 hour weather forecast is issued at 0930 L.T. This forecast covers the area of Halul Island and the offshore oilfields. Details of this forecast can be obtained from Halul Control or, if vessel is at one of the SBMs, from the Berthing Officer on board the vessel.

Tidal Information: Halul Island can be found in British Admiralty tide tables Volume 2. Halul is a secondary port based on the standard port of Shatt al-Arab.

Climatic Conditions: Masters and crews should be aware of the extreme climatic conditions which exist in the Halul area during the months of June through October. Everybody should be made aware of the dangers of heat and sun stroke.

Stores and Laundry: Not available at Halul Island.

Courtesy Flag: The Qatar National flag should be flown during daylight hours when a vessel is at Halul Island.

Mail Service: There is an excellent mail service from Qatar to all parts of the world. Qatar stamps must be used on all mail sent through the national post office.

Blue air letter forms are not accepted.

Mail will be handled after completion of the tanker mailing request.

AUTHORITY: Qatar General Petroleum Company (Offshore Operations) – Marine Department, P.O.B. 47, Doha, Qatar. *Tel:* 402666. *Telex:* 4201 Qatoff Doha. *Cables:* Qatoff, Doha. *Contact:* Captain J. Sexton, Marine Superintendent.

UMM SAID: 24.54 N. 51.34 E. (See Plan)

DOCUMENTS:

2 Crew Lists.
1 Stores List.
Also see "Doha".

BUOYED CHANNEL: All vessels wishing to navigate the Umm Said Buoyed Channel must obtain prior clearance from Umm Said Control who can be contacted on VHF Channels 14 or 16 or by Telex via Doha Radio, addressed to Petroqat Umm Said. This precaution is essential to avoid unexpected encounters with deep-laden oil tankers.

APPROACHES:

Approach to Umm Said Terminal: With Halul Island peak astern steer 235° for a distance of 31.5 miles to (K) Kareinein Light Buoy in position Lat. 25° 24′ 18″ N., Long. 51° 56′ 16.4″ E., thence 226°, 12 miles to (M) Mishut Light Buoy in position Lat. 25° 15′ 51″ N., Long. 51° 46′ 43.4″ E.

From Mishut Light Buoy steer 214° for a distance of 8 miles to (W) Wakrah Light Buoy, leaving this light buoy on the port hand.

From Wakrah Light Buoy steer 180° for a distance of 6.4 miles, to (H) Hul Light Buoy leaving this buoy to port.

From a position of 2 cables West of (H) Hul Light Buoy, steer 164° for a distance of 1.9 miles to pass between Nos. 1 and 2 Outer Channel Buoys, thence 158° 30′, 0.3 miles to pass between Nos. 3 and 4 Outer Channel Buoys, thence 178°, 0.9 miles to leave No. 6 Outer Channel Buoy on port hand, thence 173°, 1.6 miles to pass between Nos. 7 and 8 Outer Channel Buoys, thence 191° 30′, 1.6 miles to pass between Nos. 9 and 10 Outer Channel Buoys, thence 176°, 0.8 miles to pass between Nos. 11 and 12 Outer Channel Buoys.

From a position midway between Nos. 11 and 12 Outer Channel Buoys, steer 157° for a distance of 2.2 miles, leaving S.E. Arrif Buoy on the starboard hand, thence 217° for a distance of 3.25 miles, leaving S. Arrif Buoy on the starboard hand.

After rounding S. Arrif Buoy, steer 335° for a distance of 1.7 miles, passing close West of No. 1 Inner Channel Buoy, thence 003°, 1.1 miles, passing close East of No. 2 Inner Channel Buoy.

From a position close East of No. 2 Inner Channel Buoy, steer 348°, 0.5 miles to pass between Nos. 3 and 4 Inner Channel Buoys thence 323° to round Turning Buoy, leaving this buoy on the port hand.

From Turning Buoy steer a course to enter the designated Anchorage Area. The Northern limit of the designated Anchorage Area is a straight line joining the Turning Buoy and Fairway Buoy positions.

Masters of vessels anchoring at Umm Said are required to use the appropriate anchorage. With the exception of emergencies only, anchoring outside this area or obstructing the fairway is *not* permitted.

Prohibited Area: A prohibited area enclosed by the pecked lines (See "Plans") has been established. Masters of all vessels are prohibited from entering, anchoring or fishing within this area unless permission has been granted by the Corporation.

Outward Passage: The reverse track is followed as for the inward passage described above.

Charts: Admiralty Chart No. 3787 – Approaches to Musay'Id and Ad Dwaha.

Admiralty Chart No. 3950 – Fasht al Arrif to Ras Laffan.

Admiralty Chart No. 3786 – Umm Said Harbour.

Depths: In the Outer Channel there are least depths of 36 ft. (10.97 m.) in the vicinity of Nos. 1 and 2 Buoys, 3 and 4 Buoys and Nos. 9, 10, 11 and 12 Buoys.

Between the Outer and Inner Channel the depth varies from 40 ft. (12.2 m.) at Nos. 11 and 12 Outer Channel Buoys through 72 ft. (22.0 m.) and 78 ft. (23.8 m.) between S.E. Arrif and S. Arrif Buoys to 47 ft. (14.3 m.) close to No. 1 Inner Channel Buoy.

In the Inner Channel the least depth is 37 ft. (11.28 m.) between Nos. 3 and 4 Inner Channel Buoys.

From the Inner Channel to the Anchorage the depths vary from 43 ft. (13.1 m.) between the channel and Turning Buoy to 48 ft. (14.6 m.) at the Anchorage.

Tidal Conditions: In general the flood stream sets to the S.S.W. and the ebb stream to the N.N.E. the rate being up to 2 knots at Springs.

Cross sets will consequently be experienced in the channel, more particularly in the Northern part of the Outer Channel, between the Outer Channel and S.E. Arrif Buoy and between S. Arrif Buoy and the Turning Buoy. It should be noted that at the Outer Channel Entrance the flood stream continues to set to the Southward for some time after the tide has started to fall. During the flood tide particular care should be taken on rounding S.E. Arrif Buoy as the current sets strongly on it.

Tides: The tides in this area have a large diurnal component and at times there is only one HW and one LW in the 24 hours. This irregularity is more pronounced at Umm Said than at the Outer Channel Entrance for which predictions are made.

In December the HHW, or the only HW during periods of single day tides, occurs between 0500 and 1400 hrs.; in March between 2200 and 0900 hrs.; in June between 1800 and 0100 hrs. and in September between 0900 and 2100 hrs.

At Umm Said there are a few days in the year when the tide does not rise above 5 ft. (1.52 m.) and there are considerable periods each day when the predicted height of the tide is greater than 3 ft. (0.91 m.).

In the vicinity of Nos. 3 and 4 Inner Channel Buoys, HW occurs about 1 hour after HW at the Outer Channel Entrance and the rise of tide is slightly more than at the Outer Channel Entrance.

The HHW is normally 5 ft. (1.52 m.) or better rising to 8 ft. (2.44 m.) at exceptional Springs.

Abnormal meteorological conditions may affect all the above tides by ±2 ft. (0.61 m.).

PILOTAGE: Inward and outward pilotage is compulsory for all hydrocarbon vessels loading at Umm Said Oil or NGL Terminals.

Pilot will board and leave vessels in the vicinity of (M) Mishut Buoy.

Pilot Ladder: Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend pilot ladder clear of launch, and then step on to lower platform of accommodation ladder. Vessels should comply with the current U.K. Merchant Shipping (Pilot Ladders) Rules.

Automatic pilot hoists should not be used unless such use is agreed to by the Pilot. On no account should weighted heaving lines be used in the vicinity of the pilot boat or mooring launches.

Pilotage is compulsory for dry cargo ships bound to for Umm Said Anchorage only if the draft is 33 ft. or over. Pilotage performed by Doha Pilots.

ANCHORAGES: Eastern Anchorage. Depth 48 ft.

Anchorage for dry cargo vessels is available in Umm Said Harbour more than one mile North of the Fairway Buoy. The anchorage to the S.E. of the Fairway Buoy is reserved for tankers and vessels drawing over 10.0 m. draft. Dry cargo vessels using this anchorage must obtain permission from Umm Said Terminal.

Prohibited Anchorage: A Prohibited Anchorage has been established in the vicinity of (W) Wakrah Light Buoy to protect submarine pipe-lines laid in the area. A yellow can buoy (Fl. Y. 10 secs.) (Radar Reflector) has been laid in position Lat. 25° 13′ 51″ N., Long. 51° 45′ 23.4″ E. and a line drawn 073°/253° from the coast through this position marks the Northern boundary of the Prohibited Anchorage. A similar buoy (Fl. Y. 6 secs.) (Radar Reflector) has been laid in position Lat. 25° 8′ 18″ N., Long. 51° 41′ 54″ E. and a parallel line drawn through this position marks the Southern boundary of the Prohibited Anchorage.

RESTRICTIONS: In the case of crude oil shipments, mooring, loading and unmooring is carried out at all times (weather permitting).

NGL Jetty: Mooring and unmooring operations are restricted to daylight hours.

MAX. SIZE: (Also see "Cargo Handling Facilities"). Draft of laden tankers leaving Umm Said is controlled by the depth at the outer end of the Outer Channel. This is 36 ft. (10.97 m.) below Chart Datum and Zero of Predictions. Tide rarely falls below 1 ft. above datum, so that there is normally 37 ft. (11.28 m.) or more in the channel.

Experience shows that even under the worst weather conditions there is no appreciable movement on larger ships in the Outer Channel. As deep-draft vessels always reduce speed between Nos. 3 and 4 Inner Buoys and in the Outer Channel, there is very little "draw down". Deep-draft vessels should endeavour to pass between Nos. 1 and 2 Outer Buoys at HHW for the Outer Channel Entrance.

NGL Jetty: Max. acceptable length 950 ft., min. length 550 ft. Max. acceptable capacity 120,000 cu.m. Minimum acceptable capacity 30,000 cu.m.

Underkeel Clearance: The following table stipulates the *minimum* underkeel clearance for vessels using the Umm Said Channels.

Vessels up to 99,999 d.w.t.	– 3 ft. Clearance
Vessels from 100,000 to 149,999 d.w.t.	– 4 ft. Clearance
Vessels over 150,000 d.w.t. and 320,000 d.w.t.	– 5 ft. Clearance
(See "Terminal Information – Berth limitations").	
LPG Carriers (all sizes)	– 5 ft. Clearance

Navigation in Shallow Waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Pilot/Mooring Masters and Masters of ships should be guided by the following:

(a) Due consideration should be given to the effect of draw down at speed on vessel's draft in shallow water, bearing in mind vessel's trim.

(b) If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

(c) Ensure accuracy of vessel's draft reading, including the midship drafts, having in mind the tendency of vessels to sag and the adverse effect of a small list.

(d) Reduce to a minimum safe speed to pass over and near shoal areas.

(e) Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.

(f) Note that list can mean an appreciable increase in draft.

(g) When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid-channel.

Particular attention should be paid to rounding the S.E. Arrif Buoy on a flood tide, especially when heading South. Extra allowance for set should always be made.

HEALTH: (Quarantine and Medical Clearance). Medical attention to Masters and crews of ships provided by Q.G.P.C. Medical Officer when asked for by Master.

RADIO: Doha Radio – A7D – continuous watch on W/T 500 kHz, R/T 2182 kHz and VHF Channel 16.

Doha Port continuous watch on R/T 2182 kHz and VHF Channels 16 and 14. Umm Said Terminal for channel clearance keeps continuous watch on Channel 16. When advising their ETA ships must state their last port of call within the previous 21 days and report any sickness on board. If the last port of call is Bahrain or Ras Tanura, the previous port must be stated.

Vessels are requested to inform Petroqat, Umm Said by cable of their ETA at (M) Mishut Light Buoy and whether or not Pilot required, 72 hours and confirm 24 hours prior to their arrival. It should be clearly indicated that times quoted are in GMT. They should also state the quantity of cargo, in long tons, and the maximum loading rate required, deballasting time and whether able to load and discharge ballast concurrently. Any crew changes and/or medical treatment required should also be notified in this cable.

Except for Tankers, all vessels must contact Doha on VHF for ETA advice. Umm Said Terminals should be contacted for channel clearance.

These cables should be addressed to Petroqat, Umm Said, and passed via Doha Radio.

The following cable is sent to all vessels by Agent (Petroqat):

Quote:

Advise your ETA at pilot station Mishut (M) Buoy in GMT 72 hours and confirm 48 hours, 24 hours and 12 hours before arrival. Pilotage is compulsory and in order to confirm pilot boat arrangements essential you advise firm ETA 48 hours before arrival to avoid any delays. Rig combination accommodation/pilot ladder on Lee side before arrival. Pilot hoist and weighted heaving lines must not be used. Tugs are available if required. Please advise your requirements 48 hours in advance.

It is preferred that mooring hawsers in general consist of rope where possible but all wire moorings or wires with rope tails are acceptable. Please note, however, that for safety reasons, all springs which are connected to the main jetty must be of rope or wires with rope tails.

Please advise your last cargo, and confirm that your tanks are cooled down and ready in all respects to receive your nominated cargo. Butane and propane can be loaded concurrently if required. Loading lines are 12 in. diameter and vapour return lines are 8 in. diameter all fitted with Class 150 ASA flanges. Your attention is drawn to the Prohibited Anchorage (Lat. 25° 10′ N.) safeguarding the submarine pipe-lines laid in the vicinity of Wakrah (W) Buoy.

If your vessel is fitted with telex which has high (75B) and low (50B) speed transmission, please ensure that your machine is operating on low (50B) speed mode to ensure that we receive clear, ungarbled text.

Petroqat Umm Said

Unquote.

Telex: Vessels fitted with telex machines may make contact through Telex No. 4050 Qpausd Dh. However, only the low (50B) transmission mode should be used to ensure the receipt of clear, ungarbled text.

High (75B) speed transmission mode must not be used.

VHF: Umm Said Terminal is equipped with VHF radio equipment operating on Channels 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 67, 68, 69, 70, 71, 72, 73, 74 and 77 of international maritime mobile telephone service.

A continuous 24 hour listening watch is maintained on Channel 16, the call sign being "Umm Said". The range of station is approximately 50 miles.

Berth Radio Frequency: Tanker berthing/loading operations are carried out using intrinsically safe portable VHF radio sets on a frequency of 155.975 MHz (transmit and receive). These radio sets also have the facility to use VHF Channel 9.

TUGS: Given sufficient prior notice a tug can usually be made available on request.

BERTHING: Pilots act in same capacity as Mooring Masters in the berthing of vessels, after which they supervise raising of flexible hoses and connection to ship's manifold. During loading operation they act as the Corporation's representatives.

Vessel's crew are expected to assist with hose connecting.

North Berth is a Single Point Mooring in position Lat. 24° 53′ 37.2″ N., Long. 51° 34′ 54″ E., connected to the shore installation by a 36 in. submarine pipe-line. The seaward end of the pipe-line and buoy terminates in 2×16 in. flexible floating hoses. Vessels are moored by a single hawser from bow to buoy. From 1987, all vessels must be equipped with a "Tongue Type" bow mooring chain stopper to OCIMF Standards.

The following equipment should be carried by each vessel:

- *(i)* One 4 in. circumference × 40 fathom messenger rope ready for use at the bow together with mooring lines of suitable size ready for use.
- *(ii)* One good boat rope at least 200 ft. long ready at accommodation ladder position.
- *(iii)* Derrick or crane rigged over the port side manifolds should be capable of lifting 16 in. floating hose to a height of up to 30 ft. above deck (S.W.L. 10 tons).
- *(iv)* Reducers or adaptors if necessary to be bolted to the ship's manifold flanges so as to take 2×16 in. loading hoses.

Warning: Ship's anchors must never be used within 0.5 miles of this berth or the 36 in. submarine pipe-line and must therefore be well secured at all times.

The South Berth consists of a Conventional Buoy Mooring, connected to the shore by a 24 in. submarine pipe-line. The seaward end of the pipe-line terminates in 2×16 in. flexible hoses.

Vessels are moored at this berth by ship's anchors and mooring buoys. The following equipment should be carried by each vessel.

- *(i)* Port and starboard anchors to be fitted with marker buoys and sufficient line. This will facilitate recovery of anchor in the event of loss.
- *(ii)* One good boat rope at least 200 ft. long ready at accommodation ladder position.
- *(iii)* 4 good mooring lines aft, of a suitable size for the vessel on which they are used. Each line should consist of 120 fathom hawser, tailed by a similar hawser and ready to run out when required.
- *(iv)* 2 good mooring lines forward similar to the after lines for use on the Shama'al Buoy (No. 6).
- *(v)* Two 3 in. circumference messenger ropes, one forward and one aft.
- *(vi)* 2 good rope stoppers to be available forward. 4 good rope stoppers to be available aft.
- *(vii)* Derricks or cranes rigged over the port side manifolds should be capable of lifting 16 in. flexible hose from the seabed to a height of up to 30 ft. above deck (S.W.L. 10 tons).
- *(viii)* Reducers or adaptors (if necessary) bolted to ship's manifold flanges so as to take 2×16 in. loading hoses.
- *(ix)* Carpenter's stoppers are provided on loan by Q.G.P.C. for use with Corporation's 4.75 in. wires if required. However standard practice is to connect mooring wires to vessel's own wires or drums and heave onto main drum. Chain stoppers must not be used.

Note. Where a vessel has 2 or more loading connections, the ship's flanges should not be less than 4 ft. apart.

TERMINAL INFORMATION:

Berth	*Max. t.p.h.*	*Fixed sea-line*	*Over rail hoses*
North (SPM)	7,000	One – 36 in.	Two – 16 in.
South (CBM)	5,000	One – 24 in.	Two – 16 in.

Depth of Water: Available depth of water at seaward end of sea-line is as follows:

North Berth (SPM)	65 ft. (19.6 m.)
South Berth (CBM)	48 ft. (14.6 m.)

An allowance of 8 ft. for South Berth has been made for height of sea-line end cradle above the sea bed.

Berth Limitations:

North Berth (SPM) – 320,000 Summer d.w.t.
Bow to manifold 590 ft.
South Berth (CBM) – Maximum 320,000 tons Summer d.w.t.
Minimum 50,000 tons Summer d.w.t.

Note: Minimum size of vessels at CBM is governed by vessels length – 650 ft. minimum.

Large tankers loading at either berth will be required to maintain a minimum of 20% of SDWT ballasted/loaded condition at all times and maintain an even trim.

After the vessel has been securely moored in berth, the hoses are lifted and connected to the ship's manifold.

The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs should be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the vessel as to any signals needed for local requirements.

The Mooring Master brings an intrinsically safe portable radio to the ship. The radio may not be used for private conversation.

The use of the ship's radio during loading is strictly prohibited. Portable intrinsically safe radios used by ship's personnel to control loading procedures is permitted however, provided such use does not interfere with ship/shore communications.

When loading is completed, hoses will be disconnected and lowered, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Mooring Master or direct to sea.

NGL Jetty: This is a 'T' type jetty with breasting dolphins flanked either side by 2 mooring dolphins. Water depth at the berth is 42 ft. (C.D.).

Suitable for berthing vessels of approximate dimensions LOA 550 ft. (168 m.) to LOA 950 ft. (290 m.). The use of 2 tugs is mandatory for berthing and unberthing.

Connections:

(a)	Propane Vapour Return	8 in.	150 ASA flanges
(b)	Propane Liquid	12 in.	150 ASA flanges
(c)	Butane Liquid	12 in.	150 ASA flanges
(d)	Butane Vapour Return	8 in.	150 ASA flanges

Bulk Ethylene Jetty: Ethylene tankers are moored at the Qatar Petrochemical Company's facilities at Berth No. 19. Liquid is loaded through one Chicksan type 12 in. loading arm and there is a similar 6 in. vapour return arm. Flanges are Class 150 ASA.

Water depth at the berth is 42 ft. (Chart Datum). Mooring and unmooring operations are restricted to daylight hours.

Tugs are available to assist in mooring and unmooring.

CARGO HANDLING FACILITIES: Government Pilots provide berthing assistance. See "Doha".

Max. draft permissible at any state of the tide – 33 ft.
Max. draft permissible at HW – 39 ft.
Max. LOA – 850 ft.

Berth	*Length*		*Depth*		
No.	(m.)	(ft.)	(m.)	(ft.)

QAFCO N	212	700	11.8	39.0	Ammonia
QAFCO S	212	700	12.0	40.0	Urea

1. *Urea Fertiliser Export:*

Qatar Fertiliser Company – QAFCO Qatar Government joint venture with Norske Hydro who manage the project.

Fertiliser is in polythene bags of 50 kg. nett each.

Loading is by two independent loading towers. Depending on ease of access to ships' holds a 24-hour loading rate of 700 tonnes is given by the loading equipment.

The pile construction jetty lays at right angles to the shore line and along direction 310° – 130°.

Urea loading equipment is on the S.W. face of the jetty. Jetty face length between extreme end bollards is 800 ft. (244 m.).

2. *Ammonia Export:*

The N.E. face of jetty laying 310° – 130° of length 800 ft. (244 m.) has three functions, one of them being for ammonia loading. The pipe-line is 8 in. (203.2 mm.) diameter.

3. *Bulk Grain Import:*

QAFCO Jetty N.E. face is also used as the bulk grain discharge berth, to the Qatar Flour Mill Company situated at the shore end of the jetty.

Discharge Gear: Consists of portable grain suction/blown discharge units placed aboard vessel.

Also see "Terminal Information – NGL Jetty" and "Developments".

CARGO:

All oil tankers loading at Umm Said must be fitted with a fully operational Inert Gas System and that all cargo tanks are fully inerted before loading commences.

Prohibited Area: A prohibited area enclosed by the pecked lines (See "Plans") has been established. Masters of all vessels are prohibited from entering, anchoring or fishing within this area unless permission has been granted by the Corporation.

Outward Passage: The reverse track is followed as for the inward passage described above.

Charts: Admiralty Chart No. 3787 – Approaches to Musay'Id and Ad Dwaha.

Admiralty Chart No. 3950 – Fasht al Arrif to Ras Laffan.

Admiralty Chart No. 3786 – Umm Said Harbour.

Depths: In the Outer Channel there are least depths of 36 ft. (10.97 m.) in the vicinity of Nos. 1 and 2 Buoys, 3 and 4 Buoys and Nos. 9, 10, 11 and 12 Buoys.

Between the Outer and Inner Channel the depth varies from 40 ft. (12.2 m.) at Nos. 11 and 12 Outer Channel Buoys through 72 ft. (22.0 m.) and 78 ft. (23.8 m.) between S.E. Arrif and S. Arrif Buoys to 47 ft. (14.3 m.) close to No. 1 Inner Channel Buoy.

In the Inner Channel the least depth is 37 ft. (11.28 m.) between Nos. 3 and 4 Inner Channel Buoys.

From the Inner Channel to the Anchorage the depths vary from 43 ft. (13.1 m.) between the channel and Turning Buoy to 48 ft. (14.6 m.) at the Anchorage.

Tidal Conditions: In general the flood stream sets to the S.S.W. and the ebb stream to the N.N.E. the rate being up to 2 knots at Springs.

Cross sets will consequently be experienced in the channel, more particularly in the Northern part of the Outer Channel, between the Outer Channel and S.E. Arrif Buoy and between S. Arrif Buoy and the Turning Buoy. It should be noted that at the Outer Channel Entrance the flood stream continues to set to the Southward for some time after the tide has started to fall. During the flood tide particular care should be taken on rounding S.E. Arrif Buoy as the current sets strongly on it.

Tides: The tides in this area have a large diurnal component and at times there is only one HW and one LW in the 24 hours. This irregularity is more pronounced at Umm Said than at the Outer Channel Entrance for which predictions are made.

In December the HHW, or the only HW during periods of single day tides, occurs between 0500 and 1400 hrs.; in March between 2200 and 0900 hrs.; in June between 1800 and 0100 hrs. and in September between 0900 and 2100 hrs.

At Umm Said there are a few days in the year when the tide does not rise above 5 ft. (1.52 m.) and there are considerable periods each day when the predicted height of the tide is greater than 3 ft. (0.91 m.).

In the vicinity of Nos. 3 and 4 Inner Channel Buoys, HW occurs about 1 hour after HW at the Outer Channel Entrance and the rise of tide is slightly more than at the Outer Channel Entrance.

The HHW is normally 5 ft. (1.52 m.) or better rising to 8 ft. (2.44 m.) at exceptional Springs.

Abnormal meteorological conditions may affect all the above tides by ±2 ft. (0.61 m.).

PILOTAGE: inward and outward pilotage is compulsory for all hydrocarbon vessels loading at Umm Said Oil or NGL Terminals.

Pilot will board and leave vessels in the vicinity of (M) Mishut Buoy.

Pilot Ladder: Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend pilot ladder clear of launch, and then step on to lower platform of accommodation ladder. Vessels should comply with the current U.K. Merchant Shipping (Pilot Ladders) Rules.

Automatic pilot hoists should not be used unless such use is agreed to by the Pilot. On no account should weighted heaving lines be used in the vicinity of the pilot boat or mooring launches.

Pilotage is compulsory for dry cargo ships bound to for Umm Said Anchorage only if the draft is 33 ft. or over. Pilotage performed by Doha Pilots.

ANCHORAGES: Eastern Anchorage. Depth 48 ft.

Anchorage for dry cargo vessels is available in Umm Said Harbour more than one mile North of the Fairway Buoy. The anchorage to the S.E. of the Fairway Buoy is reserved for tankers and vessels drawing over 10.0 m. draft. Dry cargo vessels using this anchorage must obtain permission from Umm Said Terminal.

Prohibited Anchorage: A Prohibited Anchorage has been established in the vicinity of (W) Wakrah Light Buoy to protect submarine pipe-lines laid in the area. A yellow can buoy (Fl. Y. 10 secs.) (Radar Reflector) has been laid in position Lat. 25° 13′ 51″ N., Long. 51° 45′ 23.4″ E. and a line drawn 073°/253° from the coast through this position marks the Northern boundary of the Prohibited Anchorage. A similar buoy (Fl. Y. 6 secs.) (Radar Reflector) has been laid in position Lat. 25° 8′ 18″ N., Long. 51° 41′ 54″ E. and a parallel line drawn through this position marks the Southern boundary of the Prohibited Anchorage.

RESTRICTIONS: In the case of crude oil shipments, mooring, loading and unmooring is carried out at all times (weather permitting).

NGL Jetty: Mooring and unmooring operations are restricted to daylight hours.

MAX. SIZE: (Also see "Cargo Handling Facilities"). Draft of laden tankers leaving Umm Said is controlled by the depth at the outer end of the Outer Channel. This is 36 ft. (10.97 m.) below Chart Datum and Zero of Predictions. Tide rarely falls below 1 ft. above datum, so that there is normally 37 ft. (11.28 m.) or more in the channel.

Experience shows that even under the worst weather conditions there is no appreciable movement on larger ships in the Outer Channel. As deep-draft vessels always reduce speed between Nos. 3 and 4 Inner Buoys and in the Outer Channel, there is very little "draw down". Deep-draft vessels should endeavour to pass between Nos. 1 and 2 Outer Buoys at HHW for the Outer Channel Entrance.

NGL Jetty: Max. acceptable length 950 ft., min. length 550 ft. Max. acceptable capacity 120,000 cu.m. Minimum acceptable capacity 30,000 cu.m.

Underkeel Clearance: The following table stipulates the *minimum* underkeel clearance for vessels using the Umm Said Channels.

Vessels up to 99,999 d.w.t.	– 3 ft. Clearance
Vessels from 100,000 to 149,999 d.w.t.	– 4 ft. Clearance
Vessels over 150,000 d.w.t. and 320,000 d.w.t.	– 5 ft. Clearance
(See "Terminal Information – Berth limitations").	
LPG Carriers (all sizes)	– 5 ft. Clearance

Navigation in Shallow Waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Pilot/Mooring Masters and Masters of ships should be guided by the following:

(a) Due consideration should be given to the effect of draw down at speed on vessel's draft in shallow water, bearing in mind vessel's trim.

(b) If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

(c) Ensure accuracy of vessel's draft reading, including the midship drafts, having in mind the tendency of vessels to sag and the adverse effect of a small list.

(d) Reduce to a minimum safe speed to pass over and near shoal areas.

(e) Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.

(f) Note that list can mean an appreciable increase in draft.

(g) When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid-channel.

Particular attention should be paid to rounding the S.E. Arrif Buoy on a flood tide, especially when heading South. Extra allowance for set should always be made.

HEALTH: (Quarantine and Medical Clearance). Medical attention to Masters and crews of ships provided by Q.G.P.C. Medical Officer when asked for by Master.

RADIO: Doha Radio – A7D – continuous watch on W/T 500 kHz. R/T 2182 kHz and VHF Channel 16.

Doha Port continuous watch on R/T 2182 kHz and VHF Channels 16 and 14. Umm Said Terminal for channel clearance keeps continuous watch on Channel 16. When advising their ETA ships must state their last port of call within the previous 21 days and report any sickness on board. If the last port of call is Bahrain or Ras Tanura, the previous port must be stated.

Vessels are requested to inform Petroqat, Umm Said by cable of their ETA at (M) Mishut Light Buoy and whether or not Pilot required, 72 hours and confirm 24 hours prior to their arrival. It should be clearly indicated that times quoted are in GMT. They should also state the quantity of cargo, in long tons, and the maximum loading rate required, deballasting time and whether able to load and discharge ballast concurrently. Any crew changes and/or medical treatment required should also be notified in this cable.

Except for Tankers, all vessels must contact Doha on VHF for ETA advice. Umm Said Terminals should be contacted for channel clearance.

These cables should be addressed to Petroqat, Umm Said, and passed via Doha Radio.

The following cable is sent to all vessels by Agent (Petroqat):

Quote:

Advise your ETA at pilot station Mishut (M) Buoy in GMT 72 hours and confirm 48 hours, 24 hours and 12 hours before arrival. Pilotage is compulsory and in order to confirm pilot boat arrangements essential you advise firm ETA 48 hours before arrival to avoid any delays. Rig combination accommodation/pilot ladder on Lee side before arrival. Pilot hoist and weighted heaving lines must not be used. Tugs are available if required. Please advise your requirements 48 hours in advance.

It is preferred that mooring hawsers in general consist of rope where possible but all wire moorings or wires with rope tails are acceptable. Please note, however, that for safety reasons, all springs which are connected to the main jetty must be of rope or wires with rope tails.

Please advise your last cargo, and confirm that your tanks are cooled down and ready in all respects to receive your nominated cargo. Butane and propane can be loaded concurrently if required. Loading lines are 12 in. diameter and vapour return lines are 8 in. diameter all fitted with Class 150 ASA flanges. Your attention is drawn to the Prohibited Anchorage (Lat. 25° 10′ N.) safeguarding the submarine pipe-lines laid in the vicinity of Wakrah (W) Buoy.

If your vessel is fitted with telex which has high (75B) and low (50B) speed transmission, please ensure that your machine is operating on low (50B) speed mode to ensure that we receive clear, ungarbled text.

Petroqat Umm Said

Unquote.

Telex: Vessels fitted with telex machines may make contact through Telex No. 4050 Qpausd Dh. However, only the low (50B) transmission mode should be used to ensure the receipt of clear, ungarbled text.

High (75B) speed transmission mode must not be used.

VHF: Umm Said Terminal is equipped with VHF radio equipment operating on Channels 6, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 67, 68, 69, 70, 71, 72, 73, 74 and 77 of international maritime mobile telephone service.

A continuous 24 hour listening watch is maintained on Channel 16, the call sign being "Umm Said". The range of station is approximately 50 miles.

Berth Radio Frequency: Tanker berthing/loading operations are carried out using intrinsically safe portable VHF radio sets on a frequency of 155.975 MHz (transmit and receive). These radio sets also have the facility to use VHF Channel 9.

TUGS: Given sufficient prior notice a tug can usually be made available on request.

BERTHING: Pilots act in same capacity as Mooring Masters in the berthing of vessels, after which they supervise raising of flexible hoses and connection to ship's manifold. During loading operation they act as the Corporation's representatives.

Vessel's crew are expected to assist with hose connecting.

North Berth is a Single Point Mooring in position Lat. 24° 53′ 37.2″ N., Long. 51° 34′ 54″ E., connected to the shore installation by a 36 in. submarine pipe-line. The seaward end of the pipe-line and buoy terminates in 2×16 in. flexible floating hoses. Vessels are moored by a single hawser from bow to buoy. From 1987, all vessels must be equipped with a "Tongue Type" bow mooring chain stopper to OCIMF Standards.

The following equipment should be carried by each vessel:

(i) One 4 in. circumference × 40 fathom messenger rope ready for use at the bow together with mooring lines of suitable size ready for use.

(ii) One good boat rope at least 200 ft. long ready at accommodation ladder position.

(iii) Derrick or crane rigged over the port side manifolds should be capable of lifting 16 in. floating hose to a height of up to 30 ft. above deck (S.W.L. 10 tons).

(iv) Reducers or adaptors if necessary to be bolted to the ship's manifold flanges so as to take 2×16 in. loading hoses.

Warning: Ship's anchors must never be used within 0.5 miles of this berth or the 36 in. submarine pipe-line and must therefore be well secured at all times.

The South Berth consists of a Conventional Buoy Mooring, connected to the shore by a 24 in. submarine pipe-line. The seaward end of the pipe-line terminates in 2×16 in. flexible hoses.

Vessels are moored at this berth by ship's anchors and mooring buoys. The following equipment should be carried by each vessel.

(i) Port and starboard anchors to be fitted with marker buoys and sufficient line. This will facilitate recovery of anchor in the event of loss.

(ii) One good boat rope at least 200 ft. long ready at accommodation ladder position.

(iii) 4 good mooring lines aft, of a suitable size for the vessel on which they are used. Each line should consist of 120 fathom hawser, tailed by a similar hawser and ready to run out when required.

(iv) 2 good mooring lines forward similar to the after lines for use on the Shama'al Buoy (No. 6).

(v) Two 3 in. circumference messenger ropes, one forward and one aft.

(vi) 2 good rope stoppers to be available forward. 4 good rope stoppers to be available aft.

(vii) Derricks or cranes rigged over the port side manifolds should be capable of lifting 16 in. flexible hose from the seabed to a height of up to 30 ft. above deck (S.W.L. 10 tons).

(viii) Reducers or adaptors (if necessary) bolted to ship's manifold flanges so as to take 2×16 in. loading hoses.

(ix) Carpenter's stoppers are provided on loan by Q.G.P.C. for use with Corporation's 4.75 in. wires if required. However standard practice is to connect mooring wires to vessel's own wires or drums and heave onto main drum. Chain stoppers must not be used.

Note. Where a vessel has 2 or more loading connections, the ship's flanges should not be less than 4 ft. apart.

TERMINAL INFORMATION:

Berth	*Max. t.p.h.*	*Fixed sea-line*	*Over rail hoses*
North (SPM)	7,000	One – 36 in.	Two – 16 in.
South (CBM)	5,000	One – 24 in.	Two – 16 in.

Depth of Water: Available depth of water at seaward end of sea-line is as follows:

North Berth (SPM)	65 ft. (19.6 m.)
South Berth (CBM)	48 ft. (14.6 m.)

An allowance of 8 ft. for South Berth has been made for height of sea-line end cradle above the sea bed.

Berth Limitations:

North Berth (SPM) – 320,000 Summer d.w.t.
Bow to manifold 590 ft.
South Berth (CBM) – Maximum 320,000 tons Summer d.w.t.
Minimum 50,000 tons Summer d.w.t.

Note: Minimum size of vessels at CBM is governed by vessels length – 650 ft. minimum.

Large tankers loading at either berth will be required to maintain a minimum of 20% of SDWT ballasted/loaded condition at all times and maintain an even trim.

After the vessel has been securely moored in berth, the hoses are lifted and connected to the ship's manifold.

The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs should be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the vessel as to any signals needed for local requirements.

The Mooring Master brings an intrinsically safe portable radio to the ship. The radio may not be used for private conversation.

The use of the ship's radio during loading is strictly prohibited. Portable intrinsically safe radios used by ship's personnel to control loading procedures is permitted however, provided such use does not interfere with ship/shore communications.

When loading is completed, hoses will be disconnected and lowered, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Mooring Master or direct to sea.

NGL Jetty: This is a 'T' type jetty with breasting dolphins flanked either side by 2 mooring dolphins. Water depth at the berth is 42 ft. (C.D.).

Suitable for berthing vessels of approximate dimensions LOA 550 ft. (168 m.) to LOA 950 ft. (290 m.). The use of 2 tugs is mandatory for berthing and unberthing.

Connections:

(a) Propane Vapour Return	8 in.	150 ASA flanges
(b) Propane Liquid	12 in.	150 ASA flanges
(c) Butane Liquid	12 in.	150 ASA flanges
(d) Butane Vapour Return	8 in.	150 ASA flanges

Bulk Ethylene Jetty: Ethylene tankers are moored at the Qatar Petrochemical Company's facilities at Berth No. 19. Liquid is loaded through one Chicksan type 12 in. loading arm and there is a similar 6 in. vapour return arm. Flanges are Class 150 ASA.

Water depth at the berth is 42 ft. (Chart Datum). Mooring and unmooring operations are restricted to daylight hours.

Tugs are available to assist in mooring and unmooring.

CARGO HANDLING FACILITIES: Government Pilots provide berthing assistance. See "Doha".

Max. draft permissible at any state of the tide – 33 ft.
Max. draft permissible at HW – 39 ft.
Max. LOA – 850 ft.

Berth No.	*Length* (m.)	(ft.)	*Depth* (m.)	(ft.)	
1	350	1,155	15.0	49.5	QASCO (Steel Cargo)

19	255	841.5	13.0	43.0	"
QAFCO N	212	700	11.8	39.0	Ammonia
QAFCO S	212	700	12.0	40.0	Urea

1. *Urea Fertiliser Export:*

Qatar Fertiliser Company – QAFCO Qatar Government joint venture with Norske Hydro who manage the project.

Fertiliser is in polythene bags of 50 kg. nett each.

Loading is by two independent loading towers. Depending on ease of access to ships' holds a 24-hour loading rate of 700 tonnes is given by the loading equipment.

The pile construction jetty lays at right angles to the shore line and along direction 310° – 130°.

Urea loading equipment is on the S.W. face of the jetty. Jetty face length between extreme end bollards is 800 ft. (244 m.).

2. *Ammonia Export:*

The N.E. face of jetty laying 310° – 130° of length 800 ft. (244 m.) has three functions, one of them being for ammonia loading. The pipe-line is 8 in. (203.2 mm.) diameter.

3. *Bulk Grain Import:*

QAFCO Jetty N.E. face is also used as the bulk grain discharge berth, to the Qatar Flour Mill Company situated at the shore end of the jetty.

Discharge Gear: Consists of portable grain suction/blown discharge units placed aboard vessel.

Also see "Terminal Information – NGL Jetty" and "Developments".

CARGO:

All oil tankers loading at Umm Said must be fitted with a fully operational Inert Gas System and that all cargo tanks are fully inerted before loading commences.

The right is reserved by the Terminal NOT to load any oil tanker not inerted if weather conditions at the time of loading are such that the build up of large concentrations of gas around the vessel will not be prevented.

1. Flash Point. Flash point of Qatar Crude is below 32° Fahrenheit.

2. H_2S Content. Qatar (Land) Crude contains concentrations of H_2S (sulphuretted hydrogen). This is an evil-smelling poisonous gas which can be lethal depending on concentration of gas in the air inhaled. It can be detected normally by its smell, but a high concentration of the gas rapidly paralyses sense of smell and may lead to a false sense of security. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned must be left with all possible despatch until adequate ventilation can be carried out. The explosimeter will not detect this type of gas.

It is not intended to exaggerate the dangers of H_2S and if a vessel is fitted with an operational inert gas system then these dangers can be regarded as minimal. Large quantities of Qatar (Land) Crude have been carried in the past on non-inerted tankers without accident. However, in the light of experience gained, the under-noted precautions have been proved necessary to provide against a possible accident:

(a) During loading, venting of tanks should be allowed only through the agreed venting arrangements (as noted in the ship/shore safety check list).

(b) Manual ullaging of tanks should be kept to a minimum and, if undertaken, personnel should keep to windward of the tank openings and avoid breathing fumes as much as possible. Breathing apparatus should be worn if manual ullaging of tanks is to be undertaken over a prolonged period or in a confined space.

(c) Entry into pump rooms or any compartments where gas can collect should be avoided. If entry is considered necessary, then an approved breathing apparatus and lifeline should be worn by the person entering and other persons should be standing by, and tending the life-line. One of those persons on stand-by should be wearing a second breathing apparatus set and life line, ready to rescue the person entering the compartment should the latter be overcome by fumes.

(d) Breathing apparatus, life lines and oxygen resuscitators should be readily available during all cargo and tank cleaning/gas freeing operations.

(e) During cargo discharging and tank cleaning/gas freeing operations, the gas ejector for the pump room should be kept running.

LOADING:

Readiness: Notice of Readiness will be received by the Corporation Representative provided vessel ready to load. Lay time will commence as stipulated in the export agreement between purchasers and vendors. A full cargo is deemed to be the maximum cargo which can be loaded in the ship at Umm Said consistent with safe underkeel clearance on sailing, as advised by Mooring Master.

The Corporation will make every effort to load tanker on arrival provided berth available and weather permits.

Advice from vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence.

Full cargo is deemed to be the maximum cargo which can safely be loaded in the vessel at Umm Said. Completion of loading is subject to the normally accepted tolerances above or below the required cargo.

Tank Dips: During loading, hourly checks of vessel's tanks shall be made by ship personnel to determine cargo loaded for comparison with shore figures if required. This is to prevent loss of oil through a leaking hose and particularly applies at night when seepage of oil can remain unobserved.

Inspection of vessel's tanks will be made by a ship's Officer before loading and, if required, by a Q.G.P.C. Representative. Opening dips and closing ullages will be taken by ship's personnel and the quantity of cargo calculated.

Particular care must be exercised by ship's personnel, towards completion of loading, in the "Topping off" of tanks to ensure that the Terminal is given timely advice of any decrease in pumping rate required. Adequate "Stand-by" notice should be given before the final "Stop".

Loading Pumps: Three 2,230 h.p. pumps are used to load crude oil and it is important to note that any rapid changes in the oil velocity may cause pressure surges in the loading system. A pressure surge may rupture the flexible hoses connected to the vessel spilling dangerous quantities of crude oil onto the decks or surrounding areas and may also cause excessive damage to the Terminal installations. To avoid these risks, valve operations and tank switching should be done with extreme care. Please ensure that 15 minutes' notice is given for "Slow Speed" and/or "Stop" instructions. A letter of protest will be issued by the Shore Representative/Mooring Master on any occasion a pressure surge is generated, whether Terminal installations have been damage or not.

BALLAST: When a vessel enters Port waters in ballast, the ballast water for overside discharge *must be clean* and a declaration signed by the Master and delivered to the representative of the Terminal to this effect. Oily wastes, oily water or other refuse must not be discharged overboard in Port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in Port waters.

The attention of Masters is drawn to the latest MARPOL Regulations and subsequent publications issued by the International Maritime Organisation.

Vessels may be subject to heavy fines and liabilities for claims arising from pollution of the sea and shore areas.

In Umm Said the "load on top" system is normal procedure and Masters of all tankers are required to certify quantity of slops on board and their intention of "loading on top". If "load on top" system is not used the Master will be required to certify adequate reasons for not doing so, e.g., vessel drydocked in last port, etc.

Note:

(a) Essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with Mooring Master's requests as to ballast quantity and disposition.

(b) Umm Said is an open roadstead and subject to sudden changes in weather. Large tankers will be required to maintain a minimum of 20% of SDWT ballast/load condition at all times and maintain an even trim. Masters of all vessels should note that should a situation arise that a vessel has to vacate the berth due to adverse weather or for any other reason, the vessel will be required to have on board sufficient ballast/cargo to enable it to manoeuvre with safety; thus it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid leaving the vessel in a flying light condition.

(c) All pump room seacocks must be closed and lashed before commencement of loading unless loading is commenced prior to deballasting, when they will be closed and lashed after deballasting is completed.

MEDICAL: Medical and hospital facilities available.

FRESH WATER: Available at cargo berths but not at S.B.M., C.B.M. or L.N.G. Berth.

FUEL: See "Doha".

CUSTOMS ALLOWANCES: The State Laws of Qatar are very strict about the import of liquor and its consumption both on the mainland and on vessels in the harbour. No employee, whether senior or junior, is permitted to import any liquor direct or to bring any liquor ashore from vessels, and under no circumstances should liquor be offered for consumption on your vessel to any Q.G.P.C. employee. At the present time vessels enjoy the privilege of not having to seal their liquor stocks whilst in port, but you will readily appreciate that this privilege would be withdrawn if the above rules are not strictly observed whilst vessel is at Umm Said.

REPATRIATION: Immigration/Transit facilities for arriving or departing ship personnel are good. Ample notice should be given on passport details to ensure minimum delay to travelling personnel. Officers and crew joining a vessel must have Seaman's Books.

DISCHARGE CERTIFICATE: The Master of every vessel loading at Umm Said is handed a Discharge Certificate for completion by the Customs or Port Authority at port of discharge and return by air mail to Qatar General Petroleum Corp., P.O.Box 3212, Doha, Qatar within 40 days of sailing from Umm Said.

Instructions regarding the cable to be sent after discharging a cargo loaded at Umm Said must be strictly followed.

It must be emphasised that failure to comply with this requirement may result in delay or even boycott of the vessel upon return to Qatar.

It is therefore in best interest to ensure that Agent at port of discharge attends to despatch of this certificate and the cable with least possible delay. Airmail should be used for Certificate posting.

N.B. If the cargo is destined for onward transit, the final destination of the cargo must be advised on the Certificate.

SECURITY: The Government of Qatar and the Corporation are anxious to ensure that unauthorised persons do not board vessels loading at Umm Said. Vessel's co-operation is requested in checking the identity of all persons boarding.

Vessels are particularly advised to keep all points of access to vessel under surveillance at all times, and to provide maximum night illumination of vessel insofar as the safety regulations permit.

A State Police Launch is present in the area and may be available for assistance if required.

DEVELOPMENTS: The new Umm Said port, opened in 1977, has a total water frontage of 4.5 km. of which 2.5 km. has been developed to provide deep-water berths and a harbour for small craft. Three berths at the Northern end having 15.5 m. minimum depth of water at MLLW are reserved mainly for the requirements of Qatar Steel Company and 2 berths at its Southern end having 13.0 m. minimum depth of water are reserved mainly for the requirements of Qatar Petrochemical Company. Three additional berths having 13.0 m. and two berths having 10.0 m. minimum depth of water at MLLW are available for specialised and general cargoes.

Inner approach channels and manoeuvring areas have been dredged to serve all berths in the new Port.

In addition there are wharves under construction which will be used by general cargo vessels, Ro/Ro vessels, car carriers and container vessels.

A chemical plant is also being constructed.

GENERAL: *Stores and Provisions:* At Umm Said there are no facilities for the supply of stores.

Q.G.P.C. Light Dues: A charge is made to cover the provision and maintenance of light buoys in the Approach Channel to Umm Said. This covers one visit to this port, both inward and outward passage.

Qatar Port Dues: The State of Qatar impose Port Dues on all petroleum carrying vessels which load hydrocarbon substances in one or more of the oil loading ports located in the State of Qatar which includes islands and offshore areas belonging to the State of Qatar.

Note: The G.R.T. for purposes of these calculations will be that shown on the Arrival Report signed by the Master.

M.E.N.A.S. Light Dues: M.E.N.A.S. Light Dues at rates fixed by the Middle East Navigation Aids Service are payable at Umm Said to cover both inward and outward passage through the Gulf.

Industrial channel dues are applicable to all vessels berthing at QASCO/NODCO/Commercial Harbour and QAPCO (i.e. Berths No. 1-19).

SHIPMASTER'S REPORT: 1980 (updated 1990).

Vessel: 210,000 tonnes d.w.

Pilotage: This is now compulsory for the inward passage too for tankers. The Pilot/Mooring Master boards by boat from Doha at Mishut Buoy in position Lat. 25° 16′ N., Long. 41° 47′ E.

Agents/Operators: Qatar Petroleum Producing Authority has now been renamed Qatar General Petroleum Corporation and Notices of Readiness, etc., should be addressed accordingly. Cable address: PETROQAT, Umm Said.

Documents: 2 Crew Lists, 2 Stores Lists, 2 Bonded Stores Lists, 2 Arms and Ammunition Lists and Port Clearance from last port.

Radio: A7S was heard after contact had been established on VHF. The Mooring Master did not know of any ships ever using this station.

NOTES

Please also advise Shipping Guides Ltd.

Reunion Island

POINTE DES GALETS: 20.55 S. 55.17 E. (See Plan)

LOCATION:
West Port: 20° 55′ S., 55° 17′ E. The West Port is comprised of the North Dock and the South Dock.

East Port (Baie de la Possession): 20° 54′ 50″ S., 55° 19′ 40″ E. The East port comprises the West Dock (Berths P.10 and P.11).

Arrival time at both ports is the time when the vessel crosses the leading line no more than 2 miles from the breakwaters.

FLAG: French flag.

PILOTAGE: *East Port and West Port:* Compulsory for all vessels over 50 m. LOA. Pilot is normally ordered by ship's Agent, or in particular cases by the Harbour Master if contacted by VHF beforehand. Pilot launch carries regulation pilot signals. Pilot boards at the entrance to the port about 1 mile to 2 miles from the breakwaters. Pilot on VHF Channel 16, it is recommended that a watch be kept and ETA confirmed.

APPROACHES: *West Port:* Channel and Buoyage: The leading line 102° 30′. In the channel the depth is 10 m., 70 m. wide and is buoyed by 4 spars, 2 on each side.

The leading marks for access to the North Port, South and Fishing Port, respectively 009°, 189° and 260°, are marked as shown below:

North Dock: By day, 2 white rectangular signs, with a thick red line marking the centre line, at night, 2 fixed red lights.

South Dock and Fishing Basin: 2 rectangular white signs with a black vertical line marking the centre line by day. 2 fixed green lights by night.

ANCHORAGES: *East Port and West Port*: There are 2 anchorages in the roads near the port.

(a) In Baie de St. Paul in depths of about 40 m., well marked and safe except in very strong swell. Mooring buoy available in bay.
(b) In Roads of La Possession unmarked anchorage and little used.

If vessel requires a Pilot for anchoring, then anchorage dues are incurred. Vessels anchoring by their own means do not incur charges.

RESTRICTIONS: *West Port:* Manoeuvring is best done in the early morning or at daybreak because during the day wind can make movement difficult. The current in the channel varies in strength (between 1 and 2 knots) and direction. Its direction can only be determined by careful observation during the approach. As a consequence ships should be ready to anchor on instruction from the Pilot while transiting the channel. Vessels swing in the outer port using a long headline.

Berth No. 8 unsafe during swell periods.

MAX. SIZE: *West Port:* Under certain conditions, the topography of the port and jetties, access is limited to the sizes below:

North Dock: Length 160 m., beam 22.0 m., draft for entry 8.5 m. Greater with preliminary agreement of the Port Authorities. Departure draft fixed by the Port Authorities. (Length 160 m. if draft less than 8.50 m.).

South Dock: Length 175 m. Beam 24 m. Draft 8.0 m.
8.5 m.
Length 160 m. Beam 24 m. Draft 8.5 m.
9.0 m.

Fishing Basin: Length 55 m. draft 4.50 m.

Otherwise entry or departure will depend on the Pilot's advice. Normally entry only occurs at the following times depending on the season. Maximum daylight 0445 hrs. – 1845 hrs.

East Port: LOA 215 m., draft 12.0 m. and beam 34 m.

RADIO: Saint Lys or Saint Denis Radio.

VHF: Harbour Master's Office equipped with VHF. Call on Channel 16 daytime only (Sunrise – Sunset).

TUGS: 2×2,400 h.p. and 1×800 h.p. Only used to assist vessel manoeuvring in the port. Tug joins vessel in outer harbour. Ship's lines always used. Tug will also assist on roads (deliveries of mail).

BERTHING: *West Port:* Berth assigned by Harbour Master, basis vessel's length and draft. Tankers berth in the outer harbour at dolphin berth. No slop facilities.

Fore Port: Channel: 70 m. usable width. Turning circle 300 m. Dredged to 10 m. Berth H, 175 m. long, dredged to 8.5 m., max. draft in middle 7.5 m.

North Dock: Access lock: 30 m. width, 10 m. depth.
Berth 1: 160 m. length, 8.50 m. depth.
Berths 2, 3, 4: Total length 366 m., 9.00 m. depth. For 2 or 3 vessels.
Berth 5: 150 m. length, 7.5 m. depth. French Navy.
Berth 6: 140 m. length, 6 m. depth. French Navy.
Berth 7: 210 m. length, 9 m. depth. Bulk sugar loading berth, rate 400 t.p.h.

South Dock: Berths 8, 9: Each 190 m. length, 10 m. depth.
Berth S: 120 m. length, 8.5 m. depth.

Fishing Basin: 6 berths, 70 m. length, 5 m. depth. Max. draft 4.2 m.

The depths above are dredged depths.

Forklifts for handling 40 ton containers with spreaders at certain berths.

East Port: Located at Baie de la Possession, now handles 50% of the traffic for the Pointe des Galets.

Berthing is carried out between the hours of 0400 and 1900.

Approach to the port is easy. The leading line (162° True) is marked by two black diamonds on white square towers. At night, two red lights are exhibited.

In the daytime there is occasionally a strong Northerly wind and a current of 0.5 knots may be experienced. There is no swell, except at times of cyclone.

Length of quay (Berths P10 and P11):	510 m.
Depth alongside:	12.8 m.
Depth of access channel:	13.20 m.
Width of access channel:	130 m.
Turning Basin:	300 m. × 400 m. with depth 13.2 m.

Berth P10 receives 90% of petroleum product for the port. Clinker also discharged at the berth.

Berth P11 is a container terminal and handles 90% of the traffic f the port.

Berths P10 and P11 have special access conditions whereby th authorities give priority to regular users.

Containers are handled at a rate of 300 per shift of 8 hours, with 4 5 gangs, depending on number of cranes on board the ship.

Bunkers are not available.

BULK HANDLING FACILITIES: *West Port:* Berth No. 7: Sug discharge at 1,400 t.p.h. Berth No. 9: Portable vacuator for discharge cereals, capacity 200 t.p.h.

CRANES: No shore cranes.

STEVEDORES: Normal working hours 0700 – 1700 hrs. Possible work in meal hours 1100 – 1230 hrs. and 1700 – 1800 hrs.

MEDICAL: Doctor and hospital facilities available.

TANKERS: Operator's Report: (West Port).

Approaches: Currents generally set across the harbour entrance a vessels should not approach within one mile of the port without the Pi onboard. Also it has been reported that when entering the channel sunrise the sun's glare distorts and obscures some important rang and structures.

Entry: The outer harbour is entered via a dredged channel of 11 (36 ft.) depth, about 70 m. (213 ft.) wide through the breakwaters. Wh entering the harbour between the breakwaters, a moderate speed m be necessary to compensate for cross currents. Once inside t breakwaters vessels have less than 1,500 ft. (450 m.) to the end of t outer harbour, to stop and turn 180° for berthing. Four buoys indica limits of 8.5 m. water depth at side of dredged channel.

Weather: The port is subject to "rollers", ocean waves which thou infrequent are not predictable. They occur at certain intervals, in a weather and during a perfect calm, unaccompanied by any change the atmosphere or other indication. The first appearance is a long swe not assuming the shape of an ordinary wave until it reaches the shor on which it will burst with great violence, sometimes assuming grea proportions than during a cyclone.

Masters are advised to discontinue cargo transfer operations and vacate the berth before the swell reaches the stage where the moti imparted to the ship and the consequent bumping against the pier mig result in severe damage to the vessel. (A swell warning is in existenc

General: Petroleum products are stored at the Shell Terminal for Ess Caltex, Total and Elf. White products are discharged at Berth P10 (Ea Port), while fuel oil and gas oil are discharged at Berths P8 and P9 (We Port).

Port Approaches: The approach to the port is clear of navigatio dangers, but soundings are of little value as depths of 200 fathoms c be found one mile offshore. However, the land provides good rad echoes and visibility is usually good, except during heavy rain.

Restrictions: Tankers not berthed at night.

Special Preparations: Both anchors must be ready before arrival. P anchor is always used for berthing. Mooring lines, gangway a manifolds must be prepared for berthing starboard side to Berth P Ships mooring at Berths P8 and P9 must have lifting gear read respectively on port and starboard side, to lift cargo hoses.

Special Conditions: A large tanker at Berth PH near the breakwater m have to leave the harbour and return later if another large vessel is be turned in the outer harbour.

Tugs: Normally one tug assists making fast as required by Pilot aft vessel enters within the breakwaters. Tug normally pushes, but if maki fast use tug's lines.

Berthing Procedures:

Berth PH – Outer Harbour: Vessels bound for Berth PH on the Nor side of the outer harbour pass the berth on their port side soon aft passing through the breakwaters. They are then turned to starboard wi the aid of a tug and berth starboard side to the pontoons, headi seaward.

Berth PH consists of a central "T" shaped platform supporting 2 ha arms and it is protected by a breasting dolphin of steel piles. The fac of this dolphin is slightly inside the line joining the 2 concrete breasti structures on which the ship lays when berthed. Resilience of breasti dolphins is rather limited.

The disposition of the bollards is not particularly favourable for proper lead of the spring lines when the ship is positioned alongside.

Berths P8 and P9 – Bassin Pres. J. Caille: After having passed throu both breakwaters the vessel turns to starboard with the aid of the tu and berths head into the dock port and starboard side to, respective to Berths 8 and 9.

These are non-dedicated tanker jetties and are normally used f general cargo. Ships carrying gas oil are shifted to these berths fro Berth PH The hose is connected purposely for the operation. Bollar are placed along the edge of the jetty. Breast lines cannot be secure Both berths are well sheltered and not affected by swell.

Pipe-lines are laid under the quay and flexible hoses are connect each time the ship has to discharge.

Weather at Berth: Weather conditions are generally good except duri the cyclone season which occurs November to March. The cyclo warning system is well developed and early warning can be expecte When cyclone warning is received, ships are advised to be ready leave the port.

Fendering: The fendering system at Berth PH is made of rubber fac timber and is considered insufficient if unusually high swell impa motion to the ship.

Gangway: Ship's gangway is used.

Facilities:

Water is available at the quays.

Fuel Oil available ex-quay at Berth P8 and P9.

Provisions are available but expensive.

Ship's stores are mostly imported and are therefore, expens Availability uncertain.

Ballast, Slops and Tank Cleaning: There are no slop or diry ba facilities, and tank clearning is only allowed with special permission fr the Harbour Master when 2 tanks may be made available.

Engine room slops may be discharged by prior arrangement.

Cargo Connections: Berth PH has 1 × 10 in. and 1 × 8 in. counter-balanced hard arm for handling of gas, rum, molasses, cement and bitumen. Connection is a bolted flange, ASA standard.

Berths P8 and P9 have flexible hoses, 6 in. for gas oil and 8 in. for fuel oil. Connection is a bolted flange.

Ullageas and Temperatures: Taken by a terminal representative accompanied by a ship's officer.

Oil Pollution: Pointe des Galets and all Reunion is covered by the French National "Polmar" plan to cover oil pollution prevention.

Fire Fighting: The port has its own fire brigade and both tugs are equipped with foam and water. There are also fire hydrants on the quays.

Also see "Shipmaster's Reports" – January 1987 and May 1989 (East Port).

DENSITY: 1025.

FRESH WATER: Available at all times by pipe-line at the quays. Rate 10 t.p.h. minimum.

FUEL: Fuel and marine diesel available at Berth Nos. 8 and 9.

REPAIRS: Repairs can be effected by P.I.B. Tel: 43.80.05. Telex: 916614.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally performed by ship's crew who also unlash and hook containers at the 3rd height.

REPATRIATION: All facilities available for crew change and repatriation.

AIRPORT: 30 km. away, daily connections world-wide (Air France, Air Mauritius, S.A.A., Reunion Air Service, Point Air and Air Madagascar).

TIME: GMT plus 4 hours. No alterations during the year.

HOLIDAYS: No cargo work on May 1st or November 1st. Possible to work on January 1st, Easter Monday, May 8th, July 14th, August 15th, November 11th, December 20th and December 25th.

TELEPHONES: *West Port:* Police 42.00.17 and 42.15.80. Ambulances 18 or 42.06.53 (Private), Fire 18, Harbour Master 42.09.12. Telephones can be placed onboard at all berths.

East Port: Police 42.00.47. Ambulance and Fire 18.

SERVICES: Harold J. Thomson – P&I Club representative (Oceanus, Strike, London Mutual and others). Speaks excellent English, will assist with any shipping services or supplies. Tel: 42.23.20. Telex: 916252. Fax: 42.03.10.

SHORE LEAVE: Crew are allowed to go ashore.

IDENTIFICATION CARDS: Seaman's Book compulsory, to avoid visa problems.

DELAYS: General cargo rate 500 – 1,000 tons per day, depending on category and conditions.

SHIPMASTER'S REPORT: 1978 (updated 1988). West Port.

Documents: 3 Crew Personal Effects Lists, 3 Crew Lists, 3 Bonded Stores Lists. Declaration of Health (Supplied on arrival).

Pilotage: Pilotage compulsory. Pilot boards 1 mile off breakwater, minimum of 12 hours' notice required.

Anchorage: At Saint Pauls Bay, 5 cables offshore in depth of 20 fathoms – the water is too deep further offshore.

Restrictions: Vessels can enter and leave at any stage of the tide during daytime. Max. beam for North Port 22 m.

Max. Size: Length 175 m. with draft 8.0 m. and length 160 m. with draft 8.5 m.

Tugs: Normally 1 tug required for berthing and unberthing in the North and South Port. (3 tugs available in 1986).

Radio: Radio station – Saint Denis Radio "FFD". VHF Channel 26 (Hours: 0800 – 2000 hrs. weekdays, 0800 – 1200 and 1500 – 1800 hrs. on Sundays and 24 hours during cyclone periods).

VHF: Pilot and Port Authority Channel 16.

Special Bulk Facilities: Bulk sugar berth – rate 400 t.p.h. No quay cranes – no Ro/Ro facilities. Facilities for handling containers and storage space for containers in North and South Dock in the West Port and at the East Port.

Fresh Water: Available.

Repairs: Facilities available.

Services: Provisions, Bunker fuel, diesel available.

SHIPMASTER'S REPORT: January 1987.

East Port: Tankers berth at Berth P10.

Currents of opposite direction are observed. At a distance of 3 miles off the breakwaters an Eastward current of 1.5 knots experienced and when 1 mile off, a Westerly current of 1.0 knots experienced.

SHIPMASTER'S REPORT: May 1989. East Port.

Vessel called at La Reunion laden with mogas, gas oil and jet fuel, which was part discharged in the port "Port de la Possession".

Port: Port de la Possession (locally also referred to as East Harbour or East Port).

Documents:

5 copies Crew List.
1 copy Vaccination List.
2 copies Stores List.
2 copies Personal Effects List.
1 copy Maritime Declaration of Health.

Local Time: GMT plus 4 hours.

Communications: Communications with St. Denis Radio/FFD is rather difficult as only MF facilities available and watch keeping is slack.

VHF contact can be established on Channel 16, with Port Control, but only during office hours (0400 hrs. – 1900 hrs.).

Port Authority and Pilots work from 0400 hrs. – 1900 hrs.

Anchoring: No anchoring facilities are available and vessel must drift whilst awaiting berth. Port Control confirms on VHF, time of Pilot boarding and position.

Health: Under normal conditions, no special radio message is required. Free Pratique is granted after the vessel berths and Port Health Authority boards the vessel and inspects the Maritime Declaration of Health.

Cyclone: Cyclone season is from January to the end of March.

Berthing: Two powerful tugs of 32 tons' bollard pull are used for berthing. Only 2 berths are available, giving access to vessels up to 215 m. LOA, 34 m. beam with a draft of 12.5 m., of which one berth is used for tankers.

Tankers: The dock has one portable Chicksan of 10 in. diameter which connects the vessel's manifold to the underground pipe. Therefore only 1 product can be discharged at a time.

Shore tanks are about 3 km. away (16 in. pipeline).

Fire Fighting: Being a container dock, portable shore fire-fighting equipment is made available for tankers, consisting of 2 lorries with water sprayers.

Telephone: Provisions for placing shore telephone on board is available.

Fresh Water: Fresh water is available at both berths.

Bunkering: No bunkering facilities at present.

Medical: The town is only 3 km. away, with adequate medical facilities. The Doctor visits the ship if requested by the Agent. However, for cases which require the attention of a Dentist or an Optician, the crew member is taken ashore by the Agent. Cholera vaccinations are also administered on board by the doctor, however, for yellow fever vaccination the crew member must go ashore.

Customs: Allowance of 200 cigarettes and 1 bottle spirits is permitted for each member of the crew to be held out of the bond.

Shore Leave: All crew members are allowed to go ashore and no shore pass is required.

Repatriation: All facilities available for crew changes and repatriation.

Airport: Daily worldwide links by Air France, Air Mauritius, SAA, Reunion Air Services and Air Madagascar.

AUTHORITY: Direction Departementale de l'Equipement de la Reunion, Arrondissement Mixte, Subdivision Exploitation du Port et du Littoral, BP 2008, 97821 Le Port, La Reunion, Republic Francaise. *Tel:* 42.09.55. *Telex:* 916428 RE. *FAX:* 42.06.02. *Contact:* R. Goavec, L'Ingenieur des T.P.E., Chef de la Subdivision S.E.P.L.

Port Captain. Tel: 42.09.12. Telex: 916249.

AGENT: SCAC Transport International, 97420 Le Port De La Reunion. Tel: 42-00-22. Telex: 916137. Cables: "Freight Le Port". Fax: 284194 and 435040.

Romania

CONSTANTZA: 44.09 N. 28.39 E. (See Plan)

DOCUMENTS: As soon as vessel is boarded by the Border Control Commission, the Master fills in a form of declaration in 4 copies, which together with Stowage Plan, Cargo Manifests, Sanitary Certificates, is handed to representative of the Agency. Also following documents are to be handed over at Harbour Master's Office:

Derat Certificate.
Certificate of Nationality.
Tonnage Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-telegraphy Equipment Certificate.
Ship's Register.
Safety Construction Certificate.

From the time a vessel enters the territorial waters of Romania until she leaves that very zone (i.e. 12 miles), hoisting of the Romanian flag is compulsory. A vessel calling at Romanian ports for the first time and not having a Romanian flag on board must order one through her Agent immediately after berthing.

PILOTAGE: All vessels bound for Constantza must inform by cable their ETA at 10, 7, 5, 3 days and 48 and 24 hours before vessel's arrival in the roads.

After arrival in the roads the vessel must contact "Port Control" (Pilotage) on VHF Channel 14, or through Constantza Coast Radio Station call sign YQI – frequency 500 kHz or 461 kHz, 2 hours before arrival in the roads, in the anchorage place, as well as Navlomar Office on VHF Channel 10.

Pilotage of vessels in the roads and in the port is compulsory, even for shifting berth. Pilotage is available throughout 24 hours day and night, as per shift schedule issued by the Port Authorities or depending on ship's necessities (emergencies) but always with the previous approval of the Harbour Authorities.

The pilot boat has a black hull with "Pilot" in white on the sides, white upperworks and the letters "NR" on funnel.

Because the roads are open to stormy weather, vessels have to manoeuvre, to protect the Pilot when boarding.

ANCHORAGES: Vessels calling at Constantza can anchor in the roads of 4 nautical miles by 4 nautical miles, being between Lat. 44° 13′ N. and 44° 09′ N. and Long. 28° 48.1′ E. and 28° 42.5′ E.

The Meridians of 28° 45.3′ E. and 28° 47.6′ E. divide the roads into 3 zones parallel to the shore, numbered from West to East:

No. 1: 2 nautical miles, breadth for vessels smaller than 40,000 g.r.t. (excepting tankers).

No. 2: 1 nautical miles, breadth for vessels larger than 40,000 g.r.t. (excepting tankers).

No. 3: 3 nautical mile breadth for tankers and liquid gas carrying vessels.

The roads of Constantza Port (open) permits a proper and safe anchorage (for 40 – 50 large ships) in depths of 24 m. – 27 m. with the possibility of making a full swing in case of change of wind or direction of currents. The length and breadth of the vessels are of no importance.

RESTRICTIONS: See charts of the relevant areas and "Notices to Mariners".

In normal conditions entering and leaving port is done continuously throughout 24 hours. No tide.

MAX. SIZE: Depths up to 13.50 m. (44 ft.) allows the entrance of the vessels up to a maximum capacity of 65,000 d.w.t. into the basin for dry cargo, whilst the depth of up to 14.00 m. in the specialised oil liquid cargoes docks allows the loading/discharging of tankers with a maximum capacity of 80,000 d.w.t. – 90,000 d.w.t.

For larger tankers up to 150,000 d.w.t. – 200,000 d.w.t. the port has a special operational terminal (Berth No. 79), with a depth of 19.00 m. (62 ft.).

There is no restriction on length or breadth of vessels.

HEALTH: *Sanitary Inspection:* Immediately upon berthing the Sanitary Commission checks the ports of call during the voyage, the nature of the cargo, the number of crew and passengers, the port of destination, the state of health of all those on board, particularly regarding any disease, vaccinations, etc. The Sanitary Commission orders steps to be taken on the case of contagious diseases. The Sanitary Control inspect crew and provisions on board. If no contamination danger exists the Sanitary Commission issues the vessel's "Free Pratique".

RADIO: Constantza Radio – call sign YQI. Frequencies 500 kHz and 461 kHz and continuous watch on VHF Channels 16 and 12.

VHF: Direct contact with local authorities are possible.

Harbour Master's Office – Channel 67 – continuous listening.
Navlomar Agency – Channel 10.
Constantza Pilot Station – Channel 14 – continuous listening.
Towage Department – Channels 11 and 13 – continuous listening.
Port Authority – Channels 6 and 9 – continuous listening.
Salvage – Channel 13.
Sea Traffic Control Centre – Channels 14, 16 and 67.

TUGS: Arranged by Navlomar Agency.

For all non-propelled vessels or vessels whose engines are under repair, or damaged vessels, towage is compulsory not withstanding their size. The towage services in/and out of the port are continuous day and night.

All port tugs are equipped with VHF Channels 11 and 13. The towage tariffs are in accordance with the horsepower of the tug, vessel's tonnage and the time used for towage.

BERTHING: The quays are 2.50 m. above the level of the sea, remaining constant as the Black Sea has no tide.

Constantza has 66 operational berths, with a total length of 13 km. and 14 berths for waiting, Derat, washing and de-gassing of tankers, repairs, etc.

Constantza is used for import – export and transhipment cargoes a large variety of goods. The berths specialise in various kinds of ca operations such as terminals for ore, coke, coal phosphates, apa fertilisers, cement, containers, perishable goods, Ro-Ro traffic, LA operations, grain handling, oil, molasses, petroleum products and ro steel.

CRANES: The berths are equipped with electrical shore cranes of 3 t up to 16 tons and the specialised terminals are equipped with facili for various cargoes. The port is equipped with 1×100 ton and 1×50 floating crane; 2 floating cranes of 25 tons – 30 tons and 6 of 16 t also available.

The port is also equipped with mobile cranes of 250 tons, 118 t and 90 tons, as well as many cranes from 70 tons to 12 tons.

STEVEDORES: Requests for stevedores to be lodged with minim 4 hours before the commencement of working (the times commencement of working turns are 0700, 1500 and 2300 hours). work on Saturdays.

BULK HANDLING FACILITIES: Max. LOA 220 m., max. draft 3 2 cranes with grabs, discharge rate 4,000 tonnes per day (jib crane) 10,000 tonnes per day (bridge crane). 1 berth only for fertiliser load where long delays may be expected.

In total there are 6 ore discharging bridges, 2 phosphate discharg bridges, 3 silos, 39 mobile pneumatic installations and 2 floa pneumatic installations with capacity 300 t.p.h. each.

MEDICAL: The port polyclinic is available for medical attention to c members at the following times: Monday, Wednesday and Fri between 1300 hrs. and 1600 hrs. and Tuesday, Thursday and Satur between 0800 hrs. and 1300 hrs. In case of emergency call Navlomar Office (16528).

TANKERS: 5 oil wharfs capable of berthing tankers up to 80,000 d. – 90,000 d.w.t. and outer berths for vessels up to 200,000 d.w.t.

DENSITY: The average density of the sea water in the por Constantza is of 1016, resultant from the following variable values:

Spring 1014 – 1015.
Summer 1016 – 1017.
Winter 1016 – 1018.

FRESH WATER: Fresh water may be supplied at any berth, even du loading/discharging operations. Supply is done directly from the qua by fresh water tankers.

FUEL: Navlomar Agency operates the bunkering service in the por

Bunkers may be supplied at specialised berths in the petroleum ba or by self-propelled bunkering tankers for the supply of gas oil, fue or a blend of both, as well as lubricants and other petroleum produ Supply of small quantities of bunkers, if absolutely necessary, may made in the roads, weather permitting, the cost of the transport be charged separately.

REPAIRS/DRY DOCKS: Any kind of repairs (deck and engine) poss in the Constantza Shipyard, which has floating docks of 8,000, 10, and 15,000 tons and 2 dry docks for vessels up to 150,000 d.w.t.

Small repairs can be done during the loading/discharging operati at the repair plant of Port operation enterprise – M.T.Tc. (Administration).

SURVEYORS: Lloyd's Register; Bureau Veritas and Romanian Regi of Shipping do class surveys for Germanische Lloyd, Norske Veri American Bureau, Nippon Register and USSR Register.

OPENING/CLOSING HATCHES: First opening and last closing of hatches are done by the crew of the vessel (compulsory), with facilities of the vessel. All other intermediary opening and closing is d by the stevedores, excepting vessels equipped with MacGregor ha covers.

If there is bad weather during the loading/unloading operations, vessel is obliged to cover the hatches with its own tarpaulins.

CUSTOMS ALLOWANCES: In the Navlomar Building there is a s where seamen can buy on their own account, duty free, vari Romanian and foreign articles. The objects are to be kept on boar carrying them out of the port is strictly prohibited.

REPATRIATION: Changing of crew and necessary repatriations be organised through Navlomar Agency.

AIRPORT: For international flights as well as for international sum flights. Constantza has an international airport (Mihail Kogalnicea located 25 km. from the port.

TIME: GMT plus 2 hours. Summertime is GMT plus 3 hours, from Sunday in April till last Sunday in September.

HOLIDAYS: Official holidays in Romania: New Year's Days (1st 2nd January); Easter Orthodox Monday (April); Labourer's Days (1st 2nd May); Liberation Days (23rd and 24th August); Anniversary Socialist Revolution (7th and 8th November); Christmas (25th and December); Proclamation of the Republic (30th December).

SHORE LEAVE: On completion of border inspection, crew may ashore taking with them their Seaman's Books (or Passports) and permit (ticket) for coming back on board. Entering and leaving the is permitted only via Entrance/Exit No. 1. Crew members are requ to be back aboard their vessels by 0400 hours.

In the event that crew members desire to visit other places outs Constantza, they must inform the Agent for the necessary formalitie there are passengers on board the Master will lodge the list of the sa in 6 copies.

DEVELOPMENTS: The Port of Constantza is under enlargement a new port "Constantza - South", built as an extension of the pres one, which, when completed will be of about 3.5 times larger in surf area and about 5 times larger in traffic capacity in comparison with present port.

The new Contantza port will include a "free-zone" in the South part, near to the entrance of the Danube – Black Sea Channel. In area the same facilities and guarantees as in any other free port or z will be ensured. The geographical co-ordinates of the new "Consta – South" port are Lat. 44° 07′ N. and Long. 28° 40′ E.

2×2,200 tonnes per hour shiploaders to be installed. Outreach 40 Backreach 30 m. Shiploaders will be fitted with 50 tonne capacity gr

GENERAL: *Currency:* The unit of currency is LEU (plural LEI) which is equivalent to 100 bani. The official rate of exchange is the rate of the day – for sailors and for tourists ("tourist rate")

Services: Repairs of all types of electrical equipment, radar, gyro compass, R/T, the compensation of magnetic compass possible. Various services regarding classification survey and underwater repairs, repair of mechanical and electrical deck equipment, repair of the rudder and of the refrigerating plant also possible.

Navlomar: Shipbrokers, Chartering Agents, Ship Agents, Shipchandlers offers in all Romanian ports: Agency service; provisions; bunkers, deck and engine stores; ship repairs; shifting boards; cleaning of oil tanks; lashing of cargo; duty free goods; special services.

Following is an extract from "Notice to Sailors" issued by Authorities at Constantza:

1. Crew members are required to observe international rules covering work protection, port sanitation and Customs regulations, and in addition, Romanian law, both within the port and outside that area.

2. In order to avoid accidents concerned with port equipment, cranes, trucks, tractors and trains, etc., crew members walking inside the port area are permitted to walk only on the main streets and between the berths where their vessels are moored, and/or to entrance/exit No. 1, the Navlomar Agency, the Harbour Station, the Navlomar tax-free shop or the Seamen's clinic.

3. Crew members are required to enter or leave the port area at gate No. 1.

4. Crew members are required to be back aboard their vessels by 0400 hrs.

5. Crew members wishing to visit other zones in the country are required to obtain a visa from the ship's Agent.

6. Transportation within the port by motor-boat which leaves the Harbour Station every 15 minutes and calls at all berths in the port, is available subject to crew members being in possession of the proscribed ticket issued by ship's Agent and duly signed and stamped by the ship's Master.

7. The tax-free shop is located next to the Harbour Station. All purchases must be retained aboard under Customs control until the vessel has sailed.

8. It is forbidden, either to bring in or to take out Romanian currency. Such currency is obtainable from Navlomar Agency at Master's request and for Owner's account. All Romanian currency remaining in crew members' possession must be returned to the Master before sailing, and the Master is required to return the currency to Navlomar.

9. The port Polyclinic is available for medical attention to crew members at the following times: Monday, Wednesday and Friday, between 1300 and 1600 hrs. Tuesday, Thursday and Saturday, between 0800 and 1300 hrs. In cases of emergency, assistance is obtainable by telephoning 16528.

10. Crew mail and messages are delivered daily by ship's Agents, and outgoing crew mail is collected for despatch at the same time.

SHIPMASTER'S REPORT: Any stages, gantlines or painting scows must be taken inboard at night. Motorboats operate a "taxi" service in harbour at a cost of 8 Lei per person per trip.

Control will only issue clearance after all cargo work, bunkering, etc., is completed.

At Mineral Berth iron ore is discharged by 2 large gantry cranes operating grabs, each working at approximately 200 t.p.h. Rate of discharge is frequently disrupted by shunting of railway trucks – 2 tracks serve 5 berths.

SHIPMASTER'S REPORT: September 1987.

The Agent and the Customs advised me to take plenty of cartons of cigarettes out of the bond into my cabin before sealing. We distributed over 3,000 cigarettes during our stay, to pilots, pilot boat, tugs, linesmen, jetty operators and officials. Additional requests were made for beer, soft drinks, Elastoplast, ballpoint pens, coffee, pocket books, soap, flyspray and magazines. It is very important that these requests are granted, otherwise long delays may be experienced. On our first call no crew members required currency but several crew members went ashore, I was warned by the Customs that next time the ship had to draw some Romanian money, i.e. changing foreign currency at black market rates is dangerous. Any Romanian money can, in fact must, be returned to the Agent before sailing.

On both visits we loaded 50,000 tonnes of fuel oil at Berth No. 72 at an average rate of about 900 t.p.h. through 1 × 12 in. Chicksan. Surveyors were Oil Inspections Taygar S.A. and on both occasions the surveyors were British and very helpful both professionally and personally. Gauging, cargo documents and Outward Clearance takes hours. On our first visit cargo was completed at 1325 hrs. and pilot boarded at 0130 hrs. the next morning.

All rooms and lockers must be kept locked at all times as even small items may be stolen (knives, mugs, ashtrays, coffee.)

AUTHORITY: Constantza Port Authority. *Telex:* 14209.

AGENT: Navlomar Shipping Agencies. Tel: 11970 (management), 11870 (shipchandler), 15274 (ship's Agency) and 16528 (24 hours). Telex: 14258, 14259, 14339. Cables: "Navlor Constantza".

SULINA: 45.11 N. 29.45 E. (See Plan)

PORT LIMITS: Line of Sulina Entrance and "Mile 2" on Danube River (Sulina Channel).

DOCUMENTS: Within maximum 1 hour from fulfilment of arrival formalities the Master or Chief Officer reports at the Harbour Master's Office where he tenders the following documents:

Certificate of Nationality.
Tonnage Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-telegraphy Equipment Certificate.
Safety Construction Certificate.
Cargo Gear Certificate.

The above certificates are to be valid and not to expire before ship's sailing from the port, Load Line Certificate and Cargo Gear Certificate not to be older than 12 months, and same remain with the Harbour Master until ship's departure when returned through the representative of the Agency that accompanies the Control Commission on departure.

PILOTAGE: Notice of Arrival to pilot station at Sulina is to be sent in due time through Sulina Free Port Administration – Agency Department (Navlomar). Telex: 52294 (A Apl) and 52295 (B Apl)R.

Channel 16 VHF is continuously watched and ETA may be confirmed or adjusted whenever necessary on this frequency. There is no specific area where pilot boat is located, place where Pilot is to be taken onboard is generally the anchorage location.

Sulina – S.E. approach nr. 5. Width 1.6 miles. Length 7 miles. Direction 146° – 326°. Centre line joins the following positions:

S1: Lat. 45° 03.01′ N., Long. 29° 53.4′ E. At 11.5 miles on bearing 124° 24′ from Sulina Lighthouse (nr. 120).

S2: Lat. 45° 08.9′ N., Long. 29° 47.9′ E. At 5.75 miles on bearing 095° 42′ from Sulina Lighthouse (nr. 120).

Thence on the No. 01 Sulina black light and whistle buoy, and afterwards on the line of Sulina Entrance Leading Lights (301° 12′) into Sulina Channel and so to harbour. On this approach non-degaussed vessels with max. draft 7 m. may navigate.

ANCHORAGES: Generally location of anchorage is communicated by pilot station, whether off-shore or inside the channel.

RESTRICTIONS: Vessels calling at Danube ports are obliged to wait in roadstead of Sulina, at least 1 mile away from the black buoy (a black floating cylinder marked "01" in white, which is lighted at night by green flashing light). All vessels both entering and going out of Sulina Channel as well as during navigation in the channel and Danube, are obliged to have on board a Danube Administration Pilot. As a rule, entering and leaving the Sulina Channel, as well as navigation in the channel, is prohibited after night-fall.

MAX. SIZE: The draft at Sulina Bar is 23 ft. (7.01 m.) Vessels up to 180 m. LOA and 7.01 m. draft can be accepted in Sulina Free Port. No tide restrictions.

Any other changes of official draft are broadcast daily, at 1150 hrs. on 1935 m. Long Wave.

MINEFIELD: See charts of area.

HEALTH: On arrival in Sulina Harbour vessel has to stop to complete border and sanitary formalities and after vessel has completed same, with Danube Administration Pilot on board, proceed to destination. After the vessel has completed manoeuvring to come alongside berth, she is boarded by the Sanitary Commission. If the vessel has passed the sanitary inspection she is boarded by Border Control Commission which includes a representative of the Agency, the latter assisting the Master in fulfilling arrival formalities and facilitating meeting of any requirements on ship's part. The Master fills in a form of declaration in 3 copies which together with the Stowage Plan, Cargo Manifest, etc., are handed to representative of the Agency upon his leaving ship. A supplementary declaration is to be completed by the Master, stating:

1. Who supports disbursement expenses (name, mail address, telegraphic address, number of telex).

2. Who supports the supplies of bunkers, provisions, other services, etc. (name, mail address, telegraphic address, number of telex).

RADIO: Constantza – coast radio station. Call signal YQ1, frequency 462 kHz. Operation daily, starting with 0650, 1250 and 1850 hrs. GMT. Contents of transmission: meteorological and navigation notices. Weather forecasts are broadcast in clear English or codified; radio notices to mariners and navigation warnings are broadcast in Romanian, Russian and English.

VHF: High-powered base-station operates in town of Sulina, 24 hours per day, using call-sign: "Pilot Sulina". All calling must be on Channel 16; all other authorities are to make contact on the same Channel (i.e. Navlomar Sulina, Harbour Captain's Office, Sulina Free Port Administration).

RADAR: Not available.

TUGS: Tugs can be ordered whenever necessary either via Sulina Free Port Administration or to Harbour Office; tugs of 2,400 h.p., 800 h.p.and 600 h.p. available for assistance and manoeuvring of vessels and barges.

BERTHING: 4 berths available, of which 2 are in the Maritime Transit Basin and 2 on the Danube River's wharves, both of them 180 m. in length.

Loading/discharge operations performed with floating equipment belonging to Sulina Free Port Administration which also provides shore equipment.

Transhipment with vessel's own gear (i.e. for heavy lift cargo, etc.) possible at all times of year inside the Maritime Transit Basin, or offshore; for these kinds of operations, assistance (tugs, stevedoring, specialists) from Sulina Free Port Administration is optional.

CRANES: 6 floating cranes of capacity 10 tons to 32 tons available at all berths.

BULK CARGO FACILITIES: No special facilities available. Bulk fertilisers can be transhipped ex-barge, fertilisers in bags can also be stored in covered warehouse. Several types of ore can be handled and stored in open spaces.

ADD — BRAILA - GALATZI - TULCEA - MANGALIA.

SPECIALISED CARGO HANDLING FACILITIES: None available.

BRIDGES: No bridges.

STEVEDORES: Stevedores available 24 working hours per day, in 3 shifts, mechanised assistance available. No work on Saturdays.

MEDICAL: Full hospital facilities without prior notice.

DENSITY: At the mouth of the Danube River, average density about 1018.

FRESH WATER: Fresh water available at all times from pumps in the Maritime Transit Basin and on several wharves of the town of Sulina.

FUEL: Fuel and complete stock of Shell Marine lubricants available. Prior notice at earliest convenience.

FIRE PRECAUTIONS: Usual fire precautions.

CONSULS: No consulates in Sulina.

REPAIRS: Routine maintenance and boilermaking assistance to light engineering standards. No foundry available. Mechanical workshop with qualified personnel available.

DRY DOCKS: A slipway of 6,500 tons displacement is available.

SURVEYORS: Lloyd's Agent as well as representatives of other classification societies and official surveyors can be brought in at short notice.

GANGWAY/DECK WATCHMEN: Not necessary.

HATCHES: Opening/closing is normally carried out by the ship's crew.

CUSTOMS ALLOWANCES: Custom's procedure is different in Sulina from that at Galati and Braila as Sulina is a Free Port.

All ships operating exclusively in Sulina Free Port are exempted from Customs dues on condition that no prohibited items are brought ashore. Please also note that ships operating exclusively in Sulina Free Port might be required to pay only half of the usual channel taxes.

All the other procedures (changing of money, Custom control, interdiction to bring in or to take out Romanian currency, etc.) are the usual ones in Romanian Ports, and are to be communicated by Agent. (Money changed at the day's rate.)

Duty free shop available.

Agent to advise shipchandler well in advance of vessel's requirements (foodstuff, cigarettes, drinks, etc.).

CARGO GEAR: Rigging of derricks, good working condition of the winches and derricks, is the permanent obligation of the vessel according to requirements of working gangs. The hatches must be opened or closed to their full size. The removable beams or covers shall always be stowed on deck on the side where work is not being carried on, so that they may not hinder working gangs or cause accidents. During operations, the vessel is recommended to close the hatches with rain tents, ship's property, if bad weather. If cargo handling gear breaks down during operations, the waiting time of workers is charged against vessel and such time lost for breakdown of winches not to count as laytime.

Also see "Tugs" and "Cranes".

REPATRIATION: All facilities exist for repatriation and change of crew.

AIRPORT: No airport in Sulina. The nearest airport is in Tulcea (about 70 km. up the Danube River), 6 flights weekly to Bucharest.

TIME: Local time is GMT plus 2 hours. Summer time is GMT plus 3 hours, Summer programme lasting from first Sunday in April till last Sunday in September.

HOLIDAYS: Official holidays: 1st and 2nd January, 1st and 2nd May, 23rd and 24th August. Cargo work can be arranged for these days.

POLICE/AMBULANCE/FIRE: Police (915) 43004. Ambulance (915) 43322. Fire (915) 43003.

TELEPHONES: This service is available aboard ship, at the Post Office or at Agency Department (Navlomar) Office. Telephone number of Sulina Free Port Administration is (915) 43664, 43242, 43243; local 325.

SERVICES: No special services available.

BANKS: No American or European banks in Sulina, bank facilities can be arranged through Agent by connection to Bucharest, or Tulcea (The Romanian Bank for Foreign Trade).

STORING: See "Prelims".

1. Vessel can be stored by barge supplied by foreign partners, surveyance and guard of the barges being provided by Sulina Free Port Administration.
2. Previous notification for barge storage compulsory, details to be obtained through Sulina Free Port Administration's representatives.
3. No transhipment into trucks directly possible for the moment.
4. Fork lifts can be used on the jetty to handle stores.
5. No Customs interference regarding storing on the territory of Sulina Free Port, first period (negotiable) of storage free of charges, tariffs to be established by the Administration. Storage possible both in covered and open spaces, on platforms.
6. Riggers belonging either to the Administration or to Romtrans (Specialised Romanian Foreign Trade Enterprise for forwarding activity, which has an office in Sulina Free Port) can be employed, for sorting and arranging cargo on platforms and in warehouses.

SHORE LEAVE: When Immigration formalities have been fulfilled, crew can go ashore with shore passes provided by the Agent.

IDENTIFICATION CARDS: Seaman's Book and shore passes issued by Coast Guard and provided by the Agent or soldier at the gangway. The passes must be returned to the soldier upon coming back on board.

REGULATIONS: No particular or unusual regulations.

DELAYS: Berthing delays very infrequent.

GENERAL: From the time a vessel enters the territorial waters of Romania until she leaves the respective zone, i.e. 12 miles, it is compulsory to fly the Romanian flag. Ships that call at Galatz for the first time and have not got the Romanian flag on board must have it ordered through the Agent immediately upon berthing at Sulina Harbour. Throwing garbage overboard or pumping out dirty ballast or bilge water is allowed only beyond the territorial waters of Romania. Non-observance of these rules may result in fines varying between 3,000 and 10,000 lei imposed by the Harbour Master.

DEVELOPMENTS: 4 berths and warehouses under construction.

SHIPMASTER'S REPORT: February 1984.

The entrance route to Danube River from Gura Sulina for Gala
Braila is as follows: Arrival point Lat. 44° 47′ N., Long. 29° 55.8′
from this point vessel is to steer 000° True till Lat. 45° 05.1′ N.,
29° 55.8′ E. and from this point 301° True to No. 1 Buoy. Beca
shallow water the vessel must not go South of No. 1 Buoy. With
Sfantul Gheorge Lighthouse was observed at 15 miles, Su
20 miles and lighthouse at South Mole at 15 miles. Anchorage
2 miles East or 1 mile North of No. 1 Buoy. Pilot on VHF Chan
Pilot embarks 1 mile East of the No. 1 Buoy.

After anchoring near to Sulina, Customs, Immigration and
board the vessel for clearance. After clearing the vessel anoth
Pilots board and vessel proceeds to destination. No naviga
permitted during the night for large vessels.

SHIPMASTER'S REPORT: December 1989.

Vessel: 12,800 g.r.t., 156 m. LOA and 22.8 m. beam.

Transit of the River Danube (Sulina - Galatz - Sulina):

Two port pilots are taken on at Lat. 45° 08.8′ N., Long. 29° 4
as far as Lat. 45° 09.8′ N., Long. 29° 42′ E., where the vessel
anchor to carry out Police, Customs and Port formalities.

If the vessel is transiting for the first time, the Tonnage Certific
the Suez Canal is requested in addition to ordinary certificate
additional certificate is held at the Captaincy, and is only hande
on the return passage.

Once formalities have been completed, 2 pilots are taken on
transit of the canal as far as Galatz, where these pilots are chan
2 port pilots. Vessels berth starboard side alongside.

On arrival in Galatz, all the formalities are repeated and those
out at Sulina being considered null and void.

Loading at Galatz is rapid, the gangs work 24 hours a day.
vessel is berthed starboard side to quay, it is necessary to go as
Km. 159 to turn, before going down river. This location is suppo
be safe, however, by reason of bad buoyage (in fact non-exist
well as inadequate dredging, great care has to be taken as the
some mud banks, unknown to everybody, on which it is possibl
aground.

On both the inward and outward voyages, vessels anchor
48 Mile marker. This anchorage is very safe.

At the level of Tulcea, navigation is very easy, and the use of
not compulsory, in fact it is not advisable. The most delicate par
Danube is between Miles 57 and 58. Our sounder indicated that
point there are minimum depths of 8.0 m.

St. Helena

JAMESTOWN: 15.56 S. 05.40 W. **(See Plan)**

PORT LIMITS: Within 3 miles radius of the port. Laytime commences at the anchorage.
DOCUMENTS:
4 copies of Crew List.
4 copies of Passenger List.
1 copy of Health Form.
PILOTAGE: No Official Pilot.
ANCHORAGES: The harbour consists of an open roadstead with anchorages shown on charts.
MAX. SIZE: Any size vessel can enter the port. Maximum tide variation approximately 1 m.
HEALTH: Pratique will be granted by the boarding party or by telegram from Port Health Officer. If disease or fever suspected, Port Health should be informed by telegram 24 hours before anchoring so that the necessary precautions can be taken.
RADIO: Name: St. Helena Radio. Call sign for W/T working – ZHH. Frequencies: 500 and 461 kHz. A2, A1. 12963.5 kHz. A1. Working hours: 500 and 461 kHz – Weekdays from 0800 to 2000 GMT. Sundays from 0800 to 1300 GMT. 12963.5 kHz – Daily except Sundays from 1200 to 1300 GMT. Listening watch on Channel 5 and Channel 6.
Call sign for R/T working – St. Helena Radio. Frequencies: 2182 and 3162 kHz A3H, A3J and A3A. 4397.7, 8737.5 and 13150.4 kHz. A3J A3A. Working hours: 2182 and 3162 kHz – Weekdays from 0800 to 2000 GMT. Sundays from 0800 to 1300 GMT. 4397.7, 8735.5 and 13150.4 kHz are only operated on request and ships should answer on Channels 414, 807 and 1217 respectively.
VHF: Harbour Master has VHF facilities. Call sign "Port Control"; Channel 16, working Channel 6, Monday to Friday 0830 hrs. – 1600 hrs.
TUGS: None.
BERTHING: Vessels anchor in 18 – 20 fathoms of water.
CRANES: 2×10 ton and 1×30 ton heavy lift crane.
STEVEDORES: 48 hours' notice required by Agents Messrs. Solomon & Co. (St. Helena) plc, also particulars of tonnage of cargo.
MEDICAL: Harbour Master should be notified if medical attention is equired.
TANKERS: No facilities available.
FRESH WATER: Delivered by floating pipe-line at approximately 10 t.p.h.
FUEL: Limited stocks of diesel oil held for local use only.
CONSULS: French Consul. Appointed representatives for Denmark and Norway.
REPAIRS: Small repairs can be carried out (welding or turning, etc.).
DRY DOCKS: None.
SURVEYORS: Messrs. Solomon & Co. (St. Helena) plc as Cargo Surveyor Agents for Lloyd's.
CERTIFICATES: Vaccination Certificates required for all crew. Derat Certificate should be valid.
CUSTOMS ALLOWANCES: No restrictions. Free use on board.
CARGO GEAR: All discharge carried out by vessel's derricks into lighters.
GANGWAY/DECK WATCHMEN: Supplied by Messrs. Solomon & Co. (St. Helena) plc.
HATCHES: Opening/closing of hatches normally carried out by crew.
REPATRIATION: No facilities for crew changes. Only for those left behind for hospitalisation.
AIRPORT: No airport on St. Helena.
TIME: GMT throughout the year.
HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; St. Helena Day (21st May); Whit Monday; Queen's Official Birthday; August Bank Holiday; Christmas Day (25th December); Boxing Day (26th December). Cargo work can be arranged except on Christmas holidays.
POLICE/FIRE/AMBULANCE: Police and Fire, Tel: 626. Ambulance, Tel: 241.
SHORE LEAVE: No restrictions unless imposed by Immigration Department.
DELAYS: No delays in berthing. Loading or discharge can be delayed due to bad weather.
AUTHORITY: Harbour Master, The Wharf, Jamestown, Island of St. Helena, South Atlantic Ocean. *Telex:* 202 Govt HI. *Contact:* Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

St. Kitts

BASSETERRE: 17.18 N. 62.43 W. (See Plan)

DOCUMENTS:
3 copies of Crew List.
3 copies of Passenger List.
1 copy High Duty Cargo List.
1 copy Crews' Personal Effects List.
1 copy Clearance from last port.
2 copies Ship's Stores List.
7 copies Manifest.
2 copies Bills of Lading.

PILOTAGE: Pilot compulsory for berthing. Not compulsory for unberthing.

ANCHORAGES: Harbour at Basseterre is an open roadstead and safe anchorage will be found at a distance of 0.25 miles to 0.5 miles from the shore opposite the piers in the centre of the town.

RESTRICTIONS: None.

HEALTH: The Harbour Master boards all vessels on arrival at port and inspects the clearance from the last port. If there are no health problems the vessel is immediately granted Pratique. If there is suspected disease or fever on board pre-notification is recommended. If this is done the Harbour Master will have a Medical Officer with him when he boards the ship on arrival.

RADIO: Contact is through Barbados Radio, call sign 8PO.

VHF: Port and Police on Channel 16 throughout 24 hours.

BERTHING: Main Berth: Length 400 ft., depth 30 ft.

Ro/Ro Berth: Length of berth 400 ft. It is able to handle vessels 400 ft. – 700 ft. LOA. Depth of water 16 ft.

Sugar Loading: Mobile unloaders rated at 150 t.p.h.

Berthing on ships without thrusters is achieved against off-shore wind by using port anchor to snub in and swing stern onto quay. Mooring boat runs lines ashore and stern line to buoy, aft breast lines sent to bollard in middle of end of quay.

CRANES: 5 ton lift, mobile (link-belt); 10 ton lift, mobile (Jones).

Cranes used on cargo pier for offloading barges, ferrying cargo from ship to shore and discharging 20 ft. containers.

STEVEDORES: ETA should be advised 24 hours before arrival of vessel, also tonnage to be discharged and number of gangs required. Discharging rate: 15 tons per gang per hour on bags. 6 tons per gang per hour on general cargo.

MEDICAL: Advance notice if possible – hospital facilities available. Valid Vaccination Certificate for passengers disembarking but not for in transit or cruise ship passengers.

DENSITY: 1025. No tides.

FRESH WATER: Available alongside main berth.

FUEL: Available.

CONSULS: France and Netherlands.

REPAIRS: The sugar factory has a well-equipped shop for machine, welding and maintenance work. They can assist with most engine repairs.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Done by stevedores.

CUSTOMS ALLOWANCES: Half pound tobacco or 200 cigarettes. Wine and/or Spirit, 1 bottle.

REPATRIATION: Crew changes and repatriation can be arranged.

AIRPORT: 2 miles from town with regular daily connections to Antigua and Puerto Rico where onward passages to Canada, U.S.A., Great Britain and Europe can be arranged.

TIME: GMT minus 4 hours; no alteration.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Whit Monday; Queen's Birthday (date fixed by announcement annually); August Monday; Independence Day (September 19th); Christmas Day (December 25th); Boxing Day (December 26th).

POLICE/AMBULANCE/FIRE: Police Tel: 999; Fire Tel: 999; Ambulance (Hospital) Tel: 2515.

TELEPHONES: Available on request.

IDENTIFICATION CARDS: Not needed, however, crew members are liable to be checked by Port Authority on entry and exit by security guard.

SHIPMASTER'S REPORT: November 1989.

Chart: BA. Chart No. 487

Approaches: Basseterre is conspicuous with Fort Thomas to the West and deep water jetty to the East.

The Shell Berth is marked as lighter moorings on B.A. Chart No. 487 insert plan.

The jetties in the centre section of the shoreline are now in a state of disrepair.

Vessels approach the Shell Berth from the S.W. and at a broad angle.

Pilotage: Pilotage is optional at oil berths (Shell and Texaco), available from 0630 hrs., VHF facilities available.

Shell charge a standard pilotage fee if taken or not. Vessel should make an early request as port is busy early in the morning berthing ships alongside the deep water jetty.

It is advisable to take Pilot on first visit. The new Texaco Berth, S.E. of Shell Berth is a bit more awkward.

Anchorage: In bay as marked on plan insert of Chart No. 487, anchorage is fairly sheltered.

Berthing: Approach Shell Berth from S.W. at a broad angle, and let go starboard anchor, when port forward mooring buoy on port bow is about 30 m. away. We found 6.5 m. datum throughout length of vessel.

Mooring: The performance of boatmen varies. Joshua, the main harbour boatman, is reported to be very good, he has a launch with a blue cabin. If he is busy elsewhere, a person with an open fishing boat will attend. Joshua will normally be available to run boat service, but the other person will not be available.

Line sent to Port head buoy with shackle, then back down to stern buoys on either quarter. Stern buoys have hooks.

The LPG hose mooring buoy is the Easterly of the set of hoses.

Cargo Operations: Shell have 100 tonnes' capacity LPG, Texaco have 50 tonnes' capacity at present.

Hose Buoys:
1. East LPG end of hose (LPH)
2. LPG end of pipe (LPP)
3. White oils
4. West Road Bitumen (RC2)

Shell generally like 50/50 mix, unfortunately Trinidad generally supplies 70/30 mix which is not liked, as butane is used up too fast in cookers.

Submarine hose with 4 in. flange with valve, port side derrick. Pumping rate 50 t.p.h.

The Supervisor, John Lynch Wade is very helpful, he boards on commencement and completion of operations.

Agent: The Supervisor often acts as Agent and Customs Official as no officials board the ship.

Clearance was given during discharge as we had to wait for Mr. Wade to find a Customs Officer.

Documents:
3 copies Crew List.
1 copy Unmanifested Cargo.
2 copies Ship's Bonded Stores.
2 copies Crew Manifest.
1 copy Maritime Declaration of Health.
2 copies Port Officer Returns.

General: Definitely no night pumping. Berthing operations commence at 0600 hrs.

Shell use VHF Channel 9, we lent them our Motorola.

The boatman can be hired for about U.S.$35.00 per day for shore leave.

Texaco have a new installation nearly completed on the East side of the Bay with 2 mooring buoys (1 head, 1 stern), with ship's hose to dolphin, about 350 m. hose run to dolphin connection.

Texaco expect to commence operations mid-December with LPG and white oils.

Unable to raise Saba Radio from Basseterre. Contacted Barbados at 1330 hrs. GMT on Channel 1213.

The bay is fairly well sheltered, except for ground swell.

AUTHORITY: The St. Christopher – Nevis Port Authority, P.O.Box 186, Basseterre, St. Kitts. *Tel:* 4122. *Contact:* The General Manager.

NOTES

ls navigating St. Lawrence Seaway are required to complete ations for:

rtificate of Financial Responsibility,
rtificate of Insurance, Form FMC 225,
Discharge Assurity Bond, Form FMC 226,
arantee in respect of liability for discharging oil, Form FMC 227.

se applications have to be filed with the Secretary of the Federal ne Commission before a certificate is issued. The oil pollution y certificate should be retained aboard the vessel.

ADVISORY SERVICE: Ships inbound from seaward between nber 15th and April 15th should advise the Ice Information Officer, y, 36 hours prior to entering Cabot Strait, stating their position, ation, whether loaded or in ballast. This procedure will facilitate ssing of ice information to the ship as necessary. Ice information available from radio stations at Halifax, Seven Islands, Wirringate Grindstone. The Canadian Broadcasting Corporation Maritime rk also broadcasts ice information daily during the Winter ation season. Supplementary ice information may also be obtained ne Canadian Marine Service Icebreakers.

ng the ice season, radio broadcasts of ice information are made daily from Marine radio stations as follows: Cape Race, oundland; Fox River, Quebec; Mont-Joli, Quebec; Halifax, Nova .

TAGE: The first pilot station when entering the St. Lawrence River es Escoumins, 80 miles West of Father Point. This Pilot will take ip to the Quebec Pilot station 121 miles to the West. Off Quebec Pilot boards to take the ship to Trois Rivieres, where there is er change of Pilot for the remaining trip to Montreal.

RICTIONS: The average navigation season in the Montreal-Lake o section of the St. Lawrence River is from April 1st to nber 15th.

eal to Lake Ontario – Lock Nos. 1 to 7: Length between the breast nd ship arrester 233.48 m., width 24.38 m., depth 9.14 m., channel 8.23 m.

nd Canal – Lock Nos. 1 to 7: Length between the breast wall and rrester 233.47 m. to 234.21 m. Lock No. 8: Length 365.76 m., 24.38 m., depth 9.14 m., channel depth 8.23 m.

Ste. Marie – Canadian Lock: Due to a major structural failure in 987, the Canadian Lock at Sault Ste. Marie will be closed until r notice. Mariners are advised to use the U.S. Locks.

rmation for U.S. Locks may be obtained from U.S. Corps of eers, Detroit District.

d Limits: 9.0 knots upbound, 10.5 knots downbound in the harnois Canal; 8 knots in the Welland Bypass Channel and 6 knots other canals. The speed limits vary from 8.5 knots to a maximum ots in remaining sections of the St. Lawrence River. Maximum d limits for vessels in excess of 12 m. in length are contained in eaway Handbook. Changes are indicated through Seaway Notices. information relating to speed limits, on the Detroit, St. Clair and ary's rivers contact the U.S. Coast Guard, Cleveland, Ohio or the dian Coast Guard, Toronto, Ontario.

SIZE: Length 222.5 m., beam 23.16 m., draft 79.2 dm. Masts must xceed 35.5 m. above water level. Other limiting dimensions are ined in the Seaway Regulations.

LTH: All ocean-going vessels must obtain Free Pratique before ng the Seaway. Vessels entering the Seaway direct may receive ntine inspection and clearance from the Canadian Authorities at eal while at anchor awaiting entrance to the Seaway.

RADIO: *Notice of Arrival:* Master must give at least 24 hours' notice to Commander, 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours' notice of ETA at first U.S. discharge port is required.

St. Lawrence Seaway Authority: Every vessel shall provide at least 24 hours' notice of arrival to the nearest Seaway Station, prior to an initial transit or in case reinspection of the vessel is required.

Calling In requirements are detailed in the Seaway Regulations.

Great Lakes: It is recommended that vessels within a radius of 30 nautical miles of a shore station use their FM transmitting and receiving equipment to ensure better connections. This pertains especially to vessels at anchor or in the proximity of a port or berth.

Radio Stations: Buffalo, New York, marine operator. Port Burwell, Ontario, marine operator. Geneva, Ohio, marine operator. Lorain, Ohio, marine operator. Rogers City, Michigan, marine operator.

TUGS: Whistle signals differ from those in international usage and are as follows:

1. Ship to Tug: 1 Long and 1 short (– ·) = ship ready to proceed, O.K. or all right. 1 Long and 2 Short (– · ·) = let go the bow tow-line. 1 Long and 3 Short (– · · ·) = let go the stern tow-line.
2. Both Ship to Tug and Tug to Ship: 1 Short(·) = work propeller ahead when stopped, *or,* stop propeller when working, either ahead or astern. 2 Short (· ·) = work propeller astern. 3 Short (· · ·) = slow down or check. 4 Short (· · · ·) = work propeller strong in the same direction it is working at the time the signal is blown. 5 or more Short blasts (· · · · ·) = the standard danger signal.

SEAWAY EQUIPMENT: *Radio-telephone Equipment:* All vessels, other than pleasure craft of less than 19.80 m. in overall length, must be equipped with VHF radio telephone equipment, in addition to the FM equipment otherwise required. The radio transmitters must have sufficient power output to enable the vessels to communicate with Authority Stations from a distance of 48 km. and must be fitted to operate from the wheelhouse and to communicate on 156.55, 156.6, 156.65, 156.7 and 156.8 MHz.

Stern Anchors: Every vessel of more than 110 m., the keel of which was laid after January 1, 1975 is required to be equipped with a stern anchor.

Propeller Direction Alarms: Every vessel of 1,600 g.r.t. or more shall be equipped with:

(a) propeller direction and shaft r.p.m. indicators located in the wheelhouse and the engine room; and
(b) visible and audible wrong-way propeller direction alarms located in the wheelhouse and the engine room, unless the vessel is fitted with a device which renders it impossible to operate engines against orders from the bridge telegraph.

Pitch Indicators and Alarms: Every vessel of 1,600 g.r.t. or more equipped with a variable pitch propeller shall be equipped with:

(a) A pitch indicator in the wheelhouse and the engine room; and
(b) effective April 1, 1984, visible and audible pitch alarms in the wheelhouse and engine room to indicate wrong pitch.

Disposal and Discharge Systems: Every vessel not equipped with containers for ordure shall be equipped with a sewage disposal system (enabling compliance with applicable laws relative to sewage disposal). Garbage on a vessel shall be:

(a) destroyed by means of an incinerator or other garbage disposal device; or
(b) retained on board in covered, leakproof containers, until such time as it can lawfully be disposed of.

No substance shall be discharged or disposed of onto a lock or tie-up wall by any means, including overboard discharge pipes.

Vessels not fitted in accordance with Seaway Regulations will not be accepted for transit until the fittings have been modified as necessary and approved by a Seaway Officer.

POLLUTION:

1. No vessel shall
   (a) emit sparks or excessive smoke; or
   (b) blow boiler tubes.
2. No vessel shall discharge into Seaway waters any substances not in conformity with applicable United States Federal Regulations and Canadian Regulations with the exception of the waters of the Welland Canal where two specific zones are established in which no substances shall be discharged, namely:
   (a) from Lock 7 to Mile 17; and
   (b) from Lock 8 to the outer Port Colborne piers.
3. A record shall be kept of each location within the Seaway or adjacent waters where bilge water has been discharged.
4. Except as authorised by the Authority or the Corporation, no vessel shall discharge garbage, ashes, ordure, litter or other materials.

IDENTIFICATION CARDS: In the first U.S. port, the Immigration Officer requires an alphabetical Crew List made up on Form 1-418 and visaed by the American Consul in the last overseas port. This Crew List should contain the name of every crew member on board. Also needed are 3 copies of this Crew List on the same form. The Immigration Officer will require all Seamen's Books and Passports, to issue the completed Crew Landing Permits made out on Form 1-95A. The Master will be given a Crew List receipt which will indicate the names of crew members detained on board, if any. In case a crew member is detained on board, he cannot go ashore, and at irregular times an Officer of the Immigration Service will check if the crew member is on board. A fine of $1,000 will be imposed on the vessel for each detained crew member who is not on board.

REGULATIONS: Detailed requirements are contained in the Seaway Handbook (obtainable from the St. Lawrence Seaway Authority, Constitution Square, 360 Albert Street, Ottawa, Ontario K1R 7X7), or in the Seaway Notices. An updated edition of the Handbook must be retained on board the vessel.

Additional information regarding Seaway equipment, regulations or transit requirements can be obtained from the St. Lawrence Seaway Authority by contacting J. M. Kroon, Director of Operations and Maintenance, 202 Pitt Street, Cornwall, Ontario, K6J 3P7. Tel: (613)932 5170. Telex: 05-811517. FAX: (613)932-5037.

AUTHORITY: The St. Lawrence Seaway Authority (See Above).

St. Lucia

CASTRIES (including Vieux Fort): 14.01 N. 61.00 W.

(See Plan)

PORT LIMITS: From Lat. 14° 01′ 24″ N., Long. 61° 00′ 05″ W. thence in the direction of 301°T for 1 mile, thence in the direction of 211°T for 1.2 miles, thence in the direction of 121°T for 0.88 miles to La Toc Point at Lat. 14° 30′ 00″ N., Long. 61° 00′ 46″ W. thence along foreshore at the average HW mark from La Toc Point around La Toc Bay to Tapion Point, thence along to the Castries River mouth and thence to the opposite bank including all marine works, wharves and property vested in the Crown. All around the bay to Seraphin Point, thence all around the bay to Veille Ville Point, thence to St. Victor Point and thence all around the shore to Vigie Point and then to Lat. 14° 01′ 24″ N., Long. 61° 00′ 05″ W.

DOCUMENTS:

Report of Ship's Stores. Form 1.
Crew Members' Stores List. Form 2.
List of Unmanifested Cargo. Form 3.
Report of Ship's Manifest. Form 4. (4 copies).
Passenger Lists. (5 copies).
Steamship Company Release. (1 copy).
Crew List. (5 copies).
Clearance from Last Port of Call.
Outbound Cargo.
Loading List.
Customs Report Outwards (Form A7)
Vessel Manifest (Contents of Ship). Form 16. (3 copies).
Entry Outwards and Certificate of Rummage. Forms 9 and 10.
Loading Licence. Form 14.
Clearance. Form 17. Form 18 (Steamship).

Where possible, Cargo Manifests and Stowage Plans should be forwarded by Airmail, ahead of the vessel to the local Agents.

PILOTAGE: Pilotage is compulsory for all craft except for ships of less than 100 g.r.t., Her Majesty's ships, pleasure yachts and fishing vessels.

Notice of ETA and request for a Pilot must be made to the Harbour Master not less than 24 hours before ETA. Cable address: "Paslu". Telex: 6355 Paslu LC. Confirmation of ETA is required 2 hours before arriving at the Boarding Station. Channel 16 VHF is continuously watched and ETA may be confirmed or adjusted on this frequency. Pilot boats (2) are: (1) A "Cheverton" built, 8.2 m. LOA, fibreglass hard top, with a "V" hull, single inboard 4236 Perkins diesel engine, complete with navigation and pilot lights. Painted black all around with letter "P" painted in white on both sides of bow. Name of pilot launch "Charles" painted in white at the stern. (2) A "Cheverton" built 8.73 m. LOA aluminium hard top pilot house aft. Single inboard 6.3544 Perkins diesel engine. Complete with navigation and pilot lights. Painted black all round with the words "Pilots" painted white on both sides of the pilot house. Name of second pilot boat is "Esperance" painted in white on stern.

The usual International Signals may be employed by vessels requiring a Pilot. The usual pilot boarding point 0.5 miles off Vigie Point. Ships that are 3 hours away are requested to call Vigie Lighthouse on S.S.B. 2182, VHF Channel 16, informing of ETA, draft and length.

Pilot boat stands by on Channel 16 VHF. Pilot station stands by on Channels 14 and 16 VHF.

Pilot boards vessels on the starboard side and for ships outward leaves on the port side.

In the event of bad weather ships will be advised accordingly.

Vessels awaiting Pilot may anchor between 1 and 2 miles N.W. of Vigie Point in 22 m. of water. Rock and sand bottom, very good holding ground, no shelter.

ANCHORAGES/APPROACHES: Deep and sheltered anchorage exists off Castries Harbour entrance. The approach channel is 91.44 m. wide with minimum depth of 14.75 m. to the port proper, which lies within an all protected harbour. The turning basin is 457.20 m. in diameter at a depth of 14.0 m.

Masters familiar with the Port of Castries may be invited to proceed to the Northern Anchorage/Quarantine Area not less than 3 cables off the Vigie promontory.

Care must be taken to drop anchor clear of the entrance range which is for in-going ships, 121°T on the Castries leading lights.

Also see "Pilotage".

RESTRICTIONS: Petroleum tankers are not moved during the hours of darkness except in emergency conditions.

MAX. SIZE: Ships up to 213 m. LOA and 9.1 m. draft can be accepted. No restriction on beam.

Also see "Tankers".

HEALTH: Pratique is usually granted by the Pilot or Boarding Officer and Immigration Department alongside on behalf of the Ministry of Health. In the event of any suspected disease or fever on board, the vessel is not allowed within 91.4 m. of the wharves until Pratique has been granted by the Medical Officer.

RADIO/VHF: Port Control on VHF Channels 16, 6, 12 and 14. Also 2182, 2146, 2381, 2527, 2582 and 2638 kHz.

TUGS: Tug "Chale", 1,400 h.p., available to assist in berthing if required. Towage compulsory for vessels over 400 ft.

BERTHING: There are six berths numbered 1 to 6 inclusive.

Berth Nos. 1 to 3 are general cargo berths and have a total length of 356.6 m. The draft varies from 5.8 m. at Berth No. 1 to 8.2 m. at Berth No. 3. Berth Nos. 4 and 5 are of recent construction and consist of a reinforced concrete platform supported on concreted piles. Depth of water alongside at LW is 10 m.

Berth No. 4 is a container berth equipped with a heavy lift mobile crane for handling 20 ft. and 40 ft. ISO containers. It has a length of 152.4 m. and storage capacity for approximately 3,500 containers.

Berth No. 5 is a break bulk cargo berth as well as Ro/Ro facilities with a ramp 14.6 m. wide. It has a length of 182.9 m. and a depth of 10 m. below LW.

A transit shed with an area of 6,882 sq.m. with cold storage facilitie of 2,265.60 cu.m. for reefer cargo.

Berth No. 6 is a reinforced concrete deck supported on steel case piles. The berth is 167.6 m. long and can accommodate vessels of 9 draft. It is a general purpose berth and handles banana traffic.

Within the port area there is a total shedded storage capacity 17,205 sq.m. with a total upland of 15 – 17 acres.

Dock water density 45.7 gm./cu.m. with prevailing winds from a N.W direction.

Pointe Seraphine: Information relating to the recently opened cruise sh berths at Pointe Seraphine:

Berths No. 1 and 2 are located at Pointe Seraphine, Castries Harbo and are dolphin type berthing facilities.

1. Each pier consists of:
   a. Two reinforced concrete breasting dolphins.
   b. Reinforced concrete walkways 8 ft. wide supported on ste "H" and spun concrete piles linking the berth to the shore.
2. Height of pier above M.S.L. = 7 ft. 0 in.
3. Overall length of pier = 174 ft. 2 in.
4. Bollards – there is one "T" head bollard on each breastin dolphin, and 4 single pillar bollards on the shoreline. Averag distance apart is 145 ft.
5. Fendering – primary fendering consists of one "W" shaped rubbe fender fixed to each dolphin.
   Two "D" shaped 12 in. × 12 in. cover fenders fitted to the out corners of each dolphin provide secondary protection.
6. Construction – each dolphin is 15 ft. 7.5 in. square reinforce mooring concrete structure supported by 14 in. diameter sp concrete piles. The landing stage of the berthing facility is 160 long × 8 ft. wide.
   The landing stage is a reinforced concrete structure supporte by steel "H" piles.
   The approach to the landing stage is 63 ft. long × 8 ft. wide an is of similar construction.
7. Average depth alongside Berth No. 1 35 ft.
   Berth No. 2 32 ft.

Vieux Fort: Depth of 8 fathoms at the entrance and 5 fathoms within th Port. 2 berths, 500 ft. long, 27 ft. 6 in. deep. Also see "Shipmaster Report".

BRIDGES: There are no bridges or other restrictions to prevent acce to the port by vessels of not more than 9 m. draft.

STEVEDORES: The normal working hours are from 0700 – 1600 hr Mondays to Fridays. Special arrangements are required outside of th above hours and for Saturdays, Sundays and Statutory Holidays. Th hiring or calling of labour are as follows:

Monday to Fridays for work commencing from 0700 – 1100 hr request to reach Union before 1500 hrs. previous day.

1100 – 1600 hrs. before 0900 hrs. on the same day.

After 1600 hrs. before 1400 hrs. on the same day.

For vessels working on weekends request to reach Union by 1530 hr on Fridays.

Average rate on break bulk general is 15 t.p.h. per gang.

MEDICAL: Full hospital facilities available without prior notice.

FRESH WATER: Good quality potable water available in unlimite quantities at 20 t.p.h. per connection ex-quay.

FUEL: Limited quantity for yachts and small vessels only. Refuellin jetty at La Toc Bay owned by Texaco.

TANKERS: Tanker and Liquefied Gas Terminals – available at Cocon Bay through floating pipe-lines.

Also see "Shipmaster's Reports" and "Cul de Sac Bay".

CONSULS: *Embassies/High Commisions:* British High Commissio Venezuela, Organisation of American States, Taiwan (Republic China) and France.

Consuls: Norway, Germany F.R. and Netherlands.

REPAIRS: No facilities for large vessels. Routine maintenance or min repairs are carried out. There is no foundry in the port.

DRY DOCKS: None available.

SURVEYORS: Lloyd's Agents are available and represent oth Classification Societies and Surveyors. Others can be obtained fro outside at short notice.

GANGWAY/DECK WATCHMEN: Gangway and gate watchmen can supplied at Union award rates. Hold watchmen are required duri discharge/loading operations. Shed watchmen are not necessary.

OPENING/CLOSING HATCHES: Ship's crew shall be required to rai and lower and position beams to the required height, opening a closing of MacGregor and pontoon hatches. Wooden hatches a normally handled by stevedores while alongside.

CUSTOMS ALLOWANCES:

1. Wine or spirits not exceeding one quart in all, and
2. Tobacco, not exceeding half a pound, or
3. Cigars not exceeding 50 in number, or
4. Cigarettes, not exceeding 200 in number, or
5. Goods to the aggregate of E.C.$50.00 belonging to a passeng which accompany that passenger and when acquired abroad him for his personal or household use or as souvenirs or gifts a admitted as such by the Comptroller of Customs.

CARGO GEAR: Discharge of general cargo is usually by ship's ge Containers, if vessels are not self contained, may be handled by P crane 9125TC – 140 ton lorry mounted crane owned and operated the Ports Authority. Manitowoc 230W crawler crane rigged for 41 ton also available (Tropical Lines).

REPATRIATION: Scheduled aircraft connect with all the Eng speaking islands of the Lesser Antilles several times daily from V Airport which is 2 km. distant from Port Castries. Direct overseas flig arrive and leave from Hewanorra International Airport, Vieux-Fort at le once a week for the United Kingdom, New York, Miami and Cara Venezuela.

TIME: Local time is GMT minus 4 hours. Summertime is not us All ETAs and other messages should be made in local time.

HOLIDAYS: New Year's Day, New Year's Holiday, Independence Day (22nd February), Carnival Monday, Good Friday, Easter Day, Easter Holiday, May Day (Labour Day) (1st May), Whit Monday, Corpus Christi, Emancipation Day (1st Monday in August), Thanksgiving Day (1st Monday in October), National Day (13th December), Christmas Day, Boxing Day.

The port is closed for work on Christmas Day, Good Friday and May Day (Labour Day).

POLICE/AMBULANCE/FIRE: All emergency services are available through Port Police Station on Jeremie Street, within walking distance from the port.

Emergencies can be reported to Vigie Lighthouse on Channel 16 at any time. Emergency Police dial 999; emergency Ambulance dial 999; emergency Fire dial 999.

EMERGENCY CO-ORDINATION CENTRE: The Headquarters of the Central Emergency Organisation is the Prime Minister's Office, Government Buildings, Castries, St. Lucia. Tel: 3203 and 3016. Telex: 6394 Foraff LC.

TELEPHONES: This service is available aboard ships at all berths by prior arrangement through the Agents. Standard rates apply.

BANKS: Bank of Nova Scotia, P.O.Box 301, William Peter Boulevard, Castries, St. Lucia. Tel: 22292/95. Telex: 6385 Scobank L.C.

Barclays Bank plc., Bridge Street, Castries, St. Lucia. Tel: 23306/23300. Telex: 6348 Bacladom L.C.

Canadian Imperial Bank of Commerce, P.O.Box 350, William Peter Boulevard, Castries, St. Lucia. Tel: 23751/23753/23739. Telex: 6352 Canbank L.C.

Royal Bank of Canada, William Peter Boulevard, Castries, St. Lucia. Tel: 22245. Telex: 6309 Royalbk L.C.

St. Lucia Cooperative Bank, 21 Bridge Street, Castries, St. Lucia. Tel: 22881/22882. Telex: 6308 Coopnk.

National Commercial Bank of St. Lucia Ltd., P.O. Box 1031, Bridge Street, Castries, St. Lucia. Tel: 23562/22103. Telex: 6300 Natbank L.C. Cable: NATBANK.

SHORE LEAVE: When Immigration and Customs requirements have been satisfied there is no restriction on crew shore leave so long as they rejoin the vessel before departure. They should carry some sort of identification card or shore passes for security purposes especially for non-English speaking persons.

DELAYS: There are no delays for want of a berth. Berthing delays are very infrequent and no labour shortages.

REGULATIONS: Castries is within the Northern zone of tropical storms. The hurricane season usually extends from May to October each year and the port may be more or less affected at any time during that period. When a storm is expected to pass over the island, ships may be placed on short notice for sea in such circumstances and required to maintain themselves in seagoing condition at all times.

SHIPMASTER'S REPORT: 1979 (update 1986).

Pilotage: Compulsory. Pilot boards 0.75 miles West of Vigie Light, ladder usually on the port side.

Restrictions: Vessel is able to enter and leave at any stage of the tide, day or night.

Max. Size: Max. draft 10 m.

VHF: Pilot on Channel 16.

Berthing: No. 6 Berth, West Wharf: Distance from entrance to berth 1 mile. Max. LOA (Approx.) 550 ft. Max. draft 10 m. There is mechanical equipment available to handle palletised cargoes, adequate storage space for breakbulk cargoes and palletised cargoes. The loading rate for bananas is 15 t.p.h. per gang with ship's derrick and the labour was satisfactory. Accommodation ladder required.

Services: Fresh water, fresh provisions, repair facilities, machine shop, Airport, laundry services, bunker fuel oil, diesel oil, lubricating oils, doctor, hospital, groceries and meats.

SHIPMASTER'S REPORT: Vieux Fort. 1979 (Updated 1986).

Pilotage: No ship exceeding 100 n.r.t. must enter without a Pilot. Pilot boards 0.5 miles S.W. of Mathurin Point (there is a strong N.W. current off Mathurin).

Restrictions: Vessel may enter and leave at any stage of the tide, day or night.

Max. Size: Max. LOA 520 ft.

Tugs: Tugs are not available and are not necessary for docking and undocking.

VHF: Available.

Berthing: One berth only available. Distance from entrance to berth 0.5 miles. Nature of bottom at the berth is mud. All banana loading is carried out by the side doors. Vessels berth port side to the quay. A very high rate of loading is attained (100 t.p.h.). A limited amount of mechanised equipment for handling palletised cargoes is available and also limited storage space for palletised and breakbulk cargoes. No equipment for handling containers is available. Accommodation ladder required.

Services Available: Only fresh water, airport and doctor available (i.e. no fuel or provisions available).

SHIPMASTER'S REPORT: Coconut Point. October 1989.

Charts: B.A. Charts No. 197, 499 and 1273.

Documents:

2 copies Crew Manifest.
2 copies Stores List.
6 copies Crew List.
1 copy Unmanifested Cargo.
6 copies Cargo Manifest.

Pilotage: Daylight pilotage only. They are busy 0600 hrs. – 0800 hrs. with cruise ships. Pilot boards due North of Tapion Rock Lighthouse.

Anchorage: North of Vigie Pt. in 15 fathoms, with Vigie Point 158° × 0.7 miles. We first anchored to await daylight with Vigie Point 104° × 0.3 miles, just North of the leading line. We were told to move to the North by the Signal Station. No appreciable set.

Radio/Signal Station: Vieux Fort on the South Coast will transmit information to Castries Signal Station. Both stations operate 24 hours. Call sign "Vieux Fort" or "Castries Lighthouse".

Signal Station on VHF Channels 12 and 14.

Tugs: One tug available.

Berthing: Ship's hose used. Coconut Point serves both Texaco and Shell depots. The usual ship rate is 300 bbls./hr. Maximum length of vessel 100 m., maximum draft 12 m.

Vessels berth stern to, with 2 shackles on port anchor and 2 stern lines to a buoy.

General: Pointe Seraphine: Berths No. 1 and 2 – New complex for cruise liners. Berth No. 6 for Geest banana ships. Other berths for general cargo. Vigie Airfield only used for local flights. International Airport in the Southern part of the island.

It is possible to telephone overseas from the Texaco office (via Cable and Wireless operator), payment to be made to the Texaco Manager.

Port Authorities trying to get Shell and Texaco to move to Cul De Sac Bay, just South of Castries, so that Coconut Point can be developed as a cruise terminal.

SHIPMASTER'S REPORT: Vieux Fort. December 1989.

Charts: B.A. Charts No. 499 and 1273.

Documents:

2 copies Crew Manifest.
2 copies Bond Stores List.
1 copy Health Declaration.
2 copies Inward Declaration.
6 copies Crew List.
2 copies Unmanifested Cargo.

Officials: On some occasions officials do not board and Shell Manager acts on their behalf. At other times, they board and seal the bond.

Pilotage: Pilotage is optional (checked with Pilot) for all berths, that is the LPG sea berth and alongside berth on 'Rafale' Pier. It is normal for "first visit" vessels to engage a Pilot who travels from Castries. Order Pilot at least 6 hours' in advance through Agent or Oil Company (Shell).

Contact can be made through Vieux Fort Lighthouse or Castries Lighthouse. No night berthing at sea berth. Berthing from 0600 hrs. onwards at sea berth.

We engaged a Pilot who boarded from fast green dugout fishing craft, about 0.25 miles West of Promontory. On next visit, I will undertake anchoring and mooring.

Approaches: Port conspicuous with Moule A Chique Promontory.

Beware of shoals off George Point.

Found counter current down West coast of St. Lucia (South-going).

Anchorage: About 3.5 cables off jetty, it is fairly well sheltered.

Berthing: It is best to use the port anchor. It is dropped when South mooring buoy and tank marked 'Shell' are in transit, after which vessel backs up between mooring buoys. Put hose buoys just on port quarter.

About 4 shackles on port anchor is normal. The depth alongside for the whole ship's length is 10.0 m.

There is no swell but wind is very gusty, shifting between North and East off the hills, which did not help berthing.

It is best to double lines to both buoys which have hooks. Boat used for Pilot acts as mooring/hose boat. On this visit it was a green hulled boat, previously blue hulled.

Cargo: Only ambient LPG handled at sea berth. Oils handled on South side of jetty.

The undersea 6 in. hose to buoys was lifted by the aft crane on port quarter, clear of water. Ship's hose coupled up to sea hose valve with the aid of a mooring boat, after which it is hung off by crane over port quarter. Standard 4 in. connection used.

Shore capacity 100 tonnes. Rate about 30 t.p.h.
Often large ship/shore differences.
Shipment received every 2 weeks.
No night discharge between 1800 hrs. and 0600 hrs.
Vessel can stay on buoys if pumping suspended overnight.
Shell operated on VHF Channel 9, we landed own Motorola.
Shell like a 50/50 mix.

General: Vessels cannot berth at the Banana Jetty between Tuesday night and Wednesday as banana ships have priority.

The berth is near to St. Lucia International Airport.

Agent: No Agent at the port. The Shell Manager acts as Agent, and also acts for customs when they do not board.

If vessel advises Shell 24 hours in advance, they will obtain stores for the vessel. Apples, meat and frozen food available. Heineken beer was E.C.$ 22.00/case. Friday is a good day for the market.

Vessel called again 2 weeks later and made the following observations.

The call sign for Vieux Fort Lighthouse is "Moule A Chique Lighthouse"

We anchored and awaited daylight with Mathurin Pt. Lighthouse bearing 162° × 0.3 miles.

We called Mathurin Lighthouse, who advised us that a boat was ready but no pilot available. We berthed at 0645 hrs. without a Pilot.

We berthed with Battery Point ahead (bearing 060°), and then swung hard to starboard with the Banana Pier bearing 120° and the South mooring buoy in transit with the 'Shell' tank. We dropped the port anchor and then backed up to the stern mooring buoys, one on each quarter, until the hose buoy (first orange buoy) was under the crane. On completion of mooring operation we had 6 shackles of cable out on the port anchor.

For stores this time we requested 6 cases of apples, grapes and 25 cases of Heineken but only received the beer due to a failed delivery from Castries.

As provisions did not arrive we made a last minute visit to a local wholesaler (Inter Island Supply), who are on the road to the airport, about 0.5 miles from the Shell Terminal. We obtained 6 cases of apples at U.S.$38.00/case and grapes at U.S.$50.00/pallet. We also obtained additional cases of beer at U.S.$8.68 per case.

AUTHORITY: Saint Lucia Air & Sea Ports Authority, P.O.Box 651, Castries, St. Lucia, West Indies. *Tel:* (809) 45-22893/4 *FAX:* (809) 45-22062. *Telex:* 6355 Paslu LC. *Contact:* George C. Girard, General Manager.

CUL DE SAC BAY: 13.59 N. 61.02 W. (See Plan)

LOCATION: The facilities of Hess Oil St. Lucia Limited (HOSLL) are located in Cul de Sac Bay (Lat. 13° 59′ N., Long. 61° 02′ W.) on the West coast of the island of St. Lucia, West Indies. Ready access for all vessels coming in from the Atlantic is provided by the St. Lucia Channel which lies between St. Lucia and Martinique. This channel is 17 miles wide and has general depths of 914 m. (500 fathoms).

PORT LIMITS: For tendering purposes a vessel will be considered as having taken arrival when it reaches the Pilot Station 2.5 miles due West of Bananes Point. A vessel's "Notice of Readiness" will not be accepted until the vessel has initially reached this point and notified HOSLL by VHF.

DOCUMENTS: The following documents are required for entry and clearance and are to be presented to the respective officers on boarding:

General Declaration for Ships.
Cargo Declaration.
List of Unmanifested Cargo.
Crew List.
Crew Members' Stores List.
List of Packages or Parcels Intended for discharge by Crew Members.

Normally it is necessary to have Customs entry completed before cargo operations can commence.

Customs clearance is accomplished by the vessel's Agent, cargo documents are placed onboard by the Terminal Department.

PILOTAGE: Service is available 24 hours a day and is compulsory for all vessels entering or leaving Cul de Sac Harbour. A HOSLL Pilot will assist the Master of any vessels docking or undocking at the Hess facilities, however, the Master of each vessel retains full responsibility for his ship at all times.

Vessels must remain at the pilot station 2.5 miles due West of Bananes Point until boarded by the HOSLL Pilot who will be placed aboard by a company tug.

The HOSLL Marine and Terminal Office is equipped with a VHF radiotelephone having the following channels:

Initial Contact: Channel 16.
Working Contact: Channels 11, 9 and 6.

Ships must call the HOSLL marine office on VHF at least 3 hours before arrival at the pilot station and advise of any change in their ETA.

Pilot Ladders: If the following regulations are not complied with, HOSLL Pilots may refuse to embark or disembark thus delaying the vessel.

(i) The Officer responsible for the embarkation and disembarkation of the Pilot is to be a Deck Officer.
(ii) The pilot ladder is to be properly secured and adequately lit at night.
(iii) The Pilot should be able to pass safely and conveniently from the head of the ladder onto the ship's deck. Where portable stanchions and bulwark ladders are used for this purpose, the portable stanchions must be rigidly secured to the ship's structure to prevent being unshipped and supported at not less than two points to prevent lateral movement. The bulwark ladder should also be independently attached and firmly secured. The stanchions should be of reasonable height and adequately capped to allow a firm grip.
(iv) The ladder is to be in good condition and its treads are to remain horizontal. The treads are to have a rough upper surface.
(v) The length of the ladder should not exceed 30 ft. Whenever the distance from sea level to a point of access on the ship is more than 30 ft. access from the pilot ladder to the ship must be by means of an accommodation ladder or other equally safe and convenient means.
(vi) The ladder is to be rigged so that each step rests firmly against the ship's side. Spreaders are to be provided not more than 10 ft. apart to prevent the ladder twisting.
(vii) A manrope or a safety line is to be secured at the vessel's rail and lowered over the side adjacent to and for the full length of the pilot ladder. A lifebuoy with self-igniting light is to be readily available.
(viii) The ladder is to be rigged well clear of any overboard discharges and at a place where the best lee can be provided to the boat carrying the Pilot.
(ix) Whenever a mechanical pilot hoist is used, a standard pilot ladder shall be at hand, ready for immediate lowering in the event of a hoist malfunction.

APPROACHES: Cul de Sac Bay is entered from the open sea between Bananes Point about 1 mile North of Marigo Point, and Ciceron Point about 0.75 mile farther Northeast. The tanker port area of Cul de Sac Bay ranges in depth from 40 ft. to 90 ft. below mean low water.

Vessels shall have their anchor windlass manned and their anchors ready to let go upon entering the approach to Cul de Sac Bay.

Navigation Aids: The entrance to Cul de Sac Bay is marked on the North at Ciceron Point by a 7 ft. × 7 ft. square green day marker mounted on a 25 ft. tower. The 7 mile flashing green light for this aid at elevation +40 ft. is programmed to flash 0.6 secs. on −5.4 secs. off.

On the South side of the entrance Bananes Point is marked with a 7 ft. × 7 ft. triangular red day marker mounted on a 15 ft. tower. The 7 mile flashing red light at elevation +85 ft. is programmed to flash 0.4 secs. on −3.6 secs. off.

A 10 mile leading light with a 4 ft. × 16 ft. day marker is installed upland at elevation +115 ft. This white light is programmed to flash 0.4 secs. on −3.0 secs. off.

All elevations given are above mean sea level.

At the inshore end of the bay, small buoys with flashing lights mark a submerged wreck and the shoal areas at the East end of Cul de Sac Bay.

ANCHORAGES: No anchoring is permitted in Cul de Sac Bay witho specific permission from the HOSLL Marine Manager.

RESTRICTIONS: Only vessels inbound or outbound from Cul de Sa Bay may use or be present in the Cul de Sac approach area. No vess shall enter Cul de Sac Bay except for the purpose of using the faciliti located therein and then only in compliance with the directions of th HOSLL Marine Manager.

Ballast Drafts:

Vessel dwt	*Forward*	*Aft*
Under 20,000	12 ft.	18 ft.
20,000 to 35,000	14 ft.	20 ft.
35,000 to 50,000	15 ft.	21 ft.
50,000 to 85,000	18 ft.	24 ft.
85,000 to 150,000	28 ft.	32 ft.
150,000 to 200,000	30 ft.	34 ft.
Over 200,000	40 ft.	40 ft.

These guidelines will be adjusted as weather and vessel handlin characteristics dictate. Advice concerning any variance will be provide to the vessel by the Pilot in ample time to prevent any unnecessar delays to vessel's ballasting.

MAX. SIZE:

Dock No. 2 (VLCC Berth):

Length – 1,300 ft. LOA.
Beam – No restrictions.
Draft – 82 ft.
DWT – 400,000 long tons.

Larger vessels can be accommodated, however, each such mov must be discussed on an individual basis prior to entry.

Dry Cargo Dock:

Length – 750 ft. LOA.
Beam – No restrictions.
Draft – 40 ft.
DWT – 50,000 long tons.

HEALTH: Pratique is required and will be granted by the Custom Immigration or Health Official boarding the vessel.

All vessels arriving from a foreign port will be boarded by Custom and Immigration Officers. VESSEL PERSONNEL ARE NOT ALLOWE ASHORE UNTIL PERMISSION IS GRANTED FROM THES OFFICERS.

Quarantine is required only if vessel is coming from a plague infecte area or if illness of a suspicious nature or there is a death (from ar cause) onboard. The Master is obligated to report to the HOSLL Mari Office any of the above circumstances well in advance of the vesse arrival at the pilot station in order that the Health Officials may be notifie – failing which the vessel may be delayed.

RADIO: Masters must advise both HOSLL – St. Lucia and their Agen by radio 72, 48 and 24 hours in advance of their ETA giving the vesse name, date and hour of arrival (local time) and the name of their pa port of call otherwise delays to the vessel may result.

VHF: VHF radio frequencies:

1. Calling only – Channel 16
2. Harbour operations – Channel 11
3. Pilotage – Channel 9
4. Agency – Channel 6

Harbour tugs and the HOSLL Marine Dispatchers monitor VH frequencies 24 hours a day. VHF call sign: Hess St. Lucia.

TUGS: Tug assistance in the harbour, docking and undocking mandatory and is provided by diesel tugs, stationed in the port to provi this service. Additional tugs are available when required.

When tugs are alongside or assisting a vessel, all cargo tank openin must be closed, unless the cargo tanks are gas-free.

BERTHING:

Dock No. 2 (VLCC Berth): Vessels using this berth will be turned in C de Sac Bay and docked port side to.

This dock is equipped with 4×16 in. Chicksan arms for handling cru oil and 1×16 in. Chicksan for dirty ballast.

Dry Cargo Dock: Vessels using this berth will dock port side to.

This dock is equipped with:

1. Three 10 in. hoses for ballast.
2. Three 10 in. hoses for crude.
3. One 10 in. hose for distillates.
4. One 10 in. hose for gasoline.
5. One 10 in. hose for asphalt.

Also see "Max. Size".

Moorings: A line handling vessel and personnel will be provided mooring.

Vessels shall at all times remain adequately secured alongside berth by the use of ropes or wires which are in good condition a properly sized for the load they are likely to incur. Mooring lines sh be regularly tended and kept taut.

The use of automatic tensioning winches to hold mooring lines forbidden.

Immediately on docking, emergency towing wires of sufficient len to reach the water's edge, with eyes on the outboard ends, must paid out from the offshore bow and the after quarter. The inboard en must be made fast to the vessel's bitts.

Wires shall be in good condition, of adequate strength and adjus as necessary throughout loading/discharging operations to keep eyes at or above the waterline at all times.

Rat Guards: Rat guards are required only if a vessel is coming fro plague infected area.

Gangway: Where HOSLL provides the gangway, a safety net wi rigged. When the vessel's gangway is used, we strongly urge the of a vessel supplied safety net under the gangway.

NOTICE OF READINESS: Notice of Readiness to load or discharge is a warranty that the vessel is in all respects ready to load or discharge, and that all of the vessel's equipment (including, but not limited to tanks, pumps, valves and pipe-lines) is ready and fit to load or discharge petroleum and/or petrochemical products. HOSLL reserves the right to refuse acceptance of such Notice of Readiness unless the vessel is in all respects ready to load or discharge.

A vessel will not be deemed ready to load or discharge and pumping will not commence until the Senior Deck Officer shall have executed and delivered to HOSLL the "Declaration of Inspection Prior to Bulk Cargo Transfer".

LOADING/DISCHARGING: Loading or discharging must not start until the Master or Chief Officer has:

(a) Signed a certificate acknowledging receipt of HOSLL's Terminal Regulations.

(b) Displayed in prominent positions on board "No Smoking", "No Naked Light", "No Visitors" notices.

(c) Jointly executed a HOSLL "Declaration of Inspection" with the Terminal Representative certifying that all necessary valves ashore and aboard are properly set; that the agreed loading/discharging signals are understood, and that all other matters relating to safe cargo transfer operations are being carried out.

Bonding Cable: A ground wire from the dock grounding system shall be connected to all vessels or barges loading/discharging petroleum before any hose connections are made. This cable is not to be disconnected until after all hoses or Chicksan arms have been disconnected and blanked off properly.

Connecting and Disconnecting Hoses: A crew will be provided by the terminal to connect and disconnect hoses and Chicksan arms on the vessel. Vessels should have blinds removed from the cargo lines, reducers installed and drip pans in place on arrival at the dock. The HOSLL Dispatcher will advise on arrival the size and number of hoses or arms to be connected. Also see "Berthing".

Communications: HOSLL will supply a VHF radio to the vessel for emergency communication between the vessel and the dock watch during loading/discharging operations.

Cargo Handling Signals: All vessels loading or discharging petroleum cargoes shall fly a red (bunker) flag between the hours of sunrise and sunset and during the night show a red light visible from all parts of the horizon at a distance of not less than 1 mile.

Weather Conditions: The loading and discharge of all crude petroleum and its products will be stopped during any severe electrical storm.

Loading of low-flash products will be stopped during periods of calm when the heavy vapours cannot be dispersed readily enough to prevent hazards from accumulating gas pockets. Vessel's Officers are cautioned to be on their guard during such conditions.

In the event of abnormal weather conditions in the area such as a hurricane, vessels will be notified that additional moorings are required. If the situation so demands, Masters may be instructed to suspend all operations and proceed to sea until normal weather conditions again prevail.

Demurrage: Vessels are required to vacate berths promptly upon completion of cargo handling operation (loading or discharging operations as the case may be). Permission to lay alongside at any time the vessel is not engaged in cargo handling operations must be granted in writing by the Marine Superintendent.

If any vessel fails to vacate its berth upon completion of cargo handling operations and expiration of free laytime for dock usage as outlined below, the vessel will be responsible as follows:

(a) To pay dock demurrage at the rate as specified by HOSLL per hour or a *pro rata* share thereof for a fraction of an hour.

(b) To hold HOSLL harmless for any demurrage and damages incurred as a result of other vessels awaiting berth or for any other consequences of its failure to properly vacate the berth.

The following rules shall govern the determination of demurrage:

(a) One hour free laytime will be allowed after completion of cargo loading operations. This free time will start at the time cargo hoses are disconnected from the vessel's manifold on completion of loading or discharge of cargo. Vessels awaiting cargo papers and/or Customs Clearance must vacate the berth within 1 hour of such completion and move outside to wait for their papers.

(b) Four hours' free laytime will be allowed for ballasting after discharge operations.

(c) Ballasting times for VLCCs will be handled on an individual basis for each vessel.

Overloading: Masters are advised that the international laws regarding overloading are strictly enforced and they should be guided accordingly.

Vessels shall not arrive or sail overloaded. All expenses incurred in discharging or lightering overloaded cargo will be for the vessel's account. Vessels departing to zones requiring lighter draft may sail with the draft permitted in that zone plus an allowance for fuel and water consumption to the zone limit.

Sea Suctions: Pumproom sea suctions and discharge valves are to be sealed on arrival. Seals are not to be broken while the vessel is in the harbour area. If it becomes necessary to break a seal, permission must be received first from the HOSLL dock representative who will check and record the seal numbers.

BALLAST: St. Lucia laws prohibit the pumping of dirty ballast overboard while a vessel is within their coastal waters. All dirty ballast must be pumped to the facilities available ashore. However, if a vessel is especially equipped with clean segregated systems which are reserved for ballast use only, it is permissible to pump overboard at the dock after the ballast tanks have been inspected and approved by a Marine Department Representative.

In pumping dirty ballast ashore, the ballast is received through a 36 in. shoreline at a maximum discharge pressure to the shore installation of 120 p.s.i.

Also see "Restrictions".

MEDICAL: Limited emergency medical attention is available from the public hospital at any hour of the day or night. The vessel's Agency Representative should be contacted by the Master with any requests for crew medical attention.

For routine medical treatment, a Doctor will board the vessel when requested through the vessel's Agency. Dental treatment is available weekdays.

All crew members requiring medical attention should be available upon vessel's arrival.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Limited supplies of marine hardware are available on the island.

There are no facilities for major repairs closer than Puerto Rico or Curacao.

SURVEYORS: Representatives of the American Bureau of Shipping, Lloyd's Register and other maritime classification societies are available from Puerto Rico and Curacao on 72 hours' notice. The vessel's Agent will assist Masters in soliciting their services.

Representatives of SGS (Societe General de Surveillance S.A.) will be available for cargo quantity and quality inspection as required. Other outside inspectors can be arranged upon adequate notice.

TIME: St. Lucia uses Atlantic Standard Time which is 4 hours slow of GMT all year round.

SHORE LEAVE: Under normal circumstances, no restrictions are imposed by the Immigration authorities on shore leave. Masters are requested to have all crew members on board at least 1 hour prior to departure time to avoid delay "waiting crew members".

HOSLL will provide the Master of each vessel with gate passes for the crew upon arrival.

Crew members are not permitted to walk through the terminal. HOSLL will supply transportation between the docks and the main gate at regular intervals. Crew members must make their own arrangements for transportation outside the main gate.

GENERAL:

Winds: The trade winds normally blow from an Easterly direction ranging from N.N.E. to S.S.E. Night winds are generally lighter than the daytime winds. About daybreak the wind speed begins to pick up, reaching maximum strength in the late morning or early afternoon. A return to the lighter night-time winds begins during the late afternoon, usually around 1600 hours.

In past years, hurricanes have occasionally passed close to and over the Island. Hurricane season runs normally from June through October of each year peaking in late August and September. For details see U.S. DMA Hydrographic Center – Sailing directions for the Caribbean Sea – Pub. 144.

Tides and Current: The tides are diurnal and small, the mean range being about 0.5 ft. and the diurnal range less than a foot.

Normally there is a current of 1 knot to 2.5 knots moving along the West coast of the Island in a Northerly direction.

Charts: Island of St. Lucia, U.S. DMA Hydrographic Center Chart No. 25521.

Anchorage in St. Lucia Island, U.S. DMA Hydrographic Center Chart No. 25528, B.A. No. 449.

Flags: Vessels entering Cul de Sac Bay during daylight shall fly their national flag and continue to do so during daylight hours when moored. All vessels of foreign registry shall fly the St. Lucian flag at the foremast when moored.

Visitors: No visitors are permitted in the dock area. Only persons on official vessel's business are permitted on the docks.

Mail: Official and personal mail will be delivered onboard by the vessel's Agent upon vessel's entry.

Mail received for vessels while in port will be delivered onboard prior to sailing. Outgoing mail is accepted from Master provided it is accompanied by a mail transmittal slip or support disbursements.

Laundry: Limited vessel's laundry facilities are available.

Liquor: The transportation of alcoholic beverages inside HOSLL's property is strictly prohibited; consequently, no liquor or beer may be brought or removed from vessels. The only exception to the foregoing is the delivery of bonded stores ordered by Masters for their vessels.

Swimming: Swimming in the dock area is strictly prohibited as sharks and barracuda frequent the harbour.

AUTHORITY: Hess Oil St. Lucia Ltd. (HOSLL). *Tel:* 809 452 3105 and 452 3904. *Telex:* 341-6346 A/B 6346 Hess Stl LC. *Cable:* Hessoil St. Lucia.

St. Pierre and Miquelon

SAINT-PIERRE: 46.47 N. 56.10 W. (See Plan)

DOCUMENTS: Formalities completed on arrival. Advise Port Service beforehand of vessel's ETA, length, tonnage and draft 12 hours before arrival.

Declaration of Health.
Derat Certificate.
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests of any cargo to be discharged.
2 Crew Declarations (tobacco, liquor, souvenirs).
Certificate of Registry.

PILOTAGE: Contact Pilot 1 hour before arrival calling TXU by radio telephone on 2182 kHz or VHF Channel 16. Permanent watch kept. Pilot boats equipped with VHF Channel 12, radar, and radio-telephone. Pilot launch available at entrance to N.E. channel in position Lat. 46° 48.3′ N., Long. 56° 07.7′ W., in the vicinity of the Land Fall Buoy.

Pilot launch named *Radar*, length 45 ft. The hull is black and superstructure white with "Pilote" painted on each side. Pilot launch carries the International Signals for pilot launch day and night.

When the weather is bad contact Pilot on Channel 12 for instructions.

Pilot is compulsory for vessel of 100 g.r.t. and over.

Pilot Tel. 41.20.68 (office), 41.24.87 (residence).

ANCHORAGES: In the roads, depth 13 m., not secure in strong East winds.

Shipmaster's Report: The anchorage in the roads where fish is loaded ex-trawlers is not secure, even with moderate winds from any direction, and engines should be on stand-by continuously. Several ships have gone on the rocks in a matter of minutes.

APPROACHES: *North East Passage:* Max. draft 8.5 m. Vessels approach on a heading of 209° T.

South East Passage: Used by vessels not exceeding 25 m. LOA and 5.0 m. draft.

24 hours' notice required if using this entrance.

MAX. SIZE: New Quay: Max. LOA 200 m. Max draft 10 m. Also see "Berthing".

HEALTH: If suspected disease on board contact Saint-Pierre Health Service. Tel: 41.21.11. (office), 41.21.17 (residence).

Masters of vessels arriving at Saint-Pierre may obtain Free Pratique via TXU. Message to be sent to Harbour Master Saint-Pierre at least 12 hours before arrival.

In the message the Master has to specify name of vessel, total number of crew members, where ship coming from, and if everybody on board healthy; in these conditions flag "Q" is not necessary on arrival, but if any suspected disease or fever on board, advise Health Authority as well as Agent, and stand by instructions for berthing. Flag "Q" has to be flown on arrival in the roads.

RADIO: Saint-Pierre Radio, call sign TXU, receiving on 2182 kHz. transmitting on 2410 kHz.

Masters of vessels arriving are requested to send their ETA to Harbour Master Saint-Pierre at least 12 hours before arrival and corrected by a further message if necessary. The ETA should be given in GMT. Also advise maximum draft and length.

VHF: Saint-Pierre Radio is equipped with VHF Channels 16 and 25 and maintains permanent watch on Channel 16. Port Captain on Channels 12, 10, 9 and 16. Keeps watch on Channel 12.

TUGS: No tugs available but the pilot launch (230 h.p.) will assist on Master's request.

BERTHING: Mole du Commerce: Length 170 m., depth alongside 8.50 m. 2 sheds (total area 2,700 sq.m.), water and bunkers.

Quai de Peche: Length 134 m., depth alongside 5.2 m. to 9 m. Roll-on/Roll-off terminal, one ramp, max. capacity 50 tons, 6,000 sq.m. open storage.

Mole Frigorifique: 3 berths; No. 1: 120 m. length, 7 m. depth over length of 92 m. No. 2: 85 m. length, 6 m. depth. No. 3: 123 m. length, 5.5 m. depth. Cold store of 15,000 cu.m. at −30°C. Open storage area of 15,000 sq.m. Water and bunkers available at all berths.

Quai de la Douane: South Side: Length 72 m. Depth 6.0 m. Water, electricity and telephone available. West Side: Length 49 m. Depth 6.0 m. Customs office located at this berth. East Side: Length 75 m. Depth 5.0 m.

Quai de l'Alysse: Length 50 m., depth 5.6 m. – 6.0 m. Water and electricity available. Berth used by fishery research vessels.

Quai du Frigorifique: New quay of length 56.4 m. with 2 mooring dolphins 100 m. to the East and West. Depth alongside 12.0 m. The berth can accept vessel of 200 m. LOA with draft of 10.0 m. Water and bunkers available.

Pilot will inform Master of berthing prospects and any special requirements.

STEVEDORES: ETA notices are to be sent to Agent 24 hours prior arrival. Stevedore in Saint-Pierre is Paturel Freres (Tel: 41.32.95 and 41.32.96). Cable Address "Reltupa Saint-Pierre". Telex: Reltupa 20 QN.

Approximately 60 men are available for working on board vessels when loading/discharging or transhipping in the port. Crew are allowed to work only when no gangs are available.

One normal shift 0730 to 1600 hrs. every week-day, Saturday 0730 to 1200 hrs. Day overtime, every day 1600 hrs. to 1900 hrs. Saturday 1200 to 1600 hrs.

Work done with ship's derricks.

It is requested that a net be put under gangway before starting work.

EQUIPMENT:

1 mobile crane, 10 tons at 18 m.
3 forklifts, 2 tons capacity.
2 forklifts, 7 tons at 3.5 m.
2 forklifts, 3 tons at 3.5 m.
1 tractor for 40 ton containers.
1×30 ton MAFI container trailer.

MEDICAL: All facilities available.

TANKERS: 1 berth (New Quay) alongside dolphins in depth of 12 m

FRESH WATER: Available at berths. Supplied by hoses, ra 25 cu.m.p.h.

FUEL: Only diesel oil SG 825/840 at 15°C available at all berths.

CONSULS: Local representatives for Canada, Netherlands, Norwa Portugal and Spain.

REPAIRS: Small repairs can be effected. Floating dock, capac 550 tons, for vessels up to 13 ft. 6 in. draft.

SURVEYORS: Bureau Veritas, Tel. 41.28.72.

OPENING/CLOSING HATCHES: Normally carried out by crew.

REPATRIATION: Can be arranged.

TIME: GMT minus 3 hours all the year round.

AMBULANCE: Tel: 41.21.11 and 41.21.13 (switchboard).

AIRPORT: Connections from Saint-Pierre to Halifax (Nova Sco International Airport.

TELEPHONES: Possible to place telephones on board at certain bert It is possible to contact the shore on Channel 16 via Saint-Pierre Rad

SERVICES: Compass adjusting, radar repairs, radio, Decca, Loran a gyro-compass repairs and maintenance possible.

IDENTIFICATION CARDS: Each man to carry Passport or Seame Book.

AUTHORITY: Direction du Port, Direction de l'Equipement, 6 Pla Lieutenant Colonel Pigeaud, B.P. 4217, Saint-Pierre, 97500 Saint-Pie et Miquelon. *Tel:* 41.32.01, 41.32.02. *Telex:* DDE SPM 914439 (*Contact:* Jean Urtizberea, Port Captain. Tel. 41.24.10 (Office). 41.28 (Residence).

NOTES

Please also advise Shipping Guides Ltd.

St. Vincent

KINGSTOWN: 13.09 N. 61.14 W. (See Plan)

PORT LIMITS: The imaginary line joining Old Woman's Point and Cane Garden Point.

DOCUMENTS:

Customs:
2 copies Ship's Stores List.
2 copies Crew's Stores List.
1 copy Crew List (in).
1 copy Crew List (out).
1 copy Passengers List (in).
1 copy Passengers List (out).
1 copy List of Unmanifested Cargo.
Clearance from Last Port.

Immigration:
1 copy Passenger List (in).
1 copy Passenger List (out).
1 copy Crew List (in).
1 copy Crew List (out).

Health Authorities:
1 copy Animal Declaration.
1 copy Derat Certificate.
1 copy Declaration of Health.

Harbour Master:
1 copy Passenger List (in).
1 copy Passenger List (out).
1 copy Crew List (in).
1 copy Crew List (out).

PILOTAGE: Agent to be notified of request for Pilot 24 hours prior to ETA. Boarding by Pilot at harbour entrance about 2 miles from anchorage. By day pilot boat flies pilot flag, by night shows signal-lights. Ship to fly "Request for Pilot" – flag by day and signal-lights by night. Also two long and one short blast (Morse Code "G").

ANCHORAGES: Well protected anchorages. Large vessels lie to in basin 90 ft. – 100 ft. depth. Average sized vessels berth at pier 27 ft. – 40 ft. depth.

RESTRICTIONS: None.

HEALTH: Port Health Officer boards vessel at anchorage. Requires Bill of Health or Master's Declaration, and a copy of Passenger List. Vaccination Certificates are no longer required. Passenger and Crew Muster no longer required. No one allowed to embark or disembark before Pratique granted and Immigration Officials have boarded vessel.

RADIO: Cables should be routed through Cable and Wireless (West Indies) Ltd. Tel: 71901. Telegrams and Telex: 93.

VHF: The Fort Charlotte Signal Station should be contacted on VHF Channel 16 by vessels approaching, entering, manoeuvring in and departing from the Port.

RADAR: None.

TUGS: None.

BERTHING: One berth 900 ft. long. Max. draft approx. 30 ft. (salt water). Loading/discharging by ship's gear. Break-bulk (palletised) cargo handled. 10 ft. and 20 ft. containers handled on a limited scale (max. gross weight 10 tons).

CRANES: 35 tonne mobile crane available.

BULK CARGO FACILITIES: None at Kingstown.

Campden Park Bay, 2 miles North along the West coast – flour mill complex for receiving grain (bulk) and shipping flour. Max. draft 36 ft. One berth 300 ft. Loading gear – conveyor belt, height adjustable. Discharging into receiving hopper 25 ft. high. Loading: Max. 1,200 bags flour/feed per hour. Average rate 750 bags/hour. Discharge rate: Max. 60 t.p.h. per vacuator, average 40 t.p.h. Two vacuators normally used.

SPECIALISED CARGO HANDLING FACILITIES: No specialised berths for containers or Ro/Ro traffic.

Arnos Vale, a bay situated about 2 to 2.5 miles S.E. of Kingstown, features a buoy with a 4 in. floating line for LPG. Draft 14 ft.

BRIDGES: None.

STEVEDORES: 24 hours' notice of ETA required. Advise type of cargo, number of hatches to be worked, this required for arranging gangs of stevedores and longshoremen. Average discharge rate 3 – 5 tons per gang/hour.

MEDICAL: Advance notice to Agent of medical requirement is helpful. Hospital facilities available.

TANKERS: No facilities at Kingstown.

Arnos Vale (see "Specialised Cargo Handling Facilities") has available 3 buoys. Draft 24 ft., 17 ft. 6 in. and 14 ft. Serviced by floating and submarine line 6 in. and 4 in. Fuels available: White Products – Gasoline 93 R Octane, Kerosene Oil, Light Diesel Oil, Aviation Fuel; Black Products – R.C. 2 and Colas. Rate of discharge: White Products: 500 bbls./hr. Black Products: 300 bbls./hr.

Also see "Shipmaster's Report" dated February 1990.

DENSITY: Average 1025 oz/cu.ft.

FRESH WATER: Available. $5.00 (E.C.) per 100 gallons (I.G.). Delivery ex-pier by 3 in. line reduced by 1.5 in. nozzle – 2,500 gall./hr.

FUEL: Grades available. See "Tankers". 2 or 3 hours' notice during normal working hours required. Delivery ex Land-Tanker. Convenient to smaller craft only.

FIRE PRECAUTIONS: Usual precautions.

CONSULS: Consulate of the Netherlands (Mr. K. Boyer, P.O.Box 354. Tel: 84222, 72677).

French Consular Agent (Mr. Clifford Frank, P.O.Box 364. Tel: 61615).

Deputy British High Commissioner (Mr. M. D'ath, P.O.Box 132. Tel: 71701).

Embassy of the Republic of Venezuela. (Sr. Escobar C. Hernani, P.O.Box 852. Tel: 61374).

REPAIRS: Minor facilities only, e.g. minor mechanical repairs and simple welding, etc.

DRY DOCKS: None. There is a small mechanised dry-docking cradle (privately owned) for small to medium sized yachts at Union Island, an island of the Grenadines chain 40 miles South of St. Vincent.

SURVEYORS: Lloyd's Insurance (London). London representative: Messrs. Hazells Ltd., Kingstown. Tel: 61201. Telex: Hazells 7512.

GANGWAY/DECK WATCHMEN: Watchmen recommended. Rates fixed per day.

CARGO GEAR: Loading/discharging effected by ship's gear.

REPATRIATION: Facilities for crew changes and repatriation available.

AIRPORT: Arnos Vale Airport 2 miles from Port. Scheduled flights.

TIME: GMT minus 4 hours. No alterations to clock during the year.

HOLIDAYS: New Year's Day, (1st January); St. Vincent and Grenadines Day, (22nd January); Good Friday; Easter Monday; Whitsun Monday; Labour Day, (1st May); Caricom Day, (1st Monday in July); Carnival Day, (1st Tuesday in July); August Monday, (1st Monday in August); Independence Day, (27th October); Christmas Day, (25th December); Boxing Day, (26th December).

BANKS: Caribbean Banking Corporation, Middle Street, Kingstown, P.O.Box 118. Tel: 61501, 61502, 61503. Telex: 7513.

The Canadian Imperial Bank of Commerce, Halifax Street, Kingstown, P.O.Box 212. Tel: 71587. Telex: 7532 VQ.

Barclays Bank International Ltd., Halifax Street, Kingstown, P.O.Box 604. Tel: 61706. Telex: 7520.

The Bank of Nova Scotia, Corner White Chapel and Halifax Street, P.O.Box 237. Tel: 71601. Telex: 7546 VQ.

National Commercial Bank.
St. Vincent Agricultural and Loan Bank.
St. Vincent Co-operative Bank.

STORING: See "Prelims".

1. Vessels stored by truck.
2. No barges available.
3. Trucks allowed alongside.
4. Fork lift trucks can be used on jetty to handle stores.
5. Customs regulations regarding storing allows stores to be exported duty-free under Customs supervision, and sometimes Customs seals while in port.
6. Local Riggers available for assisting with storing.

POLICE/FIRE/AMBULANCE: Police Headquarters/Fire Department, Tel: 71211. Emergency: 99. General Hospital, Tel: 61185.

EMERGENCY CO-ORDINATION CENTRE: The Royal St. Vincent Police Station, Kingstown. Tel: 71211. Emergency: 99.

TELEPHONE: Two telephones available, $25.00 per day per phone.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Seaman's Book adequate.

REGULATIONS: No unusual regulations.

DELAYS: Normal delays in berthing etc., as a result of limited docking area.

DEVELOPMENTS: Deep Water Berth to be extended by 300 ft. – 400 ft. to the North and by 150 ft. to the South. No schedule available at present.

GENERAL: *Charts:* BA. 501 and BA. 791.

SHIPMASTER'S REPORT: January 1979 (Updated 1990).

Pilotage: Compulsory for vessels over 180 n.r.t. Pilot boards 0.5 miles South of Fort Charlotte Light. A heavy swell may be experienced and vessel is always rolling.

Restrictions: Vessel may enter and leave at any stage of the tide, however, berthing is not recommended during hours of darkness. Unberthing may be carried out at any time.

Max. Size: LOA 550 ft. Max. draft approximately 30 ft.

VHF: Fort Charlotte on VHF Channel 16.

Berthing: One berth only available, vessels always dock port side to. Wharf is concrete with hard rubber fenders. There are storage facilities for breakbulk cargoes and palletised cargoes, there is also mechanised equipment for handling bananas. Container stowage in the container park. One top lifter for handling 20 ft. and 40 ft. containers, max. weight 30 tons. Loading rate for bananas 15 t.p.h. per gang using ship's derricks. Vessel's accommodation ladder required.

Facilities Available: Fresh water, fresh provisions, airport, laundry services, doctor, hospital, groceries, fish and meats.

SHIPMASTER'S REPORT: February 1990.

Berth: Shell and Texaco Terminal at Greathead Bay (Arnos Vale).

Approach: For Shell and Texaco oil terminals in Greathead Bay, vessels are first required to clear Customs and Immigration at Kingstown.

From the North West, Kingstown is easily passed by being rather inconspicuous, a small city tucked away at the head of its own bay.

Best landmark is Fort Charlotte on the promontory to the West of the town.

From the East, the airfield runway is easily seen on the N.W. side of Greathead Bay.

Anchorage: Vessels either anchor for clearance in Kingstown Bay if Greathead Bay berth is occupied, or at night, or just lie in the bay for clearance.

The water is deep and the only shallow area is within 1 cable of the harbour wall.

We anchored with 4 shackles in water with Cane Garden Point bearing 160° at a distance of 0.65 miles.

Pilot: Pilotage inwards to Greathead Bay is compulsory (0600 hrs. to 1800 hrs.). Pilot is embarked from a black hulled launch in Kingstown Bay. Pilot not required outwards. Vessels may leave at any time.

Signal Station: Fort Charlotte on VHF Channels 16/11 throughout 24 hours. Port Office on VHF Channels 16/11 from 0800 hrs. – 1600 hrs.

Oil Moorings: Position Lat. 13° 08.2′ N., Long. 61° 13.2′ W., in the Eastern end of the bay tucked under the promontory.

Depth at moorings about 8.0 m. minimum.

Vessels finally moor less than 1 cable from the cliffs.

The starboard anchor is let go abeam of cliff head (13° 08.08′ N., 61° 13.13′ W.), headland unnamed. Then one port breast line sent to buoy and 2 starboard stern lines sent to inshore buoy of two. Stern being pulled over to port quarter buoy so that buoy finishes up just forward of stern.

It is advisable to send port line first (use best available), then one stern line, gradually warping vessel into position.

There are 3 buoys, all painted white, the third buoy ends up on the starboard quarter and is generally not used.

Buoys only have eyes and require mooring shackles.

Vessel ends up with about 5 shackles in water, ship's head 190°.

Boatman has a dugout with outboard and also handles hoses.

Weather/Tides: Strong Easterly winds are prevalent which makes mooring difficult, particularly in heat of day.

Tides can be strong. The flood was observed running to East and ebb to West as at HW Kingstown. Flood is much stronger than ebb.

Due to prevailing wind, vessel does not, as a rule, set onto cliffs.

Best to moor at first light or at dusk.

Hose: At present the ship's floating hose of about 240 m. is run to Shell, slightly more to Texaco. Port side run off.

In June 1990, 3 submarine lines will be commissioned – 1×6 in. white oils, 1×6 in. RC250 (Bitumen) and 1×4 in. LPG. Pumping rate expected to be around 300 tonnes/hr.

Terminals: Shell centred in position Lat. 13° 08.28′ N., Long. 61° 13.05′ W. Texaco nearby to the West.

Shell tankage:

M 93	2,800 bbl.
ULG	2,800 bbl.
Av. Jet	3,400 bbl.
Av. Gas	1,000 bbl.
Gas Oil	6,000 bbl.
RC250	1,100 bbl.

No LPG tanks.

Texaco has similar tankage plus LPG facility.

Shell normally use VHF Channel 9, so if not available on ship's Motorola, ship has to land ship's set.

Water plugs between grades.

Agent: Shell agent not seen at Kingstown. Texaco use St.Vincent Motors.

Documents: Officials require 6 Crew Lists, 2 Crew Manifests, 2 Bonded Stores Lists, 2 Stores Lists and Health Declaration.

No problems were encountered and the bond was not sealed.

AUTHORITY: The St. Vincent Port Authority, P.O.Box 1237, Kingstown, St. Vincent, W.I. *Tel:* (809-45) 61830, 72719. *Telex:* 7500 Cwagency. *FAX:* (809-45) 62732. *Contact:* Harbour Master: Captain Brenan B. King, Tel: 61830, 61400. Port Manager: L. Kirby, *Tel:* 72719. Chairman: Mr. Keith Boyea, *Tel:* 72041.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Sao Tome and Principe

SAO TOME: 00.21 N. 06.44 E.

SHIPMASTER'S REPORT: May 1984.

DOCUMENTS:
6 copies Crew Lists.
6 copies Animal Lists.
6 copies Passenger Lists.
6 copies Arms & Ammunition Lists.
6 copies Ports of Call.
2 copies Personal Declaration.
2 copies Stores Declaration.
3 copies Cargo Manifests.

PILOTAGE: No service available.

ANCHORAGE: On the leading line shown on the chart, about 8 – 9 cables from the breakwater. By day or night the leading light structures are not easily recognisable. Vessels lie at anchor heading in a S.S.E.'ly direction and do not swing around to the tide. The ground, which is clearly visible when the sea is calm, is sand and holds well.

RADIO: Although Sao Tome has a listed radio station, it is not regularly attended and does not function properly. Masters are advised to send ETA messages via one of the major coast stations such as Cape Town. There is supposed to be a VHF station in port but this is also mostly unattended. There is telex connection to Europe.

BERTHING: *Cargo Handling:* If no other vessel in port, up to 200 tons per day in lighters of 40/60 tons each.

MEDICAL: There is a hospital and medical attention is available.

FRESH WATER: Not available.

AIRPORT: Sao Tome has regular flight connection with Luanda only. A once a month service to the Cape Verde Islands started in April 1984, on an experimental basis.

SHORE LEAVE: Crew members may go ashore but must return on board before 2000 hrs. They must carry their Passports with them.

GENERAL: *Provisions:* There is no ship chandling service. Some small amounts of fresh vegetables can be purchased.

Customs: The ship's bonded stores are not sealed by Customs.

Immigration: One policemen stays on board throughout the ship's stay in port.

Currency: The local currency is Dobras, about 33 Dobras = $1.00 (April 1984).

Mail: Because of the lack of direct flight connections, it is advisable not to send mail to or from Sao Tome.

SHIPMASTER'S REPORT: January 1989.

PILOTAGE: Not available.

ANCHORAGE: The anchorage is on the leading line shown on the chart, about 5 cables from the breakwater. The minimum depth of water is 10.0 m. and the holding ground is good. The vessel swings with the tide but generally heads in a South-Southeasterly or North-Northwesterly direction.

RADIO: Sao Tome Naval Radio Station is the local station, but is not regularly attended. None of the operators understands English. They will only reply if the vessel calls in the Portuguese language.

There is a manual telex connection with Europe, however ETA should be sent via a major coast station.

BERTHING: The length of the jetty is 200 m. and the maximum depth alongside at LW is said to be approximately 2.50 m.

CARGO HANDLING FACILITIES: Ocean-going vessels load and unload at anchor. There is a long Southeasterly swell and this makes operations dangerous. Vessel must have sufficient fenders for carrying out cargo operations.

The local stevedores are able to handle conventional derricks, but it is not recommended that they be allowed to handle sophisticated container cranes or other modern cargo handling gear.

There are approximately 10 lighters available for handling cargo of vessels at anchor and if only one vessel is discharging, a rate of up to 300 tonnes per day for breakbulk cargo can be achieved.

There are 4 lighters which are capable of carrying 1×20 ft. container at any one time and 1 lighter capable of carrying 1×40 ft. container.

The jetty is equipped with a fixed crane with 23 tonnes capacity and a mobile crane of 5 tonnes capacity.

There is only one lorry capable of carrying 40 ft. containers, therefore the discharge rate for 40 ft. containers is a maximum of 5×40 ft. containers per day. The discharge rate for 20 ft. containers is a maximum of 20×20 ft. containers per day.

As there is a lack of lorries to handle containers the harbour can become congested.

SHORE LEAVE: Crew members are allowed ashore, but must return aboard the vessel before 2300 hrs. Whilst on shore, crew must carry their Seaman's Books.

GENERAL: Sao Tome is a suitable place for conventional vessels, but is not recommended for pure container vessels, especially if they are not equipped with a powerful bow thruster, in order to work against the swell while unloading containers by own cranes.

NOTES

Saudi Arabia

GENERAL

NOTICE:

Saudi Arabia – Bahrain Causeway

The following Navigation Warning issued by the Saudi Seaports Authority – Riyadh is circulated to all concerned:

Date: 23.7.1407/25.11.1986
Subject: Navigation Warning "A" 172/25.11.1986
Saudi Arabia – Arabian Gulf – Saudi Arabia – Bahrain Causeway.

1. A causeway linking Saudi Arabia and Bahrain has been constructed and the following positions represent the centreline and general direction of the causeway:

A. Lat. 26° 13.17′ N., Long. 50° 13.27′ E.
B. Lat. 26° 13.20′ N., Long. 50° 13.87′ E.
C. Lat. 26° 13.15′ N., Long. 50° 14.38′ E.
D. Lat. 26° 12.83′ N., Long. 50° 15.63′ E.
E. Lat. 26° 12.70′ N., Long. 50° 16.00′ E.
F. Lat. 26° 11.33′ N., Long. 50° 18.82′ E.
G. Lat. 26° 11.02′ N., Long. 50° 19.55′ E.
H. Lat. 26° 10.92′ N., Long. 50° 20.17′ E.
I. Lat. 26° 10.83′ N., Long. 50° 22.20′ E.
J. Lat. 26° 10.17′ N., Long. 50° 24.07′ E.
K. Lat. 26° 10.05′ N., Long. 50° 25.25′ E.
L. Lat. 26° 10.28′ N., Long. 50° 27.00′ E.

2. Four Navigation Spans have been provided in the causeway, 1 main (Bridge No. 3) and 3 secondary (Bridge Nos. 1, 4 and 5).

(a) Main Navigation Span Bridge No. 3.
Centre of Span in position: Lat. 26° 12.10′ N., Long. 50° 17.23′ E.
Clearance Under Span: 28.5 m. at Admiralty Chart Datum.
Navigation Width of Span: 122 m.
Depth of Water Under Span: 7 m. at Admiralty Chart Datum.

(b) Secondary Navigation Span Bridge No. 1.
Centre of Span in position: Lat. 26° 13.18′ N., Long. 50° 13.58′ E.
Clearance Under Span: 15.5 m. at Admiralty Chart Datum.
Navigation Width of Span: 45 m.
Depth of Water Under Span: 5.5 m. at Admiralty Chart Datum.

(c) Secondary Navigation Span Bridge No. 4.
Centre of Span in position: Lat. 26° 10.87′ N., Long. 50° 21.10′ E.
Clearance Under Span: 15.5 m. at Admiralty Chart Datum.
Navigation Width of Span: 45 m.
Depth of Water Under Span: 5.5 m. at Admiralty Chart Datum.

(d) Secondary Navigation Span Bridge No. 5.
Centre of Span in position: Lat. 26° 10.12′ N., Long. 50° 25.75′ E.
Clearance Under Span: 15.5 m. at Admiralty Chart Datum.
Navigation Width of Span: 45 m.
Depth of Water Under Span: 4.5 m. at Admiralty Chart Datum.

3. (a) The North and South piles on the Eastern side of each navigation span are marked with red lights, while green lights mark the Western sides. These lights show over an arc of 40°, that is 20° either side of a line at right angles to the bridge span.

(b) Main Navigation Span Lights:
Characteristic: Occult 5 secs.
Height: 5 m.
Nominal Range: 5 miles.

(c) Secondary Navigation Span Lights:
Characteristic: Fixed.
Height: 7 m.
Nominal Range: 5 miles.

(d) The piles at either side of the navigable spans are also illuminated from above with floodlights.

4. Light beacons, Lateral System "A" with a height of 5 m., nominal range 5 miles and fitted with radar reflectors are to be inserted as follows:

Lat. 26° 12.87′ N., Long. 50° 17.50′ E.	Fl. Green 4 secs.
Lat. 26° 12.85′ N., Long. 50° 17.58′ E.	Fl. Red 4 secs.
Lat. 26° 12.48′ N., Long. 50° 17.35′ E.	Fl. Green 8 secs.
Lat. 26° 12.47′ N., Long. 50° 17.43′ E.	Fl. Red 8 secs.
Lat. 26° 11.73′ N., Long. 50° 17.03′ E.	Fl. Green 8 secs.
Lat. 26° 11.70′ N., Long. 50° 17.12′ E.	Fl. Red 8 secs.
Lat. 26° 11.35′ N., Long. 50° 16.88′ E.	Fl. Green 4 secs.
Lat. 26° 11.32′ N., Long. 50° 16.97′ E.	Fl. Red 4 secs.

5. All positions are referenced to the International Spheriod Datum Ain Al Abd (1970).

TRAVEL TO SAUDI ARABIA: *Crew Members' Wives' Passports:* We have been informed that the Director General of Passports, Riyadh, has notified Director of Passports (Eastern Province) Dammam, that wives of crew members arriving in Saudi Arabia and wishing to join their husbands on board vessels, are required to obtain, prior to arrival, valid Saudi Entry Visas from Royal Saudi Consulate in their countries.

The visa endorsed in passport must state the intention of joining the particular ship to obtain exit via seaport.

AUTHORITY: The Ports Authority of the Kingdom of Saudi Arabia formulates policy for and supervises the management and operation of the following ports:

	Lat.	*Long.*
East Coast:		
King Abdul Aziz Port, Dammam	26° 30′ N.	50° 12′ E.
King Fahd Industrial Port, Jubail	27° 04′ N.	49° 40′ E.
Jubail Commercial Port	27° 01′ N.	49° 40′ E.
Qatif	26° 34′ N.	50° 00′ E.
Darin	26° 32′ N.	50° 04′ E.
Al Khobar	26° 17′ N.	50° 13′ E.
Al Ugayr	25° 39′ N.	50° 13′ E.
Ras Tanura	26° 39′ N.	50° 10′ E.
Ras Al Khafji	28° 25′ N.	48° 32′ E.
Ras Al Ju'aymah	26° 56′ N.	50° 03′ E.
West Coast:		
Jeddah Islamic Port	21° 28′ N.	39° 10′ E.
Yanbu, King Fahd Industrial Port	23° 56′ N.	38° 15′ E.
Yanbu, Commercial Port	24° 05′ N.	38° 03′ E.
Gizan	16° 54′ N.	42° 32′ E.
Haql	29° 18′ N.	34° 57′ E.
Al-Khuraibah	28° 04′ N.	35° 10′ E.
Dhuba	27° 21′ N.	35° 42′ E.
Al Wajh	26° 14′ N.	36° 28′ E.
Umm Lajj	25° 01′ N.	37° 16′ E.
Rabigh	22° 45′ N.	39° 00′ E.
Al Laith	20° 09′ N.	40° 14′ E.
Al Qunfudah	19° 07′ N.	41° 04′ E.
Al Qahmah	18° 00′ N.	41° 40′ E.
Farasan	16° 43′ N.	42° 11′ E.

INERT GAS SYSTEM: ARAMCO has been informed that the Government of Saudi Arabia has ratified the Solas Convention of 1974 and its 1978 Protocol on May 29th, 1984. Therefore, ARAMCO is now obliged to enact the provisions of the said convention as soon as possible.

All Ship Owners/Operators to comply with the following:

1. Effective January 1st, 1985, all vessels of 70,000 d.w.t. and larger calling at any of ARAMCO's terminals to load crude/product cargoes must be equipped with an operable inert gas system in use.
2. Effective May 1st, 1985 all vessels of 20,000 d.w.t. and larger calling at any of ARAMCO's terminals to load crude/product cargoes must be equipped with an operable inert gas system in use.

Vessels not so equipped will not be accepted for loading as of the effective dates mentioned above.

The Solas Convention of 1974 represents a significant contribution to safety of tankers and oil installations and ARAMCO recommends that Ship Owners take immediate steps to comply with provisions of this convention as soon as possible and no later than the effective dates mentioned above. No exceptions will be allowed except in the most unusual circumstances.

Note: ARAMCO will follow the terms of the Solas Convention of 1974 and its 1978 Protocol *including* sections pertaining to exemptions. Any vessels exempted under this Convention will still, however, be required to comply with all Saudi Government Port Regulations as well as ARAMCO Safety Rules.

RULES/REGULATIONS: The Co-operation Council for the Arab States of the Gulf has issued a set of Rules and Regulations Valid for Saudi Arabian Seaports. These Rules and Regulations became effective on March 22nd, 1985.

EVERY VESSEL ARRIVING IN A PORT OF THE KINGDOM MUST HAVE A COPY OF THESE ON BOARD OR MUST OBTAIN ONE IMMEDIATELY ON FIRST ARRIVAL.

The Port Inspectors make periodical inspections and in the event of non-possession of the said Rule Book by a vessel, she may be penalised. If you already have one or after you get one, it is recommended that you read pages, 66-75, 163-172, 220-233 and 260.

Hereunder follows an EXTRACT from these Rules and Regulations:

General Regulations for Cargo Stowage and Handling:

1. The stowage of cargo bound for ports in the Kingdom of Saudi Arabia must be arranged to ensure simultaneous and optimum rate of discharge from the maximum number of hatches compatible with the requirements of seaworthiness.

2. Where practicable all general and bagged cargo of uniform type and size is to be stacked and secured on pallets to facilitate quick discharge when shipped to the Kingdom of Saudi Arabia in conventional vessels.

3. Exceptions to palletisation:
   a. Bagged cargoes may be pre-slung.
   b. Bagged cargoes arriving in full ship-loads may be discharged loose provided that such cargo is taken by direct delivery and a minimum discharge rate of 1,200 tons per 24 hours is guaranteed.

Bagged cargoes arriving in part ship-loads may be discharged loose provided that such cargoes are taken by direct delivery and a minimum discharge rate of 250 tons per hook per 24 hours is guaranteed.

   c. Foodstuffs, if palletisation would adversely affect the total distribution costs, but the stowage must be arranged to obtain optimum discharge rates.
   d. Cargo carried on schooners and small craft of less than 70 m. in length which are engaged in coastal trade within the Arabian Gulf, the Red Sea and to/from Somali ports.

The weight per bag shall not exceed 50 kg.

4. Tyres should be in bundles of appropriate size or pre-slung.

5. Bundled steel, profile iron, rebars, etc., shall be fitted with slings or lifting points suitable for multiple handling before commencement of handling this type of cargo, the ship's Master or Agent must present to the Port Management a Certificate precisely stating the safe loading capacity of the relevant slings and lifting points. Failing to comply with this requirement will subject the vessel to financial penalties in addition to legal liabilities to third parties.

6. Steel sheets shall be strapped and stacked in bundles of approximately 2 tonnes each. Wooden bearers and/or spacers shall be used in loading the bundles to facilitate discharge.

7. Pallets must be stowed in a ship's hold in a manner to facilitate discharge and make the best use of cargo handling equipment within the holds.

8. All cargo listed on the dangerous cargo list according to IMO Rules must be stowed and handled as prescribed.

9. Masters and shipping Agents are to instruct their stevedoring contractors at loading ports to execute complete separation in accordance with Bills of Lading and the Manifest, and will be held responsible for non-compliance with this regulation.

10. Comprehensive regulations govern the carriage of livestock by sea and their handling at ports in the Kingdom of Saudi Arabia, also the carriage and handling of bagged oil cake and scrap.

Unitisation of Timber:

11. Sawn timber, plywood and veneer is to be unitised. Timber cargoes shall be properly strapped to withstand multiple handling. Bundles shall be separated by skids or dunnage to facilitate lifting or handling by forklifts. Each bundle should weigh between 2 and 3 tonnes.

Bagged Cement, Lime, Gypsum and Similarly Packed Cargo:

12. Bagged cement in paper bags must be packed in 5-ply strengthened paper supported by an inner skin of polythene or similar waterproof material. If there is no synthetic layer, the bag must be made of extra-strengthened paper (minimum 6-ply), or of materials whose proven strength is at least equivalent to the above.

In the square of each workable hatch opening within the plumb of the ship's discharging gear, a block of bagged cement must be left in pre-slung form in flat straps capable of lifting the bagged cement in safe working loads without damaging the packaging. This block must have dimensions of at least 6 m. × 9 m. horizontally and these dimensions must be maintained down to the bottom layer.

(Additional regulations apply.)

13. The Master of any vessel carrying grain to a port, whether in bulk or in bags shall present an official certificate from the country of origin stating that the cargo was free from infestation and that it has been fumigated either before or after loading, in addition to a Certificate stating that the vessel was free from infestation prior to commencement of loading. Without these certificates the vessel will not be permitted to discharge and will be liable to the imposition of a fine.

14.The discharge of cargo for transhipment to another port, whether local or foreign is strictly forbidden without the prior permission of the competent authority.

The transfer of cargo from one vessel to another at anchorage or alongside berths within the port boundaries is strictly forbidden without the permission of the competent authority.

PORT REGULATIONS:

ARRIVAL:

1. Notification to the Port Management

1.1 The Owners of vessels bound for a port in the Kingdom of Saudi Arabia with cargo must give preliminary notice of the vessel's intended arrival to the Port Management of the discharge port or ports by telex or cable either directly or through the vessel's Agents on arrival at the first or sole loading port, before loading commences. Estimated time of arrival and estimated quantity of cargo by type must be given with the preliminary notice.

1.2 On completion of loading cargo for Saudi ports the following information must be sent to the Port Management of the discharge port or ports by telex or cable either directly or through the vessel's Agents:

a. Vessel's name and former names, if any.
b. Flag, port of registry and call sign.
c. Length overall, g.r.t., n.r.t. and d.w.t.
d. Expected draft on arrival.
e. Expected time of arrival.
f. Cargo particulars, including nature, weight, tonnage and stowage by hatches. Car carriers, Ro-Ro and container vessels to give both number and weight in tonnes of each type of unit.
g. Any other cargo being carried for other destinations.
h. If dangerous cargo is being carried, the quantity and class must be indicated in accordance with the IMDG Code and it must be stated whether this cargo is to be discharged or is in-transit.
i. Number, position and S.W.L. of derricks and/or cranes, and particulars and positions of ramps.
j. The number and nationalities of passengers to be disembarked or in transit.
k. Expected requirements for bunkers and water.
l. Name of vessel's Agent.
m. Not less than 48 hours before the vessel's arrival a detailed List of Arms and Ammunition carried on board purely for self-defence. Failure to comply with this requirement will result in heavy fines and seizure of the arms by the concerned authorities.

1.3 A vessel bound for a port in the Kingdom of Saudi Arabia for loading or bunkering must notify the Port Management immediately orders have been received to proceed to Saudi Arabia giving the information as in 1.2 above but relevant for loading or bunkering.

1.4 A further notice of ETA is to be sent 5 days, 2 days and 1 day prior to arrival at the port.

Also see "Advance Notice Requirements".

2. Vessels Failing to Give Required Notifications

2.1 Any vessel failing to comply with the requirements under section 1 above or arriving later than expected under the revised ETA, may lose its berthing registration and will be held responsible for all expenses incurred by the Port Management.

2.2 Exemption from the requirements listed under paragraph 1 above may be granted by the Port Management to vessels engaged in coastal trading or which have departed from a neighbouring country, depending on the availability of proper communication between the relevant ports, and the duration of the vessel's voyage.

3. Permission to Enter Port

3.1 The Master of a seagoing vessel must have prior permission of the Port Management to enter the port. Such permission may be subject to special restrictions or conditions if:

a. The vessel arrives before or after the given ETA;
b. The vessel is in danger of sinking;
c. The vessel or the cargo is on fire or if there is the possibility of a fire, or if after a fire, it is uncertain whether it is completely extinguished;
d. The vessel is a tanker;
e. On account of the vessel's size or construction its movements or that of any other vessels or the port operations are endangered, hindered or impeded;
f. On account of the condition of the cargo, the vessel is dangerous;
g. The vessel arrives under tow;
h. The vessel is over-loaded;
i. The vessel has any person or animal on board suffering from an infectious or contagious disease, or if the presence of such infection, contagious or epidemic disease is suspected on board;
j. The vessel is powered by nuclear energy, the arrival of such a vessel must be notified in accordance with the requirements as prescribed in section 1;
k. If the vessel carries deck cargo which extends beyond her side.

4. Registration for Berthing

4.1 Vessels will be registered for berthing in accordance with the time given for arrival in the revised ETA. The Port Management reserves the right to refuse registration or to cancel the registration of any vessel already registered if required by port operations or for any infringement of these regulations by the vessel.

"Sambuks, schooners, yachts or any craft not registered in the port without radio transmitting equipment, shall stay first in "Small Craft Anchorage" for the visit of Authorities before proceeding inside the port."

5. Priority for Berthing

5.1 Allocation of berths shall be under the control of the Port Management who, in case of excess demand on facilities, shall have the power to use their discretion to give priority to:

a. Vessels carrying passengers or pilgrims;
b. Vessels carrying livestock;
c. Vessels carrying essential or perishable foodstuffs;
d. Vessels carrying refrigerated cargo;
e. Any other vessel for special reasons.

6. Papers and Documents Required (see also special requirements for individual ports).

6.1 *Vessel's Papers and Documents*

6.1.1 On arrival at any port in the Kingdom of Saudi Arabia, the Master of each vessel shall present or make available for inspection the following papers and documents:

a. Log Books;
b. Registration Certificate;
c. Classification Certificate;
d. Load-line Certificate;
e. Building Safety Certificate;
f. Safety Equipment Certificate;
g. Radio and Wireless Certificate;
h. Cargo Gear Certificate;
i. Marine Health Declaration;
j. Vaccination List;
k. Rat–Free Certificate;
l. Clearance from the Last Port of Call;
m. Israel Boycott Declaration;
n. Ship's Stores List;
o. Grain Shipping Certificate if the vessel is carrying a grain shipment;
p. Mail Transport documents in accordance with the "International Postal Treaty" if any mail is carried aboard;
q. 5 Copies Crew List including name, nationality, date and place of birth, Passport number and rank;
r. 5 Copies of the Passenger List including name, nationality, date and place of birth, Passport number, port of embarkation, port of disembarkation;
s. 2 Copies of the List of Personal Effects of Crew and Passengers.

6.1.2 To obtain port clearance the Master of the vessel shall present or make available for inspection the following papers and documents to Port Management:

a. Log Book;
b. Registration Certificate;
c. Classification Certificate;
d. Load-line Certificate;
e. Building Safety Certificate;
f. Safety Equipment Certificate;
g. Radio and Wireless Certificate;
h. Port Stevedore Outturn Reports;
i. Receipt for Payment of Custom's Duties;
j. Shipping Note and Cargo Manifest for any cargo loaded.

6.2 *Cargo Papers and Documents*

6.2.1 The following papers and documents must be submitted to the Port Management not later than 48 hours prior to arrival (exemptions may be granted under certain circumstances at the discretion of the Port Management):

a. 5 copies of the Cargo Manifests for Discharge, including any additions or amendments in English; 10 Copies of the original manifests accurately translated into Arabic;
b. 2 copies of the Cargo Stowage Plan;
c. 2 copies of the Hatch List or Bay Plan;
d. 2 copies of the List of Dangerous/Hazardous Cargo for Discharge;
e. 2 copies of the List of Dangerous/Hazardous Cargo in Transit;
f. 2 copies of the List of Heavy and/or Awkward Cargo which requires special equipment;
g. 2 copies of the List of any Wine, Spirits and Narcotics or Cargo of such nature on the vessel and its location or, in the absence of which, a nil return;
h. A Declaration of type of reefer cargo;
i. An Application for discharge permit;

6.2.2 *Specifications*

a. All copies of the Manifests must be taken from the Master Manifest.
b. The consignee column in all cargo manifests shall include the full name and address of the consignee. If for legal/commercial reasons a bank or financial institution appears as consignee in the Cargo Manifest, the name of the final consignee, if known, has to be shown beside the name of the bank.
c. In case of transhipped cargo, the Cargo Manifest must show the name of the pre-carrying vessel, the port of transhipment and the bill of lading number for each consignment.
d. The List of Dangerous/Hazardous Cargo must show:
    (i) The technical name;
    (ii) The IMDG Code class and UN number;
    (iii) The Quantity of each consignment;
    (iv) The location on board and bay number, if stowed in containers, or lash barges or on trailers.

6.2.3 *Exceptions*

a. Vessels will be allowed to produce the aforementioned papers on arrival, provided the Port Management has received the following details by telex not less than 24 hours prior to arrival:
    (i) Name and flag of vessel;
    (ii) Port(s) of loading;
    (iii) Bill of lading numbers;
    (iv) Marks and numbers as per bills of lading;
    (v) List of dangerous/hazardous cargo;
    (vi) List of heavy packages above 3 tonnes and/or awkward cargo lifts;
    (vii) Total number of Bills of Lading. LASH operators shall relate bills of lading to specific barge numbers;
    (viii) Statement of wine and spirit shipments for other ports showing where stowed or in the absence of which a nil return.
b. A vessel carrying more than 200 Bills of Lading consignments for discharge in any one Saudi port is requested to submit cargo manifests not later than 72 hours prior to arrival.

7. Exempted Vessels

Exempted from the provision of Regulations 1, 2 and 4 are vessels entering in case of:

a. Distress;
b. Emergency refuge;
c. Force majeure;
d. Need of medical assistance.

8. Signals and Approach

8.1 Every vessel approaching the limits of a port must hoist the following flags:

a. Ship's signal letters (in case of VHF failure);
b. International code 'Q'-flag(s) in accordance with international health and safety regulations;
c. International code 'B'-flag if the vessel is carrying dangerous goods or hazardous materials;
d. The national flag of the country to which the vessel belongs.

9. The Flag of the Kingdom of Saudi Arabia

9.1 Every vessel entering a Saudi port must hoist the flag of the Kingdom of Saudi Arabia and keep it flying at all times throughout the stay in the port.

10. Pilotage

Pilotage is compulsory for all vessels entering or navigating within or leaving the pilot zones in the Kingdom of Saudi Arabia.

10.1 *Exempted Vessels*

The following vessels are exempted from the provisions of compulsory pilotage:

a. Saudi Warships;
b. Vessels of the government of the Kingdom of Saudi Arabia not designated for commercial use;
c. Vessels under 150 net registered tons;
d. Craft employed solely within port limits;
e. Yachts and pleasure craft;
f. Vessels operated by Port Management.

10.2 *Pilot Signals*

Every vessel subject to compulsory pilotage as above and which requires a Pilot shall:

a. From sunrise to sunset hoist the international code flag "G";
b. From sunset to sunrise give the letter "G"(— — ·) by a signal lamp;
c. In the event of poor visibility caused by rain, fog or dust, sound the signal "G" (— — ·).

Vessels equipped with VHF should call the Port Control Signal Station on frequencies published by the port as soon as the vessel enters within VHF range.

Vessels having a Pilot on board must hoist the international code flag "H".

11. Valid Cargo Gear Certificate

11.1 All vessels must have a valid Cargo Gear Certificate issued by one of the following societies approved by the Ports Authority:

1. American Bureau of Shipping.
2. Bureau Veritas.
3. Det Norske Veritas.
4. Germanischer Lloyd.
5. Lloyd's Register of Shipping.
6. Nippon Kaiji Kyokai.
7. Polski Rejestr Statkow.
8. International Cargo Gear Bureau Inc.
9. Jugoslavenski Registar Brodova
10. China Corporation Register of Shipping

or any other competent authority recognised by the Government of the country in which the certificates are issued.

11.2 No rope, tackle, block, chain, hook or any other gear which is worn, damaged or otherwise unsuitable shall be used for the purpose of hoisting, lowering, heaving or otherwise handling of slung cargo or other articles. All cargo handling gear is to be tested and inspect according to Schedule B to these Regulations.

11.3 Vessels of more than 15 years of age at the start of a voya as determined by the date of the first or sole Bill of Lading must ca out a cargo gear inspection of all cargo gear including deck machine and the supply of power thereto, prior to loading for a Saudi Arabi port, and an appropriate inspection certificate should be issued.

This Certificate is valid for a period of 6 months. No general statemer will be accepted. The Surveyor has to state that the inspection has be carried out on each part of the gear, deck machinery and its pow supply, that he has observed each derrick, crane, winch, etc., operation and each part has been found in good working order, and th all required current inspections as per Schedule B in this part have be fulfilled.

The Inspection Certificate must be provided by an approved Surv Bureau, Classification Society or an approved Government Departme *Exemptions:* 11.3 above does not apply to vessels less than 70 m. LO engaged in coastal trades.

ADVANCE NOTICE REQUIREMENTS: The information below has be telexed twice to respective Port Authority (with copy to Agent). T first telex to be sent (with estimated details) at the time vessel arriv at first port of loading, to be called 'preloading advice'. The second tel to be sent (with correct details) at the time vessel sails from the fir port of loading, to be called 'final advice'.

1. Call Sign.
2. Vessel's name.
3. Owners/Line.
4. Nationality.
5. Agent.
6. LOA (m.).
7. Max. Draft (m.).
8. Hatches/holds.
9. G.R.T.
10. N.R.T.
11. D.W.T.
12. Vessel's previous name.
13. Vessel type.
14. Cargo type.
15. Total cargo weight tonnes.
16. Total cargo freight tonnes.
17. No. of containers/units.
18. No. of livestock.
19. ETA.
20. Actual arrival draft.
21. Hatchwise tonnage.
22. Year built.
23. No. of LCL containers and quantity showing each bill of ladi number in that container.
24. Fumigation and Cleanliness Certificates in case of foodst cargoes.
25. Each loading port name where cargo loaded for Saudi port.
26. Economic Speed.
27. Vessel position 48 hours before arrival.
28. Last 3 ports of call.
29. Next port after Saudi port.
30. Vessel's Lloyd's Registered Number.
31. Port of Registry.
32. Hazardous cargo for Saudi port.
33. Hazardous cargo in transit for other ports.
34. P and I Club name and local correspondents.
35. Confirm that 5, 2, 1 day ETA notices with Call Sign, draft, carg for Saudi port, hatchwise distribution, Master's name, cre number, nationality, previous/next port, vessel's positi 48 hours' prior arrival and radar data will be supplied to port the Principals/Master.

If the undermentioned information has not previously been given it to be included in the advices:

(a) Type of radar.
(b) Frequency.
(c) Scan rate.
(d) Pulse width.
(e) Pulse peak power.
(f) Pulse repetition frequency.
(g) Beam width.

If the vessel is equipped with several radars the characteristics each radar must be given.

Upon receipt of such information, the relevant Port Authority will g clearance date for the vessel to enter the port.

The following documents should arrive with the Agent in Saudi Arab port latest 7 days prior to vessel's arrival date and subject to Arab translation be submitted to Authorities latest 72 hours prior to vesse arrival:

18 copies Cargo Manifest.
18 copies Freight Manifest.
18 copies Dangerous Cargo Manifest.
4 copies Hatch List.
4 copies Stowage Plan.
4 copies each Bill of Lading (3 Non-Negotiable)
4 copies Heavy Lift Cargo separately.

POLLUTION: Fines and penalties for not complying with the International Convention for the Prevention of Pollution of the Sea by Oil, 1975 are:

(a) Discharging oil or oily-mixture within 100 miles from the Kingdom's Coasts – one year imprisonment or S.R.20,000 (Saudi Riyals) or both.
(b) Saudi Flag Ships discharging oil or oily-mixture in any prohibited zones or areas mentioned in the conventions, the same fine and penalty as in (a).
(c) Not keeping the oil record book in the ship – 6 months imprisonment or S.R.2,000 (Saudi Riyals), or both.
(d) Not keeping the oil record book up to date – fine up to S.R.5,000 (Saudi Riyals).

SHIP'S FUEL TANKS: *Circular No. SEAPA – 15335/85.*

To: All Shipping Agents.
cc: All Ports.
From: The President and Chairman of the Board, SEAPA.
Date: 14.7.1405/04.04.1985
Subject: Flammability Check of Ship's Fuel Tanks.

With immediate effect you are advised to inform all concerned parties that the Port Management of all SEAPA ports will require additional flammability checks on fuel tanks of O/B/O carriers and tankers excluding tankers engaged solely in the transport of chemicals.

The purpose of this extra precaution is to deter the use of cargo oil as fuel supplement, and will be required on a random basis as advised by the Port Operations Department. The results are to be incorporated (when applicable) on the Gas Free Certificate.

When such random test is required by the Port Management, it will be necessary for the ship's Agent to arrange for the services of a surveyor.

For your information, if the atmosphere in any fuel oil bunker tank is discovered at more than 15 per cent (LEL), then the ship's Master will be required to engage a surveyor to provide an exact flashpoint analysis of the tank contents.

Furthermore, should the flashpoint be less than the prescribed limits stipulated in Regulation 33 of SOLAS, the Port Management reserves the right to remove the ship from the berth.

Regards:
Fayez I. Badr,
President and Chairman of the Board,
Ports Authority,
Kingdom of Saudi Arabia.

NAVIGATION INFORMATION: The Agents have the responsibility to deliver to the Master the updated copies of the Radio Navigational Warnings and Notices to Mariners issued by the Ports Authority, covering Saudi Waters.

AUTHORITY: The Ports Authority, Kingdom of Saudi Arabia, P.O.Box 5162, Riyadh 11188, Kingdom of Saudi Arabia. *Tel:* 01-405 0005. *Telex:* 401158, 401783, 405055 Ports SJ. *Contact:* Dr. Fayez I. Badr, Minister of State, President of the Ports Authority.

AL KHOBAR: 26.17 N. 50.13 E.

ALSO SEE "GENERAL" BEFORE FIRST PORT.

PORT LIMITS:

Harbour Boundaries:

All shore-based port property enclosed by a fence following the shore line extending seawards to a line running between the following points:

Latitude: 26° 16′ 12″ N., Longitude: 50° 12′ 54″ E.
Latitude: 26° 16′ 12″ N., Longitude: 50° 13′ 18″ E.
Latitude: 26° 12′ 00″ N., Longitude: 50° 13′ 36″ E.
Latitude: 26° 12′ 00″ N., Longitude: 50° 19′ 20″ E.
Latitude: 26° 17′ 12″ N., Longitude: 50° 19′ 20″ E.
Latitude: 26° 17′ 12″ N., Longitude: 50° 13′ 06″ E.

DOCUMENTS: Crew List required by Port Authority 48 hours prior to vessel's arrival.

PILOTAGE/ANCHORAGE/RADIO: There are no official anchorages, Pilots or radio facilities at Al Khobar port, which is only used by small craft.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
Total	500	3.4	General cargo and passenger, including a 10 m. wide quay ramp.

Total shed area (3 sheds): 8,200 sq.m.
Total open storage area: 6,900 sq.m.
Vehicle parking area: 6,900 sq.m. (inside security).
11,400 sq.m. (outside security).
Passenger terminal: 750 sq.m.

EQUIPMENT:

Forklifts: Forklifts up to 10 tons available.
Mobile cranes: 3 up to 20 tons, 1 between 20 and 40 tons.

AUTHORITY: Al Khobar Port Management, *Contact:* Rabah Al Hazeemi, Port Director.

AGENT: See "Dammam".

AL QADIMAH: 22.21 N. 39.05 E.

ALSO SEE "GENERAL" BEFORE FIRST PORT.

PILOTAGE: The Pilot boarding place is West of the inner coastal reef in position Lat. 22° 20.5′ N., Long. 39° 01.6′ E. Pilotage undertaken during daylight only.

ANCHORAGE: To the North of the entrance channel in depth of 15 m. – 20 m.

VHF: Before entering the approach channel permission should be obtained from Qadimah Port Control, calling Channel 16 and working on Channels 72 and 74.

TUGS: 2 tugs available.

BERTHING: The port is used for unloading military cargoes. Vessels berth alongside 2 pontoons (150 m.×25 m. each) with depths of 13 m. – 14 m. alongside. Ro/Ro facilities available.

CRANES: Floating crane with lifting capacity 150 tonnes and mobile cranes available.

FRESH WATER/FUEL/PROVISIONS: Not available. Vessels should arrive with sufficient for their needs, making allowances for delays which may be experienced.

AUTHORITY: Ministry of Defence and Aviation.

DAMMAM: 26.30 N. 50.12 E. (See Plan)

ALSO SEE "GENERAL" BEFORE FIRST PORT.

LOCATION: Situated approximately mid way along the Eastern coast. It is the principal port of Saudi Arabia in the Arabian Gulf.

PORT LIMITS: The Seaward Limits of the Port of Dammam are bounded by a line joining the following positions:

Lat.	Long.	Lat.	Long.
26° 28′ 34″ N.,	50° 10′ 48″ E.	26° 37′ 45″ N.,	50° 14′ 42″ E.
26° 29′ 06″ N.,	50° 09′ 00″ E.	26° 37′ 45″ N.,	50° 16′ 00″ E.
26° 34′ 00″ N.,	50° 09′ 00″ E.	26° 26′ 30″ N.,	50° 16′ 00″ E.
26° 34′ 00″ N.,	50° 10′ 00″ E.	26° 26′ 30″ N.,	50° 11′ 48″ E.
26° 34′ 20″ N.,	50° 10′ 44″ E.		

and thence to the shoreline. A circular 95 m. high Marine Control Tower comprising 3 storeys at a height of 74.4 m. above ground level is located at Lat. 26° 30′ 31″ N., Long. 26° 24′ 48″ E.

Within the Port Limits the approach channel to the port is marked by buoys in accordance with IALA "System A". Depth of the approach is 15 m.

FLAG: In addition to the quarantine signals (see "Health") which are to be shown until Pratique is granted, the Saudi Arabian Flag must be flown from vessel's foremast while in port of Dammam. Saudi flags can be hired or purchased locally.

DOCUMENTS: In order to comply with Port, Customs and Agent's requirements, the following documents should be submitted to the Port Management via the Agent, at least 48 hours prior to arrival of vessel at Dammam port:

5 copies of the Cargo Manifest for discharge, including any additions or amendments in English; 10 copies of the original Manifest accurately translated into Arabic.
2 copies of Hatch List.
2 copies of Stowage Plan.
2 copies of List of Heavy Lifts.
2 copies of List of Long Length Cargo.
7 copies of List of Dangerous Cargo on board, if any.
Arms and Ammunition List, or "Nil" return.
Crew List showing Nationality.
Fumigation Certificate for Vessel and Cargo (if required).

The particulars of the Certificates required by the SOLAS regulations are entered on the Port's Form on the arrival of the vessel at the anchorage and the certificates are sighted after berthing.

Also see "Health", and "General" before first port.

PILOTAGE: The pilotage area commences at Buoy "D27" (i.e. the channel entrance). Pilotage is compulsory and the normal Pilot Boarding Area is between Buoys "D39" and "D40". The only vessels allowed to proceed South of this position without a Pilot are exempted vessels, and vessels which would, under normal circumstances, require the services of a Pilot but have been instructed by "Dammam Port Control" to anchor in the Holding Anchorage.

Vessels bound for Dammam must contact "Dammam Port Control" 1 hour before arrival at Buoy "D27", giving details of ship (see "Approaching"), and must not enter the channel until permission has been given by "Dammam Port Control".

"Dammam Port Control" operates on the following VHF Channels: 16, 12, 13, 19 and 22.

Vessels Exempted from Compulsory Pilotage: These include:

(i) Vessels of the Royal Saudi Navy.
(ii) Vessels of the Saudi Government which are not assigned for commercial use.
(iii) Vessels whose nett tonnage is less than 150 tonnes.
(iv) Port craft.
(v) Pleasure yachts.

Also see "Radio".

Vessels less than 150 tonnes, port craft and pleasure yachts shall wait at Small Craft Anchorage for authorisation to proceed to the port.

APPROACHING: *Directions and Regulations for Vessels Entering or Leaving Dammam Port:*

Dry cargo vessels drawing 10.4 m. (34 ft.) or less should approach and leave by the East Channel.

Vessels in excess of 10.4 m. draft and vessels from Northward should use the Main Channel.

Prior to vessels entering the Ras Tanura Channel they must contact "Ras Tanura Radar Control" on VHF Channel 10, identify themselves and state where bound. Normal listening watch should then be maintained on Channel 16.

Vessels bound for Dammam Port must call "Dammam Port Control" 1 hour before the vessel's arrival at Buoy "D27" and give the following information:

(i) Vessel's name.
(ii) Length overall.
(iii) Maximum draft.
(iv) Cargo tonnage and main commodity.
(v) Hazardous cargo, if any.
(vi) Whether the vessel has a list.
(vii) Whether the vessel has any mechanical defects.

Vessels must not enter or navigate within the Port Limits without the permission of "Dammam Port Control". Inward vessels shall report the time of passing Buoy "D27" and shall keep a listening watch on Channel 16.

The speed of vessels within the buoyed channel is limited to 8 knots and overtaking other vessels within the channel is prohibited.

Anchoring within the buoyed channel is prohibited.

Upon arrival, if a vessel is instructed not to anchor in the Holding Anchorage, the Pilot will board abeam of Buoy "D39".

ANCHORAGES: The following anchorages are allocated as necessary for vessels:

(i) *Holding Anchorage:* (Depth 15m.) bounded by a line joining the following positions:
Lat. 26° 31′ 30″ N., Long. 50° 11′ 42″ E.
Lat. 26° 31′ 52″ N., Long. 50° 10′ 00″ E.
Lat. 26° 33′ 24″ N., Long. 50° 10′ 00″ E.
Lat. 26° 33′ 54″ N., Long. 50° 11′ 53″ E.
Lat. 26° 33′ 12″ N., Long. 50° 10′ 43″ E.
Lat. 26° 32′ 10″ N., Long. 50° 10′ 53″ E.
This anchorage is marked by Buoys.

(ii) *Working Anchorage:* (Depth 10 m.) bounded by a line joining the following positions:
Lat. 26° 32′ 11″ N., Long. 50° 11′ 33″ E.
Lat. 26° 32′ 27″ N., Long. 50° 12′ 03″ E.
Lat. 26° 31′ 27″ N., Long. 50° 12′ 58″ E.
Lat. 26° 31′ 00″ N., Long. 50° 12′ 43″ E.

(iii) *Explosive Anchorage:* (Depth 8 m.) bounded by a line joining the following positions:
Lat. 26° 30′ 53″ N., Long. 50° 12′ 55″ E.
Lat. 26° 31′ 23″ N., Long. 50° 13′ 05″ E.
Lat. 26° 31′ 18″ N., Long. 50° 13′ 33″ E.
Lat. 26° 30′ 53″ N., Long. 50° 13′ 33″ E.

(iv) *Small Craft Anchorage:* (Depth 6.5 m.) bounded by a line joining the following positions:
Lat. 26° 30′ 00″ N., Long. 50° 13′ 33″ E.
Lat. 26° 30′ 45″ N., Long. 50° 12′ 50″ E.
Lat. 26° 30′ 45″ N., Long. 50° 14′ 00″ E.
Lat. 26° 30′ 00″ N., Long. 50° 14′ 00″ E.

Anchoring in the channel is strictly forbidden.

WEATHER: The peninsula of Saudi Arabia is almost of an equatorial climate. Summertime rising to over 45°C. Rain is generally scarce. During major part of year, but especially during Summer, the relative humidity is high. From July to September it frequently exceeds 85%.

Winds in this area are not predictable for more than a few hours. They vary in strength and direction, although prevailing winds are from N.W.

TIDE: The Diurnal tide range at Dammam Port is approximately 2.00 m. – 2.45 m. at Springs, and 0.80 m. at Neaps. The flood tide sets to the S.E. across the harbour entrance and the ebb tide sets to the N.W. The rate of flow is very much dependent on the wind force and direction but seldom exceeds 2 knots.

MAX. SIZE: See "Berthing".

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dammam port. These signals shall be displayed continuously until Pratique granted. Signals are as follows: Sunrise to sunset – Quarantine Flag; Sunset to sunrise – Signal Lights – red over white.

The Quarantine Officer will board the vessel either at anchorage or at pier.

Documents required for immediate inspection are the following:
International Maritime Health Certificate (from the last port).
Valid Derat or Derat Exemption Certificate.
Crew List (3 copies).
Passenger List, if any.
Valid Cholera Certificates (of a date not exceeding 6 months) for all crew members and passengers.
Valid Yellow Fever Certificates for all crew members and passengers.
Certificates of Inoculation against any communicable diseases prevailing at the ports of departure.
Ship's Log Books.

RADIO: (Also see "Pilotage" and "Vessel Appointments").

Dammam Port has a modern radio communications system as follows:

(i) *VHF* – (Call sign "Dammam Port Control"). A continuous listening watch on Channel 16.
Working Channels are: Channels 12, 13, 19 and 22.
(ii) *Radio Telephone* – Facilities are available.

Note: International VHF Channels 01, 68, 71 and 73 are used for port and pilotage operations. Vessels must NOT use these Channels when in the vicinity of Dammam Port.

Telex: Dammam Port is connected to the International Telex network. The telex address is 801138 or 801139 Dapm SJ.

Information is available from "Dammam Port Control" covering local weather conditions and any local hazards to navigation that may be appropriate from time to time. For the future, it is planned to give assistance to shipping, navigating locally, by the provision of a Marine Control Tower with radar coverage.

Coast radio station at Dammam officially known as "Dammam Radio" with call sign "HZG". Telex: 602600, 602603. Tel: 8276080, 8274449. It is already in service employing radiotelegraphy, radiotelephony and radiotelex to provide radio communication link between vessels at sea and land based concerns.

VESSEL APPOINTMENTS: (See also "Radio").

It is a pre-requisite for all vessels trading to any Saudi Arabian p to give the appropropriate Port Management the undermention information by telex on arrival at the first port of loading for Saudi Arab

In the case of Dammam Port, telexes should be sent to: The P Director General, Dammam Port Management. Telex Nos. 601138 601139 Dapm SJ.

(a) The information must be updated on leaving the final port of loadi bound for Saudi Arabia:

1. Radio Code (Call sign).
2. Vessel's name.
3. Owner/Line.
4. Nationality.
5. Agent.
6. Length overall (metres).
7. Maximum draft (metres).
8. Number of hatches.
9. Gross registered tonnage.
10. Nett registered tonnage.
11. Deadweight tonnage.
12. Previous name (if any).
13. Type of vessel.
14. Type of cargo.
15. Total cargo weight tonnes.
16. Total cargo freight tonnes.
17. Number of containers/units (where applicable).
18. Number of livestock (where applicable).
19. Estimated time of arrival.
20. Actual arrival draft.
21. Tonnage to hatch.
22. Year built.
23. LCL containers and/or ships convenience containers.
24. Fumigation Certificates (vessel and cargo).
25. Ports of loading for Dammam discharge.
26. Economic speed of vessel
27. Vessel's position 48 hours before arrival.
28. Previous port prior to Dammam call.
29. Next port of call on departure from Dammam.
30. Vessel's Lloyd's Register Number.
31. Port of Registry.
32. Arms and ammunition for vessel's self-defence.
33. Declaration of all transit cargo calling at Dammam port.
34. Last 3 ports visited by vessel.
35. Ramp position (if any).
36. Has the vessel specialised container handling gear.
    (a) Details of dangerous cargo for Dammam.
    (b) Details of dangerous cargo in transit.
    (c) P&I Club/local correspondents.
37. Does cargo include hazardous/toxic waste.
    (a) For Dammam.
    (b) Transit.

Radar Details

1. Name of the vessel.
2. Flag.
3. Vessel's agent (name and address, telephone, telex).
4. Economic speed of vessel.
5. E.T.A.
6. Type of radar.
7. Frequency.
8. Scan rate.
9. Pulse width.
10. Pulse peak power.
11. Pulse repetition frequency.
12. Beam width.

Radar details are required to be passed on to Dammam P Management 48 hours prior vessel's arrival Dammam.

Vessels equipped with more than one radar should give t information in Items 6 to 12 for each radar.

The name of vessel *and radio code* should be given in eve subsequent telex for reference.

The absence of any of the above information may delay the grant of an entry date to the subject vessel.

(b) The above information must be backed up by further confirmat of ETA at 5 days, 2 days and 1 day prior to arrival at each port of c in Saudi Arabia.

Note: Penalties may be imposed by the Saudi Ports Authority if t above rules are not strictly adhered to.

Berthing Arrangements: Providing the requirements above have be complied with, vessels will be allocated to berths, dependent upon ty of cargo carried, prior to arrival. Berthing will then take place immediat upon arrival, weather permitting.

VHF: See "Radio".

TUGS: King Abdul Aziz Port has the necessary tugs, ranging fro 460 h.p. to 4,600 h.p., mooring launches, pilot boats, fire fighting vesse survey launch and specialised anti-pollution floating means, covering the needs of marine operators and safety requirements.

Tugs operate within the Harbour Limits only for the purpose assisting vessels in berthing and unberthing. Tugs join vessels ins the Inner Gate Beacons and normally require the use of ship's lin Where the latter are considered inadequate, the tug's lines are used the vessel's expense.

BERTHING: (Also see "Vessel Appointments").

The following categories of berth with a water depth from 9.0 m 14.0 m. are available, Ro-Ro, Container Terminals, Multi-Purpo General Cargo, Grain, Explosives/Dangerous Cargo, Loading Fertilis The Bulk Cement Berth is leased to a private company.

In the main port there are 39 working berths for deep-sea vess They are located on 4 quays as follows:

East Port: *West Quay:* (King Abdul Aziz Pier, total length 2,500 m. approximately).

Berth No.	*Nominal Length (m.)*	*Depth (m.)*	*Berth Facilities*	*Type of Operation*
1	240	14	Grain Silos & Flour Mill	Grain/Dir. Dly GC
2	240	14	Zone-Barn	General Cargo
3	240	14	Zone-Barn	General Cargo
4	180	12	Shed-Zone	General Cargo
5	180	12	Shed-Zone	General Cargo
6	150	9	Shed-Zone	General Cargo
7	150	9	Shed-Zone	General Cargo
8	150	9	Shed-Zone	General Cargo
9	179	9	Shed-Zone	General Cargo
10	215	11	Zone	Load Fertiliser
11	180	11	Zone	General Cargo
12	180	12	Shed-Zone	General Cargo
13	180	12	Shed-Zone	General Cargo

Notes: 1. Where there is a shed on the berth the distance from the quay edge to the shed is 30 m.

2. Berths No. 1 – 13 and 23 – 25 are rail connected.

3. There are 28 portal cranes on Berths 1 to 13, with capacities from 3 to 15 tonnes.

East Quay: (Total length 1,750 m. approximately).

Berth No.	*Nominal Length (m.)*	*Depth (m.)*	*Berth Facilities*	*Type of Operation*
14	180	12	Shed/Zone-Barn Ro-Ro Ramp	General Cargo/ Ro-Ro
15	180	12	Shed-Zone-Barn	General Cargo
16	180	12	Shed-Zone-Barn	General Cargo
17	180	12	Zone	General Cargo
18	180	12	Shed-Zone-Barn	General Cargo
19	180	12	Zone	General Cargo
20	180	12	Shed-Zone-Barn	General Cargo
21	240	14	Zone	Multi-purpose
22	240	14	Zone/Ro-Ro Ramp	Multi-purpose

Notes: 1. Where there is a shed on the berth, the distance from the quay edge to the shed is 40 m.

2. Currently 28 portal cranes are in use on Berths No. 14 – 20 inclusive. Their capacities vary from 6 to 15 tonnes.

3. Berths No. 21 and 22 make up Dammam Multi-Purpose Terminal. The terminal is equipped with 2×30 tonne gantries.

West Port: *East Quay:* (Total length 2,800 m. approximately).

Berth No.	*Nominal Length (m.)*	*Depth (m.)*	*Berth Facilities*	*Type of Operation*
23	240	14	Zone Ro-Ro Ramp	Containers Ro-Ro
24	240	14	Zone	Containers
25	240	14	Zone	Containers
26	240	14	Zone	Containers
27	240	14	Zone	General Cargo
28	240	14	Zone	General Cargo
29	240	14	Zone	General Cargo
30	180	12	Shed-Zone-Barn	General Cargo
31	180	12	Shed-Zone-Barn	General Cargo
32	180	12	Zone	General Cargo
33	180	12	Shed-Zone-Barn	General Cargo
34	180	12	Shed-Zone-Barn	General Cargo
35	205	12	Cold Store Terminal	Reefer Cargo

Notes: 1. Where there is a shed on the berth, the distance from the quay edge to the shed is 40 m.

2. Berths No. 23 – 26 make up Dammam Container Terminal (DCT).

West Quay: (Total length 690 m. approximately).

Berth No.	*Nominal Length (m.)*	*Depth (m.)*	*Berth Facilities*	*Type of Operation*
36	180	12		
37	180	12		
38	180	12	Silos/Bagging Plants	Bulk Cement
39	150	14	Zone	Explosives/ Dangerous Cargo

Notes: 1. The bulk cement berth is leased to an independent company.

2. All berths are rail connected.

3. The quay, North of Berth No. 39, can be extended by 3,200 m. when additional berths are required in the future.

Updated information on available depths within the Port Limits can be obtained from the Harbour Master's Office.

In addition to the berths in the main port, a Small Craft Harbour is situated to the South of the East Port where small vessels, dhows, fishing vessels and a considerable amount of barge traffic (mainly LASH) are handled. The depth of water varies from 6 m. to 4.5 m. The purpose-built facilities provide in excess of 1,600 m. of quay, large back-up areas and covered storage.

SPECIALISED CARGO HANDLING FACILITIES: *Grain Terminal:* This terminal (Max. draft 13.5 m.) provides purpose built facilities for discharging all types of grain. These can be distributed to silo storage, or delivered direct to road, rail or to the adjacent flour mills. Discharge rate 480 t.p.h. with 2 pneumatic unloaders.

Ro-Ro Berths: All Ro-Ro Berths have ramps fitted with bow or stern access.

Dammam Multi-purpose Terminal: This terminal provides facilities for handling multi-purpose vessels (i.e. Ro-Ro, containers and general cargo). It is equipped with container gantries.

Damman Container Terminal (DCT): This comprises Berths No. 23, 24, 25, and 26.

The terminal has container gantries and its own rail terminal, with 2 rail-mounted, wide-span gantries and container storage area.

Extensive covered facilities are available for Customs inspection and clearance purposes. A purpose-built container freight station (CFS) for handling LCL shipments is also available.

Bulk Cement: Dammam Port has an allocated berth for the handling of cement in bulk (Berth No. 35).

The berth is leased to an independent company, providing facilities afloat and on the quay. The terminal is rail connected.

Fertiliser Loading Berth: A berth is allocated for loading urea which is manufactured locally by the Saudi Arabian Fertiliser Co. (SAFCO). The bagged urea is transported by rail from the factory to the quayside where it is loaded directly into the vessel alongside by its own cargo handling gear.

Dangerous Cargo Terminal: This 190 m. long berth has a depth alongside of 14 m. It consists of an open quay for direct delivery only and is road and rail connected.

Refrigerated and Frozen Cargo Terminal: 2 ship unloaders and conveyor system for rapid discharge of cargo into a 6,000 tonne capacity Cold Store.

CRANES: See "Cargo Handling Equipment".

STORAGE AREAS: Adequate covered and open storage space is available in the form of warehouses, transit sheds, dangerous goods warehouses plus cells, container terminals, container freight station, vehicle park and general cargo storage.

CARGO HANDLING DISCHARGE RATES: A strong and positive set of Port Rules is in operation. This guarantees high discharge rates and high standards of efficiency. Co-operation in observance of these rules by Shipowners and Agents makes a substantial contribution to the port's effectiveness. The most important of these rules are summarised below:

1. Every vessel calling at Dammam must make an appointment.
2. Every vessel, or Agent, must submit appropriate documentation prior to a vessel's arrival.
3. Any vessel over 15 years old shall obtain and submit a certificate issued by a competent and approved Authority that her cargo gear is in good working order before being allowed to discharge.
4. All cargo that is suitable shall be presented in unit loads on pallets or pre-slung.
5. No cargo shall be received into port premises in a damaged condition.
6. Every vessel shall be ready to discharge upon berthing. She shall continue discharging uninterrupted until all Dammam cargo is completed, whereupon she shall leave the berth without delay.
7. Overstowing Dammam cargo with cargo destined for another port is prohibited.
8. Transhipping cargo in Dammam for other ports is not allowed.
9. Cargo which is not removed from the Port by Consignees within 15 days is liable to be auctioned and sold.

The port's efficiency and handling rates are high, as indicated in the table below:

Indicative Handling Rates of Main Commodities during the Year 1989:

Cargo	*Weight Tonnes per Gang Hour*	
	Gross	Nett
Bulk Grain	4,000/6,000	4,000/6,000
	(per 24 hours)	
Timber	31.7	25.9
Bagged Cargo	23.8	17.1
Steel Pipes	52.3	39.5
General Cargo	29.3	21.2

STEVEDORES: Stevedoring operations on all berths except grain silo, bulk cement and the container terminal (DCT) are performed by 2 contracted stevedoring companies.

CARGO HANDLING EQUIPMENT: Dammam Port has an extensive and modern fleet of equipment including:

Mobile Cranes up to 100 tonnes.

Gantry Cranes up to 30 tons with an outreach from the quay wall of 32 m.

Gantry Cranes up to 40 tons and a Floating Crane of 200 tons capacity.

Straddle Carriers, terminal tractors, towing tractors, trailers.

MEDICAL: Masters may obtain medical attention for ship's personnel from Port Doctor who may, in case of serious illness or injury recommend treatment to a local hospital. Normally the Port Doctor will treat minor illness on board ship.

Urgent hospitalisation can also be arranged via the ship's Agent. Masters of vessels at sea may use services of Dammam Port Radio to obtain medical advice at any time.

DENSITY: The average density (salinity) of the sea-water in the Port of Dammam is 1030.

WATER: Water is available. Vessels requiring a supply of water should make arrangements through their Agent.

FUEL: There are several private Bunkering companies who operate in Dammam Port. By arrangement through the ship's Agent, bunkers can be supplied by barge at anchorage or alongside vessel at her berth. Various grades of fuel are available. Strict rules apply and severe penalties will be imposed should any oil spillages occur during bunkering operations or from any other cause. Anti-oil pollution equipment and dispersants are available.

Also see "Ras Tanura".

CONSULS: The U.S. Consulate General resides at Dhahran (approximately 20 km. inland from Dammam). A British Consular Official resides locally.

REPAIRS: King Fahd Ship Repair Yard (KFSRY), located within the port contains 2 floating dry docks, with capacities of 22,000 tonnes and 10,000 tonnes, together with all necessary facilities to provide a complete range of ship repairs and maintenance services.

Deep sea divers, operating from modern and well equipped diving boats, are available at Dammam.

Repair and maintenance services for electronic equipment are available at Dammam Port.

DRY DOCK: Main particulars:
Lifting capacity 22,000 tonnes.
Length overall 215 m.
Outside width 43 m.
Clear inside width 35 m.
Moulded depth to upper deck 16.30 m.
Immersion depth over keel blocks 7.55 m.

SURVEYORS: Available.

CUSTOMS: All materials to be either exported from or imported into Saudi Arabia are subject to examination by Customs Authorities. The importation of the following articles is completely banned:
(a) Alcoholic beverages, including beer and wines.
(b) Narcotics.
(c) Pornographic material.

Trafficking of the above items between ship and shore is strictly prohibited, regardless of whether vessels are alongside at berths or at anchor. Consumption of alcoholic beverages is prohibited during a ship's stay in port. All alcoholic beverages must be placed in bond (Master's, officers, crews and bar).

The following articles can be imported after obtaining permission from the authorities concerned:
(1) Explosives.
(2) Firearms.
(3) Antiques.
(4) Religious material not pertaining to the Muslim faith.

REPATRIATION: Possible, but not encouraged.

AIRPORT: Very good airline facilities are available from Dhahran Airport. Daily departures take place for many parts of the world.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: Dammam Port offers continuous cargo handling operations through the year and sufficient manpower is always available.

All ships must be dressed if they are in port, or entering port, on the following official holidays or events:
1. Eid Al Fitr.
2. Eid Al Adha.
3. Saudi Arabian National Day.
4. Royal visits to the port.

Port staff will advise vessels in port prior to any forthcoming event, and vessels approaching port will be advised by the Port Radio Control.

EMERGENCY CO-ORDINATION: In the event of marine emergencies in the area, the Dammam Port Harbcur Master should be contacted.

TELEPHONE: The port's telephone number is 83-32500 and is open for 24 hours. Expansion is planned which will include ship to shore communications at all berths.

STORING: Vessels may take stores on board and arrangements should be made through the ship's Agent.

SHORE LEAVE: Ship's personnel and passengers are not normally permitted ashore unless special permission is granted by Immigration and Police Authorities. The necessary arrangements can be made by ship's Agent upon receiving the Master's request and Seaman's Books. While in port, the vessel's personnel are under jurisdiction of the Law of Saudi Arabia.

AUTHORITY: Dammam Port Management, P.O.Box 28062, Dammam-31437, Saudi Arabia. *Tel:* (03) 833-2500 (24 hours). *Telex:* 800138, 801139 Dapm SJ. *FAX:* 857923. *Contact:* H.E. Mohammed Ali Bin Nasser Al-Ghaithy, Port Director-General. Captain Hassan Abounayyan, Assistant Port Director General.

AGENT: Gulf Agency Company Saudi Arabia, P.O.Box 86, Airport Post Office, Dhahran 31932, Saudi Arabia. Cables: "Confidence Dammam". Ship-shore traffic via Dammam Radio/HZG. Telex: 801069 ("GAC SJ") Tel: 8328762-4, 8323425-7; After office hours 8324220. Fax: 8323035.

GIZAN (Jizan): 16.54 N. 42.32 E. (See Plan)

ALSO SEE "GENERAL" BEFORE FIRST PORT.

LOCATION: 390 nautical miles South of Jeddah and 360 nautical miles North of Aden.

PORT LIMITS:
Harbour Boundaries:

All shore-based port property enclosed by a fence following the shore line extending seawards to line running between the following points:

	Latitude	Longitude
Qarn Ash Shurra	16° 50′ 36″ N.	42° 33′ 00″ E.
Um al Kuthib	16° 48′ 30″ N.	42° 27′ 12″ E.
Jazirat Hibar	16° 54′ 12″ N.	42° 22′ 42″ E.
Ferafer Island	17° 00′ 00″ N.	42° 23′ 36″ E.
Qarn al Wada	17° 02′ 24″ N.	42° 28′ 18″ E.

DOCUMENTS: See "Health" and "General before first Port."

PILOTAGE: Compulsory, no offshore pilot station. Ships for Gizan should contact Gizan Port Control on VHF Channel 16, 2 hours before arrival.

Pilot Boarding Position:
Lat. 16° 53′ 48″ N., Long. 42° 27′ 00″ E.

APPROACHES: The Northern Approach Channel, is 82 nautical miles long, marked by 18 light buoys and 3 beacons and provides a minimum depth of 24 m. between Gizan North and Buoys N.13/S.18.

Positioned navigational marks are in accordance with "IALA System A" and fitted with radar reflectors.

The Approach Buoy "Gizan North" Lat. 16° 56′ 45″ N., Long. 41° 17′ 28″ E. is fitted with Racon code "B". Beacon "No. 2" "Middle Beacon" Lat. 17° 16′ 47″ N., Long. 41° 33′ 25″ E. is fitted with Racon code "N". "North Ghurab Island" Beacon Lat. 17° 06′ 20″ N., Long. 42° 03′ 58″ E. is fitted with Racon Code "B".

"Sail Makawa Island" Beacon is equipped with white light Fl. 4 secs. and white daymark.

A range light, true bearing 096.5°, leads into the port basin through an inner fairway dredged to 13.5 m. depth. For further details refer to B.A. Chart No. 15 and Notices to Mariners.

Southern approach closed.

ANCHORAGES: *Anchorages within the harbour boundaries:*

Anchorage A. (Cargo vessels).

Lat. 16° 56′ 00″ N.,	Long. 42° 27′ 00″ E.
Lat. 16° 54′ 30″ N.,	Long. 42° 27′ 00″ E.
Lat. 16° 54′ 30″ N.,	Long. 42° 25′ 48″ E.
Lat. 16° 56′ 00″ N.,	Long. 42° 25′ 48″ E.

Anchorage B. (Petromin tankers).

Lat. 16° 53′ 00″ N.,	Long. 42° 27′ 42″ E.
Lat. 16° 51′ 30″ N.,	Long. 42° 27′ 42″ E.
Lat. 16° 51′ 00″ N.,	Long. 42° 26′ 12″ E.
Lat. 16° 53′ 00″ N.,	Long. 42° 26′ 12″ E.

There are no anchorages outside the harbour boundaries.

ARRIVAL ADVICE: Send ETAs to Gizan Port Management, Te 911018 Ports Sj and 911030 Ports Sj.

MAX. SIZE: Max. Length 250 m., Max. Draft 11.75 m. at high t 11.50 m. at any time. Max. Beam no limit.

HEALTH: All vessels should abide by Health Regulations and pres necessary documents to the Authorities in accordance with Internatio Laws. Quarantine signals must be displayed by all vessels approach Gizan Port. These signals must be displayed continuously until Pratio is granted. These signals are:
Sunrise to sunset: Quarantine flag – Yellow.
Sunset to sunrise: Signal lights – Red over white.

RADIO: Masters should give their Agents an ETA not later than 48 ho before arrival. There is no radio station in Gizan Port.

VHF: A base station operates in Gizan Port using the call sign "Gi Port Control". All calling should be on Channel 16. A 24 hours watc maintained on Channel 16. Arriving vessels should contact "Gizan P Control" entering the Northern Approach Channel. Working chann are 14, 12 and 9. Tugs are working on Channel 12 during operatio

RADAR: Harbour Radar System and Port Control Tower are un construction.

TUGS: Tugs are available, ranging from 800 h.p. to 2,500 h.p. T usually join the vessel 3 miles West of breakwaters.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
1	205	12	Bulk Cement Terminal
2	176.5	12	
3	176.5	12	
4	171	10	
5	171	10	
6	184	10	
7	122	10	General
8	175	10	General and Ro-Ro
9	175	10	Cement
10	143	10	Container Terminal
11	217	12	Container Terminal
12	217	12	Ro-Ro Terminal

Total Shed Area: 12,000 sq.m.
Total Open Storage Area: 140,000 sq.m.
Weighbridges: 1×60 tonnes.

CONTAINER FACILITIES: Multi-purpose quay side cranes, capa 45 tons. Equipment to handle containers available including strad carrier, front loader and trailers. 48 power sockets for reefer contain

BULK HANDLING FACILITIES: Mobile grain dischargers p conveyors and hoppers for direct bulk delivery, bagging units for bag delivery.

EQUIPMENT: *Floating Equipment:* Pilot Boats, Mooring Launches, Fighting Launch, Buoy Maintenance Vessel, Anti-Pollution equipme *Handling Equipment:* Floating Crane 200 tons capacity, Mobile To Cranes capacity 45 tons, Yard Cranes from 16 tons to 45 tons, Fork from 2 tons to 36 tons, Head Trucks, Trailers and Chassis.

STEVEDORES: Sufficient number of gangs available working 2 sh of 12 hours, from 0700 hrs. to 1900 hrs., 7 days per week.

MEDICAL: Doctors and hospital are available. Agents should be advis in advance of any medical attention required.

DENSITY: Average 1026.

FRESH WATER: Available from quay only.

FUEL: Marine diesel available by road tanker. Advance notice to given to Agent.

FIRE PRECAUTIONS: According to Rules and Regulations of Seapo

CONSULS: None in Gizan. See "Jeddah".

REPAIRS: Minor repairs possible by local contractors.

SURVEYORS: The main Classification Societies are available Jeddah.

GANGWAY/DECK WATCHMEN: 1 Coast Guard is statio permanently on board. Coast Guards keep constant check on liq seals and may search personnel going ashore.

CUSTOMS ALLOWANCES: The consumption of alcohol, includ beer, is prohibited. Ship's bonded stores are sealed by the Custo after the vessel has been granted Free Pratique. Any alcohol found a this will be confiscated and a fine imposed of Riyals 1,000 per bo and possible imprisonment for the offender(s).

AIRPORT: Situated approximately 3 km. North East of Gizan P Several domestic flights daily.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: Gizan Port offers continuous cargo handling operatio throughout the year and sufficient manpower is always available.

POLICE/AMBULANCE/FIRE: Emergency Telephone Numbers:

Fire Brigade	322 0555
Ambulance	322 1692/1930
Hospital	322 1205
Police	322 1872

BANKS: Almost all national banks available.

STORING: No ship chandlers available. Small quantities availa through Agent.

SHORE LEAVE: Possible during daylight hours.

IDENTIFICATION CARDS: Shore passes issued on request.

DELAYS: There are no delays in berthing and discharging.

AUTHORITY: Gizan Port Management, P.O.Box 16, Gizan, Saudi Arabia. *Tel:* (07) 317–1000, 312–1145. *Telex:* 911018 and 911030 Ports Sj. *Cables:* Porta Gizan. *Contact:* Dr. Hammoud A. Saadi, Director General.

AGENT: Gulf Agency Co. Saudi Arabia. Telex: 601047 ("Gaship SJ"). Also see "Jeddah".

JEDDAH: 21.28 N. 39.10 E. (See Plan)

ALSO SEE "GENERAL" BEFORE FIRST PORT.

PORT LIMITS: *The boundaries of the harbour and anchorages of Jeddah Islamic Port:* The harbour boundaries are given below and include the tanker terminals and the adjacent waters between Ras Al Jahhas and Ras Al Aswad.

From an onshore position on Ras al Jahhas:

to	Lat. 21° 31′ 36″ N.	Long. 39° 07′ 54″ E.
	Lat. 21° 31′ 36″ N.	Long. 39° 06′ 00″ E.
	Lat. 21° 22′ 00″ N.	Long. 39° 06′ 00″ E.

To an onshore position on Ras al Aswad:

Lat. 21° 22′ 00″ N.	Long. 39° 07′ 50″ E.

DOCUMENTS: See "General" before first port.

Circular: Dated December 1983.

Vessels carrying dangerous cargo, arms, ammunition for discharge at Jeddah or any other ports in transit are requested to provide the following information:

(a) A prior notification including the following information:

1. The name of the vessel, her flag and the Shipping Agent's name.
2. ETA.
3. Voyage number.
4. The particulars and the types of dangerous cargo, ammunition, weapons.
5. The quantity.
6. Number of parcels or packages.
7. The weight.
8. Cell location and stowed.
9. The Shipper's name.
10. Port of loading.
11. Consignee's name and address.
12. Port of discharge.
13. Next port for the vessel after departure Jeddah.

(b) The documents such as Manifest, Stowage Plan and Cell Number, Bay Plan, etc., are required to be submitted to the Port Authority 48 hours prior to arrival of vessel.

(c) In case vessel not carrying any dangerous cargo/arms/ammunition/weapons/Military hardware, the Agent should submit the written declaration as 'nil'.

(d) The Master of the vessel is also required to submit declaration for arms/ammunition/weapons to the Port Authority along with cell position, stowage position and how stowed. In case the vessel is not carrying above mentioned Cargo the Master is also required to submit same declaration as 'Nil'.

(e) The in-transit dangerous cargo/arms/ammunition should be stored separately so that Jeddah cargo can be discharged without disturbing in-transit cargo.

(f) The Port Management will hold you fully responsible for incorrect information.

Signed:
Acting Director General
Jeddah Islamic Port.

VESSEL APPOINTMENT SCHEME:

Vessels bound fo Jeddah Islamic Port with cargo must provide the following information:

AA. By telex or cable either directly or through the vessel's Agents on arrival at the first or sole loading port, before loading commences:

1. Radio Code (Call Sign).
2. Vessel's Name.
3. Owner and Line.
4. Nationality.
5. Agent.
6. Length Overall (m.).
7. Maximum Draft (m.).
8. Number of Hatches.
9. Gross Registered Tonnage.
10. Nett Registered Tonnage.
11. Deadweight Tonnage.
12. Previous Names (if any).
13. Type of Vessel.
14. Type of Cargo.
15. Total Cargo Weight Tons.
16. Total Cargo Freight Tons.
17. Number of Containers/Units (where applicable).
18. Number of Livestock (where applicable).
19. Estimated Date of Arrival.
20. Actual Arrival Draft.
21. Hazardous Cargo for Jeddah.
22. Hazardous Cargo in Transit for Other Ports.
23. Tonnage to Hatch for Jeddah Discharge.
24. Year of Construction.
25. Lloyd's Register Number.
26. All Ports at which Cargo has been loaded for discharge at Jeddah.
27. Number, Position and S.W.L. of Derricks and/or Cranes, and particulars and positions of ramps.
28. Economic Speed of Vessel.
29. Next Port of Call after Jeddah (irrespective of whether vessel has cargo for that port).
30. All other Ports at which the Vessel will have called between arrival at the first port of loading and arrival at Jeddah Islamic Port.
31. Last 3 Ports of Call before Jeddah.
32. (i) Type of Radar.
    - (ii) Frequency.
    - (iii) Scan Rate.
    - (iv) Pulse Width.
    - (v) Pulse Peak Power.
    - (vi) Pulse Repetition Frequency.
    - (vii) Beam Width.
33. Alcoholic cargo on board for optional ports enroute Jeddah.
34. Arms/Ammunitions/Weapons/Exlosives cargo on board in transit.
35. Arms and bullets with Master for self-defence.
36. Name of the Protection and Indemnity Club.
37. Terms of Discharge.

Both the Registered Owner and the Operating Line or Charterer must be shown in item 3. If these are the same company this fact must be confirmed.

All previous names of the vessel must be declared in item 12, or a 'Nil' declaration must be shown. Items 21 and 22 must include the tonnage of each. IMDG Class for discharge and in transit which will be on board the vessel at Jeddah.

On completion of loading cargo, items 15, 16, 17, 18, 19, 20, 21, 22, 23, 26, 29, 30 and 31 must be updated as necessary.

BB. A further notice of ETA is to be sent 5 days, 3 days, 2 days and 1 day prior to arrival at the port. The 3 day notice is to include the vessel's position (Latitude and Longitude or port) 48 hours before arrival.

CC. Vessels will not be cleared to call at Jeddah solely for the purposes of bunkering, taking stores or repairs unless the following information is supplied to the Port Management, *not less than 72 hours in advance of their arrival.* (Also see "Reports"):

1. Radio Code.
2. Vessel's Name.
3. Owner and Line.
4. Nationality.
5. Agent.
6. Length overall.
7. Maximum Draft (m.).
8. Gross Registered Tonnage.
9. Nett Registered Tonnage.
10. Deadweight Tonnage.
11. Previous Names.
12. Estimated Time of Arrival.
13. Actual Arrival Draft.
14. Hazardous Cargo in Transit for other Ports.
15. Lloyd's Register Number.
16. Expected Requirements for Bunkers and Water.
17. Economic Speed of Vessel.
18. Next Port of Call after Jeddah.
19. Last 3 Ports of Call before Jeddah.

Prior to the provision of any services being authorised an approval must be obtained from the Office of the Director (Traffic and Operations).

The final ship's Clearance Certificate will not be signed by the responsible Jeddah Port Management Officer prior to sailing unless it is accompanied by the original Advice Notice bearing Jeddah Port Management's stamp and the signature of the Clearing Officer.

DD.If the undermentioned information has not been previously given to the Port it is to be included in the Advices mentioned in AA and CC above:

- (i) Type of Radar.
- (ii) Frequency.
- (iii) Scan Rate.
- (iv) Pulse Width.
- (v) Pulse Peak Power.
- (vi) Pulse repetition frequency.
- (vii) Beam Width.

If the vessel is equipped with several radars the characteristics of each radar must be given.

NOTE: With effect from 5th September 1986 all telex communications with Jeddah Islamic Port must be in Arabic.

PILOTAGE: Pilotage is compulsory for all vessels above 150 n.r.t. entering, navigating within, or leaving the port, and is available 24 hours a day. Every vessel subject to compulsory pilotage and which requires a Pilot must:

(a) from sunrise to sunset hoist the International Code Flag 'G';

(b) from sunset to sunrise give the letter 'G' (– – ·) by a signal lamp;

(c) in the event of poor visibility caused by rain, fog or dust, sound the signal 'G' (– – ·).

Vessels equipped with VHF should call the Port Control Signal Station on Channel 16 as soon as the vessel enters VHF range. Vessels having a Pilot on board must hoist the International Code Flag 'H'. The pilot boarding area is one mile West of the Middle Gate beacons in position Lat. 21° 28′ 00″ N., Long. 39° 06′ 00″ E. The pilot boat is orange hulled with white upperworks with the word "Pilot" painted in black letters along each side of the cabin.

The Master of every vessel, when approaching the pilot boat for the purpose of picking up a Pilot, must reduce speed to the minimum steerage way, maintain VHF contact with the pilot boat and provide a good lee if necessary. Vessels must have rigged and ready for use a pilot ladder in good repair and provided with reliable manropes and in accordance with the specifications and terms described in the International Convention for the Safety of Life at Sea 1974. The ladder is to be well illuminated between dusk and dawn, and a lifebuoy with a lifeline is to be available at the ladder for immediate use. A boat rope, ready rigged from the break of the forecastle to abaft the pilot ladder, must also be provided.

Once the Pilot is on board, the Master must advise him of:

(a) The draft, length, beam and manoeuvring speeds of the vessel. Such information is also to be displayed in a conspicuous place in the wheelhouse;

(b) Any peculiarity, defect or factor which may affect the manoeuvrability of the vessel;

(c) Any dangerous and/or hazardous cargo on board.

Vessels awaiting Pilot or documentation, anchor in "D" Anchorage. Vessels with dangerous and/or hazardous cargo on board anchor in "C" Anchorage. All tankers and vessels calling only for bunkers in "E" Anchorage.

PROHIBITED AREA: The area bounded by following positions:

A — 21° 29.0′ N., 39° 07.50′ E.
B — 21° 29.0′ N., 39° 06.40′ E.
C — 21° 31.6′ N., 39° 06.45′ E.
D — 21° 31.6′ N., 39° 07.90′ E.

ANCHORAGE: Anchorages A, B, W1 and W2 are within the pilotage area and vessels may not enter, or leave these anchorages without a pilot.

The boundaries of the anchorages are as follows:

Anchorage A:

From	Lat. 21° 29′ 13″ N.	Long. 39° 08′ 40″ E.
To	Lat. 21° 28′ 18″ N.	Long. 39° 08′ 40″ E.
	Lat. 21° 28′ 18″ N.	Long. 39° 08′ 02″ E.
	Lat. 21° 29′ 13″ N.	Long. 39° 08′ 40″ E.

Anchorage B:

From	Lat. 21° 27′ 39″ N.	Long. 39° 06′ 54″ E.
To	Lat. 21° 27′ 39″ N.	Long. 39° 07′ 26″ E.
	Lat. 21° 26′ 04″ N.	Long. 39° 07′ 26″ E.
	Lat. 21° 26′ 04″ N.	Long. 39° 06′ 54″ E.
	Lat. 21° 27′ 39″ N.	Long. 39° 06′ 54″ E.

Anchorage W1:

From	Lat. 21° 27′ 46″ N.	Long. 39° 08′ 10″ E.
To	Lat. 21° 27′ 46″ N.	Long. 39° 08′ 42″ E.
	Lat. 21° 26′ 45″ N.	Long. 39° 08′ 42″ E.
	Lat. 21° 26′ 45″ N.	Long. 39° 08′ 22″ E.
	Lat. 21° 27′ 46″ N.	Long. 39° 08′ 10″ E.

Anchorage W2: (Working anchorage for explosive cargoes, one vessel only.

From	Lat. 21° 29′ 04″ N.	Long. 39° 07′ 16″ E.
To	Lat. 21° 29′ 04″ N.	Long. 39° 07′ 34″ E.
	Lat. 21° 28′ 27″ N.	Long. 39° 07′ 46″ E.
	Lat. 21° 28′ 27″ N.	Long. 39° 07′ 22″ E.
	Lat. 21° 29′ 04″ N.	Long. 39° 07′ 16″ E.

Anchorages outside the harbour boundaries:

Anchorage C:

From	Lat. 21° 28′ 00″ N.	Long. 39° 03′ 46″ E.
To	Lat. 21° 27′ 46″ N.	Long. 39° 04′ 40″ E.
	Lat. 21° 26′ 47″ N.	Long. 39° 04′ 22″ E.
	Lat. 21° 27′ 02″ N.	Long. 39° 03′ 28″ E.
	Lat. 21° 28′ 00″ N.	Long. 39° 03′ 46″ E.

Anchorage D:

From	Lat. 21° 28′ 16″ N.	Long. 39° 04′ 50″ E.
To	Lat. 21° 27′ 28″ N.	Long. 39° 05′ 58″ E.
	Lat. 21° 26′ 10″ N.	Long. 39° 04′ 29″ E.
	Lat. 21°26′ 24″ N.	Long. 39° 04′ 15″ E.
	Lat. 21° 28′ 16″ N.	Long. 39° 04′ 50″ E.

Anchorage E (Tanker and bunkering anchorage):

From	Lat. 21° 23.5′ N.	Long. 39° 04.25′ E.
To	Lat. 21° 24.75′ N.	Long. 39° 05.00′ E.
	Lat. 21° 23.8′ N.	Long. 39° 06.00′ E.
	Lat. 21° 23.5′ N.	Long. 39° 06.00′ E.

Prohibited Anchorage Area:

From	Lat. 21° 23.5′ N.	Long. 39° 04.0′ E.
To	Lat. 21° 23.5′ N.	Long. 39° 06.0′ E.
	Lat. 21° 22.0′ N.	Long. 39° 03.35′ E.
	Lat. 21° 22.0′ N.	Long. 39° 06.00′ E.

APPROACHES: The lights of the new airport North of Jeddah shine brightly. These should not be confused with the correct approach to Jeddah port which is South of the airport.

RESTRICTIONS: There are no restrictions imposed upon entry for vessels of not more than 13.5 m. draft.

MAX. SIZE: The maximum permissible draft is 13.5 m. No restriction on beam. Vessels up to 300 m. in length are handled regularly at some facilities in the port.

HEALTH: Masters of vessels are required to notify Jeddah Port Health and Quarantine Department via Jeddah Radio prior to the vessel's arrival as follows:

(a) Vessel's name, ETA, purpose of visit;
(b) Complement and General Declaration of Health of crew:
(c) Declaraton of Vaccination Certificates held, if any;
(d) Declaration of Last Port and date of sailing;
(e) Possession of valid Deratisation Certificate or valid Deratisation Exemption Certificate.
(f) Any other certificate that may be required as determined by Health Authorities.

Additionally, the Agent is required to submit an arrival notice to the Port Health and Quarantine Department 48 hours prior to the vessel's expected arrival.

On arrival, the doctor boards and grants Free Pratique.

(a) *Yellow Fever:* All arrivals from infected or endemic areas are required to submit a valid Vaccination Certificate in accordance with International Sanitary Regulations.

(b) *Makkah:* All Muslim crew members who wish to visit Makkah and Madinah should have in their possession 2 recent Passport-size photos. These should bear the crew member's name and C.D.C. Number to enable Agent to obtain permission for the pilgrimage. Crew members must also have in their possession the above-mentioned medical certificates, otherwise permission may not be granted to them to visit Makkah and Madinah.

RADIO: The Coast Radio Station, Jeddah Radio, call sign HZH (Tel No. 603799 RDJD SJ), can be called up at any time on 500 kH All vessels send telegrams to Agents, receivers and Port Authoritie etc. through Jeddah Radio.

Jeddah Radio is also on VHF Channel 16 for telephone calls to Agen and Jeddah Ship Repair Yard.

VHF: Jeddah Port Control Signal Station has 4 VHF Channels:

(a) Channel 16 (international distress, safety and calling Channel)
(b) Channel 14 (Working Channel);
(c) Channel 12 (Working Channel);
(d) Channel 9 (Working Channel).

Vessels bound for Jeddah Islamic Port contact the Port Control Sign Station on Channel 16, then shift to a working Channel as advised t pass on ETA and other relevant information. When necessary, weathe reports, notices regarding navigational aids etc., are broadcast t vessels on Channel 12 after having first been advised on Channel 1 In the event of distress or emergency, vessel traffic is controlled by th Port Control Signal Station as far as circumstances permit.

RADAR: A port surveillance radar system is in operation.

TUGS: There are tugs available operated by the Port.

Tugs operate within the harbour limits only for the purpose of assistin vessels in berthing and unberthing. Tugs join vessels inside the Inne Gate Beacons and normally require the use of the ship's lines. Whe the latter are considered inadequate, the tug's lines are used.

BERTHING: The following categories of berth, with a draft range fro 7.5 m. to 13.5 m., are available: Bulk Grain, Bulk Edible Oil, Ro-R Container Terminal, Cold and Frozen Terminal, Livestock Termina Autocarriers, General Cargo and Passengers.

Storage: Adequate covered and open storage space is available in th form of Warehouses, Transit Sheds, Livestock Sheds, Dangerou Goods Warehouses plus Cells, Cool and Cold Stores, Containe Terminals, Ro-Ro Terminal, Container Freight Station, Vehicle Park General Cargo Storage and Lub-oil Storage Facilities.

CRANES: Rail-mounted electrical level luffing cranes of up to 15 ton capacity are available with an outreach from the quay wall of 25 m.

The port also has available mobile cranes of up to 250 tons capacit including a floating crane of 200 tons capacity. Other equipment include forklift trucks of up to 33 tons capacity and trailers and chassis of up t 40 ft./200 tons capacity.

General cargo vessels must be adequately geared at each hatch. Po cranes may be hired on request or may otherwise be utilised at the Po Management's discretion.

BULK CARGO FACILITIES:

Bulk Grain (Private User Facility):

Max. permissible ship-draft:	13.5 m.
Unloading:	Gantry booms/vacuum pipes and conveyor.
Height of gantry boom:	16 m.
Outreach:	28 m.
Discharge capacity:	200 tons per hour per unit.

Bulk Edible Oil (Private User Facility):

Max. permissible ship-draft:	11 m.
Unloading point:	A pump station pit and manifold is located o the quay for hose connection.

SPECIALISED CARGO HANDLING FACILITIES:

Ro-Ro Terminal (Common User Facility):

Max. permissible ship-draft:	7.5 m.
Mobile cranes:	Up to 40 tons capacity.
Forklift trucks:	Up to 33 tons capacity.
Trailers/Chassis:	Up to 40 ft./200 tons capacity.

Jeddah Container Terminal East (Common User Facility):

Max. permissible ship-draft:	11.5 m.
Container cranes:	30.5 tons capacity with an outreach from th quay wall of 25.5 m./28.5 m.
Forklift trucks:	Up to 33 tons capacity.
Trailers/Chassis:	Up to 40 ft./200 tons capacity.
Electricity supplies:	'Plug in' points for 192 reefer containers.

Jeddah Container Terminal West (Common User Facility):
(Ro-Ro facility also available).

Max. permissible ship-draft:	13.5 m.
Container cranes:	Up to 40 tons capacity with an outreach fro the quay wall of 34.5 m.
Straddle carriers:	Sufficient number.
Forklift trucks:	Up to 25 tons capacity.
Head trucks:	Sufficient number.
Electricity supplies:	'Plug in' points for 360 reefer containers.

BRIDGES: There are no bridges or other restrictions to prevent acce to the port by vessels of not more than 13.5 m. draft.

STEVEDORES: The port provides stevedoring services 24 hours a da 7 days a week. For vessels wishing to discharge cargo at Jeddah Islam Port, Shipowners or their Agents should provide ETA advice accordance with the Rules and Regulations for Seaports, issued by t Co-operation Council for the Arab States of the Gulf, as follows:

(a) Before loading for Jeddah;
(b) On sailing last load port;
(c) At 5, 2 and 1 day intervals before the vessel's ETA;
(d) On revising the vessel's ETA.

MEDICAL: Full hospital facilities are available. The Agent should informed of any medical attention required. Vaccination Certifica should be provided as previously specified (see "Health").

TANKERS: The Petromin facility has 2 berths in the oil basin and 2 the inner harbour. Petromin provide their own tugs and launches.

The port does not have facilities for the handling of liquid chemic or LPG carriers.

Jeddah Port Authority Circular: Vessel calling for bunkering supply or for repair will not be cleared/berthed unless following information is furnished to Jeddah Port Management before ship's arrival:

1. Radio Code.
2. Vessel Name.
3. Owner/Line.
4. Nationality.
5. Agent.
6. LOA.
7. Max. draft in metres.
8. G.R.T.
9. N.R.T.
10. D.W.T.
11. Previous Name.
12. ETA.
13. Arrival Draft.
14. Hazardous cargo transit.
15. Lloyd's Register Number.
16. Requirements bunker and fresh water (approx.).
17. Last 3 ports of call before Jeddah.

Before providing any facilities, a Permit Certificate has to be obtained from office of the Assistant General Manager for Traffic.

Ship will not be cleared by Port Authority unless above Permit Certificate attached with Original Arrival Notice signed and stamped by party concerned is submitted to Jeddah Port Management.

DENSITY: 1025.

FRESH WATER: Fresh water can be supplied by the port at all berths and at Livestock Terminal.

The port can supply fresh water to vessels on written application to the Marine Department at a cost as per current tariff. The rate of delivery varies up to 50 tonnes per hour, depending on the number of vessels being watered at any one time and the hydrant arrangements at the respective berths. Supplies are normally available between the hours of 0700 and 1900 for cargo vessels and at any time for passenger and livestock vessels.

Also available from private suppliers who currently charge between U.S.$15 and U.S.$18 per metric tonne and normally require approximately one week's notice. The method of delivery is by barge at a rate of 50 to 70 tonnes per hour.

FUEL: There are several suppliers in Jeddah who normally require between 1 and 2 weeks' notice of nomination, either through a broker or directly. All types of bunker oils are available and are supplied by tanker at varying rates of delivery.

If bunkering at anchorage, proceed to "Anchorage E".

Also see "Reports".

FIRE PRECAUTIONS: Special rules apply concerning fire precautions and fire-fighting. Reference is made to the Rules and Regulations for G.C.C. Seaports, Part 1, Section 7, and Part 3, Section 4.

CONSULS: Most countries are represented in Jeddah.

REPAIRS: Several local agencies provide all types of shipboard repair work in the mechanical, electrical, electronic and refrigeration/ air-conditioning fields.

The Jeddah Ship Repair Yard has complete facilities for drydocking vessels, conversion work and all types of repairs to hull and machinery.

DRY DOCKS: Jeddah Ship Repair Yard:

	Dock 1	Dock 2
Max. d.w.t. (Approx.)	45,000	16,000
Lifting capacity (tonnes)	19,000	11,000
Length overall (m.)	215.00	165.00
Length over keel blocks (m.)	200.00	150.00
Clear width (m.)	33.50	25.00
Water depth over top of keel blocks (m.)	7.55	6.95
Pumping times (minutes)	90	90
Cranage (tons SWL × radius reach (m.)	2×7 tons ×20.5 m.	2×7 tons ×20,5 m.

SURVEYORS: The following Classification Societies are represented in Jeddah: Lloyd's, A.B.S., B.V., D.N.V., N.K.K., G.L. and RINA.

Cargo surveyors also available.

GANGWAY/DECK WATCHMEN: 1 Coast Guard is stationed at the foot of the gangway of vessels alongside. Coast Guards keep constant check on liquor seals and may search personnel going ashore.

HATCHES: The opening and closing of non-mechanical hatches is normally carried out by the Port's stevedores.

CUSTOMS ALLOWANCES: Alcohol must be kept in bond and is not allowed to be consumed or landed within the Kingdom. There are no restrictions on tobacco.

CARGO GEAR: Discharge of general cargo and containers at non-specialised facilities is by ship's gear. However, a wide range of mobile cranes are available for hire at short notice (see "Cranes").

REPATRIATION: There are approximately 30 international flights daily to and from Jeddah. A visa is required for entering or leaving the country.

AIRPORT: The King Abdul Aziz International Airport is located approximately 30 km. North of the port.

TIME: GMT plus 3 hours.

HOLIDAYS: Friday is the weekly day of rest and prayer. The Hegira calendar of 12 lunar months consisting of 354 days provides for two Government holidays. The first, lasting one week between the end of the ninth month (Ramadan) and the beginning of the tenth month (Shawwal), represents the celebration of the end of the month of Muslim fasting. The second is for 10 days, from the 5th to the 15th of the twelfth month (Dhu-al-Hijjah). This is the period when Saudi nationals and Muslims from all over the world come to perform the pilgrimage in the Holy cities of Makkah and Madinah.

The port, however, operates continuously throughout the year, 24 hours a day, 7 days a week.

POLICE/AMBULANCE/FIRE: Masters of vessels should contact the Port Control Signal Station on VHF Channel 16.

EMERGENCY CO-ORDINATION CENTRE: *Major Emergency Control:* In case of emergency, vessels should contact the Port Marine Control Tower on VHF Channel 16. Requirements will be relayed to the Port's Operations Co-ordination Centre.

TELEPHONES: Facilities are available for telephone connection at certain berths, although there are currently no arrangements for placing telephones on board.

Public pay phones are available in the port area.

SERVICES: *Tank Cleaning/Compass Adjusting/Life-Raft Servicing:* There are presently no facilities in Jeddah for tank cleaning or compass adjusting. Liferaft servicing facilities are available.

Fumigation: Fumigation services are available in Jeddah.

Garbage Disposal: The port has a waste incinerating vessel with one waste collection launch and one oil skimming launch. A charge is levied for this service at a rate of SR. 200 per vessel per day or part thereof. (These dues will be collected whether the vessel uses the service or not).

BANKS: All leading Saudi banks have branches in Jeddah.

STORING: Subject to approval from the Customs, Coast Guard and Health Authorities.

SHORE LEAVE: Permitted on Agent's application to the Immigration Authorities and the Coast Guard.

IDENTIFICATION CARDS: Shore passes are issued. However, Discharge Books or Passports must be left at the gate and collected when re-entering the port area.

REGULATIONS: The Rules and Regulations for G.C.C. States Seaports are published in booklet form and are available on request from the Agent. Every vessel arriving at the port must have a copy on board or obtain one immediately on arrival.

Every vessel entering Jeddah Port must hoist the Flag of the Kingdom of Saudi Arabia and keep it flying at all times throughout its stay in the port.

Vessels wishing to unload cargo at Jeddah Islamic Port must apply to the Director-General by telex for a berthing appointment prior to loading for Jeddah.

DELAYS: Subject to the timely completion of clearance formalities, there are no delays in berthing, loading, discharging or bunkering.

GENERAL: *Other important information:*

(a) Mean height of quay surface from water alongside berth is 2.25 m.

(b) Width of fenders is 30 cm.

(c) Height between highest and lowest recorded tides is 1.02 m.

(d) For reference, please see BA. Charts No. 2599 and 2577 and Red Sea Pilot.

Other facilities include:

(a) Modern equipment to combat oil pollution, including an oil recovery vessel, oil separation barges and a full range of spraying equipment, absorbants, dispersants and oil containment barriers. Tugs with pollution control facilities are available.

(b) An integrated fire-protection and fire-fighting system incorporating a sophisticated control centre with electronic monitors for fire alarm and detection equipment, linked with a highly efficient network of sprinklers in all buildings, transit sheds and warehouses. In addition, the port has its own fire station equipped with a full range of appliances. Water-borne facilities are also available in the form of fire-fighting vessels up to 2,860 h.p.

(c) *Miscellaneous marine craft and equipment comprising:*

Flat-top barges of 400 tons carrying capacity.
Pilot boats.
Service launches.
Barge towing launches.
Mooring launches.

DEVELOPMENTS: Construction is well advanced for a 132 m. high control tower, to be equipped with the latest navigational aids and is (sited) on the North side of the approach channel to the Port.

REPORT: May 1984.

Operational instructions for Owners and Masters of vessels taking offshore bunkers from Bakri Bunker Trading Co. at Jeddah:

1. *Radio Contact/Operating Position:*

"al Bakry" (call sign HZGH) maintains continuous watch on VHF Channel 16. VHF range in this area is 300-400 nautical miles and Masters should therefore establish contact at least 24 hours ahead of arrival Jeddah. Working channel will be agreed between Masters when contact established, and rendezvous point will be advised by the Master of the bunker vessel, well in advance.

Please note that Customs/Waterguard operate only during the hours of daylight. Customs launches leave quay at 0900 hrs. daily and clear vessels in order of arrival through approximately 1700 hrs. Vessels arriving too late are not cleared until following day.

2. *Notice:*

A. Wherever feasible vessels taking bunkers from Bakri Bunker Trading Co. must send a cable at least 120 hours prior to arrival off Jeddah to 'best service Jeddah' giving following information in accordance with port management instructions:

(1) Radio code, (2) vessel's name, (3) owner/line, (4) nationality, (5) Agent, (6) LOA, (7) max. draft in metres, (8) g.r.t., (9) n.r.t., (10) d.w.t., (11) all previous names, (12) Jeddah ETA, (13) actual arrival draft, (14) details of hazardous cargo in transit for other ports, (15) Lloyd's Register number, (16) Expected requirements of bunkers and water, (17) quarantine requirements of port doctor – name of last 3 ports of call/no. of crew and their state of health/validity of vaccination certificates for cholera and yellow fever, confirmation that none of the crew will go ashore.

Please note: Prior to the provision of any services being authorised, an approval must be obtained from the office of the Assistant Director General (Traffic and Operations.)

The final ship's Clearance Certificate will not be signed prior to sailing by the responsible Jeddah Port Management officers unless it is accompanied by the original advice notice bearing Jeddah Port Management's stamp and the signature of the Clearing Officer.

B. Owners must also send a telex minimum of 72 hours prior to their vessel's arrival off Jeddah to Bakri Bunker Trading Co. (Telex: Jeddah

401557 "Bakri SJ" or Jeddah 402125 Penta SJ) repeating the information contained in the cable sent from their vessel. This telex must also confirm that none of the crew of vessel will go ashore. Failure to provide the above information in time could delay clearance by Jeddah Port Management and result in vessel being delayed.

C. Both messages A and B must be updated 48 hours and 24 hours ahead of arrival.

3. *Operating/Manoeuvring:*

Will be advised by Master of "al Bakry" on VHF.

4. *Supplies:*

Supplies are made subject to the general terms and conditions for the sale of marine fuels of Bakri Bunker Trading Co. Ltd.

5. All vessels calling for bunkers with Bakri Bunker Trading Co., must comply with the laws of Saudi Arabia, including courtesy flag requirements.

Vessels have recently been delayed by boycott office and Port Authority in Jeddah due belated receipt particulars, especially Lloyd's number/all former names. If this data not received minimum 72 hours ahead vessel's arrival, delay will ensue.

NOTICES: 1986.

Agents Notices to Masters.

Dear Captain,

To avoid any inconvenience to yourself and to your crew and in order that your vessel is not penalised we are listing below those requirements which you must follow and those which you must avoid during your stay in the Port of Jeddah.

(A) WHAT YOU MUST DO:

1. The Master of every vessel arriving at any Saudi Port for discharging/loading of cargo is required to possess one copy of the book "Rules and Regulations for Saudi Arabian Seaports". If you do not have it, please order through our representative. The Port Inspectors make periodical inspections and in the event of non-possession of the said Rules Book by a vessel, she may be penalised. If you already have one or after you get one, it is recommended that you please do read pages 66-75, 163-172, 220-233 and 260.

2. The National Flag of the Kingdom of Saudi Arabia must be kept hoisted round the clock on all days of the week from the time of entering into and sailing from the port of Jeddah.

3. In order to arrange vessels inward/outward clearance, following documents should be delivered to our representative against signed receipt.

1. Certificate of Registry.
2. Safety Equipment Certificate.
3. Safety Construction Certificate.
4. Load Line Certificate.
5. Hull and Machinery Classification Certificate.
6. Safety Radio Telegraphy Certificate.

These documents will be returned to you with the Port Clearance prior to your departure. Vessels arriving at the ports of the Kingdom, with expired certificates, are liable to penal action.

4. All the time, from the time of arrival, your vessel must be in a condition to sail within one hour's notice from the Ports Authorities.

5. From the time of berthing and until its sailing from the berth the Coastguard Police will stay at the gangway entrance.

6. Rat guards must be fixed on all mooring ropes and wires on vessel's berthing.

7. Opening of the hatches (also tween decks, where applicable) and rigging of your vessel's gear should be conducted by your crew to enable the port's stevedores to commence discharging/loading operations immediately upon berthing.

8. The ship's gangway should be protected by guide ropes and proper nets. Safety rails should be erected in tween decks during discharging operations in lower holds. Whenever possible, lashing should be temporarily removed from the deck cargo to facilitate passage for the shore labour to work. Port's Safety Officers inspect vessel from time to time and any contravention of Port's Safety Regulations is subject to penal action.

9. The vessel should be self-sustaining and the gear in proper condition to carry out the discharging/loading operations round the clock. Any delay in discharging/loading as a result of winch stoppages, will be recorded against the vessel and charged at SR.200/– per gang hour or part thereof will be treated as one hour. In the event of frequent winch breakdown or a breakdown whose repair may take a long time, a shore crane could be employed by the port for account of the vessel in case the ship/Agent's themselves do not arrange one. To arrange a shore crane our representative will need your authority. For idle gangs, from the time of winch stoppage until the shore crane physically arrives and discharge is resumed, vessel will be charged at the rate mentioned above.

Please note that Port Authorities have the right to employ shore cranes for account of the vessel to expedite discharge even if ship's gear is fully operational. The cost is debited to the ship whether or not the requisition form is endorsed by the ship's Master.

10. Your Duty Officers are required to supervise discharging/loading operations and any irregularity in handling of the cargo by the stevedores must be notified in writing to stevedores' representative on board with copy to Port Authorities.

Stevedores are employed by the Port Authorities and work as follows: General and Bagged Cargo: 0100 hrs. – 0600 hrs., 0700 hrs. – 1200 hrs., 1300 hrs. – 1800 hrs., 1900 hrs. – 0000 hrs.

Frozen Cargo: 0700 hrs. – 1200 hrs., 1600 hrs. – 0000 hrs.

Citrus: At present citrus cargo also handled same as general and bagged cargo.

11. Except crew members from Communist Bloc and countries with whom the Kingdom of Saudi Arabia does not have diplomatic relations, all others are allowed to go ashore escorted by the Agents of the vessel and with a valid Shore Pass issued by the Immigration Department of the Seaport. Shore passes are arranged by the Agent against Master's written undertaking that all crew members will return to the ship and that the Master holds himself fully responsible for all the consequences if any crew fail to return to the ship. The Authorities permit crew members to go ashore for a maximum period of 3 hours during the day only and the permission is granted between 0900 hrs. – 1600 hrs. except on Fridays. The crew members should return to the ship escorted by the Agents before 1900 hrs.

In order to arrange shore passes, we will need your written confirmation at least 18 hours in advance on our prescribed form together with one black and white photograph for each crew member who will go ashore.

12. Application for repatriation of crew is accepted by Immigration Authorities only when it is accompanied with a ticket in the name of the crew member with a confirmed seat for leaving the Kingdom not later than 72 hours from the date of application. In order to arrange confirmed seats we must get an advance notice of at least 48 hours.

13. Completion of discharge must be supervised by ship's Officers who should ensure that no cargo bound for Jeddah is left in the ship except the cargo whose discharge was not allowed by Port Authorities. On completion of discharge of all sound cargo, Jeddah Signal Station should be contacted at Channel 16/12 through VHF to request for a Pilot who is available at short notice. You can notify the Authorities to provide a Pilot as soon as you have on board, the Port Clearance and you are ready to sail. Normally 1 to 2 hours following completion of discharging/loading are allowed to prepare a vessel for sailing.

Following is the allocation of VHF Channels by the Jeddah Islamic Sea Port.

Channel 9 – Marine Pilots.
Channel 11 – Petromin Marine Operations.
Channel 67 – Pilots/Tugs/Berthing Operations/Safety in event of fire.
Channel 69 – Pilots/Tugs/Berthing Operations.

14. In order to keep the parties concerned informed of the daily progress of discharging/loading operations including any other details/information, you will be required to fill-in the "daily position" form left with you by our representative upon your vessel's berthing. It should be kept ready every morning for collection by our representative at about 0800 hrs.

15. Personnel of our Operations Department will be in very close contact with you during vessel's stay in port and shall present to you the prescribed form for SERVICES REQUIRED THE FOLLOWING DAY. This form may be filled in and kept ready for delivery to the Officer on the evening shift who will collect it from you at about 1700 hrs. This procedure will apply from the day following the berthing of your vessel. However, should the vessel berth before mid-day then our Boarding Officer can be asked to attend to services required the same day.

16. To ensure that ships under our Agency are attended to the satisfaction of our Principals, our Operations Department's Officers are advised to present to you the "Service Form" of the previous day, on the following day so that in case some service that you had asked for has not been rendered, then a remark to that effect could be endorsed on it by you to receive the attention of the Management. We shall greatly appreciate your co-operation in this regard and if for any reason this form is not presented to you for remarks then the Duty Officer may please be reminded of it.

(B) WHAT YOU MUST NOT DO:

1. Manoeuvring of vessels within the port limits without a local Pilot on board, is prohibited.

2. Immobilisation without valid permission from the relevant Authorities, is prohibited.

3. Engine repairs/burning/painting/chipping while at berth, is not allowed without prior permission.

4. Lowering of lifeboats while alongside berth or at anchorage, is not allowed except in an emergency.

5. Spillage of oil and disposal of garbage within the port limits, is prohibited.

6. Unauthorised photography is strictly prohibited.

7. Possession of spirits/alcoholic beverages, weapons, drugs, obscene literature or nude – semi-nude pictures is strictly prohibited which please note advise all your crew members accordingly. The Coastguard Authorities conduct searches and if any crew member is found in possession of any of the above articles, he would be liable to punishment as per local laws.

8. In case of shifting to anchorage, prior to your final sailing, you must inform the signal tower of your date and time of departure.

CIRCULAR: (1983). Please note the following Immigration Rules now prevail in the Port of Jeddah. Kindly see to it that these rules are strictly followed in order to avoid any problem to your crew and the vessel.

(AA) Shore Leave Pass Facilities:

1. Crew Shore Leave Pass will be issued by the Immigration Department for a maximum number of 10 crew members per day from any ship including crew requiring shore medical facilities and Master or other officers requiring consular service. Shore leave will be restricted to three hours only i.e. from 1100 hrs. to 1400 hrs.

2. Master should ensure that requisition for Crew Shore Leave Pass is handed-over to Agents' Crew Department in the afternoon of the preceding day so that necessary paper work is completed to avoid delay in obtaining permission next morning before 1100 hrs.

3. For vessels arriving during the day time, crew shore leave is not permissible the same day; passes will be issued the following day provided requisition is given to Agents as mentioned in No. 2 above.

4. For vessels arriving during the night, requisition must be given to the Agents in the morning and the passes will be arranged during the afternoon.

5. Emergency cases are exempted from the restrictions mentioned in 1, 2, 3 and 4 above.

6. In case of serious sickness of a crew member the Safety Department of the port of Jeddah must be informed immediately through Signal Tower instead of calling the Agents. Agents may also be informed for further assistance.

7. Crew shore leave is strictly prohibited after issuance of Sailing Permit.

(BB) Crew Sign-On:

1. Following particulars of crew arriving to join a vessel, must be communicated to the Agents at least 72 hours prior their date and time of arrival.
   (a) Full name of seaman.
   (b) Nationality.
   (c) Seaman's Book Number, date and place of issue.
2. Clearance by Airport Immigration Department of crew arriving without visa on international passport is strictly forbidden.
3. Crew arriving without visa to join a vessel must possess Seaman's Book otherwise they cannot be cleared by Airport Immigration Department.
4. Clearance by Airport Immigration Department of crew as mentioned in No. 3 above is granted only if the vessel which they are coming to join, has already arrived in the Port of Jeddah. If the vessel has not yet arrived the crew will remain in transit in the airport.
5. Crew arriving at night to join a vessel already in port, cannot be signed-on until next day and as such will have to stay for one night in an hotel. Crew arriving during the day but before noon, may be signed-on the same day.

(CC) Crew Sign-Off:

1. Following particulars for crew to be signed-off, must be communicated to the Agents at least 72 hours prior anticipated time of departure.
   (a) Full name of seaman.
   (b) Nationality.
   (c) Seaman's Book Number, date and place of issue.
   (d) Destination.
2. Because 72 hours' prior notice is required, as mentioned in No. 1 above, crew sign-off will not be possible from a vessel staying for less than 72 hours in the port unless the required repatriation of any crew has been communicated to the Agents prior to arrival of the ship.
3. Signing-off of crew without Seaman's Book is not permissible.
4. Any crew not holding ticket with confirmed seat, cannot be signed off.
5. Crew already signed-off by the Immigration Department will be cleared by the Customs a maximum of 6 hours before the departure time. With this restriction crew departing between 0100 to 0800 hrs., cannot be repatriated.
6. Vessel completing discharge prior completion of repatriation formalities of any crew, will have to stay at anchorage in order to disembark the crew member after completion of formalities.

(DD) The above Rules and Regulations will also be applied to vessels calling Jeddah for bunkers and/or provisions only.

SHIPMASTER'S REPORT: November 1986.

Report on Visit to Jeddah for Bunkers Only:

ETA Advice: Send ETA 96, 72, 48, and 24 hours in advance of arrival also update if ETA varying by more than 1 hour after 24 hour Notice is sent. Contact by VHF as soon as in range of Port Control.

Approach: Approach to the Port can be difficult, especially at night. There are a great deal of works in progress in and around the Port, which renders identification of navigational marks and shore characteristics difficult. The best aid to position fixing approaching the Port is Mismari Reef, which has a Racon on it, and shows up well on the radar. Approach is also made difficult by the fact that there were many ships at anchor on the occasion of this visit. (Over 50 vessels).

Anchorage: There are designated areas marked on Admiralty Chart No. 2599 (Approaches to Jiddah). The designated anchorage for vessels bunkering is Anchorage 'E'. However, due to the large number of vessels at anchor, anchorage has to be effected wherever there is sufficient anchor berth for the size of the vessel. (Port Control did not give any directions with regard to anchoring position, and only asked to be given time of anchoring and bearing and distance from Qaham Beacon, of anchor position).

Formalities: Agent and Customs board from a small tug size vessel, apparently used specifically for this purpose. They boarded more or less on arrival. Forms, etc. required are as detailed in final 'Notes'. Pilot ladder was used to embark and disembark these Officials. A heavy swell was running on the occasion of this visit, and it would have been impractical to have used the accommodation ladder only, although a combination rig could have been used.

Bunkering: Bunker barges of about 3,000 d.w.t. are used. These vessels operate from a much larger 'mother' ship. The barge that delivered this vessel's bunkers was rigged to come alongside starboard side to; but it can be ascertained by calling the 'mother' ship before arrival. Barge used 6 in. bunker hose, and midship bunker connection. (it would not be practicable to have used the after connection on this ship, due to the length of the bunker barge). On completion of bunkering, Bunker Receipts are signed and stamped in the usual way. Port Clearance is issued by bunker barge after bunkering formalities completed. Port Control must be informed of Port Clearance Number, after which vessel may sail.

Notes: On the occasion of this vessel's visit, a rather heavy swell was running at the anchorage. This rendered taking of dips in the bunker tanks rather difficult, and also due to ranging of the bunker barge alongside, it was not possible to check barge by ship's staff. Quantity of bunkers delivered is effected by using a flow meter on the barge. It was discovered after vessel had sailed, that there was a shortage of some 45 tonnes (in a consignment of 1,400 tonnes). However, at the time of taking the bunkers, it had not been possible to accurately gauge the vessel's bunker tanks due to the swell. (It may well be that the barge's meter was inaccurate, but in the light of the above, it is therefore important to check as closely as possible calculated quantity taken by ship's measurements, and any shortage, or suspected shortage noted).

Arrival Message: To be supplied to Port Management, Jeddah. (Either direct or through Agents).

1. Radio call sign.
2. Vessel's name.
3. Owner and Line – Ex-Owners, Charterers or Operators (full address, telex, cable, postal).
4. Nationality – flag, port or registry.
5. Agent at Jeddah.
6. Length overall.
7. Maximum draft (metres).
8. Gross registered tonnage.
9. Nett registered tonnage.
10. Previous names.
11. Build – year and place.
12. Type of vessel.
13. Deadweight tonnage.
14. ETA – changes of ETA.
15. Actual arrival draft.
16. Hazardous cargo in transit for other ports.
17. Lloyd's Register Number or other Registration Number.
18. The expected requirements for bunkers and water.
19. Economic speed of vessel.
20. Next port of call after Jeddah.
21. Last port of call before Jeddah – cargo on board.
22. Names of ports vessel called before arriving Jeddah (within last 2 months).
23. Vaccination Certificates valid against cholera.
24. Number of crew and their state of health.
25. Statement of Owner/Master that the vessel was never blacklisted by Arab League.
26. Master's Declaration for any arms and ammunition carried on board for cargo in transit or purely for the purpose of self defence, at least 48 hours prior vessel's arrival (failure to comply with these procedures will result in heavy fines and seizure of arms).
27. The following is also required:
   (a) Type of radar.
   (b) Frequency.
   (c) Scan rate.
   (d) Pulse width.
   (e) Pulse peak power.
   (f) Pulse repetition frequency.
   (g) Beam width.
   If the vessel is equipped with several radars, the characteristics of each radar must be given.

Notes:

1. Send above as soon as possible after vessel receives orders for Jeddah.
2. No. 27, not required to be sent if this information has already been tendered on a previous occasion.
3. Above required even if making an off-limits bunkering call.
4. Vessels calling for bunkers only will also be required to submit the following Forms to Agent and Customs, who board on arrival.
   4 Crew Lists.
   2 Vaccination Lists.
   2 Crew Effects Declarations.
   2 Stores Lists.
   All above documents can be presented on appropriate IMO Forms, except the Store Lists, which have to be on Saudi Arabian Forms for Customs. Forms will be provided if vessel not in possession.
5. Customs will seal bond and radio transmitter on clearing ship inwards.

SHIPMASTER'S REPORT: June 1988.

Vessel called in the Roads for bunkers.

The bonded stores are sealed. Crew are not allowed to have beer or personal refrigerators in their cabins. This includes the Master and all officers.

All beer and spirits must be placed in the bonded store prior to Customs boarding the vessel, otherwise severe fines may be imposed.

AUTHORITY: Jeddah Port Management, P.O. Box 9285, Jeddah 21188, Kingdom of Saudi Arabia. *Tel:* Jeddah (02) 6471200 (17 lines). *Telex:* (Arabic) 603446 SAEJ; (English) 601175 Ports SJ. *FAX:* (02) 6477411. *Cables:* Ports Jeddah. *Contact:* Mr. Mustafa M. Hariri, Acting Director General.

AGENT: Gulf Agency Company Saudi Arabia, Algosaibi Centre, Andlus Street, Al Hamra, P.O.B. 2038, Jeddah 21451, Saudi Arabia. Ship-Shore traffic via Jeddah Radio/HZH. Tel: 6531964, 6531968, 6535060, 6535056. After office hours: 6603029. Telex: 601047 ("Gaship Sj"). Fax: 6510860 stating "For GAC Jeddah". Cables: "Gulfagency", Jeddah.

JU'AYMAH: 26.56 N. 50.03 W. (See Plan)

ALSO SEE "RAS TANURA – SECTIONS (A) AND (B)".

(A) CRUDE OIL TERMINAL.
(B) LPG TERMINAL.

(A) CRUDE OIL TERMINAL.

This section gives specific information regarding Ju'aymah Crude Terminal which includes the Single Point Mooring Berths and is to be read in conjunction with "Ras Tanura – Part A".

LOCATION: The Ju'aymah Crude Terminal loading facilities are located approximately 18 miles N.N.W. of the Ras Tanura Terminal and 7 miles offshore.

These facilities consist of an oil metering and manifolding platform, a terminal control platform and 6 Single Point Mooring Berths. The oil metering and manifolding platform is in the following position: Lat. 26° 54.8′ N., Long. 50° 01.2′ E.

Ju'aymah Crude Terminal: The terminal is an ARAMCO crude oil and fuel bunker loading facility designed for loading and topping-off deep draft tankers. The terminal consists of the following facilities:

An Oil Platform (130 ft. by 390 ft.) located in 50 ft. (15.24 m.) of water. This platform receives crude oil and fuel bunkers from the storage tanks on the shore to the S.S.W.

The platform is well lighted with general purpose lighting. In addition 1 fixed white light has been established on each corner of the platform with a range of visibility of approximately 5 miles. A Control Platform (70 ft. by 70 ft.) is located 150 ft. North of the oil platform and connected to it by a walkway bridge. This platform is marked by a fixed red aircraft warning light.

Single Point Mooring Buoys have been established between 1 and 4 miles to the N.E. of these platforms. Crude oil and bunkers are received at each buoy.

Each buoy is fitted with 2×24 in. floating crude loading hoses with 16 in. or 20 in. tail hoses and 1×12 in. floating bunker loading hose. The length of the string is approximately 1,100 ft. (335 m.).

When an SPM is removed ashore for maintenance, a marker buoy may be installed to indicate the position of the underwater pipe-line and anchor chains.

PILOTAGE: *Pilot Boarding:* A Pilot/Mooring Master and an SPM Representative will board inbound vessels by helicopter if possible as advised.

They will advise the Master on all manoeuvres and operations relative to berthing, connecting and disconnecting hoses and unberthing. They will also provide all communications between vessels and shore during cargo loading and be the ARAMCO Representative with respect to safety observation and other requirements.

These two persons will remain on board the vessel throughout the loading and unmooring and suitable accommodation for them is to be provided.

Dependent on weather and other conditions, vessels will be advised by Ju'aymah Pilot/Radar to proceed to a position approximately 8 miles E.N.E. of Ju'aymah Platform and make a lee for the Pilot to board or for the launch carrying mooring and hose connecting equipment.

Pilot Boarding Position: Lat. 26° 53.5′ N., Long. 50° 05.6′ E.

INBOUND TRAFFIC PROCEDURE: See "Ras Tanura – Part B" – Traffic Regulations.

Vessels Proceeding Direct to Ju'aymah Crude Terminal: As per "Ras Tanura – Part A" – Navigation – Inbound Traffic Procedures to the Entry Buoy and to a position approximately 2.5 miles N.E. of Buoy 3A.

According to advice from Ju'aymah Radar should turn into the Ju'aymah Pilot Boarding Area to anchor or be berthed on arrival.

Vessels Proceeding from Northern Holding Anchorage to Ju'aymah Crude Terminal: Should enter the Separation Scheme under advice of Ju'aymah Radar and proceed as above.

Max. Draft in Arrival Channel: The max. draft is 70 ft. (21.34 m.) for vessels proceeding along the Inward Channel of the Ras Tanura Separation Scheme bound to Ju'aymah Crude Terminal.

Vessels Proceeding from Ras Tanura Terminal to Ju'aymah Crude Terminal: The vessel should then proceed, exercising due diligence, through the Caution Area and with the advice of Ras Tanura Port Radar and Ju'aymah Radar into the Ju'aymah Pilot Boarding Area either to anchor or be berthed on arrival.

Prohibited Area: No vessel shall enter the Prohibited Area without a Pilot on board. Under no circumstances shall anchors be used in the vicinity of the berths due to the existence of numerous submerged pipelines.

ANCHORAGE: The area West of Beacon No. 3 is used as a final holding anchorage and for vessels awaiting arrival clearance, cargo clearance, sailing documents, etc.

Vessels must leave the inbound route to the berths clear when selecting an anchoring position in this area.

RESTRICTIONS: Ships securing to Smit Mooring Brackets at Ju'aymah SPM Terminal will only be berthed in wind speeds of less than 25 m.p.h. Additionally, this parameter may be further reduced, at the discretion of the Berthing Pilot, should he consider that other forces, i.e. sea state, be prejudicial to a safe mooring operation.

MAX. SIZE: Max. arrival draft 21.34 m. No limitation on sailing.

HEALTH: *Pratique and Quarantine:* At Ju'aymah Crude Terminal, no person is permitted to board a vessel, nor is she permitted to proceed to the berth until inward clearance formalities have been completed and the Authorities have visited the vessel. Vessels topping off from Ras Tanura Terminal will already have completed these formalities.

However, during adverse weather conditions permission may be given by Government Officials for the Pilot to board and moor the vessel before clearance is given. If this occurs and weather conditions continue to preclude clearance during the loading operation, the vessel must when unmoored anchor and wait for clearance formalities to be completed.

RADIO: *Underway:* At all times when underway in the Arrival Channe and Pilot Boarding Area, vessels must maintain contact with Ju'aymah Radar on VHF Channel 13 and with Ju'aymah Pilots on Channel 16 o one of the following VHF working Channels: 10, 11, 12, 13, 14.

At Anchor: A good listening watch should be maintained on VHF Channel 16.

Vessels will be called by Ju'aymah Pilots or Ju'aymah Radar with berthing and other information and instructions.

Under Pilotage and at Berth: The Pilot/Mooring Master will carry a portable intrinsically safe multi-channel radio by means of which al communications regarding approach, mooring and cargo loading will be made. These radios are fitted with an emergency tag which activates an alarm at the Control Platform when removed.

He will also carry battery chargers for these radios during the vessel's stay in the terminal.

In addition, the vessel's VHF radio should be available on the bridge and in the Cargo Control Room for back-up communications.

BERTHING: *Preparations:* Line handling during mooring and unmooring is to be performed by the ship's staff under instructions of the Pilot Mooring Master.

Vessels assigned to the Ju'aymah Crude Terminal SPMs must be fitted as recommended in the OCIMF publication "Standards fo Equipment Employed in Mooring of Ships at Single Point Moorings".

Mooring to strops secured to bitts is not permitted.

During the approach, while mooring and while secured in the berth the vessel's anchors MUST be secured by stoppers to prevent accidental dropping with subsequent damage to the undersea pipe-lines and equipment.

Both port and starboard derricks should be rigged ready to lift the mooring and hose connecting equipment from the launch on either side A trolley should be available to transport this equipment about the vessel's deck.

The following vessel's equipment should be ready on forecastle head

(a) Two messenger lines 3 in. to 3.5 in. circumference (24 mm. to 28 mm. dia.) 500 ft. (150 m.) in length.
(b) Sledge hammer, large crowbar, large marlin spike, adjustable wrench/spanner.
(c) Bag of sawdust or sand.
(d) Large flashlight (for night mooring).

Procedure – Mooring:

(a) ARAMCO mooring and hose connecting equipment will be lifted aboard the tanker from the launch on either the port or starboard side by means of the ship's derrick.
(b) Ship's staff will prepare the forecastle head for the mooring operation at the instructions of the Pilot/Mooring Master.
(c) As the vessel approaches the berth, a mooring boat will bring the port hawser pick-up rope (10 in. circumference – 80 mm diameter) and make it fast to the messenger.
(d) At the boat's signal, the pick-up rope is hove on deck and by means of this, the chafing chain is lifted in the bow chock and to the mooring bracket.
(e) Under the direction of the Mooring Master, the chafing chain is secured in the vessel's mooring arrangement.
(f) Ease back on the pick-up rope until the weight is taken up.
(g) Repeat for the second mooring hawser.

Procedure – Unmooring:

(a) Take the weight of the mooring assembly on the pick-up rope using the windlass.
(b) Disconnect the chafing chain from the mooring arrangement.
(c) Slowly slack the pick-up rope until the support buoy is in the water and taking all of the weight of the chain.
(d) Pay out the pick-up line either to a mooring boat or as the ship clears the berth.

BERTHING FACILITIES: At the berths, cargo hose connections are 16 in. or 20 in. and bunker hose connections are 12 in. arranged to be connected abaft the crude loading connections. All flanges are 150 ASA

In order to avoid delays, vessels should have reducers ready at the port side manifold to adapt to these sizes. Maximum crude loading rate is 130,000 bbls.p.h., and maximum bunker loading rate is 5,000 bbls.p.h

Berth No.	*Lat.* N.	*Long.* E.	*Minimum Water Depth* (ft.)	(m.)
31	26° 55.6′	50° 02.4′	93	28.35
32	26° 56.49′	50° 02.15′	–	–
33	26° 57.0′	50° 02.7′	103	31.39
34	26° 56.6′	50° 04.3′	124	37.79
36	26° 55.6′	50° 04.9′	122	37.19

Note: The following crudes are available at Ju'aymah Crude Terminal Arabian Light Crude, Arabian Medium Crude, Arabian Heavy Crude Arabian Berri Crude is NOT available.

LOADING: *Loading Hose Connection and Disconnection:* In order t secure the floating hoses to the vessel's manifold, the manifol arrangements must be as recommended in the OCIMF publication "Standard for Tanker Manifolds and Associated Equipment (May 1975 and "Tanker Manifolds and Associated Equipment (3rd Edition 1981)

Preparation – On the Port Side:

(a) Derrick rigged for maximum height and load lifting capaci (10 tons minimum for 16 in. hoses and 15 tons minimum for 20 i hoses). If possible, the topping lift of the derrick shall be on i own winch.
(b) Two 16 in. or 20 in. 150 lb. ASA flange connections on selecte cargo manifolds and one 12 in. 150 lb. ASA flange on the aft bunker manifold.
(c) Drip trays, sawdust or sand, dispersant and fire fightin equipment in position.
(d) The following are normally supplied by ARAMCO but the presence will prevent delays in case of deficiency or malfunctio
Chain block (not normally supplied), Handy Billy, heaving lin spare spanners, spare wire strop, spare bolts.

Procedure – Connecting Hoses: Connecting and disconnecting of cargo and bunker hoses is to be carried out by ship's staff under instruction of Mooring Master.

(a) Lower derrick hook to the mooring launch which will connect it first of all to the forward hose.
(b) Heave up until the blank flange is level with the hose rail.
(c) Unshackle hose snubbing wires and secure guy ropes to the flange.
(d) Continue heaving up the hose as directed by the Mooring Master.
(e) Secure snubbing wires in a manner to facilitate possible slackening as directed.
(f) Lower the hose to bring the hose flange to the manifold and check the alignment of the flanges.
(g) Lower the hose onto the drip tray and remove the blank flange.
(h) Using the nylon band sling supplied, lift the hose and connect it to the manifold. Never use a wire strop for lifting a cargo hose.

USE ALL OF THE BOLT HOLES AND A GASKET.

The second cargo hose and the bunker hose are connected in the same way.

After all hoses are connected, the cargo hoses must be supported in way of the vessel's side rail by means of the nylon bands supplied and the vessel's derrick.

Procedure – Hose Disconnecting: On completion of loading cargo or bunkers manifold valves must NOT be closed until the Mooring Master directs. This is important for line clearing.

(a) Strop the after hose to the derrick hook, take the weight and disconnect the flange.
(b) Replace the blank flange using *all* of the bolts and a new gasket. Tighten the bolts in sequence to avoid uneven tension on the flange.
(c) Lower hose to deck and secure.
(d) Repeat with forward hose and wait until backfilling of the hoses is complete.
(e) Bunker hose should be disconnected and securely blanked as soon as bunkering is completed and secured on deck until cargo loading is completed. It should be lowered into the water during backfilling of the cargo hoses.
(f) When backfilling is completed, secure the derrick hook to the lifting hook of the after hose and raise the hose until the weight is taken off the snubbing wires.
(g) Release the snubbing wires, lower the hose to rail level and shackle the snubbing wire to the flange.
(h) Lower the hose end into the water and trip the hook to release.
(i) Repeat for the forward hose.

Return all ARAMCO tools and equipment to the steel basket, stow in a seamanlike manner and prepare for lowering to the launch on either the port or starboard side dependent on weather conditions.

Loading Procedures: The loading operation will be controlled by radio voice communications between the Mooring Master on the loading vessel and the Control Platform.

All operations including switching of tanks and topping-off must be directly and personally supervised by a ship's officer. Upon being informed by the loading vessel's personnel that the vessel is ready to start loading, the Pilot/Mooring Master will request the loading to proceed according to the previously agreed plan with respect to start-up rates, maximum loading rates and topping-off rates.

Under no circumstances is the flow to the vessel to be stopped by the vessel whilst switching tanks, etc. Need for emergency shutdown of loading aboard the vessel must be communicated by radio from the loading vessel to the Control Platform.

In the event of failure of the radio communications system, the vessel will sound five long blasts on the vessel's whistle followed by 1, 2, 3, 4, 5 and 6 short blasts for a vessel at Berth 31, 32, 33, 34 or 36 respectively.

Loading operations will be stopped and will not be resumed until communications have been re-established.

It is the responsibility of the vessel to advise the Mooring Master to shut down cargo and bunker loading when the vessel's cargo and bunker requirements are met.

Cargo Calculations and Release: The American system of cargo measurement in Barrels with temperatures in fahrenheit degrees according to the ASTM-IP is used by ARAMCO and the Saudi Arabian Government for cargo measurement purposes. Ship's cargo loaded figures should be available in these units. Generally, if the difference between average normal ship measurement and official cargo measurement is satisfactory the ship will be released to sail, and the Pilot/Mooring Master will leave after unmooring is complete. If the ship/shore difference is large, the Pilot/Mooring Master will survey the cargo according to laid down ARAMCO inspection procedures after unberthing and report his findings to ARAMCO Terminal Planners. The ship is required to stay until released by ARAMCO if ship/shore difference occurs.

Departure: Upon completion of unmooring, the vessel will make a lee for the mooring and hose connecting equipment to be discharged into the launch on either port or starboard side. Depending upon conditions, the Pilot/Mooring Master and SPM Representative may leave on the launch or later by helicopter. A separate departure channel has been provided for all vessels using the Ju'aymah facilities. The vessel will proceed via the Departure Channel between Beacon J1 and Buoy J2 and thence towards the Exit Buoy JE. The vessel should then set an Easterly course North of JD Buoy to the Ju'aymah Light Float.

EMERGENCY PROCEDURES: In addition to the general principles described in Part A of "RAS TANURA", the following apply to Ju'aymah Crude Terminal:

(a) Should a fire or explosion occur at a buoy mooring, the Oil platform or Control platform, all cargo operations will be stopped and all vessels should stand by to disconnect and unmoor when so instructed by the Pilot/Mooring Master or Port Captain, or when the need to take such action becomes self-evident.

(b) The local signal for emergency is a continuous ringing of the vessel's alarm bells supplemented by more than 6 short blasts followed by 1 long blast of the vessel's whistle. Assistance may be summoned on VHF Channel 16. Location, nature of emergency and type of assistance required should be given. (See "RAS TANURA" Part B – EMERGENCY SIGNAL).

BALLAST: *Arrival Ballast Condition:* Due to the exposed location at the Ju'aymah berths, tankers should arrive with sufficient clean water ballast for safe handling having due regard to the existing sea and weather conditions. Unless otherwise instructed, vessels must arrive with propellers just covered and trimmed not more than 8 ft. (2.44 m.) by the stern.

GENERAL: *Boarding Vessels at Berth:* Small craft are not allowed in the vicinity of the vessel and no one is permitted to board or leave a vessel while cargo loading operations are in progress. Should it become urgent to board or leave for any reason during cargo loading, the Pilot/Mooring Master must be contacted to request permission to shut down the cargo loading operation while the small craft is alongside.

S.P.M. Maintenance: In addition to the mooring boats a larger maintenance vessel works on hoses, buoys and sub-sea systems.

In bad weather, this work is extremely difficult and involves possible danger to personnel.

For this reason, vessels are requested to give as much assistance as possible by taking seamanlike care of the mooring and hose equipment and returning it to the water ready for the next tanker and in such condition as they would like to find it.

Hose/hawser maintenance is expensive and if ARAMCO judges that a vessel has misused any hose or hawser the vessel will be liable for the expenditure incurred in making repairs.

(B) LPG TERMINAL

This section gives specific information regarding Ju'aymah LPG terminal loading facilities and is to be read in conjunction with "Ras Tanura" – Part A.

PILOTAGE: *Pilot Boarding Position:*

In normal conditions of weather and traffic, an arriving vessel will be advised to proceed from the Ju'aymah Pilot Boading Area by a route South of Buoy J4 to a position 1.5 miles S.E. of SPM 36 to make a lee to pick up the Harbour Pilot. The Pilot will then advise on manoeuvring the vessel to the assigned berth.

Harbour Pilot and Assistant Harbour Pilot will remain on board to assist with efficient turnaround of vessel and will require accommodated and meals.

INBOUND TRAFFIC PROCEDURES: See "Ras Tanura – Part B" – Traffic Regulations.

Vessel Proceeding Direct to Ju'aymah LPG Terminal: As per "Ras Tanura – Part A – Navigation – Inbound Traffic Procedures" to the Entry Buoy and make for a point approximately 2.5 miles N.E. of Buoy 3A. Under advice of Ju'aymah Pilots and Ras Tanura Port Radar turn into the Ju'aymah Pilot Boarding Area to anchor or to be berthed on arrival.

Vessel Proceeding from Northern Holding Anchorage to Ju'aymah LPG Terminal: Enter the traffic separation scheme under advice of Ras Tanura Port Radar and Ju'aymah Pilots and proceed as above.

Vessel Proceeding from Ras Tanura Terminal to Ju'aymah LPG Terminal: Should depart Ras Tanura Terminal and follow the departure channel toward the mid-channel marker RT 1. The vessel should pass through the Caution Area with the advice of Ras Tanura Port Radar and Ju'aymah Pilots into the Pilot Boarding Area either to anchor or to be berthed on arrival.

ANCHORAGES: *Ju'aymah Pilot Boarding Area:* The area West of No. 3 Beacon is used as a final holding anchorage and for vessels awaiting arrival clearance, cargo clearance, sailing documents, etc. as for Ju'aymah Crude Terminal. Ships must only use this anchorage when directed to do so by Ju'aymah Pilots and must leave the inward route to the SPM berths clear when selecting an anchoring position in this area.

Ju'aymah LPG Anchorage: This anchorage has been laid out approximately 2.5 miles N.E. of the loading pier to provide a tank cooling area for gas tankers. The depth of water varies between 16 m. and 30 m. (52 ft. and 98 ft.) and holding ground is fair.

MAX. SIZE: Max. arrival draft 16.37 m. Max. sailing draft 23.00 m.

RADIO: *General:* The onshore production facilities of the LPG Terminal are known as the NGL (Natural Gas Liquids) Plant, etc. This name is often used in reference to the Terminal. No LNG (Liquefied Natural Gas) is exported from the Terminal.

Underway: In the arrival channel, vessels must maintain contact with Ju'aymah Radar on VHF Channel 13.

At Anchor: A good listening watch should be maintained on VHF Channel 16 for information and instructions from any of the following sources:–

(a) Ras Tanura Pilots, (b) Aramco Terminal Planners,
(c) Ju'aymah Pilots, (d) Ju'aymah Radar.

Under Pilotage: The Harbour Pilots carry portable, intrinsically safe radios for contact with tugs which operate on Aramco dedicated mooring frequencies. In addition, the ship's main VHF radio should stand by on Channel 13 for back-up communication.

At Berth: A portable intrinsically safe radio will be supplied to the vessel by the terminal. This radio operates on a UHF frequency dedicated to each berth by means of which constant communication can be maintained during loading. This radio is fitted with a pull-off tag which, when removed, activates an alarm on the radio console in the Control Room and the Pilot Office.

BERTHING: *Mooring Procedure:* Mooring boats are not used at Ju'aymah LPG Terminal. Vessels should have heaving lines ready to take the shore messenger after landing alongside. The messenger is then made fast to the vessel's mooring line which is then hove ashore by a capstan. Heavy wires should be sent one at a time and ropes two at a time. Jetty crews are continuously on duty to handle mooring lines but will not handle mooring lines aboard vessels.

BERTHING FACILITIES: The 2 loading berths are situated on opposite sides of a platform aligned 335° true compass bearing. Berth 51 being the East (outer) berth and Berth 52 being the West (inner) berth. Minimum water depth at the berths is approximately 78 ft. (23.8 m.) at ISLW (Indian Springs Low Water). There are 4 breasting dolphins at each berth and 6 mooring dolphins. The tower crane located in the centre of the platform is used for moving operational and maintenance equipment. RLPG is loaded via 16 in. LPG loading arms. Maximum loading rate is 15,000 bbls.p.h. per arm. Therefore combined maximum for 2 grades is 30,000 bbls.p.h. Each berth is equipped with 4 LPG loading arms each of which may be used for butane liquid, propane liquid or vapour return. The loading arm connections can be adjusted to fit 12 in., 14 in. or 16 in. 150 ASA flanges. All LPG loading arms are fitted with quick connect/disconnect hydraulic couplers (QCDC). Each LPG loading line has an associated circulation return line. The bunker loading connections can be adjusted to fit 6 in. or 8 in. 150 ASA flanges. One bunker/black diesel loading arm is located at each side of the LPG loading station.

Both fuel oil bunkers and marine diesel oil are available at the Ju'aymah LPG berths. The nominal loading rate for fuel oil bunkers is 5,000 b.p.h. and for marine diesel oil is 600 b.p.h. These can be loaded through both of the 8 in. loading arms located on either side of the LPG loading station.

LOADING: *Trim and Stability:* During loading and deballasting operations, the vessel should at all times be adequately stable and in good trim to leave the berth at short notice in the event of an emergency. Excessive lists and trims are not permitted.

Loading Arm Connections: Jetty crews are on duty continuously to handle loading arms and make all connections and disconnections. All loading connections are equipped with electrical insulated flanges therefore ship to shore bonding wires are not required.

Due to the size and bulk of the QCDC couplers, a clear area around each manifold flange of at least 60 cm. (24 in.) is required. The vessel should have suitable 150 ASA reducers and spool pieces fitted to the manifolds it is intended to use.

Loading Procedures: Vapour line must be connected prior to loading LPG cargo of coolant. All excess vapour which cannot be handled by the vessel's recovery equipment will be metered to flare. It is the responsibility of the vessel to advise the jetty operators to shut down cargo and bunker loading when the vessel's requirements of cargo and bunkers are met.

Special regulations govern the acceptance and loading of gas tankers in the Port of Ras Tanura which includes Ju'aymah LPG Terminal.

Cargo Calculations: The American system of cargo measurement in BARRELS with temperatures in fahrenheit degrees according to the ASTM-IP is used for cargo measurement at this Terminal. An independent Inspection Agency is appointed by the Offtaker/Buyer to determine cargo quantity loaded aboard.

Departure: Upon completion of loading, cargo calculation and disconnecting cargo arms, the vessel will be unmoored and the Harbour Pilot will disembark. The vessel will then be free to leave the Port via the Ju'aymah Departure Channel if Early Departure Procedure is used and all relevant documentation is on board. Otherwise, the vessel will proceed to the Ju'aymah Pilot Boarding Area or Cooling Anchorage to await document delivery by the Agent, at the direction of the Pilot.

Contact with Ju'aymah Radar must be maintained on VHF Channel 13 when in the Ju'aymah Crude Terminal Approach Area.

GENERAL: *Emergency Procedures:* In addition to the general principles described in Part A of "RAS TANURA" the following apply to Ju'aymah LPG Terminal.

In the event of a fire or explosion at the pier or on board a vessel which is berthed alongside at the Terminal, the local alarm signal will be a series of 10 short blasts on the ship's whistle at which an Emergency Shutdown system will be activated to immediately stop all cargo loading to vessels at the berths. (See "RAS TANURA – Part B" EMERGENCY SIGNAL). In case of a situation requiring urgent removal of a ship from the berth, a system of sequential automatic loading arm disconnection is fitted. This system will only be activated after very careful evaluation of the situation by all parties.

Duty Harbour Pilot and Tugs: Whenever a vessel is at one of the berths at the LPG Terminal, a Harbour Pilot will stand by on the loading platform in constant communication with the vessel(s) and jetty staff by means of the dedicated UHF radios. Pilots on duty for 8 hours (0600 – 1400, 1400 – 2200 and 2200 – 0600 hrs.).

Tugs stand-by moored in sight of both loading berths.

AUTHORITY: Arabian American Oil Company, Port Control Centre, North Pier, Ras Tanura, Saudi Arabia. *Tel:* 37250. *Contact:* S. M. Al Shibar, Port Captain – Terminal Marine Piloting Division.

AGENT: Gulf Agency Company Saudi Arabia, P.O.Box 72, Rahima, 31941, via Dhahran, Saudi Arabia. Cables: "Confidence" Ras Tanura, Ship-Shore Traffic via Dammam Radio/HZG. Telex: 851011, 851059 ("GAC RT SJ") Tel: 6673180 (daytime only), 6670632, 6670636 (24 hour service). After office hours 6670066. Fax: 6672248.

JUBAIL: 27.01 N. 49.40 E. (See Plan

ALSO SEE "GENERAL" BEFORE FIRST PORT.

(A) COMMERCIAL PORT.
(B) KING FAHD INDUSTRIAL PORT IN JUBAIL.

(A) COMMERCIAL PORT.

LOCATION: The Jubail Port Complex is located on the East Coast the Kingdom of Saudi Arabia, approximately 80 km. North of Damman The Port Complex comprises 2 ultramodern facilities: The Commercia Harbour to the South and The King Fahd Industrial Harbour to the Nort These harbours have separate entrances and are under separate po managements.

PORT LIMITS: The boundaries of the harbour and anchorages of Kin Fahd Industrial Port at Jubail and the Commercial Port of Jubail coincid and are given below:

Harbour Boundaries:

All Port property enclosed by a fence following the shore line an extending seawards to a line running between the following points:

Lat. 27° 00′ 00″ N., Long. 49° 40′ 00″ E.
Lat. 27° 00′ 00″ N., Long. 49° 43′ 12″ E.
Lat. 27° 03′ 00″ N., Long. 49° 44′ 00″ E.
Lat. 27° 04′ 10″ N., Long. 49° 46′ 00″ E.
Lat. 27° 11′ 10″ N., Long. 49° 53′ 45″ E.
Lat. 27° 14′ 10″ N., Long. 49° 59′ 00″ E.
Lat. 27° 16′ 00″ N., Long. 49° 58′ 00″ E.
Lat. 27° 17′ 45″ N., Long. 49° 55′ 30″ E.
Lat. 27° 15′ 20″ N., Long. 49° 51′ 30″ E.
Lat. 27° 12′ 50″ N., Long. 49° 52′ 30″ E.
Lat. 27° 09′ 00″ N., Long. 49° 46′ 00″ E.
Lat. 27° 04′ 40″ N., Long. 49° 44′ 00″ E.
Lat. 27° 07′ 00″ N., Long. 49° 44′ 00″ E.
Lat. 27° 07′ 00″ N., Long. 49° 41′ 00″ E.
Lat. 27° 05′ 43″ N., Long. 49° 41′ 00″ E.
Lat. 27° 04′ 00″ N., Long. 49° 36′ 30″ E.

DOCUMENTS: On arrival at the Port, the Master of the vessel sha present or make available for inspection the following papers an documents:

Log Book.
Registration Certificate.
Classification Certificate.
Load Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificate.
Cargo Gear Certificate.
Marine Health Declaration.
Vaccination List.
Derat Certificate.
Clearance from Last Port of Call.
Israel Boycott Declaration.
Ship's Stores List.
Grain Shipping Certificate (if the vessel is carrying a grain shipment
Mail Transport Documents in accordance with the International Posta Treaty (if any mail is carried aboard).
5 copies of the Crew List.
5 copies of the Passenger List.
2 copies of the List of Personal Effects of Crew and Passengers.

To obtain Port Clearance the Master of the vessel shall present make available for inspection the following papers and documents Port Management:

Log Book.
Registration Certificate.
Classification Certificate.
Load Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificate.
Port Stevedore Outturn Report.
Receipt for payment of Custom's Duties.
Shipping Note and Cargo Manifest for any cargo loaded.

Cargo papers and documents: The following papers and document must be submitted to the Port Management not later than 48 hours prio to arrival:

5 copies of the Cargo Manifests in English.
10 copies of the Original Manifests translated into Arabic.
2 copies of the Cargo Stowage Plan.
2 copies of the Hatch List or Bay Plan.
2 copies of the List of Dangerous/Hazardous Cargo for Discharge.
2 copies of the List of Dangerous/Hazardous Cargo in Transit.
2 copies of the List of Heavy and/or Awkward Cargo.
2 copies of the List of any Wine, Spirits and Narcotics, or in th absence of which a "Nil" return.
A Declaration of Type of Reefer Cargo.
An Application for Discharge Permit.

PILOTAGE: Pilotage is compulsory for all vessels of more than 150 n. Pilots available 24 hours a day, 7 days a week. Pilots will board in th vicinity of No. 17 Channel Buoy. Port Control Station is continuous manned, to be contacted on Channel 16, vessels requiring a Pilot sha use the International Signals. Notice of ETA refer to Rules an Regulations for Saudi Arabian Seaports, Part 1, Para 2.

Pilot Boarding Position: Lat. 27° 07′ 00″ N. Long. 49° 47′ 00″ E

RESTRICTIONS: The Port can be approached 24 hours a day.

MAX. SIZE: Berths No. 1 to 8: Max. acceptable draft 11.4 m.
Berths No. 9 to 16: Max. acceptable draft 13.6 m.

ANCHORAGES: There are 3 anchoring places: Freighter Anchorage, Tanker Anchorage and Explosives Anchorage, areas between the following buoys and positions:

Freighter Anchorage:		
Light Buoy "17/ANCH"	Lat. 27° 06′ 00″ N.	Long. 49° 45′ 19″ E.
"ANCH 4"	Lat. 27° 08′ 20″ N.	Long. 49° 45′ 11″ E.
"ANCH 3"	Lat. 27° 10′ 39″ N.	Long. 49° 47′ 00″ E.
"15/ANCH"	Lat. 27° 10′ 35″ N.	Long. 49° 50′ 00″ E.
Tanker Anchorage:		
Light Buoy "13/ANCH"	Lat. 27° 12′ 47″ N.	Long. 49° 52′ 15″ E.
"ANCH 2"	Lat. 27° 15′ 28″ N.	Long. 49° 51′ 33″ E.
"ANCH 1"	Lat. 27° 17′ 25″ N.	Long. 49° 55′ 15″ E.
"11/ANCH"	Lat. 27° 16′ 15″ N.	Long. 49° 57′ 36″ E.
Explosives Anchorage:		
Light Buoy "EXPL 1"	Lat. 27° 02′ 00″ N.	Long. 49° 50′ 22″ E.
"EXPL 2"	Lat. 26° 58′ 19″ N.	Long. 49° 51′ 02″ E.
"EXPL 3"	Lat. 26° 56′ 49″ N.	Long. 49° 52′ 47″ E.
"EXPL 4"	Lat. 26° 55′ 41″ N.	Long. 49° 51′ 35″ E.
"EXPL 5"	Lat. 26° 57′ 32″ N.	Long. 49° 49′ 20″ E.
"EXPL 6"	Lat. 26° 59′ 50″ N.	Long. 49° 49′ 56″ E.

HEALTH: Quarantine Free Pratique as per International Rules and Regulations. Health Officer will board when the ship is moored.

VHF: Jubail Port Control continuous watch is maintained on Channel 16. Working on Channel 17. Radar Surveillance Channels 64 and 66.

RADAR: Surveillance and Control System Operational.
Position: Lat. 27° 11′ 39″ N., Long. 49° 57′ 26″ E.
Structure: Grey circular concrete tower with white radar scanners atop.
Height: 43 m. from ground to radar antenna.
Light: Fixed red warning light atop antenna.

Continuous radar surveillance is maintained by the Saudi Ports Authority over the whole extent of the modified Jubail Ports Approach Channel. All ships should inform Jubail Ports Control on VHF Channel 66 prior to entering or crossing this approach channel.

TUGS: Tugs ranging from 1,500 h.p. to 5,500 h.p. are stationed at Jubail, mooring launches assist in berthing manoeuvres. All tugs are fitted with fire fighting equipment.

BERTHING: The following categories of berth with a draft range from 12.0 m. to 14.0 m. are available — General Cargo, Multi-Purpose, Container Terminal, Ro-Ro for stern and quarter ramp vessels.

Adequate coverage and open storage space is available in the form of warehouses, transit sheds, container terminal with plug-in facilities for reefer and containers/trailers (480V, 60 Hz) Ro-Ro terminal, container freight station, vehicle parks, general cargo storage, empty container storage area.

Cargo Handling Facilities:
Forklifts ranging up to 35 tons.
Head trucks and tow motors.
Trailers.
Chassis and cargo dollies of up to 100 tons.
Weighbridges of 60 tons capacity.

Cranes:
Mobile Cranes up to 100 tons.
One crane 200 tons capacity.

Specialised Cargo Handling Facilities:
Container Gantry Cranes 30.5 tons under spreader.
Transtainers of 30.5 tons under spreader.
Container chassis.

STEVEDORES: First shift: 0700 – 1900 hrs., second shift: 1900 – 0700 hrs., 7 days a week. Sufficient gangs available to work 4 hatches on every vessel.

Minimum discharge rates breakbulk cargo: 1,000 tons per berth per day. Container terminal: 20 TEUs per workable crane per hour.

MEDICAL: Full hospital facilities available, arranged by the Agents.

DENSITY: 1030.

FRESH WATER: Available, arranged through Agent.

FUEL: Fuel oil, marine diesel and marine gas oil are available, arranged through Agent.

CONSULS: American Consul General at Dhahran.

SURVEYORS: International Marine Surveyors and Classification Society Surveyors are on call from Dammam.

GANGWAY/DECK WATCHMEN: The Coast Guard will station a guard at the gangway to prevent unauthorised boarding and landing.

CUSTOMS ALLOWANCES: Possession and/or consumption of alcoholic beverages including beer, table wines and liquors is strictly prohibited in Saudi Arabia. All alcoholic beverages are to be under lock and key during vessel's stay in port.

No restrictions on tobacco and cigarettes.

HATCHES: Opening and closing is carried out by stevedores.

AIRPORT: Dhahran Airport 90 km.

TIME: Local time is GMT plus 3 hours. All ETAs and other messages should be made in local time.

HOLIDAYS: No holidays apply for stevedores.

TELEPHONES: Available.

SHORE LEAVE: To be arranged through Agents.

REGULATIONS: See "Rules and Regulations for Seaports" issued by the Co-operation Council of the Arab States in the Gulf.

PORT PROCEDURES: Also see "General" before first port.

Notification to Jubail Port Management:

1. The Owners/Charterers of vessels bound for Jubail with cargo must give preliminary notice of the vessel's intended arrival to the Port Management by telex or cable either directly or through their Agents on arrival at the first or sole loading port, before loading commences. ETA and estimated quantity of cargo by type must be given with the preliminary notice.

2. On completion of loading cargo the following information must be sent to the Port Management by telex or by cable either directly or through the Agent.

(a) Vessel's name.
(b) Flag.
(c) Length overall.
(d) Expected draft on arrival.
(e) ETA.
(f) Cargo particulars, including nature, weight, tonnage and stowage by hatches.
(g) Any dangerous cargo being carried for other destinations.
(h) If dangerous cargo is being carried, the quantity and class in accordance with the IMDG Code whether to be discharged or in transit.
(i) Expected requirements for bunkers and water.
(j) Name of vessel's Agent.

3. A further notice of ETA is to be sent 5 days, 2 days and 1 day prior to arrival at the port.

Vessels Failing to give Required Notification:

Any vessel failing to comply with the requirements under paragraph 1, above, or arriving later than expected under the revised ETA, may lose its berthing registration.

Cargo Papers and Documents:

1. The following papers and documents must be submitted to the Port Management no later than 72 hours (for vessels with more than 200 Bills of Lading) or 48 hours (other vessels).

Prior to arrival:
(a) 5 copies of the Cargo Manifests for discharge, including any additions or amendments in English:
10 copies of the original Manifests translated into Arabic.
(b) 2 copies of the Cargo Stowage Plan.
(c) 2 copies of the Hatch List or Bay Plan.
(d) 2 copies of the List of Dangerous/Hazardous Cargo for discharge.
(e) 2 copies of the List of Dangerous/Hazardous Cargo in transit.
(f) 2 copies of the List of Heavy and/or Awkward Cargo which requires special equipment.
(g) 2 copies of the List of any Domestic Wine or Spirits or Cargo of such nature on the vessel and its location or, in the absence of which, a nil return.
(h) A Declaration of Type of Reefer Cargo.

2. All copies of the Manifests must be taken from the Master Manifest.

3. The List of Dangerous/Hazardous Cargo has to show:
(a) The technical name.
(b) The IMDG Class and UN number.
(c) The quantity of each consignment.
(d) The location on board respectively in each container or on each trailer or in each barge.

4. Non-compliance will lead to penalties and/or fines.

General Regulations for Cargo Stowage and Handling:

1. The stowage of cargo bound for ports in the Kingdom of Saudi Arabia must be arranged to ensure simultaneous and optimum rate of discharge from the maximum numbers of hatches compatible with the requirements of sea-worthiness.

2. Where practicable all general and bagged cargo of uniform type and size is to be stacked and secured on pallets to facilitate quick discharge.

3. Bundled steel, profile iron, rebars, etc. shall be fitted with slings or lifting points suitable for multiple handling.

4. Steel sheets shall be strapped and stacked in bundles of approx. 2 tonnes each. Wooden bearers and/or spacers shall be used in loading the bundles to facilitate discharge.

5. Masters and shipping Agents are to instruct their stevedoring contractors at loading port to execute complete separation by Bills of Lading and the Manifest, and will be held responsible for non-compliance with this regulation.

6. No damaged package or item is to be discharged from any vessel, barge, pontoon or handling craft until it has been repaired or repacked in such a manner as to permit it to be handled without further loss or damage to contents of the package or the item itself.

(a) Where the original outer carton, box or bag is replaced, the replacement carton, box or bag shall be made in the same manner to allow it to be identified with the Bill of Lading and the manifest.
(b) The Port Management has the right, after notifying Customs, Authorities and ship's Agent concerned, to get rid of or destroy damaged good which may cause harm to installations or public health at the expense of the Owner of the goods or the ship's Agent.

Out-turn Report:

1. After completion of the discharging operation of a vessel the Port will furnish an out-turn report which shall indicate the cargo discharged.

The out-turn report must be signed by the ship or ship's Agent. Refusal to sign does not invalidate the report.

2. The ship's Agent has the option of conducting his own counter-tally. Where this is not done, the Port tally must be accepted. If an independent counter-tally is undertaken by the shipowner/Agent, the Port tally supersedes.

3. The cargo handed over into the custody of the Port shall remain at the entire risk and responsibility of the shipowner or its Agents or owner of the goods while on the port premises. The Port Management shall not be responsible in any way for any damage or loss that may occur to goods while within the port premises, whether such damage or loss was the result of accident or negligence on the part of the Owner of the goods or not, except in the case of wilful or gross negligence of port employees.

Storage of Goods:

1. The goods will be stored by the port in accordance with marks and numbers and in Bill of Lading lots in those areas stated in the out-turn report.

2. The Port may store suitable cargo in the open areas.

3. The Port may refuse the storage of goods if:
(a) There is insufficient space in the Port.
(b) The inherent properties of the goods render it dangerous or impossible.

4. Except for Customs purposes, no goods or materials stored in the Port are to be unpacked on Port premises without the special permission of the Port Management and Customs.

5. Consignees or their Agents shall remove their goods from the Port within 15 days of completion of discharge of the carrying ship or such period as may be announced by the Port Authority.

6. All cargo, irrespective of whether it has been cleared through Customs or not, which has not been removed from the Port within 15 days of completion of discharge of the carrying vessel may be moved to a special area. All such cargo may be sold by public auction 21 days after completion of discharge of the carrying vessel. These periods may be changed by an announcement of the Port Authority.

GENERAL:
Rubbish: It is strictly prohibited to throw any garbage, rubbish or food leftovers into the port and territorial waters of the Kingdom.

Every violation of the provision of this article shall cause the ship's Master to be penalised with a fine of up to 10,000 Saudi Riyals.

Vessels calling at Jubail Port will be supplied with plastic bags for garbage disposal.

The stevedore's Ship Superintendent must be contacted before the vessel has finished loading/discharging operations to take care of disposal of the bags.

The charge for garbage disposal service will be SR. 200 – per vessel per day, whether the vessel uses the service or not.

Documentation: Jubail Port Management will not permit any vessel to berth if documents have not been submitted as follows:

1. Manifest for vessels with more than 200 Bills of Lading at least 72 hours before arrival.

2. Manifest for all other vessels, Stowage Plans, Hatch List, etc., at least 48 hours before arrival.

Jubail Port Management will grant berthing permission subsequently not earlier than 72 hours after receipt of documents as per case 1 and not earlier than 48 hours as per case 2.

Vessels Discharging Cargo to Aramco Overseas Company (AOC) at the Commercial Port:

General Instructions and Communications Procedures.

1. When carrying vessel leaves loading port, details of tonnage aboard for discharge to AOC and tentative ETA at Jubail should be cabled/telexed to Saudi Arabia telex 601220 (ARAMCO SJ) commencing message "DHAMDDSB/AOC TRAFFIC DHAHRAN".

2. 10, 5, 3 days and 1 day prior to arrival, Master of carrying vessel must transmit updated ETA to "DHAMDDSB/AOC TRAFFIC DHAHRAN" via ARAMCO radio station (call sign HZY) which operates the following receiving schedules:

Frequency (kHz)	Approx. Range (miles)	Daily Operating Time (GMT)
500	500	Continuous
8480	2,000	0400 – 1800
12811	2,000	0600 – 1800
16960	2,000	1000 – 1100

3. Vessel must proceed initially to Jubail Pilot Boarding Anchorage, contacting the Jubail Harbour Master on VHF Channel 16 upon arrival. The anchorage is approached from Al-Jurayed (Lat. 27° 12′ N., Long. 49° 57′ E.) and is bounded by the following co-ordinates:

(1) 27° 03′ N., 49° 44.0′ E.
(3) 27° 03′ N., 49° 47.5′ E.
(2) 27° 04′ N., 49° 45.5′ E.
(4) 27° 02′ N., 49° 45.5′ E.

4. Pilotage is compulsory. Coast Guard Officials will normally board with the Pilot to commence initial clearance procedures. Customs and Health Authority will complete clearance once the vessel is alongside berth. For guidance the Port currently offers 14 m. water depth in the approach channel and 12 m. alongside the berths (by prior arrangement, it may be possible to utilise the container berths which offer a depth of 14 m. alongside).

5. The AOC Port Master at Jubail, or his authorised representative, will attend on board alongside berth, once clearance has been completed, in order to accept Notice of Readiness for the vessel. AOC staff will be available on board or at shipside throughout the discharge period to protect the safe discharge of AOC cargo and the AOC Port Master, or his representative, will again attend on board prior to sailing in order to countersign the Statement of Facts for the discharge.

6. AOC discharges at Jubail will generally be on a "free-out" basis but will be accomplished by the Ports Authority stevedores. Charges for stevedoring on AOC free-out cargo will be settled directly between AOC and Saudi Ports Authority. Agents must nevertheless notify the Ports Authority of expected vessel arrivals, booking berth space and stevedoring in accordance with the normal customs of the Port. In submitting Manifests for AOC cargo to be the Ports Authority, however, Agents should attach to each Manifest written advice that stevedoring charges will be settled by AOC.

7. Certain material to be discharged by AOC at Jubail will have been ordered from Saudi vendors and will be consigned "C&F Jubail Commercial Port Free-Out Discharge" with "Ultimate Consignee ARAMCO" included in the body of the Bill of Lading. Such cargo will be accepted by AOC at Jubail in exactly the same way as cargo consigned directly to AOC and Bills of Lading duly endorsed by the original consignee will be presented.

8. In addition to the normal tallying of cargo by the Ports Authority stevedores, AOC will be carrying out a counter-tallying operation in their own interest. This will be aimed at eliminating the possibility of shortlanding, and recording the factual circumstances of cargo damage and at prompt and accurate reconciliation of discharged and manifested quantities. The co-operation of all Masters and Agents is sought in this activity, particularly in the countersigning of any relevant damage or out-turn reports.

9. All requirements stated in this Notice are those of AOC and are *in addition* to any other procedures required by the Saudi Ports Authority. Any Saudi Ports Authority requirements mentioned herein are f guidance only and should be verified with Saudi Ports Authority.

10. Direct enquiries on operational matters to the Termin Operations Co-ordination Desk or, failing a reply, to the Assista Superintendent. Address enquiries on policy matters to the Assista Superintendent or, in his absence, to the Superintendent. Local liais at Jubail Commercial Port will be handled by the AOC Port Master his deputy who will also handle all *urgent* enquiries at night, weeken and holiday periods. Telephone connection to the AOC Port Office expected in the near future.

11. Until further notice, AOC will be handling only duty exempt carg through Jubail. Cargo which is dutiable, or subject to import perm restrictions, will normally be routed to Dammam. Exceptionally, if isolat dutiable consignments are inadvertently laden to Jubail instead Dammam, they will generally be handled at Jubail. Similarly sm shipments of duty exempt cargo consigned in error to Dammam w generally be handled at that port. It should no longer be necessary und normal circumstances, therefore, for any cargo to be diverted discharge to a port other than the one to which it was originally lade

AUTHORITY: Saudi Arabia Ports Authority, Port of Jubail, P.O.Box 27 Jubail, Kingdom of Saudi Arabia. *Tel:* (03) 361-0600. *Telex:* 8310 Jubpt Sj. *FAX:* (03) 361-3337. *Cables:* Ports Jubail. *Contact:* Mohamm S. Al-Muhanna, Port Director General, Jubail Port Management.

(B) KING FAHD INDUSTRIAL PORT IN JUBAIL.

LOCATION: Lat. 27° 04′ N., Long. 49° 40′ E.
Also see "Commercial Port".

PORT LIMITS: See "Commercial Port".

DOCUMENTS: See "General" before first port, and "Radio" — "Vess notification telex code from King Fahd Industrial Port to all Agents to used henceforth".

PILOTAGE: Pilotage is compulsory for all vessels of more than 150 n. Pilot will board in the vicinity of Buoy No. 7 in position Lat. 27° 07′ N Long. 49° 47′ E.

The Port Control Station (located at the Commercial Port) continuously manned and is to be contacted on Channel 16. Vesse requiring a Pilot shall use the International Signals. Pilots will board fro a fast launch and pilot boarding gear must comply with the Internation Convention for the Safety of Life at Sea (SOLAS) 1974. Vessels with high freeboard must provide an accommodation ladder combined wi a pilot ladder.

ANCHORAGES: See "Commercial Port".

RESTRICTIONS: The port is approachable and operational 24 hou daily throughout the year. Loaded LPG vessels are restricted to daylig movement only, within the entrance channel and harbour areas.

MAX. SIZE: See "Berthing".

HEALTH: See "General Rules for Saudi Arabia" before details individual ports.

RADIO: Vessel Notification Telex code from King Fahd Industrial Po Jubail to all Agents, to be used henceforth.

1. Call Sign.
2. Vessel's Name.
3. Owner/Line.
4. Nationality.
5. Agent.

27. Classification Society.
28. Crew number/Nationality.
29. Next port of call.
30. Hazardous cargo.
31. Is vessel gas free?
32 Inert gas system working.
33. Arms/Ammunition for self defence.
34. Economic speed of vessel.
35. Position 48 hours before arrival.
36. Radar details.

Items which do not apply should be answered N/A. All other item must be answered.

The telex, for vessels loading, should be received at least 3 days advance of expected arrival, or sooner. However for loading vess sailing from ports or geographical positions near to King Fahd Industr Port in Jubail, the telex should be received as soon as possible.

No Inward Clearance will be issued until the notification telex is receiv and processed.

Petromin Shell Refinery:

We quote below for Principal's information text of telex received from Petromin Shell Refinery Jubail in May 1988.

Quote

Please adjust PSRC arrival telex as quoted below. We like to stress the point that this information is required to ensure smooth export of products and expedite vessels. It will be appreciated if this information is passed on to PSRC as soon as possible.

1. Ballast on board.
2. Segregated ballast, if any.
3. Will vessel deballast ashore?
4. Quantity and type of slops, if any.
5. Will slops be discharged ashore?
6. Deballasting rate.
7. Can vessel deballast while loading.
8. Size and number of ship's manifold.
9. Indicate on which manifold what product will be loaded (number from stem to stem).
10. Maximum loading rate per connection.
11. Distance – manifold above deck.
12. Distance between manifold connections.
13. Height – manifold to rail.
14. Previous cargo.
15. Grade and approximate quantity to be loaded.
16. Can vessel load 2 grades concurrently, if required?
17. Preferred sequence of loading if grades cannot be loaded concurrently.
18. Is vessel fitted with I.G. installation?
19. Cargo tanks gas free or inerted on arrival.
20. Has vessel been instructed to arrive in gas free condition for visual tank inspection by either Charterers or independent surveyors?
21. Can vessel load and inert at same time?
22. Total time required for inerting.
23. Last port of call.
24. Sailing draft Jubail.
25. Any information relevant to this voyage/loading which vessel may want to convey.
26. The Port Authorities prohibit the discharge of any cargo tank ballast to sea. Clean cargo tank ballast to be pumped ashore on each occasion.

Unquote

VHF: The Jubail Port Control maintains a continuous watch on Channel 16. Within the Industrial Port area a continuous watch is maintained on Channel 67.

A new control tower in the Industrial Port became operational early in 1986.

RADAR: A Radar Surveillance and Control System is in operation.

TUGS: All tugs are provided with fire fighting capabilities.

Tugs normally join the vessel in the vicinity of Buoy No. 11 and tug's lines are used.

BERTHING: The port is laid out in 5 distinct sections, namely:

1. *Service Facility:* With 6.0 m. depth quay for port craft and others; a module-input facility, depth 8.0 m., capacity 2,000 tonnes; a 1,000 tonnes slipway and marine repair facility.
2. *Dry Bulk Terminal:* Depth alongside 14.0 m. Max. draft 12.6 m. (13.3 m. HW.) with berths totalling 2,300 m., quay wall and a Ro-Ro stern ramp.
3. *Petro-Chemical Quay:* Depth alongside 16.0 m. Max. drafts 14.4 m. (15.2 m. HW.). Each berth 330 m. length and can take vessels up to 100,000, max. displacement. Shore gangways on all berths.
4. *Breakwater Berths:* Depth alongside 16.0 m. Max. draft 14.4 m. (15.2 m. HW). Each berth 330 m. length and can take vessels from 10,000 – 100,000 max. displacement. Shore gangways on all berths.
5. *Offshore Tanker Terminal (OSTT):* Depths alongside 26.0 m. – 30.0 m. Max. draft 25.0 m. Each berth 350 m. length and can take vessels from 30,000 – 330,000 max. displacement. Shore gangway provided.

Saudi Lube Terminal: Breakwater Berth No. 52 (BWB 52). The following has been received from Petromin Lube Oil Blending and Grease Manufacturing Plant (Saudi Lube).

The purpose of this information is to acquaint the Owners, Charterers and Masters of vessels with Saudi Lube's (Petromin Lube Oil Blending and Grease Manufacturing Plant) terminal facilities at King Fahd Industrial Port in Al-Jubail, Saudi Arabia.

The Industrial Port facilities are owned by the Royal Commission for Al-Jubail, a Government Authority of the Kingdom of Saudi Arabia.

The causeway is 9.39 km. long and has a width of 300 m. The open sea tanker terminal extends a further 3.5 km. beyond the end of the causeway, a total distance of almost 13 km. from the original coastline.

Saudi Lube is owned by Petromin (General Petroleum and Mineral Organisation for the Kingdom of Saudi Arabia).

1. *Breakwater Berth (BWB) No. 52 Particulars:*
   Raw material unloading berth, handling different grades of base oil. One unloading arm enables handling of one base oil at a time.
   Berth Limitations: Max. LOA – 284 m.
2. *Oil Spillage/Slops:*
   Oil spillage incurred during the unloading operation cannot be discharged in the sea, instead the vessel must provide its own means of collecting all spilled oil. BWB 52 is equipped with a slops tank to collect berth spillage only.
3. *Time of Arrival Advice:*
   Initial ETA – 5, 3, 2, 1 days.
   Revised ETA – As any changes.
4. *Communications:*
   Contact "Jubail Port Control" on VHF Channel 16 when passing Jubail Fairway Buoy which is located in position:
   Lat. 27° 22′ N., Long. 50° 30′ E.
   or as soon after as radio reception conditions permit. Once alongside, a portable VHF radio will be placed onboard by Saudi Lube to enable contact between the vessel and the Jetty Operator on the control room, (see "Appendix D").
   Saudi Lube: Telex: 831168 Sublub SJ.
   Phone: 03-3416072 or 341573.
5. *Pilotage:*
   In the port area is compulsory, pilots boarding in position:
   Lat. 27° 07′ N., Long. 49° 47′ E.
   Vessels proceeding from the Fairway Buoy to the tanker anchorage may do so without a pilot, but should keep in contact with the Port Authorities on Channel 16 for traffic/anchoring information.
6. *Berthing Criteria:*
   Vessels will normally be berthed on arrival at BWB 52. If the berth is not available, anchoring instructions will be given by the Port Authority.
7. *Tugs:*
   Tugs are available to assist in the berthing and unberthing operation.
8. *Mooring Arrangement:*
   Vessels normally berth portside to on BWB 52 Jetty. Mooring requirements will be advised by the Pilot and follow the recommendation made in the O.C.I.M.F. publication "Guidelines and Recommendations for the Safe Mooring of Large Ships at Piers and Sea Islands". Vessels equipped with both wire and synthetic mooring lines should avoid "mixing" to the same shore mooring point.
9. *Unloading Arm:*
   On BWB 52, the unloading arm connection to the vessel manifold is a hydraulic coupler for 6 in. or 8 in. ANSI 150 FF, DIN 16 or BS 1560 flange. Suitable reducers conforming to this type of flange should be fitted prior to berthing.
   Assistance from the vessel will be required to make the flange connections. The arm is equipped with proximity switches that will give alarm once the "maximum reach envelope" is reached. Vessels with manifold connections outside of this "maximum reach envelope" cannot be connected to the unloading arm.
10. *Unloading Rates:*
    The following unloading rates are available at BWB 52 (a booster pump on the berth will be used in series with the ship's pumps).

Base Oil Grade	*Unloading Rate* (cu.m.p.h.)
100 SN	430
150 SN	440
300 SN	430
500 SN	451
700 SN	445
160 BS	150

11. *Ship/Shore Safety Check List:*
    A Safety Check List,based on the list recommended by the International Maritime Organisation, will be completed prior to the commencement of cargo operations.
12. *Overboard Discharge Valves:*
    Prior to the commencement of the unloading operations, all sea valves connected to the vessel's cargo handling line system should be closed and secured.
13. *Emergency Signal:*
    In the case of fire or other emergency, in addition to advising terminal staff and the Jetty Operator on the control room, vessel should sound a series of long blasts on the ship's whistle, each blast being not less than 10 seconds in duration. For cargo unloading emergency procedures, see "Appendix D".
14. *Emergency Towing Wires:*
    Fire wires must be positioned on the offshore bow and quarter of the ship. The eyes of these wires should be hung off above the water line and their height adjusted as necessary during cargo operations. The inboard end should be properly secured to a bollard with 5 or 6 fathoms of slack between bollard and fairlead. Means must be provided to prevent the slack accidentally running into the water.
15. *Ship/Shore Access:*
    A shore gangway will be provided and tended by shore staff.
16. *Shore Leave:*
    Not permitted, except for medical or repatriation reasons.

Appendix "D":

To: The Master SS/MV ....

In Port

Dear Sir,

Routine and Emergency "Stop Unloading" Procedure.

Throughout the unloading operation, you will be supplied with a portable VHF set which will enable continuous contact to be maintained between the Cargo Officer on board and the Jetty Operator on the Control Room.

Any change in the unloading rate, or anytime there is a need to stop unloading, it should be communicated via radio to BWB 52 Control Room. The Cargo Officer on board should notify the Jetty Operator 60, 30 and 5 minutes prior to the completion of the unloading of each grade of base oil.

In case of emergency, wherein the unloading arm needs to be disconnected from the vessel's manifold, inform immediately the Jetty Operator to stop unloading and make an emergency disconnection. The unloading control panel is equipped with an "Emergency Disconnection" push button that will disconnect the unloading arm from the vessel manifold in case of emergency while unloading.

Under no circumstances should the vessel's manifold or tank valves be closed while unloading, such action results in possible damage to our pump or line systems.

During the unloading operation, a Jetty Operator in radio or telephone contact with the tank farm control room is continuously on duty to assist you.

Please acknowledge receipt of this letter by countersigning the attached copy.

. . . . For Petromin Lube Oil Blending and
Master Grease Manufacturing Plant (Saudi Lube)

Note: There are 5 arms on each Berth 51 and Berth 61. The arms marked * above can be used for either L.S. Gas Oil, Auto Diesel Oil, or Naphtha.
DENSITY: 1025 – 1034.
FRESH WATER: Pipeline to 6.0 m. and 14.0 m. Quays. Pipeline to remaining berths are under construction.
FUEL: Fuel oil, marine diesel and marine gas oil are available through Agents. Pipeline supply to berths is planned for the future.
FIRE PRECAUTIONS: In view of the large volumes of cargo of a hazardous nature passing through the Port, great importance has been attached to all matters pertaining to fire and safety. Precautions to accepted international standards are practised and the Fire and Safety Department is on a 24 hour call out.
CONSULS: The American Consul-General resides at Dhahran. Other Consulates and Embassies are located in Riyadh and Jeddah.
REPAIRS: Minor repairs can be arranged through Agents.
DRY DOCKS: A slipway with 1,000 ton capacity is situated at the Services Quay.
SURVEYORS: International Marine Surveyors and Classification Society Surveyors are available. Arrangements through agents.
GANGWAY/DECK WATCHMEN: The Coast Guard station a guard at the gangway to prevent unauthorised boarding and landing.
HATCHES: Opening and closing of hatches is normally undertaken by the port users at their respective berths, stevedores can be provided if specially requested.
CUSTOMS ALLOWANCES: Possession and/or consumption of alcoholic beverages, including beer, table wines and spirits is strictly prohibited in Saudi Arabia. All alcoholic beverages are to be kept under lock and key during vessel's stay in port.

CARGO GEAR: See "Cargo Handling Equipment".
AIRPORT: International airport at Dhahran, distance 120 Km. A r airport is under construction at Jubail.
TIME: Local time is GMT plus 3 hours. ETA's and messages are to expressed in LMT.
HOLIDAYS: The Industrial Port is fully operational for 365 days of year.
POLICE/AMBULANCE/FIRE: Masters are acquainted with emerge telephone numbers upon arrival.
SERVICES: Limited services are available through Ship's Agents.
BANKS: There are a number of Middle East and foreign banks situa in Jubail.
STORES: Ship's stores available. To be arranged by the Agent. Sup of food items is limited and requires the approval of Coast Guard a Customs.
SHORE LEAVE: To be arranged by Agent.
REGULATIONS: See "General" before first port.
GENERAL: All vessels must ensure that they have on board upon arr a copy of "The Rules and Regulations for Seaports", issued in Ma 1985 by The Co-operation Council for the Arab States of the Gulf.

RABIGH: 22.44 N. 38.59 E. (See Pla

Also see "General" before first port.
LOCATION: The Commercial Port of Rabigh is situated on the E coast of the Red Sea in Saudi Arabia, about 150 km. North of the Jed Islamic Seaport, in position Lat. 22° 44′ 02″ N., Long. 38° 58′ 57″ E.

The industrial area includes a Crude Oil Refinery, supported by Port and a new community established 20 km. to the North of the P
PORT LIMITS: A vessel is considered an "arrived ship" as soon as anchors at one of the two anchorages S.E. of Tanda Rock Beacon
DOCUMENTS: *Arrival Documentation Requirements:* The Rules Regulations for Saudi Arabian Seaports specify that Master m present or make available for inspection the following papers documents:

Log Book.
Registration Certificate.
Classification Certificate.
Load-Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificates.
Cargo Gear Certificate.
Marine Health Certificate.
Vaccination List.
Derat Certificate.
Clearance from last port of call.
Israel Boycott Declaration.
Ship's Stores List.
Grain Shipping Certificate, if the vessel is carrying a Grain Shipm
Mail transport documents in accordance with the "International Po Treaty", if any mail is carried aboard.
5 copies of the Crew List including name, nationality, date of bi Passport Number, port of embarkation, port of disembarkation.
2 copies of the List of Personal Effects of crew and passengers.

In addition, the Rules and Regulations require that the Oil Rec Book and the Certificate of Fitness (in cases of gas and chem carriers) are available for inspection.

To obtain Port Clearance, the Master of the vessel shall present make available for inspection the following papers and documents copies of them to Port Management:

Log Book.
Registration Certificate.
Load Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Port Stevedore Outturn Report.
Radio and Wireless Certificates.
Receipt for payment of Custom's duties.
Shipping Note and Cargo Manifest for any cargo loaded.

Full details, regarding procedures and conduct of vessel and cr must be checked with Rules and Regulations of Saudi Arabian Seapo The vessel's Agent will provide all details of any changes in the Ru and Regulations.
PILOTAGE: Pilotage is compulsory for all vessels entering and leav the Commercial Port of Rabigh.

Pilots will be available on a 24 hours basis.

All vessels calling at Rabigh must comply with the internatio requirements concerning the reliable condition of the vessel's engin equipment, etc., and have on board qualified officers and efficient cr

The Pilot will board vessels by tug or pilot boat about 0.5 miles No of Tanda Rock Buoy.

Vessels will be accepted for berthing and unberthing only if they a in a very efficient ballast condition, at the discretion of the Pilot and t Harbour Master.

ANCHORAGES: The anchorage area for large vessels (VLCCs) is located South of the port entrance, and about 0.5 miles S.E. of the Fairway Buoy, where the average depth is 70 m.

Smaller vessels may anchor near to or S.E. of Tanda Rock Beacon, where depths of 10 m. – 30 m. are available.

APPROACHES: The Commercial Port of Rabigh is a deep water port protected by an offshore barrier reef running parallel to the coast.

The Entrance Channel has overall dimensions of 400 m. width and about 1,300 m. length.

The Deep Water Entrance Channel, with depth of 28 m. and width of 240 m., marked with lighted channel beacons, leads to the turning basin with depth 27 m. and diameter about 900 m.

The turning basin is also marked with lighted beacons.

The non-commercial area of the port extends Eastward, but at a depth of about 12 m.

The end of the port is marked by a special lighted marker beacon.

AIDS TO NAVIGATION: The following Aids to Navigation have been installed in order to facilitate the safe approach and navigation of vessels to and from Rabigh Port.

(a) Name : Shi'b Al Khamsa Beacon No.12:
Position : Lat. 22° 44.9' N., Long. 38° 37.2' E.
Characteristics : White light flashing (1) every 5 seconds (1 second on – 4 seconds off).
Elevation : 20.40 m.
Luminous Range : 16.00 miles.
Structure : Iron column 90 cm. diameter on concrete base, painted white, with round railing platform on top.
Remarks (i) : Radar Reflector.
(ii) : Racon X+S Band, code letter "O" (dash-dash-dash) every 48 seconds, 360°, range 20 miles, solar powered.

(b) Name : Shi'b Al Abiyadh Beacon No.13 (South Cardinal Mark).
Position : Lat. 22° 42.7' N., Long. 38° 48.3' E.
Characteristics : White light, very quick flashing (6) plus long flash every 15 seconds (6×(0.35+0.65)+1.5+7.5 = 15 sec.).
Elevation : 12.00 m.
Luminous Range : 10.00 miles.
Structure : Iron column 75 cm. diameter on concrete base, painted yellow above black, with round railing platform on top.
Top Marks : Two black cones.
Remarks : Radar Reflector.
Important Notice : Deep draft vessels should pass not less than 0.7 miles South of Shi'b Al Abiyadh Beacon No.13.

(c) Name : Tanda Rock Beacon No.14 (North Cardinal Mark).
Position : Lat. 22° 43.6' N., Long. 38° 56.0' E.
Characteristics : White light quick flashing 60 f.p.m. (0.3 seconds on – 0.7 seconds off).
Elevation : 10.20 m.
Luminous Range : 8.00 miles.
Structure : Iron column 74 cm. diameter on concrete base, with round railing platform on top.
Top Marks : Two black cones.
Remarks : Radar Reflector.

(d) Name : Tanda Rock Reef Buoy No.15. (North Cardinal Mark).
Position : Lat. 22° 44.6' N., Long. 38° 55.8' E.
Characteristics : White light very quick flashing 100 f.p.m. (0.2 seconds on – 0.4 seconds off).
Elevation : 3.40 m.
Luminous Range : 4.00 miles.
Structure : Iron buoy painted black above yellow.
Top Marks : Two black cones.

(e) Name : Fairway Buoy (safe water mark) Mid-Channel Mark.
Position : Lat. 22° 43.4' N., Long. 38° 58.0' E.
Characteristics : White light flashing one long flash every 10 seconds.
Elevation : 4.0 m.
Luminous Range : 5 miles.
Structure : Iron Buoy, painted red and white vertical stripes.
Top Marks : Single red sphere.

(f) Name : Port Hand Channel Buoy (Lateral Mark).
Position : Lat. 22° 44.1' N., Long. 38° 58.5' E.
Characteristics : Flashing red.
Elevation : 4.0 m.
Luminous Range : 3 miles.
Structure : Iron can buoy, painted red.

RESTRICTIONS: *Equipment Requirements:* No vessel shall be allowed to navigate within the port, unless it complies with the following equipment requirements:

(a) Efficient VHF radio telephone capable of working on the port frequencies.
(b) Efficient steering gear with fully operational rudder and helm indicators.
(c) Efficient propulsion, both ahead and astern and fully operational tachometer.
(d) Both anchors capable of being released and raised by the vessel.
(e) Efficient winches and adequate mooring gear to secure the vessel safety; an efficient mooring stations communication system.
(f) Sufficient crew on board at all times to operate the vessel safely and efficiently, with all officers properly qualified and certificated, as required by the flag nation and Saudi Rules and Regulations.
(g) All secondary power or mechanical systems on the vessel to be in operation, and immediately available in the event of failure of any primary system.

If any vessel cannot comply with any of the requirements listed above, Rabigh Port Management Control must be advised prior to arrival or departure. The vessel will then be subject to inspection and possible delay.

Failure to comply, or to notify Rabigh Port Management Control, may result in the vessel being fined or refused entry/departure to or from the port or both.

Draft Requirements: Vessels will not be permitted entry to the port unless they arrive at a draft consistent with safe manoeuvring and reasonably trimmed, to the satisfaction of the Pilot.

HEALTH: A Doctor will board vessel on arrival at the berth, in order to expedite Quarantine Clearance.

International Certificates of Vaccination against cholera and yellow fever must be made available if required, in accordance with international or local health regulations.

Quarantine signals must be displayed upon approaching Rabigh Port is accordance with international practice, and shall be continously displayed until Pratique is granted. The signals shall be as follows:

Sunrise to Sunset – Quarantine Flag.
Sunset to Sunrise – Quarantine Signal Lights (Red over White).

MAX. SIZE: Max. permissible draft alongside berth is 23 m. Max. LOA 400 m. Minimum parallel body 66 m.

VESSELS APPOINTMENT SYSTEM: The Saudi Arabian Ports Management requires Pre-Loading Advice on arrival at the first port of loading, and further notice of ETA with updated particulars of the cargo on sailing from the final loading port.

Revised ETA to be sent 5 days, 2 days and 1 day prior to arrival at the port.

Vessels in ballast bound for loading at Rabigh should follow the same ETA procedures.

Dry Cargo Vessels: The vessel must send the following information to Petromin Petrola Rabigh Refinery, Rabigh Port Management, Rabigh Port Authority and Vessel's Agent.

1. Radio Code (Call Sign).
2. Vessel's Name.
3. Owner/Charterer.
4. Nationality.
5. Agent.
6. LOA in metres.
7. Max. draft in metres.
8. Number of Hatches.
9. G.R.T.
10. N.R.T.
11. D.W.T.
12. Previous Name (if any).
13. Type of Vessel.
14. Type of Cargo.
15. Total Cargo Weight Tons.
16. Total Cargo Freight Tons.
17. Number of Containers/Units (where applicable).
18. Number of Livestock (where applicable).
19. E.T.A.
20. Actual Arrival Draft.
21. Hazardous Cargo for Rabigh.
22. Hazardous Cargo in Transit for other ports.
23. Tonnage to Hatch for Rabigh Discharge.
24. Year of Construction.
25. Lloyd's Register Number.
26. All Ports of Loading.
27. Number, position and S.W.L. of derricks and/or cranes and particulars and positions of ramps.
28. All Ports at which cargo will have been loaded for discharge at Rabigh.
29. All other ports at which the vessel will have called between arrival at the first port of loading and arrival at Rabigh.
30. All ports at which cargo remaining on board will be discharged after completion of discharge at Rabigh.
31. Last 3 ports ship visited before arrival, in proper order.
32. Economic Speed.
33. Total volume of vessel in tons.
34. Volume of hatches in cubic metres.
35. Reason of visit.
36. Estimated time and date of departure.
37. Ammunition and/or explosives in-transit to Rabigh.
38. Cargo of alcholic beverages in-transit to Rabigh.
39. Arms and ammunition on board, purpose of self defence.
40. Information relating to ship's radars (type of radar, frequency, scan speed, pulse width, pulse peak power, pulse repetition frequency and beam width).

The vessel's name and radio code should be given in every subsequent telex for computer reference.

The absence of any of the above information may incur delay to the vessel's port turnaround.

Questions not applicable to a particular vessel should be answered with the text "not applicable".

Tankers: As soon as the vessel receives orders to proceed to the port, the following information must be sent to Petromin Petrola Rabigh Refinery, Rabigh Port Management, Rabigh Port Authority and Vessel's Agent.

1. Name of vessel.
2. Former Names.
3. Port of Registry, Flag, Call Sign.
4. L.O.A., G.R.T., N.R.T.
5. Summer d.w.t., Arrival d.w.t.
6. Draft on arrival, forward and aft.
7. ETA.
8. Last Port.

9. Cargo on board and flash point, destination of cargo.
10. Cargo requirements.
11. Previous cargo and quantity of residues on board for load-on-top.
12. IMO Class.
13. Whether gas free or in inert condition.
14. Port of loading ballast and amount.
15. Quantity of ballast loaded on passage.
16. Quantity of segregated ballast on arrival.
17. Quantity of cargo tank ballast on arrival.
18. Time for deballasting, can ship load/deballast simultaneously.
19. Special conditions-difficulties-defective equipment or gear which could present special hazards or difficulties when mooring, unmooring or during cargo operations.
20. Agent's Name.
21. Maximum loading rate.
22. Topping-off rate.
23. Bunker Requirements.
24. Cargo manifold connection size.
25. Bunker connection size.
26. Derricks.
27. Arms and ammunition on board for self defence.
28. Information relating to ship's radars (type of radar, frequency, scan speed, pulse width, pulse peak power, pulse repetition frequency, beam width).

Gas Tankers: As soon as the vessel receives orders to proceed to the port, the following information must be sent to Petromin Petrola Rabigh Refinery, Rabigh Port Management, Rabigh Port Authority and vessel's Agent.

1. Name of vessel, indicating any former names.
2. Port of Registry, Flag, Call Sign.
3. L.O.A., G.R.T., N.R.T.
4. Summer d.w.t.; Arrival d.w.t.; Arrival draft, forward and aft.
5. Last Port, ETA Rabigh.
6. Quantity of ballast on arrival, where loaded.
7. Quantity of dirty ballast on arrival.
8. Total cargo capacity in cubic metres and cargo required.
9. Grades and quantities of any part cargoes or cargo residues and where loaded. Grade and quantities of product in deck tanks.
10. Are part cargoes to be commingled with loadings?
11. Gauge pressures top and bottom and mean temperatures of each cargo tank.
12. Quantity of collant required in addition to cargo requirements.
13. Maximum allowable relief valve settings for all cargo tanks.
14. Have any cargoes other than LPG been carried during last 3 loaded voyages. Specify?
15. Maximum oxygen content by volume per cent of each warm or inerted cargo tank.
16. If tank purging required, specify whether:
    - (a) Parallel or in series.
    - (b) Liquid from shore direct to cargo tanks.
    - (c) Liquid from shore to vessel's vaporizers, specify vaporizer throughout in RLPG/hour.
17. If cooling down tanks is required, specify maximum cooling rate in terms of temperature reduction per hour and maximum temperature differential permitted between any 2 points in cargo tank.
18. Available total capacity of ship's reliquefaction plant for each nominated cargo product.
19. Type of ship's reliquefaction system, i.e., direct, cascade or other.
20. Capacity of ship's gas blowers to shore vapour return line in volume per hour at reference temperature.
21. Maximum loading rate and approximate topping-off rate.
22. Bunker manifold size, bunker requirements.
23. Manifold presentation, function, A.S.A. rating, size from forward.
24. Agent's Name.
25. IMO ship type, does vessel have valid Certificate of Fitness?
26. Special conditions, difficulties, defective equipment or gear which could present special hazards or difficulties when mooring – unmooring or during cargo operations.
27. Arms and ammunition on board for self defence.
28. Information relating to ship's radars (type of radar, frequency, scan speed, pulse width, pulse peak power, pulse repetition frequency, beam width).

RADIO *Pre-Arrival Information and Requirements:*
The Rules and Regulations of Saudi Arabian Seaports require pre-loading advice, pre-arrival information from first loading port and further notification of ETA 5 days, 2 days and 1 day prior to arrival.
This information must be telexed to:
(a) Petromin Petrola Rabigh Refinery Co. Telex No. 612032 RABREF SJ.
(b) Rabigh Port Management.
(c) Rabigh Port Authority.
(d) Vessel's Agent.
either directly or through the vessel's Agent.

Vessels which fail to comply with this requirement may be delayed and/or be subject to a fine, as laid down in the Seaport Rules and Regulations.

VHF: All marine services and shipping movements within the Rabigh Port Area are monitored and controlled by Rabigh Port Control, which maintains VHF watch on Channel 16 and 66A.

Vessels should finally confirm their ETA and other particulars at least 3 hours before arrival.

VHF Channels 1, 3, 15, 16, 18A, 19A, 65A, 66A, 78A and 79A are continously available for use by the Rabigh Port Control.

In the event of a port emergency, Rabigh Port Control will designate a channel for use during the period of emergency.

RADAR: Port radar service available.

TUGS: There are 4 Voith Schneider tugs available for berthing and unberthing operations, each of 4,700 h.p., bollard pull 52 tons. They are equipped with fire fighting equipment and remote controlled monitors for foam water or water jet, ranging up to 70 m.

Two pilot boats are available.

Mooring boats will be utilised to run mooring lines to the moori dolphins from the tankers.

BERTHING: Liquid Cargo Port: The Liquid Cargo Port is situat Southeastward of the turning basin with depth 26.5 m., width 690 and a length 960 m. at the East side and 760 m. at the West side of t port.

Berths and Equipment: Two berths (No.2 and No.3) are situated on t East side of the port, and are aligned 321°, with depth alongside t berths of 26.0 m. They are designed to service tankers fr 30,000 d.w.t. to 325,000 d.w.t. The distance between the centre of t inner breasting dolphins is 66 m. The distance between the ou mooring dolphins is 430 m.

Each berth consists of a concrete platform with dimensions 30 m. 50 m. at 3 m. above M.S.L., and a metal service platform on it at 6.75 above M.S.L. Each berth has 4 breasting dolphins with large flexi rubber fenders on the outer face and 6 mooring dolphins, all equipp with quick release hooks with electrically operated capstans. All qu release hooks can be remotely released from the berth control cabi

There are 24 quick release hooks available for each berth w capacity ranging from 100 tons to 180 tons.

On each berth there is a multi-purpose tower with an automa gangway and a 15 tons service crane.

Loading Arms: On each berth there are 8 FMC designed, hydraulica operated loading arms, with quick couplers which connect to the shi flanges. Special adaptors for the 20 in. loading arms can be used the connection to the 14 in. to 24 in. ship's flanges, as well as for t 10 in. loading arms for the connection to the 6 in. to 16 in. ship's flang

1×20 in. arm is dedicated exclusively for loading Jet Fuel.

2×20 in. arms for loading Naphtha or Gas Oil.

3×20 in. arms for loading Fuel Oil or unloading Crude Oil and deballasting purposes.

2×10 in. arms for bunkering and deballasting.

The accepted minimum and maximum manifold heights above me sea level are 2.5 m. and 28 m. respectively.

The maximum lateral drift is 3.5 m. forward and 3.5 m. aft, in t normal position of zero offset.

All loading/bunker connections are equipped with electrically insulat flanges. Therefore ship to shore bonding cables are not required.

Loading Rates: Product loading rates:

	Mimimum (cu.m.p.h.)	*Maximum* (cu.m.p.h)
Naphtha	600	5,400
Jet Fuel	600	3,600
Gas Oil	600	5,400
Fuel Oil	600	5,400
Bunker	200	1,150

Crude Oil maximum unloading rate is 16,000 cu.m.p.h.

Ballast maximum unloading rate is 10,000 cu.m.p.h.

Crude is sampled during unloading from automatic Jiskoot sample while volumetric measurements are made at the tanks with the usu dipping method. Products are metered with calibrated and Custo checked Smith Meters.

Water Supply: Potable water is available at about 50 cu.m.p.h.

Fire Fighting Equipment: The berths are equipped with 4 remo controlled monitors, two on each side, throwing water or a form mixtu a distance of 65 m., and capable of covering the manifold area of t largest tanker. Underneath each berth there are foam dispensers, a on each berth 4 foam-water hydrants. Loading arms, multi-purpo tower and the monitor tower have water sprinklers for cooling in ca of fire.

The fire water line is always under pressure.

The berth monitors are remote controlled from the berth control cab as well as from a fire fighting tower situated onshore halfway betwe the two berths.

Operational and Berthing Criteria:
(a) Limiting conditions for the Pilot to board the vessel:
Wave height of 2.0 m. Wind over 25 knots (Beaufort Scale Force
(b) Limiting conditions for berthing and mooring operations:
Wind speed over 25 knots (Beaufort Scale Force 6).
(c) Limiting conditions for loading/unloading operations:
Wind speed over 40 knots (Beaufort Scale Force 8).
(d) Limiting conditions not permitting unberthing:
Wind speed over 30 knots (Beaufort Scale Force 7).

However, vessels can remain alongside the berth even with a 60 kn wind speed (Beaufort Scale Force 11).

Maximum berthing velocity: 20 cm./sec.

Maximum approach angle: 7°.

Mooring Arrangements: Recommended mooring diagrams are sho in the "Plan Section". However, in order to ensure the safety personnel, tankers and loading facilities, and to prevent accidental spillages, the Rabigh Port Management strongly recommends th tankers utilise the minimum mooring lines and mooring wires as follow

Up to 45,000 d.w.t. – minimum of 16 mooring lines.

45,000 d.w.t. to 70,000 d.w.t. – minimum of 16 mooring lines to inclu 6 wire lines for springs and/or breast lines.

VLCCs must provide an all wire mooring arrangement of minimu
70,000 d.w.t. to 160,000 d.w.t. – 12 mooring wires.
160,000 d.w.t. to 250,000 d.w.t. – 16 mooring wires.
250,000 d.w.t. to 350,000 d.w.t. – 16 mooring wires.
350,000 d.w.t. to 400,000 d.w.t. – 18 mooring wires.

For mooring VLCCs, it is recommended that as a minumum a 42 m diameter 6 × 37 class IWRC preformed heavily drawn galvanised w line (minimum tensile strength of 180 kg./sq.mm.) with a typical MBL 115 tonnes be specified.

Vessels equipped with both wire and synthetic lines must avoid mi such lines to the same dolphin (and same direction).

Vessels must be moored to the entire satisfaction of the Pilot.

Any known defects of vessel's mooring system should be reported the Pilot and terminal before arrival.

As soon as tankers are secured, manual brakes should be set on the winches, and they should not be left on automatic tension.

An efficient watch must be maintained on the vessel's moorings at all times, to ensure that all lines have the required tension and the vessel is kept well close alongside.

Vessels must be ready to put out more lines if required by weather changes or at the direction of the Rabigh Port Management and Terminal Operator.

Pioneer Port: The Pioneer Port is situated on the South part of the harbour and West of the Oil Cargo Port, with a depth of 15.0 m. and a width of 350 m.

Four concrete finger piers on piles, with depths of minimum 7.0 m. – maximum 15.0 m. are available on the South side of the Pioneer Port for tugs, pilot boats, mooring boats and small craft.

Dry Cargo: The Dry Cargo Dock is situated on the South coast of the harbour, near the port entrance and has a depth alongside of 6.5 m. and a length of 80 m.

All loading and unloading operations of dry cargo are carried out through the Dry Cargo Dock.

Dry Cargo Port: Presently used as a Yacht and Coast Guard Port.

BALLAST: *Ballast Discharge:* All ship's dirty or clean ballast should be discharged to the Refinery's shore reception facilities. Maximum rate of discharge is 10,000 cu.m.p.h. Discharging of ballast at sea is strictly prohibited.

In very exceptional cases clean ballast may be discharged to sea, from permanent or segregated ballast tanks, but only with the permission of the Rabigh Port Management and Port Authority. In this event the Master must state in writing that the oil content in the water ballast does not exceed 5 p.p.m.

Slop residue and ballast contaminated by leaded gasoline cannot be discharged ashore.

Slops may only be discharged into the ballast system with the express approval of the Petromin Petrola Rabigh Refinery after sampling. Prior to arrival, vessel should advise the terminal of the quantity and quality of slops held on board, and confirm that no chemicals or emulsifying agents have been used in previous tank cleaning.

MEDICAL: There is a medical room for first aid in the Refinery and a hospital in the village of Rabigh.

FRESH WATER: Available.

FUEL: Bunkers presently not available alongside berths but will be available in the future (there are loading arms for bunkering fuel oil and mixtures).

Bunkering at roads may be available with small vessels ex-Jeddah, if arranged through Agents and Coast Guard.

REPAIRS: There is no repair facility in the port. Vessels can make repairs in the roads.

SURVEYORS: Classification Society Surveyors are available from Jeddah on request of the Master to the Agent.

GANGWAY/DECK WATCHMEN: Not required.

Coast Guard: Coast Guard soldier is always on the berth platform/gangway. He can board the vessel, but he does not live on board.

CUSTOMS: Customs may board the vessel at the berth or at the anchorage. All alcoholic beverages must be placed under seal. Cigarettes, cigars and tobacco in excess of normal consumption during the expected duration of stay are placed under seal. Spirits are strictly prohibited.

Prohibitions:

(i) No photographs shall be taken in port.

(ii) Radio will be sealed and is not to be used during vessel's stay in port.

(iii) The importation of the following items is strictly prohibited: Explosives and firearms, including air rifles; implements of war of any kind, including antiques; alchoholic beverages; religious matter not pertaining to the Moslem faith; pig meat and products; playing cards and gambling games or devices; narcotics and pornographic photographs or magazines carrying such pictures.

AIRPORT: Jeddah Airport, 150 km. South of Rabigh.

REPATRIATION: Arranged by Ship's Agent.

HOLIDAYS: Tanker terminal operates 365 days a year including hoildays.

POLICE/AMBULANCE/FIRE Police: 4220300/4220304. Ambulance: 4221617. Fire 4221770. Coast Guard: 4223082/4221400.

TIME: GMT plus 3 hours.

SHORE LEAVE: Not permitted unless special arrangements are made through the Agents.

TELEPHONE: Not available for placing on board ship.

SAFETY: *Safety Inspections and Emergency Procedures:*

1. The Special Safety Regulations pertaining to tankers as quoted in the Regulations for Port Safety of the Rules and Regulations for Saudi Arabian Seaports as well as international regulations in respect of these matters should be strictly followed.
   (a) Ship/Shore Safety Check List should be completed jointly by a ship's officer, Terminal personnel and a representative of Safety Department, as soon as possible after the vessel is alongside the berth, and prior to commencement of any cargo/bunker operations.
   (b) Repeated safety inspections will be carried out by the Loading Master/Terminal Operator or Petromin's Safety Department during the vessel's stay alongside.
   (c) The Master and officers will be advised immediately in the event of any infringement of safety requirement on board, in order to take corrective measures.
   (d) If the violation continues, all operations on board may be suspended, the vessel may be ordered out of the berth and will be held responsible for all delays and consequences thereof. The Agent, Owner and Charterer will be advised accordingly.
   (e) Gas freeing, hot work and engine repairs are strictly forbidden in port.
   (f) Vessel's engines should be ready for use at all times.
2. Emergency procedures and actions which have to be taken, will be reviewed by the vessel's Chief Officer and the Loading Master or Terminal Operators, as soon as the vessel comes alongside the berth.

   An emergency situation may arise in the following cases:
   (a) Fire on board or on shore.
   (b) Pollution on board, around the vessel or on shore.
   (c) Collision, grounding, sinking.
   (d) Weather deterioration (strong wind and thunderstorm).
   (e) High gas concentration.
   (f) Any other serious event affecting the safety of personnel, the vessel or the port.
3. Emergency situations will be reported immediately to the Rabigh Port Control and Terminal Operator by:
   (a) VHF Channels 16, 66A or 9 or any other designated channel.
   (b) Telephone.
   (c) Continuous sounding of the ship's whistle.
   (d) Refinery Alarm System.
   (e) Any other convenient means of communication.

All operations at the port and on board the vessels will be immediately suspended, and all tugs will stand by.

All vessels will comply with the emergency reporting procedures as per Rabigh Port Management and Port Authority instructions.

In the event of an emergency, the vessel's crew and terminal personnel should take immediate action to stop loading/discharging, disconnect the loading arms and place fire facilities on stand-by.

Preparation should be made for the vessel to leave the berth, and to limit, if possible, the hazard to personnel, ships and/or installations. At the same time all concerned should maintain contact with the Rabigh Port Management and Port Authority for further instructions and coordination.

An efficient crew watch should be maintained on deck throughout the vessel's stay alongside the berth.

Direct contact by VHF must be maintained with the Terminal Operator.

Inert Gas Requirement: Saudi Arabia is a signatory to the International Convention SOLAS 74 and its amendments.

Vessels which are required to be inerted under the above convention will be checked by the Terminal Representative before loading commences, in order to attain an oxygen content of ~~8~~% or below in their 6
cargo tanks.

Oil Pollution Prevention: Oil spillages are viewed very seriously by the Rabigh Port Authority, Coast Guard and Rabigh Port Management.

Spillages will be investigated by the Authorities, and the Master and/or Owner will be liable to prosecution and heavy penalties including the cost of cleaning. Delay to the vessel's departure could well arise. Masters are requested to ensure that every measure has been taken to prevent oil spillages at or outside Rabigh Oil Terminal and must advise the Rabigh Port Management, if their vessel has sustained any damage at any time which could lead to oil pollution. Suitable absorbent material or other materials or equipment should be readily available and suitably located on deck in order to clean any spillage.

Prior to entry into the port, the Master is required to sign the "Instructions to Vessels and Conditions of Use of all Berths", presented to him by the Pilot, regarding his or his Owner's responsibilities for pollution originating from his vessel.

WEATHER:

Climate: Tropical desert, hot climate with humidity very high during Summer months. Winter is mild and pleasant.

The weather conditions can be divided into 2 seasons:

(a) November to February with average temperatures 30° C. in daytime and 18° C. at nightime and average humidity 65%. Rain may be experienced very rarely during December or January, and does not normally last more than 2 hours. The rainfall varies between 10 mm. and 65 mm. and has a monthly average of 5 mm.

(b) March to October with average temperatures 38° C. in daytime and 25° C. at nightime with average humidity of 82%.
August is the hottest month.

Wind – Sea Condition – Visibility: Generally the prevailing winds experienced in this area are North to Northwesterly which occur 70% of the time compared with winds from any other direction. The speed of these winds normally does not exceed Force 3 to Force 6, although rarely winds of higher speed have been recorded.

Usually the wind starts to blow at 1000 hrs., reaches its maximum strength at noon, and then reduces at about 1900 hrs.

The state of the sea with a Northwest wind is slight to moderate outside the port. Easterly wind can be experienced occasionally reaching Force 7.

Generally the port is not affected by the state of the sea and swell.

Winds of gale force may occur between December and March. The direction of these winds is usually South to Southwest; velocity usually reaches Force 7, although winds of Force 11 have been experienced in the area.

Visibility at this time is usually limited to 1 mile due to sandstorms, and the state of the sea is rough to very rough.

The signs of impending storm are clouds which begin to appear from South or Southwest. The storm breaks suddenly followed by heavy rain and thunder.

Poor visibility due to fog is rarely experienced, only occasionally during the morning hours. However throughout the year dust storms may occur, obscuring the coastline.

Tides and Currents: The tide cycle is semi-diurnal. Elevation of the tide levels in relation to the mean sea level are as follows:

L.L.W.L	−0.74 m.
H.H.W.L.	+0.74 m.
M.S.L.	0.00 m.
Mean Daily Tidal Range	0.34 m.

Local currents are affected by the general circulation of currents in the Red Sea. They usually flow in a N.W.'ly direction along the coast with a speed usually not in excess of 0.5 knots. The Rabigh Port is

minimally affected by tides, and there are no significant currents produced by tidal flows.
Sea Temperature: Ranging from 22° C. to 29° C.
Sea Water Density: 1027.5 (Average).

GENERAL: *Charts and Pulications:*
Charts:

(a) Saudi Arabian Charts	No.18, No.182
(b) British Admiralty Charts	No.63, No.926
(c) U.S.A. Chart (Omega)	No.62250

Publications:
(a) British Admiralty Tide Table, Volume 2, Atlantic and Indian Oceans.
(b) British Admiralty Red Sea, Gulf of Suez and Aden Pilot (plus supplement No.64.)
(c) British Admiralty List of Light and Fog Signals, Volume E.
(d) Rules and Regulations for Saudi Arabian Seaports.

Rules and Regulations for Saudi Arabian Seaports: Full details regarding Port Rules and Regulations are included in the above book, which must be kept on board the vessel and in any case be obtained immediately on first arrival in a port of the Kingdom of Saudi Arabia.

The required procedure for the presentation of official papers and documents required are listed in "Documents", however, full details regarding procedures and conduct of vessel and crew must be checked with the above Rules and Regulations.

Coast Guard: One Coast Guard is placed on board and requires accommodation and food during the vessel's stay in port.

Government Entry Requirements: The Master will be responsible for complying fully with the requirement of Saudi Arabian Government Departments, Ministries, Agencies and Organisations. Particular attention should be paid to the requirements of Customs, Coast Guard, Immigration and Port Health Authorities. Masters requiring any advice on these requirements should contact their local Agents.

Instructions to Vessels and Conditions of use of all Berths: When the Pilot boards an inward-bound vessel, he will present the Master with a letter "Instructions to Vessels and Conditions of use of all Berths".

The Master is required to sign the letter, acknowledge receipt and agree to the instructions and conditions contained therein prior to entry into the Port.

No vessel will be allowed to enter the Port until this letter has been signed.

Agent: There are no Agents offices in Rabigh at the present time. Agent's business is carried out through Jeddah offices. For crew charges and other formalities, Agents should be contacted.

Provisions and Stores: May be available from Rabigh or Jeddah, on request to the Agents.

SHIPMASTER'S REPORT: July 1990.
Approaches: The port has made new charts and submitted them to publishers, but nothing official is available yet.

B.A. Chart No. 925 is inadequate, and has not been revised as yet. Nevertheless, it is not a difficult task to approach the port, and the existing aids and Port Handbook are sufficient.

On arrival, the pilot boards using a tug, 3 – 4 cables North of the Tanda Rock Buoy, preferably from starboard side. Accommodation ladder can be used.

On departure, the pilot disembarks as soon as the vessel clears the buoyed channel, and even without chart, one has no difficulties sailing outward.

Anchorages: Considered safe and easily accessible without pilot. Vessel has only to clear Tanda Rock Buoy, leaving it to starboard, and pass the Fairway Buoy at 0.5 miles, and there is the anchorage for large vessels.

Inertion: The refinery requires vessels, in order to load, to be inerted to 6% or less of oxygen content. If visual inspection of the tanks needed, this is carried out at the anchorage. Then inertion must take place before the ship is admitted to berth.

The 02 content is checked alongside.

N.O.R. is "received" upon being all fast.

Medical: Facilities available.
Repatriation: Possible via Jeddah. Seaman's Book mandatory.
Radio Free Pratique Message: Not required. Doctor boards upon berthing.
Personnel: Cooperation with Refinery personnel considered very good.
Cargo Documents: Time for Bills of Lading, etc., after loading is minimal. Difference in ship/shore figures is negligible.
Chandlers/Stores: None of the usual type of chandlers available. In case of need (with a long trip ahead), arrangements can be made through agents, in advance, and someone from the vessel can go to Rabigh town market and buy the goods.

AUTHORITY: Petromin – Petrola Rabigh Refinery Company, P.O.Box 180, Rabigh, 21911 Saudi Arabia. *Tel:* 4223200. *Telex:* 612032 RABREF SJ. *FAX:* 4223136. *Contact:* Mr. Hussein Bahaa, Chief Executive Assistant. AGENT: See "Jeddah".

RAS AL-KHAFJI: 28.25 N. 48.32 E. (See Pla

The onshore base lies in position approximately Lat. 28° 25′ N., Lon 48° 31′ E., and within a distance of 7 miles (13 km.) offshore, th Company has two four-buoy system berths and two single-buoy-moorin system berths for loading tankers, and also an anchorage area for dr cargo ships. Outside of this distance there is an anchorage area f tankers. These berths and anchorage areas are situated in the territor waters of the Kingdom of Saudi Arabia.

APPROACHES: The approaches to Ras Al-Khafji are marked on th appropriate U.S.N.O. and British Admiralty Charts, and deep enough f the majority of vessels visiting the Port to proceed with normal cautio using the buoys (Buoys No. 1 and No. 2) as centre line and both sid markers (Buoys No. 3 – No. 8). A single patch with a depth of 56 (17.07 m.) marked by Buoy No. 4 exists close to the passage. A pat of minimum depth of water 70 ft. (21.34 m.) exists in the passag 0.6 miles S.S.E. of Buoy No. 7.

All the geographical positions shown are intended for referen purpose only. Users are reminded that certain differences are known exist between the positions herein and those on the U.S.N.O. and Britis Admiralty Charts of the area.

The U.S.N.O. Charts No. 62451 and 62430 and B.A. Charts No. 37 and 2882 are recommended for navigational use in this area.

For oil tankers arriving at Ras Al-Khafji without the necessary chart the full information will be given by telex upon request to Terminal ar Shipping, the Company's Field Office (841011 AAB, 841011 ARBO SJ) or telegram upon request to "ARABIAOIL KUWAIT" (via "Kuwa Radio Station 9KK") a few days before arrival. Alternatively, if the vess has VHF, the buoy positions will be given to them upon request to "Ra Al-Khafji Terminal" as the vessel approaches, but prior notice requiring this service should be given in the vessel's arrival messag The navigation message used reads as follows:

"ON REACHING NUMBER ONE LIGHT BUOY LATITUD 28° 36.0′ NORTH LONGITUDE 49° 10.0′ EAST RWVS ISOPHAS WHITE TEN SECONDS 10 MILES RAREFL – THENCE STEER 27 DEGREES TRUE FOR 9 MILES TO NUMBER TWO LIGHT BUO LATITUDE 28° 36.0′ NORTH LONGITUDE 49° 00.0′ EAST RWV LONG FLASHING WHITE TEN SECONDS 10 MILES RAREFL THENCE STEER 254 DEGREES TRUE FOR 9.5 MILES TO POINT 0 MILE NORTHWARD OF NUMBER FOUR LIGHT BUOY LATITUD 28° 32.6′ NORTH LONGITUDE 48° 49.0′ EAST RED GPFL FIVE RE TEN SECONDS 6 MILES RAREFL – THENCE STEER 270 DEGREE TRUE ABOUT 2 MILES TOWARD NUMBER SEVEN LIGHT BUO LATITUDE 28° 33.4′ NORTH LONGITUDE 48° 45.7′ EAST GREE FLASHING GREEN THREE SECONDS 4 MILES RAREFL – THENC STEER 243 DEGREES TRUE TOWARD FOR 8 MILES NUMBER NIN LIGHT BUOY LATITUDE 28° 29.5′ NORTH LONGITUD 48° 37.8′ EAST YELLOW GPFL FOUR YELLOW TEN SECONDS MILES RAREFL MARKS TANKER ANCHORAGE WEST CORNE STOP NUMBER ONE AND TWO LIGHT BUOYS MARK CENTRE LIN OF APPROACH WHICH IS WIDE AND DEEP STOP TWO SHOA PATCHES NORTHWARD OF APPROACH ARE MARKED B NUMBER THREE LIGHT BUOY LATITUDE 28° 34.9′ NORT LONGITUDE 48° 51.5′ EAST YELLOW ABOVE BLACK QUIC FLASHING SIX PLUS LONG FLASHING WHITE FIFTEEN SECOND 10 MILES RAREFL AND NUMBER FIVE LIGHT BUOY LATITUD 28° 33.8′ NORTH LONGITUDE 48° 48.0′ EAST YELLOW ABOV BLACK VERY QUICK FLASHING SIX PLUS LONG FLASHING WHIT TEN SECONDS 10 MILES RAREFL STOP TANKER ANCHORAG AND PILOT GROUND IS WITHIN 1 MILE RADIUS OF LATITUD 28° 29.5′ NORTH LONGITUDE 48° 39.0 STOP"

NAVIGATIONAL AIDS: *Conspicuous Marks:* The flare stacks in th offshore field and onshore are normally visible at a far distance, but ma occasionally be extinguished, and a well structure located 4.5 mile Northward from Light Buoy No. 2 is conspicuous.

No. 1 Flare	Lat. 28° 28.3′ N., Long. 48° 57.0′ E.
No. 2 Flare	Lat. 28° 27.0′ N., Long. 48° 54.8′ E.
No. 3 Flare	Lat. 28° 29.8′ N., Long. 48° 56.0′ E.
No. 4 Flare	Lat. 28° 30.3′ N., Long. 48° 58.0′ E.
No. 5 Flare	Lat. 28° 28.5′ N., Long. 48° 55.9′ E.
Onshore Flare 1	Lat. 28° 24.5′ N., Long. 48° 32.4′ E.
Onshore Flare 2	Lat. 28° 23.7′ N., Long. 48° 32.1′ E.
Well Structure	Lat. 28° 40.4′ N., Long. 48° 57.8′ E.
Ex-Loading Dock	Lat. 28° 24.5′ N., Long. 48° 32.4′ E.
Valve Station Platform	Lat. 28° 26.9′ N., Long. 48° 35.8′ E.
Kaizu Maru Wreck	Lat. 28° 31.7′ N., Long. 48° 34.6′ E.

Ex-Loading Dock is out of use. Jetty structure with a light Fl.F 3 sec.2M.RARE on tower at North end.

Valve Station Platform functions as berth loading control platform wi a light Fl.R.10 sec.10M.RARE.

"Kaizu Maru" wreck is unlit.

DOCUMENTS: *(A) Clearance.* Master should submit followin documents to Saudi Arabian Government through Agent (2 copie each):

Maritime Declaration of Health.
Health Condition of Crew.
Details of Air-conditioning.
Crew List.
Vaccination List.
Passenger List (if any).

Note: Forms 1 – 3 are supplied by the Agent.

(B) Cargo: All the documents listed below except the Ship's Stateme of Cargo (Ullage Report) are prepared onshore, and this takes abo 1.5 hours after loading completion. The tanker is requested to designa the type of documentation, either early departure or ordina documentation by filling checkmark in the Designation of Documentatio type. The Company usually recommends Early Departu Documentation. But ordinary documentation can also be requested. this case, however, it takes a further 30 – 60 minutes before t

documents arrive at the tanker. Whenever necessary, the Mooring Master will sign the documents on behalf of the Company.

The following cargo documents are usually to be prepared onshore except (4):

(1) Notice of Readiness
(2) Bill of Lading
(3) Tanker Time Sheet
(4) Ship's Statement of Cargo (Ullage Report)*
(5) Certificate of Discharge**
(6) Master's Receipt of Documents

Note: *Ship's Statement of Cargo includes the items for "Clean Ballast Declaration" and "Dry Inspection" both together in one form, and is to be completed always on board the tanker regardless of Early Departure Documentation.

**Certificate of Discharge should be handed over to the tanker's Agent at the port of discharge for certification by the Customs Authorities there. The Agent should then return the Certificates to the Company as soon as possible. Non compliance with this requirement could involve the tanker in serious difficulty as all the member states of the Arab League prohibit the export of any materials through their ports to Israel, and the purpose of the Certificates is to prove that the cargo was not discharged in Israel.

Masters are therefore advised to ensure that their Agents at each discharging port understand this and return the Certificates at the earliest possible moment.

The following is a copy of a letter to a ship's Agent from the Chief of Ras Al-Khafji Port. Dated September 1980.

We would like to advise you that effective 1st of Dhul-qadah, 1400 (September 10, 1980) in case you need a Port Clearance for any vessel under your agency please ensure that ship's Crew List consists of name, nationality, date of birth, place of birth, Passport/Seaman Book Number and rank. In the absence of this information we are unable to provide you with Departure Port Clearance and you will be held responsible for ship departure delays.

EARLY DEPARTURE DOCUMENTATION: This documentation system aims to assist ships to depart early from this port after they complete loading by saving time awaiting documents. For this reason, relevant tanker documents will be signed previously by ship's Master or signed by their Agents at this port, depending on Master's choice on the request sheet. Completed tanker documents, therefore, will not be despatched to ships after completion of loading.

It must be noted that this system is not compulsory at this port, but it is at Master's option on condition that ships can communicate on Harbour Service VHF Radio to receive shore figures any time before departure.

READINESS: The Master of each arriving tanker should present a Notice of Readiness to the Company's Mooring Master who will sign it on behalf of the Company. The Notice of Readiness should be tendered at the time of the tanker's arrival at the anchorage area, which is understood to be either the time of dropping the anchor in the anchorage, or if the tanker does not anchor, the time when the Mooring Masters board the vessel.

PILOTAGE: Pilotage is compulsory for arriving tanker's berthing and unberthing at Ras Al-Khafji and a Company's Mooring Masters will board the tanker at the anchorage area to take her to her assigned berth. The company shall assign 2 Mooring Masters for operation on the tanker for shipment. One is as Main and another is as Sub-Mooring Master. The Company's Mooring Master who is assigned on duty shall advise the tanker's Master on the manoeuvre and operations relating to berthing, unberthing, bunkering connecting and disconnecting the loading hoses, and communication between the tanker and Central Control Room (CCR) on shore. Necessary documents such as Ship's Statement of Cargo, Dry/Slop Certificates, Load-on-Top Certificate and Statement of Facts shall be signed by the Mooring Masters on behalf of the Company. After berthing, the Mooring Masters will remain onboard the tanker until she is unberthed and the cargo documents are completed.

Two separate cabins and food as per status to be provided to Mooring Masters during their stay on board.

Notwithstanding the presence of the Company's Mooring Masters onboard, the Master of the tanker remains responsible for his tanker at all times and in all respects.

In the event of any emergency, however, the necessary steps should be taken with the assistance of the Mooring Masters.

The Master of each tanker shall give the Mooring Masters all information necessary for the safe handling and the safe operation of the tanker while in the berth.

The Mooring Master will require the following information immediately on his boarding the tanker, to be relayed to CCR and Shipping Department prior to departure from tanker anchorage.

1. Name of Tanker.
2. Call Sign.
3. Flag.
4. Telex Number.
5. Summer D.W.T. in Long Tons.
6. N.R.T.
7. Arrival Time at Anchorage.
8. Notice of Readiness tendering time.
9. Arrival Draft.
10. Sailing Draft.
11. Documentation Type.
12. Cargo required in Net Barrels.
13. Maximum Loading Rate in Gross Barrels per hour.
14. Slow down time required.
15. Average ship/shore difference in Long Tons (Vessel Experience Factor).
16. Deballasting time prior to commencement of loading.
17. Master's Family Name and Initials.

BALLAST: *Prevention of Sea Pollution by Oil:* THE DISCHARGE OF DIRTY BALLAST and/or OIL RESIDUE, BILGE and WASTE OIL by any vessel in the GULF area is STRICTLY PROHIBITED. The Company strongly requests all vessels to observe this rule of sea pollution prevention by oil in conformity with the Saudi Arabian Government's policy objectives as well as their Ports, Harbours and Lighthouses Regulations along with the relevant rules, which are substantially as follows:

In the event of oil pollution of the sea by any vessel, Masters are liable to possible imprisonment and fine, in addition to the refundment of all clean-up costs and damages sustained by any party. Should Masters fail to comply, they may be detained by the Authorities. Shipping Agents will be required to warrant Master's compliance.

Since the terminal has no facilities to receive dirty ballast, oil tankers arriving with dirty ballast will be requested to collect dirty ballast into one tank of the tanker, otherwise load crude oil on top of oil residue.

Recommended Ballast Condition on Arrival: All tankers arriving at this port are required to have sufficient ballast to give a safe draft for manoeuvring in the port. Tankers arriving with insufficient ballast may be required to increase it if the Mooring Master considers it necessary to do so. In good weather conditions, the Mooring Master will permit arriving tankers to start deballasting as they approach the berth in order to save time.

BOARDING: For the benefit of people boarding at the anchorage area, vessels should provide a safe means of access on the lee side.

All vessels are required to provide a safe means of access for personnel boarding and leaving the vessel, and should have their accommodation ladder rigged on the port side. In the case of tankers assigned to Berth No. 3 or No. 4 an accommodation ladder which leads down forwards is liable to be blocked by the floating hoses, and in such a case the accommodation ladder should be rigged on the starboard side. An accommodation ladder leading aft is always suitable on the port side. Accommodation ladder should always be kept 5.0 m. above water and ready to be lowered whenever required. Pilot ladder is not required.

ANCHORAGE: *Ocean Tankers Anchorage Area:* The oil tankers anchorage area is designated within 1 mile radius from:

Lat. 28° 29.5′ N., Long. 48° 39.0′ E.

Two Light Buoys (No. 9 and No. 10) mark the Western limit and Southern limit of this area respectively. The depth of water varies from 70 ft. (21.34 m.) to 77 ft. (23.47 m.) with a good holding ground of clay mud. Oil tankers awaiting berthing should anchor as close as possible to these buoys.

Dry-Cargo Ships Anchorage Area: The anchorage area for dry-cargo ships is located about 5.5 miles to the S.W. of the oil tanker anchorage area, and is centred in position: Lat. 28° 26.8′ N., Long. 48° 33.4′ E. at which position a yellow Light Buoy (No. 14) showing a flashing yellow light every 3 seconds has been laid. Dry cargo ships should anchor within 0.5 mile radius of this buoy, where the depths are between 36 ft. (10.97 m.) to 50 ft. (15.24 m.) in a good holding ground of clay mud.

Prohibited Area from Navigation, Anchoring and Fishing: An area bounded by straight lines joining the following points is prohibited from anchoring and fishing.

The areas bounded by straight lines joining the following points are prohibited for anchoring and fishing, due to the presence of Wellheads, Flow Stations, Gathering Station, etc. and numerous pipelines and power transmission cables on the sea bed.

Additionally, the oil field areas A – C are prohibited from navigation of any oil tankers and vessels or crafts except these operating on direct instructions from the Company.

A. Khafji Oil Field area:

	Latitude	Longitude
(a)	28° 29′ 36″ N.	48° 52′ 45″ E.
(b)	28° 32′ 00″ N.	48° 54′ 00″ E.
(c)	28° 35′ 00″ N.	49° 00′ 00″ E.
(d)	28° 32′ 00″ N.	49° 04′ 00″ E.
(e)	28° 29′ 00″ N.	49° 04′ 00″ E.
(f)	28° 24′ 00″ N.	48° 52′ 00″ E.
(g)	28° 26′ 10″ N.	48° 52′ 00″ E.

B. Hout Oil Field and Dorra Gas Field area:

	Latitude	Longitude
(a)	28° 40′ 30″ N.	48° 54′ 30″ E.
(b)	28° 52′ 30″ N.	48° 59′ 30″ E.
(c)	29° 00′ 15″ N.	49° 07′ 00″ E.
(d)	28° 59′ 45″ N.	49° 13′ 00″ E.
(e)	28° 53′ 00″ N.	49° 08′ 30″ E.
(f)	28° 51′ 00″ N.	49° 04′ 00″ E.
(g)	28° 39′ 00″ N.	48° 59′ 30″ E.

However, the following area is exempted from prohibition of navigation.

(h)	28° 52′ 30″ N.	48° 59′ 30″ E.
(i)	28° 54′ 30″ N.	49° 01′ 15″ E.
(j)	28° 53′ 00″ N.	49° 08′ 30″ E.
(k)	28° 51′ 30″ N.	49° 05′ 00″ E.

C. Lulu Oil Field area:

The prohibited area from navigation is bounded within 1 nautical mile radius from the following locations.

	Latitude	Longitude
Well No. 1	28° 46′ 35″ N.	49° 28′ 36″ E.
Well No. 2	28° 38′ 51″ N.	49° 24′ 39″ E.

D. Area between Khafji Oil Field and Onshore Base:

	Latitude	Longitude
(1)	28° 24′ 48″ N.	48° 31′ 57″ E.
(2)	28° 25′ 33″ N.	48° 32′ 55″ E.
(3)	28° 29′ 00″ N.	48° 38′ 00″ E.
(4)	28° 27′ 15″ N.	48° 40′ 00″ E.
(5)	28° 29′ 39″ N.	48° 52′ 45″ E.
(6)	28° 26′ 10″ N.	48° 52′ 00″ E.
(7)	28° 22′ 55″ N.	48° 34′ 00″ E.
(8)	28° 23′ 25″ N.	48° 31′ 50″ E.

E. Area between Hout Oil Field and Khafji Oil Field:

	Latitude	Longitude
(9)	28° 32′ 50″ N.	48° 55′ 30″ E.
(10)	28° 39′ 40″ N.	48° 57′ 00″ E.
(11)	28° 39′ 20″ N.	48° 58′ 10″ E.
(12)	28° 33′ 30″ N.	48° 56′ 50″ E.

RESTRICTIONS: *Port Closure:* When the visibility is effected or when the weather and sea conditions develop worse than the below mentioned permissible criteria at the port, mooring operations normally become extremely difficult and unsafe. Therefore, in such circumstances, the Company advises that the port is closed to approaching tankers by VHF, and requests the tankers to wait at the Tanker Anchorage Area until the port is reopened.

The Company, however, reserves the right of selective berthing of some tankers with better manoeuvrability even during such period.

Permissible Criteria for all Berths:

Wind Velocity: Up to 20-25 knots depending on direction.
Sea Conditions: Up to 5 ft.
Visibility: Less than 1 mile.

MAX. SIZE:

Berth	*Depth of water at ISLW* (ft.)	*Max. Permitted draft* (ft.)	*Designed tanker size* (d.w.t.)
No. 1	53	47	100,000
No. 2	56	50	100,000
No. 3	62-64**	54*	300,000
No. 4	70-73††	64‡	300,000

*56 ft. permissible using rise of tide.
‡66 ft. permissible using rise of tide.
**59 ft. over the piplines.
††69.5 ft. over the piplines.

HEALTH: *Quarantine and Pratique:* Quarantine Office of the Saudi Arabian Government is maintained at the port, and a Quarantine Doctor or a Quarantine Officer may board the vessel, if he considers it necessary.

The Master is requested to submit the following documents for the Government filing through his Agent:

(a) Crew List
(b) Vaccination List } 3 copies each
(c) Passenger List (if any)

All arriving vessels should despatch the following cable to Quarantine Office at the port 48 hours before their arrival at Ras Al-Khafji Port:

"QUARANTINE KHAFJI (ship's Agent cable address)
vessel's name ETA RAS AL-KHAFJI time and date
FLAG________ LAST PORT ________ DESTINATION ________
NO. OF CREW __________ NO. OF PASSENGERS ________
ALL HEALTHY NO SICKNESS NO DEATH VALID CERTIFICATE REQUEST FREE PRATIQUE.
MASTER ________________________"

Quarantine fee is collected from vessel according to her Nett Registered Tonnage other than tankers lifting hydrocarbon cargoes.

RADIO: *Notice of Arrival:* Arriving vessels should advise their ETA Khafji at least 72 hours before their arrival, (1) by telex to Terminal & Shipping, the Company's Field Office (841011 AAB, 841011 Arboil SJ) or (2) by telegram through Kuwait Radio Station (call sign: 9KK) via Singapore, Bombay or Bahrain Radio. Confirmation of ETA should be made well in advance before arrival by calling "Ras Al-Khafji Terminal" on Channel 16 VHF. Shorter notices may result in delays, and failure to give at least 24 hours notice will result in an addition to allowable laytime in the event a demurrage claim is filed against the Company. "Ras Al-Khafji Terminal" VHF station works 24 hours every day.

Radio Communications: All radio communications between the Company at Al-Khafji and the vessel are made directly to the Company's Field Office by Telex or Telegram, through the Kuwait Radio Station (9KK).

All Telexes and cables should be addressed to 841011 (AAB 841011 Arboil SJ) for telex or ARABIAOIL KUWAIT for cable. The first message should be sent according to the following form, but any items which are the same as a recent previous voyage to this port may be omitted.

(1) ETA Ras Al-Khafji.
(2) Last port.
(3) Deballasting time.
(4) Quantity and type of cargo and bunker required.
(5) Prefered order of loading when batch loading required.
(6) Maximum loading rate.
(7) Mooring equipment (Bow Chain Stopper or Bollard).
(8) Diameter of cargo and bunker connections.
(9) Distance from manifold to ship's side.
(10) Derrick capacity.
(11) Estimated sailing drafts – fore and aft.
(12) Port Rotation of Ras Al-Khafji.

VHF: Short-range communication can be made with Terminal Office b calling "Ras-al-Khafji Terminal" on VHF Channel 16. Working Channe are 6,14,67 and 75. Vessels should call Ras Al-Khafji Terminal severa hours before arrival to confirm ETA and receive berthing instruction After anchoring they should advise their anchoring time and the maintain watch on Channel 16 until the Mooring Masters board. Termina VHF Station works 24 hours every day.

RADAR No services available.

TUGS: Tugs up to 4,200 b.h.p. are available for mooring and unmoorin purposes.

Mooring boats are used for handling ropes and hoses.

BERTHING:

Berths No. 1 and No. 2:

(a) Sea-Berth No. 1:

Manifold position:	Lat. 28° 26′ 10″ N., Long. 48° 34′ 57″ E.
Depth of water:	53 ft. (16.2 m.) at ISLW.
Permitted draft:	47 ft. (14.3 m.) max.
Type of berth:	The berth is a conventional 4-buoy system wher the tanker moors with 2 anchors and 1 buoy forwar and to 3 buoys aft.
Length of berth:	The berth is designed for tankers of 800 ft. (244 m length but can be used by tankers of any size although tankers of less than 650 ft. (198 m.) overa length sometimes experience difficulty in mooring their lines are less than a full 720 ft. (220 m.).
Hoses:	From the manifold 2×10 in. rubber hoses for crud oil and 1×12 in. rubber hose for fuel oil an connected, approximately 270 ft. (82 m.) long an the maximum lifting weight of the 2 crude oil hose together is 4.5 tons – 5.0 tons. For bunkerin purpose one section of 6 in. hose is attached to th end of the 12 in. fuel oil hose.

(b) Sea-Berth No. 2:

Manifold position:	Lat. 28° 25′ 55″ N., Long. 48° 35′ 28″ E.
Depth of water:	56 ft. (17.1 m.) at ISLW.
Permitted draft:	50 ft. (15.2 m.) max.
Type of berth:	Same as Berth No. 1.
Length of berth:	Same as Berth No. 1.
Hoses:	From the manifold 2×10 in. rubber hoses for crud oil and 1×6 in. rubber hose for bunker an connected to the ship's manifold. All these hose are approximately 360 ft. (110 m.) in length, and th maximum lifting weight of 2 crude oil hose (2 lengths) together is about 5.0 ton and that c bunker hose is about 3.0 tons.

(c) Loading Rates:

Crude oil loading rate at Berths No. 1 and No. 2 is 30,000 bbls./h or 4,000 tons/hr.

Fuel oil loading rate at Berth No. 1 is 5,300 bbls./hr. or 800 tons/hr and at Berth No. 2 is 2,700 bbls./hr. or 400 tons/hr.

(d) Preparation on Board before Berthing: Tankers assigned to Bert No. 1 or No. 2 should have the following ready:

(i) Both Anchors.
(ii) 3 ropes forward and 9 ropes aft. Minimum circumferenc 10 in., length 720 ft.
Some wires are acceptable in place of the equivalent numbe of ropes.
Neither ropes nor wires are available from the buoys.
All ropes and wires should be in good condition and preferab without splices.
(iii) Port derrick rigged for a minimum lift of 5 tons, using a wir runner and hook.
(iv) Two 10 in. ANSI 150 hose connections for crude oil, an 1×12 in. ANSI 150 at Berth No. 1 and 1×6 in. ANSI 150 a Berth No. 2 for fuel oil cargo, at the ship's port side manifol If reducers are not available, the company should be advise before arrival.

(e) Mooring and Unmooring: Mooring operations at Berths No. 1 an 2 are restricted to daylight hours only to prevent accidents.

On approaching the berth a ship's line is passed to one tugboat fro the centre fairlead aft. This hawser should be of good strength and mad well fast on board.

When in position off the berth, the starboard anchor is let go an slacked away easily to about 9 or 10 shackles on deck. The port ancho is then let go and paid out easily as the tanker swings round into th berth using the tugs and engines as required. At the same time, th starboard anchor is hove in to about 6 or 7 shackles on deck and the made ready for slacking away again.

As the tanker backs down the berth the anchors are slacked away a necessary, and the ropes are sent to the forward (No. 4) Buoy. Whe the stern passes close to the starboard quarter (No. 1) Buoy the rope are sent away to this buoy, hove in tight and then put on the bitts read for slacking if necessary.

Ropes are then run to the port quarter (No. 3) Buoy, hove tight, an the lateral position in the berth adjusted between the port and starboa quarter buoys.

Lastly, ropes are run to the stern (No. 2) Buoy and the tug line als passes to this buoy. The fore-and-aft position is then adjusted betwee the anchors and the sternlines. A second tug is used to assist in th lateral positioning of the tanker, and 2 mooring boats are used for runnin the lines to the buoys, these normally taking 3 ropes at a time.

When properly positioned in the berth, the distance from the ship side to the manifold marker buoy should be about 50 ft. – 66 ft. (15 m 20 m.).

One tug is on stand-by near berths as long as a tanker remai moored in berth.

When hose disconnection is completed, the tanker unmoors usua by letting go all the lines on Buoys No. 3 and No. 4, followed by tho on Buoy No. 2 and lastly those on Buoy No. 1. The tanker then heav both anchors as necessary until they are up and clear, and the tank can leave the berth. The tugs are used as required to keep the tanker away from the manifold marker and the mooring buoys.

Mooring Masters may vary this procedure according to the prevailing weather.

(f) Hose Connection and Disconnection: After the completion of mooring, the mooring boat will pull the hose float buoys to the tanker, and connect them to the tanker's cargo hook of port derrick. The 2 crude oil hoses are lifted together from the seabed by the tanker's derrick, and connected directly to the manifold.

The fuel oil hose is lifted separately and connected in similar manner. Derrick/Crane hook should be open type, suitable to slip through the ring of the float buoy. The inner diameter of ring is 8 in. Whenever derrick/crane hook is directly connected to lifting block, or when hook is of locking type, additional wire sling, length 6 ft., and open type hook of suitable S.W.L. is required to be provided by tanker.

The time taken for hose connection is about 1.0 – 1.5 hours depending on the number of hoses to be connected. Hose disconnection takes about 1 hour.

Connection and disconnection of the cargo and bunker hoses are to be performed by the crew of the loading tanker under the direction of the Mooring Master. Bolts, nuts, gaskets, reducers, etc. will be provided by the Company.

(g) Loading Restriction at Berth Nos. 1 and 2: (1) Due to only one crude oil pipeline being between the ex-loading Dock and the shore, it is not possible to load tankers with crude in Berths No. 1 and 2 simultaneously. (2) Due to refined products pipelines arrangement onshore, it is not possible to load tankers with fuel oil, bunker oil or crude comingled with refined products in Berths No. 1 and No. 2 simultaneously and also such loading in Berths No. 1 or No. 2 is not possible while those are being loaded in Berths No. 3 or No. 4.

Berth Nos. 3 and 4:

(a) Berth No. 3:

Position of buoy:	Lat. 28° 27′ 06″ N., Long. 48° 36′ 28″ E.
Depth of water:	62 ft. – 64 ft. (18.9 m. – 19.5 m.), but 59 ft. (18.0 m.) over the pipelines, at ISLW.
Permitted draft:	Normally 54 ft. (16.5 m.), but 56 ft. (17.1 m.) permissible using rise of tide.
Type of berth:	The berth is designed for a type of tanker of 300,000 tons d.w.t. and has a single-buoy-mooring system consisting of a buoy 36 ft. (11.0 m.) in diameter, moored to 6 pendant legs of 3.75 in. (95 mm.) rod diameter extra high strength chain of 720 ft. (220 m.) long, and having a rotating deck carrying the pipeline and mooring connections.
Mooring:	Mooring connection at SBM consists of 2.75 in. (70 mm.) rod diameter stud link chain extra high strength of 25 ft. (7.6 m.) long and breaking strength of 225 tons. Attached to the mooring connections on the buoy are 2 double 15 in. nylon ropes (120 mm. diameter, breaking strain 250 tons/line), these main ropes supported by floats are 160 ft. (49 m.) long, and have at their free end a 35 ft. (10.7 m.) long stud link chain which includes a "Sister-plate" and a "Slender-link" for connection directly to the tanker's bow chain stopper or for receiving the shackles used on the deck of the tanker. From the outer end of this chain there is connected a 10 in. (80 mm. dia.), polypropylene "Pick-up" rope about 165 ft. (50 m.) in length. The chain is hung by large iron buoys coloured red and green in the case of a tanker not equipped with the above chain stopper or a 12 in. nylon "Bollard rope" (97 mm. dia., breaking strain 150 tons/line) about 150 ft. (46 m.) in length is connected between each "Sister-plate" and ship's bollard while tankers moor in berth. Above bollard ropes and shackles are provided by the Company.
Submarine Pipeline and Hoses:	1×36 in. crude oil line and 2×12 in. fuel oil lines are laid approximately 30,000 ft. (9,140 m.) from the shore to a position, of the underwater manifold close under the buoy through the Valve Platform which is located at about 4,000 ft. (1,220 m.) Westward of the buoy. From the underwater manifold the crude oil goes to the buoy through 1×20 in. submarine hose; the fuel oil lines are joined at the underwater manifold and the fuel oil is led to the buoy through 1×10 in. submarine hose. From the deck of the buoy the 20 in. crude oil hose and the 10 in. fuel oil hose, which are floating, have a length of 720 ft. (220 m.) to a hose raft, at which position the crude oil hose is divided into 3 strings of 12 in. floating hoses. These, together with the fuel oil hose, extend for a further 150 ft. (46 m.) making a total length of 876 ft. (267 m.) including the raft of 6 ft. (2.0 m.). At their free end the hoses are connected to 4 large marker buoys each 3.3 ft. in diameter. The maximum weight of one crude oil hose (2 lengths) with hose float buoy and chain is about 6.5 tons, and that of bunker hose is about 3 tons.

(b) Berth No. 4:

Position of buoy:	Lat. 28° 27′ 54″ N., Long. 48° 38′ 36″ E.
Depth of water:	70 ft. – 73 ft. (21.3 m. – 22.3 m.), but 69.5 ft. (21.2 m.) above the pipe-lines, at ISLW.
Permitted draft:	Normally 64 ft. (19.5 m.), but 66 ft. (20.1 m.) is permissible using rising of tide.
Type of berth:	The berth is designed for a type of tanker of 300,000 Long ton d.w.t. and has a single-buoy-mooring system consisting of a buoy 33 ft. (10.0 m.) in diameter, moored to 6 pendant legs of 3.75 in. extra high strength chain of 855 ft. (261 m.) long, and having a rotating deck carrying the pipeline and mooring connections.
Mooring:	The particulars of mooring are exactly the same as those of Berth No. 3.
Submarine Pipelines and Hoses:	1×36 in. crude oil line and 2×12 in. fuel oil lines from onshore are branched at the Valve Platform, which is located at about 16,000 ft. (5,060 m.) Westward of the buoy, by 1×48 in. crude line and 1×16 in. fuel line to Berth No. 4. There is also 1×30 in. connecting crude line between the Ex-Loading Dock and the Valve Platform to raise up the loading rate at Berth No. 4. The above 1×48 in. crude line and 1×16 in. fuel line are laid from the Valve Platform to a position of underwater manifold close under the buoy. From there the crude oil goes to the buoy through 1×24 in. submarine hose, the fuel oil is led to the buoy through 1×10 in. submarine hose. From the deck of the buoy the 24 in. crude oil hose and the 10 in. fuel oil hose, which are floating hoses, have a length of 810 ft. (247 m.) to a hose raft, at which position the 24 in. hose is divided into 3 strings of 14 in. floating hoses. These, together with the 10 in. fuel oil hose, extend for a further 150 ft. (46.6 m.) including the raft of 6 ft. (2.0 m.). At their free end, these hoses are connected to 4 large marker buoys each 3.3 ft. in diameter. The maximum lifting weight of one crude oil hose (2 lengths) with hose float buoy and chain is about 7.5 tons, and that of bunker hose is about 3.0 tons.

(c) Loading Rates at Berths No. 3 and 4: The maximum loading rates of crude and fuel oil at Berth No. 3 are 45,000 bbls./p.h. (6,200 t.p.h.) and 2,700 bbls./p.h. (400 t.p.h.) respectively. At Berth No. 4 these are 62,000 bbls./p.h. (8,500 t.p.h.) and 3,400 bbls./p.h. (500 t.p.h.).

(d) Preparation Onboard before Berthing at Berths No. 3 and No. 4: The Company strongly recommends to the owners of tankers that the tankers to be assigned to Berth No. 3 or Berth No 4, shall be fitted with Bow Chain Stoppers recommended by OCIMF, or alternatively equipped with a pair of Smit Type Brackets in a correct position, which can be accepted in place of the Bow Chain Stoppers so far as tanker has the Chafe Chains to be connected between her Smit Type Bracket and a Sister Plate of our mooring lines.

Before arriving at the anchorage, tankers assigned to Berth No. 3 or No. 4 should have ready the following:

(i) Two mooring hawsers as messenger ropes forward, together with 2×20 ft. rope stoppers, and also 1 or 2 crowbars.

(ii) Port derrick rigged for 10 tons, swung out 2.0 m. beyond the ship's side.

(iii) 3×12 in. ANSI 150 at Berth No. 3 or 3×14 in. ANSI 150 at Berth No. 4 hose connections for crude oil, and 1×10 in. ANSI 150 for fuel oil at the port side manifold. If above reducers are not available, the Company should be advised before arrival.

(e) Mooring at Berths No. 3 and No. 4: The Mooring Masters will board from a tugboat which carries the mooring and hose connection materials. Tankers should have their crew stand-by to receive these materials, and should maintain a port lee until this is completed.

The Mooring Master will instruct the crew in the setting up of the forward moorings, where 12 in. bollard ropes are made fast round the port and starboard bollard posts with their attached shackles about 12 ft. (3.7 m.) inboard from the panama leads or fairleads as far forward as possible. The size of the Panama leads or the fairlead opening should be at least 14 in. vertical and horizontal to prevent the chain jamming in the Panama leads or the fairlead.

On approaching the berth, the tanker should lower a mooring hawser as messenger rope from each bow with rope stopper attached. The mooring boat will take any rope first, and connect it to the appropriate "Pick-up" rope which should be hove in while the boat returns to take the other rope for connection to its "Pick-up" rope. These 2 ropes are then hove in until the chains come through the Panama leads or the fairleads, and the shackles can be made fast to the "Sister-plates". The "Pick-up" ropes are then slacked back until the bollard ropes have the weight.

On tankers fitted with Bow Chain Stoppers, the pick-up ropes are hove in until the chains come through the Panama leads or fairleads and then through the Bow Chain Stoppers. The tongues or hinge bars of Bow Chain Stoppers are then set in position to secure chain within Bow Chain Stoppers. The Pick-up ropes are then slacked back until Bow Chain Stoppers have the weight. Mooring is then completed, and the usual time from sending away the first line until all fast is about 30 minutes.

Immediately after the tanker moors to SBM, her stern line shall be given to the stand-by tugboat through her middle fairlead to help maintain the tanker in safe position while the tanker is in the berth. For this purpose, a hawser of 12 in. circumference, and 720 ft. length is required.

(f) Unmooring from Berths No. 3 and No. 4: After hose disconnection is completed, the weight is taken on the "Pick-up" ropes, the stoppers of the Bow Chain Stoppers and unlocked or the bollard ropes are unshackled, and as the tanker backs off the berth the "Pick-up" ropes are slacked off and then dropped into the water. The tug will come alongside either before or after the tanker backs off the berth, whichever is convenient, and the bollard ropes and the two big shackles are passed to the tug. Unmooring time is usually 10 minutes.

(g) Hose Connection and Disconnection at Berths No. 3 and No. 4: After the completion of mooring, the mooring boat which has been holding the hoses clear during berthing, will bring the hoses to the port side of the tanker and connect the pontoon rope to the hose raft and then proceed to the manifold to connect the hook to one buoy having 1 hose, which is lifted aboard and connected directly to the tanker's manifold.

Derrick/Crane hook should be open type suitable to slip through the ring of the float buoy. The inner diameter of ring is 8 in. Whenever derrick/crane hook is directly connected to lifting blocking, or when hook is of locking type, additional wire sling, length 6 ft., and open type hook of suitable S.W.L. is required to be provided by the tanker.

The hoses are hung off on 2.625 in. diameter nylon ropes and lashed to the rail to prevent shock load due to wave action being transmitted to the manifold flanges.

After the first hose has been connected, the second buoy is lifted and the remaining hoses are connected in similar manner. If an arriving tanker requires a loading rate of 36,000 bbls./hr. (5,000 t.p.h.) or less at Berth No. 3, and 44,000 bbls./hr. (6,000 t.p.h.) or less at Berth No. 4, only 2 crude oil hoses are connected. Hose connection usually takes 2 – 3 hours. Hose disconnection is done in a reverse manner to connection, and takes about 1.5 – 2.0 hours. Connection and disconnection of the cargo and bunker hoses are to be performed by the crew of the loading tanker under the direction of the Mooring Master. Bolts, nuts, gaskets, reducers, etc., will be provided by the Company.

(h) Loading Restriction at Berths No. 3 and No. 4: (1) Due to only one crude pipeline being between Valve Platform and shore, it is not possible to load tankers in Berths No. 3 and No. 4 simultaneously.

(2) Due to refined products pipeline arrangement onshore, it is not possible to load tankers with fuel oil, bunker oil or crude commingled with refined products in Berths No. 3 and 4 simultaneously, and also such loading in Berths No. 3 or 4 is not possible while those are being loaded in Berths No. 1 or 2.

LOADING: *Dry Inspection:* Upon completion of deballasting the Mooring Master will inspect the tanker's tanks. If the tanks are not satisfactory, he may require further pumping until they reach the required standard.

Loading Operations: Particulars of oil available for loading is as follows:

Grade	Estimated	Estimated	Temp. °F
	API	Summer	Winter
Khafji Crude	27 – 29	100	70
Khafji Blend	27 – 29	110	80
Khafji Special	27 – 29	110	80
Hout Crude	32 – 34	110	80
Hout Blend	32 – 34	110	80
Hout Special	32 – 34	110	80
Fuel	16 – 18	140	120
Naphtha	63 – 65	80	60

All submarine pipelines, submarine hoses and floating hoses meant for loading crude oil are at all times kept filled and pressurised with "Khafji Crude" oil. Pipeline contents of such "Khafji Crude" oil at each berth are as follows:

Berth 1	:	16,000 Gross Barrels.
Berth 2	:	16,000 Gross Barrels.
Berth 3	:	36,000 Gross Barrels.
Berth 4	:	68,000 Gross Barrels.

Whenever a tanker is to load any other grade, which does not have "Khafji Crude" oil, the tanker has to receive "Khafji Crude" oil pipeline contents according to berth, prior to commencement of any other grade which dose not have "Khafji Crude" oil.

Similarly, if the tanker is loading any grade other than "Khafji Crude" oil, the tanker has to receive final quantity of that grade equivalent to pipeline contents according to berth, as at that stage, "Khafji Crude" oil will be pumped into pipelines to keep all submarine pipelines, submarine hoses and floating hoses full of "Khafji Crude" oil by the time tanker receives final quantity.

The Mooring Masters on board will advise and guide tanker Master about procedure of such loading.

Fuel as cargo is loaded through bunker hose.

Pure Naphtha is not loaded.

When the tanker is ready in all respects for loading, the tanker's officer must inform the Mooring Master, who will transmit the necessary orders to the Central Control Room onshore.

Loading is started by one booster pump, at the rate of 10,000 bbls./hr., and after everything has been checked and found satisfactory on board, then the loading rate will be gradually increased by starting further booster pumps and then main pumps in sequence until the required loading rate is reached; provided always that the required loading rate is within the capacity of the pumps.

Loading rates can be varied at any time during loading upon 5 – 10 minutes advance notice to the Mooring Master on board. In case of EMERGENCY, the IMMEDIATE STOPPING of all loading can be accomplished.

During loading, any valve operation on the tanker should be reported to the Mooring Master in advance. Especially at the time of Topping Off, the tanker's officer on duty should request the Mooring Master to reduce loading rate prior to any valve closing, in order to avoid any pressure on rubber loading hoses.

When loading is completed, the rate is gradually reduced by stopping first the main pumps and then the booster pumps, one by one according to the request of the tanker's officer. At the final stage of loading only one booster pump should be on the line, and the tanker's officer should tell the Mooring Master to "Stand-by" at least 5 – 10 minutes before finishing loading.

Shore pumps will stop about 15 seconds after their control buttons are pressed, but the oil will continue to flow for several minutes.

Any stop notice of loading completion must be given by the tanker's officer as "Shore-stop" is NOT practised at this port.

Overflows and Spillage: In the event of an overflow or spillage durin loading, loading will be stopped immediately and will remain stoppe unless the Mooring Master is satisfied that all the overflowed oil ha been cleared off the deck and there is no longer any unusual dang for resuming loading.

Ullaging and Gauging: After loading is completed, the Mooring Maste will witness the final ullaging on board so that the tanker's figures ca be calculated.

Onshore the Government and the Company gaugers will take manu gauges of the shore tanks before and after loading to calculate th figures of the Bill of Lading. Final API and Bill of Lading quantities w be communicated to the tanker Master by the Company through th Mooring Master prior to tanker's departure from port.

STEVEDORES: Dry-cargo vessels calling Ras Al-Khafji to give at leas 72 hours notice to Agents to arrange labourers. Stevedores will b arranged from Kuwait. Ship's gear used for discharging which take place at anchorage into barges.

MEDICAL: The Company has its hospitals at Ras Al-Khafji. Medical an dental treatment can be given in cases of emergency or serious illnes or injury. Epidemic diseases or cases of serious injury or diseas requiring operations, etc. are normally transferred to the hospitals i Dammam or in Kuwait. The Company's doctor will not normally atten on board unless the patient is incapable of attending the hospita Requests for medical attention should be given to the ship's Agent a early as possible before arrival.

FRESH WATER: Not available except in cases of extreme emergenc

FUEL: *General Information:* Intermediate fuel oil (IFO) and marine dies oil (MDO) are supplied as bunker oil to tankers calling at Ras Al-Khaf Each loading berth has a pipeline which can deliver intermediate fu oil. Marine diesel oil is supplied from a barge with a capacity 200 tonnes for which no extra charge is made.

Bunker Nomination: Owners, Operators or Charterers should nominat their tankers' bunker requirements to the Company's Head Office Tokyo.

Tankers are requested to confirm the grade and quantity of bunker required to Terminal and Shipping, The Company's Field Office (841011 AAB 841011 Arboil SJ) by telex or telegram to "ARABIAOIL KUWAIT via "9KK" through normal radio services at least 72 hours before arriva or in cases where tankers receive their bunker instructions less tha 72 hours away, they should advise their bunker requirements as soo as possible.

Bunkering Operation: Bunker supply to tankers in the berths is normall made while the tankers are discharging ballast and/or loading crude o MDO-supply from a barge will be done usually before loading cargo.

Tanker engineers are requested to give all necessary information an assistance to the shore staff attending the bunkering and to pay consta attention to the bunker supply.

Responsibility: Notwithstanding the presence of the shore staff attendin the bunkering operation on board, the Master of the tanker remain solely responsible for his tanker at all times and in all respects.

Size of Bunker Connections and Bunkering Rates:

Berth	*IFO*	*MDO (supply from a barge)*
No. 1 (6 in.)	400/300 t.p.h.	80 t.p.h. (4 in.)
No. 1 (12 in.)	800/300 t.p.h.	80 t.p.h. (4 in.)
No. 2 (6 in.)	400/300 t.p.h.	80 t.p.h. (4 in.)
No. 3 (10 in.)	400/300 t.p.h.	80 t.p.h. (4 in.)
No. 4 (10 in.)	500/300 t.p.h.	80 t.p.h. (4 in.)

Note: In Winter time the rate for IFO decreases due to the low sea water temperature which increases the viscosity of the oil.

Bunkering for Dry-Cargo Ships: Bunker supply to dry-cargo ships is n available at this port.

CONSULS: None.

CUSTOMS: *Customs Formalities:* Upon arrival, the Master is require to submit to the Customs a Manifest of any cargo to be landed at Ra Al-Khafji and to sign a declaration that no intoxicating liquor or drug will be landed.

A Coast Guard accompanied by the ship's Agent boards to se bonded stores. Dry-cargo ships are boarded by a Customs Officer, Coast Guard and a Quarantine Officer for sealing stores, checking val certificates and health inspections.

Import of the following articles is strictly forbidden:

(a) Alcoholic beverages, including beer, wine and liquor.
(b) Pornographic literature, photographs, pictures and films.
(c) Explosives.
(d) Firearms or implements of war of any kind.
(e) Religious matters not pertaining to the Moslem faith.
(f) Gambling devices.

The Saudi Arabian Laws and Regulations: The Saudi Arabian Laws an Regulations are strictly enforced, and Masters having any doub concerning the interpretation of these regulations are urged to consu their Agent. While in port, whether at anchorage or in the berth, th vessel's personnel are under the jurisdiction of Saudi Arabian law Taking of photographs while the ship is in the Port of Ras Al-Khafji prohibited by the Saudi Arabian Government.

All materials to be either exported from or imported into Saudi Arab are subject to examination by Customs authorities. The import of certa articles is strictly prohibited and such articles include but are not limite to the following:

(1) Explosives and firearms, including air rifles.
(2) Implements of war of any kind, including antique weapons.
(3) Narcotics.
(4) Religious matter not pertaining to the Moslem Faith.
(5) Playing cards and gambling devices.
(6) Printed photographic matter or video tape depicting what could considered pornographic.
(7) Alcoholic beverages of any description.

Items (4), (5), (6), and (7) of the above items on board any vess calling at the port of Ras Al-Khafji shall be secured in appropriate lock store rooms which will be sealed by the authorities who may carry o inspections, to ensure that the seal is intact and that none of the abo articles are in use. The seal must remain intact during the entire period of the vessel's stay in the port of Ras Al-Khafji, and must not be broken until after the vessel has finally departed for the port in another country.

Trafficking in any of the above articles between vessel or vessel's crew and shore personnel is strictly prohibited. The baggage of crew joining and leaving vessels will be inspected to ensure that it contains none of the prohibited articles.

Penalties are severe and major delays to vessels can be incurred due to the Goverment investigations of violations.

WATCHMEN: The tanker always has to post at least 2 watchmen on duty: one on the forecastle head to watch and monitor the condition of the mooring ropes and the behaviour of the tanker by forces of wind and tidal current, and another on deck near or within sight of the manifold. They have to report to the Master and the Mooring Master whenever they observe the tanker drifting too close to the berth, or the loading hoses twisted or whenever they recognise anything unusual, so that the Master and the Mooring Master may properly manoeuvre the tanker and any mishap may be averted.

WEATHER: The local weather at Ras Al-Khafji is hot and dry with little cloud during the long Summer from May to September and considerably colder in December and January.

The mean monthly maximum temperature is in the range of 18° C. – 41° C., and the daily highest was 48.9° C., which was recorded in August 1987 and the daily lowest was – 1.4° C. in February 1971.

Rainfall concentrates during the period from October to May and annual precipitation in the area is 104 mm. on an average.

The prevailing wind in this area is Northwesterly, however winds of varying strength may come from any direction. In Summer, the diurnal sea breeze is light Easterly at about 5 m. – 7 m. per second (10 – 14 knots), and only rarely it increases to 12 m. per second (23 knots). In Winter South-Southeasterly winds of up to 20 m. per second (39 knots) may last one or two days and then veer suddenly to the N.W., often accompanied by gusts or squalls in excess of 20 m. per second. On occasion a type of line squall passes over and winds up to as much as 30 m. per second (58 knots) may be experienced for a short time before settling down to blow for longer periods at 20 m. per second. Little or no warning of these strong squalls is given; they just appear suddenly, often accompanied by thick sand and dust.

In the area of the Sea Berths, the waves are prevented from developing by the short fetch of the Northwesterly wind, but waves up to 5 ft. – 6 ft. do occur from this direction. Southeasterly winds raise a short steep sea which quickly reaches 7 ft. – 8 ft. high. This lengthens and increases as the wind freshens and has been known to reach 14 ft. – 15 ft. in the area of the Sea Berths. When the Southeasterly wind veers the swell rapidly decreases but persists for about 24 hours thereafter.

Visibility in the area is generally good, but Northwesterly winds cause rising dust and sand which may reduce visibility to almost zero at times. Haze is common, and on calm hot days mirages are frequent. "Steam fog" may occur at times in the early morning hours resulting in very poor visibility.

TIDES/CURRENTS: The depths shown on the chart are based on ISLW. The diurnal rise of tide is approximately 5 ft. at the Springs and 4 ft. at Neaps, and the ISLW is 4 ft. below the Mean Sea Level.

The heights of both high and low water are considerably affected by the prevailing weather conditions. Northerly winds tend to reduce the heights of tides and retard them, and Southerly winds increase the heights slightly.

Near the Sea Berths the current flows roughly parallel with the shore, and reverses its direction about 1 hour earlier than the time of high or low water inshore at Ras Al-Khafji. The velocity of the current is approximately 1.5 knots at the maximum.

Both the direction and velocity of the tidal current are much affected by the prevailing weather conditions.

The tidal data for Ras Al-Khafji as compared with that of Mina Al-Ahmadi is given as follows:

Flood tide: Occurs approximately 30 minutes later than Mina Al-Ahmadi.
Height approximately 2.13 ft. less than that of Mina Al-Ahmadi.
Ebb Tide: Occurs approximately 2 minutes later than Mina Al-Ahmadi.
Height approximately 0.16 ft. less than that of Mina Al-Ahmadi.

"Tide and Current Table" published annually is available from the Company upon request.

REPAIRS: Some minor repairs on board vessels may be made using shore assistance in case of extreme emergency, but such Company's assistance will be provided only on the Master's and the shipping Agent's acceptance for undertaking to pay to the Company all expenses incurred. Preferably all repairs should be carried out at the anchorage area. In all cases when shore assistance is required, the Master should notify the vessel's Agent well in advance.

DRY DOCKS: None.

AIRPORT: Crew joining must be routed through Dhahran Airport (325 km.). Kuwait Airport 110 km.

TIME: GMT plus 3 hours throughout year.

TELEPHONES: No facilities for placing on board.

SERVICES: *Provisions, Deck Stores:* Provisions and deck stores are available from ship chandlers at the Port in limited kinds and quantities. In all cases the ship's Agent should be advised of the requests at the earliest possible time before arrival.

SHORE LEAVE: Not normally permitted by Authorities except by arrangement through the ship's Agent.

AUTHORITY: Port of Ras Al-Khafji, Port Officer, Ras Al-Khafji 31971 Kingdom of Saudi Arabia. *Tel:* (03) 766 1016. *Telex:* 841057 PORT KSJ. *Contact:* Mr. Abdul Dalem, Port Office.

AGENT: See "Ras Tanura".

RAS AL MISHAB: 28.13 N. 48.43 E. (See Plan)

PILOTAGE: Pilotage is compulsory and only available in daylight hours (0600 to 1700 hrs.) 7 days a week with short notice prior to vessel's arrival.

Vessels calling at Ras Al Mishab are requested to contact Ras Al Mishab Harbour Office on VHF – Channel 16 prior to arrival at Pilot Buoy, (Buoy No. 5 of Ras Al Mishab Approach Channel) which is located at Lat. 28° 13′ N., Long. 48° 43′ E.; do not proceed beyond this point before consulting with Ras Al Mishab Harbour Office, which is available from 0600 to 1700 hrs. every day except Friday.

APPROACHES: Do not use the old recommended track to Bandar Mishab shown on British Admiralty Chart No. 3774 and U.S. Hydrographic Chart 62422 unless corrected. Ships arriving should follow Ras al Khafji Approach Channel Buoy No. 1 (Lat. 28° 36′ N., Long. 49° 10′ E.) and Buoy No. 2 (Lat. 28° 36′ N., Long. 49° 00′ E.). From Light Buoy No. 2 proceed on a course of 253°(T) for approximately 5 miles and the following is the new approach channel to the anchorage and entrance channel of Ras al Mishab.

The dredged channel of 4 miles is well marked by the buoys and 2 pairs of ranges that lead vessels in and out of the port.

ANCHORAGE: Anchorage area is between Buoys No. 4 and 5.

RESTRICTIONS: Daylight berthing and unberthing only.

MAX. SIZE: Max. allowed draft at present time is 33 ft. However, after completion of works on expansion of the port, which is under way, port expected to accommodate vessels up to 35 ft. draft regardless of length and/or tonnage.

VHF: See "Pilotage".

TUGS: The port has 2 tugboats available to assist vessels in docking and undocking as well as any other service to be rendered in case of need for assistance. Each tugboat is capable of generating 2,000 h.p.

BERTHING: Ras Al Mishab is a deep water sea port with 2,400 ft. of berthing space. The turning basin of 1,250 ft. radius provides safe manoeuvring.

The pier is 18 ft. high above the water and accordingly not suitable for Ro/Ro cargo operation, however, the harbour is well equipped for receiving any type and size of cargo including heavy lifts and bulk cement up to 24,000 tons. Silo capacity 25,000 tonnes.

The harbour is fully equipped with forklifts, discharging gear, spreaders for 20 ft. and 40 ft. containers. portable cranes up to 300 tons capacity, all handled by professional stevedores.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: Provisions not available at this port, and it is suggested that vessels calling to Ras Al Mishab, secure their needs at other ports. Only emergency medical attention shall be provided if requested by Master.

No shore leave is permitted in this port except for the Master for business purposes, the Port Regulations are to be strictly observed by all vessels.

Any other matters such as crew changes, emergency repairs provisions, etc., shall be handled through local Agent.

SHIPMASTER'S REPORT: September 1980.

Pilotage: Pilot boards 3 miles South of Buoy No. 5G.

Berthing: A new berth built 2 years ago at right angles to land with dimensions about 1,000 m. length and 250 m. wide, accommodating 8 ships, 4 on each side. 1 berth is for cement in bulk, having silo. (Sea Island berth is severely damaged and abandoned).

Stevedores: Working day and night in 3 shifts.

Clearance: Vessels are cleared any time during day whilst alongside. (We arrived alongside Thursday 1600 hrs. and we were cleared).

Tugs: 2 tugboats available.

Port facilities: 1 mobile crane 300 tons and 1 mobile crane 50 tons.

Agent: On VHF Channel 16.

AGENT: See "Dammam".

RAS TANURA: 26.39 N. 50.10 E. (See Plan)

ALSO SEE "JU'AYMAH" SECTIONS A and B.

(A) GENERAL INFORMATION
(B) REGULATIONS
(C) RAS TANURA TERMINAL

(A) GENERAL INFORMATION

This section contains important information for all ships proceeding to any Terminal in the Port of Ras Tanura.

NAVIGATION:

NAVIGATIONAL AIDS: In May 1981, the buoyage system in the Port of Ras Tanura was changed to the I.A.L.A. System (Region A).

Notices to Mariners have been promulgated concerning these changes.

INBOUND TRAFFIC PROCEDURES: All inbound vessels shall establish early radio contact with ARAMCO.

(a) A vessel with no special instructions or with instructions to proceed to the Northern Holding Anchorage should make for a position approximately 2 miles North of Ras Tanura Light Float (in position: Lat. 27° 05.6′ N., Long. 50° 57.5′ E.); enter the inward channel of the Separation Scheme and then pass the Approach Buoy and the Entry Buoy. The vessel should then proceed into the Northern Holding Anchorage and anchor. After anchoring, the vessel shall immediately advise ARAMCO by radio and Ras Tanura Pilots on VHF of anchoring time and keep a listening watch on VHF Channel 16 and traffic lists for further instructions.

(b) A vessel with instructions to proceed directly to Ras Tanura Terminal, Ju'aymah Crude Terminal or Ju'aymah L.P.G. Terminal should proceed as above to the Entry Buoy and as described under the individual terminal.

ANCHORAGES: The Port of Ras Tanura is an open roadstead but some protection is afforded by shoals and land to such an extent that vessels do not experience heavy movement.

Holding ground in all of the anchorages is fair and it is recommended that anchored vessels lie to a long scope of chain whenever the weather is unfavourable.

The Northern Holding Anchorage is located on the North side of the Ras Tanura Separation Scheme West of the Entry Buoy and North of No. 3 beacon (Racon). This anchorage covers an area of approximately 30 square miles with depths between 82 ft. and 150 ft. (25 m. and 46 m.).

This anchorage is intended as an initial holding area for incoming vessels which, because of berthing prospects, congestion or other reasons will not be berthed on arrival and for loaded tankers taking bunkers or adjusting departure sailing time into the Gulf. Anchorages for the individual terminals are described in Ras Tanura Section (B) and Ju'aymah.

MAXIMUM DRAFT IN ARRIVAL CHANNEL: See Section (B) for maximum arrival draft Ras Tanura Terminal (54 ft. + Height of Tide). See Ju'aymah Section (A) for maximum arrival draft Ju'aymah Crude Terminal (70 ft.). Masters of vessels arriving partly loaded or deeply ballasted should navigate with caution in the vicinity of position: Lat. 26° 50′ 30″ N., Long. 50° 10′ 30″ E.

RADAR SURVEILLANCE ADVISORY SYSTEM:

See "Regulations" – Traffic Regulations.

This system is available to provide information and to continuously monitor the movement of all ships in the Port of Ras Tanura.

In addition to identifying, tracking and monitoring ship movements to and from the Terminal areas by means of computer assisted radar and video tape recording, the following services may be provided to vessel Masters:

(a) Advice on channel and port conditions, congestion, weather, tides, navigational aids, etc.

(b) Advice upon the movement of other vessels, dangerous manoeuvring situations and vessels violating port regulations.

(c) Advice upon port regulations regarding the movement of deep draft vessels and the priorities of vessels movements. (It may be necessary for vessels arriving in ballast to reduce speed to permit safe passage for outgoing deep draft vessels).

(d) Advice on berthing prospects and anchoring conditions.

The service has been established in order to increase the safety of ships navigating in the Port of Ras Tanura. However, it is an information and advisory service only and in no way assumes control of or responsibility for ships navigating in the area.

CHARTS AND PUBLICATIONS: Surveys by American and British Authorities in recent years have resulted in the publication of a number of charts of the Port of Ras Tanura and its approaches:

U.S. 62414	or	B.A. 3788
U.S. 62415		B.A. 3777
U.S. 62416		B.A. 3776
		B.A. 3813

Vessels proceeding to the Port of Ras Tanura should be in possession of the latest issues of the above charts or their equivalent. "Sailing Directions" and "Lists of Lights" are published by American and British authorities; these publications should also be available on board.

Navigational Warnings and weather forecasts are broadcast by ARAMCO "HZY" Radio and by commercial radio stations in the Arabian Gulf.

These should be copied well in advance of arrival.

The Saudi Ports Authority is in charge of issuing navigational warnings and Notices to Mariners covering the Saudi Waters. These Navigational Warnings and Notices to Mariners are broadcast by Dammam Radio on a 24-hour basis. Updated copies of these Radio Navigational Warnings and Notices to Mariners are sent to the Agents for delivery to the Masters at their ports of arrival.

METEOROLOGICAL INFORMATION:

Winds in the area are not predictable for more than a very few hou and may come from any quarter at varying strength. The prevailing wi is from the N.N.W.

Winds of any strength tend to create short steep seas coming quickly and calming down just as rapidly. Easterly winds however caus heavy seas and swells which can last for a considerable period. For more complete description of the winds of the Arabian Gulf, refer "Sailing Directions".

Visibility in this area of the Arabian Gulf is generally fair to excellent, b at times fine dust is held in suspension in the atmosphere and visibili is reduced to a very short distance. This phenomenon is more decepti than fog in that mariners are apt to believe visibility to be greater tha it actually is. Dense fog with or without sand or dust may occur in th morning hours.

Climate of Ras Tanura is comparatively favourable for the Arabian Gu The exposed position of the port permits the winds to mollify the he of Summer. Temperatures have been recorded in previous years a follows: Absolute Maximum 45.6°C (114°F) in June, Mean Maximu 38.4°C (101.1°F) in August, Mean Minimum 12.5°C (54.5°F) in Januar Absolute Minimum 0.0°C (32°F) in January.

During most of the year, the relative humidity is high and during la Summer and Fall it frequently exceeds 85%.

Proper precautions should be taken to avoid sunstroke and he exhaustion particularly during the Summer and early Fall months. A conditioning plants aboard ships should be in good working condition these times in view of the necessity to close down accommodation whil loading dangerous cargoes.

TIDES AND CURRENTS: The depths quoted in U.S. "Sailing Directions and charts of the Arabian Gulf and the datum used by ARAMCO based on lowest astronomical tides (LAT) from 1st January 1986.

Locally the diurnal tide rise is approximately 8 ft. (2.44 m.) at Spring and 5 ft. (1.52 m.) at Neaps. More detailed description of tides ar currents in the locality can be found in the "Sailing Directions".

Due to the configuration of the coastline, a system of tidal curren prevail with flood tide setting towards South or S.S.E. and ebb settin towards North or N.N.W.

DOCUMENTS:

GENERAL: All contact between ships and the Saudi Arabia Government and Officials is to be made through the ship's Agent wh will advise on specific requirements and documentation.

The following sections are for guidance only.

ARRIVAL DOCUMENTS: The following must be available to the Age and boarding Government Officials:

(a) Maritime International Declaration of Health.

(b) Valid Deratting or Exemption Certificate.

(c) Crew List (including supernumeraries) up to 6 copies. Agent submit 1 copy of Crew List 48 hours prior to arrival.

(d) Valid Vaccination Certificates.

(e) Valid Inoculation Certificates against communicable diseas prevailing at previous ports of call.

(f) A complete set of log books for the period since the vessel's la visit to Ras Tanura OR for the period since new OR since Ap 25th, 1952.

NOTICE OF READINESS: At all terminals in the Port, to be addresse to ARAMCO Ras Tanura.

EARLY DEPARTURE PROCEDURE: Use of this special service encouraged and should be requested at the earliest opportunity.

Close co-ordination with the Agent is required in order to expedite th delivery of the required documentation to the ship.

It is essential that Radio contact with ARAMCO be maintained aft departure until cargo quantities are received and the Agent has bee authorised to sign documents.

DEPARTURE DOCUMENTS: The following 3 documents MUST be board before the vessel departs even though the ship has bee RELEASED to sail by ARAMCO.

(a) Bill of Lading: Completed by ARAMCO except for the carg quantities. The Agent will deliver a copy to the Master who will enter th quantities as advised by radio after departure. The Master will the authorise his Agent to sign the original on his behalf.

(b) Permit of Departure: Completed by Agents with informatio supplied in the quarantine radio message and delivered by them to th vessel prior to departure.

(c) Port Clearance (Sailing Report): Completed in Arabic wi information gathered by the Agent and delivered by them to the vess prior to departure.

PILOTAGE:

CHANNELS: The channels of the Ras Tanura Separation Scheme a marked by lighted radar-reflecting beacons and buoys. Channel Pilo are not provided.

BERTHING: The use of Harbour Pilots is compulsory for all vesse calling at the Port of Ras Tanura to use any of the terminal facilities

Harbour Pilots moor, unmoor and supervise the movements of vessels in the vicinity of the berths. ARAMCO Harbour Pilots are duty continuously and at present their services are provided witho charge for normal operations, although ARAMCO reserves the right charge for these services.

PILOT BOATS: An 87 ft. steel hull dedicated launch with about 6 freeboard is usually available to transfer Harbour Pilots to and fro tankers using South Pier, North Pier and the Sea Islands. A harbour t is normally used to transfer Pilots to and from gas tankers usi Ju'aymah NGL Berths 51 and 52. Transfer of Harbour Pilots to and fro tankers using the Ju'aymah SPM Terminal is usually by helicopter.

Pilot boats carry regulation signals, are equipped with radar, VHF ra and are painted white with green hull.

Also see "Regulations".

RADIO COMMUNICATIONS AND MESSAGES: *General:* The Arabi American Oil Company owns and operates a marine radio coast stati call letters HZY, Ras Tanura Radio. The station is maintained transacting Company business with inbound and outbound vessels a operates 24 hours a day. Ship's Agents are not allowed to send messages to Masters via HZY Radio. There is no charge for incoming or outgoing message or radio telephone service. Personal messages or calls are not allowed.

HZY Transmitting Antenna: The coast station transmitting antenna is located at: Lat. 26° 18′ 36″ N., Long. 50° 07′ 12″ E.

Due to its inland location, Masters are strongly advised NOT to use this antenna for radio direction finding since inaccurate bearings will be obtained due to coastal refraction.

Required Arrival Information: Vessels must advise via Radio of estimated and/or actual arrival times at Ras Tanura Entry Buoy. It is required that vessels provide HZY with a minimum of three notices of ETA information: at about 72, 48 and 24 hours steaming time from Ras Tanura. Shorter notices may result in berthing delay. If loading part cargoes at other Gulf ports prevents a vessel from furnishing an accurate ETA, steps should be taken to advise by message (direct or through the ship's Agent) giving the best possible estimate. This message should then be followed by an accurate ETA immediately upon departure for Ras Tanura. Failure to give at least 24 hours' notice will result in an addition to allowable laytime. Vessels should advise last 3 ports of call and next port of call.

Standard Messages: Upon contact with all inbound tankers HZY Radio will transmit 2 standard messages:

MASTER RAS TANURA

ARAMCO

It is important that the Master send a reply to the above 2 messages as soon as possible after receipt.

Advisory Notices sent by HZY Radio: Navigation Warnings, port closure information and hydrographic notices are broadcast on 430 kHz, 4308.5 kHz and 8480 kHz at 0430 GMT and 1630 GMT.

Port closure information is also broadcast on 430 kHz along with traffic list every odd hour when in force.

Weather for offshore areas is dual broadcast on 430 kHz, 8480 kHz and 12811.3 kHz at 0800 GMT and on 430 kHz, 4308.5 kHz and 8480 kHz at 0430 and 1630 GMT.

A tentative berthing schedule of ships is broadcast at 0700 GMT and 1900 GMT daily on 430 kHz. This schedule is not firm and subject to change at any time. MASTERS MUST NOT MAKE ANY VESSEL MOVEMENTS WITHIN THE PORT BASED ON THIS SCHEDULE. The ARAMCO Pilot will individually alert vessels for final berthing instructions.

Aircraft Radio Beacon: There is an aircraft radio beacon transmitting on 335 kHz located at: Lat. 26° 37′ 36″ N., Long. 50° 09′ 47″ E. The beacon call sign is – RT.

HZY Coast Station Procedures – MF and HF: HZY Ras Tanura Radio provides W/T service in accordance with the schedules shown on Chart – 1 and Chart – 2 (see overleaf). Traffic lists are transmitted on working frequencies after a preliminary announcement on 500 kHz on the MF band and on the working frequency in the HF band. Ships may begin calling HZY when the traffic list is completed.

During watch periods, HZY monitors 500 kHZ in the MF band and Common Channels 5 and 6 in the scheduled HF band. When HZY is open for service on HF, the identifying signal CQ CQ CQ DE HZY HZY HZY is transmitted approximately every 30 seconds. Ships may call on Channel 5/6 at any time.

HZY also provides HF Radio Telephone service in accordance with the frequency assignment in Chart – 3 (see overleaf). The mode of operation is simplex using upper sideband. This service is restricted to telephone calls with ARAMCO representatives. Initial contact to establish service is via W/T. HZY will designate the frequency for radio telephone use at the time contact is made on W/T.

VHF Radio Communications with ARAMCO: Ras Tanura Pilots maintain a listening watch on VHF Channel 16 which is used as the calling channel. The following VHF working channels are available – 11, 13, 14, 18, 20, 78.

ARAMCO Terminal Planners monitor VHF Channels 13, 14 and 16 and can also be contacted via Ras Tanura Pilots.

VHF contact with Ras Tanura Pilots should be established within 100 miles of the port (or more in good propagation conditions) and maintained when anchored.

Use of VHF at the berths in the Port of Ras Tanura to contact ARAMCO Terminal Planners, Pilots or Agents is permitted.

VHF radio services are provided as a separate service and not from the HZY Radio Ras Tanura facility.

Communications with ARAMCO – Other than via HZY Radio: In the event that difficulties are encountered in communicating with ARAMCO via HZY Radio, a coast station is available at Bahrain Radio, call sign A9M. Messages are forwarded to ARAMCO via International Telex facilities. All such messages are at the ship's expense and subject to a delay of one day or more. There is a Saudi Arabian Government Maritime Coast Radio Station at Dammam call sign HZG.

Vessels calling at Ras Tanura or Yanbu Ports can contact HZY on Telex No. 801919 SHEIKO SJ, using Marisat. HZY does not initiate any call to contact vessels by telex.

Radio Silence at Berth: The use of Wireless Telegraphy and Radio Telephone transmitting equipment (with the exception of VHF equipment) is prohibited when secured to any ARAMCO Terminal facility.

Departure from Ras Tanura: It is important that for several days after departure from Ras Tanura vessel maintains communications with and copy HZY traffic lists.

ARAMCO NGL Terminal Yanbu: Vessels bound for the ARAMCO NGL Terminal at Yanbu should address radio messages to "ARAMCO RAS TANURA/YANBU" and communicate with HZY on HF channels only.

CHART – 1:

HZY W/T Watch and Answer Frequencies

Listening Frequency Ships Transmit	*Reply Frequency HZY Transmit*	*Scheduled Times GMT*
—	430 kHz	H24
500 kHz	500 kHz	H24
—	521 kHz	On Request
*4181.6 to 4182.4 kHz	4308.5 kHz	1600 – 0600
†4186.8 to 4187.2 kHz		
—	4230 kHz	On Request
—	4275.5 kHz	On Request
*8632.2 to 8364.8 kHz	8480 kHz	1400 – 1000
†8373.6 to 8374.4 kHz		
*12544.8 to 12547.2 kHz	12811.3 kHz	0600 – 1600
†12560.4 to 12561.6 kHz		
*16726.4 to 16729.6 kHz	16960 kHz	1000 – 1400
†16747.2 to 16748.8 kHz		

*Corresponds to common Channel 5/6

†Corresponds to common Channel 18, monitored immediately following lists until all ships cleared.

Notes: (1) HF transmit frequencies are HZY working frequencies.
(2) During watch periods, CQ CQ CQ DE HZY HZY HZY is transmitted, indicating band is open for service.

CHART – 2

HZY W/T Working Frequencies and Traffic List Times

Frequencies HZY Transmit	*Schedule*	*List Times GMT*
430 kHz	H24	Every Odd Hour
521 kHz	On Request	—
4308.5 kHz	1600 – 0400	Every Even Hour
4230 kHz	On Request	—
4275.5 kHz	On Request	—
8480 kHz	1400 – 0800	Every Even Hour
12811.3 kHz	0600 – 1400	Every Even Hour
16960 kHz	1000 – 1200	1000 and 1200

Lists are broadcast on the odd or even hour.

CHART – 3

HZY Radio Telephone Frequencies

Carrier Frequency	*Assigned Frequency*
4143.6 kHz	4145 kHz
6218.6 kHz	6220 kHz
8291.1 kHz	8292.5 kHz
12429.2 kHz	12430.6 kHz
16587.1 kHz	16588.5 kHz
22124.0 kHz	22125.5 kHz

Notes: (1) HZY maintains a constant listening watch on international distress and calling frequency 2182 kHz.
(2) Initial contact via W/T, Channels are not monitored.
(3) HZY transmits on upper side band, A3A/A3J.
(4) Ships may specify their own authorised send frequency if desired.

TUGS:

DESCRIPTION OF TUGS: ARAMCO operates the following harbour tugs:

1 single screw conventional tug of 4,000 h.p. with Bollard Pull of 55 tons.

3 twin screw flanking rudder tugs of 6,000 h.p. with Bollard Pull of 72 tons.

3 Voith Schneider propulsion tugs of 4,000 h.p. with Bollard Pull of 40 tons.

METHOD OF USE: These tugs may be encountered at any of the terminals in the Port of Ras Tanura.

Tug's lines are used but vessels should have good quality ropes available to supplement these in periods of bad weather.

At present no charge is made for the tugs when used in normal mooring and unmooring operations but a charge is made for additional or unusual services.

BERTHING:

FACTORS: Vessels calling at the Port of Ras Tanura are assigned berths based on a variety of factors including but not limited to the following: nomination date, time of arrival, product to be loaded, vessel size, available berths and loaded draft. If there are no immediate berthing prospects vessels will be directed to anchor in the Northern Holding Anchorage.

DOUBLE BERTHING: ARAMCO reserves the right to advise vessels at which berth or berths and/or Terminals the loading will start and finish.

MOORINGS: All arriving vessels of 75,000 d.w.t. and over shall comply with the wire mooring line requirements detailed in Part "B" – Mooring Regulations.

During periods of unsettled weather, arriving vessels of under 75,000 d.w.t. fitted with wire moorings are preferentially berthed.

BALLAST: Vessels shall complete the deballasting operation promptly after berthing in order to minimise time at berth. Simultaneous loading and deballasting is permitted provided that the vessel has positive segregation between the two operations. Owners/Operators or Charterers of vessels requiring time to deballast in excess of what ARAMCO considers standard will be so notified by letter with a copy to the Master.

No facilities for the reception of dirty ballast are available in the Port of Ras Tanura.

HELICOPTER OPERATIONS:

GENERAL: Helicopter operations in the Port of Ras Tanura are carried out according to the "International Chamber of Shipping – Guide to Helicopter/Ship Operations" All ships using the service should have a copy of this information and the Safety Check List on board.

DESCRIPTION OF HELICOPTERS: The helicopters used to transport ARAMCO personnel and equipment to and from tankers in the Port of Ras Tanura are Bell Model 212 and 214 which are twin-engined, kerosene fuelled, carry 11 to 18 passengers.

They are fully equipped for night operations and operate both day and night, with capability for either landing or winching operations as required and permitted.

In addition to being fitted with radar and radios which operate on aeronautical frequencies, the helicopters are fitted with International Marine VHF Ship/Shore Channels 11, 12, 13, 14 and 16.

SHIP INFORMATION: The following ship information should be available to the pilot of the helicopter:

1. Ship's name and call sign.
2. Owner.
3. Port and Country of Registry.
4. Type and Size.
5. Inert gas system installed.
6. Type of deck operating area provided for helicopters.
7. Type, size, markings and location of "Manoeuvring Zone" and "Clear Zone" provided for helicopters.
8. Obstacle types, sizes, markings and locations within and adjacent to helicopter operating area including antennae, handrails, davits, catwalks, valves, piping, etc,
9. Floodlight locations and wattage.
10. Communication frequencies available and those which are guarded continuously.
11. Special conditions, limitations and precautions applying to the particular vessel.

This information is kept on file in the Helicopter Dispatch Office and will be regularly updated.

If the conditions aboard the ship do not agree with the file, the differences must be resolved before a helicopter is dispatched to a ship.

COMMUNICATIONS:

(a) **The Initial Contact** will be made by the helicopter Pilot with the ship on VHF Channel 16 and the working Channel 12 as soon as practicable to confirm the rendezvous time and location, type of service intended, etc.

(b) In the event of **Radio Communication Failure** the helicopter will circle the ship and the ship should reply by signalling lamp with:

1. Steady white light: Ready to receive helicopter
2. Series of short flashes: Reception of helicopter delayed for a period not greater than 15 minutes.
3. Prolonged series of "N" signals: Reception of helicopter delayed for a period in excess of 15 minutes. In this case the helicopter will return to base.

(c) **Initial Navigation Contact.**

The helicopter Pilot will at the appropriate time use the agreed VHF working frequency to request the ship to transmit its cali sign on 410 kHz and then to transmit a continuous signal (locked Key) for a sufficient time to determine the bearing to the ship and identify it on the radar.

SAFETY: The Port of Ras Tanura maintains a vigorous cargo handling safety programme.

ARAMCO is a member of the Oil Companies International Marine Forum (O.C.I.M.F.) and as such follows the procedures and safety practices recommended by this international organisation.

As is the practice in other Arabian Gulf Ports, each ship's Master is presented with a form entitled "Declaration by Master" which lists ARAMCO safety regulations. After a detailed review of each safety item with the ARAMCO Safety Representative, the Master must sign the form. Prior to start of loading and later at several times during the loading, ARAMCO Safety Representative will visit the ship and accompanied by one of the ship's officers will check to ensure that safe loading practices are being observed by both the ship and the shore crews.

In cases of blatant or repeated infringements of the Safety Regulations ships will be removed from the berth and will not be reberthed until a thorough inspection has been satisfactorily carried out by an ARAMCO Safety Representative.

Also see "Safety Regulations".

EMERGENCY PROCEDURES: The course of action to be followed ARAMCO Personnel in the event of a fire or explosion on board a ves while berthed in this Port will be dictated by the particular facts a circumstances of the incident. Although it is impossible to indic exactly what practices will be applied during an emergency before evaluation of the specific situation can be made by the responsi ARAMCO representative, his decisions will be based on the follow principles:

1. An evaluation of the particular emergency will be made by responsible ARAMCO Representative to determine the course action to be taken. His decision as to the course of action take into account the location, type and extent of fire or explosi the berth location and proximity of other vessels, and the ti and wind conditions.
2. A burning vessel will not be permitted to remain at the ber Where possible, the fire will be fought with available berth fi fighting facilities until the arrival of tugs. After hook-up of the tu to the vessel's fire wires, if the fire is not controllable extinguished, the vessel will be released or cut free and remov from berth under controlled conditions.
3. Where communication facilities permit, the Master or responsi ship's officer will be advised prior to releasing or cutting free vessel from berth. The Master should designate a responsi senior ship's officer with whom the senior ARAM Representative present can communicate in case of a fire explosion aboard the vessel. Where possible, this officer will advised of the actions to be taken in releasing or cutting the ves free from the berth.
4. Although a vessel may have no power it may be released or free from the berth prior to arrival of the tugs and hook up to vessel's fire wires, if in the opinion of the senior ARAM Representative present it is a greater hazard at the berth th drifting free. Normally, however, a burning vessel will be remov by tug boats under controlled conditions.

NOTE: The above mentioned Principles are intended to provide guidelines of action to protect terminal personnel and facilities, and ot vessels at the ARAMCO loading berths.

The handling of gas tankers loading LPG at ARAMCO berths governed by separate sets of rules with the mnemonic "Gasrul 9:8 copies of which are provided to all gas tankers.

POLLUTION: ARAMCO adopts a vigorous policy of pollution preventi detection, and clean-up which is required and supported by the Sa Arabian Government.

Vessels using terminals operated by the Company are required observe the IMO conventions relating to the pollution of the sea by and are advised that violations will involve the Master/Owner/ Age Operator in severe penalties.

ARAMCO does not tolerate pollution and will clean oil spills w whatever men, equipment, and material that are required consider the size of the spill, time of day, sea state and weather conditions. T Master, Owners and Operators shall be liable for all expenditure incur by ARAMCO.

The equipment and material used in the clean up effort is dictated on site judgement of qualified professional personnel whose goal is protect the environment and prevent hazardous conditions.

Masters of vessels involved in a pollution incident shall immediat contact their Agent who will arrange the necessary Government conta Also see "Pollution Regulations".

SHIP'S AGENTS: Vessels calling at any terminal in the Port of R Tanura should address all messages concerning ship's business to th Agents. Matters concerning provision supply, minor repairs, lo medical or hopital services, mail, crew changes, etc., are to be hand by the ship's Agent.

SURVEYORS: Independent oil inspection service is available at terminals in the Port of Ras Tanura by the following companies:

(a) Redwood Petroleum Division,
1 Place des Alpes,
1201 – Geneve 1, Switzerland.
Telephone: 312250
Telex: 22140 SGS CH
(for local information contact Gulf Agency Company)

(b) Caleb Brett & Son Limited,
International House, Mitre Square, 26-28 Greenchurch La
London EC3A 5ED

(c) E. W. Saybolt and Co. S.A.
400, Swenson Drive,
Kenilworth, New Jersey 07033, U.S.A.

(d) Watson Gray (Saudi Arabia) Limited,
c/o Yusuf Bin Ahmed Kanoo,
Aramco Box 711 or P.O.Box 71,
Ras Tanura, via Dhahran, Saudi Arabia.
Telephone: (03)6670180/6670903
Telex: 651012 KANOO SJ

(e) Services et Transports,
Route du Hoc, Gonfreville L'orcher,
Harfleur 76700, France.
Telephone: (35) 26 40 18
Telex: 190634 F.

(f) SPACO (Saudi Petroleum Analytical Company)
c/o SNAS, P.O.Box 5641, Riyadh, Saudi Arabia.
Telephone: (01)4766589
Telex: 201406 SJ

Marine and Engine Surveyors of various companies are avail locally. They may be contacted through the vessel's Agent.

INERT GAS REQUIREMENTS – CARGO TANKS: All vessels are required to be fitted with an inert gas system under the provisions of the SOLAS Convention 1974 and its 1978 Protocol shall have the cargo tanks in the inerted condition prior to berthing at any ARAMCO Terminal in the Port of Ras Tanura.

The Berthing Pilot will check the oxygen content of cargo tanks with a ship's officer using ship's equipment. If the oxygen content of any tank exceed 8% by volume, the vessel shall not be berthed until the oxygen content of all tanks meet the requirements of the convention.

The ARAMCO Form "Inert Gas System – Check List" must be satisfactorily completed prior to berthing.

FACILITIES:

BUNKERS: ARAMCO fuel bunkers are available at all berths in the port. Black diesel is not available at the Ju'aymah Crude Terminal. Vessels taking only bunkers are urged to call at Ras Tanura *prior* to loading elswhere to avoid delays caused by draft and berthing assignment problems.

Non-ARAMCO bunkering services are available. Vessels employing these services are generally required to carry out their bunkering operations at the Northern Holding Anchorage.

FRESH WATER: Drinking and boiler water are NOT available in the Port of Ras Tanura. In cases of emergency, ships' Agents may be able to arrange delivery by barge of small quantities.

LUBRICATING OILS: Lubricating oils are available in limited quantities of drums if ordered through ship's Agents well in advance.

STORES: The shipping of any stores at ARAMCO berths is prohibited.

REPAIRS: Repair services are available from local business concerns. ARAMCO will not assist in making emergency repairs on vessels.

It is suggested that Masters discuss repair charges with the ship's Agent prior to requesting or authorising repair work.

DIVERS: Deep sea divers, operating from modern and well-equipped boats are available. Ship's Agents must be contacted for this service.

MEDICAL/HOSPITAL FACILITIES: No medical facilities are available at any of the terminals in the Port of Ras Tanura. Requirements for medical assistance or hospital services must be made through the ship's Agent, who can arrange treatment at one of the government or private clinics or hospitals in Rahima, Al Khobar or Dammam.

The ship's Agent is able to arrange for the Port Doctor to visit vessels to treat minor injuries or illnesses. In serious cases requiring hospitalisation the Port Doctor must attend to certify the necessity. ARAMCO medical facilities are made available in emergencies only when other facilities are not available.

A charge will be made for all such services furnished by ARAMCO. The ARAMCO radio station "HZY" may be used at any time without charge by vessels at sea to obtain medical advice.

REPATRIATION/SHORE LEAVE: All matters relating to crew changes, repatriation of crew personnel or shore leave are to be arranged through the ship's Agent. There is no Seaman's Recreation Centre at any terminal in the Port of Ras Tanura.

DRY CARGO AND FREIGHT: No dry cargo facilities exist in the Port of Ras Tanura and all ARAMCO freight is handled through Saudi Arabian Government Ports in the area.

(B) REGULATIONS

The regulations shall be observed by all vessels proceeding to any terminal in the Port of Ras Tanura.

The Rules and Regulations for Ras Tanura Port (and Ju'aymah) are published by the Co-operation Council for the Arab States of the Gulf (March 1985).

Every vessel which arrives in Ras Tanura or Ras al Ju'aymah must have a copy of these Regulations on board, or must obtain a copy immediately on first arrrival.

Neither non-possession nor ignorance of these Regulations will be considered a reason for non-imposition of a penalty for violation of these Regulations.

EXTRACTS FROM SAUDI ARABIAN GOVERNMENT REGULATIONS:

Saudi Arabian Government Regulations are strictly enforced and Masters having any doubts concerning the interpretation of these regulations are urged to consult their agent. At all times while in the Port of Ras Tanura whether at anchor, at the berth in any terminal or in transit between terminals, the vessel and its personnel are under the jurisdiction of Saudi Arabian laws.

QUARANTINE SIGNALS: Quarantine signals shall be displayed by all vessels approaching the Port of Ras Tanura in accordance with International practice. These signals shall be displayed continuously until Pratique is granted.

Sunrise to Sunset – Quarantine flag (Q)
Sunset to Sunrise – Red over White signal lights.

SAUDI ARABIAN FLAG: The flag of The Kingdom of Saudi Arabia shall be flown from the foremast of the vessel by day and by night while in the Port of Ras Tanura. The flag shall be clean and in good condition. Masters should obtain this flag before arrival but if circumstances render this impossible a flag must be obtained from the ship's Agent. Vessels not correctly flying the flag of Saudi Arabia will not be berthed. The flag is properly displayed when the Arabic writing appears on the top and the sword on the bottom.

PROHIBITED ARTICLES: All materials to be either exported from or imported into Saudi Arabia are subject to examination by Customs Authorities. The import of certain articles is strictly prohibited and such articles include but are not limited to the following:

Explosives and firearms including air rifles.
Implements of war of any kind including antique weapons.
Religious matter not pertaining to the Moslem faith.
Playing cards and gambling devices.
Narcotics.
Printed, photographic matter or video tapes depicting what could be considered pornographic.
Alcoholic beverages of any description.

Any of the above items on board any vessel calling at the Port of Ras Tanura shall be secured in appropriate locked storerooms which will be sealed by the Authorities who may carry out inspections to ensure that the seals are intact and that none of the above articles are in use. The seals must remain intact during the entire period of the vessel's stay in the Port of Ras Tanura and must not be broken until after the vessel has finally departed for a port in another country.

Trafficking in any of the above articles between vessels or between vessel's crew and shore personnel is strictly prohibited.

The baggage of crews joining and leaving vessels will be inspected to ensure that it contains none of the prohibited articles.

PHOTOGRAPHY: The use of photographic equipment of any kind is strictly prohibited within the Port of Ras Tanura. Cameras are liable to seizure by the Authorities.

SHORE LEAVE: Vessel's personnel are not permitted ashore nor on the wharves for ANY PURPOSE WHATSOEVER (this includes reading the vessel's draft) until pratique is granted and then only if actually engaged in operational duties. No visiting between vessels at berths is permitted. Shore leave is not normally granted and ship's Agents must be consulted for advice.

PENALTIES: Penalties for violations of Saudi Arabian Government Regulations are severe and considerable fines and/or delays to vessels may be incurred.

Note: ARAMCO fully endorses and complies with these Rules and Regulations. Questions concerning these Rules and Regulations, from Ship Owners or Masters using ARAMCO Marine Terminal Facilities, should be addressed to the appropriate Authority through the ship's Agents.

SAFETY REGULATIONS: Prior to arrival at berth the Master must make a Safety Declaration of the conditions he will maintain when the vessel is at berth. (ARAMCO Form 8812 – 2/84) – See "Appendices" – Master's Safety Declaration.

RESPONSIBILITY FOR SAFETY: The vessel's Master and crew shall be responsible at all times for the safety of the vessel and shall make provision to exercise all necessary precautions.

Aramco Terminal personnel are authorised to suspend oil handling operations in the event that any of the Safety Regulations are violated or if any other hazardous situation is observed.

SAFETY REQUIREMENTS:

Notes:

(a) All of these requirements shall be complied with at all times that a vessel is berthed at any ARAMCO facility.
(b) Requirement No. 14 is to be complied with at other times as stated.
(c) The title of each requirement is numbered to correspond with the questions in the Safety Check List.
(d) Guidance on methods of complying with these requirements is contained in the ICS/OCIMF publication "International Safety Guide for Oil Tankers and Terminals"

1. *Moorings:* Moorings shall be frequently monitored and carefully tended to maintain the vessel in position and alongside at all times. (See "MOORINGS REGULATIONS").

Anchors shall be effectively secured in the hawse pipe to prevent letting go accidentally.

2. *Emergency Towing:* Towing off wires shall be made fast to bitts as far forward and aft as practicable on the side of the vessel opposite to the cargo connections. The wires shall be in good condition of not less than 3.5 in. in circumference (28 mm. diameter) and secured with a minimum of 5 turns on the bitts.

The wire shall lead directly to the chock with no slack on deck and a heaving line made fast to the eye shall be used to maintain the eye of the wire between 3 ft. and 6 ft. (1 m. and 2 m.) above the water at all times.

3. *Ship/Shore Access:* Personnel shall use only the designated access. Gangways shall be carefully tended at all times and safely illuminated at night.

4. *Readiness To Move:* The vessel's boilers, main engines, steering machinery and other equipment essential for manoeuvring shall be maintained so as to enable the vessel to be unberthed under full engine power at short notice.

A suitable trim shall be maintained for the same reason.

5. *Deck Watch:* A responsible Ship's Officer and sufficient crew shall be on watch to attend to the safe operation of the vessel.

A member of the crew shall be continuously on watch on the loading deck in view of the manifold and access to the vessel.

6. *Ship/Shore Communications:*

(a) A reliable communication system shall be established and tested for control of the cargo handling operation. This shall consist of suitable UHF/VHF radios, telephone or direct voice communication.
(b) The responsible Ship's Officer and the shore operator shall confirm with each other that the communications system and signals for controlling the operations are understood by them and by other personnel on duty at the start of operations and at each change of watch or shift.
(c) A responsible member of the vessel's crew with adequate command of the English language shall man the agreed communication medium.

7. *Operating Procedures:* The procedures for cargo, bunker and ballast operations shall be agreed in writing by the responsible Ship's Officer and the Terminal Representative.

8. *Emergency Shutdown:* Whenever an emergency situation develops aboard the vessel which may require that the cargo loading operation be suspended the vessel's tank/manifold valves shall not be closed against the flow rate under any circumstances until the berth operator has been advised. In order to prevent pressure surges in the loading system the period of valve closure shall be not less than 30 seconds and to prevent accidental closure of power operated butterfly valves they shall be locked or otherwise secured in the open position.

9. *Fire Fighting Equipment:* Fire fighting and emergency equipment shall be kept in readiness at all times.

Vessel's fire hoses fitted with combination jet/spray nozzles shall be connected to the fire main and laid out on deck forward and abaft the loading manifold.

If practicable, a pump shall maintain pressure on the fire main otherwise the fire pump shall be on standby ready for immediate use.

Monitors shall be ready for use and portable fire extinguishers preferably of the dry powder type shall be available in the proximity of the manifold area.

10. *Loading Connections:*

(a) The Master shall ensure that cargo and bunker hoses or arms are visually inspected and in good condition.

(b) The Master shall ensure that the loading connection is made to his satisfaction.

(c) Adequate safe fixed lighting arrangements shall be provided at the manifold at night to ensure a safe working area for personnel engaged in making the connection and to detect any leakage or spillage of cargo.

(d) Cargo hoses and arms at ARAMCO loading facilities are fitted with insulating flanges or joints. Ship/shore bonding cables shall *NOT* be used.

11. *Cargo Spillage and Leakage:*

(a) All deck scuppers shall be effectively plugged and cemented if necessary to prevent spilled oil from escaping overside.

(b) Accumulations of water shall be periodically drained and the scuppers secured immediately after the water has been drained. A crew member shall be in attendance during this operation.

(c) All cargo pipe-line and pumproom valves when not in use shall be closed.

(d) Adequate drip trays shall be provided at the loading connections.

(e) Loading rates shall be regulated to avoid oil being drawn into the gas venting system.

(f) If leakage occurs from a pipe-line, valve, hose or arm, or any connection, operations through that system shall be suspended until the cause has been ascertained and the defect remedied. If a pipe-line, hose or arm ruptures or if there is an overflow, all cargo and bunker operations shall be stopped immediately and shall not be restarted until the fault has been rectified and all hazards from the released oil or product eliminated.

(g) In the event of any spillage of cargo on deck or overside, the Representative of the Terminal Superintendent shall be notified immediately.

12. *Unused Cargo and Bunker Connections:*

(a) All unused cargo and bunker connections shall be properly blanked, fitted with a gasket and bolted with one full-size bolt in every hole.

(b) The stern discharge line if fitted shall be isolated forward of the after accommodation by blanking with a spectacle piece or by removal of a spool piece.

(c) Unused inert gas system connections to machinery spaces shall be properly sealed to prevent entry of cargo or vapour.

(d) Any part of a crude oil washing or slop transfer system which extends into machinery spaces shall be securely blanked and isolated on the tank deck.

13. *Sea Valves:*

At the start of and at regular intervals throughout deballasting and loading, a deck watch shall be maintained to ensure that oil is not escaping through sea and overboard discharge valves (Also see "Pollution Regulations").

When not in use, sea and overboard discharge valves connected to the cargo or ballast systems shall be closed and lashed. When lashing is not practicable as with hydraulic valves, a suitable means of locking shall be used to indicate that the valves are to remain closed. (For further guidance refer to the ICS/OCIMF publication "Prevention of Oil Spillage through Cargo Pumproom Sea Valves").

14. *Tank Lids:*

(a) All cargo tank lids ullage and sighting ports shall be securely closed **before berthing or unberthing operations commence.** To maintain watertight integrity **when manoeuvring in the loaded condition** all cargo, ballast and bunker tanks, cofferdams and pumproom entrances shall be securely closed.

(b) During cargo handling operations all cargo, ballast and bunker tank lids and tank washing openings shall be securely closed.

15. *Tank Venting:*

(a) All vessels shall ensure that vapour displaced by cargo shall be vented in accordance with the written agreement with the Terminal Representative.

(b) All vessels fitted with an Inert Gas System shall ensure that the oxygen content throughout the atmosphere of cargo tanks has been reduced to 8 per cent or less by volume.

(c) Flame arrestors will be employed in accordance with the design features of the venting system.

(d) The loading rate shall be controlled to prevent excess pressure in the cargo tanks.

(e) If ullage ports are required to be open for operational purposes the opening shall be protected by efficient flame arrestors. Ullage ports shall not be left partly covered but shall be fully open in such a way that vapour may leave the tank in the form of a vertical unimpeded jet.

(f) In vessels not fitted with automatic ullaging devices ullage ports may be opened intermittently for short periods for the purpose of ullaging or sighting only.

16. *Hand Torches and Battery Powered Equipment:*

(a) Battery operated flashlights shall be in good condition and of a type certified to be safe for use in hazardous locations.

(b) Portable domestic radios, photographic flash equipment (see "Prohibition of Photography"), portable electronic calculators, recorders and other battery-powered equipment of non-approved type shall not be used on deck or in any place where petroleum vapour may be encountered.

17. *Portable Radio Transceivers:* Portable VHF/UHF transceivers shall be of an intrinsically safe type which is approved by a competent authority. When used this equipment shall be in good condition.

18. *Radio and Radar Transmitters:*

(a) Main radio equipment shall not be used and main transmitt aerials shall be disconnected and grounded.

(b) Radar scanners shall be switched off.

(c) The servicing of radio and radar equipment shall not be permitt without written agreement of the Terminal Representative.

19. *Electrical Equipment:*

(a) The use of portable electrical equipment on flexible leads prohibited on the tank deck. Supply cables for such equipme shall be disconnected and removed from the tank deck.

(b) All electrical installations on board vessels shall be in go condition. Modifications which have not been approved by appropriate authority shall not be accepted.

20. *Amidships Accommodation:* All doors, ports and windows amidships accommodation shall be closed and every effort shall made to prevent entry of petroleum vapour into this accommodation

21. *Aft Accommodation:*

(a) All doors, ports and openings in the after accommodation (oth than pumproom) which lead directly to the loading deck or whi overlook the loading deck at any level shall be kept tightly clos

(b) Doors that are required to be closed shall be clearly marked under no circumstances shall they be locked.

(c) Machinery space openings by means of which petroleum vapo may enter shall be closed.

(d) Consideration shall be given to the suspension of car operations when weather conditions support the entry petroleum vapour into spaces which cannot be closed.

22. *Air Conditioning Intakes:*

(a) Central air conditioning or mechanical ventilation systems sh be adjusted to prevent intake of petroleum vapour if possible recirculation of air within enclosed spaces so that a vacuum not created.

(b) Any intake within the range of possible petroleum vapour relea shall be closed.

(c) If at any time it is suspected that petroleum vapour is being dra into the accommodation, central air conditioning and mechani ventilating systems shall be stopped and intakes closed covered.

23. *Window Type Air Conditioning Units:*

Window type air conditioning units shall be disconnected from t power supply.

24. *Smoking:*

Smoking shall only be allowed in places in the after accommodati which have been jointly approved in writing by the Master and t Terminal Representative and suitable notices shall be posted at t entrance to designated smoking rooms.

No place will be considered suitable for smoking unless:

(a) It is in enclosed accommodation abaft the cargo tanks.

(b) It has no doors which open directly onto the outside deck.

(c) It has no doors or ports which open directly onto or over the car deck or onto decks overlooking cargo spaces.

(d) All ports are kept closed and doors into passageways are ke closed except when in use.

25. *Galley Stoves and Cooking Appliances:*

(a) Galleys which use only steam or immersed electric heaters sh be considered suitable for use.

(b) The use of galley stoves and cooking appliances with no immersed elements such as electric hot plates and toasters m be permitted in galleys and properly designated pantries with t written agreement of the Terminal Representative.

(c) Approved galleys and pantries shall be situated in the aft accommodation and shall have no doors or ports which op directly onto the cargo deck.

(d) All galley and pantry doors and ports shall be kept closed.

(e) Ventilator trunkings and filters of extractor fans in galleys sh be kept clean and free from accumulated oil and fat.

26. *Naked Lights:*

Open flames or fires, exposed incandescent material and any oth unconfined sources of ignition are prohibited on deck and in other plac where there is a risk that petroleum vapour may be present.

27. *Emergency Escape:*

Means for emergency escapes shall be provided on the side of t vessel opposite to the loading connections. For security reasons su means is to be stowed at deck level in such a manner as to be rea for expeditious use in an emergency. Such means shall be of adequa length to reach the water at all times.

VOLATILE AND NON-VOLATILE PETROLEUM:

Due to the variety of petroleum products available for loading ARAMCO facilities in the Port of Ras Tanura, all vessels arriving to lo crude oil or any petroleum product whether volatile or non-volatile any berth shall be required to observe the Safety Regulations.

See also "Gasrul 9:86" for ARAMCO Rules governing the handli of gas tankers at berth.

PRECAUTIONS AGAINST STATIC IGNITION: Tanks not prope inerted (see "Safety Requirement") prior to loading static accumula oils (kerosene, kerosene type jet fuel, white diesel and under certa conditions heavy naphtha and gasoline type jet fuels) shall be gas fr within 40% of the lower flammable limit. The following restrictions sh also apply to vessels loading static accumulator oils:

(a) Tanks and pipe-lines shall be free of water.

(b) Loading overall (splash filling) shall not be permitted.

(c) No conducting equipment (ullage tapes, sample ca thermometers) shall be introduced into a cargo tank u 30 minutes have elapsed after loading has been stopped to that ta

(d) No loose floating objects shall be present in tanks to be load

(e) Initial loading rates shall not exceed 1,000 bbls.p.h. per ta Above soundings of 20 ft. loading rates of up to 1,500 bbls.p shall be permitted.

(f) Properly bonded and grounded automatic ullaging equipm may be used at any time.

Vessels with tanks which are properly inerted (see "Safety Requirement") shall not be required to comply with the specific requirements for loading static accumulator oils. However, normal safety precautions shall be observed.

HYDROGEN SULPHIDE HAZARDS: ARAMCO crudes may contain dissolved hydrogen sulphide (H_2S) in concentrations which may be hazardous. It is recommended that Owner's instructions and the ISGOTT recommendations in respect of H_2S hazards are reviewed.

EMERGENCY SIGNAL: In the event of a fire or other emergency, the vessel shall sound a series of 10 short blasts on the ship's whistle.

GAS FREEING: No gas freeing or tank washing shall be carried out at berth.

BOILER TUBE CLEANING: Funnel uptakes and boiler tubes shall not be cleaned while the vessel is at berth. Every precaution shall be taken to ensure that sparks do not escape from the funnel.

REPAIRS: Repairs or maintenance of any kind which may produce a source of ignition shall not be undertaken without the agreement in writing of the Terminal Representative.

PENALTIES: Disregard of or failure to fully comply with any of the Safety Regulations or any safety regulations generally accepted and practised in the marine transport industry will result in the suspension of all operations and the vessel may be required to leave the berth.

Vessels presented for loading with deficient equipment or machinery whether by design or by lack of maintenance will not be berthed. If such deficiency becomes apparent after berthing the vessel will be removed from the berth.

Safety violations due to negligence on the part of the vessel's personnel will result in the suspension of loading operations for investigation and correction. Repeated violations may result in a vessel being removed from the berth.

Removal from the berth as a result of safety violations or deficiencies will be at vessel's expense and ARAMCO will not accept responsibility for any resulting delay to the vessel.

Vessels with unacceptable safety performances will not be permitted to berth at ARAMCO facilities on future visits.

POLLUTION REGULATIONS: Vessels using the Port of Ras Tanura shall exercise every precaution to prevent the pollution of the sea by oil.

1. A crew member shall be stationed on deck to sight the overboard discharge during deballasting operations to ensure that no oil or oil-based products escape into the sea.
   Particular vigilance shall be exercised at any time that a change of operation takes place, e.g. starting of stripping pumps or eductors, change of tanks, commencement of loading, etc.
2. At sea island type berths, all ballast shall be discharged from the side of the ship nearest the berth.
   At pier berths, all ballast shall be discharged from the offshore side of the ship.
   At night, the discharge and the sea area in its vicinity shall be adequately illuminated.
3. No domestic or other rubbish shall be dumped into the sea.
4. In the event of an oil spill the Master shall notify the Terminal Representative on duty.
5. Excessive smoke from the funnels or exhaust gas lines of vessels is prohibited.

PILOTAGE REGULATIONS:

BOARDING ARRANGEMENTS: In order to permit the harbour Pilot to safely embark and disembark from a vessel a pilot ladder shall be provided in accordance with the following requirements:

1. The ladder shall be kept clean and in good order and shall be of adequate length and strength.
2. The vertical distance between the steps must not exceed 15 in. The outboard edge of the step shall project from 5 in. to 6 in. from the hull. Ladders shall be so constructed that the steps will remain flat at right angles to the hull while supporting the weight of a person.
3. Spreaders at suitable intervals shall be provided to prevent the ladder from twisting and the ladder shall be properly secured with the steps level.
4. The deck in the vicinity of the ladder shall be clean and free of oil and grease or other slippery substances.
5. When possible, on vessels so equipped, the pilot ladder shall be made fast next to an area where there is a break in the rail or an opening in the bulwark. Otherwise, suitable arrangements for safe access to the deck from the top of the pilot ladder shall be provided.
6. The boarding position should be as near amidships as possible so that the whole length of the ladder rests against the ship's flat side, clear of all possible discharges from the ship.
7. Adequate lighting shall be provided at night so that the pilot ladder and the deck area close by the head of the ladder shall be adequately and properly illuminated.
8. Manropes, a safety line and lifebuoy with self igniting light should be rigged ready for use if required.
9. The rigging of pilot ladders and the embarkation and disembarkation of Pilots thereby shall be supervised by a responsible deck officer of the vessel.
10. The vessel's propeller shall be stopped during the approach of the pilot boat and the embarking of the Pilot.
11. Whenever the distance from the water to the deck of the vessel exceeds 30 ft. (approximately 9 m.) the pilot ladder shall be rigged in combination with the accommodation ladder.
12. In any small vessel in which the bulwark rails are below the level of the deck of the pilot boat (approximately 6 ft. or 2 m.) a safe boarding position on each side of the forward end of the poop shall be provided and equipped with manropes.
13. Pilot hoists of the double drum, double-wire type are permitted after inspection and approval by Ras Tanura Pilots.

Failure to provide a safe method of boarding for the Pilot will result in the vessel being ordered to anchor until the fault is rectified.

REMOVAL OF WRECKS AND OBSTRUCTIONS: If any vessel founders or otherwise becomes in the opinion of the Company, an obstruction or danger to navigation in the Port of Ras Tanura and its Owner or his Agent fails to remove the obstruction or danger so caused within the period of written notice served by the Port Captain, or immediately in an emergency, the Company may, for the purpose of safeguarding the Port, take action to remove the obstruction or danger.

The Owner of any vessel at the time of its becoming an obstruction or danger to navigation in the Port of Ras Tanura shall be liable for the expense incurred in removing the obstruction or danger to navigation.

Also see Standard Terms and Conditions where Master requests ARAMCO to provide assistance to refloat vessel stranded in waters of the Arabian Gulf.

Also see "Appendices" – Refloating/Stranding.

TRAFFIC REGULATIONS: The following regulations apply to all vessels entering or leaving the Port of Ras Tanura or Dammam by way of the Ras Tanura Channel.

The separation zones and routes shown on the charts of the Ras Tanura Channel are approved by IMO. Violators of the routeing recommendations will be reported to their Owners/Operators/Agents/Charterers.

1. All vessels shall monitor VHF Channel 10 when under way in the Ras Tanura Channel and its vicinity and in the anchorage areas of Ras Tanura Terminal.
2. All vessels using the inbound or outbound channels shall have an underkeel clearance of at least 5 ft. (1.52 m.).
3. Under no circumstances shall inbound vessels navigate in the departure channel nor shall outbound vessels navigate in the arrival channel.
4. Inbound vessels shall:
   (a) report to Ras Tanura Port Radar on VHF Channel 10 when passing Beacon No. 3 and Buoy No. 7.
   (b) not exceed a speed of 5 knots after passing Buoy No. 9.
   (c) not overtake and shall mantain a distance of one mile from vessels proceeding in the same direction after passing Buoy No. 9.
   (d) navigate with extreme caution and give way to vessels departing from the berths and anchorages.
5. Outbound vessels:
   (a) departing from Ras Tanura Anchorage shall advise Ras Tanura Port Radar on VHF Channel 10 of their intentions 30 minutes before weighing anchor.
   (b) shall not overtake and shall maintain a distance of at least one mile from vessels proceeding in the same direction until both vessels have passed clear of Buoy No. 5.
6. Vessels manoeuvring in the area between the South extremity of the Tanker Anchorage and the entrance to the Departure Channel (Buoys 17 and 18) shall limit speed to a maximum of 5 knots.
7. Vessels bound to and from the Port of Dammam shall keep to the Eastern part of the Tanker Anchorage and avoid the manoeuvring area from the anchorage to the sea islands and piers. Outbound vessels from Dammam shall, when passing Dammam Channel Buoy No. D 37, alert Ras Tanura Port Radar of their ETA at the Southern extremity of the Tanker Anchorage.

MOORING REGULATIONS:

GENERAL: The use of nylon or other highly elastic mooring ropes is discouraged.

If a vessel with synthetic mooring ropes is alongside when squall conditions arise, loading to that vessel shall be stopped and loading arms disconnected until weather conditions improve and it is judged safe to resume the loading operation.

Vessels shall be moored to the entire satisfaction of the Harbour Pilot and shall be ready at all times to put out more lines as required by terminal personnel and as may be dictated by weather conditions.

All vessels at berth shall have all deck winches in readiness for immediate use.

All vessels with tension winches shall set the manual brakes on these winches.

MIXED MOORINGS: Vessels equipped with both wire and synthetic lines shall avoid mixing moorings to the same bollard or dolphin.

WIRE MOORINGS: In order to ensure the safety of personnel, vessels and loading facilities and to prevent accidental oil spillages, the following requirements (used as springs and breast lines) are mandatory for all vessels permitted to use the ARAMCO fixed berth loading facilities.

Vessel Size	*Required*	*Recommended*
75–160 m.d.w.t.	8 wires	12 wires
161–250 m.d.w.t.	10 wires	12 wires
251–300 m.d.w.t.	12 wires	14 wires
301–350 m.d.w.t.	12 wires	16 wires
351 m.d.w.t. and above	14 wires	16 wires

The wire size, winch power and winch braking power shall in all cases be adequate for the size of the vessel. All lines shall be properly reeled onto winch drums and the winch brakes shall be set to hold to a minimum load of 60% of the minimum breaking load of the line.

After obtaining the permission of the Port Captain, vessels may use mooring lines other than wire, constructed of a substitute material provided that the elongation of the substitute material does not exceed 3% at 55% breaking load. Tails, if used, should preferably be made of nylon line (3 strand construction should not be used) about 11 m. long overall, and have a breaking strength at least 25% greater than the MBL of the wire to which they are attached. They should be replaced at least every 18 months unless experience and/or inspection indicates more or less frequent replacement is necessary.

Additional information is contained in the O.C.I.M.F. publication "Guide Lines and Recommendations for the Safe Mooring of Large Ships at Piers and Sea Islands".

All vessels shall utilise all of the wire mooring lines with which they are equipped unless the number exceeds that recommended above.

APPENDICES:

SHIP/SHORE SAFETY CHECK LIST

VESSEL:.....................................

BERTH:.....................................

Instructions for completion:

The safety of operations requires that all questions should be answered affirmatively after checking by both ship and terminal representatives. If an affirmative answer is not possible, the reason should be given and agreement reached upon appropriate precautions between the ship and the terminal.

Questions	Yes/No	Remarks
1. Is the ship securely moored and anchors secured?		
2. Are emergency towing wires correctly positioned?		
3. Is there safe access between ship and shore?		
4. Is the ship ready to move under its own power?		
5. Is there an effective deck watch in attendance on board?		
6. Is the agreed ship/shore communication system operative?		
7. Have the procedures for cargo, bunker and ballast handling been agreed?		
8. Has the emergency shut down procedure been agreed?		
9. Are fire hoses and fire fighting equipment ready for immediate use?		
10. Are cargo and bunker hoses and/or arms in good condition and properly rigged?		
11. Are scuppers effectively plugged, and drip trays in position?		
12. Are unused cargo and bunker connections, including the stern discharge line, if fitted, blanked?		
13. Are sea and overboard discharge valves, when not in use, closed and lashed?		
14. Are all cargo and bunker tank lids closed?		
15. Is the agreed tank venting system being used?		
16. Are hand torches of an approved type?		
17. Are portable VHF/UHF transceivers of an approved type?		
18. Are the ship's main radio transmitter aerials earthed?		
19. Are electric cables to portable electrical equipment disconnected from power?		
20. Are all external doors and ports in the amidships accommodation closed?		
21. Are all doors and ports in the after accommodation leading on to or overlooking the tank deck closed?		
22. Are air conditioning intakes which may permit the entry of petroleum gas closed?		
23. Are window-type air conditioning units disconnected?		
24. Are smoking requirements being observed?		
25. Are the requirements for the use of galley and other cooking appliances being observed?		
26. Are naked light requirements being observed?		
27. Is there provision for emergency escape?		

Declaration

We have checked with each other the items listed on this Check List in the course of a joint inspection, and have satisfied ourselves that the entries we have made are correct to the best of our knowledge.

INSTRUCTIONS TO MASTERS AND CONDITIONS OF USE OF PORT

ARAMCO Form 3032 (6/84)
Ras Tanura Terminal
Port of Ras Tanura, Kingdom of Saudi Arabia

Pilot Boarded:.........Local Time Date...................

To the Master S.S./M.V...........

1. Your vessel; will be moored to Berth No. ....North/South Pier/Sea Island Port/Starboard side to the berth.
2. The Local Time is GMT plus 3 hours.
3. Low water will be at approximately ....Local Time and will be approximately ....ft./m. above LAT.

BERTHING/UNBERTHING AND MANOEUVRING

1. All movements of vessels to and from berths and in the proximity of ARAMCO facilities shall be under the direction of an ARAMCO Harbour Pilot.
2. All tank openings, ullage and sighting ports shall be closed before berthing or unberthing operations commence.
3. ARAMCO tugs shall assist in berthing and unberthing.
4. Steering gear, engine room telegraph, whistle and all navigational and communications equipment shall be tested before any manoeuvring to or from the berth is commenced.
5. Full main engine power shall be available for berthing and unberthing.
6. Any special conditions present in the vessel which may effect manoeuvring, berthing or cargo handling capability shall be notified to the Harbour Pilot before operations commence.
7. The Harbour Pilot shall refuse to berth vessels with unsatisfact equipment.
8. The vessel shall be moored to the entire satisfaction of Harbour Pilot.
9. The crew of the vessel shall be ready to employ additio mooring lines as required by weather changes or as reques by the Harbour Pilot or terminal personnel.
10. Winches shall be ready at all times for immediate use.
11. No mooring lines shall be cast off except in emergency with the permission of the Harbour Pilot.
12. When at berth the vessel shall be ready in every respect to le the berth at short notice with full engine power.
13. The Master of every vessel shall in circumstances which threa the safety of the vessel, its crew, or the port installations prepared to unberth the vessel subject to the advice of the P Captain with or without a Harbour Pilot on board.
14. The Harbour Pilot will board on completion of loading and bunkering and the vessel shall vacate the berth immediately a the disconnection of hoses or arms.
15. The expenditure incurred in any delay or towage resulting fr failure to comply with any of the provisions of these instructio shall be the liability of the Master and Owners of the ves concerned.

KINGDOM OF SAUDI ARABIA

1. The National Flag of the Kingdom shall be displayed by day a night in the appropriate position on every vessel when in lo waters.
2. The International Quarantine signals shall be exhibited until vessel is granted Free Pratique.
3. All prohibited items shall be secured before entering the territo waters of the Kingdom. Contravention will entail severe penalt
4. Ship's personnel are NOT permitted ashore nor on the whar FOR ANY PURPOSE WHATSOEVER (this includes the read of the ship's draft) until Pratique is granted and then are allow on the wharves only if actually engaged in duties connected w ballast and cargo handling operations.
5. Shore leave is not permitted except by special arrangement w Government officials through the Agent of the vessel.

CONDITIONS OF USE OF PORT

1. The Master of the vessel shall remain solely responsible for safety and the proper operation of the vessel at all times. Neit ARAMCO nor its personnel shall be responsible for any loss damage arising in consequence of any assistance or advice giv or tendered in respect of the vessel.
2. The use of ARAMCO premises, facilities and equipment is subj to the express understanding and condition that ARAMCO a its personnel shall be held harmless from all liability, loss or cla thereof arising out of such use. In amplifications of the foregoi the vessel, its Owners and/or Charterers shall be liable to a shall reimburses ARAMCO promptly and in full for any ARAM liability to third parties and any cost, loss, delay, or expen incurred by ARAMCO as a consequence of any breach or no compliance with these Instructions to Masters and Conditions Use of Port on the part of the vessel, its Master, Owner(s) a or Charterer(s).
3. All vessels transiting the "Deep Water Departure Channel" sh maintain a minimum of 5 ft. keel clearance.
4. The Harbour Pilot is provided upon the condition that wh boarding or assisting the vessel he becomes the Agent a Servant of the Owner and/or Charterers of the vessel in eve respect. ARAMCO shall not be responsible and shall be he harmless from all liability for any damages resulting from caused by any action taken, order given, or decision made (any omission thereof) by the Harbour Pilot or in respect of handling of such vessel.
5. When the assistance of tugs is provided, the Master and cre of tugs shall, in the performance of such services as they rend to the vessel, become and be deemed to be the Agents a Servants of the Owners and/or Charterers of the vessel assiste and ARAMCO shall not be responsible and shall be held harmle from all liability for any damage that may be done by the tugs their crews while assisting the vessel, whether occasioned by a act or omission of the tug Master or crew by defect or inadequa of the tug, its machinery or gear. This condition shall not, howe empower the Master to detain such tugs should ARAMCO requ their services elsewhere.
6. Vessels and the Owners and/or Charterers of vessels from wh oil, oily residue, oily ballast water or any other pollutant escap or discharged for any reason at any location within the Port sh be liable to and shall reimburse ARAMCO promptly and in full the cost of all clean-up, containment and removal measures tak in response to such escape or discharge by or on behalf ARAMCO which, in ARAMCO's sole discretion, are prudent necessary in order to protect human life, vessels, installatio and the environment. Such cost shall constitute a joint and seve debt due from the vessel and the Owners and/or Charterers ARAMCO. Further, the vessel and her Owners and/or Charter shall be jointly and severally liable for all and any loss, dama and expense sustained by ARAMCO by reason of such esca or discharge and shall hold ARAMCO harmless from a indemnify ARAMCO against any and all claims related to arising out of such escape or discharge.
7. Repair to the main engines or deck machinery shall not permitted when the vessel is secured to any berth.
8. Harbour Pilots shall not berth any vessel at ARAMCO facili without the Master's signature of acknowledgement.

MASTER'S ACKNOWLEDGEMENT

I hereby acknowledge receipt of a copy of this document and agree to the instructions and conditions set out therein.

(DATE) (MASTER)

(HOUR LOCAL TIME) (VESSEL)

INSTRUCTIONS TO VESSELS AND CONDITIONS OF USE OF JU'AYMAH LOADING FACILITIES

THE MASTER S/S — M/V

1. Vessel will be moored at Ju'aymah Berth No. . . . .
2. Discharge into sea of oil base products in combination with ballast water is not allowed. Ships which release oil or oily ballast water in either the berth or anchorage area will be held responsible for all clean-up costs.
3. Prior to loading, the Pilot/Mooring Master will inspect the vessel for conformity with safety requirements and will review in detail each item on ARAMCO Form 5626 "Declaration by Master". This form will be acknowledged and signed by the Master.

MOORING AND MANOEUVRING

1. Full power must be available for manoeuvring in and out of the berth. Manoeuvers with other than full power available shall be performed only after the consent of both the Port Captain and Pilot/Mooring Master have been obtained.
2. The Pilot/Mooring Master will advise the Master during the mooring and unmooring of the tanker and will supervise the connecting and disconnecting of cargo and bunker hoses by the tanker's crew. The loading operation will be performed to the complete satisfaction of the Pilot/Mooring Master.
3. Mooring will be accomplished with the assistance of marine craft assigned to the vessel by ARAMCO.
4. All tank tops, ullage plugs and sighting ports shall be closed before berthing.
5. The vessel's Master shall notify the Mooring Master of any special conditions, difficulties, defective equipment or gear which could impose special hazards when mooring, unmooring or loading cargo.
6. All navigational equipment such as the engine, telegraph, whistle, steering gear, etc., shall be tested prior to getting underway to moor and unmoor. Testing of the tanker's engine when berthed shall be done only after the Pilot/Master has been duly informed and his consent has been obtained.
7. The Mooring Master may decline to moor a vessel with unsatisfactory mooring equipment.
8. No repairs are permitted while the vessel is berthed. The engine and deck machinery will be kept ready to permit the vessel to get underway on an emergency basis.
9. Any vessel delay resulting from failure to comply with any of the provisions of this document shall be for the vessel's account.
10. Upon completion of loading and the disconnection of hoses, the vessel will be unmoored and, if using Early Departure Procedures, the Master should make ready to depart as soon as possible. Otherwise, vessels are to await cargo and Port Clearance documents while lying in stream.

SAUDI ARABIAN GOVERNMENT PORT REGULATIONS

1. Quarantine signals must be displayed upon entering the coastal waters of Saudi Arabia and approaching Ju'aymah in accordance with international practice and shall be continuously displayed until Pratique is granted. These signals shall be as follows:
   Sunrise to Sunset – Quarantine Flag
   Sunset to Sunrise – Quarantine Signal Lights
   (Red over White)
2. The Saudi Arabian flag must be flown from the foremast while your vessel is in the coastal waters of Saudi Arabia. Such flags are available from the ship's agent. The Saudi Arabian flag is properly displayed when the writing appears on top and the sword on the bottom.
3. Importation and/or use of liquor or contraband items, or trafficking in such items, is absolutely prohibited. The Saudi Arabian Government rigidly enforces these regulations and penalties are severe. In the event of violation considerable delay to the vessel involved could occur.
4. Ship's personnel are not permitted to leave their vessel.

CONDITIONS OF USE OF PORT

1. The Master of the vessel shall remain solely responsible for the safety and proper operation of the vessel at all times. Neither ARAMCO nor its personnel shall be responsible for any loss or damage arising in consequence of any assistance, instructions or advice given or tendered in respect to the vessel.
2. The use of ARAMCO premises, facilities and equipment is subject to the express understanding and condition that ARAMCO and its personnel shall be held harmless from all liability, loss or claim thereof arising out of such use.
3. The Pilot/Mooring Master is supplied upon the condition that when boarding or assisting the vessel he becomes the agent and the servant of the owners and/or charterers of the vessel in every respect. ARAMCO shall not be responsible and shall be held harmless from all liability for any damage resulting from or caused by any action taken, order given, or decision made (or any omission thereof) by the Pilot/Mooring Master or in respect to his handling of the mooring or cargo loading operations.
4. When the assistance of small craft is supplied (mooring launches and/or a utility boat), the craft, Master and Crew thereof shall, in the performance of such services as they render to the vessel, become and be deemed to be the agents and servants of the owners and/or charterers of the vessel assisted. ARAMCO shall not be responsible and shall be held harmless from all liability for any damage that may be done by or to the craft or their crews while assisting the vessel, whether occasioned by any act or omission of the crafts or their crews or by any defect or inadequacy of the craft or the craft's machinery or gear. This shall not give the tanker's Master the right to detain such craft for duties other than mooring, unmooring or hose work nor shall this prevent the craft from being reassigned during mooring, unmooring or hose work.
5. No vessel may berth without an ARAMCO Pilot/Mooring Master on board.
6. Pilots/Mooring Masters will not assist in the mooring of any vessel unless they have the Master's signature on the acknowledgement below.

MASTER'S ACKNOWLEDGEMENT

I hereby acknowledge receipt of a copy of this document and agree to the instruction and conditions set forth therein.

DATE MASTER

GMT

HOURS (VESSEL)

REFLOATING/STRANDING

ARABIAN AMERICAN OIL COMPANY
Ras Tanura, Saudi Arabia

MASTER
S.S./M.V. . . . .

The Arabian American Oil Company hereinafter referred to as ARAMCO has been requested to provide assistance to refloat your vessel which is stranded in the waters of the Gulf.

ARAMCO is prepared to provide personnel and such equipment and materials as may be available to assist in the refloating of your vessel subject to the following conditions:–

1. That you as Master shall have sole responsibility for your vessel at all times.
2. That ARAMCO and any personnel, equipment or crafts that may be provided shall be deemed to be the Agents and Servants of you as Master and the Owners and/or Charterers of your vessel.
3. That you will accept liability on behalf of the Owners and/or Charterers of your vessel for all the expenditure incurred by ARAMCO in providing assistance to your vessel.
4. That ARAMCO shall not be responsible for and shall be held harmless from and against any damage that may be done by any personnel and equipment, including tugs and their crews, whether occasioned by any action or omission of ARAMCO personnel or by any defect or deficiency of ARAMCO equipment and is hereby released from any such liability.
5. That ARAMCO shall not be responsible for any oil pollution damage that may result from the stranding and/or refloating of your vessel and any oil pollution clean-up expenditure that may be incurred shall be the liability of you as Master for the account of the Owners and/or Charterers of your vessel.
6. That in the event that the assistance provided by ARAMCO proves to be inadequate to refloat your vessel you will expeditiously arrange and obtain on your own such assistance as may be necessary to refloat your vessel as soon as possible.
7. That ARAMCO will move in immediately without further permission other than this letter and take whatever corrective action is deemed necessary to respond to pollution, fire or any other kind of incident that may endanger your ship, Gulf environment or other vessels and facilities in the area, or to effect rescue of endangered people. You as Master and the Owners and/or Charterers of you vessel will be charged for all expenditures incurred by ARAMCO for the above services.

DECLARATION BY MASTER

I agree to the terms and conditions set out hereto.

Master . . . .
SS/MV . . . . For ARABIAN AMERICAN OIL CO.
Date . . . .

MASTER'S SAFETY DECLARATION
ARAMCO Form 8812 (2/84).
I DECLARE THAT WHEN MY VESSEL IS AT BERTH:

1. MOORINGS AND ANCHORS – the vessel will be moored in accordance with the standards of the port and the anchors will be secured in the hawsepipes.
2. TOWING WIRES – towing wires for emergency use will be rigged at the forward and after ends of the vessel in accordance with the standards of the port. The eyes of the towing wires will be maintained at a height of 3 ft. – 6 ft. (one to two metres) above the water at all times.
3. GANGWAYS – the gangway will be tended and maintained in a safe condition throughout.
4. MAIN ENGINES – the main engines will be ready for use at short notice to leave the berth in the event of an emergency condition. A suitable trim will be maintained for the same purpose. At SBM berths the main engines will be on continuous stand-by.
5. DECK WATCH – an effective deck watch will be maintained.
6. COMMUNICATIONS – an effective ship/shore communications system will be agreed to efficiently control the cargo handling and bunkering operations throughout.

7. CARGO, BUNKER AND BALLAST OPERATIONS – the procedures for cargo, bunker and ballast handling operations will be agreed with the Terminal Representative.
8. EMERGENCY SHUTDOWN – the emergency shutdown procedures will be agreed with the Terminal Representative.
9. FIREFIGHTING EQUIPMENT – all firefighting equipment will be ready for immediate use and fire hoses equipped with jet/spray nozzles will be prepared for use one forward and one abaft the manifold.
10. CARGO AND BUNKER CONNECTIONS – cargo and bunker hoses or arms will be inspected to confirm that they are in good condition and correctly connected.
11. SCUPPERS AND DRIP TRAYS – scuppers will be effectively plugged or otherwise secured (except when the vessel is a gas tanker) and drip trays will be in position.
12. UNUSED CARGO AND BUNKER CONNECTIONS – all unused cargo and bunker connections will be effectively blanked.
13. SEA AND OVERBOARD DISCHARGE VALVES – all sea and overboard discharge valves when not in use will be effectively closed and lashed.
14. CARGO BUNKER AND BALLAST TANK LIDS – all cargo, bunker and ballast tank lids will be closed and secured except as may be permitted by the Terminal Representative.
15. VENTING AND INERT GAS
    (a) Venting Agreement – the method by which tanks will be vented during cargo and ballast operations will be in accordance with that contained in the written agreement with the Terminal Representative.
    (b) Flame Arresters – flame arresters will be employed in accordance with the design features of the venting system.
    (c) Ullage Ports – ullage ports will be fitted with efficient flame arresters on every occasion when they are not secured in the closed position.
    (d) Inert Gas – all cargo tanks will be maintained in an inert condition if the vessel is equipped with an inert gas system. In gas tankers the cargo tanks will be inerted and/or purged.
16. HAND TORCHES – hand torches will be in good condition and approved for use in hazardous zones.
17. PORTABLE TRANSCEIVERS – portable UHF/VHF transceivers will be in good condition and certified as being intrinsically safe.
18. RADIO AND RADAR AERIALS – radio transmitting aerials will be earthed and radar scanners will be switched off. The servicing of such equipment will not be undertaken without the permission of the Terminal Representative.
19. PORTABLE ELECTRICAL EQUIPMENT – all portable electrical equipment on deck will be disconnected from the power supply.
20. DOORS AND PORTS AMIDSHIP ACCOMMODATION – all external doors and ports in the amidship accommodation will be closed and every effort will be made to prevent the entry of dangerous gas.
21. DOORS AND PORTS AFTER ACCOMMODATION – all doors and ports in the after accommodation, which overlook or are adjacent to the tank deck or other potentially hazardous zones, will be maintained in the closed position.
22. CENTRAL AIR CONDITIONING – any central air conditioning or fresh air intakes which may permit the entry of petroleum gas will be closed.
23. WINDOW TYPE AIR CONDITIONING UNITS – all window type air conditioning units will be disconnected from the power supply.
24. SMOKING – smoking will be prohibited except in those spaces which have been jointly approved with the Terminal Representative.
25. GALLEY AND COOKING APPLIANCES – the use of cooking appliances wherever situated will require the approval of the Terminal Representative.
26. NAKED LIGHTS – naked lights will not be used on the tank deck or in other hazardous zones.
27. EMERGENCY ESCAPE – provision for emergency escape will be provided.
28. GAS FREEING – gas freeing will not be undertaken under any circumstances.
29. WATER BALLAST – water ballast discharged will be free of oil or any other contaminant which may pollute the waters of the port.
30. REPAIRS – repairs or maintenance of any kind which may produce a source of ignition will not be undertaken without the agreement in writing of the Terminal Representative.
31. BOILER TUBE CLEANING – boiler tubes will not be cleaned and every precaution will be taken to prevent the emission of sparks from the funnel.
32. EMERGENCY SIGNAL – in the event of a fire or other emergency arising, the emergency signal consisting of TEN (10) SHORT BLASTS will be sounded on the ship's whistle.
33. PENALTIES – any failure to observe the safety requirements contained in this declaration will entail the following penalties:
    (a) A suspension of all cargo handling, bunkering and ballast operations, and
    (b) the vessel may be required to vacate the berth until such time as corrective action has been undertaken to the satisfaction of the Terminal Representative.

All infringements will be brought to the attention of the vessel's Owners, Operators and/or Charterers.

MASTER'S SAFETY DECLARATION (TERMINAL RECEIPT)

.... Master M.V./S.S. ....

BERTH.......................... DATE .... TIME ....

(C) *RAS TANURA TERMINAL*

This section gives specific information regarding RAS TANUR TERMINAL which includes Sea Island, North and South Piers and is be read together with **Part (A) and (B).**

LOCATION: The Ras Tanura Terminal, refinery and tank farms a located on a peninsula, the Southern end of which forms a sand sp the tip of which is officially known as (RA'S) AT TANNURAH.

South Pier: The South Pier is connected to the East side of the peninsu by a causeway and trestle 2,300 ft. in length. The "T" Pier has 4 bert (1 to 4) and is 1,200 ft. long and 105 ft. wide.

North Pier: The North Pier is located about 0.75 miles to the North the South Pier. This Pier is 2,645 ft. long and 110 ft. wide and compris 6 berths (6 to 11). Crude oil, products and RLPG are available at Nor Pier.

Sea Islands: A complex of 4 Sea Islands interconnected by walkwa is located approximately 5,600 ft. N.E. of the North Pier. Each of the sea islands consists of 2 berths with a loading station on the platfor 4 to 6 mooring dolphins and 2 to 4 breasting dolphins per berth. T lengths of each pair of berths between outer mooring dolphins are (fro South) Sea Island 1, 1,250 ft., Sea Islands 2 and 3, 1,400 ft., Sea Isla 4, 1,750 ft.

The berths are numbered from South, on the East side 12, 15, 1 20, on the West side 14, 16, 18, 19.

The loading stations at each of the Sea Island berths are equipp with steel, hydraulically operating loading arms and all berths a equipped with quick release hooks.

Refrigerated Liquefied Petroleum Gases (R.L.P.G.): Facilities loading refrigerated liquefied Butane and Propane are located at t North Pier, Berths 6, 8 and 10.

PILOTAGE: *Vessel from Arrival Channel:* Pilot will normally board Sou of Buoy 17 and 18, as advised by Port Radar.

Vessel at Tanker Anchorage: After heaving anchor, the vessel will advised by Port Radar towards a position approximately 1.5 miles S of the South end of Sea Island dependent on weather and tid conditions.

Vessels must not approach any closer than 1.5 miles to the piers Sea Islands without a Pilot on board due to the tidal streams in the are

Sea Island Pilots: ARAMCO maintains Pilots on continuous Duty on t Sea Islands. They are stationed on the Sea Islands by ARAMCO provide marine advice to the Loading Masters, to assist in the safe a efficient mooring and loading of vessels berthed at this facility and ca out emergency unmooring. Masters of vessels may contact the S Island Pilot through the Pier Operator or by calling the Ras Tanura Pi Office on VHF Channel 16. Masters of all vessels berthed at the S Islands are encouraged to discuss any vessel-related problems with t Duty Sea Island Pilot.

Informing Pilots of Finishing Time: As an aid to planning and expediti ships' movements and also to give adequate notice to vessels schedul to berth, vessels loading at the berths in Ras Tanura shall call the R Tanura Pilot Office on VHF Channel 16 one hour before completion loading.

INBOUND TRAFFIC PROCEDURE: (See Part B) – "Tra Regulations".

Vessels proceeding direct to Ras Tanura Terminal: As per Inbou Traffic Procedures in Part (A) "Navigation" to the Entry Buoy a following the separation scheme to Buoys 17 and 18 according to adv from Port Radar and Pilots either to anchor in the Ras Tanura Tan Anchorage or to berth on arrival.

From Northern Holding Anchorage to Ras Tanura Terminal enter t separation scheme under the advice of Port Radar and follow t channel as above.

Maximum Draft in Arrival Channel: The maximum draft for transit channel immediately South of Buoy No. 5 is 16.46 m. plus predicted r of tide up to a maximum draft of 18 m.

See "Berthing – Depths of Water at Berths".

Masters of vessels arriving partly loaded or in deep ballast sho navigate with caution in the vicinity of Channel Buoys No. 5 and 7.

From East Holding Anchorage and East Channel: Follow the buoy route to RTE 7 and RTE 8. Turn North into the Tanker Anchorage Port Radar and Pilot's advice.

East Channel Caution: It is recommended that vessels of over 800 (244 m.) length or 35 ft. (10.67 m.) draft do not use the East Chann

Sea Islands' Submerged Pipe-lines: All traffic must pass East of t Sea Islands due to the existence of numerous submerged oil pipe-lin between all of the Sea Islands and the shore.

Abu Safa Submerged Pipe-line: All vessels are urged to navigate w caution between Channel Buoys 9 and 11 in the arrival channel and forbidden to drop anchor in their vicinity due to the existence of submerged oil pipe-line which crosses the channel.

ANCHORAGES: *Tanker Anchorage:* The Tanker Anchorage approximately 2 miles East of the Sea Islands and is used as a fi holding area for vessels which have immediate berthing prospects for vessels awaiting cargo clearance, release, sailing documents, and whose draft does not exceed 60 ft. (18.3 m.). Under nor circumstances, no more than 10 vessels are allowed to use t anchorage at one time.

Freighter Anchorage: This anchorage, South East of the "SPIT" b is used as holding ground for coastal tankers intended to load at So Pier and miscellaneous small vessels and craft inbound for ARAM Marine facilities at the West Pier.

Deep Draft Anchorage: Vessels whose draft is 60 ft. or more and wh are required to anchor upon completion of loading must normally do in the area approximately 0.7 miles North of the Sea Islands. T anchorage has a swept depth of 72 ft. (21.9 m.) and holding groun only considered fair due to variations in character of the bottom. I recommended that vessels lie to a long scope of chain in adve weather. No more than 2 vessels are allowed to use this anchorag one time.

RADIO: COMMUNICATIONS WITH THE TERMINAL.

Under Way: At all times when under way in the arrival channel and anchorage areas with no Pilot aboard, vessels must watch VHF Channel 10 to keep in contact with Port Radar.

At Anchor: A good listening watch should be maintained on VHF Channel 16. Vessels will be called by Ras Tanura Pilots with berthing and other information and instructions. Port Radar should be called on VHF Channel 10 prior to heaving anchor.

Under Pilotage: Pilots carry portable, intrinsically safe radios which operate on ARAMCO dedicated mooring Channels for contact with tugs and jetty staff. In addition, the vessel's VHF Radio should stand by on Channel 13 for back up communication.

At Berth: An exchange of intrinsically safe portable radios will be made between vessel and jetty personnel in order to assist constant communication whilst loading.

BERTHING:

Mooring Procedures: Mooring boats are not used at Ras Tanura Terminal.

Vessels should have heaving lines ready to take the shore messenger after landing alongside. The messenger is then made fast to the ship's mooring line which is hove ashore by means of a capstan. Heavy wires should be sent one by one and ropes two at a time. Jetty crews are on duty continuously to handle mooring lines. Mooring lines on board vessels will not be handled by ARAMCO Personnel.

BERTHING FACILITIES:

Safe Loading Depths: If at any time a vessel's draft approaches to within about 3 ft. (1 m.) of the depth of water at the berth at North and South Piers, loading will be suspended until a rising tide increases the depth to permit resumption of loading and provide for a safe draft of the fully loaded ship on departure.

At the Sea Island Berths, the maximum sailing draft is 19.48 m. plus the height of tide at the time of transitting the Deep Water Channel.

Depths of Water at Berths:

		Max. at LAT (ft.)	*Max. Arrival Draft* (ft.)
South Pier	Berth No. 1	31	29
	2	31	29
	3	30	27
	4	29	27
North Pier	Berth No. 6	44	41
	7	37	28
	8	46	43
	9	40	29
	10	46	43
	11	40	29
Sea Island	All Berths		85

Gangways: At North and South Pier, all vessels are required to provide their own gangways which should be ready prior to berthing.

At the Sea Islands, shore gangways are provided at each berth.

LOADING:

	Berth No.	*Product*	*Manifold Size* (in.)	*Maximum Loading Rate* (bbls.p.h.)
Sea Islands	12 to 18	Crude	16	40,000 to 280,000
	19 and 20	Crude	16 to 24	
	12 to 18	Bunker Fuel Oil	10	12,000
	12 to 18	Bunker Diesel	10	900
	19 and 20	Bunkers	12 to 16	12,000
North Pier	6 to 11	Crude	12	15,000 to 90,000
	6 to 11	Fuel Oil (Cargo)	12	12,000 to 22,000
	8, 9, 10	White Diesel	12	12,000
	8, 9, 10	Kerosene	12	6,500
	6 to 10	Naphtha	12	30,000
	6 to 11	Bunker Fuel Oil	8	5,000
	6 to 11	Bunker Diesel	8	1,200
	6, 8, 10	RLPG	12	30,000
South Pier	1 to 4	Fuel Oil (Cargo)	8	12,000 to 15,000
		Black Diesel (Cargo)	8	5,000
		White Diesel	8	8,500 to 15,000
		Gasoline	8	6,000
		Kerosene	8	6,500
		Jet Fuel	8	10,000
		Bunker Fuel Oil	6	5,000
		Bunker Diesel	6	1,200

Notes:

1. All vessels calling at Ras Tanura Terminal should be equipped with reducers to fit these loading connections which all have 150 lb. ASA flanges. These reducers should be fitted before berthing to help expedite ship turnaround time.

2. It is expected that most vessels will be able to accept any cargo as fast as it can be delivered. Officers in charge of loading must have due regard for all safety precautions as well as for individual vessel hazards.

If loading of crude or products is too slow, ARAMCO will so advise the vessel.

Should a demurrage claim be filed against ARAMCO, the slow loading rate may result in an addition to allowed lay time.

3. Special regulations govern the acceptance and loading of Liquefied Petroleum Gas tankers in the Port of Ras Tanura. (See GASRUL 9:83).

4. The following types of crude oil are available at Ras Tanura Terminal: ARABIAN BERRI (sometimes incorrectly referred to as Light Extra Light) CRUDE, ARABIAN LIGHT CRUDE, ARABIAN MEDIUM CRUDE, ARABIAN HEAVY CRUDE.

Loading arm connection: Jetty crews are on duty continuously to handle hoses/arms and will make connections and disconnections.

All loading connections are equipped with electrical insulating flanges therefore ship to shore bonding cables are not required.

Loading procedures: All operations in connection with the starting of loading, discharging, switching of tanks and topping off must be directly and personally supervised by the ship's officer.

It is the responsibility of the vessel to advise shore personnel to shut down cargo and bunker loading when the vessel's cargo and bunker requirements are met.

Upon completion of loading the vessel will normally be required to leave the berth immediately after disconnecting hoses/arms to await clearance in the Tanker Anchorage.

Cargo Calculations and Release: The American system of cargo measurement in BARRELS with temperatures in fahrenheit degrees according to the ASTM – I.P. is used by ARAMCO and the Saudi Arabian Government for Cargo measurement purposes. Ships cargo loaded figures should be available in these units. Generally, if the difference between average normal ship measurement and official cargo measurement is satisfactory the ship will be released to sail by ARAMCO under E.D.P. Unusual differences will be investigated by ARAMCO while the vessel waits in the Tanker Anchorage.

BALLAST: *Arrival Ballast Condition:* Vessels arriving at Ras Tanura Terminal shall retain sufficent clean water ballast on board to permit safe handling of the vessel in the prevailing weather conditions. A maximum stern trim of 15 ft. with the propeller just covered is recommended.

Ballast pumping equipment should be ready to commence discharging ballast as soon as the vessel is secured in the berth.

DEPARTURE: See "Inbound Traffic Procedure" – East Channel Caution.

Deep Water Departure Channel: Has a clear swept depth of 21 m. at LAT.

Maximum departure draft from Ras Tanura Piers and Sea Islands is 19.48 m. plus predicted rise of tide so that there is a minimum keel clearance of 1.52 m. maintained during transit of Departure Channel. (See ARAMCO form "Maximum Sailing Draft – VLCC, 1st March 1986").

Departure Pilotage: On departure from Ras Tanura, Masters of vessels 150,000 d.w.t. and above with draft of 60 ft. (18.28 m.) or more, may request additional pilotage assistance to line up for the Deep Water Departure Channel. Such pilotage assistance is compulsory for vessels with a draft of 68 ft. (20.73 m.) or more. In such instances the Harbour Pilot will remain on board until the vessel is aligned on a safe course for the Departure Channel, provided the Pilot can disembark safely. In certain cases it may be possible to arrange for the Pilot to leave by helicopter (See Part "A" – Helicopter Operation). The additional pilotage is also available when it is necessary for a VLCC to proceed to anchor to await a favourable tide or other reasons. The Pilot will remain on board until the vessel arrives in the anchorage, however, the Master will be responsible for the actual anchoring of the vessel. During adverse sea and weather conditions, a proper lee must be made so as to allow the Pilot to safely disembark.

Vessel proceeding from Ras Tanura Terminal to Northern Holding Anchorage: The vessel should leave Ras Tanura Terminal and follow the Departure Channel observing the separation scheme to the Northern Holding Anchorage under advice of Port Radar.

SEE Part "B" TRAFFIC REGULATIONS

The vessel should advise Ras Tanura Pilots of its anchoring time.

REPORT: *More stringent safety checks:*

Quote:

Due to recent accidents involving tankers at terminals, ARAMCO have tightened up their safety checks and closely follow the issued safety regulations.

ARAMCO, as terminal operator of Ras Tanura/Ju'aymah, inspect all vessels before loading. Anything found not up to the standard of guidelines and recommendations compiled by Oil Companies International Marine Forum are noted, the Master is given a letter of protest, and the Owner is advised to correct deficiencies. At the same time all remarks and recommendations are computer-stored for easy access in the future.

ARAMCO have found that many recommendations are neglected and some vessels are repeatedly given the same remarks.

To prevent this, new actions are being taken by ARAMCO. Vessels which in the past have received recommendations and not followed the same have recently been refused permission to load at Ras Tanura/Ju'aymah.

That a vessel was allowed to load at her last call is not a guarantee that she will be allowed again.

Unquote.

Further to the above, we have been advised that since these deficiency letters do not allow these vessels to berth at the Ju'aymah Terminal's SBMs, vessels will be diverted to either of the three suitable berths at Sea Island. Time lost from berth available at Ju'aymah to berth available at Sea Island will be on the vessel's account.

This will affect vessels between 200,000 d.w.t. – 275,000 d.w.t.

YANBU (See Plan)

COMMERCIAL PORT: 24.05 N. 38.03 E.
INDUSTRIAL PORT: 23.57 N. 38.13 E.

NOTICE: British Admiralty Notice No. 3553(P)/86.
Red Sea – Saudi Arabia, West Coast – Madinat Yanbu As Sinaiyah – King Fahd Port – New Approach Channel.

1. A new Southern Approach Channel for vessels calling at King Fahd Port, Madinat Yanbu As Sinaiyah, opens to shipping on 1st December, 1986. Pilotage is compulsory for all vessels using this channel.

2. The following have been established:

	Feature	*Position*
(a)	Yanbu South Light, Fl. W.R. 10 sec. 34 m. 20/17 M. (Red/white circular tower with radar reflectors) and radar beacon Racon (B).	23° 28.13′ N., 38° 25.52′ E.
(b)	Starboard-hand light beacon with topmark, Fl. (3) G. 10 sec. 12 m. 8 M. S3.	23° 31.02′ N., 38° 29.90′ E.
(c)	Port-hand light beacon with topmark, Fl. (4) R. 12 sec. 12 m. 8 M. S6.	23° 38.38′ N., 38° 25.16′ E.
(d)	Starboard-hand light beacon with topmark, Fl. (4) G. 12 sec. 12 m. 8 M. S7.	23° 41.17′ N., 38° 28.64′ E.
(e)	Blue/White striped beacon with radar reflector, SR1.	23° 31.65′ N., 38° 25.92′ E.
(f)	Blue/White striped beacon with radar beacon, SR2 Racon (TG).	23° 34.66′ N., 38° 27.71′ E.
(g)	Blue/White striped beacon with radar beacon, SR3 Racon (X).	23° 42.86′ N., 38° 23.22′ E.
(h)	White cardinal pillar light-buoy, Q(9), 15 sec. S1.	23° 26.30′ N., 38° 29.22′ E.
(i)	Port-hand can light buoy with topmark, Fl. (2) R. 5 sec. S2.	23° 27.96′ N., 38° 25.86′ E.
(j)	Port-hand can light buoy with topmark, Fl. (2) R. 10 sec. S4.	23° 34.55′ N., 38° 28.22′ E.
(k)	White cardinal pillar light buoy Q(9) 15 sec. S5.	23° 35.31′ N., 38° 31.41′ E.
(l)	Port-hand can light buoy with topmark, Fl. R. 5 sec. S8.	23° 44.47′ N., 38° 23.15′ E.
(m)	Starboard-hand conical light buoy with topmark, Fl. G. 5 sec. S9.	23° 45.46′ N., 38° 25.25′ E.
(n)	N. cardinal pillar light buoy, Q. S10.	23° 49.08′ N., 38° 17.82′ E.
(o)	Starboard-hand conical light buoy with topmark, Fl. (2) G. 10 sec. S11.	23° 51.15′ N., 38° 19.44′ E.
(p)	Pilot boarding place.	23° 26.60′ N., 38° 27.20 E.

Charts Affected: 63, 4704, 4071.
Light List Vol. E/86, 6050.63 and (Remarks), 6050.64 and (Remarks).
Admiralty List of Radio Signals, Vol. 2, 1986: 8511.2, 8511.4, 8511.6.
Saudi Ports Authority Notice "A" 170/86. (H. 2579/79).

(A) COMMERCIAL PORT

ALSO SEE "GENERAL" BEFORE FIRST PORT.

LOCATION: Yanbu Commercial Port is on Red Sea coast, about 168 nautical miles N.N.W. of Jeddah.

PORT LIMITS:
Harbour Boundaries:

All shore-based port property enclosed by a fence following the shore line extending seawards to a line running between the following points:

Lat. 24° 06′ 00″ N.	Long. 38° 00′ 00″ E.
Lat. 24° 06′ 00″ N.	Long. 37° 57′ 30″ E.
Lat. 24° 03′ 30″ N.	Long. 37° 57′ 30″ E.
Lat. 24° 03′ 30″ N.	Long. 38° 05′ 30″ E.

CHANNEL: Ships entering port pass through a channel of the following measurement: Length 1,647 m., width 200 m.

BEACONS:

1. *Schermo Beacon:* A Racon is established on Schermo Reef in position: Lat. 24° 03′ 20″ N., Long. 37° 51′ 60″ E. Code letter: "Y". Cycle: 75 seconds. Range: Approximately 12 nautical miles.

2. *Entrance Beacons:* Two Beacons, 1 & 2 at entrance of port channel. Height: 4.0 m. Range: 5 nautical miles.

Beacon No. 1: Starboard – hand beacon (Green), green flash every second (Q.G.).

Beacon No. 2: Port – hand beacon (Red), red flash every second (Q.R.).

Beacon No. 6: 795 m. from channel entrance on port side there is another beacon height 4.0 m. (Red), red flash every second (Q.R.). Range: 5 nautical miles.

APPROACHING: A cement factory has been established in posit Lat. 24° 16.1′ N., Long. 37° 33.2′ E.

The factory provides a strong radar echo and emits a very bright g at night.

It has been reported that this has confused seafarers who have ta it for the town of Yanbu.

Seafarers are strongly advised to amend their sea charts accordin

Masters proceeding to Yanbu Commercial Port should follow str the Channel and traffic separation scheme as clearly as delineate formal charts in force (e.g., British Admiralty Charts 327 and 328.)

The Ports Authority, Kingdom of Saudi Arabia, advise that sh proceeding outside the Approach Channels, or contravening the Ru of the Traffic Separation Scheme in order to save time, will be fined the Masters held individually responsible.

BUOYS: Channel is buoyed with red and green port and starboard-h buoys.

Starboard-hand buoys: 7 buoys, odd number: 1A, 3, 5, 7, 9, 11 13. Buoy shape: Cone. Light characteristic: Green flash every 2 seco (Fl. G. 2 secs.).

Port-hand Buoys: Number of buoys: 2, even numbers: 4, 8. B shape: Can. Light characteristics: Red flash every 2 seconds (Fl. 2 secs.).

DOCUMENTS: All ships bound for Yanbu Commercial Port should h the following documents prepared for the relevant authorities and original certificates as specified ready for inspection by the Authority's Boarding Officer.

Crew List, original plus 4 copies.
Passenger List, original plus 4 copies.
Personal Effects of Crew, original plus 1 copy.
Vaccination List, original plus 1 copy.
Marine Health Declaration, original plus 1 copy.
Israel Boycott Declaration, original plus 2 copies.
Ship's Stores List, original plus 1 copy.
Logbook.
Certificate of Registry.
Certificate of Classification.
Load Line Certificate.
Safety Construction Certificate.
Safety Equipment Certificate.
Radio & Wireless Certificate.
Cargo Gear Certificate.
Derat Certificate.
Port Clearance – Last Port of Call.

PILOTAGE: Pilotage is compulsory. Vessels bound for Ya Commercial Port should call Yanbu Port Control on VHF Channel 1 least 2 hours prior to arrival.

North Channel: Pilots will normally board in position Lat. 24° 04′ N. Lo 38° 01′ E. approximately 5 miles West of Schermo Beacon. Pilot bo are painted orange with "Pilot" written in black on white superstruct

Vessels should exhibit international code flag "G" by day or flash by night. On approaching the Pilot Boarding Area, a pilot ladder sho be rigged, reaching approximately 1 m. above sea level. Vessels sho ensure a good lee for boarding of the Pilot.

South Channel: Ordering of Pilotage Service for Vessels Arriving at South Channel: Due to the extra length of the South Channel compa to the North Channel, the Port Control Tower will require 5 hours no prior to pilot boarding time at the South Pilot Station. Requirements the North Pilot Station remain unchanged.

Way Points in South Channel: You are informed that the follow way points are now established in the South Channel for use with Control Tower and movement of vessels within the South Channel

South Pilot Station	23° 26.6′ N., 38° 27.2′ E.
S-1	23° 34.3′ N., 38° 29.6′ E.
S-2	23° 46.2′ N., 38° 23.4′ E.
CSZ	23° 52.0′ N., 38° 16.8′ E.

Also see "Notice" before Section A.

ANCHORAGES: There are no areas suitable for the safe anchorag vessels in the vicinity of Yanbu Commercial Port.

RESTRICTIONS: The port is open 24 hours per day and vessels m enter and leave port at any time.

MAX. SIZE: There is no restriction as to length or breadth of ves but a draft restriction of 34 ft. is in force for all vessels to all berths o than those cement vessels nominated specifically for discharge Berth No. 3 or No. 9 where a 36 ft. draft limit is allowed.

HEALTH: Quarantine formalities are effected after vessels are bert except in the case of passenger/pilgrim vessels which will be ancho inside the harbour for quarantine and immigration clearance.

RADIO: Vessels bound for Yanbu from the North should route their cables through Port Said Radio.

Vessels bound for Yanbu from the South should route their ETA ca through Bahrain Radio.

ETA cables are transmitted to the local Saudi PTT Yanbu Office thence distributed to concerned parties by telex.

VHF: Yanbu Port Control keeps a radio watch on Channel 16 V 24 hours per day. VHF Channels 14, 12 and 9 are available for stan communications. VHF Channel 14 is normally used by Pilots and for manoeuvring purposes.

RADAR: There is no port radar facility at Yanbu Commercial Port.

TUGS: Tugs normally meet incoming vessels off Channel Buoy N abeam of the port Coast Guard station. Tugs' lines are used for bert and unberthing operations.

Tugs range from 800 h.p. – 2,500 h.p.

BERTHING: The following categories of berth, with a draft range 10.0 m. to 12.0 m. are available: Bulk Cement, Bulk Grain, Ro-Ro (to), General Cargo and Passengers.

Storage: Adequate covered and open storage space is available in form of warehouses, transit sheds, container freight stations, ve parks.

CARGO HANDLING EQUIPMENT: Mobile cranes of up to 200 tons capacity are available.

40 tons tower cranes are equipped with container spreaders. One crane is equipped with container lifting capacity 70 tons.

Head trucks, Mafi trailers, container handlers up to 35 tons, forklifts up to 25 tons are available.

BULK HANDLING FACILITIES: *Bulk Cement Terminal:* One Bulk Cement Berth with an annual capacity of about 1 million tons is available. *Bulk Grain Units:* Mobile discharging machines with handling capacity 200 t.p.h./machine, no bulk storage facility. Bulk grain is normally handled at Berth No. 5 and Berth No. 8.

STEVEDORES: Contracted for an integrated cargo handling operation, and work continuously 24 hours per day, 7 days per week.

MEDICAL: Assistance can be given by local general hospital and/or by a small private clinic via the Agents.

No vaccinations are required, but Malaria precautions are recommended.

DENSITY: 1025.

FRESH WATER: Available via mains direct to berth at a delivery rate of approximately 25 t.p.h. Costs as per current tariff.

CONSULS: At Jeddah.

REPAIRS: No facilities, however minor repairs are possible in local workshops via the Agents.

DRY DOCK: Not available.

SURVEYORS: Available via Jeddah.

GANGWAY/DECK WATCHMEN: Service not necessary and not available. Port area is fenced and guarded by Saudi Arabian Coast Guard, and guards are posted on each individual vessel in port.

HATCHES/CARGO GEAR: To vessel's advantage if all hatches and gear are prepared by ship's crew, however stevedores do assist.

CUSTOMS ALLOWANCES: In all Saudi Arabia, possession of any alcoholic beverages is strictly prohibited.

AIRPORT: Regular flight service on direct flights to Jeddah and Riyadh by Saudia. Other Saudi destinations and international destinations via Jeddah and Riyadh.

Yanbu domestic airport is located approximately 15 km. from the port.

TIME: GMT plus 3 hours.

HOLIDAYS: Public holidays do not affect port's activity. But all government offices, banks, etc., are closed to the public during Ramadan and Haijh holidays which change annually by the Higirian calendar.

TELEPHONE NUMBERS:

Police (Coast Guard):	Ext. 1000
Fire	Ext. 1313
Ambulance – via Port Safety	Ext.1026/7
or Traffic Department	Ext.1317

TELEPHONES: There are pay phones in the port.

SERVICES: Services like tank cleaning, etc., are not available.

SHORE LEAVE: By Agent's request permitted.

IDENTIFICATION CARDS: Seamen's Discharge Books are sufficient.

REGULATIONS: Refer to Rules and Regulations for Seaports issued by the Co-operation Council for the Arab States of the Gulf, 1985.

DEVELOPMENTS: Future port developments include an additional 7 berths and a control tower. No time has yet been fixed for implementation of these projects.

AUTHORITY: Yanbu Port Management, P.O.Box 1019, Yanbu Port, Yanbu, Al Bahr, Saudi Arabia. *Tel:* (04)322 1163, 322 2470. *Telex:* 661005 Port SJ and 661096 Port SJ. *Cables:* Ports Yanbu (via Port Said or Bahrain). *Contact:* Abdul Rahman Ahmad Al-Khateeb, Port Director-General.

AGENT: See Section (B).

(B) KING FAHD INDUSTRIAL PORT, YANBU

At present the King Fahd Industrial Port consists of 6 Terminals listed as follows:

Crude Oil Terminal
NGL Terminal
Yanbu Petromin Refinery Terminal
Petromin – Mobil Refinery – PEMREF.
Al Muajjiz Terminal.
General Cargo and Container Terminal
Bulk Terminal

PORT LIMITS: Seaward boundaries of King Fahd Industrial Port are enclosed by the following boundaries:

1.	Lat. 24° 03.50′ N.,	Long. 38° 05.50′ E.
2.	Lat. 24° 03.50′ N.,	Long. 38° 02.00′ E.
3.	Lat. 24° 07.00′ N.,	Long. 37° 53.67′ E.
4.	Lat. 24° 07.00′ N.,	Long. 37° 45.00′ E.
5.	Lat. 24° 01.50′ N.,	Long. 37° 45.00′ E.
6.	Lat. 23° 50.00′ N.,	Long. 38° 12.00′ E.
7.	Lat. 23° 25.00′ N.,	Long. 38° 20.00′ E.
8.	Lat. 23° 25.00′ N.,	Long. 38° 40.00′ E.

Thence along the coast to No. 1 (above).

FLAG: Every vessel entering King Fahd Industrial Port at Yanbu must hoist the Flag of the Kingdom of Saudi Arabia from the foremast and keep it flying at all times throughout the vessel's stay in Port. The Flag of the Kingdom of Saudi Arabia is to be in good condition and is properly displayed when the Arabic writing appears at the top and the sword at the bottom.

DOCUMENTS: Also see "Radio".

Arrival Documentation Requirements: The Rules and Regulations for Seaports specify that Masters must present or make available for inspection the following papers and documents:

Log Book.
Registration Certificate.
Classification Certificate.
Load-Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificate.
Cargo Gear Certificate.
Maritime Health Declaration.
Vaccination List.
Derat Certificate.
Clearance from last Port of call.
Israel Boycott Declaration.
Ship's Stores List.
Grain Shipping Certificate if the vessel is carrying a grain shipment.
Mail Transport Documents in accordance with the "International Postal Treaty" if any mail is carried aboard.
5 copies of the Crew List including name, nationality, date and place of birth, Passport number, port of embarkation, port of disembarkation.
2 copies of the List of Personal Effects of crew and passengers.
5 copies of the Passenger List including name, nationality, date and place of birth, passport number, port of embarkation, port of disembarkation.

In addition, the Rules and Regulations for King Fahd Industrial Port require that the Oil Record Book and the Certificate of Fitness (in cases of gas and chemical carriers) are available for inspection.

CLEARANCE: *Basic Procedure for Clearing a Ship:* On arrival of the ship at anchor or berth, and given that all the pre-entry requirements have been fulfilled, the ship will be boarded by the following for completion of the required formalities:

Immigration Authorities.
Coast Guard.
Port Health Officer.
Customs Officer.

In the case of dry cargo vessels, on completion of these formalities, the Agent will collect the discharge permit from the Customs Authorities, having provided a copy of the manifest well in advance. The Customs Authorities then issue a Discharge Permit, one copy of which is given to the stevedores while the other is given to Port Management.

Basic Procedures for Clearing a Ship Outward: When a vessel completes cargo, the Agent is responsible for issuing a letter of notification to the Customs Authorities. The letter is endorsed by the Customs and copies given to the following:

(i) Immigration Department.
(ii) Criminal Investigation Department.
(iii) Yanbu Port Authorities.
(iv) Intelligence Department.
(v) Coast Guard.

The Coast Guard issues a letter to the Quarantine Department, in their capacity as Port Health Authority stating:

(i) They have received the clearance letter from Customs.
(ii) The vessel's name.
(iii) The vessel's flag.
(iv) The name of the Agent.

and requesting them to issue the Departure Permit.

The Departure Permit, duly signed and stamped, is taken to the Immigration Department who will dispatch one of their Officers to the vessel. This Officer checks the Crew List against the Passports and obtains assurances from the Master that the crew is the same as on arrival, apart from any agreed repatriation, and that no crew member has been involved in any mishap. Once the Immigration Officer is satisfied he gives one copy of the Departure Permit to the Master and one copy to Port Management, concluding the formalities.

EARLY DEPARTURE PROCEDURE: Early Departure Procedure is available at the crude oil terminal and should be requested through the ship's Agent.

PILOTAGE: *Instructions to Vessels and Conditions of Use of all Berths within King Fahd Industrial Port:* When the Pilot boards an inward bound vessel he will present the Master with a letter "Instructions to Vessels and Conditions of Use of all Berths within King Fahd Industrial Port". The Master is required to sign the letter, acknowledging receipt and agreeing to the Instructions and Conditions contained therein prior to entry into the Port. No vessel will be allowed to proceed into the Port until this letter has been signed.

Pilotage: Pilotage is compulsory for all vessels entering, navigating within, or leaving the port limits of King Fahd Industrial Port.

Orders for Pilots must be received at least 2 hours before their services are required. 5

Vessels under 150 n.r.t., pleasure craft, vessels operated by the Saudi Arabian Government and the SEAPA and any craft employed solely within the port limits are exempt from Pilotage. These vessels must keep clear of the fairway.

The Pilot boarding area for King Fahd Industrial Port is in a position Lat. 24° 02.6′ N., Long. 37° 45.2′ E. Pilots will embark and disembark from twin screw, steel pilot vessels. When approaching the pilot boat the Master of every vessel must reduce speed to a minimum for steerage way, maintain VHF contact with the pilot boat, and provide a good lee.

Every vessel picking up a Pilot must have rigged and ready for use a safe, clean, properly secured pilot ladder or combination of gangway and pilot ladder. The Pilot boarding arrangements must comply with the current IMO codes of practice concerning pilot boarding. A lifebuoy, with lifeline attached, and a boat rope must be provided ready for immediate use, and, in addition, between sunset and sunrise the pilot boarding area must be well illuminated. The rigging of pilot ladders and the embarkation and disembarkation of pilots must be supervised by a responsible deck officer.

Any vessel which overcarries a Pilot to another Saudi Arabian Port, must pay all repatriation expenses. Under no circumstances may a Pilot be overcarried to a Port outside the Kingdom of Saudi Arabia, due to visa restrictions. If weather, or other conditions preclude the disembarkation of a Pilot from a vessel, bound to a Port outside the Kingdom of Saudi Arabia, then that vessel will be delayed, at the vessel's expense, until such time as disembarkation is possible. Any such vessel so delayed may arrange, at their own expense, for the Pilot to be disembarked by helicopter.

The length of Pilotage from the Pilot boarding position is approximately 33 miles, with a minimum surveyed depth of 32 m.

Vessels approaching the Port are reminded that the British Admiralty "Red Sea and Gulf of Aden Pilot" states in its supplement that "Ras Baridi has been reported to be 3 miles Northward of its charted position".

Also see "Section A" and "Notice" before "Section A".

APPROACHES: Masters of deep draft vessels will be aware that there are extensive unsurveyed areas between the main shipping lanes and the approaches to Yanbu. Two approach corridors to the present pilot boarding area off Schermo Reef were surveyed early in 1981. The Northern approach corridor, some 48 miles long and 3 miles wide extends in a Westerly direction from just West of Schermo Reef, at approximately Lat. 24° 03′ N., Long. 37° 45.2′ E. to Lat. 24° 04′ N., Long. 36° 53′ E. Depths range in general from 650 m. inshore to 950 m. offshore, but two isolated domes were discovered with least depths of 132 m. and 184 m. at approximately Lat. 24° 04′ N., Long. 37° 36′ E. and Lat. 24° 07′ N., Long. 37° 36′ E. respectively.

The Southern approach corridor some 43 miles long and 3 miles wide extends in a South-Westerly direction from just West of Schermo Reef at approximately Lat. 24° 03′ N., Long. 37° 45.2′ E. to Lat. 23° 22.5′ N., Long. 37° 28.5′ E. No hazards were discovered with depths generally 650 m. inshore to 790 m. offshore.

ANCHORAGES: The bearing and distance shown below is calculated *from Beacon 2C* and indicates position of the anchorage.

Anchoring Points	*Beacon 2C Bearing*	*Max. Distance*	*Draft*
N1	101°	1.06 miles	15.0 m.
N2	110°	1.26 miles	16.0 m.
N3	098°	1.56 miles	22.0 m.
N4	117°	1.80 miles	22.0 m.
N5	123°	2.15 miles	22.0 m.

Anchorages "N4" and "N5" will be utilised for fully laden VLCCs.

Masters of vessels are advised of the following conditions for the use of the anchorage:

1. No repairs of any kind are permitted at the anchorage unless authorised by the Harbour Master.
2. Main engines to be in a state of readiness at all times to leave the anchorage at short notice.
3. A continuous listening watch on VHF Channel 16 should be maintained.
4. Anchor watches to determine vessel's anchor position at reasonable intervals is recommended.

There are no anchorages considered suitable for deep drafted vessels without local knowledge in the vicinity of either Pilot Boarding Station. In any case, vessels not cleared to enter King Fahd Industrial Port are required to remain outside the territorial waters of Saudi Arabia.

An inner anchorage has been established approximately one mile S.W. of the Port Control Tower (27° 57.4′ N., 38° 13′ E.) within the Controlled Navigation Zone of the port. Five vessels can be accommodated in this anchorage. The minimum depth in the anchorage is 35.0 m. and the holding ground is considered to be good. A SEAPA Pilot will conduct vessels to a designated anchorage position on request.

RESTRICTIONS: *Equipment Requirements:* No vessel shall navigate within the Port, unless the vessel complies with the following equipment requirements:

Efficient VHF Radio Telephone capable of working on the Port frequencies.

Efficient steering gear with fully operational rudder and helm indicators.

Efficient working radar.

Efficient propulsion both ahead and astern and fully operational tachometer.

Both anchors capable of being let go and capable of being raised by the vessel.

Efficient winches and adequate mooring gear to secure the vessels safely, and an efficient mooring stations communication system.

Sufficient crew on board at all times to operate the vessel safely and efficiently and all officers properly qualified and certificated as required by the flag nation.

All secondary power or mechanical systems on the vessel to be in operation and immediately available in the event of failure of any primary system.

If any vessel cannot comply with any of the requirements listed above, King Fahd Industrial Port Control must be advised prior to arrival or departure. The vessel will then be subject to inspection and possible delay. Failure to comply or to notify King Fahd Industrial Port Control may result in the vessel being fined or refused entry to the Port or both.

Permission to Enter the Port: All Masters of sea going vessels must have prior permission of the King Fahd Industrial Port Control to enter the Port. Such permission may be subject to special restrictions or conditions if:

The vessel arrives before or after the given ETA.

The vessel is in danger of sinking.

The vessel or its cargo is on fire or if there is any possibility of a fire or if after a fire it is uncertain whether that fire is completely extinguished.

The vessel is overloaded or, on account of the condition of the cargo, the vessel is dangerous or has deck cargo which extends beyond her sides.

The vessel has been involved in a collision or has grounded.

The vessel is leaking.

The vessel has a list.

The vessel is in an unstable condition.

Draft Requirements: Vessels will not be permitted entry to the P unless they arrive at a draft consistent with safe manoeuvring a reasonably trimmed, to the satisfaction of the Pilot.

RADIO: *ETA Requirements:* In addition to the Pre-Arrival Informati Requirements below, further notification of ETA is required 5 day 72 hours, 48 hours and 24 hours prior to arrival at the Port and shou be sent by telex: 662360 ("PORTCT SJ") for information of the Direct General. Changes in ETA in excess of one hour must be notifi thereafter. On coming within range of King Fahd Industrial Port Contr the ETA must be confirmed by VHF.

Vessels which fail to comply with these requirements may be delay and or subject to a fine as laid down in the Rules and Regulations.

Government Entry Requirements: The Master will be responsible complying fully with the requirements of Saudi Arabian Governme Departments, Ministries, Agencies and Organisations. Particul attention should be paid to the requirements of the Customs, Coa Guard, Immigration and Port Health Authorities. Masters requiring a advice on these requirements should contact their local Agents.

Masters of tankers calling at Petromin's Crude Oil Terminal and N Terminal should be instructed to address all messages to "ARAMC via ARAMCO's HZY Marine Radio Station. The above does not app to messages intended for outside shipping and inspection agencies which commercial Channels should continue to be used.

PEMREF: PEMREF requires a *minimum* of 96/72/48/24 hours notice a vessel's arrival. The full pre-arrival message should accompany t 96 hour ETA. Where a vessel is arriving from a port less than 96 hou away, an ETA must be sent as soon as the vessel leaves that port.

The above requirements are a *minimum* and Masters should encouraged to keep PEMREF well advised at an early stage regardi all aspects of their call. Failure to provide the required information i timely manner will result in delays in berthing and loading, which will for Owner's account.

PRE-ARRIVAL INFORMATION REQUIREMENTS: The Rules a Regulations for Seaports of the G.C.C. Member States cover King Fa Industrial Port and these specify that certain information must received either directly or through the vessel's Agent before that ves arrives at the port. Vessels which fail to comply with this requireme may be delayed and/or subject to a fine as laid down in the Rules a Regulations.

Dry Cargo Vessels: The following information must be sent to t Director General as soon as that vessel has completed loading car at her previous port:

1. Call Sign.
2. Name of vessel.
3. Owner's/Charterer's name and address.
4. Nationality.
5. Agents.
6. LOA.
7. Maximum draft.
8. No. of hatches.
9. G.R.T.
10. N.R.T.
11. D.W.T.
12. Previous Names.
13. Type of Vessel.
14. Type of Cargo.
15. Total cargo weight tons.
16. Total cargo freight tons.
17. No. of containers/units.
18. No. of Livestock.
19. E.T.A.
20. Actual Arrival Draft.
21. Hazardous Cargo for Yanbu, including quantities and classes
22. Hazardous Cargo in Transit for other ports, including quantiti and classes.
23. Tonnage to Hatch for Yanbu Discharge.
24. Year of Construction.
25. Lloyd's Registered Number.
26. All Ports of Loading.
27. Ship's Derricks.
28. Speed.
29. Next Port.
30. Route.
31. Last 3 Ports of Call.
32. Bunker Requirement.
33. Liquor Cargo in Transit with container number.
34. Arms and Ammunitions on board.

Tankers: The following information must be sent to the Director Gene as soon as the vessel receives orders to proceed to the port. It requested that the information should also be sent to the releva Terminal Operator.

AA Name of vessel.
BB Former names.
CC Port of registry, flag, call sign.
DD LOA, G.R.T., N.R.T.
EE Summer D.W.T., arrival D.W.T.
FF Draft on arrival forward and aft.
GG ETA. (To be advised 5 days, 72 hours, 48 hours, 24 hou and any later changes).
HH Last port.
II Cargo on board and flash point, destination of cargo.
JJ Cargo requirements.
KK Previous cargo and quantity residues on board for load on to
LL IMO Class.
MM Whether gas free or in an inert condition (Oxygen conten atmosphere throughout tank to be less than 8% by volum

NN Port of loading ballast and amount.
OO Quantity of ballast loaded on passage.
PP Quantity of segregated ballast on arrival.
QQ Quantity of cargo tank ballast on arrival.
RR Time for deballasting: Can ship load/deballast simultaneously?
SS Special conditions, difficulties, defective equipment or gear which could present special hazards or difficulties when mooring, unmooring or during cargo operations.
TT Agent's name.
UU Maximum loading rate.
VV Topping-off rate.
WW Bunker requirements.
XX Cargo manifold connections size.
YY Bunker connections size.
ZZ Derricks.
11. Ship shore comparisons for last 5 voyages.
22. Year built.
33. Master's full name.
44. Discharge port.
55. Next port of call.
66. Number of crew.
77. Vessel's economical speed.
88. Vessel's position when 48 hours from pilot station.
(See also "Appendix").

Gas Tankers: The following information must be sent to the Director General and Terminal Operator as soon as the vessel receives orders to proceed to the port.

AAG Name of vessel, indicating any former names.
BBG Port of registry, flag, call sign.
CCG LOA, G.R.T., N.R.T.
DDG Summer D.W.T., arrival D.W.T., arrival draft forward and aft.
EEG Last port, ETA Yanbu.
FFG Quantity of ballast on arrival: where loaded.
GGG Quantity of dirty ballast on arrival.
HHG Total cargo capacity in cubic metres. Cargo required.
IIG Grades and quantities of any part cargoes or cargo residues and where loaded. Grade and quantities of product in deck tanks.
JJG Are part cargoes to be comingled with Yanbu loadings?
KKG Gauge pressures; top, bottom and mean temperatures of each cargo tank.
LLG Quantity of coolant required in addition to cargo requirements.
MMG Maximum allowable relief valve settings for all cargo tanks.
NNG Have any cargoes other than LPG been carried during last 3 loaded voyages? Specify.
OOG Maximum oxygen content by volume per cent of each warm or inerted cargo tank.
PPG If tank purging required specify whether:
  (a) Parallel or in series.
  (b) Liquid from shore direct to cargo tanks.
  (c) Liquid from shore to vessel's vaporisers. Specify vaporiser throughout in RLPG tonnes/hour.
QQG If cooling down tanks is required, specify maximum cooling rate in terms of temperature reduction per hours and maximum temperature differential permitted between any two points in cargo tanks.
RRG Available total capacity of ship's reliquefication plant for each nominated cargo product.
SSG Type of ship's reliquefication system i.e., direct, cascade or other.
TTG Capacity of ship's gas blowers to shore vapour return line in volume per hour at reference temperature.
UUG Maximum loading rate and approximate topping off rate.
VVG Bunker manifold size. Bunker requirements.
WWG Manifold presentation; function, ASA rating, size, from Forward.
XXG Agent's name.
YYG IMO ship type. Does vessel have valid certificates of fitness?
ZZG Special conditions, difficulties, defective equipment or gear which could present special hazards or difficulties when mooring, unmooring or during cargo operations.
111. Deballasting time, specify concurrent loading or not.
222. Year built.
333. Master's full name.
444. Discharge port.
555. Next port of call.
666. Number of crew.
777. Vessel's economical speed.
888. Vessel's position when 48 hours from pilot station.
(See also "Appendix").

HEALTH: *Quarantine:* In accordance with International practice, quarantine signals must be displayed by all vessels approaching the port. These signals must be displayed continuously until Pratique is granted.

Sunrise to Sunset – Quarantine Flag
Sunset to Sunrise – Signal lights
Red over white

VHF: *Port Control:* All the marine services and shipping movements within King Fahd Industrial Port Limits are monitored and controlled by "King Fahd Port Control", which is situated at Lat. 23° 57.4′ N., Long. 38° 13′ E. The station is manned 24 hours a day and maintains a continuous VHF watch. Information can be provided to Masters and Pilots on all navigational aspects, including wind and visibility, navigational aids and shipping movements within the port area. The station will also provide a liaison with the Terminal Operators and Emergency Services.

The following VHF channels are continuously available for use by King Fahd Port Control.

Channel Designator	*MHz Frequency*	*Service*
16	156.800	International Calling and Distress
10	156.500	Port Operations – 3
11	156.550	Port Operations – 1
13	156.650	Port Operations – 4
68	156.425	Port Operations – 2
67	156.375	Pilotage/Berthing Operations
69	156.475	Pilotage/Berthing Operations
73	156.675	Pilotage/Berthing Operations
74	156.725	King Fahd Port Operations – Private

In the event of a Port Emergency, King Fahd Industrial Port Control will designate a channel for use during the period of the emergency.

RADAR: Harbour Surveillance Radar is installed in the new Port Control Tower.

TUGS: There is no requirement for Masters to order tugs in King Fahd Industrial Port. The number of tugs to be used during berthing and on departure will be specified by the Harbour Master. If the Master wishes to appeal against the number of tugs allocated, he will do so to the Harbour Master, who will make the final decision.

Any tug whether owned, hired or chartered by the Ports Authority, when used for assisting a vessel, shall be deemed to be under the order and control of the Master, Owner or Charterers of the vessel being assisted. The Ports Authority shall not be liable for damage of any description or any consequential loss suffered by, or to, the tugs or their crews while assisting vessels, whether occasioned by any act or omission of Tug Master or crew or by any defect or inadequacy of the tug, machinery or gear.

Towing lines will be provided by the Ports Authority. Tugs will rendezvous with vessels bound for Port Terminals in the vicinity of Buoy No. 14.

All tugs are fitted with foam and water monitors for fire fighting and spray booms for pollution dispersal work.

15 tugs up to 87 tons bollard pull. Pilot launches and mooring launches are available.

CRUDE OIL TERMINAL:

ARAMCO Berth Particulars:

Berth No. 61:

Tanker Size (approx.)	80,000 – 275,000 d.w.t. (See Note)
Deck Level of Loading Platform	40 ft.
Depth Alongside Berth No. 1	92 ft. ISLW
Max. Draft	83 ft.
Loading Arms (number and size)	4×20 in.
Quick Disconnect Coupling Size	16 in., 20 in., 24 in.
Bunker Fuel Arms (number and size)	2×12 in.
Quick Disconnect Coupling Size	8 in., 10 in., 12 in.
Max. Rate Per Loading Arm	32,500 b.p.h.
Max. Rate Per Bunker Arm (Off-loading)	8,900 b.p.h.
Number of Breasting Dolphins	4
Number of Mooring Dolphins	4
Available Mooring Hooks	24 (SWL @ 70 M/T)
Distance Between Centre of Inner Breasting Dolphins	239 ft. (73 m.)

Note: In addition to loading crude oil Berth No. 61 will be used for off-loading bunker fuel from 50 m.d.w.t./80 m.d.w.t. sized tankers. Max. discharge rate is 8,900 bbls./hr. per bunker fuel loading/unloading arm.

Berth No. 62:

Tanker Size (approx.)	275,000 – 500,000 d.w.t. (See Note)
Deck Level of Loading Platform	40 ft.
Depth Alongside Berth	105 ft. ISLW
Max. Draft	95 ft.
Loading Arms (Number and Size)	4 × 20 in.
Quick Disconnect Coupling Size	16 in., 20 in., 24 in.
Bunker Arms (Number and Size)	2 × 12 in.
Quick Disconnect Coupling Size	8 in., 10 in., 12 in.
Max. Rate per Loading Arm	32,500 b.p.h.
Max. Rate per Bunker Arm (Bunkering)	10,000 b.p.h.
Number of Breasting Dolphins	4
Number of Mooring Dolphins	6
Available Mooring Hooks	26 (SWL @ 70 M/T)
Distance Between Centre of Breasting Dolphins	449 ft. (137 m.)

Note: Tankers of less than 275,000 d.w.t. may be accepted if the light water line flat side forward and aft of the manifold is at least 75 m. (246 ft.)

Berth No. 63: (Also see "Shipmaster's Report" – dated October 1985).

Tanker Size (approx.)	120,000 – 275,000 d.w.t. (See Note)
Deck Level of Loading Platform	40 ft.
Depth Alongside Berth	90 ft. ISLW
Max. Draft	81 ft.
Loading Arms (Number and Size)	4 × 20 in.
Quick Disconnect Coupling Size	16 in., 20 in., 24 in.
Bunker Arms (Number and Size)	2 × 12 in.
Quick Disconnect Coupling Size	8 in., 10 in., 12 in.
Max. Rate per Loading Arm	32,500 b.p.h.
Max. Rate per Bunker Arm (Bunkering)	10,000
Number of Breasting Dolphins	2
Number of Mooring Dolphins	5
Available Mooring Hooks	23 (SWL @ 70 M/T)
Distance Between Centre of Breasting Dolphins	420 ft. (128 m.)

Note: Tankers of less than 120,000 d.w.t. may be accepted if the light water line flat side forward and aft of the manifold is at least 70 m. (230 ft.).

Only two berths of the Crude Oil Terminal can be loaded at the same time. Maximum loading rate to two crude berths simultaneously is 260,000 b.p.h. through 8 × 20 in. loading arms.

Environmental Monitoring System: An environmental monitoring system is installed at Berth No. 61 dock control room with repeater units located in dock control rooms at Berths 62 and 63. The system indicates wind velocity and direction, atmospheric pressure and temperature, current velocity and direction, and wave height and period.

Berthing Criteria:

Max. berthing velocity:	20 cm./sec.
Max. approach angle:	7°

For berthing and unberthing purposes, wind, sea, and current conditions have to be within acceptable limits, so that during the final docking the maximum berthing velocity and maximum approach angle is not being exceeded.

Mooring Arrangements: Each mooring dolphin, breasting dolphin, and loading platform is equipped with either double or triple quick-release mooring hooks and with a mooring capstan.

The terminal will furnish a required mooring arrangement for the loading berth to which the vessel is nominated. The mooring diagram shows the number of mooring hooks provided for each berth consecutively numbered from North to South. These mooring hooks are designed to service one mooring line per hook.

Port mooring launches will be used to assist during mooring operations.

The terminal will provide suitable messengers for heaving in mooring lines.

In order to ensure the integrity of the offshore terminal facilities, it is recommended that VLCCs provide an all wire mooring arrangement and that tankers in the 50 to 160 MDWT range provide mooring wires at least for their spring mooring lines and breast mooring lines. The recommended minimum number of wire moorings is as follows:

50,000 – 160,000 d.w.t. tankers:	8 mooring wires
160,000 – 250,000 d.w.t. tankers:	10 mooring wires
250,000 – 350,000 d.w.t. tankers:	12 mooring wires
350,000 plus d.w.t. tankers:	14 mooring wires

VLCCs with an all synthetic mooring system will be accepted if the synthetic mooring lines consist of low elasticity material.

All mooring lines should be of similar size and material and must be in good condition. Manual brakes have to be set and to be secured on all tension winches once the tanker is moored. Ship's crew must tend all moorings to keep the ship in position and mooring lines have to be taut at all times.

Each loading berth is equipped with a mooring load monitor/hook release system. The system is designed to monitor the loads on each mooring hook and to provide an alarm should the loads on a mooring hook exceed the system's set points. Berth operating personnel will monitor the mooring loads and, based on the read-outs they will advise the responsible officer who is expected to immediately correct any undesirable mooring situation.

The mooring load monitoring system does not relieve the vessel's Master from his responsibility to ensure adequate and safe mooring at all times when berthed alongside the Crude Oil Terminal.

Report: 1989.

King Fahd Industrial Port Authorities and Aramco have reminded us to ensure that Owners and Masters, of all vessels berthing at the Crude Oil Terminal and NGL jetties, are made fully aware of the mooring requirements, which are a minimum of 16 lines arranged as follows:

3 head lines
3 forward breast lines
2 forward back springs
2 after back springs
3 after breast lines
3 stern lines.

Further, please take note of Aramco's minimum wire mooring line requirement as under:

Vessel Size	*Required*	*Recommended*
75,000 – 160,000 d.w.t.	8 Wires	12 Wires
161,000 – 250,000 d.w.t.	10 Wires	12 Wires
251,000 – 300,000 d.w.t.	12 Wires	14 Wires
301,000 – 350,000 d.w.t.	12 Wires	16 Wires
351,000 d.w.t. and above	14 Wires	16 Wires

Gangway: The Crude Oil Terminal will provide a gangway to the ship at each berth.

Each loading platform has a gangway tower equipped with a self-adjusting gangway. The gangway provides access to and from the tanker and is the only permissible means for any personnel to enter or leave the ship.

Loading: *Loading Arms:* There are 4×20 in. crude oil loading arms at each of the loading platforms at Berth Nos. 61, 62 and 63. Each crude oil loading arm is capable of handling 32,500 bbls.p.h. maximum. The maximum flow rate per berth is 130,000 bbls.p.h., using 4 arms.

The hydraulic controls for the loading arms are located at the control desk on the loading platform adjacent to the loading arms. All loading arms are fully hydraulic powered and counter-balanced when empty. Each loading arm is fitted with a "Quick Disconnect Cargo Coupler" and a minimum distance of 18 in. is required between the lowest point of the ship loading line flanges to the upper level of the working platform of the spill tank.

All loading/bunker connections are equipped with electrical insulating flanges. Therefore, ship to shore bonding cables are not required.

Loading Plan Agreement: Prior to loading, the Terminal Supervisor will contact the officer in charge for the loading operation on board the tanker and discuss and agree on the loading plan.

The loading agreement consists of:

(a) Maximum acceptable loading rates, starting rates, topping-off rates, and standby notice requirements. (During loading, all anticipated changes in cargo transfer rates are to be communicated in a timely manner to ship or shore).
(b) Cargo quantities required by tanker's Master and comparison with terminal loading instructions.
(c) Cargo characteristics, required samples and tests.
(d) Assignment of cargo to vessel tanks and preferred orde loading.
(e) Details of last cargo, condition of tanks and pipe-lines, and bal conditions and deballast time. Inspection of all cargo tanks p to loading and signing of the Dry Certificate.
(f) Load-on-top procedures.
(g) Quantity of slop oil on board and quantity of free water in sl
(h) Quantity of bunkers ordered prior to arrival.
(i) Estimated loading time required and estimated departure tim

Crude Oil Characteristics:

Arabian Light

Temperature	120°–150°F
API Gravity	33.2–33.8
Reid Vapour Pressure	3.6–5.0 PSIA
Pour Point	Below 20°F
Viscosity	57 SUS @ 70°F
BS&W	Less than 0.05%
H_2S	Less than 10 PPM

Hydrogen Sulphide Hazards (H_2S): Arabian crude loaded at Offshore Marine Terminal has been treated for H_2S removal prio shipping.

However, the crude oil may still contain Hydrogen Sulphide concentrations which may be harmful to personnel. Personnel on bo tankers who may be exposed to concentrations of H_2S gas sho observe safety precautions applicable to harmful gases.

Slop Residues: Slop residues cannot be discharged ashore Petromin's crude oil terminal.

Cargo Tank Inspection: Cargo tanks onboard the tanker will norm not be inspected by the Terminal Offshore Supervisor. If the Ow Charterer of the ship requests an independent oil inspection comp to inspect cargo tanks, the Offshore Supervisor will witness the t inspection.

Tankers which arrive with all tanks inerted must enable ull inspections of all cargo tanks to be carried out prior to start of ca transfer operations and after completion of cargo transfer operation

If the tanker requests load-on-top procedures, measuring of quantity of oil and water in the slop tank(s) will be witnessed by Terminal Supervisor (Also see "Appendix").

Loading Signal: During loading the international code flag "B" shal displayed during daylight hours. During darkness a red loading light s be displayed.

Watches: During the entire stay of the vessel alongside the Crude Terminal, a deck watch is required.

Bunkering: Bunkering fuel is available at all berths at the Crude Terminal, and 2 bunker loading arms are located on each load platform, size 12 in. Maximum flow rate per bunker loading arm 14,500 bbls./p.h. To avoid any delays to tankers, bunkering has to accomplished concurrently with cargo transfer operations.

NGL TERMINAL: The NGL Terminal is a Saudi Arabian Governm owned, ARAMCO operated facility designed to load refrigerated liq petroleum gas (propane and butane) and naphtha product for exp LPG carriers range in size from approximately 25,000 cu.m. 200,000 cu.m. Naphtha carriers range from 20,000 to 280,000 d.w.

Terminal Facilities: The 2 loading berths are situated on the offsh side of the base of the "L". Berth 71 is the Southerly berth and Berth is the Northerly berth. Berth alignment is 290° true bearing. A to crane is located in the middle of each loading platform. Reading fr North to South the 7 loading arms are designated for the follow service; Naphtha, ship's fuel, LPG (4 arms), and ship's fuel. All L arms are universally manifolded to permit propane or butane liq loading; or propane, butane or contaminated vapour return. Bunker or black diesel can be loaded through either or both 12 in. ship's arms which flank the LPG loading station. The naphtha arm is capa of delivering naphtha product and receiving small amounts of naph slop, which will be disposed of onshore. There are no shore-ba ballast handling facilities.

Berth Particulars: No. 71 and No. 72.

Tanker size (approx.):	16,000 – 200,000 cu.m.
Deck Level of Loading Platform:	56 ft. ISLW
Depth Alongside Berths (min.):	60 ft. ISLW
Max. Draft:	53 ft. 02 in. (16.2 m.)

Loading Arms:

	Number/Size		*Number/Siz*
(a) Ships' Fuel	2×12 in.	(c) LPG	4×16 in.
(b) Naphtha	1×16 in.		

Quick Disconnect Coupling Sizes: 8 in., 10 in., 12 in., 14 in. and 1

Maximum loading rate:

(a) Ships' Fuel	
1. Diesel	650 bbls.p.h.
2. Bunker Fuel	5,000 bbls.p.h.
(b) Naphtha	30,000 bbls.p.h.
(c) LPG	30,000 bbls.p.h.

Number of Breasting Dolphins:	2
Number of Mooring Dolphins:	6
Available Mooring Hooks:	42
Distance between centre of Breasting Dolphins:	300 ft.

Condition of Ship's Products Tanks: The ARAMCO facilities for loa LPG are not designed for loading pressurised cargoes and LPG wil be loaded into a tanker which does not have adequate ship-bo refrigeration capacity and chilled tanks.

Mooring Lines and Arrangements: In order to ensure the safe personnel, tankers and loading facilities, and to prevent accidenta spillages, ARAMCO strongly recommend that tankers of 75,000 d and larger which moor at NGL Terminal berths utilise a minimum of 12 wire mooring lines (breasts and springs) in accordance with following:

75,000 to 160,000 d.w.t. : 8 wire lines
161,000 to 250,000 d.w.t. : 10 wire lines
Greater than 250,000 d.w.t. : 12 wire lines

Vessels equipped with both wire and synthetic mooring lines must avoid mixing such lines to the same dolphin. During periods of unsettled weather, arriving vessels fitted with sufficient wires will be preferentially berthed whereas vessels equipped with synthetic lines or too few wire lines will not be berthed until the weather improves. If a ship with synthetic lines is already moored and squall conditions arise, loading to that vessel will be stopped and the loading arms disconnected until weather conditions improve and it is judged safe to resume the loading operation. The use of nylon or other highly elastic line is prohibited.

Each mooring dolphin and breasting dolphin is equipped with triple quick-release mooring hooks and with a mooring winch.

Vessels must be moored to the entire satisfaction of the Pilot. Vessels must be ready at all times to put out more lines as required by the Harbour Master or pier personnel, or as dictated by weather changes. All vessels moored to the piers must have deck winches in readiness for immediate use. All vessels moored with automatic tension winches will set the manual brakes on these winches.

Pier crew are on duty continuously to handle loading arms and mooring lines. Mooring lines on board vessels will not be handled by shore personnel.

All loading connections are equipped with electrical insulating flanges. Therefore, ship to shore bonding cables are not required.

Gangway: The NGL Terminal will provide a gangway to the ship at either berth. Each berth has a gangway tower equipped with a self-adjusting gangway for access to and from the ship, and this is the only permissible means for any personnel to enter or leave the ship.

Loading Plans: After a tanker is secured at the berth and prior to the beginning of any loading operation, the Master (or a ship's officer designated by him) will meet with the NGL Terminal senior shift operations representative in order to discuss and prepare the vessel's loading plan. Items to be discussed will include, but not be limited to, the following:

1. Temperature and pressure of each of the ship's tanks.
2. Product to be loaded in each tank and the sequence of tank loading.
3. Quantity and type of product, if any, in each ship's tank, and whether it is a part cargo or residue required for tank cooling.
4. Loading rates of each product.
5. Safety procedures and safe loading practices.

All clean excess vapours which cannot be handled by the tanker's vapour recovery equipment will be metered to the shore-based vapour recovery system and reprocessed. Contaminated vapours will be metered to the flare.

Refrigerated LPG: Refrigerated LPG is loaded via 16 in. loading arms. The maximum loading rate for each product is 30,000 bbls.p.h. Each berth is equipped with 4 LPG loading arms which may be used for butane liquid, propane liquid or vapour return to a ship's vapour recovery unit, or contaminated vapours to flare. All 8 LPG loading arms are fitted with quick connect/disconnect couplers. Each LPG loading line has an associate circulation return line. Loading lines must be on circulation at least 4 hours prior to commencement of loading. No 2 ships are loaded from one loading line simultaneously.

The NGL Terminal facilities ARE NOT designed for loading pressurised LPG and NO LPG will be loaded into ship's tanks that are not equipped with refrigeration facilities and are not adequately chilled.

Vapour line MUST be connected prior to loading LPG cargo. This also includes those vessels loading coolant.

Before being transferred from the loading line to the loading barrel and arms, the propane and butane products are metered. The metering system is designed for loading rates between 100 bbls.p.h. and 30,000 bbls.p.h. for each product.

A 3 in. turbine type meter with a capacity of 79 bbls.p.h. – 929 bbls.p.h is provided for low loading rates such as cooldown and topping off.

An 8 in. turbine type meter with a capacity of 679 bbls.h.p. – 7,420 bbls.p.h. is provided for full flow rates.

Every vessel loading LPG at the NGL Terminal will be required to have a copy of ARAMCO GASRUL 9:83 on board. When a copy is not on board prior to arrival ARAMCO and the Agent of the vessel shall be so advised. Extracts of the regulations are included for information as follows:

1. *Propane Loading:*
   (a) The cargo tank bottom is cooled down to a maximum mean temperature of −38°F or −39°C.
   (b) The maximum mean temperature above the mid-depth of the cargo tank, in the range between two-thirds and three-quarters of the Maximum Allowable Tank Filling Level (MATFL), and excluding any temperature indicated in the cargo tank dome vapour space, is −13°F or −25°C.
   or
   The maximum mean temperature at the top of the cargo tank and at or immediately below the MATFL and excluding any temperature indicated in the cargo tank dome vapour space is −8°F or −22°C.
2. *Butane Loading:*
   (a) The cargo tank bottom is cooled down to a maximum mean temperature of +32°F or 0°C.
   (b) The maximum mean temperature above the mid-depth of the cargo tank, in the range between two-thirds and three-quarters of the MATFL and excluding and temperature indicated in the cargo tank dome vapour space, is +57°F or +14°C.
   or
   The maximum mean temperature at the top of the cargo tank and at or immediately below the MATFL and excluding any temperature indicated in the cargo tank dome space is plus 62°F. or plus 17°C.
3. The cargo tank gauge pressure not more than 1.0 p.s.i. or 70 MBS or 0.07 kg./sq.cm. on arrival at berth. During cargo operation the pressure of any cargo tank shall be maintained within the range between zero gauge minimum (atmospheric pressure) and a maximum which shall not exceed 70% of the maximum allowable relief valve setting for that cargo tank or such other lesser maximum percentage as may be determined by ARAMCO for a particular vessel.
4. Butane may be loaded into ship tanks containing residue up to 10% of the cargo to be loaded.
5. Propane may be loaded into ship tanks containing propane residue up to 10% of the cargo to be loaded.
6. Butane or propane may be loaded into ship tanks containing part cargo of the same grade only by authorisation of the offtaker. Quantities of over 10% of the cargo to be loaded shall be considered part cargo.
7. Should the vessel be unable to comply with the provisions of paragraphs 3 and 4, ARAMCO operations management representatives shall confer with the vessel Master and/or Responsible Loading Officer to develop a loading procedure for the safest possible loading for the tank(s) containing dissimilar residue. The procedure shall be in writing, agreed to by both parties and take into consideration loading rates, temperatures, pressures and all possible safeguards to ensure minimising the dangers to ship and shore installations. It must be understood that this procedure will involve delays to the vessel and will impose additional workloads on the shore and ship personnel.
8. IN NO CASE WILL LOADING BE PERMITTED INTO SHIP TANKS CONTAINING LIQUID PRODUCT OF A DIFFERENT GRADE IN EXCESS OF TEN TONS.
9. When a vessel requires special handling, as described above, the vessel shall be given a letter of protest, with copies to Owners and Operators.
10. Refrigerated LPG vessels with warm cargo tanks can be handled at the ARAMCO NGL Terminal. When special circumstances warrant, new ships and other vessels with warm tanks may be accommodated but will be subject to specific conditions.
11. Vessels with part cargo on board of products other than A-140 Propane or A-160 Butane must be equipped to keep any liquid or vapour completely self-contained from those cargo parcels. There must be no return of non-compatible vapour to atmosphere while at berth. *No mixing of dissimilar refrigerated liquids is allowed at berth.*
12. Vessels loading either propane or butane are expected to use the appropriate vapour return line but only for *excess* vapour which the vessel's vapour recovery equipment cannot handle. Excessive vapour will be metered to a shoreside ship's vapour recovery system. If the excess vapour cannot be handled by using both systems, the vapour will be sent to flare. If the situation cannot be corrected promptly aboard ship, the loading shall be shut down. Loading shall be resumed only after the loading plan has been reviewed with the Master or Responsible Loading Officer by the senior shift operations representative and corrective action has been agreed upon.
13. In the event of a spill of liquid propane or butane on board the vessel, shore loading shall be shut down until corrective action to clean up the spill and to avoid future recurrence has been agreed upon by the Master or Responsible Loading Officer, the shift operations staff and the Harbour Master.
14. There are no facilities at the NGL Terminal for the return of either liquid propane or liquid butane cargo. Vessels must pay strict attention not to overload either of these grades.

Emergency Procedures: In the event of a fire or explosion at the pier, or on board a vessel which is berthed alongside at the Terminal, the alarm signal will be a one minute undulating signal on the siren and an Emergency Shutdown System will be activated to shutdown immediately all cargo loading to vessels at the berths. The course of action to be followed by ARAMCO Terminal personnel will be dictated by the particular facts and circumstances of the incident. It is impossible to indicate exactly and completely what practices will be applied during an emergency before an evaluation of the specfic situation can be made. Masters are advised to familiarise themselves with the Port and Terminal Emergency Procedures.

YANBU PETROMIN REFINERY TERMINAL: The Refinery is owned and operated by the General Petroleum and Mineral Organisation (Petromin). There are 4 berths; the 2 outer berths, Nos. 91 and 92 (West to East), will accommodate vessels with 20,000 to 60,000 d.w.t. capacity; and the 2 inner berths, Nos. 93 and 94 (West to East), will accommodate vessels up to 20,000 d.w.t. capacity.

The channel adjacent to the outer berths has been dredged to a depth of 16 m. below LAT. The turning circle and approach area for the inner berthing area has been dredged to 13.5 m. below LAT. Alongside the two inner berths the water has been dredged to 11.5 m. below LAT.

There are 8 loading arms at each berth to accommodate export of product. At Berth No. 94 there will be 4 additional loading arms to accommodate LPG, LPG (recovery), tetra-ethyl lead and caustic.

A temporary offshore floating hose loading facility is being used pending completion of the terminal. 6 mooring buoys have been anchored in the turning basin area and a tanker can be moored within these buoys. Tankers up to 35,000 d.w.t. can be accommodated.

There is no ballast water reception facility available at this Terminal.

PETROMIN – MOBIL REFINERY – PEMREF: The Export Refinery Terminal has 2 separate loading facilities.

A tanker loading facility consisting of 3 berths for bulk petroleum liquids is operated under a lease agreement by PETROMIN-Mobil Yanbu Refinery Company Limited (PEMREF).

A chemical loading facility with one berth is likewise operated under a lease agreement.

Pemref Standard Pre-Arrival Message:

Pemref have requested Agents in Yanbu to transmit this telex as a standard procedure to vessels calling at the Pemref Terminal for the *first time*.

Format of the telex is:

Quote

1. To provide ETA messages 72, 48 and 24 hours prior to arrival. Changes of 2 hours or more should be updated in separate message.
2. In addition to the standard port pre-arrival message to advise with the 72 hour ETA or as soon as possible thereafter:
   - (AA) Where due to load more than one grade/parcel of cargo, the preferred order of loading and configuration of grades/manifolds from forward.
   - (BB) Ship's maximum draft on sailing.
   - (CC) Max. height of manifolds above water-line at completion of deballasting.
   - (DD) If shore reducers required and sizes.
   - (EE) Whether slops are chemical free.
   - (FF) On first call at Pemref Terminal (or where not previously given), distance of parallel hull section forward and aft of manifold centre line in light ship condition.

Berth Information: Pemref operates three berths, all equipped with shore gangways and deballasting facilities. Shore reducers available, but require ship's gear for lifting on board. Designated service of loading arms given below from West to East.

Berth No. 42: Vessels berth port side to jetty facing West. Max. depth water 13.5 m. Loading arms: Fuel oil or ballast/fuel oil or ballast/jet/ADO or gasoline/jet/ADO or gasoline. Twelve inch except fuel oil/ballast arms which ten inch.

Berth No. 54/55: Vessels berth starboard side to berth facing West. Max. depth water 18.5 m. Loading arms: Fuel oil or ballast/fuel oil or ballast/ADO or gasoline/gasoline/jet/ADO or gasoline/gasoline all 16 in.

Ballast/Slops: Sea discharge of cargo tank ballast not permitted. Adequate shore ballast reception facilities available, but cannot accept chemicals.

Inert Gas: Saudi Arabia is signatory to IMO Solas Regulations, requiring fitted vessels to have cargo spaces fully inerted prior to loading volatile petroleum products.

Mooring Arrangements: Minimum moorings required:

Forward – Three headlines/three breastlines/two spring lines.

Aft – Three stern lines/three breastlines/two spring lines.

Mixed mooring not permitted. All mooring in same direction, and service must be of same material and type.

Cargo Information: Generally density and temperature not available until soon after commencement. Loading cargo is blended directly to vessel, therefore typical densities for grade/product being loaded should be used until actual available. Cargo is metered at jetty, and quantity, density and temperature available from Control Operator.

Cargo nomination and berthing information will be advised separately.

Pemref Terminal

Unquote.

PEMREF Facilities Particulars:

1. The Short Haul Berth No. 42 is located in the inner basin. It consists of a fixed loading platform with semi-flexible mooring and breasting dolphins. The berth will accommodate tankers from 5,000 d.w.t. to 35,000 d.w.t.

2. A ballast water treatment facility is located adjacent to Berth No. 42 and is capable of processing ballast water from tankers loading at the Export Refinery Terminal including the Chemical Berth.

3. The inner basin has been dredged to a depth of 13.5 m. below LAT. A turning basin with a diameter of 400 m. allows for ready access to the basin.

4. There is a jetty trestle with 2 outer loading berths connected to the shore by a free standing trestle and causeway. The 2 loading berths are fixed structures with fixed loading platforms and semi-flexible mooring and breasting dolphins. These berths named Suez Berth West and Suez Berth East are numbered Nos. 54 and 55. They are capable of handling tankers up to 150,000 d.w.t. in size. The water depth alongside these 2 berths has been dredged to 18.5 m. below LAT.

PEMREF Berth Particulars: Short Haul Berth No. 42:

Min. Size Vessel:	5,000 d.w.t.
Max. Size Vessel:	35,000 d.w.t.
Deck Level of Loading Platform:	5.0 m./16.4 ft.
Depth Alongside Berth:	13.50 m./44.28 ft.
Max. LOA:	220 m.
Max. Draft:	12.15 m./39.85 ft.
Loading Arms (number and size):	2×10 in. – Black Products/Ballast 4×12 in. – White Products
Quick Disconnect Coupling Size:	6 in., 8 in., 10 in., 12 in., 16 in.
Bunker Fuel Arms (number and size):	2×6 in.
Quick Disconnect Coupling Size:	6 in., 8 in., 10 in.
Max. Rate per Loading Arm:	10 in. – 1,430 cu.m./hr. 12 in. – 1,590 cu.m./hr.
Max. Rate per Bunker Arm:	Heavy Fuel 480 cu.m./hr. Diesel Fuel 160 cu.m./hr.
Number of Breasting Dolphins:	4
Number of Mooring Dolphins:	4
Available Mooring Hooks:	20
Distance between Centre of Inner Breasting Dolphins:	33.0 m./108.25 ft.
Normal Shipside to Berth:	Port
Shore Gangway Provided:	Yes
Water to Manifold	
Max. Height:	12.80 m./42 ft.
Min. Height:	2.59 m./8 ft. 6 in.
Max. Approach Velocity:	0.25 m./sec.
Max. Approach Angle:	±5 degrees

Suez Berths West and East – Berths No. 54 and 55: (Also s "Shipmaster's Report" – March 1985).

Min. Size Vessel: (see Note No. 1)	30,000 d.w.t.
Max. Vessel Size:	150,000 d.w.t.
Deck Level of Loading Platform:	7.0 m./22.96 ft.
Depth Alongside Berth:	18.50 m./60.28 ft.
Max. LOA:	300 m.
Max. Draft:	16.65 m./54.60 ft.
Loading Arms (number and size):	7×16 in.
Quick Disconnect Coupling Size:	6 in., 8 in., 10 in., 12 in., 16 in
Bunker Fuel Arms (number and size):	2×10 in.
Quick Disconnect Coupling Size:	6 in., 8 in., 10 in., 12 in.
Max. Rate per Loading Arm:	Heavy Fuel – 4,378 cu.m./hr. White Products – 1,590 cu.m./h
Max. Rate per Bunker Arm:	Heavy Fuel 1,590 cu.m./hr. Diesel Fuel 160 cu.m./hr.
Number of Breasting Dolphins:	4
Number of Mooring Dolphins:	4
Available Mooring Hooks:	20
Distance between Centre of Inner Breasting Dolphins:	56.0 m./183.7 ft.
Normal Shipside to Berth:	Starboard
Shore Gangway Provided:	Yes
Waterline to Manifold	
Max. Height:	19.00 m./62 ft. 4 in.
Min. Height:	4.50 m./14 ft. 9 in.
Max. Approach Velocity:	0.18 m./sec.
Max. Approach Angle:	±5 degrees

Note 1: Tankers of less than 30,000 d.w.t. may be accepted at the Su Berths if the light water line flat side forward and aft of t manifold is at least 34.0 m./111.5 ft., and subject to weath conditions.

YANPET Facilities Particulars: There is one chemical berth, No. located in the inner basin. It can accommodate tankers from 5,000 35,000 d.w.t. The turning circle into the inner basin is 400 m. in diamet and is dredged to 13.5 m. below LAT.

The facilities are designed for the export and import of petrochemic products; these include: mono-ethylene glycol (MEG), di-ethylene gly (DEG), glycol blackflush, hexene, vapour return, propylene, proce water, and caustic soda.

YANPET Berth Particulars:

Minimum vessel size:	5,000 d.w.t.
Maximum vessel size:	35,000 d.w.t.
Maximum LOA:	200 m.
Maximum beam:	No restriction.
Deck level of loading platform:	5 m.
Depth alongside berth:	13.5 m.
Maximum draft:	12.2 m.

Loading arms:

Size	*Product*	*Max. Loading Rate*
6 in.	Hexene	50 cu.m.p.h.
6 in.	Propylene	
10 in.	Ballast water HFO & DO (bunkers)	
10 in.	M.E.G.	750 cu.m.p.h.
6 in.	Glycol backflush	
6 in.	D.E.G.	113 cu.m.p.h.
4 in.	Caustic Soda	50 cu.m.p.h.
6 in.	HFO & DO (bunkers)	

Quick disconnect coupling size – various adaptors available

Number of breasting dolphins – 4

Number of mooring dolphins – 4

Available mooring hooks – 20

Distance between centre of inner breasting dolphins – 33 m.

Daylight berthing only. No restrictions for unberthing.

Normal shipside to berth – Starboard.

Shore gangway provided.

Waterline to manifold Maximum height – 12.8 m.
Minimum height – 2.59 m.

Maximum approach velocity – 0.25 m./sec.

Maximum approach angle – ±5°

Fresh water available upon request.

Bunkers currently not available.

Ballast Water Facility: The Export Refinery Terminal incorporates ballast water facility which is capable of processing ballast water fro vessels loading at the 3 berths at the terminal.

The facility has 3 initial storage tanks of 50,000 cu.m. each, which w receive ballast water direct from the tankers.

Ballast water is passed through the facility's separator system; cle water is then passed to retention ponds prior to being pumped to se and recovered oil is passed to the recovered oil system.

All ballast water handled at the facility is monitored to ensu compliance with current environmental standards and requirements.

Vessels loading at Crude, NGL and Chemical Berths will not be ab to discharge slops to the shore facility.

Bunkers: Bunker fuel may be available at each of the Export Refine Terminal's 3 berths, the bunker fuel being supplied from the refine facility only to vessels consigned to PEMREF. Heavy fuel oil and dies fuel oil may be available, and should be requested in advance of tanker's arrival at the port.

Berthing Criteria: Max. Berthing Velocity:

Chemical Berth No. 41	0.25 m./sec.
Short Haul Berth No. 42	0.25 m./sec.
Suez Berth West No. 54	0.18 m./sec.
Suez Berth East No. 55	0.18 m./sec.
Max. approach angle:	±5 degrees

Environmental conditions such as current, wind speed and sea state, should be considered in ensuring the above maximum criteria is not exceeded at final docking stage.

Mooring Arrangements: Each mooring dolphin, outer breasting dolphin and loading platform is equipped with either double or triple quick release mooring hooks, each combination of double or triple hooks having a mooring capstan with safe working load of 3 tons.

The terminal will provide a required mooring arrangement for the loading berths. The mooring arrangement shows the number and position of the mooring hooks provided on each berth. The mooring hooks are designed to handle 1 mooring line per hook.

Mooring boats will be utilised to run mooring lines to the mooring dolphins from the tanker. The terminal will provide suitable messenger lines for heaving the mooring lines to the hooks.

In order to ensure the integrity of the berth facilities it is recommended that tankers in the 50,000 d.w.t. to 150,000 d.w.t. range provides mooring wires at least for their spring and breast mooring lines. The recommended minimum for tankers from 50,000 d.w.t. – 150,000 d.w.t. is 8 mooring wires each end.

Tankers with the recommended mooring wire systems will be given berthing preference during adverse or unsettled weather conditions.

All mooring lines should be of similar size and material and should be in good condition. Manual brakes must be set on tension winches when mooring is completed. The ship's crew must tend moorings at all times to maintain the ship's position at the berth.

Under no circumstances may the longitudinal or lateral movements of a vessel exceed the limited working envelopes (working areas) of the connected loading arms.

Docking Monitoring System: A system of velocity and distance indicating and recording instruments are provided for the 4 berths. The transducers are positioned on the berth structure with electronic equipment housed in the control room. An illuminated display is located on the berth structures to provide an indication of fore and aft ship distance and approach speed to the ship's Pilot.

Gangway: The Export Refinery Terminal will provide a gangway to the ship at each berth. Each berth is equipped with a hydraulically operated self adjusting gangway. The gangway provides the only permissible means of access to and from the tanker.

Ballast Water: Tankers arriving at the Export Refinery Terminal with clean ballast, which meets the current environmental standards of King Fahd Industrial Port, will be allowed to discharge the ballast water direct to the sea.

The discharge of clean ballast water into the sea from cargo tanks will only be permitted with the approval of the Harbour Master or his designated representative.

A monitoring procedure will be employed during the discharge of clean ballast to ensure quality is maintained.

Tankers arriving with "dirty ballast" or ballast which does not meet the port requirements must discharge ballast to the Terminal's ballast facility.

Details of this operation will be agreed with the Terminal operator when 'operation agreement' is made.

Slop Residues: Slop oil may be discharged to the ballast reception facilities consistent with content restrictions. Slop residues containing chemicals or emulsifying agents may not be accepted.

Prior to arrival at the Terminal, vessel's Master must request use of this facility giving following details:

1. Total quantity to be discharged.
2. Quantity of oil.
3. Quantity of water.
4. Type of chemicals contained if any.

Loading Arms – Chemical Berth – Berth No. 41: The Chemical Berth is equipped with 8 loading arms, 2×10 in. diameter, 5×6 in. diameter and 1×4 in. diameter as detailed below:

Arm Size	*Product*
6 in.	Hexene.
6 in.	Propylene.
10 in.	Heavy Fuel Oil (Bunkers)/Diesel Fuel Oil (Bunkers)/Ballast Water.
10 in.	Mono-ethylene Glycol (MEG).
6 in.	Glycol Backflush.
6 in.	Die-ethylene Glycol (DEG).
4 in.	Caustic Soda.
6 in.	Heavy Fuel Oil (Bunkers)/Diesel Fuel Oil (Bunkers)

Each loading arm is fitted with a quick disconnect coupler. Adaptors are available to fit a range of ships' manifolds.

The loading arms and quick disconnect couplers are hydraulically controlled from a central operating location. A wandering control lead is available for local control on board the vessel for connecting by the berth operator.

Loading Arms – Short Haul Berth No. 42: The Short Haul Berth is equipped with 6 loading arms, 4×12 in. and 2×10 in. as detailed below. 2×6 in diameter bunker loading arms are also provided.

Arm Size	*Product*
10 in.	Marine Heavy Fuel Oil/Ballast Water.
10 in.	Marine Heavy Fuel Oil/Ballast Water.
6 in.	Heavy Fuel Oil Bunker/Diesel Fuel Oil Bunker/Bunker Cutter Stock.
12 in.	Jet Fuel.
12 in.	ADO/Leaded Gasoline.
12 in.	Jet Fuel.
12 in.	ADO/Leaded Gasoline.
6 in.	Diesel Fuel Bunkers/Heavy Fuel Bunker.

Each loading arm is fitted with a quick disconnect coupler. Adaptors are available to fit a range of ships manifolds from 6 in. to 16 in. ASTM.

The loading arms and quick disconnect couplers are hydraulically controlled from a central operating location. A wandering control lead is available for local control on board the vessel for connecting by the berth operator.

Loading Arms – Suez Berths West/East – Nos. 54 and 55: The Suez Berths are each provided with 7 loading arms of 16 in. diameter and 2 bunker fuel loading arms of 10 in. diameter, as shown below:

Arm Size	*Product*
16 in.	Marine Heavy Fuel Oil/Ballast Water.
16 in.	Marine Heavy Fuel Oil/Ballast Water.
10 in.	Heavy Fuel Oil Bunker/Diesel Fuel Oil Bunker/Bunker Cutter Stock.
16 in.	Naphtha/ADO.
16 in.	Leaded Gasoline/Unleaded Gasoline.
16 in.	Jet Fuel.
16 in.	ADO/Naphtha.
16 in.	Leaded Gasoline/Unleaded Gasoline.
10 in.	Diesel Fuel Oil Bunker/Heavy Fuel Oil Bunker.

Each loading arm is fitted with a quick disconnect coupler. Adaptors are available to fit a range of ships' manifolds from 6 in. to 16 in. ASTM.

The loading arms and quick disconnect couplers are hydraulically operated from a centrally located operating panel. A wandering control lead is also available for remote use when connecting arms to ship's manifold.

Grounding: All cargo/bunker loading connections are equipped with electrical insulating flanges, and therefore ships to shore bonding is not necessary.

Maximum Loading Rates:

Short Haul Berth No. 42		
Heavy Fuel Oil	2,860 cu.m./hr.	18,000 bbls./p.h.**
Leaded Gasoline	3,180 cu.m./hr.	20,000 bbls./p.h.**
Automotive Diesel Oil	3,180 cu.m./hr.	20,000 bbls./p.h.**
Jet Fuel	3,180 cu.m./hr.	20,000 bbls./p.h.**
Heavy Fuel Bunker	480 cu.m./hr.	3,000 bbls./p.h.
Diesel Fuel Bunker	160 cu.m./hr.	1,000 bbls./p.h.
Suez Berths No. 54 and 55		
Heavy Fuel Oil	8,756 cu.m./hr.	50,000 bbls./p.h.**
Leaded Gasoline	5,170 cu.m./hr.	32,500 bbls./p.h.
Unleaded Gasoline	5,170 cu.m./hr.	32,500 bbls./p.h.
Naphtha	5,170 cu.m./hr.	32,500 bbls./p.h.
Automotive Diesel Oil	5,170 cu.m./hr.	32,500 bbls./p.h.
Jet Fuel	5,170 cu.m./hr.	32,500 bbls./p.h.
Heavy Fuel Bunker	1,590 cu.m./hr.	10,000 bbls./p.h.
Diesel Fuel Bunker	160 cu.m./hr.	1,000 bbls./p.h.

Note: Loading rates for products marked ** are for 2 loading arms availability; rates should be halved to indicate rate per loading arm.

PEMREF Operational Agreement: Prior to any operational activity after a tanker is moored, an "Operational Agreement" will be made between the ship's responsible cargo officer and the terminal representative. The Operational Agreement requires an exchange of information between the ship and terminal covering the following items:

1. Grades and quantities of cargo/bunkers required.
2. Loading rates and quantities per grade for start, maximum and topping off.
3. Standby time required for stopping loading and slow down for each grade.
4. Ballast quantity to be discharged to sea or ballast facility.
5. Slop residues to be discharged to facility.
6. Manifold connections/loading arms to be used for each operation.
7. Sequence of loading different grades/products.
8. Estimated time required to carry out each operation, to give total expected load time.
9. Information regarding (a) Communications, (b) Emergency Shutdown Procedures, (c) Tank Venting System, (d) Maximum pressures allowed, etc.
10. Has Ship/Shore Safety Check List been completed. (Also see "Appendix").

Inert Gas Requirements:

All vessels scheduled to load at PEMREF which are fitted with an inert gas system, must comply fully with the rules, and arrive, where applicable, with tanks fully inerted to below 8% Oxygen content.

Vessels which do not comply with the Rules will face delays in berthing, removal from the berth and possible rejection for loading.

Ship/Shore Safety Check List: Prior to operations on board tankers at the Terminal berths a 'Ship/Shore Safety Check List' will be completed by both ship and Terminal representatives who will together inspect the necessary items listed. Further checks will be made at intervals throughout the vessels time at the berth.

Safety Requirement Letter: The Master of each tanker will be given a letter concerning safety requirements. Receipt of the letter has to be acknowledged by signing and returning a copy of the letter to the Terminal representative.

Sea Valves: All sea-valves and overboard valves connected to the tanker's cargo system have to be closed and lashed prior to commencement of cargo transfer operations.

Loading Signal: During loading the international code flag "B" shall be displayed during daylight hours. During darkness a red loading light shall be displayed.

Shore Emergency Signals: Continuous sounding of vessel's fog signal.

Emergency Towing Wires: While at the Terminal, tankers have to provide emergency towing wires of adequate strength to move the tanker off the dock. The towing wires are to be positioned on the offshore bow and stern quarter of the tanker and the outboard eye should be maintained approximately 1 m. above water level at all times.

Emergency Pilot Boarding: A pilot ladder of sufficient length should be at all times on standby at the offshore side of the tanker's main deck. In an emergency the pilot ladder should be lowered to 3 ft. above the water line to enable boarding of the Pilot if this should become necessary.

AL MUAJJIZ TERMINAL: Lat. 23° 49′ N., Long. 38° 24′ E.
Location: 15 miles South of King Fahd Industrial Port Control tower and 21 miles from S2 Buoy.
Pilotage: All vessels intending to load cargo at Al Muajjiz Terminal are required to embark the Port Pilot at the South Channel Pilot Station in position Lat. 23° 27′ N., Long. 38° 27′ E., and on the outward passage they must disembark the Pilot at the South Channel Pilot Station.
Berthing:

	Berths No. 101 & 103	*Berth No. 102*
Tanker size (approx.)	35,000 d.w.t. – 250,000 d.w.t.	100,000 d.w.t. – 500,000 d.w.t.
Max. LOA	1,200 ft.	1,400 ft.
Max. beam	200 ft.	250 ft.
Max. draft (approx.)	86 ft.	97 ft.
Loading Arms	4 × 20 in.	4 × 20 in.
Quick Disconnect coupling size	16 in., 20 in., 24 in.	16 in., 20 in., 24 in.
Max. Rate per Loading Arm	30,000 b.p.h.	30,000 b.p.h.
Number of Breasting Dolphins	4	4

The Terminal consists of a jetty trestle with 3 loading berths connected to a shore causeway. All 3 loading berths are fixed structures with fixed loading platforms, breasting dolphins and mooring dolphins. The terminal has 10 shore tanks, each of 1,000,000 bbls. capacity.

The Terminal will eventually deliver Basrah Light, Medium and Heavy, but in the short term will export only Basrah Light.

So far there is no shore metering system available and therefore Bill of Lading figures are determined by using ship's figures.
Notice to Mariners: No. 223/1990.

A new oil loading terminal facility has been built South of King Fahd Industrial Port as Ras Al Ma'ajjiz (as spelt on the relevant chart). Details as follows:

1. From a position on the coast of 23° 48.870′ N., 38° 24.355′ E., a causeway extends for 0.391 nautical miles on a bearing of 225°.
2. The terminal jetty consists of a line of dolphins connected by catwalks extending from 23° 48.633′ N., 38° 23.923′ E., for 0.751 nautical miles on a bearing of 135°. A catwalk extends from the end of the causeway to the jetty.
3. Navigation lights and loading platforms as follows:

	Position	*Depth Alongside*	*Characteristic*
North End	–	–	Morse (U).G.
South End	–	–	Morse (U).G.
Berth 103	23° 48.528′ N. 38° 23.984′ E.	28.8 m.	Morse (U).R.
Berth 102	23° 48.347′ N. 38° 24.183′ E.	32.5 m.	Morse (U).R.
Berth 101	23° 48.163′ N. 38° 24.381′ E.	29.0 m.	Morse (U).R.

Ballast: No facilities for dirty ballast.
Authority: King Fahd Industrial Port, Yanbu.
GENERAL CARGO AND CONTAINER TERMINAL: This facility is situated to the North of the Crude Oil Terminal. It has 7 berths along a 1,784 m. wharf. These include berths for Ro-Ro, heavy lift, conventional general cargo and cellular container vessels. The channel inside the barrier reef has been dredged to 14 m. below LAT and there are 2 turning basins at either end of the 2 km. berth frontage.

The Ro-Ro facility, adjacent to Berth No. 1, situated at the Northern end of the berth frontage, with a dredged depth of 14 m. below LAT is operational. A permanent ramp with a 1:25 gradient and an overall width of 34 m. is located at right angles to the berth frontage. Horizontal "Sumimoto" fendering is fixed to the ramp face at a height of 0.75 m. above LAT. The deck of the ramp is 2.0 m. above LAT rising to 2.36 m., 3.0 m. inshore from the ramp face. Three bollards, each rated at 90 tonnes are positioned either side of the ramp deck, providing a clear width of approximately 31 m. Additional bollards, also rated at 90 tonnes, are situated on the berth frontage, the first 30 m. South of the ramp face and thereafter at approximately 30 m. intervals. "Sumimoto" 'pie' type fendering, spaced at 10 m. intervals, is provided on the berth frontage.

The maximum uniform live loads on the Ro-Ro ramp is 6.25 tonnes/sq.m. The maximum concentrated load is 1,100 tonnes when used on a Scheurle platform trailer, which provides for a 28 tonnes maximum axle load with a maximum load on a contact area of 200 m. × 455 mm. of 7 tonnes: or 60 tonnes on 0.3 m. × 0.3 m. (as from 20 ft. containers stacked 3 high): or, 91 tonnes on 0.6 m. × 0.5 m. (as from 40 ft. containers stacked 3 high): or, 80 tonnes front axle load of a container fork lift truck.

Cargo is being handled by stevedores who are currently working one shift of 12 hours, 7 days per week on general cargo vessels and 24 hours working on container and Ro-Ro vessels. There are container gantry cranes available at all times.

Particulars of the container cranes are:

Safe working load	40 tons
Outreach	34.5 m.
Hoisting height above rail	26.0 m.
Elevation of wharf above Maximum HW	3.17 m.

Cycle time is 90 secs. or 40 containers per hour.

The 3 container cranes are numbered 1, 2 and 3 from the Ro-Ro ramp end. The berthing arrangements are:

		Length of Wharf
Berth No. 1	Ro-Ro Terminal	200 m.
Berth No. 2	Container Terminal	300 m.
Berth No. 3	General Cargo	200 m.
Berth No. 4	Heavy Lift	180 m.
Berth No. 5	General Cargo	180 m.
Berth No. 6	General Cargo	180 m.
Berth No. 7	General Cargo	180 m.

A minimum clearance of 15 m. between vessels at adjacent berths is required during berthing/unberthing operations.

BULK TERMINAL: The Bulk Terminal consists of a wharf 500 m. length with 2 dry bulk berths, Nos. 21 and 22. The wharf is 33 m. wi and can accommodate bulk carriers up to 60,000 d.w.t. The water the wharf is dredged to 15.5 m. below LAT. The maximum draft allow is 13.9 m. (46 ft. 07 in.).

PEMREF's sulphur loading equipment is located at the Bu Terminal's "Sulphur Berth" (Berth No. 21) and is capable of loadi prilled sulphur at a maximum rate of 420 t.p.h.

A slewing arm loader is designed to operate along the face of t sulphur dock to any hold of vessels up to 30,000 d.w.t., without requiri movement of the ship.

Ships mooring at the Bulk Terminal will be required to provi gangway access to ship.
BALLAST: The discharge of ballast water containing quantities of or high levels of mineral or chemical pollutant, into the water of the P is prohibited.

The discharge of ballast water from segregated or permanent balla tanks into the waters of the Port will be permitted provided that t Master signs a declaration that the permanent ballast is clean and n affected by any pollutants.

The discharge of clean ballast water, from cargo tanks, into the wate of the Port will only be permitted if the oil content of the ballast wa does NOT exceed 10 parts per million. Cargo tank ballast water will sampled on the arrival of the vessel and measurements taken determine the total oil concentration in the water. Subject to the resu of the measurements being within the prescribed limits, the Harbo Master, or his deputy, will approve the start of deballasting. Througho the cargo tank ballast discharge the oil concentrations in the discharg water will be closely monitored and the results reported to the Harbo Master, or his deputy, who will decide when such discharge shall st
MEDICAL: Medical facilities are available for the treatment emergency cases only. Masters should, if possible, provide advan notice, to their Agent, of their requirements, together with name, ra nationality, passport or seaman's identity book number including da of issue and place of issue.
FRESH WATER: Potable fresh water is available at the General Car and Container Terminal, Bulk Terminal and Export Refinery Termin Fresh water is not presently available at the Crude Oil Terminal, N Terminal and Yanbu Petromin Refinery Terminal. Masters shou contact their Agent well in advance to establish availability.
FUEL: Refer to specifications of individual berths.
CONSULS: Embassies are in the process of moving to the ne Diplomatic Quarter in Riyadh.
REPAIRS: While alongside berths, engines and propulsive machine must be ready at all times to leave the berth at 10 minutes' notice, und full power.

No repairs of any kind are permitted alongside any berth unle mutually agreed by the Master, Harbour Master and Terminal Manag

Any repairs involving "Hot Work" will be subject to special conditio contained in the "Hot Work Permit" which must be obtained from t Harbour Master.

CUSTOMS: *Import/Export Prohibitions:* All goods to be imported in or exported from, the Kingdom of Saudi Arabia are subject examination by the Customs Authorities. The importation of certa articles is strictly prohibited, for example:

Explosives and Firearms, including air rifles
Implements of war of any kind, including antiques
Alcoholic beverages of any kind
Religious matter not pertaining to the Moslem faith
Pig meat or pig products
Playing cards and gambling games or devices
Narcotics
Pornographic material.

Trafficking in these items between ships, and between ships' cre and shore personnel, is strictly prohibited. Also see "General".
TIME: The Time Zone is GMT plus 3 hours.
SHORE LEAVE: Ship's personnel are NOT permitted ashore, nor the wharves FOR ANY PURPOSE WHATSOEVER (this includes t reading of the ship's draft) until Pratique is granted, and then are allow on the wharves only if actually engaged in duties in connection w operations of discharging, deballasting or loading.

All shore leave is contingent upon compliance with Saudi Arab Quarantine and Passport Regulations. For current details concern these regulations and shore leave restrictions the ship's Agents mu be consulted.
SAFETY/POLLUTION: *Safety Requirements:* A letter concerning saf requirements will be given to the Master of each vessel by the Term Supervisor at the Crude Oil Terminal.

Receipt of the safety requirement letter has to be acknowledged countersigning and returning a copy to the Terminal Supervisor.

Ship/Shore Safety Check List and Precautions: Terminals in King Fahd Industrial Port follow the recommended safe practice for loading, discharging and related operations as contained in the International Oil Tanker and Terminal Safety Guide and the International Chamber of Shipping's Tanker Safety Guides for Chemicals and Liquefied Gas, or other comparable Guides.

Prior to commencement of any cargo/bunker transfer operations, a ship/shore check list is to be completed and signed by responsible personnel from ship and shore. Each item should be positively verified before it is ticked and, if necessary, a physical check will be performed.

Regular inspections by the Terminal Staff will be made with the ship's Master, or his deputy, to ensure that the relevant safe practices are strictly adhered to. The Harbour Master or his deputies may also carry out inspections. If any infringement of the recommended safe practices is observed, the attention of the person in charge will be drawn to the fact and, if the situation is not resolved immediately, all operations must cease. In the event of continued and blatant disregard of the regulations, the vessel may be ordered off the berth for appropriate action to be taken by the Charterers and Owners concerned.

Tank cleaning and/or gas freeing is only permitted with the approval of the Terminal Manager and Harbour Master and only if tank washings can be discharged into reception facilities (Also see "Appendix").

Crude Oil Terminal Emergency Procedures: Emergency procedures, both on board and offshore, shall be introduced in the event that normal operational practice has to be interrupted or suspended as a result of an unforeseen incident that would create unsafe conditions while loading crude oil at one of the berths of the Crude Oil Terminal.

Crude Oil Terminal Emergencies which would require immediate action by terminal personnel or shipboard personnel are:

1. Electrical storm.
2. Electrical power failure.
3. Mechanical failure.
4. Leakage, spill.
5. High gas concentration.
6. High winds exceeding 35 knots.
7. Fire.

Actions to be taken shall be determined by the type and severity of the incident and are:

(a) Stop loading.
(b) Comply with emergency reporting procedures.
(c) Disconnect loading/bunker arms.
(d) Fire facilities standby.
(e) Standby for unmooring.
(f) Departure from berth.

Emergency actions should be initiated by offshore personnel when an emergency is detected onshore or on board that tanker. It is important that the first able-bodied person or persons at the scene of the emergency should take whatever action is appropriate and necessary to protect personnel, minimise the hazard and to limit the extent of damage.

All Crude Oil Terminal personnel have to be familiar with the King Fahd Industrial Port Emergency Plans and, on declaration of an emergency for the Port, follow the procedures as listed in these emergency plans. The King Fahd Industrial Port Emergency Plans apply to all areas within the port limits as defined by the Rules and Regulations for King Fahd Industrial Port.

Oil Pollution Prevention: Any oil pollution of the waters of the King Fahd Industrial Port will be treated as a very serious matter. In order to prevent oil pollution, the Port Authority carries out continuous surveillance of the Port area. If any vessel is seen, or there is evidence to suggest a vessel is polluting the water of the Port, instructions will be given for all loading/discharging/deballasting operations to cease. A detailed investigation will be carried out and any vessel held responsible for pollution, will be required to pay the costs of all clean up operations and any fines that may be levied.

Masters, Owners and Charterers are reminded:

A. That before any vessel enters the Port, the Master is required to notify the Pilot of any special conditions, difficulties or peculiarities such as defective equipment, lines or gear, which might impose special hazards in connection with handling, mooring or loading/discharge of vessels ("Instruction to vessels and conditions of use of all berths within King Fahd Industrial Port").
B. In addition to (A) above, tankers and gas carriers are obliged to give a similar undertaking in their pre-arrival information.
C. All tankers, gas carriers and any vessels bunkering are required under the Rules and Regulations for Seaports of the G.C.C. Member States, Part 3, Section 4, to ensure all alarms and safety trips are tested and working, and that all pipes, valves, hoses or other apparatus shall be in good condition and free from leakage. Drip pans and deck scuppers shall be in position and plugged.
D. Suitable sorbent material or other materials or equipment should be readily available on deck in order to clean up any spillage.

GENERAL: *Emergency Plans:* Information will be supplied to each vessel arriving at the various terminals in the port detailing action to be taken in the event of an emergency situation arising. Masters, officers and crew should familiarise themselves with this information.

A Port Emergency may be declared in the event of:
a fire on a terminal or ship;
a pollution incident occurring from a terminal or ship;
a collision, grounding, sinking or other major incident occurring within the Port area.

A Port Emergency can only be declared and terminated by the Harbour Master who will make a broadcast on VHF to this effect. Instructions will also be issued to inform all vessels that a Port Emergency has been declared. It is vital, therefore, that all vessels should have their VHF available for immediate operation and that provision is made for a continuous listening watch to be maintained in the event of a Port Emergency being declared.

The alarm may be raised by:
Contacting King Fahd Industrial Port Control by VHF Channel 16,
or by continuous sounding of fog signalling apparatus, or
by visual means, or
if ashore by whatever means is available.

Initial action should be taken by those persons at the scene until the arrival of assistance.

The control of all operational activities afloat, and the movement of vessels during a declared Emergency will be exercised by the Harbour Master who will undertake the direction of these activities through King Fahd Port Control and will liaise with the Port Authority.

All loading or discharging of dangerous and/or flammable goods in the Port must cease immediately a Port Emergency is declared.

Port Regulations: Every vessel which arrives at the port must have a copy of the Rules and Regulations for Seaports issued by the Co-operation Council for the Arab States of the Gulf on board. On first arrival at the port, these Rules and Regulations must be obtained.

Saudi Arabian Government Regulations: Saudi Arabian Government Regulations are strictly enforced, and Masters having any doubts concerning the interpretation of these regulations are urged to consult their agent. While in Port, whether at anchorage or at a berth, the vessel's personnel are under the jurisdiction of Saudi Arabian Laws.

The taking of photographs while the ship is in port is strictly forbidden by the Saudi Arabian Government.

All alcoholic beverages, including beer, table wines and liquors, are to be under lock and key during a vessel's stay in port. The possession and/or consumption of alcoholic beverages is prohibited in Saudi Arabia. Penalties are severe and major delays to vessels can be incurred due to Government investigations of violations.

Provisions: Frozen meat (except pig meat), fish and fresh vegetables are available locally, however Masters are advised to contact their Agent well in advance to establish availability and prices.

Stores: Local availability of chandlery items is limited and Masters should contact their Agents well in advance to establish availability. Storing not permitted alongside ARAMCO berths.

Lights: British Admiralty List of Lights and Fog Signals – Volume "E".

WEATHER:

Climate: The climatic conditions affecting King Fahd Industrial Port are seasonal. In Winter onshore, air temperatures range from 25°C during the day to about 12°C at night. In Summer air temperatures range from 35°C during the day to 25°C at night. Extreme air temperatures recorded in recent years in the area have been 49°C in May and 6°C in February. Temperatures offshore are generally several degrees lower. Relative humidity varies throughout the year with average values between 65% and 70% in Winter and 50% to 55% in Summer, however values of 100% may occur for short periods around dawn. The average annual rainfall taken over a 4 year period is 3.2 mm.

Winds: A diurnal sea breeze/land breeze cycle occurs almost daily throughout the year and causes wind speeds of 10 knots and above to occur from the N.W. during the late afternoon. Storms occur as frequently as every 5-10 days and sometimes can last as long as 2 weeks. Although there is little drop in barometric pressure and very rarely any precipitation during these storms, wind speeds of up to 30 knots may occur from the North or N.W.

Tides and Currents: The mean tidal range is about 0.34 m., but fluctuations due to non-tidal effect, caused by storms, can be up to about 0.50 m. with a drop in mean sea level during the storm and a significant increase after the storm or as it subsides. Generally tides are semi diurnal with a period of 12 hours 25 minutes. Information to date suggests that the following datums be adopted:

Datum	Elevation above PLAT (m.)
Provisional Highest Astronomical tide (PHAT)	1.14
Mean High Water Springs (MHWS)	0.80
Mean High Water (MHW)	0.74
Mean High Water Neaps (MHWN)	0.67
Mean Sea Level (MSL)	0.57
Mean Low Water Neaps (MLWN)	0.47
Mean Low Water (MLW)	0.40
Mean Low Water Springs (MLWS)	0.34
Indian Springs Low Water (ISLW)	0.32
Provisional Lowest Astronomical Tide (PLAT)	0.00

Currents in the area are influenced by local wind conditions, tide, and the general circulatory pattern of the Red Sea. Generally currents within the port have been observed at less than 0.5 knots and run parallel to the coast. However, they are considerably influenced by surface wind activity.

Sea Conditions: Sea conditions can vary considerably within the Port limits. Wave heights in the port area are usually lower than 40 cm. during sea breezes, but during storms, waves in excess of 2 m. are common outside the offshore reefs while waves exceeding 1 m. are common in the inner port area. There is no distinct seasonality in this respect.
Sea Salinity and Sea Water Temperatures: Sea water temperatures are similar to air temperatures and range between 25°C (77°F) and 31°C (88°F). Salinity varies between 37 and 39 parts per thousand.
Visibility: The incidence of fog is rare, but, should it occur, it is more likely during the period November to April. During the summer months from May to September the incidence of poor visibility (less than 5 miles) can be quite high due to mist and haze, or dust particles held in suspension in the atmosphere. However, throughout the year, dust storms may occur obscuring the coastline.

APPENDICES:
APPENDIX "C"
SOLAS Convention – Ratification:

ARAMCO has been informed that the Government of Saudi Arabia has ratified the SOLAS Convention of 1974 and its 1978 Protocol on 29th May, 1984. Therefore, ARAMCO is now obliged to enact the provisions of the said Convention as soon as possible.

Please inform all Shipowner/Operator clients of the following:

1. Effective 1st January, 1985, all vessels of 70,000 d.w.t. and larger calling at any of ARAMCO's terminals to load crude/product cargoes must be equipped with an operable inert gas system in use.
2. Effective 1st March, 1985, all vessels of 20,000 d.w.t. and larger calling at any of ARAMCO's terminals to load crude/product cargoes must be equipped with an operable inert gas system in use.

Vessels not so equipped will not be accepted for loading as of the effective dates mentioned above.

The SOLAS Convention of 1974 represents a significant contribution to safety of tankers and oil installations and ARAMCO recommends that Shipowners take immediate steps to comply with the provisions of this convention as soon as possible and no later than the effective dates mentioned above. No exceptions will be allowed except in the most unusual circumstances.

Signed:
Manager, Oil Supply Planning and Scheduling Dept., Dhahran

APPENDIX "D"
Flammability Check of Ships' Fuel Tanks.
S.P.A. Circular No. 15335/85
Dated: 14.7.1405H/04.04.85G

With immediate effect you are advised to inform all concerned parties that the Port Management of all S.P.A. ports will require additional flammability checks on fuel tanks of OBO carriers and tankers excluding tankers engaged solely in the transport of chemicals.

The purpose of this extra precaution is to deter the use of cargo oil as fuel supplement and will be required on a random basis as advised by the Port Operations Department. The results are to be incorporated (when applicable) on the Gas Free Certificate.

When such a random test is required by the Port Management it will be necessary for the ship's Agent to arrange for the services of a Surveyor.

For your information if the atmosphere in any fuel oil bunker tank be discovered at more than 15% (LEL) then the ship's Master will be required to engage a Surveyor to provide an exact flashpoint analysis of the tank contents.

Furthermore, should the flashpoint be less than the prescribed limits stipulated in Regulation 33 of SOLAS, the Port Management reserves the right to remove the ship from the berth.

Signed:
President and Chairman of the Board Ports Authority,
Kingdom of Saudi Arabia.

SHIPMASTER'S REPORT: March 1985.
Note: Vessel was chartered at very short notice, hence problems experienced are not typical.
Arrival: As soon as vessel was ordered to Yanbu, a pre-arrival information list was telexed to Agents, as per format in "Guide to Port Entry". (Referred to locally as the AA to ZZ List). Unfortunately, these Agents turned out to be in Jeddah, and the list was not forwarded to Yanbu until at least 1200 hrs. on the following day, by which time the vessel had been instructed to repeat the message to a Telex No. given by the Port Control by VHF (who turned out to be the local sub-Agent).

On approach to the pilot station, the vessel was instructed, when 24 miles from the pilot station, to remain 3 hours steaming from the pilot station, to await orders. (When the Pilot eventually boarded, this instruction was discussed with him and it transpired that the Port Radio operators invariably say this although the intention is to remain WITHIN 3 hours steaming of the pilot station).

Vessel was brought from sea to the inner anchorage. Anchorage positions have been established as follows:

N1	Lat. 23° 56.64′ N.,	Long. 38° 11.65′ E.
N2	Lat. 23° 56.47′ N.,	Long. 38° 11.86′ E.
N3	Lat. 23° 56.44′ N.,	Long. 38° 12.14′ E.

Depths at these anchorages, as per chart 328, vary from 35 m. to 45 m.

Vessel was berthed between 0116 hrs. and 0333 hrs. next day, on Berth No. 55 (Suez East). Tug Masters are of doubtful ability regarding tug handling, although the tugs themselves are quite powerful. Language difficulties seem to be a part of the cause.

The berth is intended for use by vessels up to 150,000 d.w.t., and a depth of 20 m. alongside was measured by echo sounder.

On berthing at night, quarantine lights are required.

After berthing, no transmissions, except from low power walkie-talkies, are permitted, not even main VHF on low power.

Despite "OO" through "RR" of the pre-arrival message being corre
sent, the Terminal was unaware that the vessel had ballast in ca
tanks. Once they discovered this, the vessel had to be moved 70 m
use deballasting lines. Contrary to advise in the port information b
supplied by King Fahd Port Control, ONLY SEGREGATED BALL
is permitted to be discharged into the sea.
Cargo: 2 Cargo Surveyors were appointed: S.G.S. on behalf of PEM
and Watson Gray on behalf of MOBIL. Both were most helpful.
It is understood that, from March 1985, all petroleum cargoes, of
sort, will have to be loaded into INERTED tanks.

We had no difficulty in obtaining loading rates requested, o
reducing rate for topping-off.

Throughout loading, the gangway was attended by an armed gu
and ship's personnel were not permitted on the jetty at any time,
even for the purpose of reading draft.

Loading lines are 16 in. (400 mm.) rigid booms (total of 7)
2×10 in. (250 mm.) rigid booms for bunkers.

Apparently, it is not uncommon for cargo contamination to occur w
the shore tank farm and a number of cargoes, found to be 'off sp
when loaded, have had to be discharged and sound cargo loaded.
Delays: Pilots require 2 hours' notice for sailing; Agent will not in
case order Pilot until shore figure for cargo has been obtained; this ta
1.5 hours, thus minimum of 3.5 hours between completion and sai
officially. In fact, Pilot boarded on this occasion 3 hours be
completion and a further delay was occasioned only due to cargo pa
not being ready.
Port Facilities: Much as described by "Guide to Port Entry". All
installations, except the domestic refinery terminal (Chart 328), are
complete, however, utilisation of these installations appears to be
only one berth on Container Wharf was in use and product and cr
jetties had berths empty for protracted periods.

SHIPMASTER'S REPORT: October 1985.

The port is approached from the West, or the S.S.W., in specifi
marked channels which have been surveyed. Water is very deep
though many ships were seen passing through the uncharted regi
none were VLCCs and the Pilots at the port recommend the use of
proper lanes.

Accurate positions can be obtained, when approaching from the W
by fixes on the land at Ras Baridi and more particularly by radar
visual fixes of the industrial complex to the South of this point whic
marked on the charts as a silo. There are actually numerous chimn
and buildings there. When closer, the beacon at Scherbo Reef and
adjacent buoys all show up well on radar though the Racon on
beacon was not working in October 1985. The beacon is not eas
see visually even when quite close.

There was no apparent current in the approaches to the pilot sta
Note that the Pilot does not board at the position marked on the ch
but at a point due North of Scherbo Beacon and so ETAs shoul
calculated to this point. He also leaves there when outbound.

King Fahd Port Control listens on VHF Channel 16 and ETAs sh
be sent to them at least 4 hours and 2 hours before arrival so that
pilot boat knows when to leave the shore to rendezvous at the ab
point. The boat listens on VHF Channel 74. The Pilot wants a spee
about 8 knots at time of boarding and a combination ladder on the
side. A speed of about 13 knots was requested on 15 minutes' no
of reduction and this will usually be maintained for about one hour.

There are 3 berths for VLCCs and the allocation criteria is deadwe
and the amount of flat side. Berth 61 takes 80 – 260,000 d.w.t.
requires a flat side of at least 400 ft. Berth 62, takes 275 – 500,
d.w.t. and a flat side of 460 ft., and 63 takes 120 – 280,000 d.w.t
flat side of 420 ft. There are occasional queues for No. 61 as the maj
of ships fit this berth. No. 62 is frequently unoccupied.

4 tugs meet the ship as she swings in from the approach cha
towards the berths. They are all about 3,400 h.p. and most are Vo
Schneider. Tugs' wires are used and they have good messeng
already attached so that only a heaving line is needed from the sh
All ships berth starboard side alongside with moorings of 3, 3, 2
springs are sent away first. The tugs hold the ship alongside
mooring is complete. The berths lie about 130°/310° and the preva
wind is from the W.N.W. up to Force 6/7.

Vessel berthed at No. 63 as she would not fit any better on the
berths. Masters should push for their headlines to be put on
Southernmost hooks for No. 62 berth, if available, as this gives g
leads and the Supervisor says it is possible.

The berths were originally designed for SBT tankers and so have
dirty ballast lines (though other berths in the port have this faci
However, since ARAMCO took over the berths there have been
and lines may be fitted.

Arrival ballast must be able to pass very stringent laboratory
otherwise the ship will be refused and ordered to sail. *At least one*
per month suffers this.

There is a large desalination plant North of the port making wate
most of the area. Pollution costs and fines are HEAVY.

The ballast requirements are a maximum of 8 p.p.m. and an aver
of 8 p.p.m.. Samples are taken of the top (skim), middle and botto
the cargo ballast tanks and an oil absorbent cloth is then dragged
the surface in each tank. All deck openings must be available as
as the tank lid and they utilise most of them. Shore also reserves
right to test the permanent ballast tanks. Samples are taken ashore
the results known before any deballasting is permitted. A small bo
stationed at the ship's side adjacent to the ballast discharge throug
and hourly samples are taken at the pumps. On this vessel the part
system was operating and shore were much impressed with this
permitted them to constantly monitor the ballast. They took the h
samples from there (in fact they trusted the ship to take them for
of the time as the gangway had to be removed due to airdraft). S
at present only requests that at least 30 cm. is left in each tank bu
will soon become a regulation for further protection. They are also

by rust and IG discoloration of the ballast. It is recommended that ballast is changed as near to arrival time as possible to lessen this.

This vessel had a maximum content of 4 p.p.m. and an average of 1 p.p.m. and would appear to be ideally suited to the port as the ballast is normally very clean.

The Agent, Customs and Port Health board first on arrival at the berth and the "Q" signal must be lowered as soon as Pratique is granted as no-one else will board until this is done.

There are 6 Chicksans at each berth, 2 of which are for bunkers, and the cargo ones are designed for 24 in. connections but all reducers are available ashore and in fact the 16 in. size is more or less permanently attached. The shore line is 56 in. and the distance from the tank farm is about 8 km.

For Basrah Crude, the maximum loading rate is 150,000 bbls.p.h. Shore will try to insist that the ship maintains her full loading rate until one hour prior to completion and a close check must be kept on the rate as vessel's request for a reduction may not be heeded! It is suggested that this is clarified before start of loading and cargo stopped if reduction is not heeded, later.

There is a storage capacity of some 3 million barrels for Basrah (they call it Iraq Light) Crude and a maximum pipe-line throughput of 2 million barrels per day though the average is only about 500,000 barrels. The maximum is used when they have a ULCC and need to maintain stock which is seldom. The average API is 33.5.

Incidentals: All cameras must be placed in bond. No one is allowed on the jetty for ANY reason. If there is a crew change then 2 new Crew Lists will be required, incorporating all changes, for outward clearance. Incoming members' baggage was searched three times and one man had some family photos removed as a girl had an off-shoulder dress. There is of course no argument. Agent's office is 40 km. away and he is often difficult to contact.

Generally speaking the shore personnel are friendly and helpful. There is only this 'problem' of the loading rate which must be sorted out.

SHIPMASTER'S REPORT: October 1986.

Approaches: The cement silo in approximate position Lat. 24° 16.35′ N., Long. 37° 33.55′ E. (near Ra's Baridi) gave a good strong echo at 48 miles. This was in sufficient time to ascertain the vessel's position for the alteration of course into the Northern Approach Channel.

Documents: Papers required by the Agent:

10 Crew Lists (standard IMO Form 5 acceptable).
1 Vaccination List.
2 Personal Manifests.
2 Stewards Stores Lists.
*3 Health Declarations.
*4 Arrival Details.
*2 Passport Control Office Arrival Details.
*1 Customs Declaration.
*1 Arrival Report.
*1 Customs Alcohol and Tobacco Declaration.
*Forms supplied by local Agent.

Telex Numbers:

Aramco, Yanbu: 662333 Aramco Sj. 661052 Aramco Sj.
Port Management: (Tankers only) 662360 Portct Sj. (Others) 661096 Portct Sj.

SHIPMASTER'S REPORT: June 1990.

All cargo tanks must be below 8% oxygen before vessel may enter port. 02 content checked on arrival alongside.

A fire hose must be rigged on the poop.

Manifold drip trays must be free of oil.

Pilot boarded from tug about half way between reporting Positions "A" and "B", due to weather conditions being rough.

Three tugs for berthing 70,000 d.w.t. vessel, one tug each end with tug's line and one tug pushing, but does not make fast.

Moorings consisted of 3, 2 and 2 each end. Springs first by ship's heaving line and shore messenger, breasts and stern/head lines by boat.

Fire wires to be turned up on bitts with at least 5 turns, then eye to be suspended 1.0 m. – 2.0 m. above the water with heaving lines attached.

Please note that the pilot boarding position given in the "Guide" is not the same as on B.A. chart, which gives the position as 24° 2.5′ N., 37° 45′ E. However, it seems the pilot will normally board inside, and usually disembarks as soon as possible.

ZULUF TERMINAL: 28.23 N. 49.14 E.

TERMINAL CLOSED APRIL 1976. THE STORE BARGE HAS LEFT. NO FURTHER OPERATIONS WILL TAKE PLACE AT ZULUF.

NOTICES:

MENAS Notice No. 102/82
ZULUF AND MARJAN OILFIELDS

Mariners are advised that there are lighted structures and numerous unmarked well heads with standpipes of 6 ft. to 8 ft. above the sea bed between the pecked areas delineating the Marjan and Zuluf Oilfields.

Oil rigs and platforms also exist in the Southern approaches to the above oilfields.

Caution and a good lookout is requested in the area and anchoring between the two oilfields is not advised.

MENAS Notice No. 05/84
VESSELS TRANSITING WATERS IN VICINITY OF MARJAN AND ZULUF OILFIELDS

Mariners are advised that new platforms are being erected in the Zuluf Field and both rigs and platforms are positioned between the Marjan and Zuluf fields.

Both fields are clearly delineated on nautical charts and shipping should pass between them. A good lookout is requested and reduced speed when in the vicinity of platforms, oil rigs and their supporting craft.

British Notice to Mariners No. 249/1985
Zuluf Oilfield – Anchorage Amended

(1) *(a)* Pecked-line limits of an anchorage are to be inserted joining the following positions:

(i) Lat. 28° 19.0′ N., Long. 49° 13.0′ E.
(ii) Lat. 28° 19.0′ N., Long. 49° 17.0′ E.
(iii) Lat. 28° 17.0′ N., Long. 49° 17.0′ E.
(iv) Lat. 28° 17.0′ N., Long. 49° 13.0′ E.

(b) The symbol for an anchorage is to be inserted within the area in 1*(a)* above.

(2) The former anchorage limits, and legend, Tanker Anchorage, within the limits in 1*(a)* above, are to be deleted.

British Notice to Mariners No. 250/1985
Marjan Oilfield – Anchorage Established

(1) Pecked-line limits of an anchorage are to be inserted, joining the following positions:

(a) Lat. 28° 21.0′ N., Long. 49° 41.0′ E.
(b) Lat. 28° 21.0′ N., Long. 49° 44.0′ E.
(c) Lat. 28° 19.0′ N., Long. 49° 44.0′ E.
(d) Lat. 28° 19.0′ N., Long. 49° 41.0′ E.

(2) The symbol for an anchorage is to be inserted within the area in (1) above.

British Notice to Mariners No. 2685(P)/1985
Zuluf and Marjan Oilfield
Pipe-lines Reported

The following pipe-lines have been reported:

(1) Gas pipe-line joining the following positions:

(a) Lat. 28° 23.2′ N., Long. 49° 15.5′ E. (in Zuluf Oilfield).
(b) Lat. 28° 20.8′ N., Long. 49° 14.3′ E.
(c) Lat. 28° 00.6′ N., Long. 48° 42.9′ E. (on the coast).

This pipe-line is thought to lie within 0.8 miles of the N.W. corner of Zuluf Anchorage area (Lat. 28° 18.0′ N., Long. 49° 15.0′ E. approx.).

(2) Two pipe-lines joining the following positions:

(a) Lat. 28° 18.5′ N., Long. 49° 31.4′ E. (Marjan GOSP 3).
(b) Lat. 28° 00.3′ N., Long. 49° 02.5′ E.
(c) Lat. 27° 58.4′ N., Long. 49° 00.0′ E.
(d) Lat. 27° 55.0′ N., Long. 48° 56.2′ E. (S. border, chart 3774).

Note: Gas pipe-lines contain flammable natural gas at high pressure. A ship damaging a pipe could face an immediate hazard. Mariners are strongly advised not to anchor or trawl near the pipe-line.

Notice to Mariners "A" 137/26.01.86
New Zuluf Oilfield Limits

(A) The symbol for a restricted area is to be inserted between the following positions: (All positions are referenced to WGS 72 Datum).

Latitude	*Longitude*
28° 22.06′ North	49° 05.15′ East
28° 18.91′ North	49° 13.83′ East
28° 19.69′ North	49° 18.66′ East
28° 25.42′ North	49° 24.51′ East
28° 30.01′ North	49° 24.10′ East
28° 28.24′ North	49° 08.78′ East

(B) Delete the existing oilfield limits and all pipe-lines, platforms and associated legends within.

(C) Insert the following legends centrally within the area AAA.

(1) Zuluf Oilfield.
(2) Numerous surface structures and submarine pipe-lines exist within this oilfield. The surface structures exhibit a Morse (U) 15 sec. light characteristic.

(D) The light characteristic on the post in position:

Latitude: 28° 37.16′ North
Longitude: 49° 25.23′ East

is to be amended to Morse (U) 15 sec.

Senegal

DAKAR: 14.40 N. 17.26 W. (See Plan)

PORT LIMITS: *North:* From the point of Bel-Air by a parallel from N.E. of the N.E. Jetty of the harbour, to 1 mile N.E. by a meridian passing 2,900 m. East of the Round-Point determined by the crossing of Felix Eboue and Avenue de la Jetee Nord and by the parallel passing 2,060 m. North of Goree Island.
East: By the meridian passing 1 mile East of Goree.
South: By a line joining the Cape Manuel from the South point of Goree prolonged until it encounters the meridian passing 1 mile East of Goree.
DOCUMENTS: Vessels carrying hazardous and/or strong smelling cargoes must declare to the Harbour Master, at least 48 hours before ship's arrival, the nature/quantity/packing of these goods, as well as their stowage on board. Same applies for Arms and Ammunitions.
Health:
2 Crew Lists.
1 Sanitary Declaration.
2 Lists of Date of Vaccinations.
(Valid vaccination for Yellow Fever for all persons)
Customs:
3 Crew Lists.
2 Stores Lists.
2 Personal Effects Declarations.
2 Slop Chest Lists.
1 Arms and Ammunition List.
Immigration:
4 Crew Lists.
2 Lists of Ports of Call with dates of arrival/departure.
Agents:
1 Crew List.
1 Personal Effects Declaration.
1 Slop Chest List.
2 Lists of Arms and Ammunition.
Papers required on arrival: Bills of Lading for cargo to be discharged and Master's copy. 2 copies of Cargo Manifests for cargo to be discharged.

Great care should be taken in completing all Store Lists, Slop Chest Lists and Personal Effects Lists as Customs check all stores, including fridge spaces.

Customs also board vessels at anchor and inside territorial waters, inflicting heavy fines in cases where stores, etc. are not prepared and ready for inspection. Also, heavy fines are imposed for any discrepancies. Even when calling at port for emergencies (e.g. Medivac) a full set of documents must be prepared before entering territorial waters.

No vessel is allowed to leave Dakar without having received on board an outward manifest duly visaed by the local Customs Authorities. Vessels leaving without such a manifest will be heavily fined.
PILOTAGE: Pilots meet vessels off the North point of the Island of Goree in a naturally sheltered area.
RESTRICTIONS: During the rainy season, all vessels with a draft of more than 32 ft. 6 in. could be delayed, due to the effects of swell, at anchorage in outer roads and await meteorological conditions permitting their entry into the harbour.

Use of whistle signals to call Pilot is forbidden between 2200 hrs. and 0600 hrs. The harbour area is dredged to a depth of 10 m. to 11 m.
Dangerous Cargo: Vessels are allowed to have the following dangerous cargo on board:

For Discharging	*North Area*	*South Area*
I.M.O. 1	20 tons	10 tons
I.M.O. 2	50 tons	25 tons
I.M.O. 3	80 tons	25 tons
In Transit	*North Area*	*South Area*
I.M.O. 1	25 tons	20 tons
I.M.O. 2	50 tons	25 tons
I.M.O. 3	80 tons	40 tons

MAX. SIZE: Ships of 30 ft. draft are able to enter at all stages of the tide by day and night. Vessels up to 36 ft. draft may enter at high tide except possibly during the stormy season, between mid August and mid October.
HEALTH: Health Officials board vessel immediately after berthing alongside. For passenger vessels, these formalities are effected before berthing to avoid delays. Vessels at sea may obtain medical advice by VHF or telex via Dakar Radio.

Inoculation/Vaccination can be arranged through Agent during weekdays.

Free Pratique can be granted via radio by Agent, by using international Code Words "MIBDU/MIJMA".
RADIO: ETA advice should be sent 96 hours, 48 hours and 12 hours prior to arrival including cargo to discharge, drums to discharge (if any), draft on arrival, expected draft on departure, last port and next port of call. Agents should be notified of tug requirements, VHF Channel 8.
VHF: The Port Captain's Office, pilot station and tugs are equipped with VHF, with the following Channels: Channel 16 used by vessels approaching to contact pilot station or Port Captain's Office; Channel 12 used during manoeuvres for communications between Pilots and tugs; Channel 6 used only by the tug station.
TUGS: Operated by a private company, 3 tugs available up to 2,000 h.p. (bollard pull 24 tons). Compulsory for loaded tankers.
BERTHING: 10,000 m. of quay length available of which more than half has depths of 8 m. to 11 m. alongside.
Mole D'Escale: 6 berths, depth alongside 10 m., can be used for vessels refuelling simultaneously with cargo operations.
Pier 718 Phosphate Quay (Pechiny): 215 m. long, max. draft of 25 ft. 7 in., loading average of 200 t.p.h.
Pier 52 Phosphate Quay (TA IBA): 170 m. long, max. draft of 36 ft., loading average of 1,000 t.p.h.

The South area has 3 wharves with a depth of 26 ft. – 33 ft.
Dock I is 460 m. long.

Berth No.	12	Draft	26 ft.	3 in.
" "	13	"	28 ft.	7 in.
" "	14	"	28 ft.	7 in.
" "	15	"	33 ft.	
" "	17	"	33 ft.	

Dock II

Berth No.	21	Draft	27 ft.	3 in.
" "	22	"	26 ft.	11 in.
" "	24	"	26 ft.	3 in.
" "	25	"	25 ft.	11 in.

Dock III is 350 m. long. Max. draft of 32 ft. 10 in. Reserved for trad with the Republic of Mali.
Mole de Peche: 1,461 m. of quays, supplied with water and bunkers Areas for spreading out fishing lines and nets.
CRANES:
5 semi-jib cranes × 6 tons at 27 m.
1 electric crane × 40 tons at 20 m.
2 floating cranes, 60 tons and 120 tons.
1 mobile crane × 8 tons at 15 m.
1 mobile crane × 28 tons.
CONTAINER FACILITIES: Containers handled at Mole 1.
STEVEDORES: Normal working hours, weekdays from 0800 t 1200 hrs. and from 1400 to 1800 hrs. Saturdays from 0800 to 1200 hrs Overtime, weekdays from 0500 to 0800 hrs.; from 1200 to 1400 hrs from 1800 to 2200 hrs.; from 2200 to 0500 hrs. Holidays and Sunday from 0000 to 0500 hrs.; from 2200 to 2400 hrs.
MEDICAL: *Vaccinations:* Possible from 0800 to 1200 hrs. and 1500 t 1700 hrs. Sundays and holidays excluded.
Doctors: All kinds of specialists available.
Hospitals: With qualified doctors and good equipment.
TANKERS: The Petroleum Basin is dredged to a depth of 10 m. to 11 m 2 jetty berths can receive tankers up to 200 m. length, max. dra 32 ft. 6 in. Petroleum Wharf which has 4 berths, depth alongside 12 m (depth in approaches 11 m.) can receive tankers up to 250 m. lengt with a draft of 36 ft.

Black products handled at all berths (6 in., 8 in. and 10 in. hoses White products at Berth, 2 only (8 in. hoses). Distance to tank farm abo 5 km. Water to be pumped between grades.

Ship to Ship transfer (STS) is carried out across Petroleum Wha using 2 × 8 in. hoses. Standard practice – discharging tanker starboa side alongside Berth No. 93 and loading tanker port side alongside a No. 92 Berth. Transhipment supervised by Iransen and Shell.

M'bao Refinery sealine buoy berth is situated 3 miles N.E. of Gore Island. Vessel berths using both bow anchors, stern is secured to buoys using 4×5 in. wires from buoys stern. Ship's ropes not use Hose connection on port side using 12 in. (300 mm.) hoses. Vessel derrick to have an SWL of at least 5 tonnes.
FRESH WATER: All quays are fitted with water hydrants. Water supplie by 3 hoses simultaneously, with a rate from 60 – 100 cu.m.p.h. Ca also be supplied by barge up to 400 tons capacity but minimum orde 150 tons.
FUEL: All grades can be supplied from the quays up to 1,000 t.p. Fuel can also be supplied by barge. Also see "Shipmasters' Report".
REPAIRS: All types of repair can be effected by the Naval Arsenal o by private companies.
DRY DOCKS: At the Naval Arsenal, one dry dock length 189 m., wid 23 m., depth up to 9.50 m.

Syncrolift, max. weight acceptable, 1,200 tons.

New Floating Dock will take vessels up to 60,000 d.w.t. Lifting capac 28,000 tons. Acceptable dimensions 235 m. × 38 m.
REPATRIATION: Seamen can be repatriated to Europe without delay by air.
AIRPORT: International airport with regular services to Europe.
TELEPHONES: All berths are equipped with telephone apparatus whic is placed on board vessels without charge.
HOLIDAYS: New Year (1st January); Tabaski (Variable Date); Nation Day (4th April); Easter (Variable Date); Labour Day (1st May); Ascensio Day (7th May); Whit Monday (Variable Date); Maouloud (Variable Date National Day (14th July); Assumption (15th August); All Saints' Da (1st November); Korite (Variable Date); Christmas (25th December).
GENERAL: Several cases of assault have been reported against cre members returning to their ships during the hours of darkness. For th reason, the delivery of cash from Agents is suspended during the nig hours. Although Port Authorities and Security are aware of the situatio it is advisable to acquaint all on board with this.
DEVELOPMENTS: A container and Ro-Ro terminal has bee constructed between Mole 6 and Mole 8. Length of berth 430 m.

SHIPMASTER'S REPORT: With a draft in excess of 15 m. it is n possible to anchor in the inner roads due to the swell. The swell is wors from July to October (rainy season).

The Pilot directed us to an anchorage 0.5 miles N.E. of Island of Gore but in my opinion it is a little too close. However, the nearer a vess can anchor N.E. of Goree the better. The holding ground is very goo

It is possible to talk to Mory Fuel Company direct on VHF Channel They have a barge which is able to deliver fuel oil and diesel oil, capac 500 tons.

Three tugs available, be sure to order one well in advance befo completion of bunkering or the vessel may have to wait. Bunker undertaken day and night.

SHIPMASTER'S REPORT: October 1983.
Documents: Separate Bonded Stores List (4 copies) required Customs.
Pilotage: Pilots will board 0.2 miles from breakwater entrances.
Health: Advise Port Health Authorities of health state, also vaccinatio required. They attend on arrival but do not acknowledge messages.
Fresh Water: Fresh water supply at piers averages 20 t.p.h.

Security: There have been many cases recently of anchored and stationary vessels being boarded by thieves and mooring ropes, etc. purloined. Vessels on regular run to Dakar do *not* stop in port approach areas until daylight. Gangway watchman essential. Shore traders to be confined to one area under supervision if allowed on board.

SHIPMASTER'S REPORT: March 1989.

Port Officials: Immigration and Port Health boarded on arrival alongside. Customs did not board until the next day.

The Agent advised that particular attention should be paid to declaring the paint on board and also that the Stores Declaration should be made out after the usual "presents" had been given out.

The Customs search was a quick look at the bond locker and the question "Is it as declared?" is asked. When the answer was in the affirmative and a "present" handed over the locker was sealed, no other area of the vessel was searched.

Normally, all stores are checked and any discrepancies will result in a fine, the minimum reported to be U.S.$500.00.

Ship's standard papers are accepted, except for the Health Declaration where the Port Authority form is required, copies placed on board for next call.

Papers required:

Health Declaration	1 copy
Crew Declaration	2 copies
Ports of Call List	5 copies
Vaccination List	2 copies
Drugs List	3 copies
Crew List	6 copies
Stores List	3 copies
Hazardous Cargo List	2 copies
Passenger List	4 copies
Stowaway List	4 copies
Arms and Ammunition List	4 copies
Animals List	4 copies
Cargo Manifest	4 copies

Nil declarations are required when appropriate.

The quantity of forms required varies slightly from visit to visit but this would appear sufficient to cover most calls.

The standard vaccination list included Cholera, and the Port Health advised that one of these was out of date, however Cholera is not required for Dakar and no problems were experienced.

An Inward Clearance Certificate is issued by the Port Authority and also a certificate of Free Pratique by the Port Health.

Outward Clearance is stamped by the Customs on copies of the Cargo Manifest.

Approaches: B.A. Chart 1001 was found to be as charted. Arrival was in daylight and lights could not be verified.

Buoy No. 1 is painted white and was difficult to see in the hazy conditions prevailing at the time.

Buoy No. 12 has a double black ball topmark as indicated in the Light List and not a single ball as appears on the chart.

Approach to the harbour entrance can be made either between the buoy just North of Goree Island and Buoy No. 12 or between Buoy No. 1 and Buoy No. 12.

Pilots: On arrival the Pilot will board at the charted position or closer to the harbour entrance from a large launch.

On departure, call the pilot station on VHF 1 hour before estimated departure time and confirm 10 minutes before vessel is ready to leave. The Pilots employed were competent and spoke good English.

Shifting ship: It is not necessary to use a Pilot for warping the vessel along the dock. For this operation linesmen are obtained by calling the Pilots on VHF.

Radio: The Port Authority require 96 hours, 48 hours and 24 hours notice of arrival according to the Radio Signals List. An attempt was made to pass this information using the telex number from the Radio Signals, but the telex remained undelivered, so contact was made by W/T through the local coast station.

Agents were also asked to advise the Port Authority and Pilots. The message must have been received as we were expected.

Pilots can be contacted on VHF as soon as within range and will advise berthing or anchoring prospects, the English spoken is generally good.

Pilots will advise on VHF, any vessel movements and give directions for approach.

Tugs: Two tugs were used for berthing as there was a strong wind on to the berth and there was another vessel on the berth astern, however, probably one tug would be sufficient under similar conditions in future.

The pilots carry portable VHF for communication with the tugs.

Tugs lines are used when required and are in good condition.

Berthing: All berths are fitted with fenders, but some are in a poor condition. In February 1989 the vessel berthed on Berth No. 85, the fendering here is good.

There are 2 sets of boat landing steps set into the face of the dock along this side of Pier No. 8 which would cause a problem if the vessel was positioned with either of these close to the foot of the gangway.

The vessel was later moved astern to Berth No. 84.

There is a clear working area alongside Berths No. 85 and 86, but dockside sheds and stored cargo made the loading area alongside Berth No. 84 somewhat cramped.

Loading: Vessel loaded 6,600 tonnes of ground nut pellets.

The loading is by portable belt elevators, supplied by tipper trucks.

Four elevators were used and positioned variously at hatches, depending on the distribution required.

Working hours are 0800 hrs. – 1800 hrs. every day.

Starting in the morning is slow, the first truck arriving at about 0830 hrs. and sometimes as late as 0915 hrs.

Hoppers are then constructed at the ends of the elevators by filling bags with the first of the delivered cargo, the hoppers are to give a good feed to the elevators. The last truck of the day arrives at about 1700 hrs. and when that is emptied the hoppers are dismantled and the contents of the bags are emptied on to the elevators and any remaining sweepings on the dock are shovelled on afterwards.

The day's work is usually completed by 1730 hrs.

The loading rate is governed by the availability of trucks and the rate of filling them at the silos.

The Agents are also the stevedores and their equipment was used.

Daily tonnage sheets are produced but are slow in coming forth, no record was kept of the tonnage per hatch, only the total loaded.

Gross elevator hours	284	Gross rate	23.24 t.p.h.
Net elevator hours	243.17	Net rate	27.14 t.p.h.

Approximate rate of 250 tonnes per elevator per day.

Fresh Water: Available at berth, the watermen supply their own hoses.

Repairs: Permission is required to immobilse the main engines. There are no other restrictions.

The repair firm Dakar Marine did a fair job of supplying and fitting new bolts to the rudder of another vessel alongside, but I suspect repair work is expensive.

Watchmen: It is best to employ two shore watchmen, one permanently on gangway duty and one on patrol. Theft is common and firefighting and lifesaving equipment are favourite items.

General: Fumigation: The holds were fumigated on arrival and left overnight, loading starting the next morning. The cargo was also fumigated on completion of loading.

Presents: Everyone expects either cigarettes or soft drinks for services rendered but can generally be persuaded to go away empty-handed, however a reasonable supply is required to take care of deserving cases.

Dust: For some days before arrival visibility was reduced by dust haze caused by sand from the desert, the whole of Dakar is covered in dust and when loading commenced this was made considerably worse.

Disbursements through Agents: The Agents prefer to draw cash and hand it to the Master to pay any accounts direct to the supplier, which is not the easist way of doing things.

Ensure that the Agent advises you of which items they will pay and which are expected to be paid by the vessel.

Laundry: Can be arranged by the ship chandler, but it is expensive.

Shore labour: All forms of cleaning and painting are possible, however at a cost of U.S.$20.00 per man per day would appear to be rather expensive, especially as the workers also expect to be fed.

Garbage collection: Recommended by the Agents and is carried out at intervals specified by the vessel (daily, every 2 days, etc.).

Ship Chandlers: A large number will present themselves as soon as the vessel arrives alongside, also a number of businessmen with everything from fish to watches for sale. The businessmen are best kept off the ship, as apart from their prices generally being the same or more than the Chandlers, they are likely to pick up anything that can be moved and spirit it away under their robes.

Prices of all items are high. Most foodstuffs have been imported and nothing except fish seems to be produced locally, although some good produce was seen on the market stalls in town.

M.N. Thoumas, United Shipchandlers, had been used before by the vessel and his prices compared favourably with other chandlers, he also seems to have an efficient organisation. Some of his fresh produce was returned as being poor and replacements were made.

AUTHORITY: Port Autonome de Dakar, 21 Boulevard de la Liberation, B.P. 3195, Dakar, Senegal. *Tel:* 238-00. *Telex:* 406. *Cables:* Porcomer Dakar. *Contact:* E. Belin, Director General. Captain E. Sarr, Harbour Master.

AGENT: Socopao Senegal, 47 Avenue Albert Sarrault, B.P. 233, Dakar, Senegal. Tel: 23.10.01/21.46.31. Telex: 21496 Freight SG. Fax: 22.45.80. Cables: "Freight Dakar".

Fish Department – Tel: 22.19.29. Telex: 21811 Freight SG.

Sub-Agency at Kaolak. Tel: 41.19.07. Telex: 74060.

KAOLACK: 14.09 N. 16.06 W.

DOCUMENTS:

2 Crew Lists.

2 Stores Lists.

2 Manifests (tobacco, wine, etc.). Agents deposit at Customs office.

PILOTAGE: Pilot taken on board, and lands in Dakar. When vessels do not require tank-washing, the Pilot disembarks in roadstead.

ANCHORAGES: Sufficient for three vessels only. About 6 m. deep.

RESTRICTIONS: Night navigation forbidden in River Saloum. Depth available 3.0 m.

MAX. SIZE: Length 105 m. (because of River Valor).

HEALTH: Agent signals to Harbour Master. Provisionally vessels quarantine in Dakar.

TUGS: No tugs. (Only from Dakar.)

BERTHING: Signals by flag when berth available. Vessels enter at flood tide so that they can turn at anchorage to be ready for sailing.

Private Berth: Saltworks Wharf, length 52 m. Owned by S.S.S.I.M. Tel: 411904. Telex: 7472 SG.

MEDICAL: Yellow fever vaccinations only at Dakar. No hospital facilities.

DENSITY: 1025 – 1035.

FRESH WATER: Available at 10 t.p.h.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Arranged by Agent.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCES: Tobacco, no restrictions; Customs control on board (Declaration on manifest). Crew going ashore only allowed cigarettes marked "Vente au Senegal". Wine and/or Spirit, not limited, Customs controlled.

CONSULS: None (Dakar only). French Consulate Agent: Leon Masfrand, Tel: 412176.

REPATRIATION: Not possible (Dakar only).
AIRPORT: None.
TIME: GMT throughout year.
HOLIDAYS: Independence Day (4th April) no loading. Tabaski (dependent on moon phase).
FIRE: Tel: 324.
TELEPHONES: Not possible to place on board.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Not necessary.
REGULATIONS: Vessels must hoist Senegalese flag and notify Agent before entering port.
AUTHORITY: Harbour Master, Rue de la Residence, Kaolack, Senegal. *Tel:* 411915.

AGENT: See "Dakar".

NOTES

Republic of Seychelles

PORT VICTORIA, Mahe: 04.37 S. 55.28 E. (See Plan)

PORT LIMITS: *Outer Harbour:* The area in Victoria Harbour between limits of the inner harbour and a line from Cedre Point to Long. 55° 29.84′ E., thence South to St. Anne Island Shore, thence S.S.W. until Rochon Bridge bears West, then West until Victoria Lighthouse bears North.

DOCUMENTS:

Maritime Declaration of Health – forms obtainable from Medical Officer/Chief Environmental Health Officer.

Derat Certificate.

5 Crew Lists and Passengers' Lists.

Dangerous Cargo List.

Ship's Register.

Crew Declaration Form.

Declaration of Stores and high dutiable goods.

Parcels List.

Firearms List.

List of Animals remaining on board.

Un-manifested Cargo List.

Cargo Manifests.

Clearance from last Port.

PILOTAGE: Compulsory in Inner and Outer Harbour for any vessel of or exceeding 150 g.r.t.

24 hours' notice, giving draft and length. Telegraphic address "Demarine" through Cable & Wireless (on schedule 500 kHz and 8714 kHz. Schedule published in Radio List. Harbour Control equipped with VHF Channels 16, 12 and 6).

Pilot Boat: White hull with white cabin, orange top, flying "H" flag.

Signals for Pilot: "G" by flag and/or whistle.

Pilot Boarding Ground: The Pilot boards vessels about 6 cables Northward of the outermost buoy (Fairway buoy) in position 4° 35.7′ S., 55° 29.6′ E. There is no night pilotage. Pilot can board in almost any weather. While awaiting Pilot; vessel can anchor in any suitable anchorage in the pilotage area. Vessels should call "Victoria Harbour Control" on VHF, Channel 16, 2 hours before arrival.

ANCHORAGES: Masters of all vessels are requested not to anchor on the leading marks or in any other position so as to block the entrance channel.

The following anchorages are available in the Outer Harbour.

(i) Victoria Lighthouse bearing 238° True. Distance 9.75 cables in depths of 20 m. to 22 m.

(ii) Victoria Lighthouse bearing 232° True. Distance 1 mile in depths of 22 m.

(iii) Victoria Lighthouse bearing 224° True. Distance 1.4 miles in depths of 18 m. to 20 m.

(iv) Victoria Lighthouse bearing 212° True. Distance 1.5 miles in depths of 20 m. to 22 m.

Super tankers and large vessels anchor outside the Fairway Buoy in any suitable anchorage. The Master should always contact Harbour Master for anchorage instructions.

APPROACHES: *Notice to Mariners No. 1013(P)/86:*

Indian Ocean – Seychelles – Mahe – Port Victoria – Routeing System.

The following announcement has been made by the Department of Transport, Port and Marine Services Division, Seychelles.

"A routeing system for approaches to Port Victoria, Mahe, Seychelles has been adopted.

All vessels calling to and from Port Victoria are required as far as practicable to stay within an area bounded by lines joining the following Geographical points. Points (1), (2), (3), (9) and (10) demark the Northern Approach and Points (3), (4), (5), (6), (7) and (8) demark the Southern Approach."

(1) 3° 43.0′ S., 55° 33.0′ E.
(2) 4° 26.0′ S., 55° 32.0′ E.
(3) 4° 30.0′ S., 55° 39.0′ E.
(4) 4° 51.0′ S., 55° 42.5′ E.
(5) 5° 16.5′ S., 55° 30.0′ E.
(6) 5° 13.0′ S., 55° 23.0′ E.
(7) 4° 48.5′ S., 55° 34.5′ E.
(8) 4° 37.0′ S., 55° 33.5′ E.
(9) 4° 33.0′ S., 55° 26.0′ E.
(10) 3° 43.0′ S., 55° 25.0′ E.

Charts affected: 742, 740, 721.

Harbour Master, Dept. of Transport, Seychelles. (H. 5775/82.)

RESTRICTIONS: All shipping movement in Inner Harbour to take place during daylight hours only. In Outer Harbour, night movement at discretion of Master after consultation with Harbour Master. No tide restrictions.

There is berthing space available for vessels with draft over 9.5 m., but not exceeding 12.0 m. This is between bollards No. 12 and No. 20, a distance of 123 m., at the Southern end of the quay. Vessels exceeding 123 m. with draft of 9.5 m. to 12.0 m. overhang the quay to the South and lines are made fast on shore bollards.

Under these circumstances vessels which overhang come starboard side to and the port anchor is used. This system is mainly used for tankers as the connecting discharge pipe ashore only needs to be in line with the ship's manifold. Cargo ships coming in at a deeper draft than 9.5 m. and less 12.0 m. can be docked. However it must be noted that cargo cannot be discharged from all hatches that overhang and the ship will have to be turned at a certain stage of discharging.

HEALTH: "Q" Flag or international red over white. Medical Officer/Environmental Health Officer may board vessels at anchor and before entering Inner Harbour. Crew Lists with vaccination dates against yellow fever and cholera if vessel from infected places. Health clearance given at Port Victoria only, health clearance may be given at outer islands by prior arrangement. Hospital facilities available. Vessels proceeding to the Inner Harbour may be disinsectised. Radio Pratique may be granted on request to "Port Health" – Ministry of Health.

No animal/pet of any description is permitted to be landed ashore or on the wharf as per Seychelles Quarantine Regulations. Necessary action will be taken against any Master who disregards these instructions in addition to the possibility of destroying any such animal or pet found ashore.

RADIO/VHF: Cable and Wireless, Port Victoria, Mahe. Call sign ZCQ. The Harbour Master's Office, call sign, "Harbour Control" keeps a 24 hour watch on VHF Channel 16 and Channel 12. Any further information can be obtained by calling up Harbour Control on Channel 16. Other Channels available – 12 and 6.

TUGS: 2×1,200 b.h.p. twin screw tugs and 1×2,000 b.h.p. twin screw tug in operation. Vessels of up to 800 ft. are able to berth alongside.

BERTHING: Due to limited space no berth can be reserved either alongside or at anchorage. All assistance given to position every ship in best available place.

Mahe Quay is in full operation. Two vessels can berth alongside. Berth No. 1 is allocated to oil and cement tankers and Berth No. 2 to cargo and passenger ships. Total length 374 m. Maximum depth of water at all berths is 35 ft. There are connections for fuel, fresh water and telephones at all berths. Passenger terminal, Port Offices and Customs are situated at the New Port area.

Masters and Officers of vessels moored at the 2 above mentioned places are reminded of the importance of tending moorings at frequent intervals.

Slack lines present a hazard to the safety of vessels moored alongside.

In the case of tankers and bulk carriers discharging or loading, the hourly difference in draft can be considerable. It is therefore recommended that regular routine checks on moorings be carried out by the Duty Officer.

Movement of Vessels Moored at Mahe Quay, Commercial Port, Fishing Port or at Anchorage. No movement of any vessel moored at the above mentioned places is permitted without authorisation from the Harbour Master. Ship's boats or lifeboats are not to be used as plying boats or on excursions to nearby islands.

Loading and discharging by ship's gear. Equipment available to handle 20 ft. and 40 ft. containers.

STEVEDORES: ETA advice required two to three days before ship's arrival in port. Loading and Discharging: General Cargo: average 8 to 10 t.p.h. per gang (subject weather conditions). Bagged Cargo: average 10 to 15 t.p.h. per gang (subject weather conditions).

TANKERS: Max. LOA 210 m., max. beam 30 m. Discharge throughout 24 hours. Discharge lines 8 in. and 6 in.

DENSITY: Average 1025 at all states of tide.

FRESH WATER: In good supply. By mains when alongside and steel barges when at anchor. All water supplied is chlorinated. One special steel water barge with capacity of 50 tons with pumping capacity of 40 t.p.h. Vessels should request water at least 72 hours before arrival.

FUEL: Gas oil Kinematic CS at 40°C. = 3.63. Due to limited stock, it is advisable to give one week's notice, preferably through nomination addressed to Mahe Bunkering Company.

Intermediate Fuel oil now available on North end of berth only. (Fuel oil 180 centistoke). Pour point 70 max. – Kinematic 180 max. – restriction on flow of delivery pending improvement of facilities.

CONSULS: *Embassies:* China, Cuba, France, Libya, U.S.A., U.S.S.R.

High Commissions: Great Britain, India.

Consuls: Belgium, Cyprus, Denmark, Fed. Rep. of Germany, Italy, Malagasy Rep., Mauritius, Netherlands, Sweden, Switzerland.

REPAIRS: Slipways for vessels under 300 g.r.t. Mechanical engineering and fabrication. Electronic and electrical engineering. Commercial diving services (hull cleaning, inspection and repairs). Shipchandling (marine equipment).

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Customs Officer on duty at all times if vessel is discharging cargo.

OPENING/CLOSING HATCHES: Normally carried out by ship's own crew.

CUSTOMS ALLOWANCES: At Custom Officer's discretion.

CARGO GEAR: All cargo slings and gear supplied by ship.

REPATRIATION: Crew changes possible. Undertaken by Agents in connection with Immigration Authorities.

AIRPORT: In operation. Several flights weekly.

TIME: GMT plus 4 hours, throughout year.

HOLIDAYS: New Year (1st and 2nd January); Good Friday; Corpus Christi (15th August); Labour Day (May 1st); Liberation Day (June 5th); Independence Day (June 29th); Assumption Day (August 15th); All Saints' Day (November 1st); Immaculate Conception (December 8th); Christmas Day (December 25th).

POLICE/AMBULANCE/FIRE: Emergency: Ring 999 otherwise Police 22011 and Hospital 24400.

A telephone is placed on board ships alongside. Rate Rs 50/- per day.

SERVICES: No tank-cleaning equipment, no facilities for discharge of tank washing, no compass adjusting, radar or radio engineer available for small repairs.

SHORE LEAVE: All members of the crew are allowed ashore. No limit to shore leave. Crew to be in possession of identity card or discharge book.

IDENTIFICATION CARDS: See "Shore Leave".

DELAYS: Berthing: Limited berth. Loading or discharging: Weather conditions. Bunkering: Space alongside.

SAFETY: There shall be no smoking on board vessels carrying petroleum products, chemicals or LPG except in such safe places as may be approved jointly by the Master and Harbour Master. Responsibility for ensuring that the crew of the vessel are informed of the safe places so approved, and that the regulations are complied with, rests with the Master. Such vessels when berthed alongside a quay must have the eye of a wire hanging over the outside bow and quarter to enable tugs to connect up readily in an emergency. The said wire must be suitable for such purposes and shall have sufficient scope on deck for free running.

Engines are not to be immobilised whilst the vessel is berthed alongside the wharf without prior authorisation from the Harbour Master.

Any unsafe condition or action observed on board a vessel will result in immediate cessation of cargo or bunkering operations until such condition or action is corrected. Continued or blatant disregard of these requirements by any ship will result in the removal of the ship from berth or quay at the cost of the vessel and the Owners/Operators/Charterers informed of the circumstances.

Use of radar and radio transmitter forbidden whilst alongside the wharf.

Portable R/T sets or transceivers must be of an approved design and those used on tankers must be intrinsically safe.

POLLUTION: All ballast discharged over the side must be clean and entirely free from petroleum products of any description in accordance with the Marine Pollution Regulations of 1981. No dirty ballast is to be pumped overboard as per Laws of Seychelles Cap. 210 Section 18. This includes brine from fish tanks in which fish have been stored. All Masters are advised to familiarise themselves, through their respective Agent, with the Marine Pollution regulations 1981. The Master of a vessel found guilty under these Regulations is liable to imprisonment for five years and to a fine of two hundred thousand Seychelles Rupees in addition to costs for cleaning up operations, environmental damages and commercial loss.

Whilst transferring fuel and/or taking bunkers all scuppers must be effectively plugged to prevent accidental discharge of oil into the sea.

SHIP SUPPLY SERVICE: Ship Supply Services can be made by prior arrangements with any shipping Agencies by using fast hire crafts, which are allowed to operate within a range of 60 miles Mahe to any given rendezvous.

List of Shipping Agents:

M/S Union Lighterage Co. Ltd., P.O.Box 38, Victoria, Mahe, Seychelles.

Hunt Deltel & Co. Ltd., P.O.Box 14, Victoria, Mahe, Seychelles.

Mahe Shipping Co. Ltd., P.O.Box 336, Victoria, Mahe, Seychelles.

Union Trading Co. Ltd., Victoria, Mahe, Seychelles.

Harry Savy & Co. Seychelles (Pty) Ltd., P.O.Box 20, Victoria, Mahe, Seychelles.

M/S Allied Agencies Ltd., P.O.Box 345, Mahe, Seychelles.

REFUSE: No refuse to be dumped in the harbour and approaches. When alongside Mahe Quay garbage must be placed in plastic bags and be disposed through a licensed garbage collector at a fee.

AUTHORITY: Department of Transport, Port and Marine Services Division, P.O.Box 47, Mahe, Seychelles, Indian Ocean. *Tel:* 22311, 22800. *Telex:* 2329 Tratur Sz. *Cables:* Demarine. *FAX:* 24004. *Contact:* S.A.G. Andrade, Port Director. Captain J.P. Grandcourt, Senior Harbour Master – Pilot.

NOTES

Please also advise Shipping Guides Ltd.

Sierra Leone

FREETOWN: 08.30 N. 13.14 W. (See Plan)

DOCUMENTS:
5 Crew Lists.
5 Ports of Call Lists.
5 Passengers in Transit Lists.
5 Passengers Landing Lists.
1 Crew Declaration (signed by crew members).
1 Stores List.
1 Arms & Ammunition List.
1 Port Health Declaration.
1 Vaccination List (cholera and yellow fever).

Port Health Declaration, Crew Declaration Form and Arms and Ammunition List, all special forms, which obtained from boarding party or, if required, mailed in advance to ship's Owners.

1. *For Vessels Working Cargo (Discharging):*
   - *(a)* From each port of loading, by air mail to vessel's Agent: 2 copies of Cargo Manifest, 1 copy of Freighted Manifest.
   - *(b)* On arrival: 5 copies of Cargo Manifests, 1 copy each Bill of Lading (non-negotiable).

Note: Customs and Port Authority insists on documents in English, and that Manifests should show weights and measurements. Non-compliance with these instructions places vessel's Agent in difficult position, and vessel may not discharge without payment of fine.

2. *Required by Port and Stevedores for Vessels Working Cargo:* 4 copies Stowage Plan, 4 copies Hatch Lists. List of all lifts over 3 tons.

PILOTAGE: Vessels may at present enter and leave port anchorage without Pilot. Pilotage only compulsory for vessels berthing alongside Queen Elizabeth II Quay, Kissy Oil Jetty, vessels over 20,000 tonnes Summer deadweight and vessels over 30 ft. draft. Upon Master's request, Pilot available at Fairway Buoy with 24 hours' notice. Normally only during daylight hours. Port entrance is between Cape Sierra Leone to South and Fairway Buoy to North. Is approx. 1 mile wide and minimum draft 38 ft. To West harbour is protected by sand shoals, nearest to entrance is O'Farrell Shoal about 1.5 miles North of Cape Sierra Leone.

Pilots board from a launch painted black, with "Pilot" in black on both sides of superstructure on a white background.

Pilot Office will give an anchorage to every vessel arriving or, if a vessel is berthing on arrival, will advise where the Pilot is boarding. This is normally off the quay. The Signal station is equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication.

The Pilot Office, Queen Elizabeth II Quay, is also equipped with VHF, standing-by on Channel 16, switching to Channel 12 for communication. The Port Operations Manager is available on VHF Channel 10.

ANCHORAGE: With Falconbridge Point Beacon bearing as follows (all bearings true): Note: Falconbridge Point Beacon circular steel tower 8 ft. high, painted white with 2 horizontal black bands; Fl. white every 2 seconds.

Anchor Berth	*Bearing (T)*	*Distance (Cables)*	
E. 3	138	10.5	
E. 4	154	9	
E. 5	180	8	
E. 6	207	8	
F. 5	136	7	
F. 6	154	6	
F. 7	184	5	
F. 8	210	5	
F. 9	232	7	
F. 10	242	9	
F. 11	249	11	
G. 1	099	15	
G. 2	100	12	
G. 3	104	7	
G. 4	126	3	
H. 1	184	2	
H. 2	234	3	
H. 3	252	5	
H. 4	258	7	
B. 1	236	11	(Vessels bunkering ex-barge)

With Cline Point bearing as follows:

Anchor Berth	*Bearing (T)*	*Distance (Cables)*
D. 1	232	5.5
D. 2	253	7
D. 3	253	3
D. 4	273	5.5
C. 1	244	4
C. 2	270	5
B. 2	280	7.25

With Kissy Oil Jetty bearing as follows:

Anchor Berth	*Bearing (T)*	*Distance (Cables)*
B. 2	235	1 mile

No draft restriction at anchorage, also no length and beam restrictions and vessels can arrive and sail any hour day and night.

RESTRICTIONS: *Draft Limits for Deep Laden Vessels:*
Draft Limits: 38 ft. (11.6 m.) plus height of tide to a maximum of 48 ft. (14.6 m.).

Time Limits:
1. From 5 hours Flood Tide to HW.
2. From LW to 1 hour Flood Tide.
3. During hours of daylight only.

Vessels of 36 ft. draft and over must keep to the time limits.

Vessels of under 36 ft. draft may navigate the channel at any time but attention is drawn to the strong cross currents.

(H.M.S. Hydra has commented strongly on this danger).

HEALTH: Pratique by radio or on boarding. See "Agent's Cable Requirements".

RADIO: *Freetown Radio, Coast Station:* Watch is maintained on 500 kHz from 0700 – 2200 hrs. GMT on week-days, and 1200 – 1400 hrs. GMT on Sundays and Public Holidays.

The working frequency is 421 kHz and traffic lists are broadcast on this frequency after preliminary announcements on 500 kHz at 0730, 0830 hrs., etc.: up to 2130 hrs. GMT. On Sundays and holidays, traffic lists are broadcast at 0800, 1200 hrs. and 1700 hrs. GMT.

Time GMT	*9LL Freq.*	*Search-band for reply*
0800 – 0900 hrs. 1300 – 1430 hrs. 1700 – 1830 hrs.	6411	6 MHz
0900 – 1000 hrs. 1200 – 1300 hrs. 1830 – 2000 hrs.	8710	8 MHz
1000 – 1100 hrs. 1530 – 1700 hrs.	13042.5	12 MHz

On Sundays and other holidays the H.F. Schedules are as follows:—

0830 – 0900 hrs.	8710	8354 to 8374 kHz
0930 – 1000 hrs.	13042.5	12531 to 12561 kHz
1330 – 1400 hrs.	6411	6 MHz
1600 – 1630 hrs.	13042.5	12531 to 12561 kHz
1700 – 1730 hrs.	8710	8354 to 8374 kHz

Traffic lists are broadcast at the commencement of every HF Schedule and repeated at intervals during the Schedule.

Ship's Radio Telephone and Harbour Service: Watch is kept on 2182 kHz for casual R/T traffic from 0800 – 2000 hrs. GMT on weekdays, and 0800 – 1730 hrs. GMT on Sundays and holidays.

Ships are advised to arrange their calls in advance by W/T where possible so it can be ensured that the called party is available. Calls can be connected to or from any number on the Freetown Telephone Exchange. Longer range contacts should be in the 8 MHz maritime band, the frequency of 9LL in this band being 8768.9 kHz.

Other Services: Navigational warnings issued from time to time by the Harbour Master are broadcast on W/T. Spoken telegrams are accepted at ordinary W/T rates on RT.

VHF: *Freetown Radio:* A 24-hour watch is kept on Channel 16 switching to Channel 26 for communication. Calls can be connected to the Freetown Exchange. Masters are advised the fullest use should be made of this service, particularly after office hours and during the early hours of the morning or late at night when no cable service is available. The Authority tugs are also equipped with VHF, watch being kept on Channel 16 switching to Channel 12 for communication.

Signal Station	Channel 16
Pilot Office (Freetown Pilot)	Channel 16
Harbour Master	Channel 16

AGENT'S CABLE REQUIREMENTS: Masters requested cable ETA as early as possible. Following information required:

(a) For vessels working cargo: 1. Discharge or Loading Hatch distribution. 2. Gangs required. 3. If Explosives on board for Freetown or in transit.

(b) For vessels bunkering: Bunkers and water required.

(c) For Tankers discharging: 1. Total Displacement. 2. Draft. 3. Cargo particulars (quantity and grade).

(d) For vessels embarking/disembarking Krooboys: 1. If Krooboys provisions required and for how long. 2. Cash requirements. 3. If service on arrival if arriving between 2200 hrs. and 0700 hrs., bearing in mind the high costs for Customs overtime and port service.

(e) In general: 1. Cash requirements. 2. Water requirements. 3. Medical attention, if required on arrival.

When ETA received and confirmed Agent will cable vessel informing despatch prospects and if not berthing on arrival, anchor berth.

Note: For vessels returning to Freetown from round trip to coast, information should be cabled if any over-carried cargo, etc., to be discharged.

TUGS: 1 seagoing tug available, *Sewa* (2,200 h.p.).Tug has twin-screw with diesel engine and is equipped for salvage having fire-fighting equipment and a 10 ton derrick. Normally tug used for berthing and unberthing operations. Charges for berthing and unberthing include use of a tug, whether required or not.

BERTHING: All alongside berths: between hours of 0630 and 2230. Vessels may request berthing after 2230 hrs. from Harbour Master's office. Kissy Oil Jetty; max. displacement – 46,000 tons, max. draft 39 ft., berthing flood-tide only.

Queen Elizabeth II Quay No. 1: Berthing length: no restriction; breadth: no restriction; max. draft 31 ft. 6 in. At this draft vessels must be 180 ft. from steps East end of quay. Vessels up to draft not exceeding 24 ft. may berth as far East as steps. Unberthing not permitted from 1 hour after HW until 1 hour after LW.

Berth No. 1A: As for Berth No. 1, max. draft 31 ft. 06 in.

Berth No. 2: Berthing and unberthing, length and breadth no restrictions. Max. draft 31 ft. 06 in. No tidal restrictions.

Berths No. 3 and 4: Max. draft 32 ft. 06 in.

Berth No. 5: Max. draft 31 ft. 06 in. – 32 ft. 06 in.

Berth No. 6: Max. draft 24 ft.–25 ft.

Facilities for loading palm kernel oil available only at Berth No. 1.

Bulk Grain: Berth No. 1 is equipped for discharging grain in bulk through a conveyor built on Shed No. 1 to the Flour Mill. The actual discharge is effected by mobile vacuvators. Four such units are available with total potential of 80 t.p.h., though a more realistic figure would be in the region of 60 – 70 t.p.h. Grain vessels are worked around the clock.

King Tom Jetty: Berthing *not* allowed.

Dispensation will only be granted in exceptional circumstances to berth or unberth vessels before 0600 hrs. and after 2330 hrs.

During discharging and/or loading, Customs Officers, normally 2, as well as 2 Port Authority Discrepancy Clerks (only when discharging) will be on board.

Sherbro River: Anchorage daylight only. Length of vessel up to 470 ft. Breadth, no restrictions. Max. draft, 24 ft. 06 in. The passage between Buoy No. 1 and Buoy No. 8 and between No. 1 Buoy and Yangsai Anchorage must be navigated in daylight hours only.

The Channel between Buoy Point and Yangsai must be navigated only during period 2 hours to H.W., and on a rising tide, buoy point being area which restricts draft. Bagru River Anchorage Buoy No. 8, length and breadth unlimited. Max. draft 24 ft. 06 in. Limitations as regards vessel's dimensions, drafts and times at which movements may be carried out should not be deviated from without prior permission of the Harbour Master.

MECHANICAL EQUIPMENT:

Type	*Capacity*	*Complement*
Portal Quay Cranes	3 tons	2
Portal Quay Crane	5 tons	1
Mobile Crane	15/30 tons	1
Mobile Cranes	4 tons	9
Mobile Cranes	5 tons	2
Mobile Cranes	7 tons	2
Fork Truck	10 tons	1
Fork Trucks	4,000/5,000 lbs.	34
Tractors	—	15
Trailers	6 tons	17
Trailers	8 tons	1
Trailers	10 tons	12
Trailers	20 tons	18
Trailers (Pole)	10 tons	2
Fire Engine	—	1
Container Handlers	26 tons	3

Berths No. 3 to 6 are not equipped with Portal Cranes.

DANGEROUS CARGO: Dangerous cargo, explosives, small arms, ammunition, *must not* be unloaded alongside unless Port Authority has been notified on approved form, and has given permission for cargo to be discharged. Vessels should cable prior arrival if dangerous cargo for discharge on board.

STEVEDORES: (See "Agent's Cable Requirements") ETA as soon as possible. Discharge/loading hatch distribution. Gangs required. Bunkers and water requirements, information re explosives. For tankers discharging – total displacement and draft. Work ashore undertaken by Sierra Leone Ports Authority on cargo quay, Queen Elizabeth II Quay, whilst work on board as well as discharging and/or loading to or from vessels at stream undertaken by Sierra Leone Ports Authority stevedoring division.

Working hours alongside quay: Normal working hours from 0800 hrs. to 1200 hrs. and 1330 hrs. to 1700 hrs. Monday to Friday.

No meal-break but the hour 1200 hrs. to 1330 hrs. counts overtime.

Working at Stream: Discharging and/or loading to or from vessels effected 24 hours a day. Gangs can be arranged at anytime between 0730 hrs. and 1800 hrs. week-days. On Sundays and holidays work must be arranged on the previous day.

MEDICAL: Hospital facilities available.

TANKERS: *Kissy Oil Jetty:* In order that berthing/unberthing operations at Kissy Oil Jetty are carried out without delay Agencies are requested to furnish to the Harbour Master the following particulars, of vessel using Kissy Oil Terminal.

ETA: At least 24 hours' notice to be given.

Displacement and deadweight: The max. permitted displacement is 46,000 tons.

Draft forward and aft: Max. draft 11.90 m. (39 ft.).

Length overall: No restriction.

The time of berthing will be at the discretion of the Port Authority, dependent on tidal and weather conditions, and vessel's draft. This is normally on a flood tide and during daylight hours only.

Notice: Port Authority Circular No. HM/241/354 dated 14th January 1981.

Oil Tankers Berthing Kissy Oil Jetty: In view of the strain experienced on the forward back springs during ebb tide on above-named jetty, vessels are to moor using double or more forward back springs.

This is necessary to avoid any damage to the discharge/loading arms on jetty.

Agents are advised to inform shipping companies that vessels are required to carry the necessary extra mooring ropes or wires.

Port Authority Pilots are to ensure prior to berthing vessels that sufficient moorings are onboard for extra forward back springs and separate bollards on jetty head are used for each spring.

DENSITY: 1018 to 1025.

FRESH WATER: Good fresh water is available at all quay berths and at Kissy Oil Jetty.

(Supply Rates:	Old berths	Approx. 20/25 t.p.h.
Dependent on	New berths	Approx. 40/50 t.p.h.
Ship's intake)	Kissy Oil Jetty	Approx. 15/20 t.p.h.

FUEL: Available at Kissy Oil Jetty and Q.E.II Quays. Gas oil available by tanker truck.

DRY DOCKS: No dry docks in Freetown. Slipway of 600 tons capa

SURVEYORS: Mining and General Services Limited, P.O.Box Freetown. Telex: 3226. Cables: Mags. They are Lloyd's Agents undertake cargo surveys.

A Lloyd's Register approved surveyor is available.

GANGWAY/DECK WATCHMEN: Strongly recommended, avail through Agent. It is suggested that gangway is raised after close of w The Port Authority operates a patrol boat with security personne combat piracy.

Piracy: Acts of piracy have taken place alongside and whilst ve approaching Pilot. Crew members have sustained injuries.

OPENING/CLOSING HATCHES: By stevedores, except mechar hatches.

CERTIFICATES:

Ship's Register.
Derat Certificate.
Deck Passengers Certificate.
Radio Certificate.

CUSTOMS ALLOWANCES: Tobacco, 40 cigarettes *or* 0.25 lb toba Wine and/or Spirits, 0.25 bottles of spirit. Master — 200 cigarettes 1 opened bottle of spirit.

REPATRIATION: Can be arranged.

AIRPORT: By bus and ferry to Lungi Airport, 1 hour journey by helico from Aberdeen. Served by regular airlines.

TIME: GMT throughout year.

HOLIDAYS: Several religious and anniversary holidays. Port w every day except Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: For all emergencies dial 009.

EMERGENCY CO-ORDINATION CENTRE/S.A.R. LINK: Sierra Le Ports Authority. Telex: 3262. Cables: Portman Freetown.

TELEPHONES: Not available for placing on board.

SERVICES: Tank cleaning. Tank and hull scaling.

BANKS: Barclays Bank of Sierra Leone, P.O.Box 12, Siaka Ste Street, Freetown.

Bank of Credit and Commerce International, Sparta Building Wilberforce Street, Freetown. Telex: 332.

Standard Bank Sierra Leone Ltd., Lightfoot Boston Street, Freet

STORING: Moderate quantities of stores are available and can be ta ex-quay. However no bonded stores' facilities exist.

SHORE LEAVE: Allowed. Identity cards must be carried.

IDENTIFICATION CARDS: Not required.

DELAYS: No delays experienced.

SHIP SUPPLY SERVICE: Contact: Offshore Services Ltd., P.O 376, Freetown.

DEVELOPMENTS: It is the Port Authorities' intention to surface the and rear stacking areas at Berths No. 5 and 6 for use as a conta park.

GENERAL: Always confirm time of entering harbour with the Aberd Hill Signal Station to ensure turn for berthing. Draft should be indica

AUTHORITY: Sierra Leone Ports Authority, P.M.Bag 386, Freet Sierra Leone. *Tel:* 50989, 50033 and 50111. *Telex:* 3262. *Ca* Portman Freetown. *Contact:* Captain P.E.M. Kemokai, Harbour Ma

AGENT: Sierra Leone Shipping Agencies Limited, P.O.Box No. Freetown, Sierra Leone. Tel: 50881/50528. Telex: 3260/3225. 50882. Cables: "Seaborne Freetown".

PEPEL: 08.34 N. 13.04 W.

LOCATION: On Sierra Leone River, 15 miles upstream from Freet Approach Channel between Freetown anchorage and Pepel is buoyed. No night navigation.

DOCUMENTS: See "Freetown".

PILOTAGE: Private pilotage undertaken by mining Company's P who board at Freetown Anchorage. 48 hours ETA required, cable "M Freetown Sierra Leone", giving ETA Fairway Buoy, quantity water required, asking for Free Pratique, and if Pilot required to Free Anchorage.

ANCHORAGE: See "Freetown".

RESTRICTIONS: Draft only, decided at discretion of Berthing Ma Entry daylight hours only. Channel between Pepel and Freetown is deepened so that depth in channel is 38 ft. plus height of tide. Accor to official tide tables, range of high tides is approximately 7 ft. to 1 above Admiralty Chart Datum.

MAX. SIZE: Length 840 ft., beam 128 ft., water depth 38 ft.* plus he of tide which ranges from 7 ft. to 11 ft. above Chart Datum. Septem to December additional draft restrictions due channel silting.

*The channel has not been maintained since 1975. Dredging take place.

HEALTH: See "Freetown". 48 hours advance warning for Free Prat

TUGS: Not used.

BERTHING: Milton Margai Pier only. Loading up to 3,000 t according to size of vessel.

New dolphin mooring system installed to permit handling larger s Depth alongside 45 ft. Shiploader max. boom height when in horizo position is 71 ft. above Chart Datum, with max. outreach 87 ft. berthing line. Loading rate 4,000 t.p.h. Under the new conditions, lim dimensions for ships (which must be equipped with satisfactory mo equipment): LOA 840 ft. Moulded breadth 128 ft.

Permissible sailing draft with allowance made for safe navigatio all ships will, as at present, remain absolutely at discretion of Ber Master at Pepel or his deputy. It is possible that during the month September to December every year an additional draft allowance have to be imposed by reason of seasonal silting of the channel, is intended to carry out annual maintenance dredging.

Company will be prepared to consider acceptance of ships having dimensions in excess to those above but only after specific approval of fully detailed plans of each ship concerned and, in any event, not in excess of dimensions: LOA 870 ft., moulded breadth 136 ft., moulded depth 73 ft.

Berthing displacement 63,000 tons on an even keel ballast draft of 23 ft. forward and aft on berthing.

STEVEDORES: Available.

FRESH WATER: Available, 48 hours' notice required.

FUEL: Limited supplies available, 48 hours' notice required.

TIME: GMT throughout year.

TELEPHONES: None available.

SHORE LEAVE: Not allowed. Customs and Immigration regulations prohibit any member of crew from disembarking at jetty or other works.

DELAYS: First come first served.

GENERAL: See "Freetown" for all general information.

Singapore

SINGAPORE (incl. Jurong, Pulau Bukom, Pulau Ayer Chawan, Sembawang and Tanjong Penjuru): 01.16 N. 103.50 E. **(See Plan)**

DOCUMENTS:
4 Ship's Passenger Lists (1 copy for Customs).
4 Crew Lists (1 copy for Customs).
5 Cargo Manifests.
3 copies of Customs Declaration for fresh issue of duty free liquor and tobacco Form (C and E 117) to be furnished by Master to Customs boarding officers.

Master, Mate, or authorised officer required to furnish information asked for by Officer in charge of Customs' Boarding Party for Boarding Officer's Report (this only required if ship is to be searched).

Immigration: 6 copies Crew List and 4 copies each of Disembarking and Through-Passenger Lists on arrival. At departure, 2 copies Crew List and 2 copies Passenger List.

Declaration regarding presence on board of any stowaway, unauthorised person and/or repatriate.

PSA: All vessels: General Declaration on arrival or departure.

Port Health: Entry Declaration, Derat or Exemption Certificate, Yellow Fever Certificates.

Crew Lists. Passenger Lists.

PSA (The Port of Singapore Authority): Arms and Explosives, and Dangerous Goods and Petroleum Declaration.

Shipmaster's Report: August 1987.

In order to obtain vessel's clearance the agent requires – Last Port Clearance, Load Line, Safety Radio, Safety Equipment and Safety Construction Certificates; Articles of Agreement; Safe Manning Certificate; Certificates of Competency (Panamanian and Liberian ships only – not photocopies), a British Certificate will suffice if Liberian/Panamanian Certificate has not arrived; C.L.C.

Shipmaster's Report: November 1988.
2 copies Passenger List.
2 copies Crew List.
2 copies Stores List.
1 copy Stowaways List.
1 copy Arms/Ammunition List.
1 copy Vaccinations List.
1 copy Maritime Declaration of Health.

Vessels arriving to take stores and make crew changes: See "Notices" – Circular No. 121/87.

ANCHORAGES: Also see "Notices".

Port of Singapore Authority – Port Circular No. 117/87
Dated 9th December 1987.
REVISION OF ANCHORAGES

This is to inform you that the anchorages in the port will be revised with effect from 1st February 1988 as follows:

1. *EASTERN SECTOR*

1.1 *Awaiting Pilot Anchorage* is renamed *Changi General Purposes Anchorage* and is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 20.000′	104° 03.167′
01° 20.000′	104° 03.706′
01° 18.880′	104° 04.820′
01° 18.880′	104° 04.281′
01° 19.550′	104° 03.667′

Purpose: For general purposes on prior permission of the Port Master.

1.2 *Eastern Explosives Anchorage* is withdrawn.

1.3 *Eastern Petroleum 'B' Anchorage* is relocated and is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.500′	103° 59.083′
01° 17.650′	104° 01.200′
01° 16.629′	103° 59.313′
01° 16.629′	103° 59.082′

Purpose: For vessels of less than 10,000 g.r.t. loaded with Petroleum and Non-Gas-Free Vessels.

1.4 *Eastern Special Purposes Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.979′	103° 56.617′
01° 18.300′	103° 57.438′
01° 18.300′	104° 00.450′
01° 17.650′	104° 01.200′
01° 17.500′	103° 59.083′
01° 16.629′	103° 59.082′
01° 16.633′	103° 56.617′

Purpose: For vessels under Arrest, Damaged Vessels, Deep-Draft Vessels requiring repairs and other vessels on prior permission of the Port Master.

1.5 *Laid-up Vessels Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.784′	103° 56.117′
01° 17.979′	103° 56.617′
01° 16.633′	103° 56.617′
01° 16.633′	103° 67.117′

Purpose: For vessels laid-up in port.

1.6 *Small Craft Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.388′	103° 55.106′
01° 17.784′	103° 56.117′
01° 16.633′	103° 56.117′

Purpose: For harbour tugs, pontoons, barges and other small craft.

1.7 *Eastern Petroleum 'A' Anchorage* is bounded by the follow co-ordinates:

Latitude (N)	*Longitude (E)*
01° 15.426′	103° 53.921′
01° 16.123′	103° 54.988′
01° 15.058′	103° 56.165′
01° 14.418′	103° 54.982′

Purpose: For vessels of 10,000 g.r.t. and above loaded Petroleum and Non-Gas-Free Vessels.

1.8 *Eastern Quarantine and Immigration Anchorage* is bounded by following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 14.683′	103° 52.783′
01° 15.125′	103° 53.459′
01° 14.450′	103° 54.167′
01° 14.000′	103° 53.383′

Purpose: For vessels arriving from the East and see Quarantine and Immigration Clearance.

1.9 *Man-of War Anchorage* is bounded by the following co-ordina

Latitude (N)	*Longitude (E)*
01° 16.517′	103° 54.553′
01° 16.517′	103° 53.417′
01° 17.004′	103° 53.417′
01° 17.004′	103° 54.015′

Purpose: For visiting warships.

1.10 *Eastern Explosives Lighters Anchorage* is bounded by the follow co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.004′	103° 53.650′
01° 17.133′	103° 53.650′
01° 17.133′	103° 54.015′
01° 17.004′	103° 54.015′

Purpose: For small craft loaded with explosives. The maxin amount of Hazard Division 1.1 type explosives allo on board each craft is 8 tonnes Nett Explosives Qua (NEQ).

1.11 *Eastern Working Anchorage* is bounded by the following co-ordin

Latitude (N)	*Longitude (E)*
01° 17.004′	103° 53.417′
01° 16.517′	103° 53.417′
01° 16.517′	103° 54.553′
01° 16.123′	103° 54.988′
01° 14.683′	103° 52.783′
01° 14.683′	103° 52.283′
01° 15.040′	103° 51.871′
01° 16.017′	103° 51.767′
01° 16.567′	103° 52.533′
01° 16.443′	103° 52.598′
01° 16.623′	103° 52.820′
01° 16.683′	103° 52.733′
01° 17.004′	103° 53.200′

Purpose: For general purposes such as working cargo, rece stores, water and bunkers or awaiting berth.

2. *WESTERN SECTOR*

2.1 *Western Quarantine and Immigration Anchorage* is bounde the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 13.583′	103° 49.696′
01° 13.150′	103° 50.033′
01° 12.800′	103° 49.850′
01° 12.750′	103° 49.133′
01° 13.133′	103° 48.683′

Purpose: For vessels seeking Quarantine and Immigra Clearance during the North-East Monsoon.

2.2 *Western Petroleum 'A' Anchorage* is bounded by the follo co-ordinates:

Latitude (N)	*Longitude (E)*
01° 14.874′	103° 46.824′
01° 15.223′	103° 47.637′
01° 14.490′	103° 48.470′
01° 14.141′	103° 47.657′

Purpose: For vessels loaded with Petroleum and for Non-Gas- Vessels except Port Limit Tankers.

2.3 *Western Petroleum 'B' Anchorage* is bounded by the follo co-ordinates:

Latitude (N)	*Longitude (E)*
01° 14.700′	103° 46.417′
01° 14.874′	103° 46.824′
01° 14.141′	103° 47.657′
01° 13.966′	103° 47.250′

Purpose: For licensed Port Limit Tankers of 2,000 g.r.t. or les

2.4 *Western Working Anchorage* is bounded by the following co-ordina

Latitude (N)	*Longitude (E)*
01° 14.972′	103° 48.998′
01° 13.583′	103° 49.696′
01° 12.983′	103° 48.350′
01° 13.966′	103° 47.250′
01° 14.490′	103° 48.470′
01° 15.223′	103° 47.637′
01° 15.450′	103° 48.167′

Purpose: For general purposes such as working cargo, rece stores, water and bunkers or awaiting berth.

2.5 *Western Reserved Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 16.170′	103° 47.170′
01° 15.600′	103° 46.700′
01° 15.830′	103° 46.290′
01° 16.400′	103° 46.680′

Purpose: For LASH Ship operations.

2.6 *Western Dangerous Goods Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 16.250′	103° 45.640′
01° 16.710′	103° 45.050′
01° 17.020′	103° 45.020′
01° 16.550′	103° 45.640′

Purpose: For vessels loading or discharging Explosives or Group 1 Dangerous Goods or vessels in transit with such cargo onboard. The maximum amount of Hazard Division 1.1 type explosives allowed on board each vessel is 50 tonnes Nett Explosives Quantity (NEQ).

2.7 *Pasir Panjang Coastal Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 16.400′	103° 46.680′
01° 15.830′	103° 46.290′
01° 16.120′	103° 45.820′
01° 16.250′	103° 45.640′
01° 16.550′	103° 45.640′
01° 17.020′	103° 45.020′
01° 17.300′	103° 45.000′
01° 17.300′	103° 45.280′
01° 17.060′	103° 45.280′

Purpose: For vessels working cargo overside by means of lighters.

2.8 *Pasir Panjang Lighter Mooring* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.133′	103° 45.383′
01° 17.283′	103° 45.450′
01° 17.267′	103° 45.583′
01° 17.350′	103° 45.817′
01° 17.350′	103° 46.167′
01° 17.150′	103° 46.533′
01° 17.017′	103° 46.700′
01° 16.717′	103° 46.500′
01° 17.050′	103° 45.933′

Purpose: For the mooring of licensed wooden lighters.

2.9 *Selat Pauh Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 13.183′	103° 45.617′
01° 12.817′	103° 44.650′
01° 12.817′	103° 43.666′
01° 13.050′	103° 43.033′
01° 13.583′	103° 42.783′
01° 13.783′	103° 43.150′
01° 13.483′	103° 43.850′
01° 13.317′	103° 45.017′
01° 13.417′	103° 45.567′

Purpose: For vessels under Arrest, Laid-up or other vessels on prior permission of the Port Master.

3. *JURONG SECTOR*

3.1 *Sultan Shoal Quarantine* and *Immigration Anchorage* is withdrawn.

3.2 *West Jurong Petroleum Anchorage* is renamed *Sultan Shoal Petroleum Anchorage* and relocated to an area bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 13.919′	103° 37.257′
01° 14.511′	103° 38.811′
01° 13.733′	103° 39.850′
01° 13.350′	103° 39.058′

Purpose: For vessels loaded with Petroleum and for Non-Gas-Free vessels.

3.3 *LNG/LPG/Liquefied Chemical Gas Carriers Anchorage* is relocated and is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 14.900′	103° 36.500′
01° 14.900′	103° 36.800′
01° 14.205′	103° 36.775′
01° 14.367′	103° 36.500′

Purpose: For Non-Gas-Free Liquefied Petroleum Gas Carriers, Liquefied Natural Gas Carriers and Liquefied Chemical Gas Carriers.

3.4 *Tuas Explosives Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 16.295′	103° 36.500′
01° 16.295′	103° 37.525′
01° 15.643′	103° 37.525′
01° 15.643′	103° 36.500′

Purpose: For vessels loading or discharging Explosives and Group 1 Dangerous Goods or vessels in transit with such cargo on board. The maximum amount of the Hazard Division 1.1 type explosives allowed on board each vessel is 500 tonnes Nett Explosives Quantity (NEQ).

3.5 *Tuas Explosives Lighters Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.000′	103° 36.500′
01° 17.000′	103° 36.716′
01° 16.295′	103° 36.716′
01° 16.295′	103° 36.500′

Purpose: For small craft loaded with explosives. The maximum amount of the Hazard Division 1.1 type explosives allowed onboard each craft is 60 tonnes Nett Explosives Quantity (NEQ).

3.6 *West Jurong Anchorage* is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 17.000′	103° 36.716′
01° 17.000′	103° 38.800′
01° 14.900′	103° 38.800′
01° 14.900′	103° 36.500′
01° 15.643′	103° 36.500′
01° 15.643′	103° 36.525′
01° 16.295′	103° 37.525′
01° 16.295′	103° 36.716′

Purpose: For vessels awaiting berth, working cargo, vessels under repairs, or for the mooring of oil rigs.

4. Port Circulars No. 14 of 1986
No. 36 of 1987
No. 43 of 1987
No. 51 of 1987 will be superseded with effect from 1st February 1988.

PILOTAGE: Also see "Notices".

Port of Singapore Authority – Port Circular No. 108/87 Dated 20th November 1987.

1. This Port Circular supercedes Port Circular No. 43 of 1983.

2. *GENERAL*

2.1 In exercise of the powers conferred by subsection (1) of section 84 of the Port of Singapore Authority Act (Cap. 236), it is directed that all vessels specified in in paragraph 4 below, unless exempted by the Authority, are to be under pilotage by an Authority Pilot when moving within the Pilotage District. This directive will come into force with effect from 1st December, 1987.

2.2 Vessels belonging to or operated by the Port of Singapore Authority and the Republic of Singapore Navy are not subjected to this directive.

3. *DEFINITIONS*

3.1 *Pilotage District*

The Pilotage District is described in the Port of Singapore Authority (Pilotage District) Notification 1980. For the purpose of this circular, the Pilotage District is divided into four areas viz., "A", "B", "C" and "D". These areas are defined in Annex I and depicted in Annex II, (see "Plan").

Port Circulars Nos. 58 of 1983, 21 of 1985 and 22 of 1985 are hereby superseded.

3.2 *Height:* The height of vessel referred to in this circular shall be the height of the vessel measured vertically from the waterline of the vessel to the highest point of the vessel including its cargo, structures or equipment on board.

3.3 *Beam:* Beam of vessel referred to in this circular, shall be the maximum breadth of the vessel including protruding structure(s) on the side(s), if any.

4. *COMPULSORY PILOTAGE*

4.1 Compulsory pilotage will be applicable to all liquefied gas carriers and chemical carriers. For purpose of compulsory pilotage, a chemical carrier means any vessel which is carrying or has previously carried as a whole or part of the last cargo in bulk any of those hazardous liquid cargoes listed in Chapter 17 of International Maritime Organization International Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk. In the case of a vessel having previously carried as a whole or part of the last cargo in bulk, she shall remain considered as a chemical carrier so long as any of her cargo tanks or cargo system is not completely cleared and removed of any residual cargo.

4.2 Besides liquefied gas carriers and chemical carriers, other vessels to which compulsory pilotage applies, when moving within a particular area of the Pilotage District, are as indicated in Table I.

Table I

Area of Movement	*Vessels to which compulsory pilotage applies*
"A"	Every vessel of 300 g.r.t. and above.
"B"	Every vessel of 5,000 g.r.t. and above.
"C"	Every vessel of 300 g.r.t. and above or overall length exceeding 45 m.
"D"	Every vessel of 300 g.r.t. and above or of a height exceeding 30 m.

5. *PILOTAGE EXEMPTION*

5.1 Vessels to which pilotage exemption may be granted for movement within a particular area of the Pilotage District are as indicated in the Table II below:

Table II

Area of Movement	*Vessels to which pilotage exemption may be granted*
"A"	A vessel of: (a) *Less than 300 g.r.t.:* A blanket exemption is granted unless otherwise specified by the Port Master. (b) *300 g.r.t. and above but less than 2,000 g.r.t.:* Exemption may be granted provided that the vessel is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s). To seek exemption, the vessel is required to call the appropriate control station by VHF radio-telephone on the designated Channel (See Annex III).

(c) *2,000 g.r.t. and above but less than 5,000 g.r.t.:* Exemption may be granted subject to the following conditions:

(i) The vessel is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s) (See Annex III).

(ii) In the case of a sea-going vessel, the registered Master shall have brought the vessel into and out of Area "A" on at least 6 occasions within the 12 months immediately preceding the date of application for exemption. For subsequent exemptions, the Master shall have entered and left Area "A" on at least 2 occasions. However, the last of the 2 occasions shall not be more than 6 months prior to the date of application of renewal of exemption.

(iii) In the case of a licensed harbour craft, the registered Master shall have served onboard as Master for a period of at least 3 months prior to the application for exemption.

(iv) In all cases requiring exemption the registered Master shall have satisfied the Port Master of his knowledge of local waters, regulations, etc.

"B" Normally no exemption from compulsory pilotage. See paragraph 5.2.

"C" Normally no exemption from compulsory pilotage. See paragraph 5.2.

"D" A vessel of:

(a) *Less than 300 g.r.t. and of a height of more than 30 m.:* Blanket exemption is granted provided the vessel does not enter, leave or transit the Traffic Information Area promulgated in Port Circular No. 90 of 1987 as shown. (See "Plan" – Annex IV.)

(b) *300 g.r.t. and above but less than 2,000 g.r.t. and of a height of 30 m. or less:* Exemption may be granted provided that the vessel if fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s). To seek exemption for the intended movement the vessel is required to call the appropriate control station by VHF radio-telephone on the designated Channel (See Annex III);

(c) *300 g.r.t. and above but less than 2,000 g.r.t. and of a height of more than 30 m.:* Exemption may be granted provided that the vessel does not enter, leave or transit the Traffic Information Area promulgated in Port Circular No. 90 of 1987 as shown, (see "Plan" – Annex IV) and is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF Channel(s). To seek exemption, the vessel is required to call the appropriate control station by VHF radio-telephone on the designated Channel (See Annex III).

Remarks: All Masters of vessels not under pilotage are reminded of the height restrictions in the various areas of the Port indicated in the navigational charts.

5.2 Vessels engaged in Marine Projects (e.g. Dredging, Reclamation and Port Development projects) to which pilotage exemption may be granted for movement within a particular area of the Pilotage District are as indicated in the Table III below:-

Table III

Area of Movement / *Vessels Engaged in Marine Projects (e.g. Dredging, Reclamation and Port Developments) Which May be Granted Pilotage Exemption.*

"A" or "B" *A vessel of 5,000 g.r.t. or above but less than 10,000 g.r.t.:*

(a) The vessel must be engaged in marine projects which require her to move frequently within this area of the pilotage district. (Marine projects include dredging, reclamation, laying of cable, etc.).

(b) The vessel is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF channel(s). (See Annex III).

(c) The registered Master shall have brought the vessel into and out from the area concerned under pilotage for at least a total of 6 occasions immediately prior to application for exemption.

(d) In the case of a sea-going vessel, the registered Master shall have brought the vessel into and out of the area concerned on at least a total of 12 occasions under pilotage within the 12 months immediately preceding the date of application for exemption. For subsequent exemptions, the Master shall have entered and left the area concerned on at least a total of 4 occasions. However, the last of the 4 occasions shall not be more than 3 months prior to date of application for renewal of exemption.

(e) The registered Master of the vessel shall follow the route laid down under the conditions for exemption.

(f) In all cases requiring exemptions, the registered Master shall have satisifed the Port Master of his knowledge of local waters, regulations, etc.

Area of Movement "C" *A vessel of 300 g.r.t. or above or of overall length exceeding 45 metres:*

(a) The vessel must be engaged in marine projects which require her to move frequently within this area of the pilotage district.

(b) For navigating the Main Channel under the Benjamin Sheares Bridge at the entrance to Kallang Basin, the displacement of the vessel must not exceed 2,500 tonnes and for navigating the Middle Channel under the Benjamin Sheares Bridge at the entrance to Marina Bay the displacement of the vessel must not exceed 2,000 tonnes.

(c) In the case of a tow proceeding through the entrance to Kallang Basin, the total displacement of the tug and tow must not exceed 2,500 tonnes and in the case of a tow proceeding through the entrance to Marina Bay, the total displacement of the tug and tow must not exceed 2,000 tonnes.

(d) The vessel or the tug, in the case of a tow, to be fitted with a VHF radio-telephone which is in good condition and capable of communicating at all times on the required VHF channel (s). (See Annex III).

(e) In the case of a vessels proceeding to or from Kallang Basin, the conditions stipulated under Port Circular No. 76 of 1987 are to be complied with and in the case of a vessel proceeding to or from Marina Bay the conditions stipulated under Port Circular No. 75 of 1987 are to be complied with.

(f) The registered Master shall have brought the vessel under pilotage into and out of this area on at least a total of 12 occasions immediately preceding the date of application.

(g) In the case of a sea-going vessel, the registered Master shall have brought the vessel under pilotage into and out of the area on at least a total of 24 occasions within the 12 months immediately preceding the date of application for exemption. For subsequent exemptions, the Master shall have entered and left the area on at least a total of 4 occasions. However, the last of the 4 occasions shall not be more than 3 months prior to date of application for exemption.

(h) The registered Master of the vessel shall follow the route laid down under the conditions for exemption.

(i) In all cases requiring exemption, the registered Master shall have satisfied the Port Master of his knowledge of local waters, regulations, etc.

Area of Movement "D" *A vessel of 300 g.r.t. or above but not less than 10,000 g.r.t. requiring to enter, leave or transit the Traffic Information Area:*

(a) The vessel must be engaged in marine projects which require her to move frequently within this area of the pilotage district.

(b) The vessel is fitted with a VHF radio-telephone which is in good working condition and capable of communicating at all times on the required VHF channel(s). (See Annex III).

(c) The registered Master shall be conversant with the reporting procedure required under Port Circular No. 90 of 1987.

(d) The registered Master shall have brought the vessel into and out of the area under pilotage, for at least a total of 12 occasions immediately prior to application for exemption.

(e) In the case of a sea-going vessel, the registered Master shall have brought the vessel into and out of the area on at least a total of 24 occasions under pilotage, within the 12 months immediately preceding the date of application for exemption. For subsequent exemptions, the Master shall have entered and left the area on at least a total of 4 occasions. However, the last of the 4 occasions shall not be more than 3 months prior to date of application for exemption.

(f) The registered Master of the vessel shall follow the route laid down under the conditions for exemption.

(g) In all cases requiring exemption, the registered Master shall have satisfied the Port Master of his knowledge of local waters, regulations, etc.

5.3 All vessels except those vessels with a height exceeding 100 m. liquefied gas carriers and chemical carriers, when leaving, entering or shifting within the Changi General Purposes Anchorage are exempted from Pilotage.

5.4 Exemption, when granted, is for the movement other than berthing and unberthing. For berthing and unberthing, the express permission of the Owners/Operators of the berth is also required.

5.5 All exempted vessels, when underway within the Pilotage Areas are to display by day the International Code Flag "N".

5.6 All Masters of vessels are advised not to hamper large or deep draft vessels in the restricted channels of the Port.

5.7 Application forms for pilotage exemption for vessels can be obtained from Port Master's Department, 20th Storey, Tanjong Pagar Complex, Singapore 0208.

6. *TOWAGE WITH PILOTAGE EXEMPTION:*

6.1 Only tugs with harbour craft licence and which are not required to be under pilotage or which have been granted exemption are permitted to tow vessels subject to the following conditions:

(i) For movement within Area "A", the aggregate g.r.t. of the tug(s) and tow(s) is less than 2,000.

(ii) For movement within Area "B", the aggregate g.r.t. of the tug(s) and tow(s) is less than 5,000.

(iii) For movement within Area "D", the aggregate g.r.t. of the tug(s) and tow(s) is less than 2,000 and the height of either is 30 m. or less (Where the tug(s) and tow(s) are required to enter, leave or transit the Traffic Information Area in Port Circular No. 90 of 1987 (see "Plan" – Annex IV) and when either the height of the tug(s) or tow(s) is more than 30 m., compulsory pilotage shall apply).

(iv) Compliance with Regulation 49 (3) of the Singapore Port Regulations 1977.

7. *PILOT BOARDING AND DISEMBARKATION GROUNDS*

7.1 The 5 Pilot Boarding Grounds for vessels coming into port are:

(i) Eastern Boarding Ground "A" – in position Lat. 01° 13.52′ N., Long. 103° 53.55′ E.

(ii) Eastern Boarding Ground "B" – in position Lat. 01° 15.50′ N., Long. 103° 57.50′ E. This boarding ground is to be used by all tankers requiring pilots when arriving from the East and proceeding to the appropriate anchorages in the Eastern sector of the port. Other vessels may also use this boarding ground to pick up pilots provided special arrangement has been made with Port Operations Centre. Anchoring is strictly prohibited at this boarding ground as it is within the submarine cable area.

(iii) Southern Boarding Ground – South of Sebarok Beacon within port limits. (To be used only through prior arrangement with Port Operations Centre).

(iv) Western Boarding Ground – in position Lat. 01° 13.73′ N., Long. 103° 36.50′ E.

(v) East Johor Strait Boarding Ground – S.E. of Johor Shoal Buoy in position Lat. 01° 18.00′ N., Long. 104° 05.50′ E.

7.2 The 10 Pilot Disembarkation Grounds as in positions are follows:

No. 1: Lat. 01° 18.47′ N., Long. 104° 05.72′ E.
No. 2: Lat. 01° 16.95′ N., Long. 103° 59.77′ E.
No. 3: Lat. 01° 15.50′ N., Long. 103° 56.90′ E.
No. 4: Lat. 01° 14.25′ N., Long. 103° 54.78′ E.
No. 5: Lat. 01° 13.48′ N., Long. 103° 53.30′ E.
No. 6: Lat. 01° 15.50′ N., Long. 103° 51.87′ E.
No. 7: Lat. 01° 11.75′ N., Long. 103° 49.45′ E.
No. 8: Lat. 01° 10.68′ N., Long. 103° 46.98′ E.
No. 9: Lat. 01° 12.80′ N., Long. 103° 39.28′ E.
No. 10: Lat. 01° 13.97′ N., Long. 103° 37.37′ E.

Vessels may, at the discretion of Port Operations Centre, be directed to make use of the nearest disembarkation grounds.

8. *PILOTAGE ORDERS*

8.1 When placing orders for pilotage service, as much advance notice as possible should be given.

8.2 Pilotage service orders may be placed by the following means in order of priority:

Means of Placing Order	*For Sembawang/East Johor Strait*	*For All Other Areas*
Telex	Sembawang Control Telex RS 35962 Ans. back – SEMCO	Telex Port Operations Centre No. RS 34970 RS 22896 Ans. Back PORTPM
Telephone	Sembawang Control No. 5427112 5427113	Port Operations Centre No. 2233631 2233633
VHF Radio Telephone	Channel 21	Channel 12 or 20

8.3 When placing orders through telex, telephone or VHF radio-telephone, the following information should be provided:

(a) Agent's name and valid PSA account number.

(b) Name of vessel, her call sign and nationality.

(c) Vessel's g.r.t., length overall and height of the vessel. For vessel moving into and out of Area "C", berthing at Sembawang Port Basin, or Tanjong Pagar Terminal, state the maximum beam of the vessel.

(d) Date, time and description of pilotage service required and name and contact number of the person whom Pilot Office should contact.

(e) For arriving vessels, state whether Health/Immigration Clearance is required. State also the applicable Pilot Boarding Ground or if the vessel is at the anchorage, her location in grid reference (refer to Singapore Chart GSP1 on Anchorages and Aids to Navigation).

Full information on placing of pilotage orders is contained in Port Circular No. 56 of 1986 dated 1st September 1986.

8.4 Personal application for pilotage service is necessary for companies which do not have accounts with the Port of Singapore Authority. The application should be made at the Pilotage Section of Port Master's Department, 20th Storey, Tanjong Pagar Complex, Singapore 0208.

8.5 Vessels are to confirm to Port Operations Centre their ETA at the specified boarding grounds, 2 to 3 hours before arrival. For those bound for the East Johor Strait, confirmation should be made to Sembawang Control, 3 hours before arrival.

8.6 Vessels at anchor and requiring Pilots at night shall exhibit 3 all-round lights in a vertical line. The highest and middle lights shall be white and the lowest light shall be red. By day, the vessels should fly the flag 'G' of the International Code of Signals 1969.

8.7 The Authority reserves the right not to accept orders for Pilot service for vessels at the anchorages, with the exception of the Quarantine/Immigration Anchorages, if the vessels have not reported their anchoring position to Port Operations Centre. All vessels above 300 g.r.t. must report their final anchoring position in the port in terms of bearing and distance from the following reference points:

(i) Eastern Sector	Katong Beacon (in position: Lat. 01° 17.65′ N., Long. 103° 53.30′ E.)
(ii) Western Sector	Tg Rimau Beacon (in position: Lat. 01° 15.60′ N., Long. 103° 48.50′ E.)
(iii) West Jurong and Selat Pauh Anchorages	Sultan Shoal Lighthouse (in position: Lat. 01° 14.38′ N., Long. 103° 38.98′ E.)

9. *TRAFFIC INFORMATION SYSTEM*

Masters of vessels intending to enter, transit or leave the East Johor Strait are to refer to the Port Circular No. 90 of 1987 on Traffic Information System for Ships Transiting The Serangoon Harbour and where applicable, comply with the directives given therein.

10. *ACCESS TO VESSELS*

10.1 Mariners are reminded that Pilots and other Government Officers may, on grounds of personal safety, refuse service unless a safe and satisfactory means of access to the vessel is provided. The safety requirements in respect of pilot ladders, should be in accordance with Regulation 17 of Chapter 5 of the SOLAS Convention 1974.

10.2 In the case of accommodation ladders and shore gangways, the following should be complied with:

(i) *Accommodation Ladders*

(a) The embarkation and disembarkation of Pilots and Government Officers are to be supervised by a responsible Officer of the ship.

(b) The accommodation ladder is to be in good condition, secured and properly illuminated at night. The landing platform is to be properly adjusted to provide safe access.

(c) A manrope is to be attached to the lower bridle in order to provide a good handhold for boarding, and a lifebuoy with self-igniting light is to be available close to the upper platform.

(d) Discharges in the way of the accommodation ladder are to be properly covered or stopped while the ladder is in use.

(ii) *Vessel and Shore Gangways*

(a) Where a vessel's gangway or a shore gangway is used when the vessel is berthed alongside a wharf, the gangway is to be landed squarely onto the vessel and wharf. No person other than those engaged in the rigging of the gangway should be permitted to embark or disembark before it is properly secured.

(b) Where the gangway is landed onto the ship's bulwark, steps and adequate handholds are to be provided for safe and convenient access.

(c) The gangway shall be adequately illuminated at night and tended by a watchman.

(d) When a shore gangway is used, Masters are advised not to permit it being landed onboard before crew members of the vessel are available to receive it.

Annex I:
PILOTAGE DISTRICT AREAS

1. Area "A" – is defined as that part of the Pilotage District Westwards of the line joining the following positions including the area up to the causeway in the Johor Strait:

(a) Lat. 01° 16.27′ N., Long. 103° 51.43′ E.
(b) Lat. 01° 15.03′ N., Long. 103° 51.87′ E.
(c) Lat. 01° 14.68′ N., Long. 103° 52.28′ E.
(d) Lat. 01° 14.68′ N., Long. 103° 52.77′ E.
(e) Lat. 01° 13.35′ N., Long. 103° 51.87′ E.
(f) Lat. 01° 12.73′ N., Long. 103° 52.12′ E.

2. Area "B" – is defined as that part of the Pilotage District excluding Area "C" Marina Bay and Kallang Basin Eastward of the line joining the positions referred to in paragraph 1 above up to the line joining the following positions:

(a) Lat. 01° 20.55′ N., Long. 103° 59.80′ E.
(b) Lat. 01° 20.00′ N., Long. 104° 02.80′ E.

3. Area "C" – is defined as follows:

From a position	Lat. 01° 17.890′ N.	Long. 103° 51.980′ E.
by a straight line to a position in	Lat. 01° 17.770′ N.	Long. 103° 51.970′ E.
thence by a straight line to a position in	Lat. 01° 17.658′ N.	Long. 103° 51.974′ E.
thence by a straight line to a position in	Lat. 01° 17.303′ N.	Long. 103° 52.034′ E.
thence by a straight line to a position in	Lat. 01° 17.309′ N.	Long. 103° 51.733′ E.
thence by a straight line to a position in	Lat. 01° 17.186′ N.	Long. 103° 51.733′ E.
thence by a straight line to a position in	Lat. 01° 17.184′ N.	Long. 103° 51.805′ E.
thence by a straight line to a position in	Lat. 01° 17.063′ N.	Long. 103° 52.110′ E.
thence by a straight line to a position in	Lat. 01° 16.927′ N.	Long. 103° 52.305′ E.
thence by a straight line to a position in	Lat. 01° 16.720′ N.	Long. 103° 52.467′ E.
thence by a straight line to a position in	Lat. 01° 16.567′ N.	Long. 103° 52.533′ E.
thence by a straight line to a position in	Lat. 01° 16.683′ N.	Long. 103° 52.733′ E.
thence by a straight line to a position in	Lat. 01° 16.811′ N.	Long. 103° 52.680′ E.
thence by a straight line to a position in	Lat. 01° 16.941′ N.	Long. 103° 52.508′ E.
thence by a straight line to a position in	Lat. 01° 17.333′ N.	Long. 103° 52.150′ E.
thence by a straight line to a position in	Lat. 01° 17.630′ N.	Long. 103° 52.050′ E.
thence by a straight line to a position in	Lat. 01° 17.760′ N.	Long. 103° 52.030′ E.
thence by a straight line to a position in	Lat. 01° 17.850′ N.	Long. 103° 52.040′ E.

thence by a straight line to the point of origin.

4. Area "D" – is defined as that part of the Pilotage District Northwards of the line joining the following positions up to the causeway in the Johor Strait.

(a) Lat. 01° 20.55′ N., Long. 103° 59.80′ E.
(b) Lat. 01° 20.00′ N., Long. 104° 02.80′ E.
(c) Lat. 01° 20.00′ N., Long. 104° 03.17′ E.
(d) Lat. 01° 19.55′ N., Long. 104° 03.67′ E.
(e) Lat. 01° 18.75′ N., Long. 104° 04.40′ E.
(f) Lat. 01° 18.30′ N., Long. 104° 05.63′ E.
(g) Lat. 01° 19.30′ N., Long. 104° 05.78′ E.

Annex II: See "Plan".
Annex III:
REPORTING STATIONS

Station	*Function*	*VHF Channel*	*Frequency (MHz)*
Port Operations Centre	General Reporting	12	156.60
	Pilotage Service and Information	20	157.00 161.60
Sembawang Control	Reporting Station for East Johor Strait	21	157.05 161.65
Jurong Control	Reporting Station for Jurong Area	21	157.05 161.70

RESTRICTIONS:
Navigational Channels:

Name	*Controlling Depth*
Johor Shoal to Johor Port Water Front	12.5 m.
Johor Port Water Front to Sembawang Shipyard	11.6 m.
Sembawang Shipyard to Ordnance Reach	11.0 m.
Approach Channel to Tg. Pagar Container Terminal	14.0 m.
East Keppel Fairway	10.1 m.
West Keppel Fairway	14.8 m.
Sisters Fairway (Selat Tg. Hakim)	18.1 m.
Jong Fairway	14.3 m.
Sinki Fairway (In Channel)	14.2 m.
Selat Pandan (Out Channel)	12.5 m.
Western Approach to Esso SBM (Dredged Channel at Selat Sinki)	20.8 m.
Pesek Fairway	12.4 m.
East Jurong Fairway	12.6 m.
West Jurong Fairway	10.6 m.
Selat Sakra	12.0 m.

Keppel Harbour Aerial Cableway – Vertical Clearance: The vertical clearance of Aerial Cableway across Keppel Harbour is 56 m. above MHWS or 57 m. above MSL. Also see "Bridges" and "Notices" No. 105 of 1987, No. 116 of 1987 and No. 18 of 1988.

MAX. SIZE: See "Berthing" and "Tankers".

HEALTH: Also see "Notice".
Inward Health Clearance of Ships:
1. *Inward Health Clearance:*
1.1 With effect from 19th January 1984, Inward Health Clearance is required only for vessels mentioned in paragraph 1.2. All vessels from infected ports need not obtain Port Health Clearance by Radio Pratique or going to the Quarantine Anchorages. However should any passenger or crew member be suffering from cholera or has symptoms or signs of diarrhoea and vomiting, the Master should notify Port Health Office and proceed to the Quarantine Anchorage to await Health Clearance.
1.2 The following categories of ships will be required to anchor on arrival at the Quarantine Anchorage for inspection by the Port Health Officer:

(a) Vessels which have been in a plague infected area within 60 days prior to arrival in Singapore;
(b) Vessels with illness on board, specifically with the following signs and symptoms:
  (i) temperature of 38°C or greater or persisted for more than 48 hours and accompanied or followed by one or more of these signs – rash, jaundice, glandular swelling;
  (ii) diarrhoea, severe enough to interfere with work or normal activity.
(c) Vessels with a death on board;
(d) Vessels with dead rodents on board;
(e) Vessels with refugees on board.

1.3 The Master/Owner/Agent of a ship under any of the categories in para 1.2 shall:

(a) notify Port Health Office not more than 12 hours and where practicable, not less than 4 hours before arrival;
(b) display the appropriate day or night signal when the ship enters the Singapore Port Limit;
(c) anchor at the Quarantine Anchorage and until Free Pratique has been obtained, ensure that no person, other than a Pilot, Immigration Officer or Customs Officer, boards or leaves the ship without the permission of the Port Health Officer.

1.4 Notwithstanding the grant of Health Clearance under paragraph 2.1, all ships on arrival in the working anchorage or alongside the wharves, the Master/Owner/Agent is required to be in possession of a valid Derat Certificate/Derat Exemption Certificate.
1.5 The Port Health Officer reserves the right to examine any ship, the right to require the production or submission of any document and the right to require any ship to proceed to the Quarantine Anchorage for Inward Health Clearance and/or compliance with health requirements.
1.6 The Master/Owner/Agent is responsible for complying with health requirement and/or correction of any health irregula immediately after arrival.
1.7 The granting of Port Health Clearance or Free Pratique me clears the ship in so far as Port Health Office is concerned. It does exempt the ship from requirements of other Authorities.
2. *Outward Health Clearance:*
2.1 With effect from 1st March, 1984, the Outward Health Clearanc no longer required for any vessel.
3. Masters, Owners and Agents of vessels wishing to have fur information should contact Port Health Office at 7B Keppel Ro No. 05-07/09, Tanjong Pagar Complex, Singapore 0208 or teleph 2226924/2222585. Masters may contact Port Health Office by radio c Channel 14.

IMMIGRATION CLEARANCE: Also see "Notices".
Port of Singapore Authority – Port Circular No. 70/87. Dated 1 September 1987.
IMMIGRATION CLEARANCE:
The Immigration Department has informed us that the contents in F Circulars Nos. 87 of 1984 and 21 of 1987 regarding Immigra Clearance have been revised. We reproduce below the contents of revised circulars. Port Circulars Nos. 87 of 1984 and 21 of 1987 hereby superseded.

INWARD CLEARANCE **Appendix**
Physical Clearance: Owners/Agents requesting clearance for vess are required to contact the appropriate offices and to follow procedures as outlined below:

Location for Clearance	*Office covering the Location*	*Telephone No./ VHF Channel*	
Eastern/Western Quarantine and Immigration Anchorages, PSA Wharves, Western Sector Anchorages	Immigration Finger Pier Checkpoint	2226012/VHF Channel 14	24 ho
Jurong Fishing Port	Immigration Office at the Jurong Fishing Port	2652818	
Sembawang Port	Immigration Woodlands Checkpoint	2692531	

The Owners/Agents contacting the Immigration Office regarding ETAs of their vessels are required to give the following information. S ETAs should be given at least 12 hours before the arrival of their vess The office for this purpose provides a 24-hour service.

(i) Name of Vessel;
(ii) Location for clearance of the Vessel;
(iii) Expected time of arrival (ETA);
(iv) Last/Next Port of Call;
(v) Agent of Vessel;
(vi) Owner of Vessel;
(vii) Number of Passengers, if any, on board;
(viii) Stowaway/Unauthorised persons/survivors, if any, on boa

Any vessel arriving in Singapore, excluding those vessels which h been granted Advance Immigration Clearance, must proceed to prescribed Immigration and Quarantine Anchorage for Immigra Inward Clearance.

Such a vessel on arrival must exhibit the necessary signal for e identification and speedy clearance. The Immigration signal is:

(a) by day, the flags in the International Code of Sig corresponding to:
  (i) the numerals "25" in respect of vessels not carry passengers; or
  (ii) the numerals "34" in respect of vessels carry passengers.
(b) by night, in every case, 2 green lights mounted vertically, 6 apart, visible all-round the horizon for a distance of at le 2 miles.

Owners/Agents and Masters must ensure that their vessels ha proper and secure gangways which are ready on arrival so t Immigration Officers can board their vessels immediately. The use rope-ladders is discouraged. Co-operation in this regard will ena Immigration Officers to grant fast clearance.
Procedure on Board:
The Master is required to submit 6 copies of the Crew List and if th are passengers, 4 sets of the Passenger List to the Clearing Officer w boards the vessel. The Master has to certify on the original Crew L that the details in the lists submitted are correct and that there are stowaways or unauthorised persons on board.

If requested by the Clearing Officer, Seaman's Books/tra documents will have to be produced. Crew members may be requi to present themselves before the Officer.

All passengers shall present themselves before the Clearing Offic Disembarking passengers shall complete the Disembarkation For (IMM 23A). Agents may obtain the forms from the Immigration F Division Headquarters.

The Master shall execute the Seaman's Security Bond, bonding cr members (except the Master) for $1,000/–each. If there are perso who are refused entry by the Clearing Officer, the Master shall exec the Security Bond, bonding such persons who are refused entry, for less than $2,000/– each.

Summary action will be served on the Master giving him the nam of all those who have been refused entry, and/or the breakdown figu of the transit passengers and disembarking passengers.

When clearance has been granted, the Master shall haul down Immigration signal upon the Immigration Officer leaving the vessel.

OUTWARD CLEARANCE **Appendix 'B'**

Physical Checkout: Agents requiring physical checkout of vessels should contact the following offices:

Location of Vessel	*Office of Contact*	*Telephone No./ VHF Channel*
Eastern/Western Quarantine and Immigration Anchorages PSA Wharves, Western Sector Anchorages	Immigration Finger Pier Checkpoint	2226013/VHF Channel 14 } 24 hours
Jurong Fishing Port	Immigration Office at the Jurong Fishing Port	2652818
Sembawang Port	Immigration Woodlands Checkpoint	2692531

Procedure:
Vessels requesting Immigration Outward Clearance must either fly the "Blue Peter" in addition to the "25" or "34" signals during the day. By night to display 2 green lights in every case mounted vertically 6 ft. apart, visible all-round the horizon for a distance of at least 2 miles. This is to assist the Officers in locating the vessel.

The Master is required to submit 2 sets of Crew Lists and if applicable 3 sets of Passenger Lists to the Checking-Out Officer. The Master should certify on the Crew Lists that all crew are on board. Passengers if any and persons who have been refused entry will have to be presented to the Checking-Out Officer.

INWARD CLEARANCE **Appendix 'C'**

Advance Immigration Clearance:
Procedure in Respect of Vessels which are Eligible for AIC.

(i) The Advance Immigration Clearance (AIC) facility is extended to merchant vessels over 75 n.r.t. and which are carrying not more than 12 passengers, but excluding fishing vessels.
(ii) Applications to be submitted at least 6 hours before arrival of vessel.
(iii) The Owner/Agent of the vessel shall obtain from the Master by radio or post the requisite information as outlined below.
(iv) The Owner/Agent shall submit 5 Crew Lists, Transit Passenger Lists (if any), Disembarking Passenger Lists (if any), in quadruplicate to the Immigration Checkpoint, Finger Pier Building, South Quay. All lists must be inserted with the necessary details and must be duly signed by the authorised representatives of the Owner/Agent of the vessel.
(v) If AIC is granted, one copy of each of the Crew List, Transit Passenger List, and Disembarking Passenger List bearing the appropriate Immigration endorsements can be collected by the Owner/Agent on execution of the relevant documents such as Seaman's or other Security Bonds. If any person is not permitted to land, the Owner/Agent will be required to inform the Master of the vessel accordingly and upon the ship's arrival must ensure that such person in fact does not disembark from the vessel.
(vi) After the arrival of the vessel, it shall be the responsibility of the Owner/Agent to submit immediately the Master's copy of the Crew List and/or Passenger List to the Immigration Finger Pier Checkpoint, bearing the signature of the Master of the vessel certifying that the details previously submitted through the Owner/Agent are correct. Whenever required, travel documents and Seaman's Books of the crew and/or passengers must be handed over to the Immigration Finger Pier Checkpoint, for checking within 4 hours of the vessel's arrival. Passengers will not land until their passports have been endorsed with the appropriate passes.
(vii) If the vessel is arriving from an infected port, provisional Radio Pratique should first be obtained from Port Health Authorities before AIC can be considered.

INWARD CLEARANCE **Appendix 'D'**

Advance Immigration Clearance for supply vessels plying between Singapore and oil rigs:

1. *Description of Vessels:* Supply vessels based at Singapore which ply between Singapore and oil rigs situated in waters near the neighbouring countries.

2. (a) *A supply vessel arriving without change of crew:* The Owner/Local Agent of a supply vessel, after receiving from the oil rig Superintendent by radio, must submit 2 copies of the vessel's Crew List to the Immigration Officer at the Immigration Finger Pier Checkpoint at least 2 hours before the vessel arrives at the Port Limits. The Crew List should bear a written certification by the Owner/Local Agent that the vessel will be arriving at Singapore without any change of crew since its last departure from Singapore.

After submission of these certified Crew Lists, the Owner's/Local Agent's representatives will be required to execute the usual documents such as Seaman Security Bond.

(b) *A supply vessel arriving with a change of crew:* If the Owner/Local Agent is able to communicate with an arriving supply vessel, and if there has been a change of crew, the Owner/Local Agent must submit 5 copies of the Arrival Crew List to the Immigration Officer at Immigration Finger Pier Checkpoint, at least 12 hours before the vessel's arrival at the Port Limits. If Advance Immigration Clearance is given, the Owner's/Local Agent's representatives will execute the usual bonds and inform the vessel accordingly.

(c) *A supply vessel arriving with passengers:* No Advance Immigration Clearance is available.

(d) *A supply vessel arriving in Singapore from oil rigs located on the high seas or South China Sea:* No Advance Immigration Clearance will be granted.

(e) Any Advance Immigration Clearance for a vessel requiring Health Clearance will be subject to the condition that Health Pratique is provided by Port Health Authorities.

Shipmaster's Report: August 1987.
A Crew List is to be sent to the Agent in advance of the vessel's arrival and is to include – name, rank, nationality, Seaman's Book number and date and place engaged.

RADIO:
Radiotelegram Services to Ships (Radiotelephony):

Singapore Radio Working Schedules for MF/HF Radiotelephony:
1. The following schedules of watch-keeping will be operated by the Singapore Coast Station:

Singapore Radio	*Transmit Frequency* (kHz)	*Hours of Watch* (UTC)	*Ship Transmit Frequency* (kHz)	*Remarks*
9VG4	2182	Continuous	2182	Call, Reply and Safety
9VG87	4125	Continuous	4125	
9VG88	6215.5	Continuous	6215.5	
9VG89	8780.9	Continuous	8257	Common Calling Frequencies
9VG90	13162.8	Continuous	12392	
9VG91	17294.9	Continuous	16522	
9VG5	2760	Continuous	2527	Working Frequencies
9VG60	4369.8	Continuous	4075.4	
9VG63	8728.2	Continuous	8204.3	
9VG67	13156.6	Continuous	12385.8	

2. Singapore Radio maintains a continuous watch on Call, Reply, Safety and Common Calling Frequencies.

Navigational Warnings and Weather Bulletins:
1.Navigational Warnings and Weather Bulletins for shipping are broadcast from Singapore Radio at the following times:

Singapore Radio	*Frequency* (kHz)	*Times* (UTC)	*Remarks*
9VG 5 9VG63	2760 8728.2	0145	Navigational Warnings and Weather Bulletin.
9VG 5 9VG63	2760 8728.2	0405 0805	Navigational Warnings only.
9VG 5 9VG60	2760 4369.8	1345	Navigational Warnings and Weather Bulletin.

2. The broadcast will normally be made on the two listed frequencies simultaneously except during transmitter maintenance periods when the broadcast will be made on the two frequencies consecutively.

Traffic Lists:
1. Singapore Radio will transmit Traffic Lists on the following two listed frequencies simultaneously except during transmitter maintenance periods when the list will be broadcast on the two frequencies consecutively:

Singapore Radio	*Frequency* (kHz)	*Times* (UTC)
9VG 5 9VG63	2760 8728.2	0005, 0405, 0805 and 1205
9VG 5 9VG60	2760 4369.8	1605

Medical Advice to Ships:
1. A radio Medical Advice service is available to ships of all nationalities and no charge is made for this service.
2. Radiotelegrams requesting medical advice should state briefly and clearly the symptoms of the illness of the person affected and contain a brief description of the contents of the medical chest carried by the ship. Such telegrams should be in English Language, be signed by the Master of the ship and addressed "Radiomedical Singapore".
3. In very urgent cases, the urgency signal (PAN) may be used in order to ensure priority over all other communications, with the exception of those relating to distress calls.

MF and HF Telephone Service:
1. General. The MF and HF radiotelephone service is available continuously to ships at sea, subject to radio propagation conditions, and provided that the ships are suitably equipped.

Ships wishing to contact Singapore Radio may do so on any of the calling carrier frequencies listed under "Radio Working Schedules" above.

After establishing contact, the call will be booked. Both the coast and ship station will then change over to any one of the following frequencies as agreed upon by both stations (depending on the position of the vessel and the time of day) prior to connecting the telephone subscriber.

Singapore Radio	*Transmit Frequency (kHz)* Coast	Ship	*Remarks*
9VG52	2780	2685	
9VG61	4376	4081.6	
9VG62	6509.5	6203.1	
9VG64	8762.3	8238.4	Connection to the telephone system on demand
9VG65	8790.2	8266.3	
9VG66	13147.3	12376.5	
9VG68	17270.1	16497.2	
9VG69	17356.9	16584	
9VG70	22630.1	22034.1	

Maritime Radiotelex service available.

Enquiries regarding the Maritime Mobile Services may be made to the Supervisor at either Singapore Radio or the International Telephone Exchange as appropriate, or in writing to Telecoms, Comcentre, Exeter Road, Singapore 0923.

VHF: VHF Radio Telephony transmitting and receiving Channels used within the Port of Singapore. All the stations offer a 24-hour service.

Station	*Frequency (MHz)*	*Channel*	*Functions*
Singapore Port Operations	156.60	12	VHF Channels for reporting ETAs, departures and location of ships within the Port.

Notice: Port Circular No. 88 of 1987.

Issued by P.S.A. 30th October 1987.

NOTIFICATION OF ARRIVAL AND VHF REPORTING PROCEDURES:

1. This Port Circular supersedes Port Circular No. 49 of 1981.
2. With immediate effect, the Owner, Agent, Master or person-in-charge of every vessel of 500 g.r.t. or more which intends to enter the Port of Singapore shall notify the Port Master at least 12 hours and not more than 24 hours before the arrival of such vessel by any of the following means:

(a) Radio telegram — Addressed to "PORTMASTER SINGAPORE".
(b) Telex — Addressed to "PORT MASTER"
Telex No. RS34970
Answer Back PORTPM RS 34970
(c) Telefax — Addressed to "PORT MASTER"
Telefax No. 3212016.

2.1 The Owner, Agent, Master or person-in-charge of such a vessel coming from a nearby port with less than 12 hours steaming time to Singapore, shall immediately on departure from such port notify the Port Master by one of the means of communication mentioned above.

3. *Notification:*

In notifying the Port Master as provided above, the Owner, Agent, Master of person-in-charge of the vessel shall provide the following information:

(a) Name of vessel.
(b) Nationality and call sign.
(c) Gross registered tonnage (g.r.t.).
(d) Date and estimated time of arrival.
(e) Height of vessel which shall be the height of the vessel measured vertically from the waterline of the vessel to the highest point of the vessel including its cargo, structure or equipment on board.
(f) Name of local shipping agency.
(g) Last port and next port of call.
(h) Any condition affecting the navigation of the vessel such defective propulsion machinery, defective steering equipm excessive list, awkward tows and including fire or hazards board.
(i) Whether or not vessel is in a damaged condition.
(j) Whether or not pilotage service is required on arrival.
(k) Draft of vessel if pilotage service is required.
(l) Dangerous chemicals in bulk (this item shall apply with e from 1st December 1987 to a vessel carrying those danger chemicals listed in Chapter 17 of the International Mari Organisation's (IMO) International Code for the Construction Equipment of Ships Carrying Dangerous Chemicals in Bulk (Code). See Port Circular No. 87 of 1987 entitled "Trackin Chemical Carriers" – See "Notices".

4. *VHF (Very High Frequency) Radiotelephone Report:*

4.1 The Master of every vessel of over 300 g.r.t. or every tug enga in towing or pushing, if the combined g.r.t. of the tug and tow vessel(s) being pushed exceeds 300 g.r.t., intending to enter the of Singapore shall with immediate effect report to Singapore Operations on VHF Channel 12 when:

(a) Approaching from the East, on crossing meridian 104° 10 (hereby called 'ME 1') or one hour's steaming time away the Easternmost point along the Singapore Port Limit which is the earlier; or
(b) Approaching from the West, on crossing meridian 103° 30 (hereby called 'MW 1') or one hour's steaming time away the Westernmost point along the Singapore Port Limit which is the earlier; or
(c) Approaching from the South, one hour's steaming time away the Southernmost point along the Singapore Port Limit.

4.2 The report required to be made under paragraph 4.1 above fo arriving vessel shall contain the following information:

(a) Name of vessel.
(b) Gross registered tonnage (g.r.t.).
(c) Whether the vessel will be arriving from the East, West or So
(d) Date and estimated time of arrival at a particular Pilot boar ground, a particular anchorage or berth.
(e) Height of vessel as defined in paragraph 3(e) above.
(f) Type of vessel.
(g) Draft of vessel if pilotage service is required.

5. The Master of such vessel shall, in addition to the requiremen paragraph 4, report to the designated Communications Ce Control Station specified in the 1st schedule of this circular.
6. When such a vessel anchors or moors within the port limit Singapore and its approaches, the Master shall report immedia to the designated Communications Centre/Control Station (spec in the 1st Schedule) the date, time and location at which the ve is so anchored or moored. Masters of vessels cleared by Immigra Health Authorities are required to notify the design Communications Centre/Control Station of their intentions to sh a berth or to an anchorage and whether they require pilo services.

6.1 The anchored position shall be reported in the form of a bea and distance from one of the following reference points:

	Reference Point
(a) *Eastern Sector*	
Eastern Explosive Anchorage	Amber Beacon Lat. 1° 17.88′ Long. 103° 54.43′
Eastern Special Purposes Anchorage	
Small Craft Anchorage	
Laid-up Vessels Anchorage	
Eastern Petroleum Anchorage (B)	
Man-of-War Anchorage	
Eastern Working Anchorage	
Eastern Petroleum Anchorage (A)	
Eastern Quarantine and Immigration Anchorage	
Explosives Anchorages for Lighters and Barges	
(b) *Western Sector*	*Reference Poin*
Western Working Anchorage	Rimau Beacon Lat. 1° 15′ 36″ Long. 103° 48′ 30″
Western Petroleum Anchorage(A)	
Western Petroleum Anchorage (B)	
Western Quarantine and Immigration Anchorage	
Reserved Anchorage	
Pasir Panjang Coastal Anchorage	
Dangerous Goods Anchorage	
(c) *Jurong Sector*	
Western Jurong Anchorage	Sultan Shoal Lighthouse Lat. 1° 14′ 23″ Long. 103° 38′ 59″
West Jurong Petroleum Anchorage	
Chemical/Gas Carriers Anchorage	
Sultan Shoal Quarantine and Immigration Anchorage	
Selat Pauh Anchorage	
(d) *East Johor Strait*	
Awaiting Pilotage Anchorage	Johor Shoal Buoy Lat. 1° 18′ 53″ Long. 104° 05′ 00″

7. When a vessel that is anchored or moored within the Port Limi Singapore and its approaches, ceases to be so anchored or moo or is to be moved within the Port Limits of Singapore, the Ma shall immediately report such event or intention to the design Communications Centre/Control Station (Specified in the Schedule) giving the following:

(a) Name of vessel.
(b) Gross registered tonnage (g.r.t.)
(c) Type of vessel.
(d) Height of vessel as defined in paragraph 3 (e) above.
(e) Present location.
(f) Destination.
(g) Inform whether he requires pilotage service.

7.1 The Master of every vessel intending to leave Singapore shall inform the designated Communications Centre/Control Station of his intention just prior to the departure and shall give the information as specified in paragraph 7 above.

8. When it is not possible to operate the VHF radiotelephone equipment carried on board a vessel, compliance with paragraphs 4.1, 4.2, 5, 6 and 7 above shall be made by one of the means of communication mentioned in paragraph 2 above.

8.1 The Master shall at the earliest practicable time cause such VHF radiotelephone carried on board his vessel to be restored to effective operating condition.

9. In the interest of safety or navigation, ships transiting the Singapore Main Strait and not calling at Singapore are requested to voluntarily report to Singapore Port Operations on VHF Channel 12 the time of their passing "ME 1" and "MW 1" mentioned in paragraphs 4.1(a) and 4.1(b) above.

10. The directives and requirements stipulated above regarding the notification of a vessel's arrival and a vessel's VHF radiotelephone report are made pursuant to Regulation 3 of the Singapore Port Regulations 1977.

1ST SCHEDULE

Designated Communications Centre/Control Station	*Channel*	*Usage*
Singapore Port Operations	12	For request of pilotage service and reporting of arrival, anchored positions, movements, departures, as well as other navigational or shipping information.
	20	For request of pilotage service.
Jurong Control	22	For reporting of anchored positions, movements, departures, as well as other navigational or shipping information within the Jurong area.
Sembawang Control	21	For request of pilotage service and reporting of arrivals, movements, departures, as well as other navigational or shipping information within the East Johor Strait.

Notice: Port Circular No. 5 of 1990.

1. The Port Operations Centre will be operating a new VHF Channel 10 for vessels intending to enter the Port of Singapore.
2. With effect from 16th July 1990, all vessels of over 300 g.r.t. arriving in Singapore shall call Singapore Port Operations on Channel 10 to report their confirmation of arrival ETA at the Pilot Boarding Ground. Masters are reminded that arrival to Singapore includes those vessels proceeding to Sembawang Port.
   Vessels going to Sembawang Port shall therefore call Port Operations Centre on Channel 10, to confirm their ETA instead of Channel 21.
3. Vessels moving from one location to another within the port, and those intending to depart from Singapore, shall continue to call Singapore Port Operations on Channel 12 prior to departure.

TUGS: PSA has a fleet of 17 tugs, they are:

Name	*Horsepower*	*Bollard Pull (tonnes)*
Tekun	1,200	14.5
Tenaga	1,200	15.7
Teman	674	9.2
Victory (V5)	2×1,500	26.0
Vigilant (V6)	2×1,500	29.0
Valiant (V7)	2×1,500	32.5
VST 1	2×1,276	21.0
VST 2	2×1,276	22.0
VST 3	2×1,276	21.8
VST 4	2×1,276	20.5
Vanguard (V8)	2×1,500	32.5
Vertex (V10)	2×1,500	28.0
Valour (V9)	2×1,500	28.5
Viking (V11)	2×1,500	27.5
Alpha 1	2×1,900	26.0
Alpha 2	2×900	18.0
Alpha 3	2×900	18.0

Shell operates 2 tugs approximately 1,500 b.h.p. A number of privately owned salvage tugs make the port their base.

Tugs join anywhere in port limits by pre-arrangement with Pilots. Normally ship's line used. All PSA and Shell tugs carry tow ropes for use if required. PSA charge for use of tow rope.

BERTHING: Vessel's Agents should submit to Authority a Schedule "A" (Application for Berth) giving overall length, maximum draft alongside, cargo particulars, ETA and ETD of, and Dangerous Cargo Declaration listing out dangerous cargo (including petroleum products and explosives) on board vessel at least 48 hours before berth required.

BERTHING FACILITIES:

NOTE: All depths are reduced to Chart Datum unless otherwise stated. *Only controlling depths that are shallower than the depths alongside are listed.

CARGO HANDLING FACILITIES: *Keppel Wharves:* Vessels worki only general cargo will normally be berthed at the Keppel Wharves. Th is the largest of the 5 gateways of Port of Singapore Authority, havi marginal wharves of 4.8 km. that are capable of accommodating vessels at one time. There are well-ventilated transit sheds a warehouses totalling 133,400 sq.m., and 61,984 sq.m. of concre hardstanding for open storage.

Tanjong Pagar Container Terminal: Length of 6 main berths is 1,909 Able to handle 6 third-generation vessels at one time. 18 container qu cranes of 35 tonnes average lifting capacity are available, feeder be 238 m. for coastal vessels and a cross berth of length 213 m. Th container freight stations, for stuffing and unstuffing operations presen have an approximate covered area of 34,779 sq.m. The stacking ya of approximately 28.5 hectares can accommodate some 31,000 TE stacked 2 to 5 high.

Bunker facilities are available. Bunker fuel can be pumped at the ra of 1,000 tonnes/h. through 18 in. diameter mains. There are 48 outle along the quay. Marine and fresh water are also available.

Sembawang Wharves: The Port of Singapore Authority operat 5 berths at the Sembawang Wharves, situated North of Singapore. Th length of the berths totals 822.67 m., with covered storage spa available total 51,100 sq.m. It is geared towards handling of low-valu high volume homogeneous cargoes like bulk sawn timber, logs, grai and fertilisers. There is also 1 container quay crane of 35 tonnes lifti capacity.

Jurong Port: The port is a bulk-handling facility to serve the Juro Industrial Estate. The marginal wharves of 1,792 m. can accommoda 10 ocean-going vessels. In addition, there is a 172 m. wharf for coas shipping. There are 85,652 sq.m. of covered storage and 234,068 sq of open storage space.

The terminal has facilities for the discharge of grain (by elevato sugar, fertilisers, cement, clinker, sulphur, etc. Shore bulk-handl cranes are used.

The equipment includes 2 kangaroo crane unloaders with capacity 350 – 450 tonnes/h. Two gantry type unloader cranes each with capac of 450 tonnes/h. Grain silos with capacities up to 84,000 tonn 4 pneumatic grain handling units with discharging capability of 15 200 tonnes/h./unit. Two units of scrap iron unloaders capable discharging scrap iron and pig iron at 150 tonnes/h.

Pasir Panjang Wharves: 2,320 m. of wharves which can accommoda 23 lighters, 6 LASH barges, 9 coastal vessels and 3 ocean-going vess at any one time. There are 7 transit sheds covering 55,750 sq 1 back-up shed 22,296 sq.m., 10 warehouses 163,108 sq.m. (of the 151,068 sq.m. outside the Free Trade Zone) and some 128,297 sq of open storage area. 2 additional yards of 4.3 hectares and 1.4 hecta available.

Telok Ayer Wharves: This gateway caters for coastal vessels a lighters/barges. There is a total of 744 m. of wharves for lighters a coastal vessels. With land reclamation carrying on at this place, 5 m berths can accommodate vessels with a draft of up to 6.4 m.

Port Circular No. 45/85: *Dated: 28th May, 1985*

HEIGHT RESTRICTED AREA AT KEPPEL HARBOUR

1. In pursuance of Regulation 37(2) of the Singapore Port Regulations 1977, I hereby declare that as from 15th June, 1985, the waterway within the Keppel Harbour bounded by the following geographical co-ordinates shall be a Height Restricted Area (HRA):

	Latitude (N.)	*Longitude (E.)*	*Position*
(a)	01° 15.598′	103° 48.496′	Rimau Light Beacon
(b)	01° 15.748′	103° 48.410′	Berlayar Light Beacon
(c)	01° 16.050′	103° 50.028′	A position at West Wharf
(d)	01° 15.806′	103° 50.064′	A position at Pulau Brani
(e)	01° 15.408′	103° 49.933′	A position at Pulau Brani
(f)	01° 15.282′	103° 49.933′	A position at Sentosa

2. The HRA shall be a prohibited area for any vessel in excess of 52 m. in height.

3. The HRA shall be a restricted area for any vessel in excess of 48 m. but not more than 52 m. in height. The Owner, Agent or Master of such vessel shall prior to the vessel entering, shifting or leaving the HRA obtain the written approval of the Port Master and comply with such conditions as he may impose.

4. No vessel while within the HRA shall be modified to attain a height in excess of 52 m.

5. Subject to paragraph 4 the Owner, Agent or Master of a vessel which is to be modified to attain a height in excess of 48 m. while within the HRA shall prior to such modification give the Port Master notice in writing of the intention to modify and comply with such conditions as he may impose.

6. For the purposes of the Circular, the "height of a vessel" shall be the height of the vessel measured vertically from the waterline of the vessel to the highest point of the vessel including its cargo, structure or equipment on board.

STEVEDORES: Labour should be ordered by 0900 hrs. for 2nd shift (1500 to 2300 hrs.) on same day and by 1300 hrs. for 1st shift (0700 to 1500 hrs.) for next day, by 1100 hrs. for 3rd shift (2300 to 0500 hrs.) on same day.

Under normal circumstances no work is performed during meal hours, 1100 – 1200 hrs. and 1830 – 1930 hrs. unless the ship is classified as a "key" vessel or the Agent orders work during the meal hours.

MEDICAL: When infectious disease not suspected, permission will be granted by Port Health Officer to Agent to take doctor on board and remove the patient, if necessary, to hospital. Preferably as much notice as possible. Several hospitals, General Hospital, Gleneagles, Mt. Alvernia to name a few. Cholera, plague, etc., are not endemic in Singapore.

Also see "Radio" – Medical Advice to Ships.

TANKERS: Bunkering and discharge facilities available at Eastern and Western Petroleum Anchorages or installations at Pulau Bukom, Pulau Ayer Chawan, Tanjong Penjuru, Tanjong Berlayer, Jurong and Pulau Merlimau.

PSA operates a Slop and Sludge Reception and Treatment Centre at Pulau Sebarok with facilities for the disposal of slops, sludge, tank cleaning, water and dirty ballast. Also see "Pollution".

Smoking not permitted during period tanker alongside PSA wharves.

Grades permitted for discharge along PSA wharves:
(a) marine diesel oil,
(b) fuel oil.

Shell

Pulau Bukom, 4.6 km. off the S.W. coast of Singapore – 10 berths and a single buoy mooring (01° 11.47′ N., 103° 47.53′ E.). Depth of water in approach is 18.3 m. LWOST. Fresh water, fuel oil, gas oil and diesel oil available.

Tank cleaning is carried out alongside or in Roads, as arranged with Pulau Bukom.

Shore tankage for slops/dirty ballast is limited to 15,000 cu.m. for all purposes. Each vessel is normally limited to 400 cu.m., although larger quantities *may* be accepted by prior arrangement, giving preferably 7 days' notice. Waxy slops are only received on Wharves 6, 7 and 8. When waxy slops are on board for discharge, vessels are requested to advise Pulau Bukom 48 hours in advance in which case quantity must be stated. Waxy slops should be segregated if other slops are carried.

The refinery has a refining capacity of 23 million tonnes per annum. It manufactures LPG, petrol, aviation turbine fuel, kerosene, gas oil, diesel fuel, solvents, fuel oil, lub oil and bitumen for local and overseas markets. There are 200 oil storage tanks with over 3 million tonnes capacity. All grades of bunkers are available 24 hours a day.

Notes:
(1) P.S.A. will not moor vessels with actual displacement exceed that stipulated.
(2) For guidance only. Actual length is governed by a minimum separation of 150 ft. from the adjacent vessels.
(3) Includes height of manifolds above deck.
(4) P.S.A. required an U.K.C. of 1.0 m. whilst manoeuvring.
(5) For guidance only. Actual number of tugs is dictated by prevailin conditions and assessment of P.S.A. pilot.
(6) Vessels up to 140,000 d.w.t. *on spot basis only*, provided oth parameters are met.

Operating Limits for the Singapore Esso/Mobil SBM: July 1989.

1. *Vessels from 80,000 d.w.t. to 150,000 d.w.t.:*
   - (1.1) Vessels up to 280 m. LOA, and with an arrival draft of 15.0 m. (49 ft.) or less, can be moored at any time during day or night under any tidal direction and strength.
   - (1.2) Vessels with an arrival draft exceeding 15.0 m. (49 ft.) but less than 20.4 m. (67 ft.), can be moored during the day or night provided the tide is flooding.
   - (1.3) Vessels with an arrival draft up to 20.4 m. (67 ft.) salt water are accepted all year round.
   - (1.4) Vessels shall be fitted with at least one set of OCIMF's standard tongue type bow chain stopper (AKD) for securing 76 mm. (3 in.) diameter SBM mooring chafe chain(s).
   - (1.5) Timely use of vessel's segregated ballast tanks (SBT) is to be maximised, so as to minimise the vessel's freeboard. The vessel must maintain a midship draft of not less than 7.0 m. (23 ft.), a trim below 6.1 m. (20 ft.) and a forward draft of not less than 4.0 m. (13 ft.) at all times.
   - (1.6) If ballast capacity in the SBT alone cannot maintain the drafts and trim as stated in (1.5), then timely ballasting into cargo oil tanks (COT) concurrent with cargo discharge shall be carried out with double valve segregation, at both suction and discharge sides of the cargo.

2. *Vessels from 150,000 d.w.t. to 252,000 d.w.t.:*
   - (2.1) Vessels up to 280 m. LOA and with an arrival draft of 15.0 m. (49 ft.) or less, can be moored during day or night under flood or ebb tide. However, vessels shall be programmed to reach the SBM and moor with tidal rates not exceeding 1.5 knots.
   - (2.2) Vessels with an arrival draft exceeding 15.0 m. (49 ft.) but less than 20.4 m. (67 ft.) can be moored during the day or night provided the tide is flooding, and the vessels shall be programmed to reach the SBM and moor with flood tidal rates not exceeding 1.5 knots.
   - (2.3) Vessels with an arrival draft up to 20.4 m. (67 ft.) salt water are accepted all year round.
   - (2.4) Vessels shall be fitted with 2 sets of OCIMF's standard tongue type bow chain stoppers for securing 76 mm. (3 in.) diameter SBM mooring chafe chains.
   - (2.5) Timely use of SBT is to be maximised, so as to minimise the vessel's freeboard. The vessel must maintain a midship draft of not less than 7.0 m. (23 ft.), a trim below 6.1 m. (20 ft.) and a forward draft of not less than 4.0 m. (13 ft.) at all times.
   - (2.6) If ballast capacity in the SBT alone cannot maintain the drafts and trim as stated in (2.5), then timely ballasting into COT concurrent with cargo discharge shall be carried out with double valve segregation at both suction and discharge sides of the cargo.

3. *Vessels from 252,000 d.w.t. to 285,000 d.w.t.:*
   - (3.1) Vessels with an arrival draft up to 20.4 m. (67 ft.) salt water, and an arrival displacement up to 330,000 metric tons (324,803 long tons) are accepted all year round.
   - (3.2) Vessels can be moored during the day or night provided the tide is flooding, and the vessels shall be programmed to reach the SBM and moor with flood tidal rates not exceeding 1.5 knots.
   - (3.3) Vessels shall be fitted with 2 sets of OCIMF's standard tongue type bow chain stoppers for securing 76 mm. (3 in.) diameter SBM mooring chafe chains.
   - (3.4) Throughout the vessel's stay at the SBM during the *Northeast Monsoon Season (November 1st to April 30th),* the vessel must maintain a midship draft of not less than the vessel's sailing draft in light ballast condition or 7.9 m. (26 ft.), whichever is deeper. Also, the vessel's trim must not exceed 6.1 m. (20 ft.), and its forward draft must not be less than 4.9 m. (16 ft.) at all times.
   - (3.5) Throughout the vessel's stay at the SBM during the *Southwest Monsoon Season (May 1st to October 31st),* the vessel must maintain a midship draft of not less than the vessel's sailing draft in heavy ballast condition or 9.1 m. (30 ft.), whichever is deeper. Also, the vessel's trim must not exceed 6.1 m. (20 ft.), and its forward draft must not be less than 6.1 m. (20 ft.) at all times.
   - (3.6) Timely use of SBT is to be maximised, so as to minimise the vessel's freeboard. If ballast capacity in the SBT alone cannot maintain the drafts and trim as stated in (3.4) or (3.5), then timely ballasting into COT concurrent with cargo discharge shall be carried out, with double valve segregation at both suction and discharge sides of the cargo.

4. *Vessels from 285,000 d.w.t. to 303,000 d.w.t.:*
   - (4.1) Vessels with an arrival draft up to 20.4 m. (67 ft.) salt water and an arrival displacement up to 330,000 metric tons (324,803 long tons) are accepted all year round.
   - (4.2) Vessels can be moored during the day or night provided the tide is flooding, and the vessels shall be programmed to reach the SBM and moor with flood tidal rates not exceeding 1.5 knots.
   - (4.3) Vessels shall be fitted with 2 sets of OCIMF's standard tongue type bow chain stoppers for securing 76 mm. (3 in.) diameter SBM mooring chafe chains.
   - (4.4) Throughout the vessel's stay at the SBM, the vessel mu maintain a midship draft of not less than the vessel's sailin draft in heavy ballast condition or 9.1 m. (30 ft.), whichever deeper. Also, the vessel's trim must not exceed 6.1 m. (20 ft and its forward draft must not be less than 6.1 m. (20 ft.) all times.
   - (4.5) Timely use of SBT is to be maximised, so as to minimise th vessel's freeboard. If ballast capacity in the SBT alone cann maintain the drafts and trim as stated in (4.4), then time ballasting into COT concurrent with cargo discharge shall b carried out with double valve segregation at both suction an discharge sides of the cargo.

5. *Engine Readiness:*
   The vessel must be ready to move under its own power during h stay at the SBM. Use of engine may be necessary during tidal chang or wind shift.

6. *Tug Assistance:*
   All tug assistance, for the berthing and unberthing of the vessels and from the SBM, shall be provided by the Port Authority Singapore on the vessel's account. In the event of an emergenc the SBM Operations Superintendent shall have the right to order tu assistance on behalf of the vessel, to safeguard the safety of th vessel and the SBM on the vessel's account.

7. *Ore/Bulk/Oil (OBO) Carriers:*
   For OBO carriers discharging at the SBM, the vessel's Master an or its Chief Officer must ensure that the vessel maintains stabil within its safe operating limits (taking into account the effects of fre liquid surfaces on stability) at all times during the vessel's stay the SBM.

Note: The word "d.w.t." refers to the original design deadweight of vessel in long tons, as built and not to any subsequent 'remarke deadweight.

Cautionary Advices

To prevent damage to the SBM anchor legs and submarine pipe-lin use of anchors is prohibited in the SBM manoeuvring area. The vesse anchors should be properly secured with chain-stoppers prior approaching the SBM.

The SBM is located in a confined position with very limited space swing a vessel. There is a 16 m. (chart datum) shallow patch marke by Bujor Buoy at a distance of 900 m. Southward of the SBM. In th SBM area, except for the approaching sector, there are spots of on 15 m. depth. The condition of the sea bottom is mainly sand and she with scattered hard rocks and an aborted berthing at an advanced sta of the approach poses the risk of a grounding. Speed should not exce 3 knots when approaching the Esso SBM. Cautious approach speed necessary to control the vessel's motion with a minimum use of aste engine.

Berthing Restrictions: In view of the depth of the approach channel, t maximum permissible draft is limited to 67 ft. irrespective of the heig of the tide. The tidal currents set 260° during flood tides with maximu rates of 2.3 knots occurring during ebb tides with maximum rates 1.7 knots occuring during August and September. The specific grav of sea water at the SBM varies between 1.019 and 1.022.

Berthing Procedure: From the pilot boarding location, vessels norma proceed slowly on an Easterly heading toward a point about 1 mile S of the Ajax Shoal Light Buoy where the heading is changed toward t SBM manoeuvring area. Tugs normally join off Ajax Shoal and ass the vessel in slowing down and aligning her port bow to the SB heading the current.

The SBM Operation Superintendent, stationed on the forecast advises the bridge by walkie-talkie of the vessel's distance from SB

Mooring: The mooring consists of 2×150 ft. long×18 in. circumferen nylon hawsers with chafing chains and pick-up lines.

A mooring boat takes the messenger lines from the ship and conne to the pick-up lines. (See "Plan"). Vessels are acceptable only if th fairleads or Panama chocks can receive the chafing chains and installed in accordance with OCIMF guidelines. In this case the chaf chains are secured by means of shackles and snotters fastened mooring bollards. Vessels of this kind should give ample notice to ena Esso Refinery to make the necessary arrangements.

Hose Connection: 2×16 in. over-the-rail hoses are connected to ship's port side manifold by the mooring gang assisted by a winchm from the ship's crew.

Each hose has a butterfly valve and a standard 16 in. ASA flange clear working space of at least 20 in. is needed between the mani and the deck, drip pan or other structure.

A minimum 13 tons SWL derrick is needed for disconnecting the ho from a 250,000 d.w.t. tanker is light condition. The 16 in. tail hoses 35 ft. long.

Caltex

Berth No. 1 (4 breasting dolphins) capable of handling vessels u 100,000 tons displacement. Berth No. 2 (4 breasting dolphins) handle any vessels exceeding 91.4 m. flat sides, up to 32,000 t displacement. Night time berthing at the discretion of the Pilot.

Berth	*Max. Length of Berth* (m.)	*Depth Alongside (Year Surveyed)* (m.)	**Controlling De In Approache* (m.)
No. 1	335	13.0 (1986)	12.6 (1987)
No. 2	183	13.6 (1986)	12.6 (1987)

Bunkering facilities are available at both berths, and water su available at Berth No. 2 only.

Mobil
5 berths and a shared single buoy mooring (Esso/Mobil). Night time berthing at the discretion of the Pilot. At Berth No. 3 day-time berthing and unberthing only possible, on flood tide.

Berth	*Depth Alongside (Year Surveyed)* (m.)	*Draft* (m.)	*Max. Length* (m.)	*Displacement*	*Remarks*
1	14.2 (1983)	13.6	274	85,000/ 120,000	
2	13.1 (1983)	13.0	274	50,000	
3	12.4 (1983)	10.9	198	30,000	Vessels over 115 m. LOA subject to tidal conditions. Night berthing in ballast only.

(Pu. Pesek) SBM	—	20.3	366	285,000	(457 m. swing radius)

B.P. Refinery
Refinery with 3 berths situated at Tanjong Berlayer. Small jetty inside harbour known as Jetty No. 2 can receive small vessels up to 1,000 tonnes (Max. LOA 100 m.) as water depth only 6.3 m. below ACD.

Jetty No. 1 at S.W. side of Tanjong Berlayer can accommodate vessels up to 33,000 tons (Max. LOA 210 m. – 259 m.) at off-shore mooring where dredged channel 11.0 m. below ACD. Berthing cannot be effected for 43 days of year due strong tidal currents.

At Jetty No. 1A which is Northwards extension from Jetty No. 1 trunkway, vessels up to 5,000 tonnes (Max. LOA 140 m.) can be berthed; water depth 7.6 m. below ACD. Simultaneous mooring of vessels at Jetties No. 1 and 1A not allowed as floating hose used to connect Jetty No. 1 to ship at mooring buoys.

Bunkers and fresh water available.

Singapore Refining Co. Pte. Ltd.
Provides 5 berths for bunkering and other services on Pulau Merlimau, an island off the S.W. coast of Singapore. The marine berth can accommodate vessels up to 85,000 d.w.t. and 14 m. loaded draft, refining capacity 170,000 barrels per day. Night time berthing at Pilot's discretion. Fresh water available ex-pipe-line. Bunkers available by barge or pipe-line.

S.B.M. located 2.4 km. S.E. of Sultan Shoal Lighthouse in Selat Sinki. Max. size 320,000 d.w.t.

No. 5	115	11.2 (1986)	7.3 (1986)
PSA SBM (Selat Sinki) 500 m. swing radius		23.0 (1986)	22.8 (1980)

Discharge of crude oil to S.R.C. Refinery. 2 flexible hoses of 600 mm. diameter.

SRC's SPM Questionnaire:

The following questionaire required to be answered by the Master of the vessel for discharging at SRC's SPM.

Answers must be provided at least 72 hours prior arrival.

(AAA) ETA and draft Western pilot boarding ground 2.5 miles W.S.W. of Sultan Shoal Lighthouse.
(BBB) Grade, pour point, quantity, stowage and discharge plan of cargo.
(CCC) Does charter party require COW. If COW to be performed crude wash line must be prepared and tested before arrival.
(DDD) If vessel has AKD bow stoppers for mooring.
(EEE) Distance of fairlead to nearest mooring bitts. 2 sets mooring bitts required.
(FFF) If vessel can provide dead slow engine movements on immediate order whilst secured to buoy.
(GGG) If inert gas system and analysers fully operational.

Please prepare:
(HHH) Port derrick maximum SWL (minimum requirement 10 tons).
(III) (1) 2×16 in. manifolds on port side with flanges minimum 35 mm., maximum 40 mm. thick.
(2) Supply of compressed air at 6 kg./sq.cm. minimum during whole discharge operation near gangway.
(JJJ) Gangway on starboard side.
(KKK) Cargo tanks depressurised on arrival for ullaging, sampling, etc., Conducted by SRC Officials. Therefore grateful for their refreshments or/meals.
(LLL) Accommodation and meals for TMS Mooring Master during entire period of discharge.

Be advised that:
(MMM) Immobilisation of engines not permitted during stay at SPM.
(NNN) Radar and log required for berthing.
(PPP) Bunkering not permitted if no inert gas system.

Please advise:
(QQQ) By VHF to SRC on Hague Plan Channel 5 your confirmed ETA at least 6 hours before.
(RRR) Free water in individual cargo compartments.
(SSS) Slops amount and if loaded on top.
(TTT) If slops required to be discharged.
(VVV) Next Port of Call.

Gatx Terminals
Vessels berth at marine trestle 1,400 ft. (427 m.) offshore. One berth for vessels up to 85,000 d.w.t., max. LOA 320 m. with depth alongside 14.5 m. and 1 for vessels of 5,000 d.w.t., max. LOA 116 m. with depth alongside 13.2 m. 46 operating pipe-lines serve the main berth and 9 pipe-lines serve the subsidiary berth. The terminal handles chemicals and petrochemicals. Total capacity 646,570 barrels in 85 tanks.

Main Berth Dock lines	2× 75 mm. dia.
	3×100 mm. dia.
	34×150 mm. dia.
	6×200 mm. dia.
	1×300 mm. dia.
Subsidiary Berth Dock lines	6×150 mm. dia.
	2×200 mm. dia.
	1×250 mm. dia.

Bunkers and fresh water are not available.

Petro Chemical Corporation of Singapore
Location: 01° 15.9′ N., 103° 43.0′ E.

Berth No. 1 at Pulau Busing in position 01° 14.4′ N., 103° 44.9′ E. Max. LOA 352 m. Depth alongside 17.9 m.

Berth No. 2 in position 01° 14.38′ N., 103° 45.1′ E. Length of jetty 320 m. Depth alongside 17.2 m.

*See "Berthing Facilities".

DENSITY: Usually between 1019 and 1022, unaffected by tide or temperature variations. Variation due to periodic heavy run-off of rain water.

FRESH WATER: Fresh water available at any point of PSA's wharves. PSA also has a fleet of 9 waterboats to supply fresh water to ships anchored within the port limits.

Port of Singapore Authority Port Circular No. 95/87.
Dated 9th November 1987.

SUPPLY OF FRESH WATER TO VESSELS WITHIN SINGAPORE PORT LIMITS

1. Shipowners and Shipping Agents of vessels in need of fresh water are requested to place their orders for water through the telephone, telefax or telex. The details are as follows:–
   Telephone No.: 3212906 or 321907
   Telefax No.: 3212017
   Telex No.: RS 42075
   Answer Back: WBSERV 42075
2. When placing the orders, the following information is necessary for the provision of Waterboat Services.
   a. Name of Vessel.
   b. Call Sign.
   c. Flag.
   d. Type.
   e. g.r.t.
   f. Freeboard.
   g. ROI (Vessels's Rate of Intake).
   h. Date/Time Service Required.
   i. Quantity.
   j. Location.
   k. ETA (Estimated Time of Arrival).
   l. ETD (Estimated Time of Departure).
   m. Agent.
   n. A/C No. (Agent's Credit Account No.).
   o. Contact Person and Tel. No:
      Office:
      Residence:
3. Shipowners and Shipping Agents are to note that, as vessels are serviced on a first-come first-served basis, they are advised to place the orders as early as possible.
4. Master, Owners or Agents of vessels waiting for water supply may contact the Waterboat Office on the VHF Channel 18 to confirm the arrival of the waterboat. Vessels are requested to keep a listening watch on the same VHF Channel so that the Waterboat Office can inform them of any changes on the arrival time of the waterboat.
5. To facilitate the waterboats in locating the vessels requiring water, Masters of vessels are requested to display the following port signals prior to the scheduled time of supply.
   (a) DAY – International Code Flags "CD ZERO"
   (b) NIGHT – At or near the masthead, 2 all round lights in a vertical line, not less than 2 m. apart, the upper being green and the lower white.
6. Port Circulars No. 58 of 1983, 21 of 1985 and 22 of 1985 are hereby superseded.

FUEL: All grades available alongside PSA wharves and ex-installation, otherwise by barge. Marine diesel oil. Heavy fuel oil at 180 cst to 380 cst. Blended fuel from 60 cst to 180 cst.

FIRE PRECAUTIONS: Normal precautions with respect to cargo vessels, vessels under repair, etc. Fire boats available. Oil companies apply own regulations at installations.

CONSULS: Consuls, Embassies and High Commissions. Arab Republic of Egypt, Argentina, Australia, Austria, Bangladesh, Belgium, Brazil, Bulgaria, Canada, People's Republic of China, Denmark, Finland, France, Federal Republic of Germany, Great Britain, Greece, India, Indonesia, Ireland, Israel, Italy, Japan, Democratic People's Republic of Korea, Republic of Korea, Malaysia, Myanmar (Burma), Netherlands, New Zealand, Norway, Pakistan, Panama, Philippines, Poland, Romania, Saudi Arabia, Spain, Sri Lanka, Sweden, Switzerland, Thailand, Union of Soviet Socialist Republic, USA.

REPAIRS/DRY DOCKS: All types of repairs (hull, engine and electrical including navigational aids) carried out. Facilities also available for repairs out afloat while vessel in anchorages.

*Presently on charter to PSA in Southern waters.

SURVEYORS: A.B.S., B.V., Det Norske Veritas, Lloyd's Registe N.K.K., G.L., Polski Register Stratkow, China Corporation Register Shipping and Salvage Association.

GANGWAY/DECK WATCHMEN: Recommended, particularly in Road Agents normally arrange. Cost varies.

Piracy: Vessels have been boarded by pirates whilst travelling at f speed.

On one occasion 5 hooded people armed with machetes boarded th vessel and made their way into the Master's cabin. The Master at th time was on the bridge but came down to his cabin for a moment, whe he was seized by the gang and repeatedly hit with machete's handle Fortunately the Master only suffered minor injuries.

After a short time, having tried unsuccessfully to force the ship's saf the group of pirates abandoned the vessel, stealing only relatively sma items like binoculars, the Master's Passport, etc.

The Master reported the incident to the Singapore Authorities.

Report: February 1987.

At 0230 hrs. one of our vessels was boarded by 6 pirates whe passing the Philip Channel in Singapore Strait. The pirates were arme with cutlasses and stole cash and other valuable items. The Master an the crew did not attempt any resistance and nobody was harmed. Th pirates disembarked immediately after stealing whatever they cou carry.

OPENING/CLOSING HATCHES: Conventional hatches by stevedore Mechanical hatches usually by ship's crew.

CERTIFICATES: If dangerous drugs on board, an export authorisati from country of origin and an import authorisation from country to whic drugs being conveyed should be available for sighting and endorsemen

All vessels	Certificate of Registry, Tonnage Certificate, Certificate of Insurance or other financial security as applicable under CLC '69 and International Loadline Certificate equivalent.
Passenger Ships	Passenger Safety Certificate issued under SOLAS Conventions.
Cargo Ships	Safety Equipment Certificate (if over 500 g.r.t.) or equivalent. Safety Radiotelegraphy Certificate or Radiotelephony Certificate whichever is applicable.

CUSTOMS ALLOWANCES: Tobacco: For crew and adult tran passengers – first day of arrival 50 cigarettes or 15 cigars or oth tobacco 60 gms.; and for each subsequent day to the maximum 7 days. 25 cigarettes or 7 cigars or other tobacco 30 gms.

Wines: 1 bottle per day to maximum of 8 days. Spirits: 0.875 bot (in opened bottles) on first day of arrival and 0.125 bottle per day rest of 7 days.

CARGO GEAR: Possession of valid test certificates. At PSA wharv all cargo gear should be inspected by an Authorised Port Officer befo use.

REPATRIATION: Ships' Agents responsible for repatriating seame Mercantile Marine Office undertakes repatriation of distressed Brit seamen on behalf of Board of Trade, United Kingdom, whene necessary. Seamen who hold proper documents which ensure entry i their countries of origin, citizenship and destination are normally gran Special Passes after discharge for purpose of repatriation.

AIRPORT: 20 km. from city. Regular and frequent services to all pa of the world.

TIME: GMT plus 8 hours. No seasonal change.

HOLIDAYS: Work can be arranged on all Public Holidays. New Yea Day; Chinese New Year; Hari Raya Haji; Good Friday; Labour Day (May); Vesak Day; National Day (9th August); Deepavali; Hari Ra Puasa; Christmas Day.

POLICE/AMBULANCE/FIRE: City Police 999; Fire/Ambulance o 328111; Flag signal: CB3. VHF Channels 12 or 16. PSA Police 2712 ext. 2222; Fire ext. 2209 or ext. 2333; Ambulance 2712211.

We quote the contents of Port Circular No. 123 of 1984 issued by Port of Singapore Authority:

Ships Requiring Police Assistance:

1. The shipping community is hereby reminded that vessels wi Singapore waters can directly contact Marine Police for assistance those matters falling within police jurisdictions.

2. For such assistance, vessels should establish radio contact on:

VHF Channel	*Hours*	*Ship Tran./Rec. Frequencies*	*Call sign (Voice)*
21	24	157.05/161.65 MHz	Marine Police
or			
7	24	156.350/160.950 MHz	Marine Police

Giving the following information:
(a) Name of vessel.
(b) Location of vessel.
(c) Nature of emergency.
(d) Nature of police assistance required.

3. Vessels within the port and requiring immediate police assistance shall display following signals in a conspicuous position to facilitate easy identification by the Marine Police:
By Day: International Code "CB3".
By Night: Red-Red-White (Red on top).

4. Vessels may in addition sound on their whistle or siren at intervals of about 1 minute three prolonged blasts to attract the attention of Marine Police personnel in the vicinity.

5. The shipping community is advised to illuminate and step up surveillance onboard its vessels, particularly those moored just outside the outer limits of the port, to discourage unauthorised boarding of its vessels.

TELEPHONES: Available on board vessel at PSA wharves only.

SERVICES: Following additional services available: Cleaning and preparing ship's tanks. Cleaning, scaling and painting. Insulation. Interior decorating and furnishing. Refrigeration and air-conditioning. Chemical cleaning of boilers, etc. SCAMP underwater cleaning service. Compass adjusting and DF Calibration. Radar and Radio servicing depots.

SHORE LEAVE: No restriction on crews landing after Immigration and Health formalities have been satisfactorily completed. With rare exception (Communist Country Crews), all *bona fide* crew of a vessel allowed shore leave on strength of their passports, discharge books or identification cards.

The following circular was issued in May 1973 by the Singapore Port Authority.

"In line with the Government's decision that action should be taken to deal with the 'long-hair' problem as part of a campaign against undesirable alien influences, the Port of Singapore Authority would be most grateful for your co-operation in implementing this decision by advising all your employees, including ships' officers and Crew members, wishing to come ashore to be more tidy in their general appearance.

"To assist you to decide whether an individual's hair is long, the following definition of long hair may be used as a guide:
(i) Hair reaching below an ordinary shirt collar;
(ii) Hair covering the ears;
(iii) Hair falling across the forehead and touching the eyelashes."

Shipmaster's Report: July 1987.

There is a good hovercraft service from Pulau Bukom to Pasir Panjang, also a less frequent ferry service.

IDENTIFICATION CARDS: Sect. 22 (1) (c) of Ordinance provides for issue of Seamen's Identification Card as set out in First Schedule to the Immigration Regs. 1966, but rarely issued nowadays. Normally accept Passports, Discharge Books or any identification cards issued by Masters of vessels for purpose of granting shore leave to Crew members, provided these documents sufficiently identify person concerned

Gate Passes issued against Crew List at wharves and installations. No passes required from roads, although some form of identification advisable.

POLLUTION: No oil or mixture containing oil shall be discharged into Singapore waters from any vessel. The Master or person in charge of the vessel committing such an offence shall be liable on conviction to a fine not less than 500 dollars and not exceeding 500,000 dollars or to imprisonment for a term not exceeding 2 years or to both such fine and imprisonment.

No refuse, garbage, waste matter, substance of a dangerous or obnoxious nature or trade effluents to be discharged from any vessel into Singapore waters. The Master or the person in charge of the vessel committing such an offence shall be liable on conviction to a fine not exceeding 10,000 dollars or to imprisonment for a term not exceeding 2 years or to both such fine and imprisonment.

If any oil or mixture containing oil is discharged into Singapore waters:
(a) for the purpose of securing the safety of the vessel or of preventing damage to the vessel or her cargo, or of saving life; or
(b) is found to be escaping, or to have escaped into Singapore waters from a vessel in consequence of damage to the vessel, or by reason of leakage, the Master or the person in charge of the vessel shall report the occurrences to the Director of Marine and the Port Master. Failure to do so shall be an offence and shall be liable on conviction to a fine not exceeding 5,000 dollars.

Slop Reception: The P.S.A. Slop and Sludge Reception and Treatment Centre at Pulau Sebarok has a total tank capacity of 82,000 cu.m.

Berthing facilities consist of 2 piers – Piers 1 and 2. Depths alongside: Pier 1 – 12.8 m., Pier 2 – 11.0 m.

The Centre can accommodate vessels up to an overall length of 264 m. and a displacement of 45,800 tonnes

7 barges with a total capacity of 8,500 cu.m. are used for the reception of slops/tank cleaning water at anchorages and transported to the Centre for disposal.

Communications: VHF Station Channel 61.

Safety and security at the island is well provided and maintained by both the Authority's Police Force and Fire Brigade.

Also see "Shipmaster's Report" and "Tankers – Shell".

DELAYS: Normally none. Occasional congestion due to prolonged rainy weather or other abnormal conditions.

NOTICES: *Port of Singapore Authority – Port Circular No. 18 of 1990. Dated 15th March, 1990.*

CHANGE OF ANCHORAGE FOR HEALTH/IMMIGRATION CLEARANCE AND USE OF ANCHORAGES FOR VESSELS ARRIVING FROM EAST AND WEST

1. *Health/Immigration Clearance*

Masters, Owners and Agents of vessels are hereby informed that with effect from 0600 hrs. on 26th March 1990, the use of the Western Quarantine/Immigration Anchorage for Health/Immigration Clearance will cease until further notice.

Vessels arriving from the East or West requiring Health and/or Immigration Clearance are to make use of the Eastern Quarantine/Immigration Anchorage.

2. *Use of Anchorages in the Eastern and Western Sectors*

Vessels arriving from the East can make use of the appropriate anchorages in the Western Sector, and likewise vessels arriving from the West can make use of the appropriate anchorages in the Eastern Sector. However, before doing so, they should ensure that they have obtained the necessary Health and/or Immigration Clearances.

3. *Use of Controlled Anchorages*

Masters/Owners/Agents requiring to anchor their vessels in any of the following anchorages are to obtain prior permission from the respective Units of the Port Master's Department:

(a) Tuas Explosives Anchorage (b) Western Dangerous Goods Anchorage (c) Laid-up Vessels Anchorage (d) Selat Pauh Anchorage	Clearance & Permit Unit
(e) Eastern Special Purpose Anchorages 'A' and 'B' (f) Western Reserved Anchorage (g) Changi General Purposes Anchorage	Enforcement Unit

Each application should be made in advance by letter or telex stating the name, g.r.t. and maximum draft of the vessel, the required anchorage, the purpose and the period of stay at the anchorage. Vessels intending to use the Eastern Special Purpose Anchorage are to state the height of the highest point of the vessel/cargo above waterline.

4. *Pilotage*

Vessels requiring pilotage services are required to use the appropriate Pilot Boarding Grounds specified below:

(a)	Vessels from the West proceeding directly to Berths/Anchorages in the Western Sector (with Advanced Health and Immigration Clearance)	Western Boarding Ground (off Sultan Shoal)
(b)	Vessels from the West proceeding directly to Anchorages in the Eastern Sector (with Advanced Health and Immigration Clearance)	Eastern Boarding Ground A
(c)	Vessels from the West proceeding directly to Keppel Wharves (with Advanced Health and Immigration Clearance)	Eastern Boarding Ground A or Western Boarding Ground (depending on the state of tide)
(d)	Vessels from the East proceeding directly to Berths/Anchorages (with Advanced Health and Immigration Clearance)	Eastern Boarding Ground A or B as arranged with the Pilotage Section.
(e)	Vessels from the East or West requiring Health/Immigration Clearance	Eastern Boarding Ground A

5. The foregoing directives are issued pursuant to Section 67 of the Port of Singapore Authority Act (Cap 236).

6. Port Marine Notice No. 47 of 1989 dated 12th December 1989 will be cancelled with effect from 26th March 1990.

Port of Singapore Authority – Port Circular No. 56/86 Dated 1st September, 1986.

PLACING OF PILOTAGE ORDERS.

1. This circular supersedes Port Circular No. 125 of 1984 with effect from 1st October, 1986.

2. To reduce the congestion of telephone/VHF calls, shipping Agents are requested to place pilotage orders and any amendment by telex. However, the pilot office will accept orders/amendments by telephone if the orders/amendments are placed after normal office hours or during weekends and public holidays, for the convenience of shipping Agents. In cases where Agents are unable to send the orders by telex, they may also place the orders by telephone.

3. The telex and telephone numbers for placing of pilotage orders/amendments are as follows:

Service Area	*Telex*	*Telephone*
East Johor Strait	RS 35962 Answer back SEMCO 35962	5427112/ 5427113
All other areas in the port	RS 22896 Answer back PORTPM 22896 RS 34970 Answer back PORTPM 34970	3211764/ 3211765/ 3211766

4. A "hands-on" operation to replace the present system of processing pilotage orders has been designed to enhance services to port users through more efficient means of capturing, processing and dissemination of shipping information. The system will enable direct entry of pilotage orders received through telephone/telex/VHF into the computer. When implemented, this will eliminate the present 'chit' system and pave the way for more use of PSA Databox facility, by which port users may be able to place their orders or amendments through their own personal computers linked to PSA mainframe computer. Users will also be able to benefit from real time information. (More details on the PSA Databox facility will be released at a later date). Operationally, the "hands-on" system will change the present flow in the processing of pilotage orders. Replies to pilotage orders placed through telephone/telex will be standardised.

5. With effect from 1st October, 1986, the current practice of confirming pilotage orders by telephone while the Agent holds on to the telephone line will be discontinued. Upon receipt of a pilotage order by telephone, the pilot office will process and return the call by telephone or telex. Agents are required, as in telex orders, to standby for up to 30 minutes for the confirmation of acceptance of the order from the pilot office. The pilot office will also provide a *reference number* for an accepted pilotage order which is replied through the telephone. In exceptional circumstances where no confirmation is received after 30 minutes, the Agents are required to call the pilot office to check on the orders.

6. With effect from 1st October 1986, Agents need only provide full information for pilotage orders for the *first pilotage move of the vessel in the port*. For *all subsequent moves of the vessel within the same call*, reduced information is required. Other particulars such as flag, type, g.r.t. and length need only be given if there are changes.

7. We are also pleased to inform that the following waivers of pilotage amendments charges for amendments to vessel's ETAs by Masters will be given:–

(a) For the *first* amendment/confirmation to ETA (of less than 6 hours notice) which is within half an hour of the service required time.

(b) For subsequent amendments, which are within 15 minutes of the *first* confirmed ETA.

8. To take advantage of the waivers, it is recommended that Masters/Agents update vessels' ETAs, if required about 6 to 7 hours before service is required. Masters/Owners/Agents are advised that amendments to ETAs other than that stated in paragraph 7 (a) and (b) giving less than 6 hours notice will be chargeable.

9. For pilotage service to berths/terminals other than the Port Authority's wharves, Agents are required to ensure the availability of such berths/terminals by liaising closely with the respective private operator.

Port of Singapore Authority – Port Circular No. 121/87.
Dated 23rd December 1987.
ADVANCED PORT CLEARANCE SCHEME.

1. This circular replaces Port Circular No. 43 of 1985. The main amendments in this circular are made to follow the revised PSA Act (Chapter 236) and to change the anchorage.

2. The Advanced Port Clearance Scheme is available to vessels of more than 20,000 g.r.t. which intend to stay in port for not more than 8 hours for the purpose of changing crew or taking ship supplies, other than bunkers, water or cargo.

3. The Sultan Shoal Quarantine and Immigration Anchorage shall remain to be the anchorage for such purpose until 31st January 1988. Thereafter, from 1st February 1988, the anchorage for such purpose shall be the Changi General Purposes Anchorage which is bounded by the following co-ordinates:

Latitude (N)	*Longitude (E)*
01° 20.000′	104° 03.167′
01° 20.000′	104° 03.706′
01° 18.880′	104° 04.820′
01° 18.880′	104° 04.281′
01° 19.550′	104° 03.667′

4. The application for an advanced port clearance can only be made not more than 24 hours prior to the arrival of the vessel. The application must be accompanied by the following documents:–

(a) A confirmation by the Master that his vessel is in possession of all relevant and valid statutory and safety certificates. The format for the confirmation is in Appendix I attached. The Master's confirmation shall be made through his Owner, Agent or local representative via telex or telegram and addressed to the Port Master, Singapore.

Note:

The required statutory and safety certificates are as follows:–

- (i) International Load Line Certificate;
- (ii) Passenger Ship Safety Certificate (applicable only to passenger ships);
- (iii) Cargo Ship Safety Equipment Certificate;
- (iv) Cargo Ship Safety Radiotelegraphy Certificate;
- (v) Cargo Ship Safety Construction Certificate;
- (vi) Exemption Certificate (if applicable);
- (vii) Permanent or Provisional Certificate of Registry;
- (viii) "Certificate of Fitness" issued pursuant to the International Maritime Organisation (IMO) Gas Carrier Code or the IMO Bulk Chemical Code (applicable to a Liquefied Gas Carrier or a vessel carrying dangerous chemical in bulk whichever the case may be);
- (ix) Certificate of Insurance or other security satisfying the requirements of Article VII of the International Convention on Civil Liability for Oil Pollution Damage, 1969. (This is mandatory for any vessel carrying in bulk cargo of more than two thousand tons of any persistent oil).

(b) The Owner, Agent or local representative making the application shall furnish the Port Master with a letter of undertaking. The format for the undertaking is in Appendix II below. The applicant is required to comply with a list of conditions stated on the obverse side of the letter of undertaking. (Copies of the letters of undertaking are available at the Port Clearance Office, 3rd storey, Tanjong Pagar Complex).

(c) The applicant is required to complete and submit the standard General Declaration Forms for vessel's arrival and departure.

(d) The prevailing port dues chargeable to the vessel should be settled at the time of application.

5. All declarations, confirmations and undertakings furnished to the Port Master should be in all respects true and accurate. Section 121 of the PSA Act, Chapter 236 states that:–

> "Any person who makes any negligent mis-statement or any statement which is false in any material particular in any return, claim or other document which is requested or required by the Authority shall be guilty of an offence and shall be liable on conviction to a fine not exceeding $5,000 or to imprisonment for a term not exceeding six months or to both."

6. The undersigned (Port Master) can be contacted at Tel. No. 3211552 for clarification with regard to the Advanced Port Clearance Scheme.

CONDITIONS ATTACHED TO THE UNDERTAKING
(Contained on the Obverse Side)

1. If vessel stays over 8 hours in port, the extra dues payable und Tariff item 1d shall be paid to the Port of Singapore Authority. The vess will immediately be shifted to another anchorage if the Port Master s directs.

2. Dues paid to the Port of Singapore Authority shall not be refundab in the event of the vessel deciding not to call into Singapore.

3. If the gross tonnage of the vessel was subsequently found to b different from that declared, the difference in the dues chargeable to th vessel shall be settled by the Agent named overleaf.

4. If the vessel does not arrive/depart within 48 hours from the time the issue of the Advance Port Clearance Certificate, it shall be returne for cancellation and a re-application made if so required.

5. The vessel's last Port Clearance Certificate and her crew an passengers lists shall be submitted within 2 days after the arrival of th vessel.

6. To comply with the requirements of the Director of Marine (Mar Department) and other relevant Authority e.g. Immigration Departme For Customs requirements, the vessel should have on board th documents to account for the cargoes on board.

7. If the Advance Port Clearance Certificate is not used, it shall b returned to the Port Clearance Office immediately. If the vessel is bei officially detained in port or if the Port Master so requires, the same sh be returned to the Port Clearance Office immediately.

8. To advise the Master to report to the Port Operations Centre or th appropriate Control Station via VHF radio upon vessel's arrival and ag prior to leaving the anchorage.

9. Not to load the vessel with any bunkers, or water or cargo.

10. Submit a copy of the Master's Letter of Confirmation when apply for the Advanced Port Clearance Certificate.

11. To inspect the validity of the relevant safety and statutory certifica and return the Advanced Port Clearance Certificate immediately to th Port Master if any of the safety and statutory certificates of the vess are found invalid and to report so to the Port Master.

Port of Singapore Authority – Port Circular No. 87/87
Dated 30th October 1987.
TRACKING OF CHEMICAL CARRIERS.

1. For the purpose of this Port Circular, a chemical carrier means any vessel which is carrying or has previously carried as a whole or part of the last cargo in bulk any of those dangerous chemicals listed in Chapter 17 of the International Maritime Organisation's (IMO) International Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (IBC Code).
   Note: A vessel shall remain to be considered as a chemical carrier so long as any of her cargo tanks or cargo system is not completely cleared and removed of any such residual cargo.
2. Pursuant to Regulation 3 of the Singapore Port Regulations 1977, the Owner, Agent, Master or person-in-charge of a 'chemical carrier' as defined in paragraph 1 above, is hereby directed that with effect from 1st December 1987, he shall notify the Port Master as follows:
   a) For an arriving vessel, the notification shall be given under paragraph 3 (1) of Port Circular No. 88 of 1987 (see "VHF"), entitled "Notification of Arrival and VHF Reporting Procedure", and in the manner as described in paragraph b (iv) below; or
   b) For a vessel in port which intends to load any of those dangerous chemicals referred to in paragraph 1 above, the notification shall be given by Telex No. RS 34970 or by Facsimile No. 3212016. Such notification shall contain the following information in the format shown below:

TRACK CHEM
   i) Name of vessel.
   ii) Gross registered tonnage (g.r.t.).
   iii) Place of loading e.g. GATX Terminal Berth.
   iv) Indicate "Chemical (s) under IBC Code" – if vessel intends to load or has on board any of those dangerous chemicals listed in Chapter 17 of the IMO IBC Code; or
   indicate "NA" if vessel does not have such cargoes or is not considered as a "chemical carrier". (See Note in paragraph 1.)
3. For your reference, we enclose the list of dangerous chemicals (13 pages in all)(Editor's note – not reproduced due to length of list), which appear in Chapter 17 of the IMO IBC Code (1986 Edition). You are advised to keep the list updated. If you have any queries on this subject, please call 3212295 or 3211185 or write to:

Port Master's Department,
No. 21-07 Tanjong Pagar Complex,
7B, Keppel Road,
Singapore 0208.
Telex: RS 34970.
Fax: 3212016.

Port of Singapore Authority – Port Circular No. 105/87.
Dated 19th November 1987.
HEIGHT RESTRICTED AREA OFF CHANGI/BEDOK

1. Pursuant to Section 67 (c) of the Port of Singapore Authority Act (Cap 236), 1985, the Port Master hereby directs that with immediate effect, no vessel whose height measured vertically from the waterline of the vessel to the highest point of the vessel including its cargo, structure or equipment on board, exceeds 15.0 m. shall enter, transit or anchor in the sea off Changi/Bedok Area.
2. The area referred to above is bounded by the following co-ordinates:

	Latitude	*Longitude*	*Buoy*
From a position at (1)	01° 18′ 26″ N.	103° 56′ 26″ E.	
to a position at (2)	01° 17′ 30″ N.	103° 59′ 05″ E.	'Padang'
to a position at (3)	01° 17′ 39″ N.	104° 01′ 12″ E.	'Airway'
to a position at (4)	01° 21′ 06″ N.	104° 03′ 07″ E.	'Angler'
to a position at (5)	01° 23′ 12″ N.	104° 00′ 24″ E.	
to a position at (6)	01° 23′ 21″ N.	104° 00′ 03″ E.	

thence along the coastline to the point of origin.

3. Port Circulars No. 26 of 1981 and No. 47 of 1982 are hereby superseded.

Port of Singapore Authority – Port Circular No. 116/87.
Dated 7th December 1987.
TALL VESSELS' MOVEMENTS SOUTH OF CHANGI AIRPORT

1. This is a repetition of Port Circular No. 25 of 1987 with amendments shown by a line in the margin (Not shown). Port Circular No. 25 of 1987 is hereby cancelled.
2. The Civil Aviation Authority of Singapore (CAAS) has requested that Shipyard Operators and Masters, Owners or Agents of vessels with heights exceeding 100 m. intending to conduct intra-port movements (within port limits) which require to transit, leave or move between Longitude (A) 103° 54′ E. and Longitude (B) 104° 05′ E., South and East of Changi Airport, to notify CAAS at least 3 working days in advance of such movements (see "Plan"). This is to allow CAAS to issue a NOTAM (Notice to Airmen) in order to keep aircraft pilots informed of such tall vessels' movements. The following procedure will come into effect on 1st May 1987.
3. *Prior to Movement*
   a) When notifying CAAS as requested above, the following information is to be provided:
      i) Vessel's Registered Name/Call Sign.
      ii) Height of Vessel above waterline.
      iii) Intended Route/Timings (with drawings of routes if possible).
      iv) Point of Origin/Final Destination.
   b) The information should be sent by mail, telex or telefax to the following:

Operations Officer (Air Navigation Services)
Operations Division,
Civil Aviation Authority of Singapore,
P.O.Box 1, Singapore Changi Airport
Singapore 9181.
Telex: RS 21231 AVIATEL.
Fax: 5421231.

4. For clarification or urgent cases, please contact:

a) Office Hours	Operations Officer, (Air Navigation Services), Operations Division, CAAS. Tel: 5412403 or 5412434.
b) Outside Office Hours	Supervisor, Changi Control Tower, CAAS. Tel: 5412410 or 5412416.

5. *On Passage*
   a) Masters of vessels with heights exceeding 100 m. above waterline intending to enter, transit or leave the area defined in Paragraph 1 of this circular are also required to report to Sembawang Control on VHF Channel 21 when passing the longitudes "A" or "B" mentioned above, or when entering or leaving the Traffic Information Area of Serangoon Harbour.
   b) When entering the area, the report required to be made shall contain the following information:
      i) Vessel's Registered Name/Call Sign.
      ii) Height of Vessel above water line.
      iii) Direction of Movement (Eastwards or Westwards).
      iv) Actual time of crossing Longitudes "A" and estimated time of crossing Longitude "B" or vice versa;
      or*
      Actual time of crossing Longitudes "A" or "B" and estimated time of entering Traffic Information Area of Serangoon Harbour;
      or*
      Actual time of leaving Traffic Information Area of Serangoon Harbour and estimated time of crossing Longitude "A" or "B".
      (*whichever is applicable).
   c) When leaving the area, a second report shall be made containing the following information:
      i) Vessel's Registered Name/Call Sign.
      ii) Actual time of crossing Longitude "A" or "B" or entry into Traffic Information Area of Serangoon Harbour.
6. For the purpose of this circular, the height referred to shall be the height of the vessel measured vertically from the waterline of the vessel to the highest point of the vessel including its cargo, structure or equipment on board.
7. In addition to the above reporting procedure, Shipyard Operators, Masters, Owners or Agents are reminded that every vessel of gross registered tonnage of 2,000 tons or above or of a height of more than 30 m. above her waterline are to comply with the Traffic Information System for vessels navigating in Serangoon Harbour stated in Port Circular No. 90 of 1987.

Port of Singapore Authority – Port Circular No. 18/88.
Dated 3rd March 1988.
HEIGHT RESTRICTION FOR VESSELS ENTERING, TRANSITING OR ANCHORING IN THE EASTERN SPECIAL PURPOSES AND THE EASTERN PETROLEUM B ANCHORAGES.

1. Owing to the recent revision of anchorages which came into effect on 1st February 1988, Port Circular No. 106 of 1987 is amended as follows:–

1.1 Pursuant to Section 67 (c) of the Port of Singapore Authority Act (Cap 236), 1985, the Port Master hereby directs that with immediate effect, no vessel whose height, measured vertically from the waterline of the vessel to the highest point of the vessel including its cargo, structure or equipment on board, exceeds 49 m. shall enter, transit or anchor in the height restricted area in the Eastern Special Purposes and the Eastern Petroleum B Anchorages. (See "Plan").

1.2 The height restricted area referred to above is bounded by the following co-ordinates:

	Latitude	*Longitude*	*Buoy*
From a position at (1)	01° 18′ 18″ N.	103° 56′ 37″ E.	
to a position at (2)	01° 18′ 18″ N.	103° 56′ 45″ E.	
to a position at (3)	01° 17′ 30″ N.	103° 59′ 05″ E.	'Padang'
to a position at (4)	01° 17′ 39″ N.	104° 01′ 12″ E.	'Airway'
to a position at (5)	01° 16′ 38″ N.	103° 59′ 19″ E.	
to a position at (6)	01° 16′ 38″ N.	103° 56′ 37″ E.	

thence to the point of origin.

2. Port Circular No. 106 of 1987 is hereby superseded.

Toxic Waste: We quote below text of circular received from the Port of Singapore Authority:

"We would like to remind port users that importation of toxic waste into Singapore is not allowed by the Ministry of the Environment. Vessels carrying toxic waste may not be permitted entry into Singapore port waters. Shipping lines should exercise care in accepting chemicals for shipment to Singapore that can come under the classification of toxic waste."

Piracy Attack: The following is text of a letter received from Singapore National Shipping Association:

"We have received a report from a shipowner that one of their feeder container vessels, trading Singapore, Jakarta and Bangkok, was attacked by pirates on November 4, 1988, between 0000 hrs. and 0300 hrs. in the vicinity of Horsburgh Lighthouse. The ship's Master was reported being kidnapped and there is still no news of his whereabouts.

Members are kindly requested to alert their Masters to take additional precautions when passing through the area."

DEVELOPMENTS: Two conventional wharves at Keppel Wharves to be converted to container handling berths (Berth Nos. 42 and 43). Total length 535 m.

GATX Terminals are to build a third berth to handle vessels of 10,000 d.w.t. – 15,000 d.w.t.

Berths No. K11 and K12 in Keppel Harbour to be converted to a single container berth. The new berth will be 335 m. in length and have a depth of 14.0 m.

Singapore Petroleum to build an oil terminal on Sebarok Island. Completion expected late 1991. Jetty will accommodate vessels of 120,000 d.w.t.

Brani Container Terminal under construction, length 1,900 m., depth 14.0 m. The first berth will be available in 1992. Completion expected 1994.

GENERAL: Master of any vessel in territorial waters of Singapore shall obey any signal from a preventive vessel and any instruction from Officers of Customs. Customs Officers shall have free access to any part of vessel and have powers to mark, lock or seal any dutiable goods on import including sea stores.

SHIPMASTER'S REPORT: September 1983.

Ballast: Slop reception barges cannot receive slops at more than about 250 t.p.h. Message should be sent to Port Master 1 day before arrival with ETA and height above water and same information repeated to Port Operations Channel 12 three hours before arrival.

AUTHORITY: Port of Singapore Authority, PSA Building, 460 Alexandra Road, Singapore 0511. Postal Address: P.O.Box 300, PSA Building Post Office, Singapore 9111, Republic of Singapore. *Tel:* (65) 2747111. *Telex:* RS 21507. *FAX:* 2744677. *Cables:* "Tanjong" Singapore. *Contact:* Port Master's Department, Tanjong Pagar Complex. Tel: 3211168. Telex: RS 34124. Fax: 3211549.

AGENT: Jardine Shipping Agencies, 200 Cantonment Road, No. 12-05, Southpoint, Singapore 0208, Republic of Singapore. Tel: 2218011. Telex: 24179 Jarship. Fax: 2240209. Cables: "Jarship".

NOTES

Please also advise Shipping Guides Ltd.

Society Islands

BORA BORA (Vaitape): 16.31 S. 151.45 W.

DOCUMENTS: All vessels arriving in French Polynesia must first call for clearance at Papeete, or at Uturoa, or at Taiohae. See "Papeete" for documents required.
PILOTAGE: There is no pilotage station at Bora Bora; a Pilot will be provided at Papeete. Vessels are requested to advise their Agents at least 15 days before arrival of their ETA, length and draft of ship. In addition, Masters should confirm their ETA to the Port Captain of Papeete at least 3 days before arrival. Telegraphic address is Capitaine de Port, Papeete.
ANCHORAGES: Vessels may anchor in the port roads in depths of 34 m. – 21 m. Good holding ground in sand and coral.
RESTRICTIONS: Night pilotage is practicable, weather permitting. There are 2 buoys at the entrance and a light beacon.
MAX. SIZE: Length 220 m., beam 30 m., draft 9 m.
HEALTH: Vessel should ask for Free Pratique by radio message to Sante Maritime Papeete, via coast station Mahina. This message to be sent 24 hours before arrival.
RADIO: Mahina Radio, call sign FJA, operating 24 hours a day on 500, 2182 and 8230 kHz.
TUGS: No tugs available at Bora Bora.
BERTHING: One quay, (Quai de Farepiti) 132 m. length, situated in Faanui Bay. Depth alongside 7.30 m. Only used by small warships, coasters and yachts. One other quay (Quai de Vaitape) 40 m. long and with depth alongside 4 m. Situated at Vaitape. Used by barges and coasters.
MEDICAL: Doctor available and there is a local infirmary.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCES: No restrictions for crew members, but all tobacco and alcohol must be declared. Crew men going ashore may not take more than 2 packets of cigarettes.
AIRPORT: Situated 7 km. from Vaitape, only inter-island services.
TIME: GMT minus 10 hours. No change during the year.
HOLIDAYS: See "Papeete".
SHORE LEAVE: Allowed.
AUTHORITY: Port Autonome de Papeete, B.P.91, Papeete, Tahiti, French Polynesia. *Tel:* 425189. *Telex:* PPT Port 444 FP. *Contact:* Harbour Master.

List of Passengers In Transit.
List of Cargo to be Loaded, Unloaded or Transhipped.
Dangerous Cargo: If carrying dangerous cargo for Papeete (or in-transit) send cable to Port Captain prior to arrival.
On arrival give list of dangerous cargo to Pilot.
PILOTAGE: Compulsory. Vessels are requested to advise their Agents at least 3 days before arrival giving their ETA, length, width and max. draft of the ship; tonnage of cargo for discharge and breakdown by hold; dangerous articles and/or explosives on board and amount of fuel and water needed. In addition, Masters must give their ETA 24 hours before arrival to Capitainerie du Port, Papeete. Pilot station and pilot launches are equipped with VHF and must be contacted on Channel 12 when within 30 miles. Pilot launches have grey painted hull with a white band, with wheelhouse on the fore part. International code flag signals are used to call Pilot. Pilot boards about 1.5 miles from the entrance channel. There is no anchorage outside the port for ships awaiting a Pilot.
Pilotage available 24 hours.
ANCHORAGES: Vessels up to 170 m. length can anchor in the port roads in depths of 18 m. – 25 m. Good holding ground in mud.
APPROACHES: The entrance channel is marked by occulting green range lights mounted on red and white striped towers which are aligned 149° T. This range is normally visible at approximately 11 miles, although sometimes obscured by floodlights from the nearby public swimming pool.

The barrier reef on the East side of the pass can easily be seen.

Entrance to the harbour, through the barrier to the East, and shoal water to the West, is marked by lighted buoys, during bad weather there is often a heavy sea on the shoals (5 m. deep).

In the pass itself, the current generally sets outward. When Northeasterly winds are particularly strong, the water level in the lagoon can rise considerably. Northwest or Westnorthwest setting currents may attain strengths of up to 5 knots, creating dangerous, if not impossible navigating conditions for small craft. No warning signals concerning permission to enter or leave the pass exist.

In case of doubt regarding tidal conditions in the pass, contact can be established with the Harbour Master's Office on VHF Channel 12, or HF, frequency 2638 kHz.

Interior reefs are marked. Passage once into the harbour is marked by a pair of occulting green range lights mounted on red and white towers. This range is aligned 087° T.
RESTRICTIONS: Ships coming from a country infested by "Oryctes Rhinocerus Strategus" (coconut beetle) can be fumigated by the Department of Agriculture and can stay alongside at night. Advise agent 3 days prior to arrival if fumigation is required.
Entrance Channel: Width 110 m. Max. depth 11.30 m.
MAX. SIZE: Length 250 m., beam 32 m., draft 35 ft. The Q.E. II, length 294 m. entered and docked in 1985, 1988 and 1989.
HEALTH: Vessels with a doctor on board should ask for Free Pratique by radio to Sante Maritime Papeete, via Coast Station Mahina Radio. This message should be sent earliest 24 hours and latest 18 hours before arrival. Vessels having no doctor on board will be inspected in Papeete by the Maritime Public Health Service. All formalities concerning maritime sanitation regulations can be carried out at this time. Pratique is automatic for vessels coming from another Polynesian port. Also see "Restrictions".
RADIO: Mahina Radio, call sign FJA, operating 24 hours per day on 500, 2182, 8281.8 kHz, and on VHF Channel 16.

GMT 0118 hrs. —	8461 kHz	FJA 8	A1	W/T
GMT 0733 hrs. —	17040.8 kHz	FLA26	A1	W/T
GMT 0433 hrs. —	8461 kHz	FJA 8	A1	W/T
GMT 0503 hrs. —	17040.8 kHz	FJA26	A1	W/T

GMT 0933 hrs. —	8461 kHz	FJA 8	A1	W/T
GMT 1333 hrs. —	8461 kHz	FJA 8	A1	W/T
GMT 1733 hrs. —	4298 kHz	FJA41	A1	W/T
GMT 2018 hrs. —	8461 kHz	FJA 8	A1	W/T
GMT 2048 hrs. —	17040.8 kHz	FJA26	A1	W/T

VHF: The Port Captain's Office is equipped with VHF. Watches are kept on Channel 12 when a ship is expected. Vessels must contact Harbour Master's office one hour prior to arrival.
TUGS: Tugs join ships as soon as they are in the entrance channel. Generally, tow-lines are not required, as tugs push the vessels only. There are three tugs available up to 1,200 h.p. belonging to the Port Authority, and in addition, there are 4 naval tugs up to 750 h.p. which may assist if required.

Use of tugs is compulsory for vessels over 3,000 cu.m. The volume is calculated as follows: Length × Width × Maximum Draft.
BERTHING: Passenger Ship Quay: 233 m. length, 2 berths, depth alongside 10.5 m.

Cargo Quay: 450 m. length, depth alongside 10.50 m.

Fishing Boat Quay: 100 m. length, depth alongside 5.50 m.
STEVEDORES: Cargo information should be confirmed to the Agents with ETA 48 hours before arrival.
MEDICAL: Advance notice required if medical attendance needed on board. 2 hospitals available. Passengers disembarking must present a valid vaccination certificate.
TANKERS: 1 tanker berth, 105 m. long. Max. allowed draft 33 ft. Discharging hoses are: Mobil Oil 8 in., Total Oil 6 in.

1 gas tanker berth, at Pont de Taunoa, accessible via Taunoa Channel. For vessels max. LOA 85 m., max. breadth 13.80 m., max. draft 6.0 m.

A new tanker berth with a depth alongside of over 12.0 m. is available close to the entrance. Berthing is not safe at the time of Northerly swell (November to March).
FRESH WATER: Available from pipe-lines on all quays. Loading rate is 50 t.p.h. at passenger and cargo quays and 30 t.p.h. at the tanker berth. It is recommended that water be sterilised for drinking.
FUEL: Three companies distribute bunker products: Tahiti Petroles (Total products), Mobil (Mobil products) and Shell.

Tahiti Petroles – Telex OLITAHI 304 FP. Service Mobil – Telex SERMOBIL 238 FP. Petrocean – Telex Petrocean 400 FP.

Refuelling with gasoline, diesel oil, marine diesel oil and light fuel is possible. Taxes may be waived on these products for foreign vessels.

A 700 ton barge operated by Mobil may be used by transit vessels for bunkering if notified 24 hours in advance.
CONSULS: The following countries maintain representatives at Papeete:

Austria
Belgium
Chile
Denmark
Finland
Italy
Netherlands
Norway
Sweden

REPAIRS: Woodwork, electrical and welding repairs can be effected.
SURVEYORS:
Classification Societies:
Bureau Veritas. Tel. 42.80.86.
Lloyd's Register. Tel. 42.63.93.
Surveyors:
Maurice Bourrat. Tel. 42.67.06.
Bernard Baudry. Tel. 43.04.47. Telex. 210 FP.

DEVELOPMENTS: Two conventional wharves at Keppel Wharves to be converted to container handling berths (Berth Nos. 42 and 43). Total length 535 m.

GATX Terminals are to build a third berth to handle vessels of 10,000 d.w.t. – 15,000 d.w.t.

Berths No. K11 and K12 in Keppel Harbour to be converted to a single container berth. The new berth will be 335 m. in length and have a depth of 14.0 m.

Singapore Petroleum to build an oil terminal on Sebarok Island. Completion expected late 1991. Jetty will accommodate vessels of 120,000 d.w.t.

Brani Container Terminal under construction, length 1,900 m., depth 14.0 m. The first berth will be available in 1992. Completion expected 1994.

GENERAL: Master of any vessel in territorial waters of Singapore shall obey any signal from a preventive vessel and any instruction from Officers of Customs. Customs Officers shall have free access to any part of vessel and have powers to mark, lock or seal any dutiable goods on import including sea stores.

SHIPMASTER'S REPORT: September 1983.

Ballast: Slop reception barges cannot receive slops at more than about 250 t.p.h. Message should be sent to Port Master 1 day before arrival with ETA and height above water and same information repeated to Port Operations Channel 12 three hours before arrival.

Society Islands

BORA BORA (Vaitape): 16.31 S. 151.45 W.

DOCUMENTS: All vessels arriving in French Polynesia must first call for clearance at Papeete, or at Uturoa, or at Taiohae. See "Papeete" for documents required.

PILOTAGE: There is no pilotage station at Bora Bora; a Pilot will be provided at Papeete. Vessels are requested to advise their Agents at least 15 days before arrival of their ETA, length and draft of ship. In addition, Masters should confirm their ETA to the Port Captain of Papeete at least 3 days before arrival. Telegraphic address is Capitaine de Port, Papeete.

ANCHORAGES: Vessels may anchor in the port roads in depths of 34 m. – 21 m. Good holding ground in sand and coral.

RESTRICTIONS: Night pilotage is practicable, weather permitting. There are 2 buoys at the entrance and a light beacon.

MAX. SIZE: Length 220 m., beam 30 m., draft 9 m.

HEALTH: Vessel should ask for Free Pratique by radio message to Sante Maritime Papeete, via coast station Mahina. This message to be sent 24 hours before arrival.

RADIO: Mahina Radio, call sign FJA, operating 24 hours a day on 500, 2182 and 8230 kHz.

TUGS: No tugs available at Bora Bora.

BERTHING: One quay, (Quai de Farepiti) 132 m. length, situated in Faanui Bay. Depth alongside 7.30 m. Only used by small warships, coasters and yachts. One other quay (Quai de Vaitape) 40 m. long and with depth alongside 4 m. Situated at Vaitape. Used by barges and coasters.

MEDICAL: Doctor available and there is a local infirmary.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: No restrictions for crew members, but all tobacco and alcohol must be declared. Crew men going ashore may not take more than 2 packets of cigarettes.

AIRPORT: Situated 7 km. from Vaitape, only inter-island services.

TIME: GMT minus 10 hours. No change during the year.

HOLIDAYS: See "Papeete".

SHORE LEAVE: Allowed.

AUTHORITY: Port Autonome de Papeete, B.P.91, Papeete, Tahiti, French Polynesia. *Tel:* 425189. *Telex:* PPT Port 444 FP. *Contact:* Harbour Master.

Agents

1 Transit Passenger Manifest.
1 Landing Passenger Manifest.
1 Crew List.

PILOTAGE: 24 hours' notice of ETA stating number of passengers, dangerous cargo, etc., to Harbour Master, Honiara, via Honiara Radio. Usual signals. Pilot boards from launch about 0.75 miles N.E. Pelope Shoal. Vessels normally berthed port side to. Pilot uses port gangway in calm weather.

ANCHORAGES: East of Port Main Leading Lights. Fl. white and fixed green, in about 20 fathoms; coral bottom.

Local boats are available for transporting crew from anchorage to the shore. The landing stage is at Joanna Jetty on the East side of the main pier at Point Cruz. Height above water level is 2 ft. at high tide and 4 ft. at low tide.

APPROACHES: Approaches free from dangers provided vessels keep at least 2 cables off Point Cruz Beacon, identified by quick flashing red light. On foreshore in front of Shell Oil Storage Tanks is beacon with fixed green light, and above on Vavaya Ridge is white light flashing every 5 seconds from Tower on radio station building. When in line these 2 lights give correct approach to anchorage in 20 fathoms on, or East of, the line. Prevailing winds during S.E. monsoon season blow from N.E. direction sometimes reaching Force 4 to 5 in early afternoon. During N.W. monsoon season direction and force variable generally between North and West up to Force 4 and occasionally Force 5.

RESTRICTIONS: Berthing in daylight hours only – departure any time.

MAX. SIZE: New Wharf, up to 650 ft. long and max. 29 ft. draft. Old Wharf, up to 200 ft. long and max. 13 ft. draft. Tankers, mooring at buoys, 600 ft. long and 27 ft. 6 in. draft.

HEALTH: Pratique can be obtained by radio. Cable Port Health. Suspect vessels should inform Health Authorities and Harbour Master by radio for doctor to board on arrival.

Cable to Quarantine Officer Honiara between 12 hours and 4 hours before arrival the following message: "Request Radio Pratique negative answers all health questions Maritime Declaration of Health. Master." Normally, the P & T Radio Officer may grant Pratique immediately whilst he is in radio contact with the ship. After arrival the Health Officer will check for rhinoceros beetle and will clear.

RADIO: Radio Honiara VQJ. Watch continuous. 6204 kHz, 2182 kHz, 500 kHz. GMT Schedule 0020 – 0030 transmits 11560 kHz, receives on 8 MHz or 16 MHz.

TUGS: There is a small 100 h.p. tugboat assisting with mooring when necessary.

BERTHING: At Point Cruz, berth length 235 ft., depth alongside 30 ft. Vessel berths port side alongside.

STEVEDORES: At least 24 hours' notice, usually 3 gangs, indicate any extra gangs required. To facilitate quick turn around advisable have cargo in middle holds evenly distributed not at extreme end or massed in one hold only.

MEDICAL: Notice should be given in advance if medical attendance required on board. Inoculations available at clinic on Fridays only. Limited hospital facilities available.

Cholera: Required if arriving from infected area. Vaccination Certificates are checked individually for those passengers permanently disembarking.

For all other passengers and the crew ship's doctor must provide a statement advising that all passengers and crew comply with the health regulations and vaccinations required.

In case some passengers have for health reasons not been vaccinated, a letter from their doctor giving reason why no vaccination given must be produced. Passengers will be allowed to go ashore.

Central Hospital, Tel: 09-61.
Emergency and Ambulance, Tel: 09-33
Doctors, Tel: 09-44
Dentist, Tel: 09-43

All medical facilities are provided from the Hospital. One private doctor available: Dr. M. Strickland, Tel: 770.

TANKERS: Tanker buoys, 8 in. pipe-line, max. draft 32 ft. New Wharf, 4 in. pipe-line, max. draft 27 ft. 6 in. Old Wharf, 4 in. pipe-line, (ADO), max. draft 13 ft.

DENSITY/TIDE: Approx. 1025. Tidal range about 3 ft.

FRESH WATER: At wharf by hoses. 40 t.p.h.

FUEL: Diesel and gas oil available. 48 hours' notice, butane gas.

FIRE PRECAUTIONS: Normal fire precautions, with gang standing by with fire pump.

CONSULS: Australian.

REPAIRS: Limited facilities only.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Watchmen to be recommended. Customs provide a preventive officer for duty at a charge.

OPENING/CLOSING HATCHES: Stevedores assist crew. Crew to rig gear.

CERTIFICATES: Certificate of Registry.

CUSTOMS ALLOWANCES: 200 cigarettes or 0.5 lb. tobacco per crew member. 3 quart bottles of beer per crew member.

REPATRIATION: Facilities available.

AIRPORT: Situated approximately 10 miles from the wharf. Air Niugini have 2 flights per week from Sydney via New Guinea, and Air Pacific have 2 flights a week from Suva via New Hebrides.

TIME: GMT plus 11 hours all year round.

HOLIDAYS: Cargo work can be arranged on all holidays except Christmas Day and Easter period.

POLICE/AMBULANCE/FIRE: Emergency phone numbers: Police 666; Ambulance 933; Fire 299.

SERVICES: Labour can be hired for assistance with painting and cleaning. Other services not normally available. 24 hours' notice required.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Required.

VISAS: Transit passengers: not required. Disembarking passengers: require visa for a stay over 48 hours. Visa can be obtained from nearest British Consul.

LANDING CARDS: Only permanently disembarking passengers need special Landing Cards which can be obtained from Immigration Officer on arrival.

WEATHER: Cyclone season December to April, winds N.W. to variable, Force 0 – 5. From April to November winds are from N.E., Force 4 – 5.

DELAYS: Nil, except when other ships being worked.

DEVELOPMENTS: Copra Wharf, length 100 m., to be constructed.

AUTHORITY: Harbour Master, Solomon Islands Ports Authority.

SHORTLAND HARBOUR: 07.04 S. 155.52 E.

DOCUMENTS: 3 copies of all documents including "Nil" sheets of Crew Lists, Passenger Lists, Customs, Health Manifests, Bills of Lading, Ship's Particulars, Ship's Certificates.

Quarantine Boarding Officer requires the following:

List of Provision Store, both wet and dry.
Crew List.
Last Ports of call and the next Port of call.
List of disembarking passengers.
Plants and Animals List.

PILOTAGE: Apply for Pilot by anchoring on Pilot Point and sounding whistle. The pilot vessel is a 50 ft. tugboat and is visible at anchorage from the Pilot Point (Lat. 7° 03′ 30″ S., Long. 155° 53′ E.). The pilot vessel will immediately come to the vessel. The Pilot Point is unaffected by bad weather.

ANCHORAGES: The anchorage is beside the wharf in the channel. It is protected to the East and West by islands and is unaffected by wind, tides or currents. Minimum depth alongside the wharf is 8 m. at the extreme Southern end. The depth at the Northern end is 16 m.

RESTRICTIONS: As no lights are available all entries are made during daylight hours.

MAX. SIZE: Max. length 125 m., breadth, no restriction, max. draft 8 m., draft is applicable at maximum low tide.

HEALTH: Pratique granted on board on arrival. If any suspected or confirmed disease or fever on board notify the Health Inspector immediately on arrival. He will advise procedure. Pratique is automatic when arriving from another Solomon Islands port.

RADIO: Lofung Radio, call sign "H4W225" on upper sideband 6365 kHz.

Shipper's/Agent's Office may be contacted on SSB 6365 kHz between 0700 hrs. and 1700 hrs. (local time).

VHF: Not available.

RADAR: No radar facilities.

TUGS: Tug joins vessel at Pilot Point and escorts vessel in. Ship's lines are used, vessels stand-by to run ship's lines ashore. All charges are included in the Agency fees.

BERTHING: Alongside wharf (07° 03′ 50″ S., 155° 51′ 50″ E.), length 87 m., depth 8.0 m., loading and discharge by ship's gear. Basically only trucks and other machines are discharged and only Solomon Island round logs loaded.

CRANES: None.

BULK CARGO FACILITIES: None.

SPECIALISED CARGO FACILITIES: None.

BRIDGES: None.

STEVEDORES: The stevedores are company personnel and available immediately ship is berthed and cleared.

MEDICAL: A clinic with limited medical and dental facilities available 2 km. away. Usual inoculations and certificates available. Malaria is present in port area.

TANKERS: No facilities.

FRESH WATER: Not available.

FUEL: Not available.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: No facilities.

DRY DOCKS: Not available.

SURVEYORS: Not available.

WATCHMEN: Not necessary.

HATCHES: Opening and closing by ship's crew.

CUSTOMS ALLOWANCES: 2 litres spirits, 200 cigarettes.

CARGO GEAR: One forklift available.

REPATRIATION: Not possible.

AIRPORT: 5 miles away by sea on Ballalae Island. Flights Mondays, Tuesdays, Thursdays, Fridays to Honiara.

TIME: GMT plus 11 hours.

HOLIDAYS: Christmas Day, New Year's Day, Good Friday, Easter Monday, 7th July (Independence Day), Queen's Birthday and Whit Monday in June.

POLICE/AMBULANCE/FIRE: Not available.

EMERGENCY CENTRE: Honiara.

TELEPHONES: Not available.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

REGULATIONS: Normal Customs, Immigration and Health requirements.

DELAYS: Normally straight onto berth after Pilot on board.

DEVELOPMENTS: None planned.

GENERAL: Shippers' Office may be contacted on SSB 6365 kHz at 0700 hrs., 1200 hrs. and 1630 hrs. local time.

AUTHORITY: None.

AGENT: Allardyce Lumber Company Limited, P.O.Box 164, Honiara, Solomon Islands. Tel: (677) 30133. Telex: HQ 66343 Alcol. Cables: Alcol. FAX: (677) 30669.

YANDINA: 09.04 S. 159.14 E.

The Port of Yandina lies on the Southern shore of Renard Sound which is a deep inlet on the Eastern coast of Banika Island, part of the Russell Group of islands.

It is the headquarters of Levers Solomons Ltd. (LSL) who own the wharf, shore facilities, adjoining airstrip and plantations.

Note: The cable area marked on BA Chart No. 2975 and the remarks in the Pacific Island Pilot Vol 1, page 375, line 10, does not exist. This cable was removed some years ago.

LSL Managers report that in the past, vessels anchoring in the Sound itself have fouled their anchors on wartime scrap which lies on the sea bed.

The Sound is steep-to with depths of 90 m. in the centre. There is a fringing coral reef along both the Northern and Southern shore lines which extend further out the farther into the Sound a vessel penetrates. Two small coral spits project out into the Sound for about 100 m. from the northern shoreline, one each end of the wharf.

DOCUMENTS: If Yandina is first port of entry, the following documents are required:

2 copies Crew List (Solomon Island Forms only).
2 copies Personal Manifest.
2 copies Stores List (Solomon Island Forms only).
2 copies Passenger List ("Nil" returns required).
2 copies Unmanifested Cargo List ("nil" returns required).
1 copy Maritime Declaration of Health.
Last Port Clearance.

PILOTAGE: Not available.

APPROACHES: The Russell Island Group is sighted visually from the South at 30 miles on an approach course of 007° (T). Good reliable radar fixes are obtained at 18 miles from Alokun Island (150 ft.). This is during the late afternoon in fine, clear weather.

Vessels can enter the group between Keogh Island and Lamon Island during darkness with good radar representation for navigational purposes. The least depth in the channel is recorded at 270 fathoms.

Entering the Russell Group from the South, one passes between Louio and Louin Islands. The Channel here is narrow, but steep to and free from dangers. However, on this approach to Yandina, the wharf is not visible until the vessel is practically into Renard Sound and a long bla on the whistle when within sound distance, is recommended to alert li handlers, etc.

The Northern entrance is to be recommended, particularly newcomers, as the wharf can be seen much earlier and a dire approach can be made. Entering from the North, vessel passes betwe Lanalau and Kurimarau Islands.

HEALTH: Radio Pratique is obtained from Honiara.

Not more than 24 hours and not less than 8 hours prior to arrival, health message is to be sent, and provided there are no cases infectious diseases on board, Radio Pratique will be granted. Th message should be addressed to "Port Health, Honiara" and should phrased "Request Radio Pratique Stop Negative answers to all hea questions Maritime Declaration of Health" signed Master.

RADIO: There are 3 radio telephone channels in operation at Yandin the Post Office, the Police Station and LSL private. H/F frequency their Honiara Office which has Telex and Fax facilities.

There is a post office which offers a telegram service.

TUGS: A mooring boat assists when berthing.

BERTHING: Entry is made between Lanalau Island and Kurimara Island and then a direct course towards Renard Sound. At slow spee all the way in, no offsetting current is experienced.

The vessel is given a direct parallel approach to the wharf and bert port side alongside.

One mooring boat is used concurrently under very efficient supervisio from ashore.

On occasions a current is suspected to run from North into Rena Sound as the stern tends to set towards the shore whilst berthin however it cannot be depended upon as Masters have reported current running from the South and the stern tending to set off whi berthing.

It is essential to approach at the slowest possible speed consiste with keeping on track heading for the wharf. With an offshore breez by the time the vessel arrives abeam of the wharf, it often happens th although the bow is in a good position, the stern has become angle out considerably. To take care of this, the officer in charge aft shou have his first stern line fleeted out on the poop deck ready for qui slacking away without any kinks or holdups (which frequently result fro trying to slack away quickly from a coiled rope). He should also have second good rope already joined on with a strong lashing, because eve with the launch running the stern line smartly, it is a long haul to shore bollard and the stern may be slowly blown further out as the li is run. It is useless to wait and see if a second rope joined will be neede The vital time lost lashing ropes together could spoil the who manoeuvre.

The officer in charge forward should have the starboard anchor rea for letting go, whether it is intended to use it or not.

Years ago the use of an anchor off the wharf was not recommend due to possible fouling on old wartime wreckage, but sometimes the u of the anchor is essential and any subsequent fouling is a chance th has to be taken.

Berthing starboard side to is not recommended and can be hazardo The large scale plan of Renard Sound on BA. Chart No. 2975 gives false impression to a stranger as to its width. In fact, the average sa width of the Sound is little more than two cables (about 2 ships' leng for "Corabank"/"Cloverbank" Class of ship). Several large vess attempting to turn short round in the Sound to try and berth starboa side to have found themselves in difficulties due mainly to drifting stead up the Sound (under the influence of the wind and possibly curre while backing and filling in the limited space. The deep water in middle of the Sound (30–40 fathoms) is not very handy for using anchor to assist in turning round, but if dropped (with plenty of cha abeam of the wharf where the Sound is widest, it might prevent drift up the Sound.

The line of approach to the wharf from the West (starboard side is not as straight as might appear from the coastline on the chart. The is shallow water and old piles extending quite a way out just Westwa of the wharf (not shown on the chart plan) and a vessel would have come in to the wharf at a very awkward angle to avoid the reef. Th appears to be no advantage at all berthing starboard side to.

BERTH: The main wharf which lies 2.5 cables Westward of Nikoria P is of a concrete and steel construction and 53.5 m. long, with a minim depth alongside of 6.1 m. There are 2 mooring bollards (connected the shore) in line with the seaward face of the wharf. The Eastern bolla is 24.4 m. away and the Western one 41.2 m. away from their respect wharf ends.

A small wooden jetty is situated 21 m. to the West of the main je (between the jetty and the mooring bollard). The jetty measures 10.1 across the face, and has a minimum depth alongside of 1.1 m. (at ch Datum).

To overlap the wharf too much at either end (but particularly Eastern end) is dangerous; there is nothing to prevent the ship ground with an on-shore wind or if anything went wrong with the moorings, at such extreme positions, the bow and stern line leads to the moor bollards would be impracticable.

On "Corabank"/"Cloverbank" Class vessels, only Nos. 3 and hatches can be loaded with copra conveniently and possibly No. 2 (a end of hatch only) at a stretch.

A copra bulk loading system by bottom opening bins is in use at port.

UNBERTHING: The stern can be sprung off and vessel backed out the Sound. A light Northerly breeze blows and the vessel tends to slightly towards the wharf, but no difficulty is experienced. However, any strength in this breeze, sailing would be hazardous until it fell a or shifted, also it is safe to sail at night. Vessels turn to starboard w clear and leave the Group by the Northern route. All reefs show up and the light structure on Lanalau Island is clearly seen over the tr

If the anchor has been used for going alongside, it should be pic up first before leaving the berth, otherwise picking it up after lettin throws the ship out of the angled-off position.

MEDICAL: A trained local medical orderly gives medical attention when required. There is no doctor.
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: Levers possess a limited machine shop and fabrication shop capable of handling small ship repairs.
SURVEYORS: *Hold Inspection:* Compartments to be loaded are inspected by a Government Agricultural Department Inspector.
AIRPORT: Solomon Island Airways run a domestic service between Yandina and Honiara.

Distance to Honiara is 65 miles.

GENERAL:
Transport: There is no local public transport or car hire facility.
Stores: There are 2 general trading stores, one privately run and one run by a Co-operative Society. Both supply general household items including rice and tinned fish. Also there is a fisheries marketing centre where local fresh frozen fish can be purchased.
Market: Fresh vegetables and local fruits available twice a week, very cheap and very good.

Levers have their own butchery where fresh beef is obtainable at reasonable price. If requiring such meat, it is best to cable the Agent in advance, advising the quantity required.
Laundry: Not available.
Facilities: There is a small Social Club at Yandina, having tennis court, billiards and a small swimming pool. Ship's Officers are welcome.

The Club Manager is pleased to arrange a football match with local teams for those who are interested.
Charts: BA. 2975 and BA. 1469.
Weather & Currents: See Pacific Island Pilot, Volume 1.
AUTHORITY: Lever Solomons Ltd., P.O.Box 134, Yandina, Russell Islands, Solomon Islands. *Tel:* Honiara 22939. *Telex:* HQ66333. *FAX:* 9010-677-23496. *Contact:* The Resident Engineer.

NOTES

Please also advise Shipping Guides Ltd.

Somali Democratic Republic

GENERAL:

REPORT: *Immigration Regulations:* According to new Somali Immigration Instructions, no foreigner of any sort (including seamen, supercargo or Owners' Representative) shall be allowed to enter into Somalia without a visa.

No transit visa will be allowed for seamen joining their vessels in Somali ports.

Anybody arriving at Somalia should first obtain entry or transit visa from the Somali Consulates in their respective countries.

BERBERA: 10.26 N. 45.01 E. (See Plan)

DOCUMENTS:

6 Crew Lists.

2 Stores Lists.

2 Lists of Articles owned by Crew i.e. tobacco, wine/spirits, cameras, binoculars, wrist-watch, radio, firearms/swords etc.

1 Cargo Manifest (must be made out in accordance with original Bill of Lading issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurements in cubic metres). 6 copies to be sent in advance unfreighted; 2 copies to be sent in advance freighted; 2 copies to be sent by the ship's box.

1 Copy Non-Negotiable Bill of Lading for each Bill of Lading issued.

2 Lists Transit Cargo (total number of packages and total weight for each destination).

6 Lists of Passengers to be Disembarked.

2 Lists of Passengers In-Transit.

1 Health Document will be prepared on arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Vessels await Pilot on the Outer Roads, 5 – 10 cables S.W. of Raastamar Lighthouse. In case of stormy weather and rough seas, it is permitted to wait for Pilot on the Inner Roads.

ANCHORAGES: Outer anchorage 5 – 10 cables S.W. from Raastamar Lighthouse. Inner anchorage limited by the line between 10° 26′ 16″ N., 45° 00′ 14″ E. and between perpendiculars from the ends of this line towards Cape of Raastamar.

RESTRICTIONS: All ships should anchor in such a position that with any wind they should lie on the leading line, or Southward from it, or opposite the deep water pier.

MAX. SIZE: Draft 28 ft., length/breadth no restrictions.

HEALTH: Pratique granted after Port Authorities, including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali Ports subject to same procedure.

RADIO: Cable Agents giving ETA, draft, length and cargo via port radio station – 6OY call and reply in the frequency 500 kHz, working 450 kHz. Working hours from 0700 to 1700 hrs. local time. Traffic list 3 times a day at 0800, 1200 and 1600 hrs.

TUGS: Use ship's lines. There is one tug of 1,200 h.p. and one of 700 h.p. to assist vessels in berthing and unberthing.

BERTHING: Depth at pier 28 ft., length of pier 700 m. Ro/Ro facilities available.

Transhipment of cargo is allowed with exemption of Harbour Tax and Warehouse Dues. Only handling charges are levied according to port tariff.

STEVEDORES: Vessel must give accurate ETA at least 24 hours in advance to enable Agent to order gangs. No shore facilities, all cargo to be loaded and unloaded with ship's gear.

Working Hours: Normally 0700-1400 hrs., but loading to and discharging from vessel is performed day and night.

MEDICAL: General hospital facilities available, but specialised treatment and surgery is not. Yellow fever and cholera vaccination certificates inspected on arrival.

TANKERS: Discharge at mooring buoys with connecting hoses of American and British standards.

DENSITY: Salt water at all times.

FRESH WATER: Available alongside quay through hoses. Rate 15/20 t.p.h.

FUEL: Not available.

CONSULS: None.

REPAIRS: Port Management own a well-equipped workshop where minor repairs for ships can be carried out.

GANGWAY/DECK WATCHMEN: Gangway watchmen services carried out by Customs Police, food on vessel's account. Ships are also supplied with local watchmen through Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores with the help of the crew. Vessel's crew may, if required by the vessel do so. Crew may close hatches prior to sailing.

CUSTOMS ALLOWANCES: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: See "Mogadiscio".

TELEPHONES: No possibility for placing telephones on board.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Crew to carry Passport or Seamen's Book whilst ashore.

REGULATIONS: Livestock vessels are given priority.

DEVELOPMENTS: The present two berths have been extended by a further two berths.

GENERAL: Vessels should not dispose of any waste into harbour or on to quays, lower lifeboats or use radio station without prior permission.

SHIPMASTER'S REPORT: June 1981.

References: Guide to Port Entry, British Admiralty Chart BA 3530. R Sea and Gulf of Aden Pilot. (NP64) 12th Edition 1980.

Documents:

2 Crew Lists.

2 Stores Lists.

2 Lists Personal Effects.

Cargo Manifest.

Copy Non-Negotiable Bill of Lading for each consignee.

2 Lists of Transit Cargo.

2 Passenger Lists. "Nil" declaration required.

1 Health Document filled in on berthing on special local form.

1 Copy Arrival Report on special local form.

1 Copy Ship's Record and Master's Report on special local form.

Pilotage: Two Somali Pilots available. Pilot boards at Outer Anchora from tug "Saaxil" which has black hull, white upperworks, fun markings: blue funnel with white star. Tug has VHF Channel 16. P can also be contacted via Somali Shipping Agency on VHF Channel call sign "Somship Berbera". Agents can usually only be contacted fr 0900 – 1200 hrs. and 1600 – 1800 hrs.

Anchorage: Good anchorage obtained in Outer Anchorage shown BA 3530. Somali Harbour Regulations forbid anchoring in such a w as to obscure leading and other lights.

Radio: Normal 72, 48 and 24 hour notice to Agents via Aden Rad Berbera Radio (6OY) not heard.

Fresh Water: Only supplied alongside at Commercial Wharf. No wa barge available and tug "Saaxil" unable to deliver water at Oil Berth Anchorages.

Tugs: One tug "Saaxil", 1,100 b.h.p., fitted with VHF Channel 16. No lines, all ship's lines.

Gangway/Deck Watchmen: Two watchmen are compulsory un Somali Harbour Regulations. Ship has to provide food a accommodation. Charges for watchmen:

45 Somali shillings for 12 hours (daytime).

55 Somali shillings for 12 hours (night time).

Fridays 50% additional and 26th June 50% additional. 1st July a other public holidays 100% additional.

Customs Allowances: 200 cigarettes or 0.5 lb. tobacco or 0.5 lb. ciga 1 bottle of spirits.

Airport: The landing ground shown adjacent to the Oil Tank Farm BA Chart 3530 has now been taken over for extension of the tank fa and is no longer in use.

A new military airfield is situated 2 miles S.W. by W. from the landing ground.

All commercial flights are from Hargeisa, 160 km. S.W. of Berbe with 3 flights weekly to Mogadiscio.

Time: GMT plus 3 hours all year round.

Agency: Somali Shipping Agency. Tel: Berbera 142. Cables: Soms Berbera. No telex facilities available and all cables have to be sent Somali Shipping Agency, Mogadiscio, for transmission out of Somal

Somali Shipping are the only Agency allowed in Berbera, being Government Agency.

Berthing: Superceded by later "Reports".

Fuel: None available.

Repairs: Minor repairs can be carried out but nothing that could not carried out by ship's staff.

Weather: During the ship's stay at Berbera the "Kharif" blew as follo

0000 hrs., S.W., Force 3.

0400 hrs., S.W. by S., Force 6.

0800 hrs., S.W., Force 6 to 8.

1200 hrs., S.W., Force 5.

1600 hrs., S.W. by S., Force 3.

2000 hrs., Calm.

SHIPMASTER'S REPORT: June 1983.

Restrictions: All navigational lights are extinguished.

Pilotage: Only during daytime. Departure at night can be discussed w the Pilot.

Radio/VHF: Coastal radio station is out of order and will not be repair No VHF port radio station but sometimes Pilot or Agent will call us VHF from vessel in port.

Medical: Cholera and yellow fever vaccinations are inspected on arri

Tankers: Max. draft for tankers is 35 ft. and berthing will be effected w 2 anchors forward and 6 ropes to the mooring buoys, i.e. 2 stern rop and 1 breast rope on each side. Distance from stern to jetty about 20 – stern discharge. Tankers up to 24 ft. – 25 ft. draft can berth betw the buoys and use their manifold. In both cases a 6 in. shore hose hauled up to the ship's connection, max. back pressure allowed is 3 and discharge rate of white products about 250 cu.m./hour. After ea grade, water has to be pumped to clear the shoreline. Position of jetty Lat. 10° 26.18′ N., Long. 45° 00.8′ E., and a steel construc framework pier runs from this position in direction 146° to the sh Loading arms at pier are in state of deterioration. When berth sounding by hand is advisable and have tidal heights available.

SHIPMASTER'S REPORT: January 1986.

Details concerning lights, berths and buoys considerably different f Admiralty charts. No information forthcoming from Port Autho concerning changes, so positions and distances only approximate obtained by radar. 4 light buoys laid on approaches to Berbera harb limits, as these buoys not laid by the Port Authority there is no guara that they will be maintained, either lit or in position.

R.W. Fairway Buoy, unlit, 306°×0.88 miles from Raastamar L

R. buoy Fl.R., approx. 4 secs., 208°×0.25 miles from Raasta Light.

R. buoy Fl.G., approx. (3) 10 secs., 262.5°×0.58 miles Raastamar Light.

R. buoy Fl.G., characteristics and position not ascertained, b South of leading lights and Eastwards of outer anchorage.

2 mooring buoys in inner anchorage, 102°×0.64 miles and 115°×0.5 miles from Raastamar Light. Wreck in inner harbour now has quick flashing red light on the top of its funnel. Leading lights into the harbour are now flashing white lights. Mooring buoys around the end of the tanker terminal appear as shown on the Admiralty chart.

In the tank farm new white tanks, for United States' forces, stand out very well, their position not ascertained, but they have been built at the Western end of the tank farm. Tank farm now very well illuminated, lights show very well out to sea. These lights far better than town lights on night approach, town lights very often shut off in evenings. Raastamar Light was sighted at a distance of 15 miles, but Pilots state that it is still only 6 mile light.

Main quay has been extended Westwards, on same line as old quay, by approximately 180 m. New section well fendered with heavy rubber sections on chains. Old section of quay, the facing is badly damaged throughout most of its length, ships will require fenders to keep well off it. No sheds built on new section, but small compound for U.S. Forces use in S.W. corner. A concrete Ro/Ro ramp built at extreme Western of new quay, for vessels to berth with 2 anchors out, ramp steel-faced and steeply angled. Only livestock seen using this ramp. An additional causeway has been built out to the new section, but not seen in use and kept locked up. Shaab Quay still in use, but only for dhows and small local coasters.

During period spent in Berbera (15 days), all ships were kept at outer anchorage until required, inner anchorage not used at all. Only vessels to come to port during this time were livestock carriers, loading sheep, goats and camels for Jeddah; and one passenger/cargo ship from Jeddah.

Winds consistently freshened every afternoon from Northeasterly direction, up to Beaufort Force 6 at times and then dying away to a flat calm by midnight. Harbour very sheltered from this direction and slight sea caused no problems.

Shore watchmen compulsory, and if pilferable cargo on board, it is possible vessel will have armed Customs/Port Police as well. Vessel to supply all with meals and sleeping place if possible.

Garbage collection compulsory, but vessel does not have to accept this every day, can specify whether periodic collection required.

Fresh water appeared of satisfactory quality, no apparent restriction on quantity.

No laundry facility available.

Chandler available, but expensive and did not appear interested in supplying small quantities.

Communications very poor externally, no telex available at Agents. All overseas telephone calls routed via Mogadiscio, this line unreliable.

American base at airfield has telex and satellite telephone, but use of these facilities expensive and not always available. However, it is possible to get permission to use the ship's radio equipment for communications, though when vessel first arrived the authorities were intending to seal radio equipment.

Local maritime station out of order.

Crew have to hand Passports/Discharge Book/I.D. card in at gate when going ashore. No pass issued or receipt given. No known curfew, but police very nervous after dark and gate should be approached with caution, as police are armed, so that crew member can be identified.

On approaching port, vessel called continuously on Channel 16 from 0530 hrs. local time onwards, but got no reply, so vessel anchored in outer anchorage. Berbera Port came on the air at 0900 hrs. local time, no reply from Pilots at all, though they assured me that they operated from about 0700 hrs. to dusk. Vessels should be careful when approaching outer anchorage in darkness as ships may be encountered at anchor without lights. One Ro/Ro ship is alleged to have been there, abandoned, for at least a year; there only being a shore watchman onboard. Vessel cleared by Authorities whilst at anchor, quarantine doctor wanted to see that all crew members had current yellow fever and cholera certificates. Customs sealed bond by glueing piece of paper over door. Radio was supposed to have been sealed, but because no separate radio room they decided not to do so. Application in writing through Agents for water, engine trials, boat in water, painting from quay, etc.

No photography in port area and this included onboard vessel, but despite this did not find that anyone stopped crew members taking photos of livestock being loaded on other vesssels.

2 small tugs in harbour, but only one seen in use. This takes Pilot out to incoming vessels, Pilot informed that this tug, the oldest one, is only suitable for pushing and not towing. Pilot does not necessarily take vessel out at night, gave instructions for departure and then acted as boatman for letting go vessel.

Nearby airfield has civilian flights every 2 days linking Berbera with Mogadiscio and Jeddah, but it wasn't clear whether seats could be obtained for these flights or whether passengers had to travel to Hargeisa to fly, about 2 hours drive. From there flights go to Mogadiscio and Djibouti. However, I imagine repatriation from this area to be a lengthy and tedious business only to be attempted in an emergency.

AUTHORITY: Somali Ports Authority, Berbera.

CHISIMAIO (Kismayu): 00.22 S. 42.34 E.

DOCUMENTS:

6 Lists of Crew.

2 Stores Lists.

2 Lists of articles owned by Crew, i.e., tobacco, wine/spirits, camera, wrist-watch, radios, binoculars, firearms/swords, etc.

1 Cargo Manifest (must be made out in accordance with original Bill of Lading issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurement in cu.m.). 6 copies to be sent in advance unfreighted; 2 copies to be sent in advance (freighted). 2 copies to be sent by ship's box.

1 copy non-negotiable B/L for each B/L issued.

2 Transit Cargo (total number of packages and total weight for each destination).

6 Lists of Passengers to be Disembarked.

2 Lists of Passengers in Transit.

1 Health Document will be prepared on the arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Vessel picks up Pilot at approximate position Lat. 0° 24′ S., Long. 42° 34′ E., 2 miles S.E. of Fairway Buoy.

ANCHORAGES: In the port basin, from 27 ft. to 30 ft. deep, excellent holding ground.

RESTRICTIONS: Entrance channel about 200 m. wide, marked by buoys. Entrance effected during daylight hours only. Port closed for vessels from 1800 hrs. to 0600 hrs.

MAX. SIZE: Max. draft 28 ft. at LLT.

HEALTH: Pratique granted after Port Authorities, including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali ports subject to same procedure.

RADIO: No local coastal radio operating at present. Cables to Agent could be sent through normal postal R/T and W/T services.

TUGS: Two tugs of 800 h.p. each are available to assist ships in berthing and unberthing. Ship's lines used.

BERTHING: Port consists of 2 L-shaped quays, one 340 m. length, the other 280 m. No specific requirement to berth in the port. Vessels entering port basin after 1745 hrs. will berth next day at 0630 hrs. Vessel must sail before 1730 hrs. otherwise sailing will be postponed to next day at 0630 hrs.

STEVEDORES: Vessel must give accurate ETA at least 24 hours in advance to enable Agent order necessary gangs.

No shore facilities, all cargo to be loaded and unloaded with ship's gear.

Working Hours: Normally 0700 hrs. – 1400 hrs. but loading to and discharging from vessels is performed day and night.

MEDICAL: Hospital facilities available, but specialised treatment and surgery is not. Yellow fever and cholera vaccination certificates inspected on arrival.

TANKERS: See "Shipmaster's Report".

FRESH WATER: Available at wharf through hoses, rate 15/16 t.p.h.

FUEL: Not available.

CONSULS: Italian Consul only.

REPAIRS: No facilities available.

GANGWAY/DECK WATCHMEN: Gangway watchmen service carried out by the Customs Police. Food on vessel's account; ships are also supplied with local watchmen through Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedores with the help of the crew. Vessel's crew may, if required by the vessel, do so. Crew may close the hatches prior to sailing.

CUSTOMS ALLOWANCES: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.

REPATRIATION: Air communication via Mogadiscio.

AIRPORT: About 6 km. N.W. of the port.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: See "Mogadiscio".

TELEPHONES: No possibility for placing telephones on board.

IDENTIFICATION CARDS: Crew to carry Passport or Seaman's Book whilst ashore.

SHORE LEAVE: Permitted.

REGULATIONS: Banana and livestock vessels are given priority.

DEVELOPMENTS: Facilities to be improved to enable port to handle liquids, livestock and general cargo.

GENERAL: Vessels should not dispose any waste into harbour or on to quays, lower lifeboats or use radio station without prior permission.

SHIPMASTER'S REPORT: September 1985.

Vessel: 19,000 d.w.t. Discharged gas oil.

General Remarks: ETA messages and Notice of Readiness to be sent via Djibouti Radio, using telex to Agents at Mogadiscio. (Mogadiscio Radio not working). Port of Kismayu not fitted with VHF. The port was constructed in 1967 with approach channels dredged to 8.0 m. chart datum. (Learned from Pilot that no dredging was performed in the channels after 1967).

Approaches: Safe approach is only possible by using Passo Nord, using the leading line N.E. Serpenti-Collina Rotonda Beacon (see Chart 1052 Baia di Chisimaio), which are clearly visible by daylight. All navigational lights are extinguished by night. Sailing from Kismayu also through Passo Nord. Passo Levante is very dangerous and strongly afffected by cross currents.

Anchorage: Safe anchorage can be obtained 1 mile S.E. of Serpenti Lighthouse in 9 – 10 fathoms of water with good holding ground. The anchorage however is exposed to swell causing the vessel to roll during the anchoring period. During the S.W. monsoon this anchorage can be unsafe.

Pilotage: The Pilot boards in a position 0.7 miles S.E. from Serpenti Lighthouse.

Harbour and Approaches: The harbour of Kismayu is artificial, constructed by rocks seawards and concrete jetties inwards, enabling to receive vessels up to 210 m. long with a maximum draft of 28 ft. Berthing daylight only. From the pilot area to the port entrance the route is via Passo Interno steering to a buoyed channel using the leading line Scoglio Pilone-Collina del Segnole (Chart No. 1052). The outer channel is effected by swell, however after passing I. Favatu the swell will cease when entering the inner channel.

As the approaches are effected by swell and the charts are not very accurate, it is not advised to enter or leave the port at LW even with drafts less than 24 ft.

We arrived with a max. draft of 24 ft. 01 in. and entered the channel approximately 2 hours after LW with a moderate swell from S.E. running into the bay. The echosounder was switched on during the whole operation. On entering the channel the reading fell to zero and a huge amount of mud was observed.

After entering the port the vessel is stopped and swung around by using 1 tug of 350 h.p., approaching the berth head on. Starboard anchor is used to swing the vessel again by using the tug to berth portside alongside with 4 head and stern lines and 2 springs fore and aft.

Documents: Papers required on arrival:
6 Crew Lists.
3 Stores Lists.
3 Personal Effects Lists.
International Declaration of Health.
Vaccination List.
Copy of Bills of Lading.

Discharge Facilities: One long flexible hose of 8 in. connected to 8 in. pipe-line. Distance to shore tanks approximately 3,200 m. Max. allowed back pressure 4 kg. – 6 kg. depending on Loading Master.

Port Facilities: Drinking water can be obtained from the jetty, but is not recommended, as this water is pure river water. Other facilities nil.

Remarks: The tug is fitted with VHF and the Pilot will use this VHF to contact ships only if the tug is manned. Vessels are warned immediately after berthing that permission to sail is not given until all bills and duties have been paid by the Agents, indicating that some vessels have been delayed for 4 days.

AUTHORITY: Somali Ports Authority, Chisimaio.

MOGADISCIO: 02.02 N. 45.20 E. (See Plan)

DOCUMENTS:
2 Lists of Crew.
2 Stores Lists.
2 Lists or Declarations of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, binoculars, firearms/swords, etc. Vessels calling from other Somali ports subject same procedure.

Cargo Manifest (must be made out in accordance with original B/L issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurement in cubic metres). 6 copies to be sent in advance unfreighted; 2 copies to be sent in advance freighted and 2 copies to be sent by ship's box.
2 Lists Transit Cargo (total number of packages and total weight for each destination).
6 Lists of Passengers to be Disembarked.
2 Lists of Passengers in Transit.
1 Health Document will be prepared on the arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Pilot joins vessel at anchorage about 0.5 miles offshore. Pilot can be requested by International Code signals or through VHF using Channels 12, 14 or 16.

ANCHORAGES: About 0.5 miles offshore in depths up to 45 ft., in open roadstead. Because of occasional heavy swell maximum recommended draft 31 ft.

RESTRICTIONS: Berthing/unberthing of vessels is restricted to daylight hours. Max. draft permissible is 10 m. at general cargo berths and 12 m. at tanker berths.

HEALTH: Pratique granted after Port Authorities including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali ports, subject to same procedure.

RADIO: No local coastal radio operating at present. Cables to Agent could be sent through normal postal R/T and W/T services.

TUGS: Tugs join vessels at anchorage or as directed by the attending Pilot. Vessel's lines normally used. No extra charge for tug's lines.

Two tugs of 1,400 h.p. each available and 1 tug of 4,000 h.p. available for salvage and rescue operations.

BERTHING: Incoming vessels are assigned berths on a turn basis subject to operational requirements.

Harbour: Alongside deepwater port protected by 820 m. strong breakwater.

Berths: 5 berths. Berth lengths vary from 170 m. – 200 m. with depths alongside 8 m. – 12 m.

BULK CARGO FACILITIES: None.

STEVEDORES: Vessel to give accurate ETA at least 24 hours in advance to enable Agent order necessary gangs. No shore facilities, all cargo to be loaded and unloaded with ship's gear.

Working Hours: Normally 0700 hrs. – 1400 hrs., but loading to and discharging from vessels is performed day and night.

CRANES: Only ships' derricks are used. No portal cranes at quay b a number of mobile cranes are available for handling and stacking car with maximum lifting capacity of 50 tons. No floating cranes availab

MEDICAL: No advance notice for medical attention required. Hosp facilities available but specialised treatment and surgery is not. Yello fever and cholera certificates inspected on arrival.

TANKERS: One berth available for tankers with a draft of 12 m.

DENSITY: Salt water at all times.

FRESH WATER: Available alongside through hoses at a rate of 15 20 t.p.h.

FUEL: Fuel oil only may be available, check with Agent.

FIRE PRECAUTIONS: Fire engines situated within easy reach of doc 24 hours per day. The tugboats are also equipped with fire fighti appliances.

CONSULS: Algeria, Belgium, Peoples' Republic of China, Egy France, Federal Republic of Germany, India, Iran, Iraq, Italy, Keny People's Democratic Republic of Korea, Kuwait, Libya, Netherland Nigeria, Pakistan, Qatar, Romania, Saudi Arabia, Sudan, Syria, U.A.E U.K., U.S.A., U.S.S.R., Yemen, Yugoslavia.

REPAIRS: No facilities available.

DRY DOCK: None available.

GANGWAY/DECK WATCHMEN: Gangway watchmen services carri out by the Customs Police, food on vessel's account. Ships are al supplied with local watchmen through Agent.

OPENING/CLOSING HATCHES: Normally carried out by stevedor with the help of the crew. Vessel's crew may, if required by the vess do so. Crew may close the hatches prior to sailing.

CUSTOMS ALLOWANCES: 200 cigarettes, 2 packets of cigars a 5 bottles of wine. Cigarettes and spirits trafficking alongside and betwe vessels and shore strictly prohibited.

REPATRIATION: Facilities available.

AIRPORT: About 5 km. to the West.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: Idul Fitr, (1st & 2nd Shawaal); Idul Adha, (9th & 10th Dilhij Prophet Mohammed Birthday, (12th Rabiul Awal); International Labo Day, (1st May); Independence Day N. Region, (26th Jun Independence & Union Day, (1st July); Revolution Festivals, (21st a 22nd October).

POLICE/AMBULANCE/FIRE: Police 28088; Ambulance 30000; F 85055.

TELEPHONES: Arrangement for placing telephones on board is n available.

IDENTIFICATION CARDS: Crew to carry Passport or Seaman's Bo whilst ashore.

SHORE LEAVE: Permitted.

DELAYS: Nil, except when other ships are working alongside.

DEVELOPMENTS: New wharf with Ro/Ro terminal recently complet Container yard and freight station to be constructed.

GENERAL: Vessels should not dispose of any waste into harbour on to quays, lower lifeboats, or use radio station without prior permissi

Tidal Range: 2.5 m.

Shipchandling: Available.

Major Exports: Fresh bananas, livestock, hides and skins a frankincense.

Imports: General cargo, crude oil, etc.

SHIPMASTER'S REPORT: June 1979.

Documents:
5 Crew Lists
1 Stores List
1 Crew Personal Effects Declaration
1 Cargo Manifest
1 List Passengers in Transit
1 Health Document (International Declaration of Health)
1 Vaccination List, Crew and Passengers
1 Form "A", Ship's Record and Master's Report
1 Arrival Report (Agency Form)
1 Application for Temporary Use of New Harbour
2 Cargo Plans for Discharging Cargo
6 Lists of Passengers to be Disembarked

Pilotage: Compulsory. Pilot boards about 0.75 miles from breakwa entrance. Ladder on lee side 6 ft. above water with manropes. Usu 1 Pilot, assistant or trainee, and one communications man. Pilots VHF Channel 16.

Anchorage: Open roadstead about 0.5 – 0.75 miles off breakwa Assigned anchorage is West of new breakwater light bearing 310°. not anchor West of a line drawn perpendicular to West end breakwater. There is a submerged tanker pipe-line and buoys Wes breakwater, unlit at night. There are occasionally small unlit coast anchored in the anchorage. Depth, clearance and congestion m anchorage unsuitable in heavy weather. During S.W. monsoon, sh head approximately 180° – 225° without circular swing.

Communications: Send ETAs through Radio Mombasa.

Clearance: Health, Customs, Immigration and Harbour Master boar anchorage. Hours are 0700 to 1600. Agent and Steve representative may be present. Seamen's Books or I.D. cards required for shore leave. Crew allowed ashore at anchorage 073 1730 hrs. to comply with harbour curfew at 1800 hrs. Passengers permitted ashore at anchorage. Curfew of 2400 hrs. exists at dock. passengers permitted ashore after being recleared by Immigration. T were given a 1900 hrs. curfew.

Customs Allowances: 200 cigarettes, 0.5 lb. tobacco or cigars. Curr exchange strictly controlled at banks and legal hotels. Trafficking in items strictly prohibited. Coffee, sugar and tea are considered b items, but were not sealed.

Watchmen: Two by regulations; 1 on duty and 1 off duty. At ancho ship must provide sleeping area.

Medical: Yellow fever and cholera vaccinations required.

Fresh Water: Fresh water can be made in port due to open stat harbour.

Time: GMT plus 3 hours.

Opening/Closing Hatches: Stevedores will open pontoon type hatches. Recommend modern mechanical or hydraulic hatches to be opened by crew.

Stevedores: Paid on a tonnage basis. Gangs usually given contract of approximately 100 tons bagged goods or equivalent. First shift 0700 to 1500 hrs.; second shift 1500 to 2200 hrs. No third shift, however, 2nd shift may be extended for a set amount of additional tonnage which usually finishes by 0100 hrs. Typical figures; bagged goods, 250 tons per hatch per day with single gangs. Doubling of gangs in hatch subject to warehouse congestion and shortage of transport. Overall quality with bagged goods was fair to good, and stevedores provided own sweepings and bag sewers. No cleaning gangs were hired by vessel, though said to be available.

Launch Service: Available at anchorage 0700 to 1730 hrs. One launch for all ships.

Harbour Development: A new deep water port has been constructed. There are wide aprons, new warehouses, and good rubber fenders. Strong bollards approximately every 75 ft. Plan of N.O. Chart 61240 or BA Chart 671 (both corrected by overlay) show harbour with good accuracy. The red light on end of new breakwater is extinguished and the lights listed as Occ. R. are F.R. The main light is NOT visible as given. It has sufficient brightness, but not sufficient height. It can be seen about 20 – 25 miles depending on draft.

There are three warehouses. Transport to clear warehouses is limited. The main quay formed by the new breakwater has three berths. There is a tanker berth at the East end, and it is not usable by cargo ships. When occupied, there is sufficient room left for one large and one coastal vessel to work general cargo. When empty, two large ships can work. There is an additional berth against the inner wall that can handle 1 cargo ship to about 500 ft. This berth is 'stern first' and is the banana dock. Fruit boats have priority and any ship there must be shifted out. On the main quay, unannounced shifts are likely depending on the tanker berth. There is 1 small livestock berth at the West end of the harbour for coaster size vessels only. The lighterage piers at the East end of the harbour appear to no longer be used, and no lighterage work was observed.

There is considerable surge caused by both the openness of the harbour and lack of protection from onshore winds. "4 & 2" tie-up is recommended and chafing gear advisable.

Tugs: One of 4,000 h.p. and 2 of 1,100 h.p. are available, tugs are new. For berthing, one short ship's line was used from vicinity quarter ship's length from bow and stern, necessitating the bringing of sufficient line from the mooring stations to these locations.

Approaches: Approaching from the South, there are strong cross currents, from last 24 hours out. Sets of over 1 m.p.h. have been experienced. Approach on a North-Easterly heading from seaward should provide the most clarity of landmarks and radar picture. At night, a white loom is visible, with a yellowish flame-off loom noted to the S.W. The harbour and first navigation lights to be sighted are in the North-Eastern half of the white loom. The town steps uphill sharply from the harbour, causing town lights to be visible well before the other navigation lights. Anchored ships may also obscure the lower lights. Harbour is well defined on 3 cm. radar at about 6 miles. Set drops off nearer to shore.

"Registration for port" is the time anchored. Pilots do not board ships to anchor. Pilots (port radio) are on VHF Channel 16. The transmitter is weak and range about 5 miles. When checking in, they will ask Name, Flag, Call Sign; F. & A. Draft; g.r.t. and n.r.t.; discharge tonnage and type. There is usually much repeating so earliest possible contact at slowest speed is advised so that this can be done with sufficient sea room. Only after completion will anchorage be "assigned".

Agency: SOMSHIP is government agency and services accordingly.

SHIPMASTER'S REPORT: March 1981.

Documents:

1 Declaration of Health (Local Form).
1 Set Vaccination Lists.
5 Crew Lists.
6 Landing Passenger Lists.
In-Transit Passenger Lists.
Ship's Record and Master's Report (Form A).
Arrival Report (NSL Form).
Application for Temporary Use of New Harbour (Local Form).
1 Set Cargo Manifests.
2 Sets Discharging Cargo Plans.
Stores List (Company Form).
Crew Declarations.

Notes: Application for use of Harbour Form contains highly objectional liability clause 4(c).

No mail or telex service, no Agency assistance.

Health: Radio Pratique not available.

SHIPMASTER'S REPORT: June 1981.

Documents:

2 Crew Lists.
2 Stores Lists.
2 Personal Effects Lists.
Cargo Manifest.
Copy Non-Negotiable Bill of Lading for each consignee.
2 Transit Cargo Lists.
2 Passenger Lists. "Nil" declaration required.
1 Health Document filled in on berthing on special local form.
2 Copies Declaration of Ship's Details and Cargo Carried for Port Harbour Master on special local form.
4 Copies Pilotage Declaration on special local form.

Pilotage: Pilots listen 0600 hrs. to 1200 hrs. on VHF Channels 16 and 12. At other times the pilot station is usually manned. Pilot boards from a large pilot cutter at the vessel's anchorage position. Pilot cutter has black hull, white upperworks with "Pilot" in black letters. Manropes are essential for use on the pilot ladder due to the normal heavy swell running.

Anchorage: Good anchorage in sandy bottom in 10 – 11 fathoms (approx.), 4 cables South of New Port Breakwater. Monsoon causes currents of up to 4 – 5 knots during S.W. monsoon. (Ref: Admiralty Publication, Africa Pilot Volume III, and latest supplement.

The whole bottom area is foul due to cargo lost during time port was operated as a surf port. An anchor and cable is reported to lie close to the intersection of the 311° and 278.42° leading lines.

Somali Harbour Regulations forbid anchoring in such a position as to obscure leading and other lights.

Health: Local doctors available.

Radio: Normal 72, 48 and 24 hour notice to Agents via Aden or Mombasa Radio. Mogadiscio Radio not heard during vessel's stay in Mogadiscio.

Fresh Water: Available from Berth Nos. 1, 2, 3, 4 and 5 at approximately 20 t.p.h.

Stevedores: Rigging of derricks and opening/closing hatches are the responsibility of ship's crew.

Gangway/Deck Watchmen: Two watchmen per vessel. Ship has to provide accommodation and food.

Customs Allowances: 200 cigarettes, or 0.5 lb. tobacco or 0.5 lb. cigars. Spirits 1 bottle. Bond sealed on arrival but Customs very good and will come down to give issue whenever required.

Airport: Regular international flights from airport situated 8 km. from port. No problems with repatriation. Crew members joining are issued with entry visas at Mogadiscio Airport providing Agents are informed in sufficient time. Mogadiscio is the only international airport of entry. There are local flights approximately 3 times a week to Kisimayu and Berbera.

Time: GMT plus 3 hours all year round.

Berths: Ras Sif Oil Terminal, Lat. 2° 01.05′ N., Long. 45° 20.05′ E.

This is a sea berth 1 cable S.W. of Ras Sif. (See "Plan"). During the S.W. monsoon, vessel secures with both anchors down on a heading approximately 210° (true) about 1 cable offshore. On this vessel's call 10 shackles were put out on each cable position "A" shown on plan. On vessel's approach to the berth no tugs were available for assisting in berthing as fuel for tugs had run out and our vessel had the new supplies on board. Three attempts were made to secure at the Discharge Berth. Final position was that shown in position "A". In this position vessel was heading 185° (true), 10 shackles out on each cable, 3 ship's lines to shore and 2 shore lines to ship. The vessel at this time rode to the wind at 180° – 185° and did not take up a heading into the S.W. monsoon at any time. The effects of the Somali current during vessel's stay was negligible at the berth. The normal berth off Ras Sif is that shown in position "B". I consider this position dangerous at this time of the year as the wind being mainly Southwesterly swings the vessel's stern up towards the shore, far closer than in position "A".

Lines: 2×4 in. floating hoses provided for connection to stern discharge manifold from red painted structure close South of the B & W truncated pyramid on Ras Sif. Maximum discharge pressure 3 kg./sq.cm. (approx. 150 t.p.h.). Height of tanks 24 m., distance to tanks 350 m. 1×6 in. line is available for midships manifold but this is only suitable for small ships. Shore requires water plug prior to commencement of discharge, on completion of each grade and on completion of final grade. Shore staff connect pipe-lines.

Maximum draft on berth 40 ft.

On the evening of 12th June the S.W. monsoon blew very strongly accompanied by a very heavy 15 ft. – 20 ft. swell. Vessel being light was moving a great deal and was eventually forced to carry out an emergency departure after jettisoning pipe-lines following a water plug through and cutting all ship's lines. This berth is wide open to the effect of the S.W. monsoon and when the monsoon is blowing strongly the weather conditions combined with the very poor unmooring facilities render the berth untenable. For these reasons this berth was declared by the Master to not be a "Safe Berth" within the meaning of the relevant Charter Party.

Mogadiscio New Port: Following Ras Sif being declared an unsafe berth arrangements were made for all floating hoses in possession of the Oil Terminal to be led via storm drains to Berth No. 5 following suggestions made by the ship. Vessels berthed stern up to Berth No. 4 or Berth No. 5 and cargo discharged via stern manifold to Ras Sif Oil Terminal.

Berth No. 5: Maximum draft 27 ft. Berth is well fendered with old tyres. Due to length of berth vessel berthed with starboard anchor down, 6 shackles on same, as maximum vessel length on berth 180 m. This berth is at present being extended by a further 200 m. Maximum discharge pressure 3 kg./sq.cm., maximum discharge rate 150 t.p.h. for products.

Berths No. 1, 2, 3: Maximum draft 32 ft. All cargo discharged by ship's gear. On Berth No. 3 there is one 8 in. pipe-line to the refinery 10 miles South of Mogadiscio for crude oil only. Booster pumps for this line are provided at the Ras Sif Oil Terminal.

Berth No. 4: Drafts alongside from 27 ft. – 32 ft. and is provided with a bridge for landing of livestock although to date this bridge has not been used. This berth is normally used by fishing vessels and smaller ships as a lay-by berth.

Tugs: Two tugs available. "Xamar 1" and "Xamar 2". Both fitted with VHF, 1,500 b.h.p. No tug lines. Ship's lines used for all operations.

Bunkers: Not available.

Repairs: Not available.

Somali Port Regulations: Notice to all ships, Mogadiscio Port. Abstracts from Somali Ports Authority Regulation No. 67 of 15-4-1978.

1. All ships must keep their VHF open and standby when approaching the Port and while remaining berthed alongside, on Channel 16.

2. All ships having on board persons suffering from contagious diseases must hoist the quarantine flag when anchoring and keep it hoisted until inspected and instructions given by the Port Health Officer.

3. While anchored in the roads, ships must keep clear from bearing directly obstructing leading lights and beacons on shore.

4. Ships having an n.r.t. exceeding 200 must engage harbour Pilots and tugs while berthing or unberthing at the deep water berths.

5. Ships are not allowed to throw any kind of refuse, dirt or oil spillage into the harbour waters.

6. Ships are not allowed to carry out engine repairs without permission from the Port Manager, while at berth.

7. Ships anchored in the roads or berthed alongside must keep the Somali national flag hoisted at a height clearly visible for a reasonable distance.

8. All ships lying alongside berths must engage the garbage service provided by the authorised garbage group of the harbour.

9. Oil tankers must have on board their own facilities for the retention of oil drainage and sludge, dirty ballast and tank washings.

10. It is prohibited to discharge oil, oily mixtures and any chemical residues at any distance less than 50 nautical miles from the shore line.

11. Officers of the Port Management are authorised to inspect the efficiency of facilities provided on board vessels for the retention of dirty substances, solid or liquid.

12. All ships at anchor or berthed alongside must take sufficient precautionary measures to fight fire outbreaks.

13. All ships berthed alongside must provide ratguards for their mooring lines.

14. Rigging of ship derricks and opening and closing of hatches are the responsibility of the ship's Master and crew.

15. Crew members of all vessels berthed alongside or anchored in the roads are not allowed to go ashore later than 2300 hrs.

16. Crew members going ashore and wishing to return to their ships are not allowed to enter the Port later than 2300 hrs.

Signed – Port Manager

AUTHORITY: Somali Ports Authority, P.O.Box 935, Mogadiscio, Somalia. *Tel:* 30081/3. *Telex:* 708. *Cables:* Somport, Mogadiscio.

NOTES

Please also advise Shipping Guides Ltd.

South Africa

GENERAL:

NOTICES: Following is an extract of British Notices to Mariners No. 1647(1979).

Routeing of Laden tankers off the coasts of South Africa (West):

Laden tankers in the Summer months should pass not less than 10 miles South of Alphard Banks (Lat. 35° 02′ S., Long. 20° 50′ E.) (See *Africa Pilot Vol. III)* and then keep 25 miles off the following points:

Cape Agulhas	(Lat. 34° 50′ S., Long. 20° 01′ E.).
Quoin Point	(Lat. 34° 47′ S., Long. 19° 39′ E.).
Cape Point	(Lat. 34° 21′ S., Long. 18° 30′ E.).
Slangkop Point	(Lat. 34° 09′ S., Long. 18° 19′ E.).
Cape Columbine	(Lat. 34° 50′ S., Long. 17° 51′ E.).

During the Winter, laden tankers should maintain the recommended distance offshore until the Winter Load Line Zone is reached and then keep as close to that line as possible. This will entail passing North of Alphard Banks and then about 12 miles off Quoin Point and Cape Point.

Vessels proceeding to the Replenishment Area (Lat. 33° 55′ S., Long. 18° 15′ E.). off Cape Town should maintain the above distances off shore until in a position where course can be safely altered to approach the Replenishment Area crossing the main traffic flow as nearly at right angles as possible.

Routeing of Laden tankers off the coasts of South Africa (East):

Laden tankers in the Summer months should pass 25 miles off the following points:

South Sand Bluff	(Lat. 31° 20′ S., Long. 29° 58′ E.).
Bashee River	(Lat. 32° 14′ S., Long. 28° 55′ E.).
Hood Point	(Lat. 33° 02′ S., Long. 27° 54′ E.).
Cape Recife	(Lat. 34° 02′ S., Long. 25° 42′ E.).

and then steer to pass 10 miles South of Alphard Banks (Lat. 35° 02′ S., Long. 20° 50′ E.).

During the Winter laden tankers should maintain the recommended distances off shore until the Winter Load Line Zone is reached and then keep as close to that line as is possible. Between Cape Recife and Cape Agulhas this will entail passing North of Alphard Banks. It is recommended to pass about 6 miles North of these banks.

CAPE TOWN (Table Bay): 33.56 S. 18.26 E. (See Plan)

PORT LIMITS: Westwards by a straight line between Green Point and Robben Island Lighthouses, and Northwards by a straight line from Robben Island Lighthouse East (true) to the Eastern shore of Table Bay, thence Southwards along high water mark, so as to include the foreshore to the Castle, thence back to Green Point Lighthouse.

DOCUMENTS:

Customs:
- *Form DA.1, Report Inwards/Outwards for Ships.
- *Form DA.3, Certificate of Clearance for Ships.
- *Form DA.4, Transire – for a destination in the R.S.A.
- *Form DA.5, List of Sealable Goods on board ship.
- Ship's Crew List (Customs Department) 6 Copies.

Post Office:
- *P1/27, Certificate of Departure of Vessel.
- P1/8, Post Office Certificate (Declaration).

Port Health:
- Maritime Declaration of Health.
- Crew List with last vaccination dates.
- Derat Certificate.

Port Authority:
- T908, Light Dues Certificate.
- T942 Clearance Certificate
- *T958, Report of Arrival.
- *T962, Departure/Shifting Notification.
- Ship's Manifest.

*Completed by Agent.

Shipmaster's Report: March 1981.
- Declaration of Health (Form GES-22)
- Set Vaccination Lists. 1st port only; even with Radio Pratique.
- Derat/Derat Exemption (if boarded).
- 2 Crew Lists.
- 2 Intransit Passenger Lists.
- 4 Landing Passenger Lists (Form DI-35).
- Crew Sealable Goods (Form DA-5).
- Crew Declarations (Company Form).
- Inventory of Slop Chest (Company Form).
- Register and Set of Ship's Certificates (used by Agent for clearing and returned).
- Arrival/Departure Record (Form BI-55) (Disembarking passengers only).
- Livestock Form (if nil, write on top of DA-5).
- Ship's Mail Declaration (Form P1/149) (if nil, write on top of DA-5; if mail aboard, cable Postmaster details free message, and forms will be presented by Agent at boarding).
- Certificate of Medical Officer, Master . . . (Form DI-67).
- Report of Arrival (Form T958) (to Pilot).
- Leaving Certificate (Form BI-86).

Notes: Fly "I" flag entering all ports; "B" if flammable cargo aboard. Include ship's entertainment TVs, radios, etc., cameras and walkie-talkies on DA-5. Although part of DA-5, addition of tobacco/spirits on Crew Declarations (Company Form) will allow same form to be used in Mozambique and Somalia.

PILOTAGE: Compulsory. One hour advance notice to be given to the Port Captain through VHF radio, call sign Port Operations, on Channel 16, working Channel 12. Pilot boat fitted with multi-channel VHF. Two motor pilot boats, one with black hull and white upperworks and one with an orange hull and white upperworks. Pilot taken aboard at position: Main Breakwater bearing 155° (T) × 2.5 miles.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. Oil tankers and ships carrying explosives or dangerous goods restricted to daylight hours.

MAX. SIZE: Passenger and dry cargo vessels: Max. length up to 305 m. overall; draft 10.97 m. Tankers: (for discharging) max. length 820 ft. overall; draft 13.1 m. (tidal).

Tankers/ore carriers in ballast up to 350 m. in length, 350,000 d.w.t. and draft 13.1 m. may berth for bunkers, repairs, etc.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Cape Town Radio, call sign ZSC. VHF and R/T 2182 kHz.

BERTHING: Chart datum is that referred to in the South African Tide Tables published by The Hydrographer of South African Navy.

Roll-on/Roll-off Facilities: Available at Berths 500 and 501, as well as at "L" and "M" Berths. Berths "A" and "J", 502 and 600 for ships with slew ramps only.
Cold Store: Blue Continent Cold Storage Co. (Pty) Ltd. Tel: 51-3154. Telex: 577355 and 577232. Operates cold store with capacity of 17,000 tonnes at −30°C.
Pre-Cooling Store: Deciduous Fruit Board. Tel: 930 3960. Telex: 527718/526771. Operates 8 pre-cooling chambers with capacity of 10,000 cu.m. (approx.) at D-Shed.
Container Terminal: Area – 97 hectares; Ground slots – 4,858 TEU's; Reefer points – 190 plug points; Refrigerated holding store – 500 slots. Equipment: Container gantry cranes, straddle carriers, haulers and trailers.

TUGS: Join vessel approximately 0.25 miles from harbour entrance.

4 diesel Voith Schneider tugs with a bollard pull of 43 tons. All tugs are fitted for firefighting and salvage. Tug's wires used at no extra charge.

Stand-by tugs compulsory for tankers discharging crude.

CRANES: *Floating Cranes:* Lifts 60 tons at 24.4 m. radius and another floating crane lifts 200 tons at 21.5 m.

BULK HANDLING FACILITIES: *Grain Elevator:* 1 terminal grain elevator of 27,220 tons storage capacity, with loading conveyors to the Collier Jetty. Continuous intake capacity of elevator, 750 t.p.h.; shipping capacity, 1,000 t.p.h. (Leased for private use: Loading conveyors only now usable, subject to considerable mechanical overhaul).

Other bulk cargoes handled at general cargo berth with shore crane. No LPG facilities.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

TANKERS: Tanker Basin to accommodate two tankers simultaneously, one of max. overall length of 256.0 m. and one of 204.2 m. overall length. Max. permissible draft 13.1 m., subject to a minimum of 0.9 m. on tide gauge.

Slop tank: Capacity 1,500 tons, available for oily ballast from tankers back loading white oil.

DENSITY: 1025.
FRESH WATER: Delivery by hose ex-wharf hydrants. 50 t.p.h.
FUEL: 48 hours' notice required. MFO, IFO and Gas Oil available.
Shipmaster's Report: November 1987.

All grades of fuel are not available at all times.

REPAIRS: All types of repairs can be undertaken.
DRY DOCKS:
Sturrock Graving Dock: Situated at S.E. end of Duncan Dock:

Dimensions:	Overall docking length	360.0 m.
	Length on keel blocks (first to last keel block)	338.3 m.
	Length on bottom (dock floor)	350.4 m.
	Width at coping	47.5 m.
	Width at entrance top	45.1 m.
	Maximum width at bottom	38.4 m.
	Depth on entrance sill, HWOST	13.7 m.
	Depth on inner sill, HWOST	15.1 m.

A docking length of 369.6 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into 2 compartments of either 132.5 m. and 216.1 m. or 205.7 m., and 142.9 m. respectively.

1×50 ton and 1×10 ton electric cranes on 7.6 m. gauge track, 2×5 ton electric cranes on 4.9 m. gauge track and 3×4 ton electric cranes on 4.9 m. gauge track are available.

The dock can be emptied in 4 hours.

A landing wharf 548.6 m. in length is provided on the port side of the graving dock to facilitate the dry-docking of ships.

A repair pier 457.5 m. in length is provided off "M" berth. 2×15 ton electric cranes on 9.1 m. gauge track is available.

Robinson Graving Dock: Situated in Alfred Basin:

Dimensions:	Overall docking length	161.2 m.
	Length on keel blocks (first to last keel block)	142.6 m.
	Length on bottom	152.4 m.
	Width at coping	27.4 m.
	Width at entrance top	20.7 m.
	Maximum width at bottom	17.2 m.
	Depth on entrance sill, HWOST	7.9 m.

3×4 ton electric cranes on 4.1 m. gauge track and 1×15 ton electric crane, on 4.1 m. gauge track are available.

The dock can be emptied in 3 hours.

Syncrolift: Situated in Alfred Basin:

Dimensions:	Lifting capacity	1,750 tons
	Maximum length of vessel	61 m.
	Maximum width of vessel	15 m.

Slipways:

There are 4 boat slips for yachts and small craft.

SURVEYORS: Lloyd's, BV, N.V., N.K.K. and ABS.
GANGWAY/DECK WATCHMEN: Ship's Agent makes necessary arrangements.

OPENING/CLOSING HATCHES: Mechanical hatches opened/close by crew. Other types of hatches by stevedores.
CERTIFICATES:

Safety Certificates in respect of construction and gear.
Radio Certificate.
Load Line Certificate.
Derat Certificate.
Certificate of Competent Officers (passenger ships only).

CUSTOMS ALLOWANCES: The Master, officers and other membe of the crew who remain on the ship during its stay in port may each b allowed to retain in his possession the following quantities (to cove 4 days) of the undermentioned sealable goods:

	Tobacco in any form grammes	*Potable spirits in any form* litre	*Wine* litres	*Beer or stout* litres
The Master/Pilot	230	1	3	3
Officers (including pursers, surgeons, chief stewards, wireless operators and serangs)	175	1	3	3
Other members of the crew	115	nil	3	nil

Where the Master, officers or other members of the crew remain o board the ship for more than 4 days, the Controller of Customs an Excise may on request authorise the issue from under seal, fo consumption on board, of the following further quantities per day:

	Tobacco in any form grammes	*Potable spirits in any form* millilitres	*Wine* litres	*Beer or stout* litres
The Master/Pilot	30	100	1	1
Officers (including pursers, surgeons, chief stewards, wireless operators and serangs)	25	100	1	1
Other members of the crew	15	nil	1	nil

CARGO GEAR: All cargo handling equipment must be in good conditio and certificates available for inspection.

REPATRIATION: All facilities available.

1. *Vessels Docking:*
   - *(a)* Any personnel arriving to join a vessel at Cape Town shoul possess a valid travel document and a brief letter of introductio Entry Permits can be extended if the vessel is late in arriving.
   - *(b)* Application to spend time (longer than 48 hours) in South Afric prior to repatriation should be made to the local Immigratio Authorities.
2. *Vessels Calling Off Port Limits:*
   - *(a)* The same requirements apply as for 1(a) with the exception personnel who have entered the country from a vessel callin off Port Limits.
   - *(b)* The following applies to all personnel disembarking from vessel calling off Port Limits.

     (i) Repatriation must be made within 48 hours from time signing off.

     (ii) In order to comply with local Immigration Authorities the Age requires the following details, for each individual, at leas 72 hours before disembarkation:
     - *(a)* Full name and nationality.
     - *(b)* Rank and, if Technician, name of employers.
     - *(c)* Passport number, place and date of issue.
     - *(d)* Place and date of birth.
     - *(e)* Destination and class of travel.
     - *(f)* If air ticket held on board, full details of routing.
     - *(g)* Reasons for disembarkation.

In the case of personnel transferring from one company vessel another, the same conditions apply except the maximum time permitte for such transfer is 78 hours. If they have not joined the vessel with this period, repatriation must be arranged forthwith.

There are no difficulties for any personnel disembarking for medic reasons.

AIRPORT: D.F. Malan Airport – 20 km. from harbour. Daily flights Johannesburg connecting with overseas flights by regular airlines.
TIME: GMT plus 2 hours.
HOLIDAYS: New Year's Day (1st January); Founder's Day (6th Apri Good Friday; Family Day; Ascension Day (date varies); Workers D (1st May); Republic Day (31st May); Kruger Day (10th October); Day the Vow (16th December); Christmas Day (25th December); Day Goodwill (26th December). Cargo is not worked on Christmas Day a New Year's Day.
POLICE/AMBULANCE/FIRE: Police, 419-0260; Ambulance, 51-515 Fire, 218-5431 or 46-5555.
TELEPHONES: Telephones can be supplied at all berths. Arran through Agents.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
SHIP SUPPLY SERVICES:
Helicopter Service: Available for mail and small items of stores vessels not wishing to enter harbour.
Launch Service: For vessels not wishing to enter harbour, Agent m arrange launch service for mail, stores, etc. In this case service o permissible in area North and West of position at least 5 miles due W of Robben Island.

Supplied by:

Court Helicopters (Pty) Ltd., P.O.Box 2546, Cape Town 8000.
Ocean Ferries (Pty) Ltd., P.O.Box 6426, Roggebaai 8012.
Sealink Ltd., P.O.Box 4962, Cape Town 8000.
Southern Offshore Supplies, P.O.Box 1339, Cape Town 8000.
Also see "Shipmaster's Report".

SHIPMASTER'S REPORT: Off limits launch and helicopter service.

Port, Immigration, Customs and Health Authorities have made it clear that this service is a privilege and not a right. It is therefore of the utmost importance that the regulations are strictly adhered to.

The Agent must apply to the Port Captain for permission to service the vessel and the following details must be submitted. Name of vessel, time and date of arrival, draft, where from, where to, stores required and other reasons for call.

Launch is only allowed to be alongside vessel for 1 hour maximum otherwise vessel will have to enter port limits and incur port dues.

If personnel embarking, Immigration Authorities require name of vessel, tonnage, whether ballast or loaded and names of persons embarking. If persons disembarking then full names, dates and places of birth, nationality, Passport or Discharge Book number and expiry date, whether South African visa held and comprehensive reason for leaving vessel, arrangements made for departure from South Africa (usually 24/48 hours allowed), and flight number. This does not apply to medical cases. Guarantee from Agent accepting full responsibility and liability regarding maintenance and repatriation expenses. Persons disembarking must report immediately to Passport Control. Failure to report or leave South Africa on the booked flight is an offence and in addition to any fine or imprisonment the Owners will be refused any further off limits service for *any of their vessels*.

Port Health require application for Radio Pratique 48/24 hours before arrival. Customs require all bonded stores loaded to be signed for and ship's stamp applied. Stores or spares being landed must have prior notification to Agent and an accompanying letter giving full description and disposal instructions.

Agents require 168, 96, 48, 24, and 12 hours' notices followed by any amendment to ETA. Stores requirements should be sent at least 96 hours before arrival. Three copies of Crew List to be sent ashore with launch (or helicopter).

Services operate 24 hours per day and usual rendezvous position is 5 miles West of Green Point Lighthouse for launch (and 12 miles West for helicopter). Launch can carry up to 30 tons stores (and helicopter up to 2,000 kg.). Vessels should not anchor but provide a good lee and have derrick rigged. Contact should be made with the launch (or helicopter) 1 to 2 hours before arrival rendezvous point using Channel 16.

AUTHORITY: Portnet, P.O.Box 32696, Braamfontein 2017, Johannesburg, South Africa. *Tel:* (011) 7738303. *Telex:* 424205. *FAX:* (011) 7738304. *Contact:* The Chief Executive.

Cape Town: P.O.Box 4245, Cape Town 8000. *Tel:* (021) 218-2004. *Telex:* 550178 Porcap. *Contact:* Port Manager Tel: (021) 218-3790, Fax: (021) 25-2656, Telex: 01283, or Port Captain Tel: (021) 218-3413.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 220 (5th Floor, Foretrust Building, Martin Hammerschlag Way), Cape Town 8000. Tel: (021) 211830. Telex: 522026. Fax: (021) 4182415.

DURBAN (Port Natal): 29.53 S. 31.02 E. (See Plan)

PORT LIMITS: The area of sea bounded by:

(1) to the North, a line drawn from the coast in position: Lat. 29° 48′ 42″ S., Long. 31° 02′ 32″ E. in a 090° (True) direction to position Lat. 29° 48′ 42″ S., Long. 31° 07′ 30″ E.;

(2) to the South, a line drawn from the coast in position; Lat. 29° 54′ 06″ S., Long. 31° 02′ 30″ E. in a 090° (True) direction to position Lat. 29° 54′ 06″ S., Long. 31° 07′ 30″ E.;

(3) to the East, a line joining the seaward positions in (1) and (2).

DOCUMENTS: The following documents should be prepared and ready on berthing:

Immigration:
2 Crew Lists.

Customs:
2 Crew Lists.
List of Narcotics on board.
1 Ship's Stores List.
1 Crew Declaration of Crew's Personal Effects.
1 Customs Form D.A.5.
N.B. Possession of pornographic material is a serious offence.

Port Health:
1 Maritime Declaration of Health.
1 Vaccination List.
1 Crew List.
Valid Derat Certificate.

Agent:
2 Crew Lists.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.

Note: The above documents are required at each South African port, regardless of vessels which are coasting.

PILOTAGE: Compulsory. As much advance notice as possible to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Call Pilot by Aldis lamp if necessary. Pilot boats fitted with multi-channel VHF.

Motor pilot boats – hulls painted black, white housing. "Pilot-loods" painted in black on housing. Pilot taken aboard at Pilot Boarding Area situated approximately 2 miles N.N.E. of South breakwater light.

Vessels not to approach closer than 2 miles from entrance until contact has been made with pilot boat.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. Oil tankers and ships carrying explosives or dangerous goods restricted to daytime hours. The depth of the inner and outer channels is 12.8 m. below chart datum.

Hazardous Cargoes: Details of all hazardous cargo for discharge or loading at Durban and hazardous cargo remaining on board during a vessel's stay, are to be made known to the authorities through the vessel's Agent, not less than 72 hours prior to vessel's arrival.

Information required: Commodity, packaging, weight and volume, IMO group and stowage on board.

Vessels having on board more than 10 tons of hazardous cargo, will require to maintain a fire watch manned by qualified shore firemen and in addition, have an emergency shore telephone on board.

MAX. SIZE: The draft permitted is 38 ft. (11.58 m.) The length of 800 ft. is exceeded with the Port Captain's approval.

Size of vessels permitted to enter during the hours of darkness and also to shift berth at night: Vessels not exceeding 200 m. in length and 26 m. in beam may be brought into port at night provided weather conditions are suitable. Maydon and Esplanade Channels may not be traversed in either direction at night by vessels whose length exceeds 182.89 m. Vessels whose beam exceeds 35 m. are brought into port only when weather conditions are suitable.

HEALTH: Radio advice to "Port Health Durban", direct through Durban Radio, to be given between 24 hours and 48 hours prior to arrival, advising ETA, last port, date sailed, number of crew, full innoculation and vaccination status, and state of health of crew, and requesting Radio Pratique. Port Health will cable vessel directly, either granting pratique or requesting further details.

Shipmaster's Report: Valid Yellow Fever Certificate not required.

RADIO: Radio advice to "Port Captain Durban", direct through Durban Radio, 48 hours prior to arrival, advising ETA, draft, freeboard and reason for calling at Durban.

VHF: Port Control office manned 24 hours, working Channel 12.

TUGS: 7×26 ton – 39.2 ton bollard pull tugs available. Join vessels in entrance channel. Tug's wires used at no extra charge.

Stand-by tugs compulsory for tankers discharging crude.

BULK HANDLING FACILITIES: *Bluff Coaling Appliance:* Operators: Portnet. 3 berths, BCA 1, 2 and 3 equipped with electrically driven appliances for the loading of coal. 1 belt loader with capability of loading at the rate of 550 t.p.h. and 2 bucket transporters with an aggregate capacity of 1,100 t.p.h. are available. The overhead storage bins have a capacity of 9,220 tons, while concrete bins are provided for ground storage with a capacity of 38,630 tons of anthracite. All exports are brought in by rail trucks. Overall productivity 4,000 tons per 24 hours. There is no work between 1100 hrs. Saturday and 0700 hrs. Sunday.

Coal Anthracite Storage Facilities: Concrete ground storage bins of 18,290 tons capacity at Causeway Road.

Island View 3: Operators: Durban Bulk Shipping Co. (Pty) Ltd. Max. draft 10.64 m., max. length 167.5 m., max. reach 9.4 m., dolphin max. height 13.1 m. Storage capacity: 60,000 tons (grain) and 25,000 tons (minerals).

Although a variety of products are handled at this berth, the operators mainly import and export their own product, which is de-fatted germ meal pellets.

Load/discharge Rates in tons per hour:

	Load	*Discharge*
De-fatted Germ Meal	380	160
Chrome Ore	550	200
Andalusite	550	—
Mono Calcium Phosphate	100	—
Agricultural Commodities	380	160

A tank farm is sited adjacent to the terminal silos with storage facilities for 6,500 tons of vegetable oils and liquid products.

New Pier 109 – Storage Silo – Soda Ash: Operators: St. Auffer. Imports of Soda Ash. Max. length 244 m., max. draft 12.74 m.

Vessels are discharged using 2 vacuum operated suckers to a storage facility of 32,000 tons at 300 t.p.h. or direct to rail trucks at 140 t.p.h.

Maydon Wharf 2 – Sugar Terminal: Operators: S.A. Sugar Association. Exports of bulk and bagged sugar. Max. draft 9.84 m., max. reach 15 m., max. throw 15 m., max. height 14 m. Max. wharf length of continuous gantry: 131 m. Storage in 3 silos with 520,000 tons capacity.

Loading is facilitated over 2 appliances, but only one operated at a time with a rate of 750 t.p.h. 24 hour operation if required. Stowage Factor: 43.

Maydon Wharf 5 – Multi Product Installation: Operators: Rennies Bulk Terminals. Max. length 189 m., max. draft 9.84 m.

Discharge and loading of minerals, agricultural and processed products in bulk.

Storage capacity: Minerals.

3 covered sheds containing 14 segregated concrete bins – 80,000 tons. 2 concrete silos – 12,000 tons.

Storage capacity: Non-Minerals.

17 concrete silos – 4,540 cu.m. 3 star bins – 690 cu.m.

Loading Rates:

To ship: Agricultural – 400 t.p.h., minerals 700 t.p.h.

Ex-ship: Agricultural – 200 t.p.h., minerals – 200 t.p.h.

Hours of Operation: 24 hours per day, 7 days. Normal Monday – Friday 0600 – 1800 hrs. Balance at overtime rates.

Trimmer and Boom: Max. height of loading MSL +7.2 m., minimum depth of lowest bulkhead MSL + 1 m. Max. distance from quay 19 m. Minimum distance from quay 9.2 m. Max. throw 12 m. Rotation 360°.

Maydon Wharf 8 – Grain Terminal: Operators: Portnet. Loading bulk grain. Max. draft 9.84 m. Vessels have loaded up to 10.6 m. o rising tide but the Master must take full responsibility and p permission must be obtained from the Port Captain. Loading throug spouts. Storage capacity 38,100 tons (maize) and 14,000 tons (flower seed). Loading rate (maize) 1,290 t.p.h. Bagging rate 3,000 b per day.

Hours of Operation: Ordinary time Monday – Friday 0600 – 1400 Max. length: Wharf 171.7 m. Gantry 133.56 m. between outerm shipping spouts. Max. beam with elevator spouts extended 27.43 Max. height from water level to top of coaming 14 m.

Average Stowage Factors	*Lower Hold*	*Tween Decks*
Conventional Vessels:		
Sorghum	49	51
Yellow Maize – Grade 1	46	47
Yellow Maize – Grade 2	47	48
Bulk Carriers:		
Sorghum	45.5	
Yellow Maize – Grade 1	46.5	
Yellow Maize – Grade 2	46.5	

Maydon Wharf 9 – Bulk Molasses: Operator: Pure Cane Molass Max. length 180 m., max. draft 9.84 m., storage capacity 48,000 to shipping rate up to 500 t.p.h. Piping and flanges available from opera Shipping of Molasses in bulk.

Maydon Wharf 14 – Bulk Soda Ash Appliance: Operator: I. Max. draft 9.84 m., max. length 190 m., max. reach 17 m.

Discharge of bulk soda ash through 2 vacuum operated suck simultaneously to shore storage facility of 28,000 tons. Hours operation 24 hours – 7 days. Rate of discharge 80 t.p.h. – 90 t. Max. 2,000 tons per 24 hours.

Maydon Wharf 15 – Bulk Manganese Ore Appliance: Opera Associated Manganese. Max. draft 9.84 m., max. length 230 outreach 12 m. Hours of operation: 24 hours – 7 days.

Loading of bulk manganese ore over single boom conveyor. Applia fed from 30,000 ton capacity open air storage facility, shipping 400 t.p.h.

CRANES: *Floating Cranes:* 2, lifting capacities of 60 tons and 200 tons, respectively.

Mobile Cranes: Diesel-electric road cranes: 2×12.5 ton, 1×30 and 6×35 ton cranes.

CONTAINER HANDLING FACILITIES: A major container term comprising 5 deep sea berths (201-205) and 2 coaster berths (108- is equipped with 7×40 ton wharf container cranes at deep sea fac and 1×30.5 tonne unit at Berth 108.

The entire complex covers some 102 hectares and provides substantial stacking areas backed up by a large terminal building computer control, workshop complex and a road/rail transfer termina handle unit trains conveying 100 TEUs. This rail terminal is served 2 modern 35-ton container gantry cranes covering 3 rail tracks 2 traffic lanes. The back up system operates on a combined tra straddle carrier system comprising 27×30 ton, 8-wheeled strad carriers augmented by a substantial fleet of terminal haulers and trai as well as a large cartage fleet operated by the Port Authority for local delivery of containers.

A very modern stuffing and re-stuffing depot located on a 13 hec site immediately adjacent to the harbour terminal is operated by priv enterprise (Messrs. S.A. Cargo Depots). The depot is fully equipped re-stuffing sheds and container handling equipment to cater for traffic.

The container terminal operates a 24 hour day, 7 days a week serv

PRE-COOLING FACILITIES: *Pre-cooling Stores:* South African operative Citrus Exchange Limited: Tel. 012-282181. Telex: 3213 Operates 11 pre-cooling chambers with a capacity of 15,000 cu (approx.) at Berths O and P.

STEVEDORES: Stevedoring undertaken by private enterp stevedores appointed by ship's Agent.

Port Working Hours:

The port is a 7 day, 24 hour port as far as berthing and pilotage concerned.

Cargo working hours at conventional berths are:

Monday – Friday (2 shifts)	0600 – 1400 hrs.
	1400 – 2200 hrs.
Sunday	0715 – 1515 hrs.

Limited labour is available for overtime and Saturday and Sun working, whilst 3 shift working consisting of 3×8 hour shifts is provi for at the Pier No. 1 area, albeit on a limited basis.

Container Terminal: Continuous work 7 days a week with changes at 0600 hrs., 1400 hrs. and 2200 hrs.

MEDICAL: Unrestricted hospital facilities. Medical assistance must arranged through Agents.

TANKERS: *SBM:* An off-shore single buoy mooring, suitable for c dischargers between 70,000 and 300,000 d.w.t., is situated in pos 30° 00.5′ S., 30° 58.5′ E. A Mooring Master will board in position 2 m Eastward of the SBM. A starboard derrick, capacity 10 tons should ready and crew available to lift mooring equipment on board from lau A good lee on the starboard side is desirable.

Mooring to the buoy is with 2 lines provided by the terminal but ves are required to provide a rope messenger, available on the foreca The mooring operation is carried out by shore personnel, assisted w necessary by ship's crew.

Pipe-line manifold should be ready to connect two 16 in. disch hoses ASA 150 flanges. Connection by terminal personnel. The h connection team remain onboard throughout the discharger's stay a SBM.

No bunkers, or water are available from the SBM. Vessels using buoy and receiving water or stores ex-launch may only do so pri berthing or after leaving the SBM and at a distance of more than 2 m from the buoy.

Port Tanker Berths: There are 7 tanker berths for vessels of max. le 244 m., max. draft 12.3 m. at Island View.

Slop tank facilities with a capacity up to 4,000 tons are available. Requirements in excess of this volume should be made known to the vessel's Agents with as much prior notice as possible.

Crude oil discharge through 10 in. hoses, white oil 8 in. hoses and loading products through 8 in. hoses.

Bunkers and fresh water available ex-berth.

Chemical tankers up to 183 m. berthing at No. 1 Island View are permitted to berth during hours of darkness. Agent to advise Port Control in advance that SOLAS and Classification Certificates are valid.

2 tugs required for shifting and all tanks to be sealed.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. Rate of delivery 50 t.p.h.

FUEL: Fuel and diesel oil are available ex-pipeline at Pier No. 1, Container Terminal and Island View Berths. Gas oil ex-pipeline is only available at Island View Berths No. 4, 5, 6, 7 and 8, and blends are available at Island View Berths No. 2 to 8.

The Maydon Wharf Point and Bluff Berths are served with fuel oil, diesel oil, gas oil and blends from a bunker barge (see below). No bunkers are supplied outside the harbour.

There is a self-propelled bunkering barge called the "Durban Servicer" with a capacity of 140 tonnes of gas oil, 650 tonnes fuel oil and 280 tonnes diesel.

CONSULS:

REPAIRS: All types of repairs can be undertaken.

DRY DOCKS: *Prince Edward Graving Dock:*

Dimensions—	Overall docking length	352.044 m.
	Length on keel blocks	327.660 m.
	Length on bottom	352.044 m.
	Width at coping	42.215 m.
	Width at entrance top	33.528 m.
	Maximum width at bottom	33.528 m.
	Depth on entrance sill HWOST	12.497 m.
	Depth on inner sill HWOST	13.106 m.

A docking length of 364.44 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into 2 compartments:

Outer 206.906 m. and inner 138.684 m.

The dock can be emptied in 4 hours.

Dry Dock Cranes:

2×8 ton with 27.50 m. radius
1×10 ton with 27.40 m. radius
1×8 ton with 18.27 m. radius
1×4 ton with 19.81 m. radius
1×50 ton with 30.00 m. radius

Floating Dock No. 3:

Dimensions—	Extreme length	106.680 m.
	Length on bottom	106.680 m.
	Length on keel blocks	104.546 m.
	Extreme width	26.822 m.
	Width at entrance	19.482 m.
	Height on keel blocks	1.219 m.
	Draft on keel blocks, HWOST	5.334 m.
	Lifting capacity	3,629 tons
	Crane	4 tons

SURVEYORS: All Classification Societies represented.

CERTIFICATES:

Safety Certificates in respect of construction and gear.
Radio Certificate.
Load-line Certificate.
Derat Certificate.
Certificate of competent officers (passenger ships only).

OPENING/CLOSING HATCHES: Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.

CUSTOMS ALLOWANCES: See "Cape Town".

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection. Under normal conditions vessels are obliged to use shore cranes.

REPATRIATION: All facilities available. Also see "Cape Town".

AIRPORT: Louis Botha Airport – 15 miles from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Founder's Day (6th April), Good Friday; Family Day; Ascension Day (date varies); Workers Day (1st May); Republic Day (31st May); Kruger Day (10th October); Day of the Vow (16th December); Christmas Day (25th December); Day of Goodwill (26th December). Cargo is not worked on Christmas Day.

POLICE/AMBULANCE/FIRE: Police, 310-2714; Ambulance, 62333; Fire, 62333 or 4502222.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents. Also see "Restrictions" – Hazardous cargoes.

SERVICES: Tank-cleaning facilities, divers, compass adjustments and repairs to all electronic gear can be undertaken.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required, otherwise National Identity Cards, if available.

SHIP SUPPLY SERVICE: Crew changes are permitted by helicopter or launch at Durban and can be arranged with prior permission from Immigration and Customs Authorities provided vessel has been granted Radio Pratique.

Helicopter Services: A single engine Sikorsky S62 helicopter is available for crew changes and supply services to vessels passing off Durban. The above helicopter is available for daylight service only, except in emergencies.

Normal Service: Within 15 nautical miles of Cooper Light.

Note: Normal Rendezvous area is 10 nautical miles off the coast. Bearing (160°T) from Cooper Light. (For service where more than one flight is required the ship MUST route through the 10 nautical miles rendezvous position).

Launch Service: A Company operates launches suitable for servicing vessels off port limits. Up to 20 tons of stores and/or provisions and a maximum of 14 passengers can be carried. The condition of transport is that same is performed solely at Owner's risk.

The costs involved are R100 per half hour or part thereof and nominal charges are raised for the use of the launch's 1.5 ton hydraulic crane and steel cages to carry stores.

Communication can be established with the launch 1 hour prior to the ship's arrival at the Rendezvous position, on either VHF Channel 16 or 2182 kHz. The normal Rendezvous is five miles East of the Durban Harbour breakwater, but this can be easily varied.

The following two private companies have small craft licensed at this port to serve vessels off limits:

1. Messrs. Offshore and Ships Supplies (Pty) Ltd., P.O.Box 29139, Maydon Wharf 4057.
2. Messrs. Southern Offshore Supplies (Pty) Ltd., P.O.Box 38011, Point 4069.

Helicopter service provided by: Helicopter Services (Pty) Limited., P.O. Louis Botha Airport, Durban 4029. Tel: 426101/426192. Telex: 564246 SA.

GENERAL: A copy of the Regulations for the Republic of South Africa supplied gratis to Masters on arrival.

DEVELOPMENTS: A new Ro-Ro shed to cater for deep sea and coastal Ro-Ro traffic.

The renewal of wharf cranes over a 4 year period. The current light weight fleet will be replaced by fewer higher capacity cranes, as and when the need arises.

Additional container gantries and replacement of the straddle carrier fleet with both stacking cranes and modern straddle carriers.

New specialised break-bulk terminals.

New offices at Ocean Terminal.

SHIPMASTER'S REPORT: September 1980.

Pilotage: Pilot ladders should be provided with manropes, uncovered manila, not less than 32 mm. diameter and without knots at the end.

Container Handling Facilities: The terminal has been completed. General cargo vessels with 10 containers or more have to handle these through the container terminal and shift berth later for handling of general cargo.

Bunkers: On Maydon Wharf no bunker facilities, bunkers to be taken by barge, but only one barge available. Sometimes vessels have to shift to bunker pier for bunkering.

SHIPMASTER'S REPORT: June 1979 (updated July 1986).

Approaches: Decca Chain 10C, can be erratic, especially at night. 'Bluff' shows up at 48 miles on radar. Cooper Point D/F continuous.

Pratique: Send message to "Porthealth" Durban 36 hours before arrival. If no complications free Pratique given quickly from Durban Radio.

Anchorage: Satisfactory if good weather, within about 4 miles N.E. of breakwaters, however if Southerly winds and swell build up it can be dangerous and it is often best to lie off.

Pilots: Send message to 'Port Captain Durban' 24 hours before arrival; ship's particulars, type, cargo, length, draft and Agent's name. Contact Durban Harbour Radio at least 1 hour before arrival. Pilot boards from large black fast cutter, nearly always on vessel's starboard side (landward side).

Must have fixed ladder with manropes, if vessel has large freeboard gangway required at half height. Pilots dislike hoists.

Entry: Due to swell and cross currents around breakwater vessel has to be "driven" through breakwater entrance which requires full harbour speeds and sometimes more if heavy swell conditions, once well inside breakwaters speed is reduced.

VHF: Durban Harbour Radio and Pilots generally work Channel 12 but numerous other Channels available.

For public correspondence use Durban Radio which usually works Channel 26, but very busy in the morning.

Tugs: 7 large powerful tugs fitted with firefighting and salvage capabilities are on station. Tugs are all diesel powered and comprise Schottel, Z-Peller and Voith propulsion systems with bollard pull varying from 23 tons to 40 tons. Very manoeuvrable and excellent stopping power. For most ships two tugs used inward and one outward, tug's wires used. A 20,000 h.p. ocean going tug is usually on station at Durban.

Tugs join vessels just inside breakwaters. For large vessels will accompany vessel on either side from anchorage area and then connect up when swell slackens inside.

Berth: For bunkers, Island View, Starboard side to. Swing in turning basin. For oil transfer of any kind use gantry 'Sheepbridge' with flexible pipes. Shock absorbing fenders. For vessels of 207 m. in length at No. 7, 8 and 9 Berths the straight section of the ship's side lay along the quay. FW available from quay.

Lines: Three head and stern lines, one of which is a shore line from mooring posts ashore. Two backsprings either end to the jetty. Mooring boat used.

Bunkers: Meter pump. Stop on meter at quantity stemmed. Rate up to 200 t.p.h.

Stores: Have to be taken from roadway down to the jetty. Generally local labour has to assist.

General: D/F calibration can be easily undertaken off Cooper Light, good continuous beacon from red tower near water tower, generally little traffic.

Customs/Immigration: Papers as per 'Guide to Port Entry'. Immigration require 'I' flag flown until Immigration Clearance granted.

AUTHORITY: Portnet, P.O.Box 32696, Braamfontein 2017, Johannesburg, South Africa. *Tel:* (011) 7738300. *Telex:* 424205. *FAX:* (011) 7738304. *Contact:* The Chief Executive.

Portnet, P.O.Box 1027, Durban 4000, South Africa. *Tel:* (031) 302-2434 (Port Captain); (031) 302-3555 (Port Manager). *Telex:* 6-21567 SA. *FAX:* (031) 301-4333. *Contact:* Port Director.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 2161 (18th Floor, 477 Smith Street), Durban 4000. Tel: (031) 301-0711. Telex: 620211. Fax: (031) 306-4261.

EAST LONDON: 33.02 S. 27.55 E. (See Plan)

PORT LIMITS: The area of the sea bounded by a line drawn from the Nahoon Point in position: Lat. 32° 59′ 50″ S. Long. 27° 57′ 07.5″ E. in a 114° direction for 1,852 m. to a position: Lat. 33° 00′ 13.9″ S. Long. 27° 58′ 12.8″ E. thence in a 216.5° direction to a position: Lat. 33° 03′ 14.46″ S. Long. 27° 55′ 37.18″ E. and thence in a 295° direction to the coast in position Lat. 33° 02′ 36″ S., Long. 27° 53′ 57″ E. (All bearings are true.)

For Charter Party purposes: An "arrived ship" is when she enters the Port Limits.

For Harbour Revenue purposes, a vessel "arrives" when it passes into the harbour proper or upon first contact at anchorage whilst waiting for berth.

DOCUMENTS: See "Cape Town".

Immigration: Produce their own forms which are:

(a) Arrival and Departure forms.
(b) Prohibition Notice – which states all crew must sail with vessel unless officially signed off through Immigration.
(c) Medical Certificate.
(d) Advice letter from last South African port – if applicable.

They require Crew Lists and the "I" flag to be flown until vessel cleared by Immigration Officer.

Also see "Cape Town" – *Shipmaster's Report,* March 1981. Same Documentation except 3 Crew Lists and 1 copy "nil" Livestock Form.

PILOTAGE: Compulsory. One hour advance notice to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Pilot boats fitted with multi-channel VHF. Motor pilot boat – black hull, white housing "Pilot-Loods" painted in black on housing. Pilot taken aboard at outer anchorage. Pilots prefer pilot ladder and manrope system for boarding and disembarking.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Port operates from: Mondays to Fridays 0600 to 2200 hrs., Saturdays 0600 to 1200 hrs. and outside these hours at special request. Tankers are docked in daylight only and can sail during normal working hours of port.

MAX. SIZE: Tankers: Max. length 204 m. overall, draft 9.9 m.

Passenger and dry cargo vessels: Max. length 239 m. overall, draft 9.9 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

Vessels will not be brought into harbour until Radio Pratique has been requested/granted, if this is first port of call on the South African range.

RADIO: East London Radio, call sign ZSA.

TUGS: 2 diesel Schottel tugs fitted with fire fighting and salvage capabilities with bollard pull of 34 tons each are available. Join vessel in entrance channel. Tug's wires used at no extra charge.

Stand-by tugs compulsory for tankers with hazardous cargo on board.

BERTHING:

*Suitable for small fishing craft only.

MEDICAL: Cape St. Blaize lighthouse on 24-hour watch. Requests for medical assistance passed through lighthouse to Harbour Master and Pilot. Hospital facilities available. Vessels in port should arrange medical facilities through Agent.

DENSITY: 1025.

FRESH WATER: Available along Nos. 3, 4 and 5 quays and Vincent Jetty.

FUEL: Available at No. 2 quay and No. 3 quay. Available by road tanker at No. 5 quay and Vincent jetty.

REPAIRS: Marine engineering firm available for all classes and types of onboard afloat repairs. Slipway of 375 tons capacity is available.

CUSTOMS ALLOWANCES: See "Cape Town".

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

AIRPORT: George Airport, 40 km.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Founder's Day (6th April); Good Friday; Family Day; Ascension Day (dates vary); Workers Day (1st May); Republic Day (31st May); Kruger Day (10th October); Day of the Vow (16th December); Christmas Day (25th December); Day of Goodwill (26th December). Cargo is not worked on Christmas Day and Good Friday.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required. Otherwise National Identity Cards, if available.

AUTHORITY: Portnet, P.O.Box 32696, Braamfontein 2017, Johannesburg, South Africa. *Tel:* (011) 7738300. *Telex:* 424205. *FAX:* (011) 7738304. *Contact:* The Chief Executive.

Mossel Bay: Portnet, Bland Street, Mossel Bay, South Africa. *Tel:* (04441) 46271, 3404. *Contact:* Harbour Master/Pilot.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 17 (82 Bland Street), Mossel Bay 6500, South Africa. Tel: (04441) 7117. Telex: 248123.

PORT ELIZABETH: (Algoa Bay): 33.57 S. 25.39 E.

(See Plan)

PORT LIMITS: Bounded on the Southward by a line drawn from Cape Recife, East (true) to a point in the Indian Ocean, distant 1,609 m. on the Northward by a line drawn from the extreme point of the East bank of the Swartkops River, East (true) distant 1,609 m. on the Eastward by a line drawn between these 2 points, and shall embrace the foreshore between high and low water marks from Cape Recife lighthouse to the aforesaid line at East bank of the Swartkops River, including that portion of the said river which lies on the seaward side of the bridge carrying the railway line to Alicedale, together with the jetties, harbour works and all land vested in the Government of the Republic of South Africa.

DOCUMENTS:

Customs
Form DA.1 Report Inwards/Outwards for ships.
Form DA.3 Certificate of clearance for ships.
Form DA.4 Transire – for a destination in the R.S.A.
Form DA.5 List of sealable goods on board ship.
Ship's Crew List (Customs Department).
Livestock Form (Customs Department).
Post Office
P1/27 Notice of arrival and departure of vessel.
P1/8 Declaration and Post Office Certificate.
Port Health
Maritime Declaration of Health.
Crew List with last vaccination dates.
Derat or Derat Exemption Certificate.
Port Authority
T958 Report of Arrival.
T962 A Departure/Shifting Notification.
Ship's Manifest.
Also see "Cape Town" – Shipmaster's Report, March 1981.

PILOTAGE: Pilotage is compulsory. Messages addressed to Port Captain, Port Elizabeth. Initial ETA together with draft, 72 hours prior to arrival, updated 12 hours prior to arrival and confirmed with Port Control when within VHF range and when 16 miles East of the breakwater head for ships coming from Eastward and 3.5 miles South of Cape Recife for ships coming from Westward. VHF radio calling on Channel 16. Working frequency Channel 12.

Pilot boats fitted with multi-channelled VHF. Pilot boats black hull with white superstructure, "Pilot-Loods" painted black on white. Pilot boat stationed inside harbour and meets ship on arrival approximately 2.5 nautical miles North East of South breakwater head. Boarding requirements consist of pilot ladder together with 2-manropes or pilot hoist. Pilot ladder usually rigged on starboard side.

Algoa Bay is considered a safe anchorage for all sizes of ships, the bottom consisting mainly of sand. Usual anchorage for ships awaiting Pilot is 3.5 km. Eastward of breakwater, in the Outer Anchorage. Predominant winds are Westerly all the year, with East/South Easterly during the Summer months. The Westerly winds are the stronger of the two but are off land and cause little difficulty. Easterlies being from the sea are inclined to cause an uncomfortable sea.

ANCHORAGE: See "Pilotage".

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Dry-cargo ships 0600 to 2200 hrs. Pilot must be aboard by 2030 hrs.

Vessels which are considered *not gas free* are restricted to daylight entry only.

MAX. SIZE:

	Max. length	*Draft*
Passenger, dry-cargo and container vessels	Subject to Port Captain's prior approval	11.6 m.
Tankers	203.3 m. overall	9.7 m.
Ore carriers	251.5 m.	11.6 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared.

Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Port Elizabeth Radio. Call sign ZSQ.

VHF: See "Pilotage".

TUGS: Three "Z-Peller" diesel tugs with a bollard pull of 30 tons and fitted with firefighting and salvage capabilities are available, fitted with radar and VHF. Tugs join between anchorage and harbour entrance. Tug's wires used at no extra charge.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 1 (7th Floor, Sanlam Building, 44 Main Street), Port Elizabeth 6000. Tel: (041) 559153. Telex: 243445. Fax: (041) 23636.

PORT NOLLOTH: 29.15 S. 16.50 E. (See Plan)

PORT LIMITS: Northward by a line drawn 245° from North Point to a point 4,827 m. from the shore; Westward by a line drawn 155° from the above point to the point where it meets a line drawn 245° from Guap Point, Southward by the latter line.
DOCUMENTS: Port Nolloth is not a port of entry for foreign going vessels. Any vessel arriving from outside South Africa must enter at either Cape Town, Walvis Bay or other South African ports. Only document required is 1 copy of the arrival form.
PILOTAGE: None. Harbour Master will give directions either from the shore, or will come on board a vessel if requested. 72 hours advance notice of ETA required. Harbour Master stands by on VHF Channel 16 and R/T 2182 kHz from 0800 to 1700 hrs. Monday to Friday, 0800 to 1200 hrs. Saturday. Outside these hours only if a vessel is expected.
ANCHORAGES: Anywhere about 0.5 miles seaward of the Fairway Buoy, usually just North or South of the transit line.
RESTRICTIONS: Daytime port only. Entry usually only possible about 2 to 3 hours either side of HW. Tide gauge on jetty and vessels only allowed to enter when 1 m. above chart datum shown on this gauge.
MAX. SIZE: Length 200 ft., draft 4 m.
HEALTH: Pratique automatic as vessel must have cleared at another South African port.
RADIO: Local radio station as under "Pilotage", or call Cape Town Radio.
VHF: VHF in Harbour Master's Office; (Multi-Channel). R/T 2182 kHz. Other VHF Channels available (i.e. 6, 10) on portable VHF sets.
RADAR: Not available.
TUGS: None. 40 ft. launch available if required.
BERTHING: 1 berth, 217 ft. long. Depth alongside 3.5 m. at Chart Datum.
CRANES: 1 electric travelling crane, 7.5 tons SWL (only 4 tons SWL under normal cargo working). 1×7.5 ton mobile crane available.
STEVEDORES: Stevedores supplied by Marine West (Pty) Ltd. who operate the port. 2 gangs available, no advance notice required.
MEDICAL: Local hospital, no resident doctor. Main hospital at Alexander Bay (80 km. distant). Doctor visits Port Nolloth 4 mornings a week.
TANKERS: Tankers discharge alongside main cargo jetty. Gas oil only. No slop discharge facilities and no loading of oil. Discharge by vessel's pumps, 2 discharge lines available (Shell and Caltex).
DENSITY: 1025.
FRESH WATER: Fresh water available, brackish in quality. Delivery by small bore hose (garden tap size); pressure dependent on municipal mains.
FUEL: Marine diesel available on all 3 jetties (2 fishing jetties and main cargo jetty). Delivery from standard type pump nozzle.
FIRE PRECAUTIONS: Normal when discharging gas oil.
CONSULS: None.
REPAIRS: Small deck and engine repairs can be undertaken.
DRY DOCKS: None. 1 slipway for vessels up to 20 m. length and 60 g.r.t.
SURVEYORS: No cargo surveyors. South African Department of Transport represented by the Harbour Master.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Opening/closing carried out by vessel's crew.
CUSTOMS ALLOWANCES: No Customs Officers available.
REPATRIATION: In emergency only.
AIRPORT: Alexander Bay 80 km.; Springbok 140 km. Daily flights from Springbok to Cape Town. 3 weekly flights from Alexander Bay to Cape Town and to Luderitz, Johannesburg, Walvis Bay and Windhoek.
TIME: GMT plus 2 hours throughout the year.
HOLIDAYS: Good Friday, Day of the Vow (December 16th), Christmas Day, Boxing Day and New Year's Day are holidays – cargo work can be arranged on some of these days, but it is not usually asked for.
POLICE/AMBULANCE/FIRE: Police – Port Nolloth Tel: 8320 Ambulance – Port Nolloth Tel: 8345 (municipality) or Tel: 8411 (state). Fire – No fire brigade in the town – Marine West fire fighting facilities Tel: 8355 or 8597 or Tel: 8441 after office hours.
EMERGENCY CO-ORDINATION CENTRE: Port Captain, Cape Town. Tel: Cape Town (021) 2183413. Telex: 01283.

Port Captain, Walvis Bay, Tel: Walvis Bay (0642) 8217.
